But the fact is that there is more agriculture in Pennsylvania than among many of those who have gone to the western plains, out to the granary of the world and the great corn belts of the Middle West, and all that. We have a great agricultural industry in Pennsylvania, and I am much interested in it. When I came in the course of my studies to a beautiful sentiment expressed by Edward Everett, I thought you would appreciate it and thereby could understand why I was inspired to come to the front here and say a few words this afternoon. After I read it I will likely make a few more observations. Here is what Edward Everett said about agriculture:

> Before the heaving bellows had urged the furnace, before a hammer had struck upon an anvil, before the gleaming waters had flashed from an oar, before trade had hung up its scales or gauged its measures the culture of the soil began. "To dress the garden and keep it"—this was the keynote struck by the hand of God himself in that long, joyous, wailing, triumphant, troubled, pensive strains of life music, which sounds through the generations and ages of our race.

[Applause.]

So much for Edward Everett.

Now, as to the assistance that we are supposed to give the farmer, I am surprised that so much has been said about his inability to take care of himself. This $36,000,000 is a bagatelle for the farmers. If agriculture is the queen of all occupations, in the presence of $4,000,000,000 of appropriations which we are about to pass for all purposes, or will have passed by the end of the session, it seems to me that $36,000,000 is the most insignificant amount that we could appropriate. If it is necessary for the farmer to have $100,000,000 to develop those things which sustain human life, then that is the first place we ought to make an appropriation. But it strikes me that there is a suggestion or two in connection with all of these voluminous bills, carrying millions of dollars, as far as the American farmer is concerned.

In the first place, do not worry about him, but do him justice. One thing that has been discussed here so often and so long is that of getting his product to market, so that there may not be a condition existing such as was described here yesterday, depicting the farmer way out on the land, and being in hard luck, and then undertaking to reconcile that hard-luck story——

The CHAIRMAN. The time of the gentleman has expired.

Mr. FOCHT. I would like to have three minutes more, if the gentlemen will let me have it.

The CHAIRMAN. The gentleman asks unanimous consent to be allowed to proceed for three additional minutes. Is there objection?

Mr. ANDERSON. Reserving the right to object, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in three minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. McARTHUR. Reserving the right to object, will the gentleman answer a question?

Mr. FOCHT. I do not know that it will be possible to answer every question that you might ask. But I will try to do so. Go ahead.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to be allowed to proceed for three additional minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. McARTHUR. Mr. Chairman, will the gentleman yield?

Mr. FOCHT. Yes; go ahead.

Mr. McARTHUR. I want to know if the gentleman from Pennsylvania is aware of the fact that in the cooperative movement for the testing of tubercular cattle during the last fiscal year, ending June 30, 1920, there were tested in my State of Oregon 22,000 and in the gentleman's State 19,000?

Mr. FOCHT. No; I was not aware of that fact; but you have more bad cattle yet. I am glad to have the gentleman's information. But he is reading statistics, I understand, and it is of no use for me to refer further to statistics which may prove anything. What I want to say, Mr. Chairman, is this: That, so far as the farmer is concerned, he can take care of himself if we will take care of that robbery that is committed from the farm to the market [applause], so that somewhere from the hard-luck story that we heard yesterday down to the 80-cent butter and the 90-cent eggs that my wife bought to-day, some one is profiteering and thereby invites a hanging. That is all that the farmer needs—a square deal. He will take care of himself if he is given a chance.

We need these scientists. They may kill, or they may cure, and their mistakes may be buried, but we should appropriate this money. I am for it. I have always been for adequate salaries and a sufficient number of employees and efficiency, and I have never heard my constituents complain.

Mr. BLANTON. The gentleman paid too much, because the price of Blue Valley butter to-day is 70 cents and the price of the best eggs is 80 cents. [Laughter.]

Mr. FOCHT. Yes; that may be true, but I am guided rather by the odor than a name. [Laughter.]

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

The question is on agreeing to the amendment offered by the gentleman from Minnesota.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

> For all necessary expenses for the eradication of southern cattle ticks, $660,000: *Provided*, That no part of this appropriation shall be used for the purchase of animals or in the purchase of materials for or in the construction of dipping vats upon land not owned solely by the United States, except at fairs or expositions where the Department of Agriculture makes exhibits or demonstrations; nor shall any part of this appropriation be used in the purchase of materials or mixtures for use in dipping vats except in experimental or demonstration work carried on by the officials or agents of the Bureau of Animal Industry.

Mr. JONES of Texas. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Texas moves to strike out the last word.

Mr. JONES of Texas. Mr. Chairman, my purpose in doing this is to call again to the attention of the committee the question of vaccine which was distributed for blackleg by the department for several years. The custom has prevailed in that department to distribute blackleg vaccine, which was found upon test to be of some benefit in the treatment of a fatal disease that afflicts cattle. Now, for a long period of time the people in the cattle-raising sections were accustomed to use a great deal of this vaccine. Some years ago the Agricultural and Mechanical College of Kansas discovered a system that was far superior to the old serum that was used, and practically all the stockmen discarded the Government vaccine and began to use the other. An effort was made to get the department to adopt the new form of vaccine. They could do so because the formula was not patented. It was a free formula that everyone might use. The Agricultural and Mechanical College of Kansas perfected the formula and was willing that the public should have the benefit of it, and did not seek to exploit it in any way.

I took it up with the head of the department that handled those matters, and he freely conceded that the Manhattan vaccine, as it is sometimes termed, is far superior to the kind that the Government is using, and yet the Government continues to use the old form of vaccine. I asked him the reason for doing so, and he said it was too expensive to obtain the better form of vaccine, saying that he had observed certain rules with respect to securing it, and that it was necessary to kill yearlings and inoculate them with this blackleg and then produce the serum from the dead animal.

I called his attention to the fact that in my country stockmen claimed that they have been inoculating burros, and that they can get them for $4 or $5 apiece and make the serum from them. He said he was under the impression that they could not

be given this disease. At any rate, it seems passing strange to me that the department would continue to use the old form of vaccine when practically all the stockmen who have handled stock in great numbers have discarded that form and are using the new and better form. If we are to have anything of this character, an appropriation should be made such as to enable the department to make and distribute the best form of serum.

It seems to me that in so far as the Government is going to continue in this line of investigation by this method of distribution it should secure the best. What they do distribute should be of that character. I can not see any reason, simply because the inferior form happens to be a little cheaper, why they should continue to use it, and I believe that whatever money is expended by the department should be expended in investigating and using the better form of serum.

I do not understand why that matter was not brought to the attention of the committee. I took it from the investigation that I made and that of several others that it would probably be brought to the attention of the committee. I believe it is important enough, if we are going to have investigations of these various diseases, to secure the best that can be had. I simply wanted to call this to the attention of the committee, so that the department would be called upon for its opinion with reference to this matter and for its reason for continuing the distribution of this inferior form of vaccine, which according to their own admission is inferior.

The CHAIRMAN. The gentleman withdraws his pro forma amendment. The Clerk will read.

The Clerk read as follows:

For all necessary expenses for investigations and experiments in dairy industry, including repairs, alterations, improvements, and additions to buildings absolutely necessary to carry on experiments, including the employment of labor in the city of Washington and elsewhere, cooperative investigations of the dairy industry in the various States, and inspection of renovated-butter factories, $375,000.

Mr. HAUGEN. Mr. Chairman, I reserve a point of order for the purpose of asking the gentleman in charge of the bill if he does not think a limitation should be placed on the provision in line 21, "Additions to buildings absolutely necessary"?

Mr. ANDERSON. This does not contemplate the construction of new buildings.

Mr. HAUGEN. The additions might be several times the cost of the original building.

Mr. ANDERSON. I doubt if the comptroller would construe such an addition to be within the language of this appropriation. The department asked for the insertion in the bill of a provision authorizing the erection of buildings, evidently contemplating the erection as well as the repairs and improvements of buildings. The committee struck out that word. I do not know just what limitation the gentleman has in mind. If this language is too broad, I have no objection to limiting it.

Mr. HAUGEN. A limitation of cost, of course, would be the only limitation we could place on it. It is customary to do that.

Mr. ANDERSON. I have no objection to a limitation of cost if the gentleman desires to offer such an amendment. I do not think this provision is subject to any abuse. I think the department really has the authority now, and I suppose the general limitations of cost would apply. For that reason it seems to me the language is entirely safe.

The CHAIRMAN. Does the gentleman withdraw his reservation of the point of order?

Mr. HAUGEN. I am going to leave the matter to the discretion of the chairman of the committee. I think there should be a limitation. We have always placed such a limitation, and I am afraid that much of the $375,000 may be used for a building if no limitation is placed on it. I simply call it to the attention of the chairman of the committee and leave it to him to determine for himself.

Mr. ANDERSON. I call the attention of the gentleman to the fact that the same language has been carried in the next item for many years without any limitation. The gentleman knows that we have a dairy farm at Beltsville and another one down in Louisiana, and it is necessary to have some flexibility in making ordinary repairs of buildings in order to carry on the work of the department. The gentleman knows it better than most of us.

Mr. HAUGEN. The gentleman knows that we have expensive buildings, and we ought in my estimation to place a limitation on this item.

Mr. BLANTON. Mr. Chairman, I make the point of order that there is no quorum present.

Mr. ANDERSON. Will the gentleman withhold his point of order until we dispose of this item?

Mr. BLANTON. I withdraw the point of order.

Mr. HAUGEN. I simply desire to call the attention of the gentleman in charge of the bill to this matter. I am inclined to believe, in view of what has taken place in the past, that we ought to place this limitation on the item.

Mr. BLANTON. The gentleman from Minnesota has had his attention called to it. He understands it.

Mr. ANDERSON. I do not think it is necessary.

Mr. HAUGEN. I do not make the point of order.

The CHAIRMAN. The gentleman from Iowa withdraws his point of order.

Mr. ANDERSON. I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HICKS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the Agricultural appropriation bill, H. R. 15812, had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted—

To Mr. DENISON, indefinitely, on account of illness.

To Mr. KENNEDY of Rhode Island, indefinitely, on account of sickness in his family.

LEAVE TO EXTEND REMARKS.

By unanimous consent, leave was granted to Mr. SUMNERS of Texas, to Mr. JONES of Texas, and to Mr. HAYDEN to extend their remarks on the Agricultural appropriation bill.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed the following resolution:

Senate resolution 431.

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. CHARLES F. BOOHER, late a Representative from the State of Missouri.

Resolved, That a committee of six Senators be appointed by the Vice President, to join the committee appointed by the House of Representatives, to take order for the superintending of the funeral of Mr. BOOHER at Savannah, Mo.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives.

Resolved, That as a further mark of respect the Senate do now adjourn.

And that the Vice President had appointed as the committee on the part of the Senate Mr. REED, Mr. SPENCER, Mr. TRAMMELL, Mr. FERNALD, Mr. DIAL, and Mr. CAPPER.

The message also announced that the Senate had passed without amendment joint resolution (H. J. Res. 440) directing the Secretary of War to cease enlisting men in the Regular Army of the United States except in the case of those men who have already served one or more enlistments therein.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 4787. An act granting consent for the construction, maintenance, and operation of a bridge across the Delaware River from the city of Philadelphia, Pa., to the city of Camden, N. J.; and

S. 4825. An act to extend the time for the construction of a bridge across the Columbia River, between the States of Oregon and Washington, at or within 2 miles westerly from Cascade Locks, in the State of Oregon.

SENATE JOINT RESOLUTION AND BILLS REFERRED.

Under clause 2, Rule XXIV, Senate joint resolution and bills of the following titles were taken from the Speaker's table and referred to their appropriate committees as indicated below:

S. J. Res. 236. Joint resolution directing the Secretary of War to cease enlisting men in the Regular Army of the United States until the number of enlisted men shall not exceed 175,000; to the Committee on Military Affairs.

S. 4825. An act to extend the time for the construction of a bridge across the Columbia River, between the States of Oregon and Washington, at or within 2 miles westerly from Cascade Locks, in the State of Oregon; to the Committee on Interstate and Foreign Commerce.

S. 4787. An act granting consent for the construction, maintenance, and operation of a bridge across the Delaware River from the city of Philadelphia, Pa., to the city of Camden, N. J., and also to consent to an agreement between the States of Pennsylvania and New Jersey and the city of Philadelphia for the construction, maintenance, and operation of such bridge; to the Committee on Interstate and Foreign Commerce.

DEATH OF EX-REPRESENTATIVE H. C. CLAYPOOL.

Mr. RICKETTS. Mr. Speaker, I ask unanimous consent to address the House for one minute.

The SPEAKER. The gentleman from Ohio asks unanimous consent to address the House for one minute. Is there objection?

There was no objection.

Mr. RICKETTS. Mr. Speaker and gentlemen of the House, it is with deepest regret I announce the sudden death of a former Member of this House from my State, Hon. Horatio C. Claypool, of Chillicothe, Ohio, who rendered a valuable and distinctive service to his constituency and the country during the Sixty-second, Sixty-third, and Sixty-fifth Congresses.

In manner Mr. Claypool was affable, congenial, and pleasant, and enjoyed the respect and confidence of a host of friends.

In his demise Ohio has lost one of her most distinguished sons and Chillicothe and Ross County have lost an honored and valued citizen.

ADJOURNMENT.

Mr. ANDERSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 57 minutes p. m.) the House adjourned until Monday, January 24, 1921, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV:

364. A letter from the Secretary of the Treasury, transmitting copy of communication from the Secretary of War, submitting supplemental estimates of appropriations required by the Engineer Department of the Army for expenses of buildings and grounds in Washington, fiscal year 1921 (H. Doc. 993), was taken from the Speaker's table, referred to the Committee on Appropriations, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. PORTER, from the Committee on Foreign Affairs, to which was referred the bill (H. R. 15834) authorizing the accounting officers of the Treasury to adjust certain accounts of certain diplomatic and consular officers, reported the same with an amendment, accompanied by a report (No. 1218), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. SINCLAIR, from the Committee on Indian Affairs, to which was referred the bill (S. 126) conferring jurisdiction on the Court of Claims to permit the Yanktonai and Cuthead Bands of Sioux Indians to intervene in the action of the Sisseton and Wahpeton Bands of Sioux Indians against the United States (Docket No. 33731), and to hear, determine, and render judgment in said action in claims of Yanktonai and Cuthead Bands of Sioux Indians against the United States, reported the same without amendment, accompanied by a report (No. 1224), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House as follows:

Mr. REED of New York, from the Committee on War Claims, to which was referred the bill (H. R. 1307) for the relief of the heirs of Adam and Noah Brown, reported the same without amendment, accompanied by a report (No. 1219), which said bill and report were referred to the Private Calendar.

Mr. EDMONDS, from the Committee on Claims, to which was referred the bill (S. 3743) for the relief of W. R. Grace & Co., reported the same without amendment, accompanied by a report (No. 1220), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (S. 4250) for the relief of John B. Elliott, reported the same without amendment, accompanied by a report (No. 1221), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 15530) for the relief of Ephraim Lederer, collector of internal revenue for the first district of Pennsylvania, reported the same without amendment, accompanied by a report (No. 1222), which said bill and report were referred to the Private Calendar.

Mr. MILLER, from the Committee on Military Affairs, to which was referred the bill (S. 3176) to authorize the President of the United States to appoint Marion C. Raysor an officer of the Army, reported the same without amendment, accompanied by a report (No. 1223), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Public Buildings and Grounds was discharged from the consideration of the bill (H. R. 15793) authorizing the Secretary of the Interior to purchase necessary lands for the use of the Government fuel yards, for the erection of a garage, and payment by check by branches of the Federal Government for fuel furnished, and the same was referred to the Committee on Mines and Mining.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. SMITH of Illinois: A bill (H. R. 15851) to reimburse officers, nurses, and civilian employees of the United States Public Health Service and inmates of the United States Public Health Service Hospital at Corpus Christi, Tex., for losses sustained as a result of a storm which occurred in Texas upon September 14, 1919; to the Committee on Claims.

By Mr. HULINGS: A bill (H. R. 15852) to provide for the investigation of frauds or errors committed at primary elections for the nomination of candidates for Congress in the House of Representatives and for the correction thereof, and for other purposes; to the Committee on Election of President, Vice President, and Representatives in Congress.

By Mr. FESS: A bill (H. R. 15853) to amend an act entitled "An act to provide for vocational rehabilitation and return to civil employment of disabled persons discharged from the military or naval forces of the United States, and for other purposes," approved June 27, 1918, as amended by the act of July 11, 1919; to the Committee on Education.

By Mr. KAHN: A bill (H. R. 15854) relating to the creation of the office of lieutenant general of the Armies of the United States; to the Committee on Military Affairs.

Also, a bill (H. R. 15855) authorizing the Secretary of War to furnish free transportation and subsistence from Europe to the United States for certain destitute discharged soldiers and their wives and children; to the Committee on Military Affairs.

By Mr. CAMPBELL of Pennsylvania: A bill (H. R. 15856) fixing the compensation of Senators, Representatives in Congress, Delegates from Territories, and Resident Commissioners; to the Committee on the Judiciary.

By Mr. NEWTON of Minnesota: A bill (H. R. 15857) further regulating the granting of visés by diplomatic and consular officers of the United States, and for other purposes; to the Committee on Foreign Affairs.

By Mr. LEHLBACH: A bill (H. R. 15858) supplemental to an act entitled "An act for the retirement of employees in the classified civil service, and for other purposes" (Public, No. 215, 66th Cong.), approved May 22, 1920; to the Committee on Reform in the Civil Service.

By Mr. PETERS: A bill (H. R. 15859) authorizing the Secretary of the Navy to transfer to the Fleet Naval Reserve any enlisted man of the naval service with 16 or more years' naval service; to the Committee on Naval Affairs.

By Mr. SISSON: A bill (H. R. 15860) providing for the purchase of farm loan bonds; to the Committee on Banking and Currency.

By Mr. HILL: Joint resolution (H. J. Res. 455) proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. SWEET: Joint resolution (H. J. Res. 456) authorizing and directing the accounting officers of the Treasury to allow credit to the disbursing clerk of the Bureau of War Risk Insurance in certain cases; to the Committee on Interstate and Foreign Commerce.

By Mr. HUDSPETH: Resolution (H. Res. 650) authorizing the Committee on Agriculture to make certain investigations of the Wool Administration, War Department, regarding wool taken over by the Government in Texas during the late war; to the Committee on Rules.

By Mr. RAKER: Memorial of the Legislature of California, relating to the protection of the quicksilver-mining industry; to the Committee on Ways and Means.

Also, memorial of the Legislature of California, relative to the naturalization and property rights of aliens; to the Committee on Immigration and Naturalization.

Also, memorial of the Legislature of California, relating to the protection of the poultry industry; to the Committee on Ways and Means.

By Mr. STINESS: Memorial of the General Assembly of Rhode Island, requesting of the Subcommittee on Appropriations of the United States House of Representatives a sufficient sum for the proper and efficient maintenance of the United States Naval Training Station, Newport, R. I.; to the Committee on Appropriations.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. DOREMUS: A bill (H. R. 15861) to confirm private claim No. 61 in the township of Ecorse, Wayne County, Mich.; to the Committee on the Public Lands.

By Mr. DYER: A bill (H. R. 15862) granting a pension to Josephine Holmes; to the Committee on Pensions.

By Mr. HARRELD: A bill (H. R. 15863) granting an increase of pension to Olive G. Hughes; to the Committee on Invalid Pensions.

By Mr. HILL: A bill (H. R. 15864) for the relief of Chancey W. Peak; to the Committee on War Claims.

By Mr. RICKETTS: A bill (H. R. 15865) granting a pension to Frances Melcher; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15866) granting a pension to James Campbell; to the Committee on Invalid Pensions.

By Mr. RUBEY: A bill (H. R. 15867) granting a pension to Martha Baker; to the Committee on Invalid Pensions.

By Mr. SELLS: A bill (H. R. 15868) granting an increase of pension to William M. Lillard; to the Committee on Pensions.

By Mr. WOOD of Indiana: A bill (H. R. 15869) granting a pension to Jennie Hutton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15870) granting a pension to Charles Dilden; to the Committee on Pensions.

Also, a bill (H. R. 15871) granting a pension to Francis M. Washburn; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5164. By Mr. CURRY of California: Petition of residents of Sacramento, Calif., protesting against the Fess-Capper bill; to the Committee on Education.

5165. Also, petition of the Retail Grocers' Association of Stockton, Calif., opposing tax on sales; to the Committee on Ways and Means.

5166. By Mr. DARROW: Memorial of the Philadelphia Board of Trade, opposing Senate bill 4711, requiring all ships sailing under a foreign flag and entering the ports of the United States or clearing therefrom to have a permit from the United States Shipping Board; to the Committee on the Merchant Marine and Fisheries.

5167. By Mr. DYER: Petition of the Chamber of Commerce of Oklahoma City, Okla.; J. H. Winchester & Co., National Bottle Manufacturers' Association, Atlantic Coast Shipbuilders' Association, New York City; and Northwestern Towboat Owners' Association, of Seattle, Wash., favoring House bill 13591, regarding collisions by vessels belonging to the United States; to the Committee on the Judiciary.

5168. Also, petition of B. M. Schlueter, St. Louis, Mo., opposing House bill 14657 and Senate bill 4561; to the Committee on Agriculture.

5169. Also, petition of Consolidated Saw Mills Co., Hyman-Michaels Co., Steel & Hibbard Lumber Co., and the Shapleigh Hardware Co., all of St. Louis, Mo., urging passage of the Winslow bill, making payments to railroads; to the Committee on Interstate and Foreign Commerce.

5170. Also, petition of C. P. Hutchinson, Webster Grove, Mo., favoring the Smith-Towner bill; to the Committee on Education.

5171. Also, petition of Philip Schwartz, St. Louis, Mo., opposing House bill 14657 and Senate bill 4561; to the Committee on Agriculture.

5172. Also, petition of Leppert-Roos Fur Co., of St. Louis, Mo., favoring the repeal of revenue legislation; to the Committee on Ways and Means.

5173. Also, petition of the Midget Consolidated Gold Mining Co., of St. Louis, Mo., urging relief for the gold-mining industry; to the Committee on Ways and Means.

5174. Also, petition of the Chamber of Commerce of Kansas City, Mo., recommending changes in legislation with a view to improving the economic condition of the country; to the Committee on Ways and Means.

5175. Also, petition of William R. Warner & Co., St. Louis, Mo., opposing the granting of water rights in national parks; to the Committee on the Public Lands.

5176. Also, petition of Louis Wessbecher, St. Louis, Mo., protesting against the occupation of German territory by French colonial troops; to the Committee on Foreign Affairs.

5177. Also, petition of Neidringhaus Metalware Corporation, St. Louis, Mo., favoring passage of Senate bill 4204, to prohibit interference with interstate commerce; to the Committee on Interstate and Foreign Commerce.

5178. By Mr. GALLIVAN: Petition of the Consumers' League of Massachusetts, favoring the Gronna bill (S. 3944); to the Committee on Agriculture.

5179. Also, petition of Irene Glenn, of Boston, Mass., favoring the Smith-Towner bill; to the Committee on Education.

5180. Also, petition of Irving C. Tomlinson, C. S. B., and Alice P. Tapley, of Boston, Mass., favoring House bill 14854 and Senate bill 4593, to the Committee on Agriculture.

5181. Also, petition of John F. Carey, of Roxbury, Mass., opposing the Smith-Towner bill; to the Committee on Education.

5182. Also, petition of John L. Saltonstall, of Boston, Mass., and L. D. Knowlton, N. R. O., favoring an appropriation of $500,000 for the Naval Reserve Force; to the Committee on Appropriations.

5183. Also, petition of W. L. Montgomery & Co., of Boston, Mass., protesting against an import duty on hides; to the Committee on Ways and Means.

5184. Also, petition of Babsons Statistical Organization (Inc.), of Wellesley Hills, Mass., favoring an appropriation for the Shipping Board which will enable it to finish vessels which are under construction and are nearly built; to the Committee on Appropriations.

5185. Also, petition of the National Association of United States Customs Inspectors of Boston, Mass., favoring H. R. 15089 and S. 4693; to the Committee on Ways and Means.

5186. By Mr. KENNEDY of Rhode Island: Resolution of the General Assembly of the State of Rhode Island, requesting a sufficient appropriation for the proper and efficient maintenance of the United States Naval Training Station at Newport, R. I.; to the Committee on Appropriations.

5187. Also, resolutions of Newport (R. I.) Chamber of Commerce, urging adequate appropriation for maintenance of Newport Naval Training Station; to the Committee on Appropriations.

5188. By Mr. LAMPERT: Refinancing plan for United States Government, by R. D. Wynn, president and general manager of the Molle Typewriting Co., Oshkosh, Wis., January 24, 1921; to the Committee on Ways and Means.

5189. By Mr. LINTHICUM: Petition of Robert F. Leach, jr., and Women's Civic League, Baltimore, regarding appropriation for social hygiene work; to the Committee on Appropriations.

5190. Also, petition of Dr. Lillian Welsh, Baltimore, regarding Smith-Towner bill; to the Committee on Education.

5191. Also, petition of R. W. Baldwin, Savage, Md., regarding S. 4828; to the Committee on Interstate and Foreign Commerce.

5192. Also, petition of the Women's Civic League, Baltimore, regarding H. R. 15228; to the Committee on Reform in the Civil Service.

5193. Also, petition of Fehsenfeld Cigar Co., Baltimore, Md., regarding tax on tobacco; to the Committee on Ways and Means.

5194. Also, petition of Mrs. Mary H. Tormey, Baltimore, regarding H. R. 14961; to the Committee on Interstate and Foreign Commerce.

5195. By Mr. LUFKIN: Petition of members of Elizabeth H. Whittier Club, Amesbury, Mass., expressing their hope and belief that American citizenship may be conferred on the American Indians; to the Committee on Indian Affairs.

5196. By Mr. NEWTON of Minnesota: Petition of Mrs. Emma S. Seale and sundry other citizens, of Minneapolis, Minn., opposing the Sheppard-Towner bill; to the Committee on Interstate and Foreign Commerce.

5197. By Mr. O'CONNELL: Petition of the Chamber of Commerce of the State of New York, favoring Senate bill 4594 and House bill 14461 as amended; to the Committee on Immigration and Naturalization.

5198. Also, petition of Henry E. Leonard, of Brooklyn, N. Y., and the Isle of Pines, protesting against a higher duty on citrus fruits; to the Committee on Ways and Means.

5199. By Mr. SHERWOOD: Petition of District Lodge, No. 57, of the International Association of Machinists, Toledo, Ohio, favoring the resumption of free and unrestricted commercial exchange and traveling privileges with Soviet Russia; to the Committee on Foreign Affairs.

5200. By Mr. STINESS: Petition of the Chamber of Commerce of Newport, R. I., urging that the Subcommittee on Naval Appropriations of the Committee on Appropriations provide a sum sufficient for the proper maintenance of the Newport Training Station; to the Committee on Appropriations.

5201. By Mr. TAGUE: Petition of Loose-Wiles Co., the Loose-Wiles Biscuit Co., and the Windsor Confectionery Co., all of Boston, Mass., favoring a 1 per cent gross sales tax on candies; to the Committee on Ways and Means.

5202. Also, petition of the Public Education Association of Worcester, Mass., favoring the Fess-Capper bill; to the Committee on Education.

5203. Also, petition of Leas & McVitty Co., of Boston, Mass., protesting against an import duty on hides; to the Committee on Ways and Means.

5204. By Mr. TEMPLE: Petition of the Civic Club of Midland, Pa., protesting against the passage of the Yellowstone National Park bill (H. R. 12466); to the Committee on the Public Lands.

5205. Also, petition of the Woman's Club of Ambridge, Pa., in support of the Sheppard-Towner bill (H. R. 10925), the Smith-Towner bill (H. R. 7), and protesting against the passage of the Yellowstone National Park bill (H. R. 12466); to the Committees on Education, Interstate and Foreign Commerce, and the Public Lands.

5206. Also, petition of the Woman's Club of Woodlawn, Pa., protesting against the passage of the Yellowstone National Park bill (H. R. 12466); to the Committee on the Public Lands.

5207. Also, petition of the Woman's Club of Woodlawn, Pa., supporting the Smith-Towner bills (S. 1107; H. R. 7); to the Committee on Education.

5208. Also, petition of the Woman's Club of Woodlawn, Pa., supporting the Sheppard-Towner bills (S. 3259; H. R. 10925); to the Committee on Interstate and Foreign Commerce.

5209. Also, petition of the Civic Club of Midland, Pa., in support of the Sheppard-Towner bills (S. 3259; H. R. 10925); to the Committee on Interstate and Foreign Commerce.

5210. Also, petition of the Civic Club of Midland, Pa., in support of the Smith-Towner bills (S. 1107; H. R. 7); to the Committee on Education.

5211. By Mr. THOMPSON: Petition of the committee on law, Van Wert (Ohio) Lodge, No. 667, International Association of Machinists, asking for the appointment of national boards of adjustment to handle controversies between the railroads and their employees; to the Committee on Interstate and Foreign Commerce.

5212. By Mr. YATES: Petition of Mr. and Mrs. Roy E. Peters, favoring the Fess-Capper bill (H. R. 12652); to the Committee on Education.

5213. By Mr. YOUNG of North Dakota: Petition of the Woman's Club of Barton, N. Dak., expressing disapproval of the Smith bill (H. R. 12466); to the Committee on the Public Lands.

5214. Also, petition of the faculty of the State Normal School of Dickinson, N. Dak., and Woman's Club of Barton, N. Dak., favoring the Smith-Towner bill; to the Committee on Education.

5215. By Mr. ZIHLMAN: Petition of the Merchants' & Manufacturing Association of Baltimore, opposing Senate bill 3390, the Muscle Shoals bill; to the Committee on Appropriations.

5216. Also, petition of the Charles County Sheep Growers' Association, La Plata, Md., favoring the passage of the French-Capper truth in fabric bill (H. R. 11641); to the Committee on Interstate and Foreign Commerce.

SENATE.

MONDAY, *January 24, 1921.*

(Legislative day of Tuesday, January 18, 1921.)

The Senate met at 10 o'clock a. m., on the expiration of the recess.

Mr. SMOOT. Mr. President, at the time the recess was taken on Saturday the Senator from Iowa [Mr. KENYON] was occupying the floor on the packer's bill (S. 3944), and if he desires to go on at this time I have no objection, but if not I should like to proceed with what I shall have to say in relation to the bill, whichever course the Senator from Iowa prefers.

Mr. KENYON. I have no desire at all to speak further on the bill.

Mr. SMOOT. Then I shall proceed.

Mr. KENYON. Does the Senator desire a quorum?

Mr. GRONNA. I hope that no Senator will call for a quorum. I shall be glad to proceed if the Senator from Utah is not desirous of doing so at this time.

Mr. SMOOT. It seems to me that the bill is of sufficient importance and means so much not only to the packers of the country but to the business interests of the country generally, Senators ought to be willing to listen to-day to what is said in relation to the measure.

Mr. KENYON. The Senator does not expect that they will?

Mr. SMOOT. I express the hope that they will. I know that in the past they have not done so. If Senators realized what the bill means—I do not mean to the packers, but to the business interests of the United States—I think they would listen to the debate to-day.

Mr. GRONNA. I wish to say to the Senator from Utah that I had intended to speak on Saturday, but gave way to others.

Mr. SMOOT. So did I.

Mr. GRONNA. There are certain statements which I should like to make for the RECORD with reference to the pending bill.

Mr. SMOOT. So far as I am concerned, I am not going to take all the time, I will say to the Senator.

Mr. CURTIS. If the Senator from Utah thinks there ought to be a quorum here, I suggest the absence of a quorum.

The VICE PRESIDENT. Does the Senator from Utah object?

Mr. SMOOT. No; I do not object.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Hale	Knox	Sterling
Ball	Harris	La Follette	Sutherland
Brandegee	Harrison	McCumber	Trammell
Capper	Henderson	McLean	Underwood
Curtis	Johnson, Calif.	Moses	Wadsworth
Dial	Jones, Wash.	Nelson	Walsh, Mass.
Dillingham	Kellogg	Page	Walsh, Mont.
Edge	Kendrick	Robinson	Warren
Elkins	Kenyon	Sheppard	Willis
Gooding	Keyes	Sherman	
Gronna	Kirby	Smoot	

Mr. HARRISON. I wish to announce that the Senator from Oregon [Mr. CHAMBERLAIN] and the Senator from South Dakota [Mr. JOHNSON] are absent by reason of illness.

I wish also to announce that the Senator from Virginia [Mr. SWANSON] and the Senator from Kentucky [Mr. BECKHAM] are absent on official business.

The VICE PRESIDENT. Forty-two Senators have answered to the roll call. There is not a quorum present. The Secretary will call the roll of absentees.

The reading clerk called the names of the absent Senators, and Mr. OVERMAN and Mr. PHIPPS answered to their names when called.

Mr. POMERENE, Mr. SMITH of South Carolina, Mr. FRANCE, Mr. CALDER, Mr. SPENCER, Mr. FERNALD, Mr. HITCHCOCK, Mr. NEW, Mr. PITTMAN, Mr. FLETCHER, Mr. MCKELLAR, Mr. TOWNSEND, Mr. SMITH of Arizona, Mr. LENROOT, and Mr. CULBERSON entered the Chamber and answered to their names.

The VICE PRESIDENT. Fifty-nine Senators have answered to the roll call. There is a quorum present.

Mr. JOHNSON of California. Will the Senator from Utah yield to me for a moment?

Mr. SMOOT. I yield.

Mr. JOHNSON of California. Upon the bill which is pending before the Senate, namely, the bill (H. R. 5726) to fix the compensation of certain employees of the United States, I ask unanimous consent that a vote may be taken, say, to-morrow afternoon at 4 o'clock, or on Wednesday afternoon. I am not particular about the time; but I ask unanimous consent that a vote may be taken upon that bill at a time fixed, and I suggest to-morrow, Tuesday, at 4 p. m.

Mr. DIAL. Mr. President, I object.

MEAT-PACKING INDUSTRY.

Mr. SMOOT. I ask that Senate bill 3944, known as the packers' bill, be laid before the Senate.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 3944) to create a Federal live-stock commission, to define its powers and duties, and to stimulate the production, sale, and distribution of live stock and live-stock products, and for other purposes.

Mr. SMOOT. Mr. President, in the short time that I shall occupy the attention of the Senate on this bill I desire to point out as succinctly as possible the absolute facts in relation to the report made by the Federal Trade Commission and to answer in detail, if I can, some of the statements made in behalf of the bill.

Mr. President, on December 10 the distinguished Senator from Iowa [Mr. KENYON] delivered an elaborate address in support of Senate bill 3944, known as the Gronna bill, to create a Federal live-stock commission, and for other purposes.

As pointed out by him, numerous bills have been introduced during the past two years on the subject of packer regulation. The Federal Trade Commission has made a report of its ex parte investigation of the meat-packing industry, covering several volumes, likewise various committees in both branches of Congress have held exhaustive hearings on the subject.

It would be a monumental task for any Senator to undertake to analyze and discuss the report of the Federal Trade

Commission in detail or the testimony taken at the several hearings before congressional committees, and likewise the provisions of the many bills offered as a remedy for the evils alleged to exist.

I desire to pay tribute to the Senator from Iowa for his usual, thoroughgoing energy in presenting to the Senate such a comprehensive compilation of excerpts and figures from the great mass of official reports and statements of witnesses appearing before congressional committees. I dare say that he has presented the case in the strongest possible light from the viewpoint of the Federal Trade Commission and those advocating governmental control of the meat-packing industry.

I think it may be said that his summary presents the issue in sufficiently compact form, so as to save to all Members of Congress an enormous amount of labor in a study of that side of the case advocated by the proponents of this legislation. It is, perhaps, unfortunate that some Senator, with equal patience, has not found it agreeable or convenient to compile the figures, arguments, and statements on the other side of this question as they have been presented by those active in the management of this great industry, as well as by numerous producers of live stock, small packers, traders in the stockyards, and other persons connected directly or indirectly with the business.

Practically every conclusion and decision reached by the Federal Trade Commission has been categorically denied by the heads of the larger packing concerns. They have denied the existence of an illegal combination in restraint of trade or that they have established, either jointly or severally, a monopoly in the purchase of live stock or in the sale or distribution of the products. The Federal Trade Commission has offered no affirmative proof of the existence of any such agreements. No witness has appeared before any committee of Congress and testified to his knowledge of the existence of any illegal agreement or contract between the larger packers.

The Federal Trade Commission only undertakes to establish its contention by circumstantial evidence and by deduction from facts which the packers and many other witnesses have challenged and declared to be unwarranted. If the circumstances offered and relied upon as proof of an illegal monopoly are insufficient to establish the charges made in the face of positive denial of competent witnesses, or if they can be reasonably explained on any other hypothesis, then the whole fabric falls, and the excuse or justification for the proposed legislation can not be said to exist. Indeed, the distinguished Senator from Iowa has predicated his whole case upon this proposition. During the course of his speech he said:

> What I have to say is based on the hearings before our committee and also on the report of the Federal Trade Commission. If the report of the Federal Trade Commission is unworthy of belief, as has been charged on this floor, then what I have to say falls on the ground.

During the course of my remarks I hope to point out the principal circumstances upon which the Federal Trade Commission has relied in making its case and also the principal conclusions which they reached.

I think that I am entirely conservative and safe in making the following assertions:

1. A thorough study of the carefully selected exhibits and statements prepared by the distinguished Senator from Iowa will show that no legal evidence is contained therein to justify the charges made by the Federal Trade Commission or the conclusions which they set forth in their report, namely:

> That the power of the Big Five in the United States has been and is being unfairly and illegally used to "manipulate live-stock markets, restrict interstate and international supplies of foods, control the prices of dressed meats and other foods, defraud both the producers of foods and consumers, crush effective competition, secure special privileges from railroads, stockyards, and other municipalities, and profiteer."

2. The sentiment in support of the bill mainly arises from two conditions—(a) discontent on the part of some of the agricultural and live-stock interests with respect to the prices received by them for their produce, and (b) an organized propaganda financed by these interests for the purpose of endeavoring to secure a governmental agency which would assist them in procuring satisfactory prices.

3. The great bulk of the exhibits of figures and of the argument of the proponents of the bill arises out of the single proposition that the business done by each of the five larger packers is of extraordinary volume.

4. As regards the remaining portion of the exhibits and of the argument where items are indicated showing close association between the five larger packers or other alleged evils which should be remedied, a thorough understanding of the situation would indicate that the instances are relatively insignificant.

These statements and exhibits are ex parte, and it is obvious that they are assembled from isolated transactions, and that as regards them two observations can safely be made: (a) They are not representative and in all probability can be reasonably answered if the facts in each case could be examined; and (b) in so far as they may be taken as prima facie evidence, none of them are in any way such as to be capable of being considered by or within the jurisdiction of the proposed commission under the bill as it is now drawn.

5. There is a mass of legislation already existing which would afford ample remedy for any injured party in the event that the alleged evils presented have any merit.

The determination of each of the items presented involves not only enormous study on the part of any legislator who wishes to have a correct, impartial, and statesmanlike understanding of the situation, but requires a comprehensive knowledge of existing law and of the details and ramifications of an industry of enormous size and of infinite and complex detail.

As has been stated, the investigation of the Trade Commission was an ex parte proceeding, and was closed without permitting the packers interested a hearing on any of the charges or affording them an opportunity to explain any of the correspondence and other data taken from their files, which, unexplained, has led the commission to make many charges unsupported by the facts, and doubtless is responsible for the construction that has been placed upon the letters and other data at variance with their true purport and meaning. Therefore, it is not surprising that the packers have come forward and charged, and in many respects have shown in their testimony before committees, that the report abounds in inaccuracies, contradictions, and misconceptions.

It is not my purpose to enter into a criticism of the commission or to question the sincerity of its motives, but I shall undertake briefly to show that the commission has erred, through lack of full information, and has misjudged and misconstrued much of the material collected by it, and that its report is predicated upon too flimsy a foundation to justify the far-reaching and radical legislation proposed in the pending bill.

A large part of the report of the Federal Trade Commission is taken up by a statement of the early history of the packers while the industry was in a formative period, beginning with a report made in 1890—30 years ago—by a committee in the United States Senate. This is followed with a reference to the so-called "Veeder pool," and the formation by three of the large packers of the National Packing Co.

The report attempts to treat all of these matters of ancient history as if they were new discoveries, and attempts to invest them with a living significance, although they admit in their report that the so-called "Veeder pool" was terminated early in 1902—18 years ago—and that the National Packing Co. was dissolved in 1912.

On page 26 of the summary of their report they state: "There is apparently no dressed-meat pool at the present time such as existed in the nineties."

The National Packing Co. was voluntarily dissolved. Although its history was involved indirectly in legal proceedings, no court ever held that it in any manner violated any law of this country, and even since its dissolution many concerns in other industries have been consolidated into organizations along a line similar to that of the National Packing Co.

The commission in its report charges the five larger packers with maintaining a conspiracy in restraint of trade, and an illegal monopoly, but, as I have stated, they have offered no affirmative proof of its existence. No witness has testified that there exists an agreement or contract between the five packers to effect or accomplish any of the illegal purposes charged by the commission, nor has any witness testified to any facts from which an inference can be drawn that any such agreements actually existed.

A careful analysis of the facts and figures presented in the able address of the Senator from Iowa will show that circumstantial evidence alone is offered as a basis for these charges. The principal circumstances offered may be summed up as follows:

1. The alleged uniformity from year to year in the percentage of cattle, hogs, sheep, and calves purchased by each of the five packers during the last five years.

2. An alleged agreement to form an international meat pool to regulate and divide the shipments of meat from South America to the United States and certain foreign countries, particularly England.

3. Alleged agreements relating to other lines than the purchase of live stock and sale of meats, namely, cheese and lard compound.

4. The maintenance by the five packers of certain joint funds raised for the purpose of protecting the interests of the general industry in matters affecting their common interest.

The foregoing constitute the principal circumstances advanced by the commission in support of its contention.

If these four points can be reasonably and satisfactorily explained on any other hypothesis than that they are the result of an unlawful or illegal agreement, then it seems to me that the whole case as made by the commission falls to the ground. A table has been prepared by the commission showing what they claim to be relatively small variations in the percentages of live stock purchased by each of the five packers, covering a period of five years. It has been put forth as the foundation stone upon which the structure of monopoly is built, around which the principal arguments of the commission have been arrayed.

In fact, one of the commissioners stated that until they discovered this alleged fact they were about to give up in despair of finding any ground upon which they could predicate the conclusion that there was any illegal combination at the time of their investigation.

The importance of this alleged circumstance has been particularly emphasized by the Senator from Iowa. He treats it as the final and conclusive evidence from the force of which no one can escape.

I quote the following from his remarks:

When you consider only the variable flow of cattle, any control of the situation looks impossible. When you understand these centralized buying systems of each of the five packers, control looks entirely feasible. It is not only feasible, it is actually accomplished week after week, year after year. It was being accomplished during the period when the packers were on trial in 1910–1912; it was being accomplished while the House committee was considering the Borland resolution for an investigation, and telegrams were pouring in against it under packer inspiration; it was being accomplished week after week while the Federal Trade Commission made its investigation. I have no doubt it was being accomplished week after week during the time that the old Bureau of Corporations made the Garfield beef investigation of 1904, and I have no doubt it is being accomplished right now as we debate this bill. It has much to do with unrest and dissatisfaction among the farmers and stockmen.

THE PACKERS' "SHARE" OF THE PURCHASES.

What was being accomplished? Why this: That each of these five packers was getting, week after week, almost to a decimal point his predetermined "share" of this variable, unpredictable total flow of cattle to the principal markets of this country.

You ask for proof of this. It is depicted on the chart, page 50, volume 2, commission report, so that anyone can see, but proof is not necessary, because the representatives of the packers have practically admitted it before committees of this Congress.

I have a chart of that, which I will not take the time to go into, but if Senators will take the chart on page 70 of volume 2 of the commission's report they will be astounded to find that the percentages are maintained, with slight fluctuation, entirely through the year, and it is true of every other year, and those are the percentages that were established back in the old Veeder pool, where each packer was to take his proportion of the live stock that came to market.

They do not seriously controvert that proposition. They do not admit the word "predetermined." They say, "It is not predetermined." They say, "There is no agreement." They say, "It is keen, watchful competition." One of their counsel has likened it to the tremendous conflicting forces of gravity that keep the sun and the planets and the stellar universe unchanged in their eternal places.

I predict that these "shares" fixed by "watchful competition" will cease to be fixed within a few days after the enactment of this bill, and there will begin to show signs of really competitive bidding for the cattle produced by the farmers of our western country. And I venture to say that on the admitted showing of facts any fair jury would decide that these "shares" would not remain substantially unchanged year in and year out for 5, or perhaps for 10 or 20, years without an agreement. With all the masses of letters and documents from the packers' files that support these figures and point clearly to an agreement, there is no doubt of it.

It is impossible that this sameness is the result of coincidence. Until the chart can be explained the fact will stand out that it shows more than language can express the absolute combination.

If any Senator will study this chart can he stand up here and say that these five packers are not in a combination? He may argue that it is a good combination; that it makes for efficiency; that this is a bad bill; that it is unconstitutional; that, while he deplores the situation, there is no way under the Constitution to prevent the robbery of the people; that we have enough law on the subject now. He may say that the Federal Trade Commission is composed of Socialists and that the man who secured this information is a Socialist; that those who are trying to secure legislation are actuated by political and unpatriotic motives; that it is an outrage to do any disturbing of business; that the slogan should be to let business alone; that it is no time to regulate any kind of business; that sponsors for the bill want to see their names in the papers. He may say all that in rhetorical or loud voice, but he can not truthfully say that the packers are not in a combination.

The Senator from Iowa goes on to say:

It must be remembered that the figures of the chart to which I refer are the figures of the packers themselves, and from their own records. They were found already compiled each week on a separate card, bearing first the absolute number of each kind of animal bought by each packer, the percentage of each packer for the week, the percentage for the year, and the correspondent figure for the preceding year. These cards were initialed by some of the packers. They were the figures used by Swift & Co. in the daily conduct of its business. All the commission has done is to take these figures and transfer them to tabular form for summarization and to chart them on this chart.

Then Senators should follow it and take the first evidence found—and what turns out to be the key to the rest—a tattered memorandum discovered by one of the commission's agents in the desk of Edward F. Swift. The memorandum, which bore signs of frequent consultation, contained only certain percentages totaling 100, opposite which was scribbled "per cent live buyers." (House hearings, pt. 32, p. 2373.)

I insert this as follows:

			45,000
			45,000
			W. M. T.
45,000			
A	29.26		
S	35.75		
M	14.98	percentage live buyers.	35.68
S. & S	10.00		44.69
Cudahy	10.00		18.73
	100.00		100.00

I will follow that a little further.

The method of operation was shown in a letter, in which was carried these percentages—and there will be found on page 66, part 1, of the commission's report—a letter from Mr. Veeder to W. B. Traynor, assistant to Louis F. Swift, referring to these percentages that they had for legislative and litigation matters, and those identical percentages are carried into the purchases and to the sales. I insert their letter and also two pages of the House hearings showing that fact (pp. 2369, 2370, 2372).

AUGUST 23, 1916.

Mr. W. B. TRAYNOR,
Care Swift & Co., Chicago.

DEAR SIR: You asked me the other day for certain percentages which are generally known as the "usual percentages." On July 30, 1913, L. F. S., A. M., and T. E. W. agreed with C. and S. & S. upon the following percentages to cover general legislative and litigation matters:

S	35.751	39.723	44.689
A	29.266	32.518	36.582
M	14.983	16.648	18.729
C	10	11.111	
S. & S	10		
	100.000	100.000	100.000

Of course, C and S were arbitrary. The A, F, and H figures are the so-called old beef figures, which were based upon the volume of beef business in 1902.

Sincerely, yours.

The Senator then presents a table compiled by the Federal Trade Commission from the data taken from the files of Swift & Co., and undertakes to apply the percentages set forth in the letter to Traynor in an effort to show that the purchases of live stock of all kinds, including cattle, sheep, and hogs, were predicated upon the percentage set forth in the memorandum of Edward F. Swift and in the Traynor letter.

Inasmuch as I desire to discuss and analyze the compilation used by the Federal Trade Commission and the Senator from Iowa, I set it forth at this point in full—I am not going to take the time to read it, but I ask that it may go into the RECORD without reading it—and my following remarks will explain it.

Mr. KENYON. Mr. President, what is it that the Senator is now inserting?

Mr. SMOOT. The table that I am now inserting is Table 1, "Percentages of live-stock purchases—cattle, sheep, and hogs combined—by each of the Big Five."

Mr. KENYON. The same table that I inserted in my remarks?

Mr. SMOOT. Exactly the same table that the Senator inserted, and now I am going to explain it.

There being no objection, the table referred to was ordered to be printed in the RECORD, as follows:

TABLE 1.—*Percentages of live-stock purchases—cattle, sheep, and hogs combined—by each of Big Five, of total purchased by Big Five, 1913–1917, compared with "Usual percentages based on old beef figures of 1902."*

[Compiled from table on p. 57, part 2, Report on meat-packing industry, "Usual percentages," from letter by Henry Veeder, on p. 66 of part 1 of same report.]

	Total Big Five.	Swift.	Armour.	Morris.	Wilson.	Cudahy.	Wilson and Cudahy combined.	Range of variations from "Usual percentage."
1913								
Head purchased, cattle	5,082,619	1,723,008	1,381,456	904,706	596,699	476,750		
Head purchased, sheep	10,174,937	4,018,083	2,915,120	1,317,654	975,776	948,304		
Head purchased, hogs	16,273,917	5,954,626	5,168,596	2,144,902	1,256,347	1,749,446		
Head purchased, total	31,531,473	11,695,717	9,465,172	4,367,262	2,828,822	3,174,500		
Per cent of all animals	100.000	37.092	30.018	13.851	8.971	10.068	19.039	
"Usual percentages"	100.000	35.751	29.266	14.983	10.000	10.000	20.000	
Variation from "usual"		+1.341	+.752	−1.132			−.961	0.752–1.341

TABLE 1.—*Percentages of live-stock purchases—cattle, sheep, and hogs combined—by each of Big Five, of total purchased by Big Five, 1913–1917, etc.*—Continued.

	Total Big Five.	Swift.	Armour.	Morris.	Wilson.	Cudahy.	Wilson and Cudahy combined.	Range of variations from "Usual percentage."
1914.								
Head purchased, cattle	4,841,689	1,646,659	1,315,003	870,051	559,699	450,277		
Head purchased, sheep	10,085,936	3,927,463	2,803,890	1,256,703	1,035,826	1,062,049		
Head purchased, hogs	14,564,933	5,332,222	4,624,366	1,915,239	1,160,825	1,532,231		
Head purchased, total	29,492,558	10,906,344	8,743,259	4,042,048	2,756,350	3,044,557		
Per cent of all animals	100.000	36.980	29.646	13.705	9.346	10.323	19.669	
"Usual percentages"	100.000	35.751	29.266	14.983	10.000	10.000	20.000	
Variation from "usual"		+1.229	+.380	−1.278			−.331	0.331–1.278
1915.								
Head purchased, cattle	5,279,407	1,819,812	1,455,532	957,684	535,860	510,519		
Head purchased, sheep	8,778,591	3,410,483	2,469,418	1,106,102	905,950	886,638

It is to be observed that in no year did any company vary from the "usual percentages" by more than one and thirty-four one-hundredths of 1 per cent (Swift & Co., 1.341 per cent in 1913).

Mr. SMOOT. Following the presentation of this compilation, the Senator from Iowa says:

And so, building up from 1902 and before the old Veeder pool, where they had the absolute percentages of live stock, carrying that on into the purchases and sales now, not only in this country but of all of their sales, is evidence that no man, if he is not so prejudiced that he will not so consider it, can take up and come to any other conclusion than that there is in this combination in the market place of the man who is compelled to sell his live stock there.

Notice now how these are carried out.

These "usual percentages" are carried into the live-stock purchases—identical with the percentages that were agreed upon July 30, 1913.

This table in the House hearings is compiled from the table on page 57, part 2, commission's investigation. Not only are these usual percentages carried into the purchase of live stock, but they are carried into the total sales, domestic and foreign, and side lines. The table in House hearings, part 32, page 2372, shows this. So we have testimony as clear as circumstances can make it of the adoption of percentages in all matters between these controlling interests, which percentages are carried into purchases and into sales.

Coupled with this and making it even more conclusive is the exhibit on page 2372, part 32, of the same House hearings.

A casual reading of these tables and so-called "key" would seem to bear out the contention of the Federal Trade Commission and the distinguished Senator from Iowa, but I have had occasion to analyze and study this evidence and the testimony of witnesses explaining same, and I am free to say that I do not obtain the same results and can not reach the same conclusion suggested by the Federal Trade Commission and by the distinguished Senator from Iowa.

It is quite apparent from the text of the letter addressed to Mr. W. B. Traynor that the purpose for which the percentages set forth there were to be used was not to fix the percentage of cattle, sheep, and hogs each packer was supposed to buy, but was a basis for the assessment of a general fund to be used in general litigation matters. In explaining that letter and the percentages used, Mr. Henry Veeder testified before the House Committee on Agriculture, part 14, page 1028, and stated among other things that the figures used in the Traynor letter were used as a basis for apportioning the expense of certain litigation in which all five of the packers had a common interest and were not used in the packing business in any other way or for any other purpose. These figures were used occasionally in connection with matters in litigation which had to do with the entire industry or the entire country. For example, in a case where the constitutionality of some tax law on oleomargarine was to be tested, or in a case where a common fund was to be raised for the welfare of employees. In such cases as these a joint fund was subscribed and apportioned on the basis of the figures used in the Traynor letter.

The packers contend that these figures had no bearing or relation to the actual number of head of live stock purchased in the markets of the country as charged by the Federal Trade Commission, and my analysis of the figures and charges to a large extent bears out this contention of the packers. I will refer to that phase of this question more fully hereafter.

Mr. KENYON. Mr. President, of course I do not want to interfere with the Senator's set speech, but he says the Traynor letter referred only to litigation matters. It very expressly refers to general legislative and litigation matters. They do not vary those percentages even in the contributions to elect Members of Congress.

Mr. SMOOT. If the Senator will just wait, I will show how these percentages figure out.

Mr. KENYON. I will show how these percentages went into the contributions to elect Members of Congress.

Mr. SMOOT. The Senator can say that, but there is no testimony showing it.

Mr. KENYON. There is testimony to that effect.

Mr. SMOOT. I have read nearly every word of the testimony and I have not found it.

Mr. KENYON. I have read every word of it.

Mr. SMOOT. The Federal Trade Commission, from the manner in which it sets forth the finding of statistics in the archives of the packers relating to their purchases in the markets, attempts to clothe that fact with mystery and attach an unusual significance to the fact that one of the packers should have such data in his files. During the course of the hearings the packers have explained that the daily receipts of live stock at all the markets of the country and prices paid therefor are published broadcast in the newspapers throughout the country. They are also compiled by the Agricultural Department of the Government and many other agencies. They have shown that the papers and journals devoted to live-stock industry publish daily the receipts and the sales, as well as the names of purchasers and the quantity taken on all the markets and prices paid, and in the end certain journals compile a "yearbook of figures" showing, among other things, the receipts at all the markets of the world and prices paid each week of the year, also the number of live stock slaughtered by each of the packers. In fact, all of the facts and figures covering every point of in-

formation connected with the live-stock industry are made public and are available to every citizen of this country. There can be no secret or mystery about it, and the fact that the packers avail themselves of this information and keep track in their own records of their own transactions, as well as those of their competitors, can not be said to be evidence of sinister motives or dark designs, but it would appear to be a natural and essential matter vital to the success of a well-managed enterprise, a thing that the Federal Trade Commission knows absolutely nothing about.

There is no evidence in the entire records showing secret meetings of the packers or that such data is kept solely by the larger packers. From the fact that all the data essential to compile a table such as was found in the Swift files can easily be procured from so many sources, I venture the assertion that in the records kept by every successful packer, large or small, in the office of every buyer or speculator, every commission merchant, and, in fact, everyone trading or having to do with business on any or all of the markets of the country, similar data and information can be found. The small packer knows as fully what each of the large packers buy and the prices paid as the large packers do themselves, for all this information is a matter of public knowledge and is daily available to any interested person through numerous sources. The large packers or the small could not keep their activities in the market secret if they chose.

The Federal Trade Commission in the summary of its report, page 51, said:

So far we have been merely describing the character and methods of the conspiracy among the Big Five. We now offer some of the illuminating proofs, leaving the examination of the voluminous details regarding the workings of the conspiracy for the full report.

The first evidence which came into our possession indicating the existence of a live-stock pool was in the form of a tattered memorandum discovered by one of the commission's agents in the files of Edward F. Swift. This memorandum, which bore signs of frequent consultation, contained only certain percentages, totaling 100, opposite which was scribbled "per cent live buyers." This document might not have attracted so much attention if in the same files had not been discovered a set of sheets showing the number and percentages of live stock purchased by each of the Big Five at the principal markets and in the entire country. The first glance at these sheets revealed such a remarkable uniformity from year to year in the percentages purchased by each of the big packers as to convince any disinterested person that such results could be attained only by agreement. Here, for example, are the percentages of cattle purchased by each of the Big Five during the last five years:

Per cent of total cattle purchases.

	Swift.	Armour.	Morris.	Wilson (Sulzberger).	Cudahy.
1913	33.90	27.18	17.80	11.74	9.38
1914	34.01	27.16	17.97	11.56	9.30
1915	34.47	27.57	18.14	10.15	9.67
1916	34.59	27.04	17.85	10.91	9.57
1917	35.07	26.96	17.14	10.85	9.98

The percentages for hogs, sheep, and calves displayed the same uniformity and, even more significant, the figures for the separate markets were consistently maintained.

Now, let us examine this statement in the light of the tables of percentages set forth above. It will be observed that the so-called "tattered memorandum" obtained from the desk of Edward F. Swift, which, as has been explained, was a table prepared for the apportionment of expense and not for the purchase of cattle, does not correspond with the percentages set forth in the Federal Trade Commission's report. For example, in the Traynor letter and the "tattered memorandum" the percentage there indicated for Swift is 35.75. Now refer to the percentage of cattle purchased by Swift in any of the years from 1913 to 1917. In no year did they approximate the percentage shown in the Traynor letter and the Swift "tattered memorandum." In 1913 they purchased 33.90 per cent of cattle. In that year they lack 1.85 per cent of securing the percentage indicated in the memorandum. That would seem to be a very small item, and close enough to satisfy any agreement or conspiracy to divide the purchasers of live stock on the markets of the country, but when you consider the enormous volume of cattle purchased by the five larger packers this apparently insignificant difference in the percentage would amount to an enormous number.

By referring to the table compiled by the Federal Trade Commission and used by the Senator from Iowa in his speech as illustrative of how this percentage operated, it will be seen that in 1913 the total number of cattle purchased by the five larger packers was 5,082,619. Swift actually bought 1,723,008 head of cattle, which corresponds to the 33.90 per cent shown in the table of the Federal Trade Commission's report, page 52. When you take the percentage that he was entitled to buy, namely, 35.75, as set forth in the "tattered memorandum" and the Traynor letter, you will find that Swift lacked 94,078 head of cattle purchasing the percentage which he was entitled to. This small, insignificant fraction of 1.85 per cent amounts to that number of head of cattle.

Likewise it will be seen, from the "tattered memorandum" and the Traynor letter, that Armour's percentage of purchases was 29.26. In the year 1913, according to the Federal Trade Commission's table, he only purchased 27.18 per cent. Armour lacked 2.08 per cent purchasing what he was entitled to purchase under the supposed agreement. This meant that Armour lacked 106,024 head of cattle of purchasing his quota.

According to the "tattered memorandum" and the Traynor letter, Morris's percentage was 14.98. According to the table of the Federal Trade Commission, Morris purchased, in 1913, 17.80 per cent of the total purchases of cattle made by the five larger packers. Consequently he purchased 2.82 per cent more than he was entitled to under the conspiracy agreement alleged by the Federal Trade Commission, which meant that Morris bought 143,177 head more than he was entitled to purchase.

According to the "tattered memorandum" and the Traynor letter, the percentage of Sulzberger or Wilson & Co. in 1913 was 10 per cent. According to the table of purchases compiled by the Federal Trade Commission, in the year 1913 Sulzberger purchased 11.74 per cent, amounting to 1.74 per cent more than he was entitled to under the alleged agreement, which, reduced to number of head, meant that Sulzberger purchased 88,437 more cattle in 1913 that he was entitled to under the agreement.

According to the "tattered memorandum" and the Traynor letter, Cudahy was entitled to a division of 10 per cent of cattle purchased. According to the Federal Trade Commission's table, he only purchased 9.38 per cent, which was 0.62 per cent less than he was entitled to under the alleged agreement, which meant, although it was but a fraction of 1 per cent, that Cudahy failed to purchase 31,512 cattle that he was entitled to under the agreement.

So it will be seen that for the year 1913 Swift, Armour, and Cudahy did not carry out the agreement and divide their purchases of cattle, as was alleged, on any such basis, neither did Morris and Wilson appear to observe any such arrangement, for the figures show that the total number purchased far exceeded their quota.

Judging from the average price of cattle for the year 1913, each of these transactions amounted to millions of dollars. This will serve to illustrate the point, and it will be seen by these charts that in no year from 1913 to 1917 do the figures set forth in the "tattered memorandum" and in the Traynor letter correspond with the tables of purchases set forth in the Federal Trade Commission's report.

The Federal Trade Commission states that "the percentage for hogs, sheep, and calves displayed the same uniformity, and, even more significant, the figures for the separate markets also were consistently maintained."

Mr. GRONNA. Mr. President, I do not wish to interrupt the Senator at all, but I think it is important that the table to which he has referred, which is found on page 27 of the summary of the report of the Federal Trade Commission, should be read in full and the uniformity explained.

Mr. SMOOT. Mr. President, I will explain the uniformity of the table. In cases where there is nearly a million difference in the number of head of cattle and hogs it can not be said to be uniform. If the Senator will be patient, I will reach every point, and the table will go in with my remarks, as I have asked unanimous consent that it may go in.

Mr. GRONNA. I am glad to know that the table is to go in the RECORD.

Mr. KENYON. I ask the Senator if he intends to refer to the other years—1914, 1915, and so on.

Mr. SMOOT. I will refer to all the years.

Mr. KENYON. I am glad to know that.

Mr. SMOOT. I will say to the Senator, in passing, that they are all about the same; there are as many discrepancies in all the years as in the year 1913.

I have carefully studied the tables presented by the Senator from Iowa covering the total purchases of cattle, sheep, and hogs by the five larger packers, and the effort made by the Federal Trade Commission to show that the figures in the "tattered memorandum" and the Traynor letter were the real basis of such purchases by each of the larger packers.

It must be borne in mind that all of the packers have denied that they use any such basis to govern their purchases either of cattle, sheep, or hogs. They have denied that there is any

agreement of any kind to divide purchases on that or any other basis. They have also stated that the amount of their purchases is governed almost wholly by the outlet which they have for the products handled, and this is somewhat borne out by a table found in the House hearings, part 1, page 32, showing the number of branch houses operated by the five larger packers throughout the United States. The number of such branch houses is as follows:

Swift & Co	361
Armour & Co	260
Morris & Co	148
Wilson & Co	130
Cudahy Packing Co	101

It is natural that a concern operating 361 branch houses would be able to supply more customers and would therefore require a larger number of head of live stock to fill this demand than would a concern operating only 101 branch houses, and a careful study of this point would furnish a more reasonable explanation of the relative percentages of the total volume than the assumption that there must be an agreement in order to approximate the volume handled by each of these concerns, and it is a significant fact, shown by these figures, that the quantity of live stock really purchased by each of the larger packers, comes nearer conforming to the number of branch houses each operates, in the matter of relative percentage, than is shown by the results obtained from the figures used in the "tattered memorandum" and the Traynor letter.

Now, reverting to the table compiled by the Federal Trade Commission showing the number of cattle, sheep, and hogs purchased by each of the large packers for five years, according to my calculations, the statement of the Federal Trade Commission that there was the same uniformity in the purchase of hogs, sheep, and calves, is not borne out by an analysis of these figures. For instance, in 1913, according to the percentage used in the "tattered memorandum," Swift should have purchased 3,637,648 sheep. The table shows that he actually purchased 4,018,083. In other words, he purchased 380,435 more sheep than he was entitled to under the percentage therein set forth.

Armour was entitled to buy 2,977,798 sheep, but according to the table he actually bought 2,915,120 head, so he fell short 62,678 head that year.

According to the percentage ascribed to Morris & Co., they should have purchased 1,524,505 head. The table shows that they actually purchased 1,317,654. They were short of their quota 206,851 head.

Wilson & Co., according to their 10 per cent, should have purchased 1,017,493. The table shows that they actually purchased 975,776. They were short of their quota 41,717.

According to the percentage allotted Cudahy should have purchased 1,017,493 head, but the table shows that he actually purchased 948,304 head, being short 69,189 head, so that we see from the table compiled by the Federal Trade Commission that the percentages found in the "tattered memorandum" and the Traynor letter do not work out in practice, at least, and are not uniform in governing the number of sheep, cattle, or hogs purchased by the five large packers, for during the year 1913 it is shown that Swift was the only one who purchased the number of sheep allotted under the alleged agreement, but that he purchased nearly 400,000 head more than he was entitled to, if there was any such agreement, while the other four packers were short in their quota for that year, ranging from 41,000 head to over 200,000 head.

Now, let us examine the same year in reference to hogs. According to the percentage found in the "tattered memorandum" and the Traynor letter, which the packers say was only used as a basis to apportion an expense fund and not to apportion the receipts of live stock, Swift & Co. was entitled to buy 5,818,092 hogs. According to the table they actually purchased 5,954,626 head of hogs, being 136,534 head more than they were entitled to purchase under the alleged conspiracy.

Armour was entitled to buy, according to his percentage, 4,762,720 head. He actually bought, according to the table, 5,168,596 head, being 405,876 more head than he was entitled to purchase.

Morris & Co. was entitled to buy 2,438,321 head. They actually bought 2,144,902 head. For some unaccountable reason Morris & Co. were minus 293,419 head of their quota.

Wilson & Co. were entitled to buy 1,627,392 head. They actually purchased 1,256,347 head. They were short 371,045 head.

Cudahy, who was entitled to purchase 1,627,392 head, actually purchased 1,749,446 head, an excess of 122,054 head of hogs.

Each of these totals, whether surplus or minus, amount in dollars to millions of dollars, and it is unreasonable to suppose that if there was any such agreement or conspiracy, as charged by the Federal Trade Commission, upon these alleged circumstances alone, that it was at least not carried out, for these figures show such a larger variance in the number of head actually purchased and the percentages allotted as to refute the charges made. These facts are not only true for the year 1913, but they are true of each of the years 1914, 1915, 1916, and 1917, as set forth in the chart of the Federal Trade Commission; and in order that the Senators may see for themselves to what extent these figures vary and the enormous quantity of live stock involved in each variance, I have prepared an analysis for each year showing the total number of cattle, sheep, and hogs purchased by each of the five packers and the quantity in excess and the quantity minus their respective quotas in each case. I ask that they be inserted in the RECORD without reading.

The PRESIDING OFFICER (Mr. WILLIS in the chair). Without objection, permission is granted.

The tables referred to are as follows:

Mr. TOWNSEND. May I ask the Senator a question?

Mr. SMOOT. Certainly.

Mr. TOWNSEND. Do the records disclose what were the percentages of purchases prior to 1913 by these different concerns?

Mr. SMOOT. Not that I am aware of, but I will say to the Senator that he can go to the Department of Agriculture and find that data for any time he may desire, and any other citizen of the United States can do likewise. The information is open to all the world. There is not a packer, large or small, who can not see the figures at any time he wishes, and he may receive them daily if he so desires.

Mr. TOWNSEND. It occurred to me that if the commission or any other investigating body should claim that the arrangement was made for the future and was adhered to, it might have been well to have found out what was the proportion of purchases prior to 1914.

Mr. SMOOT. I will say to the Senator that I have not got them.

Senators will notice that the variations in the percentages of each of the five packers amount to 5 or 10 per cent of their own annual business and the percentage on their annual business should have been given to show the variation instead of the total of business done by the five packers. For instance, the Federal Trade Commission reports Swift & Co.'s variation to be 1.85 per cent, but the variation in their own business is 5 per cent, and with Cudahy & Co. the commission reports 1 per cent and it should be 10 per cent. Where in the bill is the power to change these percentages, and who will decide what they should be and how is it to be effected? The bill does not deal with the issues the Federal Trade Commission says are the result of combinations.

Now let us examine carefully this evidence which the Federal Trade Commission and the Senator from Iowa has accepted as conclusive proof of a conspiracy in violation of law.

I have pointed out the public nature of all transactions in the public market places. I have shown how all data in relation to the purchase of live stock are compiled by the Government, newspapers, live-stock journals, and by others, and that the fact that the packers compile such data for their own information is a common practice and in keeping with American business traditions. Even the Federal Trade Commission did not seem to attach any particular significance to that fact until they found the so-called "tattered memorandum" in the desk of Edward Smith and the letter to Traynor in the files of Henry Veeder.

It will be observed that the figures on the "tattered memorandum" are identical with the figures of the Traynor letter, and do not correspond with the percentages of purchases shown on the table of percentages of cattle purchases in the report of the Federal Trade Commission heretofore set out. The Traynor letter and the testimony of Veeder shows those figures were intended to be used in prorating certain joint expenses. But the Federal Trade Commission says that inasmuch as those figures were formerly used by the Veeder pool in dividing shipments of dressed beef to eastern cities, they were illegal and the presence of those figures in the "tattered memorandum" and the Traynor letter are circumstances to show that the same percentages were now being used to form a live-stock pool and to divide the receipts of live stock bought by the five larger packers.

Now let us examine this view a little closer. In the first place, the United States circuit court in the Grosscup injunction of 1902 expressly held that nothing in the injunction "shall be construed to prohibit the defendants from curtailing the quantity of meats shipped to a given market where the purpose of such arrangement in good faith is to prevent the over-accumulation of meats as perishable articles in such markets." This language was approved by the Supreme Court of the United States in the case of United States against Swift & Co. et al.

The object of the Veeder pool was to restrict shipments of dressed beef so as to prevent gluts and waste in the consuming centers of the East, something which the highest courts say is permissible, and a practice carried on to-day by numerous asso-

ciations handling other perishable products in this country. So we see that the reference in the Traynor letter that the figures used were the "so-called old beef figures which were based upon the volume of beef business in 1902" do not justify the sinister significance cast upon them by the Federal Trade Commission. Moreover, I have pointed out that they are not a key to the percentages of purchases of live stock as charged by the Federal Trade Commission. They do not fit anyways measurably close to the quantity of cattle, sheep, or hogs bought in either of the five years by either of the five larger packers, by numbers ranging from tens of thousands into hundreds of thousands of head representing values running into tens of millions of dollars. Circumstantial evidence of crime should be more accurate than these figures to be accepted as irrefragable proof of illegal contracts and agreements, especially where the charges are denied by positive statements of scores of witnesses.

In order to lend corroborative proof to the circumstance charged that the packers were dividing the receipts of live stock according to a predetermined percentage, the commission has taken the financial reports of the various packers for the years 1912 to 1916, inclusive, and has compiled a table in which they undertake to show that the percentages found in the "tattered memorandum" and the Traynor letter apply with equal force to the total volume of sales each year of the five large packers. This table was used by the Senator from Iowa in the course of his address and is pointed to as a further circumstance which he characterizes as testimony "as clear as circumstances can make it of the adoption of percentages in all matters between these controlling interests, which percentages are carried into purchases and into sales."

For the purpose of discussing this charge, I set forth at this point the table which he used in his address:

TABLE 2.—*Percentages of total sales—domestic and foreign, all commodities, including side lines—by each of the Big Five, of total sales by all of the Big Five, 1912-1916, compared with "usual percentages based on old beef figures of 1902."*

[Total sales as furnished by the companies; "usual percentages" from letter by Henry Veeder, on p. 66 of pt. 1 of the Report on the Meat Industry.]

	Total Big Five.	Swift.	Armour.	Morris.	Wilson.	Cudahy.	Wilson and Cudahy combined.	Range of variations from "usual percentages."
1912.								
Sales	$892,401,961	$300,000,000	$263,307,000	$134,430,000	$101,220,931	$90,444,000	$194,664,961	
Per cent	100.000	33.617	29.505	15.064	11.679	10.135	21.814

Variation from "usual"		−.357	+.282	−1.743			+1.818	.282-1.818
1915.								
Sales	$1,295,614,454	$500,000,000	$380,157,000	$177,040,000	$122,253,434	$113,182,000	$230,417,434	
Per cent	100.000	38.592	29.342	13.664	9.436	8.735	18.402	
"Usual percentages"	100.000	35.751	29.265	14.933	10.000	10.000	20.000	
Variation from "usual"		+2.841	+.076	−1.319			−1.598	.073-2.841
1916.								
Sales	$1,595,709,000	$575,000,000	$479,969,000	$213,781,000	$183,998,000	$133,961,000	$320,959,000	
Per cent	100.000	36.034	30.079	13.773	11.719	8.395	20.114	
"Usual percentages"	100.000	35.751	29.265	14.983	10.000	10.000	20.000	
Variation from "usual"		+.283	+.813	−1.210			+.114	.114-1.210

It is to be observed that in no year did any company vary from the "usual percentages" by more than two and eighty-four one-hundredths of 1 per cent (Swift & Co., 2.841 per cent in 1915).

Now, let us apply the supposed percentages found in the "tattered memorandum" and the Traynor letter to this table and see what results we obtain. At the bottom of the table a footnote states: "It is to be observed that in no year did any company vary from the 'usual percentages' by more than 2.84 of 1 per cent (Swift & Co., 2.841 per cent in 1915)." That figure would seem to be a small variation from the "usual percentage."

I will omit any reference to the year 1912 inasmuch as the statistics compiled in relation to the purchase of live stock begins with the year 1913, according to the charts compiled by the Federal Trade Commission as used in my previous argument. Taking the year commencing with 1913 the chart shows that the total volume of business of the five large packers was $1,143,076,036. Applying the usual percentage found in the "tattered memorandum" and the Traynor letter, Swift's proportion should have been $408,661,129. His actual sales according to the chart was $400,000,000, so that we find he fell short $8,661,129.

Armour's usual percentage should have netted $334,532,622, yet we find from the chart that he actually sold $349,897,000, so that he received $15,364,378 more than his quota of sales.

Morris's usual percentage should have produced $171,267,077 in sales. The chart shows that he was only able to approximate the conspiracy by a sale of $165,909,000, so he was minus $5,358,077.

Wilson's quota was $114,307,604, but he actually outwitted his fellow conspirators by selling $122,861,036, an excess of $8,553,432.

Cudahy was entitled to $114,307,604 of sales, but he was only able to account for $104,409,000, suffering a loss to some of his fellow conspirators of $9,898,604.

So it will be seen that the usual percentage does not work out as a key to a predetermined division of sales by many millions of dollars in the case of each of the five large packers. The same results are true in the figures for 1914, 1915, and 1916, and in order that the Senators may see the actual results for each of these years, I insert at this point the analysis which I have made, which will give at a glance the result for each of the years set out in the table compiled by the Federal Trade Commission, and used by the Senator from Iowa as a corroborative circumstance to show that this alleged key is the basis for the division of the purchases of live stock and for the sale of all their products in the markets of the world.

I ask, Mr. President, that the analysis to which I have referred may be inserted in the RECORD without reading.

The PRESIDING OFFICER (Mr. KELLOGG in the chair). Without objection, it is so ordered.

The table referred to is as follows:

[Actual greater (+); percentage greater (−).]

	Total Big Five.	Swift.	Armour.	Morris.	Wilson.	Cudahy.
1913.						
Actual sales	$1,143,076,033	$400,000,000	$349,897,000	$165,909,000	$122,861,033	$104,409,000
Supposed percentage		408,661,129	334,532,622	171,267,077	114,307,604	114,307,604

Supposed percentage		570,481,925	467,000,195	239,085,080	159,570,900	159,570,900
Difference		+4,518,075	+12,968,805	−19,304,080	+27,427,100	−25,609,900

Mr. SMOOT. Mr. President, now let us carry this comparison just a little further and see how it works out. The Federal Trade Commission and the Senator from Iowa have charged that the percentages found in the "tattered memorandum" and the Traynor letter not only apply to the purchases of cattle, sheep, and hogs separately in the markets of the country, but that they also are an index or a key to the total number of head of all classes purchased in each of the years. I have already pointed out how the number of cattle, hogs, and sheep varied from the alleged key by tens and hundreds of thousands of head in each of the years, but I now desire to present you the result of the figures as applied to the total purchases of all kinds of live stock and a comparison with the results of the total sales in each of the years indicated in the chart.

In other words, in the year 1913 Swift purchased 422,891 head of live stock of all kinds in excess of his usual percentage, as found in the so-called "tattered memorandum" and the Traynor letter, but we find that instead of his percentage of the sales for the year 1913 showing a corresponding increase, we find he is minus $8,661,129 in sales, although having an excess of nearly one-half million head of live stock above his usual percentage.

In the year 1913 Armour had an excess of 237,174 head of live stock of all kinds above his usual percentage. We find that in his percentage of sales he had an excess of $15,364,378. Although Armour had 185,717 excess head of live stock less than Swift, he was able to obtain $15,000,000 more than his percentage of sales, while Swift was minus $8,000,000 in approximating his proportion of the sales.

For the year 1913 Morris & Co. did not purchase their usual percentage of live stock by 357,093 head. In their sales for that year they were short of the usual percentage $5,358,077.

Wilson & Co. were short of their percentage of purchases of live stock for the year 1913, 324,325 head, yet they had an excess in their usual percentage of sales of $8,553,432.

It will be seen by comparing the result of Swift's experience and Wilson's experience that while Swift had approximately three-quarters of a million head of live stock more than Wilson to operate on, Swift lacked $8,000,000 of approximating his percentage of sales, while Wilson exceeded his percentage of sales by more than $8,000,000.

For the year 1913 Cudahy had an excess over his usual percentage of 21,353 head of live stock, yet he was minus in his percentage of sales $9,898,604.

Similar variations occur in each of the years 1914, 1915, and 1916, and I set out at this point a complete analysis showing the total receipts either in excess or short of the usual percentage of live stock of each of the five larger packers, and also the percentage of sales, either excess or minus, for each of the years. I ask that the analysis be inserted in the RECORD without reading.

The PRESIDING OFFICER. Without objection, it is so ordered.

The analysis referred to is as follows:

Comparison of excess and minus percentages of purchases according to the percentages set forth in the alleged percentages of the "tattered memorandum" and the Traynor letter with the percentage of sales figured according to the same percentage.

	Swift.	Armour.	Morris.	Wilson.	Cudahy.
1913.					
Total live stock purchases	+ 422,891	+ 237,174	− 357,093	− 324,325	+ 21,353
Total sales	− 8,661,129	+15,364,378	− 5,358,077	+ 8,553,432	− 9,898,604
1914.					
Total live stock purchases	+ 362,459	+ 111,934	− 376,822	− 192,904	+ 95,303
Total sales	− 4,289,380	+ 3,381,925	−20,929,253	+32,793,295	−10,956,588
1915.					
Total live stock purchases	+ 311,609	+ 187,193	− 359,932	− 173,519	+ 34,649
Total sales	+36,804,850	+ 982,483	−17,081,905	− 7,305,982	−13,399,445
1916.					
Total live stock purchases	+ 273,165	+ 204,349	− 399,837	− 250,285	+ 172,608
Total sales	+ 4,518,075	+12,968,805	−19,304,080	+27,427,100	−25,609,900

Mr. SMOOT. The above analysis shows the amazing result, in view of the charges made by the Federal Trade Commission, that during the four years and in each of the four years Swift had a surplus above his usual percentage in the purchase of live stock ranging from more than one-quarter of a million to nearly one-half of a million head of live stock. In two of the years he was short of his usual percentage of sales several millions of dollars, and had an excess in his usual percentage in 1915 and 1916 ranging from $4,000,000 to $36,000,000.

In the case of Armour & Co. they had an excess in each of the four years above the usual percentage in the purchase of live stock, ranging from 111,000 to 237,000 head. In each of the four years they had an excess of sales above their usual percentage, ranging from $982,000 to $15,364,000.

In the case of Morris & Co. they had a deficit in each of the four years in their purchase of live stock ranging from 357,000 head to 399,000 head per annum. In each of the four years they never approximated the usual percentage of sales, but were minus each of the years in sums ranging from $5,000,000 to more than $20,000,000.

The figures show that in each of the four years Wilson & Co. never purchased their full quota of live stock, being short in numbers ranging from 173,000 to as high as 324,000 head, while in three of the years they exceeded their percentage of sales, ranging from $8,000,000 to $32,000,000. In only one year were they minus in their quota of sales.

Cudahy shows that in each of the four years he received an excess above the usual percentage of live stock, and in every year was minus in his percentage of sales as shown by the chart, ranging from $9,000,000 to $25,000,000.

So it will be seen by these figures that the effort to show that the usual percentages applied to sales as well as to the purchase of live stock is completely exploded. Any conspiracy or agreement which does not work any closer than these figures show can not be said in real earnestness to be effective, and if there ever was any agreement to divide the purchases or the sales of product on a predetermined basis certainly it has not been carried out, and it is obvious that the alleged key found in the "tattered memorandum" and the Traynor letter does not fit the lock ingeniously constructed by the Federal Trade Commission.

It is true that the witnesses who have appeared before the committees of Congress have admitted that there is a more or less fixed position of each of the five packers in the business,

UMI

but they have explained that their several positions have been the result of the normal growth of each of those concerns. They have admitted that there is only a slight variation from year to year in the relative positions occupied by each of these concerns, when measured by the small fraction of percentage of growth. They have explained this to be the result of keen competition and watchful management; that each of the five larger concerns is jealous of its position, and, having open and general knowledge of what its competitors are doing in the markets, strives constantly to maintain its share of the volume of business and to increase it wherever it can be done.

I have quoted figures showing the fluctuations in their purchases and in their sales from year to year, which seem to bear out their contentions in this respect.

The witnesses further show that in other lines of business the same phenomena of constant percentages is not an unusual experience.

The record shows that in the death rate of a small town, say, of 100 people, it might vary from 0 to 30 persons in a thousand from year to year, but in larger cities, from 50,000 to 100,000 and up, the death rate does not vary more than a small fraction of 1 per cent from year to year. It may be 16.2 per cent this year or 16.3 per cent next year, and so on.

In the matter of the new premium business of the leading life insurance companies of the country there is a small variation from year to year between the receipts of the largest companies.

The sales of the largest mail-order houses have been compared for a series of years and when put together it is found that while the business has been increasing very rapidly from year to year a most astonishing constancy in the percentage of the total done by each of the mail-order houses was found, yet there has been no charge of any conspiracy between the mail-order houses.

Comparisons were also made with reference to the railroads. On page 1024, part 14, of the hearings before the House Committee on Agriculture, March 11, 1920, figures are shown comparing the total business of many of the railroads of the country. For example, the Great Western, North Western, St. Paul, Soo, Chicago, Burlington & Quincy, and Chicago & Alton were compared. The annual percentage of business of the total done by this group of railroads, in the case of the Great Western, ran 4.4, 4.5, 4.5, 4.3, 3.9, 3.8, 4.1 of the total for the years 1913 to 1919, inclusive. The total of the North Western ran 25.8, 26.7, 26.1, 25.8, 26.2, 25.3, and 26.1 for each of the years.

Also a comparison was made of another group, composed of the Southern Railroad, the Seaboard Air Line, the Louisville & Nashville, and the Atlantic Coast Line. It is shown for the Southern Railroad that their percentage of the total business done by this group covering a number of years was as follows: 35.9, 36, 36.1, 36.3, 36.7, 37.3, 37, 37.5, 39.1, 37.9—a variation of over 1 per cent in one year.

I set out these tables at this point, as they serve as an illustration of the contention made by the large packers in accounting for the apparent uniformity of percentages of purchases of the larger packers:

Total business of western roads.

Year.	Great Western.	North Western.	St. Paul.	Soo.	C., B. & Q.	C. & A.
1913	4.4	25.8	29.2	6.6	29.3	4.7
1914	4.5	26.7	28.9	5.9	29.5	4.5
1915	4.5	26.1	29.5	5.8	29.5	4.6
1916	4.3	25.8	29.9	6.4	29.0	4.6

Total business of southern lines.

Year.	Southern.	Seaboard Air Line.	L. & N.	Atlantic Coast Line.
1910	35.9	12.6	32.8	18.7
1911	36.0	13.0	32.2	18.8
1912	36.1	13.0	31.0	19.0
1913	36.3	13.0	31.5	19.2
1914	36.7	13.2	31.0	19.1
1915	37.3	12.8	31.0	18.9
1916	37.0	12.9	31.9	18.2
1917	37.5	12.5	31.8	18.2
1918	39.1	12.0	31.3	17.6
1919	37.9	12.1	31.4	18.6

Also I set out a table showing the percentages of sales of eight of the mills manufacturing newsprint paper in this country, showing the volume of business transacted by each covering a perior of three years:

Year.	Mill No.—							
	1	2	3	4	5	6	7	8
1916	42.2	15.6	10.5	8.1	7.6	7.2	4.6	4.3
1917	46.5	14.6	10.3	6.5	7.0	7.2	3.7	4.3
1918	44.2	15.1	11.1	6.6	7.2	7.4	3.8	4.5

The packers have also pointed out that the purchase of hogs in the Chicago market made by the smaller packers showed the same constancy from year to year, and it has never been charged that the small packers have any agreement to fix the percentages of their purchases in the markets. There are also some letters and statements of witnesses tending to show that in certain markets of the country where there were two packing houses that there was an equal division of the receipts between such concerns on a basis of 50–50. This has been explained by the packers and other witnesses to apply to the surplus receipts at such a market. It frequently happens that more live stock is shipped into such a market than the trade requirements of either of the packers demand, but a duty devolves upon the packing plants located at such a point to protect the market and to purchase all live stock shipped to such market. If they did not do so, the producers would soon cease to patronize that market, and the plant investment of the packer would soon be lost for want of material on which to operate. The record is full of testimony showing that at each of these markets there are buyers for outside packing companies, also speculators who purchase live stock when the prices are low. The record shows that when the small packer or local butchers, speculators, and others trading upon the market have bought their actual requirements, they retire from the market, and the duty devolves upon the larger packers to absorb all the remaining live stock regardless of whether they need it in their business or not, for the purposes already specified.

Under such circumstances it is not unusual or unreasonable to expect each of the packing concerns located at such a point to carry its end of the burden and to take its reasonable proportionate share of the live stock offered for sale, but even if there is such a rule and such a practice, the record is full of testimony showing that there is competition in the purchase of live stock in all these markets. The small packers, competitors of the five larger packers, have all testified that there is such competition. Many producers of live stock familiar with the method of trading on such markets have likewise testified that there is open and active competition in the purchase of live stock at these market centers. Traders and speculators have also appeared at the hearings and testified to this fact, and they are the keenest competition the packers have on the markets of the country.

So that the point has been made that even if there should be a common understanding between the packers having plants at given points to protect the market by purchasing all the surplus live stock coming to such a market on any particular basis, such an understanding does not operate to the disadvantage of the producer but to his very great advantage, in that a sale is assured for his life stock at any of the public market places of the country to which he may elect to ship his live stock, and if it is true, as they state, that the live stock is sold on a competitive basis, in which the small packers, local butchers, and the speculators bid in competition with the five large packers, and the highest market price of the live stock is actually obtained, it does not seem to be a matter of any consequence to the producer or to the consumer as to what percentage is purchased by any one or more of the larger packers. The public is not particularly concerned in regard to whether Swift slaughters 30 per cent or 35 per cent of the aggregate slaughtered by the five larger packers of the country. The producer is concerned only with obtaining the highest market price for his live stock, while the consumer is concerned only with obtaining the products at a reasonable price.

Many witnesses have testified that these conditions exist, and it seems to me that it requires more than the circumstantial evidence offered in the form of the "tattered memorandum" to overturn the positive testimony of so many witnesses who have personal knowledge of the facts as they exist, especially when it is a fact, as heretofore pointed out, that the figures found in the memorandum do not approximate the percentage of purchases of either of the packers by thousands of head each year, nor of the sales made by each of the packers, ranging into the millions of dollars.

It is also a significant fact that this question of "usual percentage" of purchases was made an issue in the case against some of the packers tried in Chicago in 1912. It was fully charged, and all the facts presented to a jury, and they acquitted the packers of the charge that the law had been violated. In view of this fact it contradicts the assumption of the Senator from Iowa that a jury would determine that the circumstances of fairly constant percentages must necessarily be the result of "an agreement." If I am not mistaken, the Senator from Iowa [Mr. KENYON] was counsel in this particular case, and that a jury passed upon this identical issue without any evidence being submitted by the defendants and the case was decided against the Government.

This disposes of the first fundamental circumstance relied upon by the Federal Trade Commission to establish an unlawful agreement. The positive testimony of witnesses and the lack of consistency in the working out of the theory, both in purchases and sales as attempted to be demonstrated, destroys the force of the circumstance as sufficient proof of a fact so vital in their case. If this circumstance fails, there is little left of the case. It is the keystone in the arch of their structure, and when it fails the whole imaginary structure, built up with so much ingenuity, falls to the ground.

This brings us now to the consideration of the remaining circumstances offered by the commission in the summary of its report, offered as corroborative proof of a conspiracy in restraint of trade. It will be remembered that they could find no evidence of any beef pool such as existed in the early nineties and which I have pointed out is legal according to the Supreme Court of the United States in so far as it restricts shipments of dressed beef to prevent gluts and waste.

The first circumstance which they allege corroborates the theory that the usual percentage division of receipts proves a conspiracy is found in their charge that the packers have an agreement to divide the trade from South America. The commission in its original report included in that alleged conspiracy all of the five packers. After the summary was circulated the absurdity of the charge was pointed out in the fact that Cudahy Packing Co. have no establishment in South America engaged in the packing business, and therefore could not be in such a conspiracy. Before the commission published its other volumes they put a footnote in their report admitting that fact, but nevertheless did not alter their general charge.

The packers showed that the importation of meat from South America was very small and an inconsequential matter. They denied the existence of any agreement to divide the shipments, as charged by the Federal Trade Commission. They also pointed out the fact that at the time of the outbreak of the European war practically all refrigerator ships capable of transporting fresh frozen meats were of British registry and sailing under the British flag. The English Government commandeered all such refrigerated space and used it in transporting fresh meat to supply her civilian population and the armies of the Allies. The British Government had contracts with each of the local British and American packers transacting business in South America and allotted certain definite space in these boats to each of the packers. The amount of space so allotted automatically and definitely fixed the percentage or volume of business which each of the packers were able to transact from South America. All this was done with the sanction of the British Government.

The packers also pointed out that even if it had been true, which they denied, that there existed any agreement to divide shipments on any percentage basis, the total volume of such business was of such inconsequential effect as to make it impossible that it could have affected prices or in any manner restrained trade within the United States. Further, the principal volume of business from South America went to European countries, and Congress has passed an act which authorized American manufacturers to enter into associations and combinations in relation to export trade to foreign countries. Thus the chief corroborating circumstance offered by the commission is exploded.

The third circumstance offered by the commission is the charge that the packers have maintained certain joint funds.

The packers have not denied that in some instances they have contributed to joint funds, but they explained that these funds have been used for entirely legal and proper purposes, generally to protect the industry against unfair attacks and to pay attorneys for defending actions affecting the general industry. Likewise such funds have been raised to promote the welfare of packing-house employees in providing amusements, entertainments, and outings for the families of workingmen, and many other things to promote their social well-being.

It is a matter of knowledge that there is scarcely an organization of any kind in this country relating to any particular branch of business which does not raise joint funds and have associations for legitimate and proper purposes incident to the business.

There is no proof anywhere in the records of all the hearings to show that any of the joint funds raised by the packers were used for any illegal purposes, so it is found that this circumstance also utterly fails to sustain in any way the charges made by the commission.

The fourth circumstance offered by the commission charges that there are alleged agreements relating to other lines than the purchase of live stock and the sale of meats, namely, cheese and lard compound. The packers deny that they have any agreements or understanding in effect relating to any commodity handled by them, whether meat or any of the so-called "unrelated lines." The commission undertakes to support this charge by setting forth certain correspondence quoted on pages 36 and 37 of the summary of its report. It felt so certain of its ground that it was constrained to say:

> The quotations already made would seem to answer affirmatively the President's question, "Are there manipulations, controls, trusts, combinations, conspiracies, or restraints of trade out of harmony with the law or the public interest?"

It is not surprising, understanding the methods used in securing its facts and presenting them without hearings or explanations from the writers of the letters and documents, that they should have made errors in their deductions. The uniform prices referred to in the correspondence quoted related to lard compound. These prices were not the result of a conspiracy or unlawful agreement on the part of the packers, but were adopted at the suggestion of the Food Administration of the Government which undertook to regulate and stabilize the prices of many basic food products during the war, and the correspondence quoted merely demonstrates that the packers were undertaking to carry out the instructions of the Government and to cooperate with it in maintaining its regulations.

This affords a fair illustration of the many misconstructions placed upon memoranda and data collected by the commission.

Thus each of the four principal circumstances relied upon by the Federal Trade Commission to establish its charge can be reasonably explained on another hypothesis than that they were the foundation of an illegal and unlawful conspiracy in restraint of trade.

This brings us to a consideration of the conclusions reached by the Federal Trade Commission predicated upon these four circumstances; that is to say, from these circumstances the Federal Trade Commission presumes that there must exist an illegal combination in restraint of trade, and that the packers are working collusively together to manipulate live-stock markets, restrict interstate and international supplies of food, defraud both the producers of food and consumers, crush effective competition, secure special privileges from railroads, stockyards companies and monopolies, and profiteer.

Now, let us examine into the evidence to see whether these conclusions are justified by the facts. No witness has appeared before any of the hearings, in so far as I have been able to ascertain by an examination of the record, who testified to any fact showing any agreement to manipulate the live-stock markets of this country. A few witnesses, who have been most active in the agitation among the producers, have stated that they believe the markets were manipulated, but have offered no affirmative proof. The general trend of their statements has been predicated upon the conclusion reached by the Federal Trade Commission, based primarily upon the circumstances heretofore pointed out. Each of the larger packers have positively and unequivocally stated that there are no such agreements to manipulate the live-stock markets, and in fact they are not susceptible of manipulation by any group of men. There are at present, at every market center, other buyers than the larger packers, including many of the smaller packers, some of whom buy a sufficient number of live stock each day to materially affect the market prices. It has been shown that frequently the active buying of smaller packers and local butchers, supplemented by the speculators, actually fixes the market price for that particular day. But if it should be conceded that the packers have manipulated the live-stock markets, the records show that they have manipulated them against their own interests. Even a cursory examination of the records will substantiate this statement, because each year from 1910 to 1918 the figures show a constant advance in the average price paid for live stock in the markets of this coun-

try. According to a statement compiled by the Chicago Drovers' Journal, the average yearly price of cattle, per 100 pounds of native beef cattle, was as follows:

Year.	1,500 to 1,800 pounds.	750 to 1,050 pounds.
1910	7.70	5.90
1911	7.00	5.85
1912	9.60	7.10
1913	8.85	7.00
1914	9.75	7.10
1915	9.25	7.70
1916	10.75	7.45
1917	12.75	10.50

The average price paid for beef steers at Chicago in 1918 was $14.65 as compared with $7.70 for the heavier steers and $5.80 for the lighter steers in 1910. The average price of hogs for the same period likewise shows that the packers have manipulated the prices they paid the producer—upward. According to the same journal, the following average prices were paid:

Mixed.

1910	$8.90
1911	6.70
1912	7.60
1913	8.50
1914	8.30
1915	7.20
1916	9.60
1917	15.10
1918	17.45

For lambs the packers paid $16.60 per head, as compared with $8 in 1916 and $7.55 in 1910. So it will be seen that the packers manipulated themselves into paying the producer an increase of nearly 100 per cent in 1918 over the prices they were paying for raw material in 1910.

This has been done notwithstanding the fact that the records show that the number of live stock slaughtered has also shown a great increase. These values have increased in the face of a constantly growing volume of animals marketed each year. According to reports, there were slaughtered at 919 Government-inspected establishments as follows:

Cattle.

1910	7,962,189
1918	9,299,489

Swine.

1910	27,656,021
1918	40,216,847

It is of further interest to note that on July 1, 1918, the relative number of live stock in the United States had increased over July 1, 1917, by the following percentages:

Hogs, all ages, 3.3 per cent; cattle, all classes, 3.9 per cent. Thus it is shown that notwithstanding the large increase of live stock marketed and the increased supply in the hands of the producers, there was a phenomenal increase in the price paid the producer for his product.

The second conclusion reached by the Federal Trade Commission was that the five larger packers restricted interstate and international supplies of food. The United States Department of Agriculture, in the Monthly Crop Reporter for March, 1919, says:

> Meat production in the United States in the total of all classes was 18,865,000,000 pounds in 1914, and in 1918 war-time needs promoted a production of 23,366,000,000 pounds. Undoubtedly the stupendous production of 1918 was never before reached in this country, and certainly not in other countries by long odds.

The United States Food Administration, in a report on "The production of meat in the United States and its distribution during the war," says, concerning beef exports:

> Just before the war began the United States exported somewhat less than 3 per cent of the total production each year, but in 1915 the production jumped to 6 per cent, and in 1918 to 9.65 per cent.

The same authority states that beef exports in 1918 were 773,000,000 pounds, over three and one-half times as much as was exported altogether in the three prewar years of 1911, 1912, and 1913. Concerning pork exports, the Food Administration stated that:

> At the beginning of the war in 1914 a steady rise in exports became apparent, reaching the culmination in 1918 under the stimulus of a large foreign demand and as a result of the conservation practiced by the American people. In February, 1918, extremely urgent demands were made by the Allies for pork shipments to meet their absolute needs. In fact, further prosecution of the war was shown to be directly dependent upon immediate meat and wheat supplies being sent to them. At that time a program was worked out calling for 300,000,000 pounds of pork products per month for the following three months. It was an undertaking that many people considered entirely impossible, but the program was carried out within 25,000,000 of the grand total of 900,000,000 pounds, and the absolute requirements of the Allies were met.

At this point let me ask what would have happened if the packing business of this country had been in charge of the Federal Trade Commission or the clerks making the commission's report?

These facts and figures do not bear out the contention of the Federal Trade Commission that the packers restricted interstate and international supply of food.

CONTROLLED MEAT PRICES.

The third conclusion reached by the Federal Trade Commission was that the five larger packers controlled the prices of dressed meats and other foods. They made this charge, notwithstanding that in another portion of their report they state that there does not exist any beef pool such as existed in the early nineties. Each of the larger packers have denied positively and unequivocally that there is any understanding or agreement to control prices of dressed meats and other foods. No witness, in so far as I have been able to see, has testified to the existence of any such agreement. It is predicated wholly upon the assumption of the Federal Trade Commission. Under the regulations of the Federal Food Administration the packers were allowed to earn 9 per cent on invested capital in the case of edible meat products, which constituted the bulk of their business. If they really did control the prices of dressed meats and other foods they certainly should have been able to take advantage of the limits fixed by the Food Administration, the 9 per cent allowed them by law as a fair maximum. They were unable to do so, and thereby deprived themselves of many millions of dollars which they would have been legally authorized to earn. The United States Food Administration, in its report for the year 1918, among other things says:

> The profits on the controlled products of the packers subject to this control during the first year of such regulation, from November 1, 1917, to November 1, 1918, as shown by audited accounts, were $40,594,935 on an investment average for the year of $714,187,204, a net profit on the total investment for one year, under the rules of the Food Administration, of 5.6 per cent, or considerably less than the maximum allowed by those rules. On the gross sales of $2,434,113,430 the profit of $40,594,935 represents a percentage of only 1.6 per cent.

Does it seem reasonable that if the five larger packers have it within their power to control prices of their products and demand of the consumer whatever they might choose that they would not also be able to earn more than these figures show that they have earned in the past? The very fact that they were unable to earn the 9 per cent allowed during the war, and are showing decreased earnings for 1920 amounting to millions of dollars, shows that they are not able to exercise such power. It must be remembered that they are dealing in a perishable product which must be disposed of promptly. Their goods can not be kept on the shelf, like hardware or dry goods, to await a purchaser at the prices marked thereon, but must be disposed of, even though it be at a loss.

The fourth charge of the Federal Trade Commission is that the five larger packers defraud both the producers and the consumers. No witness has testified to any affirmative fact which tends to support this conclusion. On the other hand, the packers have all testified that such a charge is false and groundless. The United States Department of Agriculture in 1917 investigated the marketing of nine lots of cattle from the farm to the table. They found that on the average out of every dollar paid by the consumer for the beef from 15 to 20 cents went to the retailer, from 66⅔ to 75 cents to the live-stock producer, and from 5 to 7 cents to the packer. The small remainder went for shipping and yardage. Out of the 5 to 7 cents received by the packer he must pay his expenses of killing, dressing, icing, shipping, selling, insurance, taxes, wages, depreciation, and his profit. That rate of distribution of the proceeds can hardly be called fraudulent in so far as the packer is concerned. Moreover, the packers claim that out of every dollar that they receive for meat from 85 to 90 cents goes to pay for live stock. If this be true, it can not be called defrauding the producers. The facts in relation to the consumer, from the testimony at the hearings, seems to be even better. Not one of the larger packers averaged as much as 2 cents profit on each dollar's worth of meat sold in 1918. The year 1919 was not so good as 1918, and from the statements of packers, now being issued for the year 1920, they seem to be even worse. It is apparent from the facts developed in these years that the rate of profit charged by the packer on his operations is less than that of any other industry in this country or in the world.

The next conclusion reached by the Federal Trade Commission was that the five larger packers were engaged in a conspiracy to crush effective competition. The Senator from Iowa also stated in the course of his speech that there were a few independents but that they existed by sufferance. The five larger packers have denied emphatically every charge that they were engaged in any effort to crush competition. Although

there have been nine hearings before committees of Congress on this subject, neither the Federal Trade Commission nor the proponents of this legislation have been able to produce a single small packer who testifies that this charge is true. On the contrary, a large number of the representative smaller packers have appeared before these committees and refuted this charge. In fact, they have uniformly stated that they have found the competition of the larger packers keen but fair, and in many respects they would rather have the competition of the larger packers than that of some of the smaller ones.

Some of the smaller packers have testified that the larger packers have been a great aid to them in their business, have furnished them cars at times when they could not be secured from other sources, and have bought from them their surplus products which could not otherwise be marketed to an advantage to themselves. The Federal Trade Commission in part 5 of its report is forced to say:

> Thus it appears that in 1914, 75 independent packers earned 12.6 per cent on net worth, while the five great packers only earned 8.3 per cent. In 1915 the five great packers earned less than 75 independent packers by a narrow margin. In 1916 the great packers averaged 18.5 per cent, against the independent packers' 22.1 per cent. The average for the three years shows a rate of profitableness considerably to the advantage of the independents.

In another point in their report the commission says:

> Table 16 indicates that the rate of return for the independent beef packers averages 2.2 cents, for the pork packers 2.4 cents, for the mixed packers 1.7 cents, and for the 117 companies combined 2.2 cents per dollar of sales. Thus it appears that the independent companies as a class, while making about the same profit on sales as the great companies, represent a high ratio on investment (18.1 per cent), and the contention of the great packers that only a large organization can exist on these rates is not sustained by the facts.

Whatever the merits of their contention, the facts from the records and reports of the Federal Trade Commission on this end show that the small packer is maintaining himself in the face of this competition and is not being crushed as charged by the Federal Trade Commission. It may be of interest in this connection to show what some of the smaller packers at Chicago are doing. The records show that in the year 1910 the smaller packer located at Chicago slaughtered 1,302,200 hogs, which represented 23.31 per cent of the total receipts of that market. This number has increased each year until in the year 1915 they slaughtered 2,657,400 head, or an increase of 104.07 per cent over 1910.

Mr. KING. Mr. President, will my colleague yield?

Mr. SMOOT. Certainly.

Mr. KING. My colleague stated a few moments ago, as I recall, that at a certain period there were between 800 and 900 slaughterhouses or places that were being inspected by the Government. I was wondering, apropos of the statement just made, as to the increase in the activities of the independents, what proportion of the 800 or 900 places that were being inspected by the Government were owned by the packers and what proportion by the independents.

Mr. SMOOT. My colleague must have misunderstood me. I said 9 or 10.

In the year 1916 they slaughtered 3,334,739 head, which represented an increase of 156.07 per cent over the year 1910, which shows that notwithstanding the charges of the commission that the five larger packers control and dominate the market and destroy competition, these smaller packers have been able to increase their business through these years so that they slaughtered 45.05 per cent of the total slaughter of the Chicago market as against 28.2 per cent in 1910, which represents an increase of 2,032,439 head for the year 1916 over the year 1910. In the year 1916 the five larger packers slaughtered 1,485,800 head more hogs at the Chicago markets than they slaughtered in 1910, while the small packers, during the same year, slaughtered 3,032,439 hogs more than they slaughtered in 1910.

The next charge made by the commission was that the five larger packers secure special privileges from railroads, stockyards companies, and municipalities. The five larger packers have denied the truth of these statements. No witness has testified to any fact to support those charges. If they are true, there are ample laws upon the books to punish same, but it is significant that the Federal Trade Commission have not filed any charges against the packers on such complaints, which they would have the power to do under the law.

The last of their charges is that the five larger packers have profiteered. This point has already been covered to a large extent. The claim that the profits of the packers have not exceeded, or averaged, more than 2 cents on the dollar of sales covering a long period of years has not been refuted by any reliable authority, and until that is done the charge can not be accepted as a fact.

As I read the testimony before the committees, the general consensus of opinion has been that the profits of the packers have been fair and reasonable considering the perishable nature of their product and the efficient service rendered to the public; that this service has been efficient and economical, and that they have been fair to their competitors.

Under these circumstances it seems to me that the record not only shows that the four principal circumstances relied upon by the Federal Trade Commission to substantiate their charge of an illegal conspiracy have fallen, but all the conclusions which they predicated upon such a hypothesis have likewise been refuted by the preponderance of the testimony taken before the several committees of Congress. If this be true, then I ask the Senate wherein is there justification or excuse for the creation of a Federal live-stock commission to be invested with arbitrary, autocratic powers such as have never before been placed over private business in this country?

Mr. President, I have some other matters that I desired to present to the Senate. I wanted to show to the Senate where the profiteering in meats is, but time will not permit.

Mr. STERLING. Mr. President, I desire to occupy the time very briefly in explanation of a substitute to the pending bill, which was presented on the calendar day of January 18. I offer it not through any ambition to have adopted a substitute to the pending bill, but the principal change sought to be made by the substitute involved so many other changes in the bill that I thought when I drew the substitute that that was the best form in which to present the matter to the Senate. At present, however, I think the matter may be reached by amendments, and at the proper time I shall determine whether to offer the substitute or to offer amendments which will cover the features involved in the substitute.

Mr. President, we have heard a great deal recently about the creation of so many governmental commissions. We have heard a great deal of complaint, and the question has been asked again and again if we were going to have a Government entirely bureaucratic or a Government of commissions. It occurred to me, as I thought of the bill and of its main features, and as I thought of the instrumentalities which we already have at hand, that there was no necessity for a bill creating another and an additional commission with great powers such as are conferred by the bill upon a so-called live-stock commission.

I have thought of the powers and the duties conferred upon the Federal Trade Commission which are akin for the most part to the powers conferred upon the live-stock commission created in the bill, and I have wondered if, by conferring these powers upon the Federal Trade Commission, we would not reach the same result exactly, and perhaps in a more efficient way, than we would in creating a new commission with all the expense attendant thereon.

With that thought in view, I have offered a substitute, and I am now going to call attention to the main features of the substitute. I think I can do that better by referring to the manner in which I would amend the bill. If Senators will follow the bill with the suggestions I make in regard to amendments they will have, I think, a very clear idea of how the bill will stand should the amendments be agreed to, or what the substitute will be if adopted.

In pursuance of the plan to have the Federal Trade Commission do the work, make the investigations and bring prosecutions against those who violate the law, I have stricken out, on page 2, in lines 5 and 6, the words "live-stock commission created by this act" and inserted in lieu thereof the words "Trade Commission," so that portion of lines 5 and 6 will read, "The term 'commission' means the 'Federal Trade Commission.'"

Mr. POMERENE. Mr. President, will the Senator yield?

Mr. STERLING. Certainly.

Mr. POMERENE. I wish to ask the Senator his construction of section 5 of the original bill. In his judgment, are the powers conferred upon the live-stock commission exclusive of the powers which the Federal Trade Commission can now exercise with respect to the packers, or would the powers of the live-stock commission and the Federal Trade Commission be concurrent?

Mr. STERLING. My opinion is that they would be concurrent powers.

Mr. POMERENE. That is my judgment about it as the bill is drawn. In other words, there could be two investigations going on with respect to the same subject matter, one by the Federal Trade Commission and the other by the live-stock commission.

Mr. STERLING. Exactly.

A second amendment would be the striking out of sections 3, 4, 5, 7, 8, and 9 of title 2 of the bill. These sections, as will

be observed, for the most part have to do with the constitution of the live-stock commission itself. Of course, if we substitute the Federal Trade Commission in place of the live-stock commission, the language should be stricken out which confers powers and duties upon and provides for the constitution of the live-stock commission.

Mr. POMERENE. In this connection may I ask the Senator another question?

Mr. STERLING. Certainly.

Mr. POMERENE. Section 6 of the pending bill, it seems to me, gives to the Federal Trade Commission identically the same powers and duties which are now exercised and performed by the Bureau of Markets in the Department of Agriculture. Does not the Senator's proposed substitute also duplicate that provision? In other words——

Mr. STERLING. I thought that the Federal Trade Commission, if the powers to regulate the packers' business are conferred upon them, should have the powers involved in section 6 distinctly. Section 6 provides that:

> The commission shall have all the powers and duties heretofore exercised or performed by the Bureau of Markets in the Department of Agriculture relating to the acquisition and dissemination of information regarding the production, distribution, and consumption of live stock or live-stock products. It shall investigate and ascertain the demand for, the supply, consumption, costs, and prices of, and all other facts relating to the ownership, production, transportation, manufacture, storage, handling, or distribution of live stock or live-stock products, including operations on and the ownership of stock yards.

Without examining the powers conferred upon the Bureau of Markets, I have thought those were wholesome powers to confer upon the Federal Trade Commission.

Mr. POMERENE. Mr. President, if the original bill is adopted or if the substitute which is offered by the Senator from South Dakota be adopted, I think that I agree with him that those powers should be exercised by one commission or the other, if they are to be exercised; but it seems to me that in the event of the adoption of either the original bill or the substitute, we should eliminate the bureau in the Agricultural Department, because certainly we ought not to duplicate the expense.

Mr. STERLING. I think the Senator from Ohio is right about that, but here is a power conferred that I think can very well be exercised by any commission that has charge of these great industries.

Another amendment would be, on page 11, subdivision (f), after the word "or," in line 9, to add the words "the rules, regulations, and orders made hereunder," and to strike out subdivision "(g)." I think the reason for the amendment will be obvious at once, because subdivision (g) repeats the language of subdivision (f), except that at the end of subdivision (g) we find the words "and the rules, regulations, and orders made hereunder." Those words probably should be added to subdivision (f), but the remainder of subdivision (g) is largely a repetition of the language of subdivision (f).

Mr. KING. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Dakota yield to the Senator from Utah?

Mr. STERLING. I yield.

Mr. KING. I find from an examination of the bill that reference is repeatedly made to the power of the commission to promulgate rules, orders, and regulations. Then, there are a number of penal provisions, making a violation of any rule or order or regulation a misdemeanor, subject to heavy fine and to other heavy penalties. Has the Senator from South Dakota any suggestion to make with respect to those provisions or as to any limitation upon the power of the commission to make its orders and regulations penal in character?

Mr. STERLING. If the Senator will examine the last section of the proposed substitute, he will find that all the powers heretofore conferred upon the Federal Trade Commission are conferred upon that commission for the purposes of this act, and the procedure is to be the same as provided by the Federal Trade Commission act.

Mr. KING. I beg the Senator's pardon, but he speaks of a proposed substitute. Has he offered a proposed substitute?

Mr. STERLING. I have offered a substitute, which the Senator will find has been printed and placed upon the desks of Senators.

Mr. KING. I have not had the opportunity of seeing it. Just one other question, if the Senator will pardon me.

Mr. STERLING. Yes.

Mr. KING. Perhaps I did not make myself clear, but I wish to ask, has the Senator from South Dakota reached any conclusion as to the wisdom of committing to this proposed board to be created by the pending bill the power to ordain and promulgate rules and regulations and orders and then make it an offense to violate them?

Mr. STERLING. Yes; I have reached some conclusion upon that question, Mr. President.

Mr. KING. Without restrictions upon the power of the commission to issue such rules, regulations, and orders and upon their character?

Mr. STERLING. I think that it is within the power of Congress to confer upon a commission the power to make rules and regulations and to issue orders and to provide also a penalty for the violation of such rules and regulations, for if the rule or the regulation is made in pursuance of law, that rule or regulation is itself law, and for the violation of the rule or regulation there may be a punishment imposed.

Mr. KING. Mr. President, if the Senator will pardon me, I shall not challenge the constitutionality of an act that commits to a commission the power to promulgate rules, orders, and regulations and which also contains a provision that a violation of such rules or orders and regulations shall constitute a penal offense; and yet I very much doubt the wisdom and the propriety of such procedure. However, does not the Senator realize that there is distinction between what might be denominated a governmental agency, such, for instance, as the Interior Department and the Forest Service, which is a branch of it, and rules and regulations which may be promulgated by that executive instrumentality, and rules and regulations and orders which may be formulated and promulgated by some independent agency which is further removed from the Government, such as a commission of the character proposed?

Mr. STERLING. Oh, there may be cases, Mr. President, where there would be a distinction between a rule or regulation promulgated by a department of the Government and a rule or regulation promulgated by a commission; but, I think, perhaps, within the scope of the powers of the commission, as those powers have been conferred by Congress, it is proper to authorize the commission to make the rules and regulations to carry out the orders that it may make.

Mr. KENYON. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Dakota yield to the Senator from Iowa?

Mr. STERLING. I yield.

Mr. KENYON. The Senator from Utah [Mr. KING] has suggested that there are no limitations on that provision of the bill. I wish to call the attention of the Senator from Utah to the bill as it is in that respect. Suppose rules and regulations were made by the commission under the authority of the law, if the bill shall become a law, within 30 days an appeal may be taken from the commission to the circuit court of appeals. If then the action of the commission is affirmed by the circuit court of appeals, there is the commission of no crime until there is a further violation. I think that fact has been lost sight of. The Senator from Missouri the other day criticized the proposed legislation for that very reason; but we were careful to meet that objection, because there are a good many Senators who think that no one connected with any department or board ought to have the right to make rules and regulations the violation of which shall constitute a crime. We have safeguarded that.

However, as the Senator from South Dakota [Mr. STERLING] has said, there are cases—and I presume the Senator from Utah is familiar with them—which have gone before the Supreme Court of the United States where the court have held that it is no delegation of legislative power for the Secretary of Agriculture to be empowered to make rules, as he has done in many cases; for instance, in relation to forest reservations. The court have held that to be a proper delegation of power. The committee, however, has, out of an abundance of caution, limited that power of the commission.

Mr. EDGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Dakota yield to the Senator from New Jersey?

Mr. STERLING. I yield.

Mr. EDGE. I should like to ask another question, following up the reply of the Senator from Iowa [Mr. KENYON], if the Senator from South Dakota will permit me to do so.

Mr. STERLING. I yield to the Senator for that purpose.

Mr. EDGE. Does not the power of the commission as provided in the original bill go even a step farther than that? After the rules and regulations have been promulgated and complaint has been filed and the commission has acted, and on appeal the action of the commission is affirmed by the circuit court of appeals, a violation of the order of the commission would be the subject of further investigation by the commission. Is it not a fact that then the commission tries the case and decides as to the guilt and the punishment? In other words, the commission really provide the law, or the rule and regulation, which is the same thing, try the case, decide as to the guilt or inno-

cence of the party accused, and mete out the punishment? Is not that correct?

Mr. KENYON. No. It may be said that the commission tries the case when complaint is brought, or they may establish a rule without reference to any complaint at all. Then at the end of 30 days that is binding unless the party takes an appeal. If he takes an appeal to the circuit court of appeals and that appeal is sustained, then it is final; if it is overruled, of course, that is the end of it. If it is sustained, there must be a subsequent violation of it before it becomes a criminal offense; but the punishment would not be in the hands of the commission, but would be with the court.

Mr. EDGE. If there is a subsequent violation of it, however, then the commission would have entire jurisdiction?

Mr. KENYON. Oh, no.

Mr. EDGE. That is the question I am asking.

Mr. KENYON. Then it becomes a question for the courts. Of course, the bill provides the punishment if they continue to violate the law, but the punishment becomes a question for the courts.

Mr. EDGE. The commission, however, tries the case and decides as to the issue.

Mr. KENYON. Originally, before it goes to the appellate court. I want to be perfectly fair, and I say that there is a restriction upon the hearing in the upper court. It is not a de novo hearing, but if there is substantial evidence to support the action of the commission, that is sufficient.

Mr. STERLING. Mr. President, continuing with reference to the proposed amendments, I would strike out section 15 of the bill. The bill as amended by the committee, according to the copy which I have before me, strikes out a good part of section 15, but that which remains reads as follows:

> It shall be the duty of every packer and operator to comply with the provisions of this act, and the rules, regulations, and orders which the commission may from time to time prescribe in conformity with this act.

I do not believe it is necessary, after we have framed a section of a proposed statute prescribing certain duties, to add thereto that it shall be the duty of the citizen to obey the law or any rule or regulation that is made under the law or in pursuance of it. That is wholly unnecessary, and, therefore, the reason to amend by striking it out.

I would further strike out section 17 and subdivisions (a), (b), and (c) of section 18, found on page 14 of the bill. I think all in italics in section 17, being the amendment reported by the committee, is a repetition, word for word, of what already occurs in the bill at another place.

Mr. KENYON. Mr. President, will the Senator point out the other place, if he knows of any other place where that clause occurs in the bill?

Mr. STERLING. I think I can, if I may have a little time. I do not find it at this moment, but that was clearly my impression as I read it, I will say to the Senator from Iowa.

Mr. KENYON. I think the Senator from South Dakota is mistaken about that.

Mr. STERLING. It is barely possible now that I have this bill confused with the Federal Trade Commission act. I had it marked "repetition"; but the language, as I think the Senator will agree with me, is in the Federal Trade Commission act.

Mr. KENYON. And we placed the language in as a committee amendment in order to conform with that act.

Mr. STERLING. I wish to say that very much of the language here providing for procedure, prescribing penalties, and so forth, is taken from the Federal Trade Commission act. That runs throughout the bill and throughout all of the title relating to the procedure for violations.

The latter part of section 17, that following the part in italics, is practically covered by the first paragraph of section 10 of the Federal Trade Commission act. I would strike out subdivisions (a), (b), and (c) of section 18; and why? Because they are covered by paragraph 2 of section 10 of the Federal Trade Commission act. I would strike out sections 20, 21, and 22; and in doing that I would call attention to section 5 of the Federal Trade Commission act, under which section the proceedings are substantially as they are provided for in the pending bill and under section 20 of the pending bill.

Section 21 I move to strike out.

What is the difference between section 21 and the Federal Trade Commission act, Mr. President? The distinction between the two is simply this: Under the Federal Trade Commission act it is for the commission, in case of the violation of an order to cease or desist from any unfair method or practice in competition, to invoke the aid of the court; but under section 21 of the bill it is for the individual against whom the order is made to invoke the aid of the court instead of the commission. That is the difference between the two.

Mr. KENYON. Mr. President, my attention was diverted for a moment. Will the Senator state that difference again so that I will have no question about it?

Mr. STERLING. In the Federal Trade Commission act, where an order is made, for example, that a corporation shall cease or desist from any alleged or proven unfair method or practice in competition or trade, the commission must take the initiative in invoking the aid of the court, as a general proposition, although the individual may seek a review of the order of the commission; but under the bill, according to section 21, it is for the individual against whom the order is made to invoke the aid of the court.

Mr. KENYON. I am glad the Senator stated that difference. In other words, this procedure follows the interstate commerce act instead of the Federal Trade Commission act?

Mr. STERLING. Yes. I have moved, or shall move, to strike out section 21; but, after all, it is a matter of not so very much consequence. I should not be a stickler by any means for striking out section 21, thus reversing, as it were, that course of procedure.

Mr. WALSH of Montana. Mr. President, I am desirous of following the argument of the Senator from South Dakota; and I am really curious to know why he calls attention to this difference between the procedure prescribed by this bill and the procedure prescribed by the Federal Trade Commission act, and whether he prefers the procedure prescribed by the Federal Trade Commission act, and, if he does, why he prefers that procedure? It occurred to me that it was a fairer method to permit the review as prescribed in the pending bill. Under the Federal Trade Commission act the order goes, and the order is final, and there is no opportunity for a review in the court until either the one party or the other begins proceedings in the court for an enforcement or a cancellation of the order; but here a right of appeal is given to the court, so that the order does not even become final.

In effect, it seems to me, the two methods are substantially identical. So far as I can see, the substantial rights are not different under either procedure; and I should be very glad to hear from the Senator on that point.

Mr. STERLING. I do not think the substantial rights of the parties differ, except that under the Federal Trade Commission act it is incumbent upon the commission itself to proceed in court in the first instance in case the order to cease or desist from the unfair method in competition is not complied with, whereas here the individual complaining of the order must appeal therefrom.

Mr. WALSH of Montana. Mr. President, let me call the attention of the Senator to the fact that that is an added protection to the person proceeded against, because he then would have the opportunity of a review in the court, and when the court finally made the ruling, if it was adverse to him, it would be just the same as though the commission had prosecuted the proceedings under the Federal Trade Commission act; so that in effect it does not seem to me that there is the slightest difference between the two systems of procedure.

Mr. STERLING. I agree with the Senator from Montana that in effect they do not much differ, and I am not at all particular about striking out section 21, as I have already stated.

Section 22 I move to strike out, for the simple reason that it is the same in substance as provided for already in the Federal Trade Commission act. The language is much the same. See page 4 of the Federal Trade Commission act.

Another amendment: Beginning with line 4, on page 21, strike out all down to and including line 2, on page 22.

Mr. KENYON. Mr. President, may I ask the Senator a question?

Mr. STERLING. I yield.

Mr. KENYON. I was not able to be present when the Senator started. As I understand, the Senator does not have a series of motions to strike out, which might be inferred from what he has said, but his idea is embodied entirely in this substitute?

Mr. STERLING. It is embodied entirely in the substitute; but, as I stated when I began, I was not certain whether I should offer amendments to cover the features of the substitute or offer the substitute itself. I am not particular about that. I think now I shall probably offer them by way of amendment.

Mr. POMERENE. Mr. President, will it interrupt the Senator if I ask him a question?

Mr. STERLING. Not at all.

Mr. POMERENE. I should like the attention also of the Senator from Iowa.

The amendment of the Senator from South Dakota proposes to strike out certain parts of section 25. This is Title V, the

subject of which is "Voluntary registration of packers and stockyards"; and then it provides for the voluntary registration of these packers. In other words, there is nothing compulsory about it. Now, it seems to me that either they ought to be registered or they ought not to be registered. If it is a wise thing to register them, then we should make it compulsory. If it is to be purely voluntary, then it seems to me a packer or a stockyard owner will not register if he feels that any restriction is going to be placed upon him.

Again, if you will consider section 25 in connection with section 10, you will find that section 10 confers upon the commission the power to adopt certain rules and regulations. That is a plenary power. There is nothing that could be desired beyond what is contained in section 10, and it seems to me that everything the committee could hope to derive from the registration as provided in section 25 is already conferred upon the commission by section 10.

Again, let us assume for the sake of the argument that certain of these stockyard men or packers have registered, and they have failed to comply with the rules which are adopted by the commission under section 25 with respect to registration: Where will they be if their certificate is withdrawn from them? Why, certainly they would still be subject to the provisions of section 10; and so it seems to me that nothing whatsoever is gained by section 25. It provides in a general way on page 22 as to what shall be the duties of the registrant, and in section 23 it says what shall be the duties of the commission, and then goes on to detail them; but the duties of the registrant and the duties of the commission are already comprehended in section 10, so that it seems to me we are inserting here certain provisions that will be entirely nugatory.

Mr. KENYON. Mr. President——

Mr. STERLING. I yield to the Senator from Iowa.

Mr. KENYON. I do not like to take the Senator's time, but I think perhaps discussion now helps to abbreviate discussion in the future. I will say to the Senator from Ohio that the registration provided for in title 5 is, as we understand it, entirely voluntary; but the Senator from New York [Mr. WADSWORTH] made an argument some time ago to show that it amounted to compulsory registration. That comes back to this:

A compulsory registration would be practically the same as a license. Some of the bills that were originally introduced, including the one I introduced, provided for a license system. The committee were not willing to follow that. The majority of the committee are not willing to lay down the rule that corporations engaged in this business in interstate commerce shall be licensed. That is a proposition that received a good deal of consideration, and the Senator from Minnesota has introduced a bill along that line.

This is an experiment in establishing public markets, to try to get rid of the long toll line between the producer and the consumer, and to enable those who desire to do this thing voluntarily, with no compulsion, to undertake it. Then, when they do, the Government furnishes them certain lines of information.

Mr. POMERENE. I did not hear the reasons given by the Senator from New York—in fact, I did not hear his speech—but I am a little bit surprised that he or anybody else should say that the provisions of section 25 are compulsory, because the very first sentence of section 25 is to this effect:

The commission *may*, upon application by any individual—

And so forth.

Mr. KENYON. I hesitate to undertake to give the thought of the Senator from New York, but, as I remember, it was that if certain competitors commenced to register, all others would be compelled to register, because there would be certain advantages in the registration to the party who was registered, and consequently the competitor would be forced to put himself in the same position.

Mr. POMERENE. If you are going on the theory that these provisions in section 25 are going to be wholly for the advantage of the packer, then I can follow the Senator from Iowa.

Mr. KENYON. They are for the advantage of consumers, to enable them to establish public markets, where the consumer will not be compelled to pay the toll he is now forced to pay. That is really a provision in the interest of the consumers of the country.

Mr. POMERENE. May I ask the Senator what protection can either the packer or the consumer receive under section 25 which he would not receive under section 10? Further, what authority is given to the commission under section 25 which is not already conferred by section 10?

Mr. KENYON. A great deal of authority, I will say to the Senator. One of the things which has been complained against very strongly here on the floor is that title 5 forces them to register, and then that it gives the tremendous powers, even as has been suggested here, under subdivision 2, of investigating the financial resources and credit and standing of the applicant, and the location and the character and extent of grounds, and so forth. It gives a general supervision. That would be faulty if it was compulsory.

Mr. POMERENE. I can not follow the Senator in his logic in this matter.

Mr. KENYON. I am sorry; I know it is all my fault.

Mr. POMERENE. The Senator argues this question as if it was a compulsory registration, and at the same time the title is headed as follows: "Voluntary registration of packers and stockyards."

Mr. KENYON. If the Senator understands me to argue that it provides for compulsory registration, I certainly have not made myself clear. I was giving the argument suggested by the Senator from New York [Mr. WADSWORTH] that it was compulsory. I say it is not. It is purely voluntary. It is purely an experiment to see what we can do in the way of public markets.

Mr. POMERENE. Then my guess is that if it is going to be voluntary we can assume that not one of these packers is going to submit himself to voluntary restrictions. They will submit themselves to compulsory restrictions, if we compel them to do it.

Mr. KENYON. I feel like asking the pardon of the Senator from South Dakota for trespassing on his time; but suppose a packer does not, and suppose some people in the city of New York want to establish a voluntary market and see what they can work out in the shape of a public market. They register, and as a result they get certain advantages, certain information, and certain help from the Government. The packers do not have to go into it, and it is not the intention to force them into it.

Mr. POMERENE. The Senator from Iowa, if he will pardon me, is basing a conclusion upon a certain hypothesis.

Mr. KENYON. Most conclusions are based on hypotheses.

Mr. POMERENE. I know that; but I do not see any foundation for this hypothesis. The Senator says, suppose some men in New York City come in and voluntarily register and submit themselves to certain restrictions which are offensive to certain other packers, then other packers may come in. I say that is the goal to which we are driven.

Mr. KENYON. I wonder whether the trouble is with the Senator from Ohio or myself. We seem to be absolutely at cross-purposes. I suppose it is due to my trying to give the argument of the Senator from New York that it is compulsory registration and trying to give my own argument that it is not compulsory registration. I want to say further that the bill is complete without Title V, as far as the packers are concerned. The sole purpose the committee had in mind was to give an opportunity to the consumers of the country to experiment with the proposition of trying to establish public markets, in the interest of getting things cheaper for the consumers.

Mr. POMERENE. Then I think I am compelled to conclude that the Senator has answered the Senator from New York, and therefore these provisions are voluntary. For that reason, in my judgment, the title will give no relief whatsoever. I beg the pardon of the Senator from South Dakota.

Mr. KENYON. I beg his pardon, too; but I am glad I have convinced the Senator from Ohio that I have answered the argument of the Senator from New York.

Mr. STERLING. But after all, Mr. President, I am inclined to think that the Senator from Iowa agrees to some extent, anyhow, with the Senator from New York. Under his own argument, of course, this bill does not in terms compel registration. It says they "may." But according to the argument of the Senator from Iowa the natural effect will be to compel those who would find it otherwise inconvenient or undesirable to register, to register. That is the object.

Mr. POMERENE. That is, I suspect, on the theory that if one fox gets its tail cut off in a trap it seeks to persuade all the other foxes to have their tails cut off.

Mr. WALSH of Montana. Mr. President, I have before me a document furnished by the Association of Allied Packers, or some such association. I presume all other Senators have received copies. In this document a statement is made to the effect that this is really a compulsory and not a voluntary provision, and the Senator has now stated what is therein stated, namely, that although it is purely voluntary, in effect it would be compulsory. Will the Senator just elaborate and tell us how it is that the packer will be obliged to come in and register under that provision?

Mr. STERLING. Because it is deemed that he will have certain privileges as a registrant, probably, in the way of informa-

tion furnished, in the way of guidance given, and so on. Other operators and stockyard men will feel that because of this governmental sanction, and the prestige it may give, they must themselves come in, although prior to that time keeping within the law, conducting the business according to every rule and every regulation made, under section 10, as stated by the Senator from Ohio, for example, or any other rule or regulation which may be made.

Mr. WALSH of Montana. The Senator has by his statement only confirmed me in the opinion that it is purely voluntary and not compulsory. As I understand him, the registrant, if he cares to come under this provision and subject himself to all the inconveniences which are herein prescribed, will have some corresponding benefits. Assume that some people come in and register. They subject themselves to all the inconveniences, and they get all the benefits. As I understand the Senator, the packer who does not want to come in, recognizing that his competitor has some benefits accruing by reason of this provision, will be obliged to come in; but it will be purely voluntary upon his part. He will weigh the inconveniences and the burdens and the annoyances, upon the one hand, against the advantages which accrue to him by virtue of registration, and it will be up to him to say whether he will register or not. So I can not understand that there will be any compulsory feature about it.

Mr. STERLING. Mr. President, I can not help but think that a voluntary system—I mean as a rule, and without reference to registration—is the proper system, and that everyone of these operators should be subjected to certain simple rules and regulations to be prescribed by the Federal Trade Commission, without any registration system whatever.

Mr. OWEN. Mr. President——

The PRESIDING OFFICER (Mr. TOWNSEND in the chair). Does the Senator from South Dakota yield to the Senator from Oklahoma?

Mr. STERLING. I yield.

Mr. OWEN. As I understand the object of title 5 it is to induce persons who are not now in the packing business to enter it and engage in competition, and in that way promote competition by offering certain advantages to those who do register, the idea being that that may serve to induce but not to compel the packers who are now in business to register in order that they may have the same advantages.

Mr. STERLING. There are certain things, Mr. President, which the commission may well do with reference to all operators without requiring any registration, and if the Senate will permit me I will call attention to those provisions of the pending bill which I propose to preserve. It seems to me they are wholesome rules governing stockyard men and should be enforced upon all equally and alike.

For example, I provide in the substitute that it will be the duty of every operator to provide and maintain or secure when necessary and practicable adequate railroad connections with its place of business the same as in the bill.

I provide, further, the same as in the bill that they shall—

furnish the services and facilities of its business on fair and reasonable terms and without unjust discrimination to persons applying for such service and facilities: *Provided*, That it shall set aside such portion of the facilities of its business as determined by the commission as may reasonably be necessary to accommodate small shippers and local patrons;

(3) To exercise such care of the live stock, live-stock products, and perishable foodstuffs handled by it as may be necessary to prevent undue loss in connection therewith;

(4) To maintain sanitary conditions in the conduct of its business;

(5) Otherwise to conduct its business in such manner as may be prescribed in rules, regulations, and orders issued under this section by the commission to carry out the purposes hereof.

(b) The commission may from time to time cause inspections to be made of the places of business and operations of operators to determine their compliance with the provisions of this section and the rules, regulations, and orders issued hereunder.

Mr. President, what is the object of this legislation? It is to protect the public against both the packers and the stockyard men, and it seems to me that is as far as we need to go, and we can do that by these provisions of the statute, and the rules and regulations we authorize to be made in pursuance of the statute. The substitute provides further that it shall be the duty of the commission, so far as the operators or stockyard men are concerned, to—

(1) Prepare standardized plans and specifications for grounds, buildings, and other facilities suitable for the business conducted or to be conducted by operators, and to furnish such plans and specifications free of charge to such operators who have given assurances of undertaking the construction and operation of such buildings and facilities—

and that whether the operator has registered or not. It is probably true that the commission itself, because of its business and the other duties it has to perform, will be familiar with the plans and specifications which will be most suitable for the purpose of stockyard operations and the protection of the public.

Mr. POMERENE. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Dakota yield to the Senator from Ohio?

Mr. STERLING. I yield.

Mr. POMERENE. Under the bill pending these standardized plans and specifications are only to be for the benefit of the registrant.

Mr. STERLING. Certainly, under the provisions of the bill.

Mr. POMERENE. If they are a good thing for the man who has registered, and if those plans are good things for the public, then it seems all packers and all stockyards should have the benefit of them.

Mr. STERLING. That is my theory exactly, I will say to the Senator from Ohio.

Another of the duties of the commission, whether the packers are registered or not, is to—

(2) Furnish to operators reports embodying existing knowledge concerning satisfactory and economical appliances and methods of food preservation by cold storage, freezing, cooking, dehydration, or otherwise, and of all improvements in the art, and to detail persons experienced in such art to consult and advise with operators.

(3) As far as practicable, when requested by any such operator, provide for the inspection by agents of the commission of the live stock, live-stock products, or perishable foodstuffs received or distributed by such operator to determine the quality, quantity, or condition thereof, and for the issuance by such agents of certificates showing the results of such inspection; and in the conduct of such inspections to cooperate with duly authorized local authorities. Such certificates shall be accepted in the courts of the United States and of the States as prima facie evidence of the quality, quantity, or condition at the time and place of inspection of the live stock, live-stock products, or perishable foodstuffs covered thereby.

Mr. SHERMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Dakota yield to the Senator from Illinois?

Mr. STERLING. Certainly.

Mr. SHERMAN. Has the Senator considered whether this is not another instance of very numerous overlappings of Government services? There is now, under the meat inspection act of 1906, an army of inspectors going about to various points in the country where meats are prepared for interstate commerce, and here again is another provision for yet another one of the numerous overlapping efforts of the Government. A plate of bacon, I may say to the Senator, has 27 governmental operations on it before he eats it now, and here is another one.

Mr. STERLING. It may be that it will involve some overlapping, and yet I can not help thinking that these are duties that should be performed by the operators, necessary to be performed by them, in order that the public may be fully protected. I think it well enough, too, that the commission may have the authority and the power to get the information provided for.

Mr. STANLEY. Mr. President, will the Senator yield?

Mr. STERLING. I yield.

Mr. STANLEY. The Senator, I understand, is discussing title 5?

Mr. STERLING. We are discussing title 5 of the bill.

Mr. STANLEY. I wish to ask the Senator this question: Title 5 provides that the finding of the commission shall be in all courts prima facie evidence of its truth. It strikes me that that provision, whether so designed or not, furnishes a club which will force other concerns to comply with the provisions governing registrants, no matter what their other reasons might be, since it would necessarily follow that any packer not having this Government guaranty of quality, no matter what might be the quality of his goods, will suffer in markets that do not understand just exactly what that guaranty means.

For instance, under the act providing for the bottling of whiskies in bond the Government simply provided that under certain conditions alcoholic liquors might be bottled in bond by the Government. It did not guarantee the purity or the quality of the whisky at all; it simply provided that they were to be bottled as made within eight years in a warehouse and to contain a certain proof of alcohol. And yet the persons who bottled their liquors in bond immediately asserted in the public press and everywhere else that the Government's blue stamp was a guaranty of the purity of the article.

If the pending bill is enacted, it does not matter what the quality of the goods may be; they may simply come barely within the technical regulations against impurities or decay or diseased condition or adulterations or anything of that sort; and yet if they come within the technical rules of the department, persons having this assurance will be authorized immediately to publish to the world that the Government has guaranteed the quality of the article, and any competitor will be at a hopeless disadvantage unless he has the same alleged guaranty, which is not a guaranty at all.

Mr. STERLING. Further, in line 3, on page 22, the proposition is to strike out provision (b) and in the same line strike out the word "registrant" and substitute "operator" therefor, and so throughout the bill, wherever the word "registrant" occurs, I have substituted the word "operator," and shall offer amendments accordingly.

On page 22 I intend to move to strike out lines 21 to 25, inclusive. I shall move that amendment for the reason that the subject matter of lines 21 to 25, inclusive, is already in the bill or else in the Federal Trade Commission act almost word for word, so far as subdivision (6) is concerned, which begins with line 21.

I shall then move to strike out all of subdivisions (3) and (4), on page 24. I doubt the advisability of retaining those provisions. Subdivision (3), on page 24, provides that it shall be the duty of the commission to—

Cooperate with registrants in procuring for them adequate services by common carriers, by rail or otherwise, including provision for special cars needed in the proper transportation of live stock, live-stock products, or perishable foodstuffs.

I do not believe it is necessary, whether the operators are registered or not, that the Federal Trade Commission or the live-stock commission should be called upon in any way to aid the stockyard men in procuring adequate services by common carriers. I think they are competent to manage the business; they are competent to ascertain what common-carrier facilities are available to them.

Subdivision (4) provides for the furnishing to registrants of—

All available information as to supplies of foodstuffs handled by such registrants and the location and movement and transportation costs of such foodstuffs.

I hardly think it is necessary to go into that in detail or give any commission a supervision of that kind. If a man is competent to manage and operate a stockyard, he ought to know something about the movement and transportation of the various kinds of foodstuffs, as well as the transportation costs of such foodstuffs.

I shall ask the Senate to strike out subdivisions (e) and (f) on pages 24 and 25 of the bill. These refer to certificates to be taken out by registrants. I shall ask to have the Senate add a new section to the bill, and I hope Senators will give their attention to the reading of the proposed new section, because it is for the purpose of adopting the procedure provided for in the Federal Trade Commission act. I am not sure that it is in apt words, but if it is not I shall be glad to have any suggestion a Senator may have to offer.

Mr. McLEAN. Mr. President——

Mr. STERLING. I yield to the Senator from Connecticut.

Mr. McLEAN. I should like to inquire if the Senator proposes to leave in section 14 of the bill?

Mr. STERLING. I do not propose to move to strike out section 14 of the bill.

Mr. McLEAN. The Senator proposes to leave with the Federal Trade Commission the power to fix charges and rates?

Mr. STERLING. We do not do that by section 14. The section as amended reads as follows, reading from the second print of the committee bill:

SEC. 14. No operator shall engage in any unfair or unjustly discriminatory practice or device in commerce, or in any deceptive practice or device to cheat or defraud in commerce, or charge, collect, receive, or demand any unreasonable charge or rate for any service in commerce performed in connection with the business of such operator.

That is the way it reads as in the amended bill, and, so far as I am concerned, that section is left in the bill.

Mr. McLEAN. The copy of the bill which I have contains another clause.

Mr. STERLING. Yes; reading as follows:

The commission may, after hearing, upon complaint or upon its own initiative, determine and fix, and by rule, regulation, or order prescribe, fair and reasonable practices, charges, and rates to be observed by operators, and fair and reasonable terms and conditions upon which the services of operators in commerce shall be rendered or performed.

Mr. McLEAN. That is left in the bill?

Mr. STERLING. That is left in; that is, I do not move to strike it out.

Mr. McLEAN. I am sorry. I regret that the Senator feels inclined to leave that provision in the bill.

Mr. STERLING. I went somewhat upon the theory that if we had the power to create a live-stock commission or give these powers to the Federal Trade Commission, following the analogy of what may be done by the Interstate Commerce Commission in fixing a reasonable rate, this being a public service, a reasonable rate might be fixed by the commission.

Mr. McLEAN. This is a public service because Congress says it is.

Mr. STERLING. I know it is somewhat a mooted question whether it is or not, or whether they are engaged in interstate commerce or not.

Mr. SHERMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Dakota yield to the Senator from Illinois?

Mr. STERLING. I yield.

Mr. SHERMAN. The language which the Senator thinks ought to be stricken out because it is a repetition is the exact language of the act creating the Federal Trade Commission. That is found on page 7 of the published act, providing that no person shall be excused from attending and testifying or from producing documentary evidence, and so forth. The whole of the paragraph is an exact repetition, so I think the Senator's motion is well taken.

Mr. STERLING. If I may read the section which I would add by way of amendment, it is as follows:

That whenever the commission shall have reason to believe that any such packer or operator is engaged in any conduct, business, or practice of the kind herein prohibited or declared unlawful, or has refused or failed to perform any duty herein prescribed, or to comply with any order, rule, or regulation made by said commission in pursuance of the provisions of this act, the commission shall proceed against such packer or operator in the manner prescribed in section 5 of the act entitled "An act to create a Federal Trade Commission, to define its powers and duties, and for other purposes," approved September 26, 1914, for its proceedings against any person, partnership, or corporation which it has reason to believe has been or is using any unfair method of competition in commerce, and all the provisions of said section 5, together with the provisions of sections 6, 7, 8, 9, 10, and 11 of said Federal Trade Commission act, are hereby made applicable to all the proceedings for the enforcement against such packers and operators of the provisions of this act, and for the purposes of such proceedings and enforcement the commission shall have all the powers and duties prescribed in sections 5, 6, 7, 8, 9, 10, and 11, as aforesaid, and all the penalties for the violation of the provisions of said act and of any orders, rules, or regulations made thereunder, are hereby made applicable to the violations of any of the provisions of this act and of any orders, rules, or regulations made thereunder.

I think that covers it. It is virtually an enactment of the provisions of the Federal Trade Commission act, so far as this proposed section is concerned. It adopts these six sections of the Trade Commission act for the purposes of the pending bill.

The proposed substitute recognizes the prohibitions contained in the original bill. What are they? I believe in those prohibitions.

First, it is provided that—

It shall be unlawful for any packer to engage in any unfair or unjustly discriminatory practice or device in commerce.

I will say, in passing, that it is my purpose to move to strike out a few of the words of the same subdivision as found in the original bill, believing them unnecessary or really repetition of the same idea contained in the words I have just read. Then it is provided:

(b) Sell or otherwise transfer to or for any other packer, or buy or otherwise receive from or for any other packer, any live stock or live-stock products for the purpose of apportioning the supply between any such packers, or unreasonably affecting the price of or creating a monopoly in the acquisition of buying, selling, or dealing in live stock or live-stock products in commerce; or—

I can not help but think that is a reasonable provision. The several packers and packing institutions ought each to be permitted to stand on their own bottoms; there is no necessity for their combining together or parceling out the purchases of live stock that they shall severally make throughout this great country. Of course, if that should unreasonably affect the price or really create "a monopoly in the acquisition of buying, selling, or dealing in live stock or live-stock products in commerce," it ought to be prohibited.

Mr. STANLEY. Mr. President——

Mr. STERLING. I yield to the Senator from Kentucky.

Mr. STANLEY. Does the Senator hold that the acts to which he now calls the attention of the Senate are not already prohibited by existing law? It strikes me that the acts prohibited by the provisions referred to are already plainly in violation of the law and that in either event recourse must be had to the courts to enforce the law.

Mr. STERLING. I am not so sure about that, I will say to the Senator from Kentucky. Indeed, I think there are provisions in the very subdivision which I have read that are, at least, not clearly covered by existing law, such as the Sherman Antitrust Act.

Mr. McLEAN. Mr. President, if that is so, would it not be wiser to amend the original act which created the Federal Trade Commission and in that act extend the powers of the Federal Trade Commission so that the commission may investigate and regulate not only this industry but all other industries, and in that way avoid the multiplication of laws?

Mr. STERLING. There is some reason in the suggestion of the Senator from Connecticut.

Mr. STANLEY. Mr. President——

The PRESIDING OFFICER (Mr. PAGE in the chair). Does the Senator from South Dakota yield to the Senator from Kentucky?

Mr. STERLING. I yield.

Mr. STANLEY. I do not wish to delay the Senator, but I will say that if it be true that the simple devices which have been mentioned, which are plainly naked provisions for limiting the output or for restricting production or for fixing prices, are not already prohibited by the Sherman Act and amendments to the Sherman Act and amendments to the transportation act, our commerce is open to the most flagrant violations of the antitrust law. If those acts can be committed under existing law, our antitrust laws are worthless, they are impotent, and we should enact amendments to the antitrust laws that will not only reach the packers but will reach every other concern which is engaged in naked combinations for the purpose of monopolizing an important business.

Mr. STERLING. The one object of the original bill, as well as of the substitute, is to confer upon a commission, whether it be a live-stock commission or the Federal Trade Commission, power itself to take cognizance of such acts and to issue the necessary orders, if it finds a violation of the provisions, to cease and desist therefrom.

Now, another subdivision or prohibition is to—

(c) Engage or participate in any manner, either directly or indirectly, in the business of purchasing, manufacturing, storing, or selling foodstuffs other than live-stock products—

When? Not absolutely and standing alone, but—

where the effect of such participation in such business may be substantially to lessen competition in or to restrain commerce or to tend to create a monopoly in commerce.

Mr. STANLEY. One other question, Mr. President.

Mr. STERLING. I yield.

Mr. STANLEY. With a full realization of the profound knowledge of the subject evidenced by the Senator from South Dakota, I should like to ask him this question as a lawyer: If it be true that the palpable, old-time, well-known devices for evading the laws against monopolies and restraints of trade are not punishable, and we make certain of these devices offenses if employed by persons engaged in the packing and transportation of meat when such harmful acts are not prohibited to merchants generally, is the Senator of the opinion that an act of that kind would stand; that we can penalize wrongful acts if committed by a particular business, leaving merchants and manufacturers generally free to employ such devices?

Mr. STERLING. The Senator from Kentucky suggests a very important and somewhat difficult question. It is not always easy to discriminate between businesses. One apparently and obviously is a public service, and in that case I think restrictions may be made that are not made in regard to what is admittedly a strictly private business. The former is charged with a public interest.

Mr. KENYON. Is not the distinction this: We are not trying to regulate business, but we are trying to regulate monopoly? That is the one object, of course—to keep the channels of commerce open and free from monopoly. If any business becomes charged with a public use and in interstate commerce is obstructing the free channels of commerce, we regulate the monopoly. It may affect business, but we are not regulating the business.

Mr. STANLEY. That is the essential vice of this proposed legislation and of all legislation akin to it.

We are attempting to regulate an illegal thing. Monopoly should not be regulated; it should be prohibited. It is morally as vicious to regulate murder or arson or larceny as it is industrially to regulate monopoly. If men attempt to interfere with the free and unobstructed movement of commerce between the States which should obey the law of supply and demand exactly as the movement of water toward the sea obeys the law of gravity, any interference is wrong and should be prohibited.

The status of business does not change and can not change by reason of a violation of the law. If a business is a private business and is legally conducted, it is a private business though it be illegally conducted. It does not become a public utility; it does not become an instrumentality of interstate commerce.

The power of the commerce clause of the Constitution can not be extended to cover a man who is engaged in an illegal business when it would not reach him if he were engaged in a legal business. If his business is interstate and he violates the law, Congress can reach him. If he is not in interstate commerce, Congress can not reach him. The fact of its being a monopoly does not make a business a public utility, nor does the fact that it is a monopoly enlarge the power of Congress over it. If it is a monopoly in a State, State laws must reach it, and if it is engaged in interstate commerce it does not have to become a monopoly. The moment it interferes unreasonably with the course of commerce it is guilty of a violation of law.

Now, take the case of the packers. If the packers are pooling their purchases they are guilty of the same crime of which the carriers were guilty in pooling their shipments, a practice which has been severely inhibited by the law. If coal dealers, as it is said they have been doing, employ a selling agency and through the selling agency attempt to fix prices, they are within the provisions of the law. I have not the time to recall the innumerable devices which have been resorted to by persons attempting to fix prices and to restrain trade; but it does not matter what the device is, for, as Justice Harlan in the tobacco case and in the Standard Oil case has made perfectly plain, the moment any restraint of trade is manifest under existing law those guilty of such restraint are subject to punishment.

If the interpretation of the law and the wording of the law is so inefficient that such acts can be committed by the packers or by anybody else, I maintain that the antitrust laws are futile and should be amended. If, on the other hand, the acts are cognizable by existing law, then there is no use of reiterating existing law in this bill, because it is necessary to go to the courts to enforce it in any event.

Mr. KENYON. Of course, it is all dependent upon the rule of reason.

Mr. STERLING. Mr. President, I hope I shall not be interrupted further, because I must recognize the right and the desire of other Senators to speak briefly, and the time will soon be here when we shall be required to proceed under the five-minute rule.

Just a word in reply to what has been suggested by the Senator from Kentucky. The object of creating a commission such as the proposed live-stock commission or the Federal Trade Commission, I assume, is that in case of wrongdoing there is an opportunity to make complaint and to institute investigation and to have a speedy hearing as to whether or not there has been a violation of the law. Then, if anybody complains, either the Government or an individual or a corporation, it is a matter for the courts to determine.

The other provisions contained in the bill, so far as they relate to the packers, are retained in the substitute. I regard them as wholesome and desirable.

I merely wish now to call attention briefly to the Federal Trade Commission as an instrumentality that ought to be charged with the enforcement of the proposed law rather than a new and expensive commission, to be called the live-stock commission. A word as to what the Federal Trade Commission has already done. It has proceeded along lines that give it the experience necessary to handle the work with which it will be charged in case the Federal Trade Commission is substituted for the live-stock commission in the pending bill. I call attention to the report of the Federal Trade Commission for this year. On page 38 is a summary of the reports that have already been made by the Federal Trade Commission as they pertain to the packing industry. First, they have issued part 1, which relates to the "Extent and growth of power of the five packers in meat and other industries." Then they have issued—

Part 2. Evidence of combination among packers.
Part 3. Methods of the five packers in controlling the meat-packing industry.
Part 4. The five larger packers in produce and grocery foods.
Part 5. Profits of the packers.
Part 6. Cost of growing beef animals; Cost of fattening cattle; Cost of marketing live stock.

It will be seen, therefore, from these reports that they have made they have already investigated subjects akin to the subjects that any live-stock commission would be required to investigate under the pending bill, and they have had the advantage of the experience already gained.

I wish to call attention, Mr. President, briefly to what they say in this report in regard to the procedure of the commission. They say:

Section 5 of the Federal Trade Commission act lays down a single principle of law. It is, "Unfair methods of competition in commerce are hereby declared unlawful." The rest of the commission's organic act is procedural, being simply a clear method of procedure laid down by the Congress.

By the terms of this bill, Mr. President, there is perhaps more than one single principle of law laid down; there are five different prohibitions, and it will be the business of the Federal Trade Commission to investigate and see whether any of those prohibitions have been violated or not. They further say:

In administering this law the Federal Trade Commission follows scrupulously a procedure carefully laid down by the Congress. When anyone believes that unfair practices are being used to his injury and he addresses the Federal Trade Commission with a brief statement of the facts as he understands them, the commission makes a preliminary

investigation, and if, in the end, it has reason to believe that it is to the interest of the public that the matter be formally inquired into, then it issues its complaint in writing, directed to the concern against whom the citation has been made. This issuance of the complaint is no judgment of condemnation, but a resolution for an orderly trial of the matter.

They would follow exactly the same course of procedure in the case of a complaint made against the packers or any of them.

Mr. President, no complaint is made in this report of theirs anywhere, so far as I have been able to find, that the procedure authorized by the Federal Trade Commission act is not sufficient, is not comprehensive enough, to reach all cases of violation of the law.

It has been suggested—and I heard that suggestion made the other day—that this commission, because of the location of the principal packers, the five great packers, ought to be located in Chicago. The Federal Trade Commission has, I think, under the law, its principal office here in the District of Columbia; but it has offices elsewhere, and I call attention to what is said in regard to that:

The commission has three branch offices, established in June, 1918, for the purpose of saving time and expense in travel, and also to afford business men a better opportunity of presenting the matters they wish considered. Convenient and well-equipped quarters are maintained at No. 20 West Thirty-eighth Street, New York City; No. 14 West Washington Street, Chicago; and at room 65, Appraisers' Stores Building, San Francisco. These branches have accomplished the objects in view, besides providing convenient hearing rooms and quarters for the commission's work in the cities named and their vicinities.

And so here, Mr. President, you have under my proposed substitute a commission of five, instead of a commission of three, to investigate the subject matter involved in this bill—a commission of five, with offices already established at Chicago, and conveniently equipped.

It has been suggested in this same connection that the commission ought to be there, as though the commissioners individually would themselves inspect these various industries. I think nothing can be farther from the real facts as they will develop if this bill is passed than that the commissioners will personally and individually make these inspections. They will be made by experts, by inspectors especially qualified for that purpose. They will be made, so far as books and documentary evidence are concerned, by certified accountants.

In that connection, I might call attention to the report or letter from the Federal Trade Commission in response to Senate resolution of September 3, 1919, submitting a report of the results of a special investigation of the reasonableness of the maximum-profit limitations fixed on the meat-packing industry by the Food Administration. Here are three different subjects, at least, covered in this report. Did the members of the Federal Trade Commission, singly or collectively, make the investigation? No; but the exhibits are signed, each and every one of them, by those persons specially designated by the commission for the purpose of making those investigations.

As I said the other day, of course the commission will declare its policies; it will establish its rules and regulations, in pursuance of the laws we enact; and thereafter, for all inspection work and expert work, the proper persons will be employed.

Mr. President, as I think of this subject, I can conceive of no earthly reason for the establishment of a new and expensive commission. It is so easy to show that the Federal Trade Commission has had altogether, up to date, the necessary experience to carry on this work. If it be objected that the Federal Trade Commission has made some reports that are not sustained by the facts, let it be the answer to that, in part at least, that when charged with this responsibility relative to the packing industry they will hesitate before they make a report that they can not conclusively show is sustained by the facts; for they will know that any inquiry into the business of the packers, or any of them, any order made against them to cease and desist from any practices prohibited by this bill will be subject to review by the courts, and hence, under that feeling of responsibility, I think we may feel assured that their decisions will be well guarded and will not be decisions that will deprive any person or any corporation of any fundamental right.

I sincerely hope that Senators will seriously consider the substitute, or the amendments, as I come to offer them, that will take the place of the substitute which I have prepared.

Mr. GRONNA. Mr. President, I can not in the brief time remaining for general debate upon this bill present in an intelligent way the history of this legislation. Under the unanimous-consent agreement general debate closes at 2 o'clock, and I can, therefore, occupy only a very brief period of time; but I can remember, when I was a Member of the other body, that the same fight and the same complaints were made by the same people and the same interests when the meat-inspection bill was proposed. That legislation was pending in the House of Representatives and in this body for years; and it was contended then and argued then, as it is now, that it was not only going to hamper but destroy the great packing industry.

Mr. President, no one who is at all familiar with the packing industry will deny that the meat-inspection law was a benefit, not only to the public but to those engaged in the great meat industry. We appropriate every year more than $3,000,000 for the inspection of animals at the different markets throughout the United States, and what has been the result of that work, done by officials of the Government of the United States?

The result has been that the stamp of the Government has become a certificate showing absolutely that the articles of food inspected are such as may enter into interstate commerce, and may be shipped to foreign countries, and they are given preference in competition with the same articles of food exported to foreign countries without this certificate. So that instead of hampering the business of the packers it has aided the business of the packers; and I do not think the packers will deny that the industry has been benefited; that their business has increased; and that the profits of the packers have increased.

Mr. President, all that is proposed in this bill is that a Government agency shall be established to assist, in this great business, in the supervision and in the inspection of this necessary article of food. This is not a new question. It has been before Congress ever since I came here, and the people will never be satisfied until some remedial legislation is passed; and we can not ignore the petitions of the thousands of people who every day are writing us with reference to this important legislation.

I desire to call attention to the fact that only in the last two or three days I have received many hundreds of letters and a great number of telegrams from people throughout the Nation. This correspondence comes from people who seem to understand what this legislation means. They are not asking for the passage of this bill simply because it is a measure to control the five great packers. They seem to understand that there is a necessity for legislation which will, to some extent, permit Federal officers to supervise and to help regulate this business. Many of these letters come from college professors and from attorneys. Many of them come from business men and professional men as well as from farmers. I doubt if there is a State in the Union from which I have not received either telegrams or letters favoring this legislation and specifically favoring the committee bill as reported to this body. I have no pride of opinion on this particular bill because it bears my name or because it was reported to the Senate by me as chairman of the Committee on Agriculture and Forestry, and I am not contending that there are not some good provisions in the substitute offered by the Senator from South Dakota [Mr. STERLING], but that substitute was printed and was on the desks of Senators only on Saturday. I had not, on Saturday, had an opportunity to make a comparison; and I want to acknowledge now that I was mistaken in stating that the substitute bill offered by the Senator from South Dakota does not provide for a uniform system of accounting. During the limited time available I have tried to compare the two bills. There is considerable difference between the provisions of the substitute offered by the Senator from South Dakota and the provisions of the committee bill.

Mr. POMERENE. Mr. President, before the Senator goes into that, will he object if I ask him a question?

Mr. GRONNA. Not at all.

Mr. POMERENE. A moment ago the Senator referred to the provision for a uniform system of accounting. I am in sympathy with that provision; but I have heard the objection made that it is impossible to have a uniform system of accounting, and so forth. I wondered if there was any evidence on that subject before the committee, and, if so, does the Senator see any objection to that provision in the bill?

Mr. GRONNA. I will say to the Senator very frankly that I think it is absolutely necessary to have a uniform system of accounting, and I will state further that no evidence was presented to the committee that would warrant the statement that it is impossible to have a uniform system of accounting. If I had the time, I would like to read from the testimony of Mr. Armour himself, a man who has grown up in the business, and one of the largest operators in the packing industry.

Even Mr. Armour, familiar as he undoubtedly is with the affairs of this business, seemed to be unable to tell the committee all the transactions, and not even the profits of his establishments. I am sure that it can not work to the detriment of the operators, but it will be a benefit, and, of course, it will lessen the work of the Federal officers who make the inspections or the investigations.

Mr. STANLEY. Mr. President——

The VICE PRESIDENT. Does the Senator yield to the Senator from Kentucky?

Mr. GRONNA. In just a moment. I was one of those who favored turning over this tremendous task to the Federal Trade Commission, but I became convinced that it would be absolutely impossible for the Federal Trade Commission, or any similar commission having the amount of work to do that it has, to perform the duties which will be incumbent upon this commission. I am sure that this Federal live-stock commission will require all the time of three or five men to perform the work and they will not be able to do it alone. This commission will need the cooperation of the Federal Trade Commission.

Now, I yield to the Senator from Kentucky.

Mr. STANLEY. The powers exercised by the Federal Government over the packers in the way of meat inspection are predicated upon the idea that the meat will go into the channels of interstate commerce. The bookkeeping does not go into the channels of interstate commerce.

Mr. GRONNA. Neither does the bookkeeping, with regard to the marking and the checking up of the parts of animals which are inspected by the officers of the Federal Government go into the channels of interstate commerce.

Mr. POMERENE. Mr. President, if the Senator from North Dakota will yield, the Interstate Commerce Commission requires, under authority conferred upon it by Congress, a uniform system of bookkeeping with respect to transportation over railroads, and if we are to adopt a system of regulation for these stockyards and packing houses, I do not understand why it should not be applicable to them.

Mr. GRONNA. I agree with the Senator.

Mr. POMERENE. It is certainly an incident to the business.

Mr. STANLEY. Exactly. I do not wish to take up too much time, because it is limited; but, as I said on Saturday, if we move upon the assumption that the packers shall continue to control the stockyards they are controlling an instrumentality of interstate commerce, in all probability terminal facilities, and, having taken jurisdiction of this branch of the business, it may well extend to all other branches. But, assuming that they have surrendered control of these terminal facilities and are not in the movement of commodities at all, they are not carriers to any extent. They are simply packing, curing, and selling meats within a State. They are utilizing these instrumentalities, but they are not operating them. In that event, I very much doubt whether Congress can prescribe a method to the butcher by which he shall ascertain his profits and regulate his business, any more than it could with respect to a man who was mining coal and shipping it.

If it can do that, then Congress can take possession of the bookkeeping of every merchant who ships a yard of cloth across a State line.

Mr. GRONNA. Mr. President, I have not the time to meet the argument of the able Senator from Kentucky with reference to the constitutionality of this bill, nor do I assume that I could do so if I had the time; but if the Senator will refer to a chart prepared by the Federal Trade Commission and included in the summary of their report he will become convinced, as I have, that these men are not butchers simply doing a local butchering business. In this chart we find that Wilson, Armour, Swift, Morris, and Cudahy are doing a large share of the business, not as a local institution, not business which is intrastate, but business which is interstate; and when we look at this chart and see how the interests of these five packers are intermingled with service companies, with land-development companies, with stockyard companies, with cattle-loan companies, with rendering companies, with cotton-oil companies, with publications, with terminal railroads and facilities at stockyards, with banks; how they are engaged and interested in the business of manufacture of packers' machinery and supplies, in cold storage and warehousing, and in railroads, we must be convinced, as I am convinced, that the bulk of the business transacted by these five big packers is a business in interstate commerce, and that the Congress of the United States not only has the right but it is the duty of the Congress of the United States to regulate them.

Mr. President, I have listened to the speeches of able Senators for some days, discussing the rights of the men engaged in the packing industry; one would think that these five big packers have been very drastically dealt with, and that they need the sympathy of the country. If Senators will refer to the testimony before the Committees on Agriculture in the House and in the Senate, and take the statements of Mr. Armour, Mr. Swift, and the other packers they will soon be convinced that the packers have made a most wonderful progress and have been allowed to make enormous profits.

The business of Swift commenced not so very long ago with a small capital, some $60,000, I believe. It has grown, and I am glad that it has, ever since that company was organized; and every year since the incorporation of Swift & Co. large dividends have been paid to the stockholders. The capitalization of this corporation now is $150,000,000. I say every year they have made large profits, and even during the war the profits of these packers were enormously large.

In 1917 Swift & Co. made more than $44,000,000 profit. This corporation made a net profit, after all expenses, including taxes, had been deduced, of more than $34,000,000, and in 1918 they made $21,000,000 net, so that I can not see any good reason why these people should complain if the Federal Government again undertakes to assist them in this great business, because we have the absolute proof that instead of restricting any of the packers from making large profits these five concerns during the war were permitted to make most liberal and exceedingly large profits.

I say without hesitation that if we are to let these packers go on without some supervision and regulation, that the five packers will be more powerful, and I believe that to-day they are stronger and more powerful than the Government itself.

The Senator from Kentucky [Mr. STANLEY] argued the constitutionality of this bill on Saturday. I call his attention to a statement made by the present Attorney General, Mr. Palmer, which will be found beginning on page 47 of the hearings entitled "Stimulation of live-stock products." I want the attention of the Senator from Kentucky while I read just a small portion of a statement made by Mr. Palmer, the Attorney General. It has been stated that these corporations are not engaged in the retail business. The Attorney General states that they have engaged in the retail business.

Mr. STANLEY. Mr. President, the Senator from Kentucky made no statement as to their being engaged in the retail business. I did not discuss that phase of it.

Mr. GRONNA. No; not as to their being engaged in the retail business. I realize that. But the statement has been made by other Senators.

Mr. STANLEY. It has been made. I discussed the legal phase of the question, not the conduct of the business.

Mr. GRONNA. I understand that. I want to read a portion of the testimony of the Attorney General:

> The CHAIRMAN. Of course, they have never been accused of being in the retail business, as far as I know.
>
> The ATTORNEY GENERAL. Yes; they have. They have been accused of engaging in it, and they have been accused of having designs upon it. There is a great deal of evidence of the unfair manner in which they had used that competition, and the tendency to destroy competition as a result of it.

The Senator from Kentucky referred to the fact that if these packers should violate the provisions of this bill they would also violate the provisions of the Sherman antitrust law. Mr. President, there is no doubt that they have violated the provisions of the Sherman antitrust law, and the Attorney General admits it.

Mr. STANLEY. Mr. President, the Senator from Kentucky did not state that they had not violated the provisions of the antitrust law. He stated that if they were guilty of any of the offenses charged, they had violated it.

Mr. GRONNA. The Senator from Kentucky knows better than I the difficulty of getting at these violators of the law. As a layman, I certainly do not wish to criticize the court, but under the liberal construction placed upon the Sherman antitrust law by the Supreme Court, applying the rule of reason, it is exceedingly difficult to convict those who are guilty of such violation and to penalize them, as is set forth here in the statement of the Attorney General, and I ask to have printed in connection with my remarks the statement of the Attorney General bearing upon this question:

> The CHAIRMAN. Of course, they have never been accused of being in the retail business, as far as I know.
>
> The ATTORNEY GENERAL. Yes; they have. They have been accused of engaging in it and they have been accused of having designs upon it. There is a great deal of evidence of the unfair manner in which they had used that competition, and the tendency to destroy competition as a result of it.
>
> Senator HARRISON. Can they rent space in their refrigerator cars to wholesale merchants for distribution?
>
> The ATTORNEY GENERAL. They can not. They can not use their distributing system or permit anybody else to use it in any form whatever for the purpose of distributing any of these side lines, and, Senator, neither can they devise any other scheme or arrangement which has the same purpose or effect.
>
> The CHAIRMAN. Having prohibited these corporations from doing these unfair and related practices, what is the necessity for, or what would you recommend as further legislation with respect to this matter?
>
> The ATTORNEY GENERAL. I do not recommend any further legislation.
>
> Senator KENYON. It was not intended that this should have anything to do with legislation or stop legislation?
>
> The ATTORNEY GENERAL. No; I have made no agreement with them about legislation. I would not deliver the Congress to anybody.

UMI

Senator SMITH of Georgia. You have gotten a decree for what the present law authorizes the Government to obtain in protection of public rights?

The ATTORNEY GENERAL. That is right, Senator.

Senator SMITH of Georgia. And you have gained your lawsuit for everything that the Sherman antitrust law authorized you to gain it.

The ATTORNEY GENERAL. I was attending strictly to my own business. I think you have stated it correctly when you say I have "won this case." I have gotten a judgment which, to my mind, is all that the Government can hope to get, and I have left the case in such shape that if anything has been overlooked we have got a splendid remedy in this particular court.

I have made no agreement with these gentlemen of any kind or character with respect to legislation, of course. I would not think of doing such a thing. But I have made no suggestion as to what my position would even be with respect to legislation, and I have made no agreement or arrangement or suggestion with anybody as to what the future course of the Government is going to be with respect to litigation. I could go into court to-morrow against these people if I desired to do so.

Senator MCNARY. Gen. Palmer, I think you have brought great good to the American people by the decree. You have given the matter very great study. At this time can you say to the committee, as giving your best opinion, that any further legislation upon the statute would bring greater and better relief to the American public and the American consumer?

The ATTORNEY GENERAL. Senator, I hesitate to make any recommendation of that sort. My personal view is that I would like to see this tried out. I believe this is a great, long step forward. I believe we have gotten things that we have been fighting for for years, apparently without hope of getting. I think it will do great good. I do not promise it is going to mean immediate lowering of prices. There is great strength in the argument of an efficient, big concern, resulting in lower prices to the consumer, but it is the argument of the efficiency of autocracy. At any rate, what we have done, if we destroyed that efficiency, which might result in lower prices, we have destroyed autocracy and returned to the freedom of our democratic kind of government for business. We have made it possible for men of all kinds, in all classes to get into these businesses, and if that does not result in benefit to the American people, then our whole theory of competition is wrong.

Senator NORRIS. In your examination of the evidence that was submitted to you by the Federal Trade Commission and other evidence which you examined, did you reach the conclusion, as a lawyer, that the packers or any of them had violated the criminal statute or were criminally liable?

The ATTORNEY GENERAL. I think they had violated the Sherman antitrust law; that is both a criminal and a civil statute, Senator.

Senator NORRIS. Under your settlement, while you have made no agreement, of course, you do not expect to proceed against them criminally for that violation, do you?

The ATTORNEY GENERAL. This is the first time I have ever announced it, but I do not expect to proceed against them criminally.

Senator NORRIS. So that in this agreed decree there is, as far as the Department of Justice is concerned, at least a tendency to forgive any criminal offense they may have committed?

The ATTORNEY GENLRAL. Oh, no; we forgive nothing in the Department of Justice.

Senator NORRIS. If you do not prosecute them it has that effect, does it not?

Senator SMITH of Georgia. But the grand juries of the country have the right to prosecute and institute prosecutions?

Senator NORRIS. Yes; but they do not do it unless there is a prosecuting attorney somewhere to bring it out.

The ATTORNEY GENERAL. I say very frankly—I do not want you to mistake my conclusions—I have never said a word about criminal prosecution, but having forced them into the position where they have agreed to go as far as that in meeting the Government's position, I would think I was doing a very improper thing to attempt to convict the individuals in a criminal court, and I would be moved to that consideration a good deal by the practical difficulties in the way of getting convictions.

Mr. STANLEY. Mr. President, will the Senator yield for a question?

Mr. GRONNA. My time is about up.

Mr. STANLEY. I simply want to say that you are bound to appeal to the courts to enforce the act anyway.

Mr. GRONNA. That is true, but this bill makes it clear what the packers are permitted to do and also what becomes illegal, or what they are prohibited from doing.

Mr. President, my time is about up, and I ask permission to incorporate in my remarks a letter from Florence Kelley, general secretary of the National Consumers' League, and also portions of a pamphlet entitled "The Food Problem and Federal Legislation," by Mrs. Edward P. Costigan. Mrs. Costigan is a member of the National Consumers' League.

JANUARY 20, 1921.

Hon. ASLE J. GRONNA,
Senate Office Building, Washington, D. C.

MY DEAR SENATOR GRONNA: The monopolistic control, or even the possibility of such control, of the food supply of 105,000,000 people by private business enterprise is intolerable. The National Consumers' League, with full knowleige of the facts, adopted as part of its 10-year program a proposal for the Federal regulation of the meat-packing industry.

In the name of its thousands of members, its 59 affiliated leagues in 17 States and the District of Columbia, for whom it speaks directly, and the consumer, we most respectfully urge you to vote next Monday, January 24, or whenever the bill comes to a vote, for the Gronna bill.

No more important public issue than the Federal protection of the people's interest in food and meats can be imagined.

Sincerely, yours,

FLORENCE KELLEY,
General Secretary National Consumers' League.

THE FOOD PROBLEM AND FEDERAL LEGISLATION—UNDERNOURISHMENT, SPECULATION, MONOPOLY, AND THE HIGH COST OF LIVING.

In our country to-day, the National Children's Bureau tells us, from 3,000,000 to 6,000,000 children are underfed. One child in every five in the United States is not getting enough to eat. The situation has become desperate. We have seen swollen profits on the one hand and empty plates on the other. The query has been increasingly insistent, Why have prices continued so high? The answer has been coming back in no uncertain terms, because, in addition to the consequences of world underproduction and inflated currency, speculators, monopolists, hoarders, and profiteers are gambling with the food supply of the Nation and the world.

Political economists frequently assure us that people are protected by the law of supply and demand; that with ample supplies public demand can either raise or lower prices at will by using or withholding its purchasing power. We are learning, however, that a new era is upon us. For the time being an economic absurdity rules the world. Reckless men are even killing the goose that lays the golden eggs. Monopoly is throttling competition and dictating the price list. The consumer is being consumed.

Farmers also are in distress. Undoubtedly only a small portion of the price paid by the consumer accrues to the producer, whose incessant toil is given inadequate reward because the way between the producer and consumer is artificially blocked. Decreased production is bound to be the inevitable result.

FEDERAL INVESTIGATIONS AND REPORTS.

In 1917 the President of the United States instructed the Federal Trade Commission to "investigate and report facts relating to the production, ownership, manufacture, storage, and distribution of foodstuffs," and "to ascertain the facts bearing on alleged violations of the antitrust acts, and particularly upon the question whether there are manipulations, controls, trusts, combinations, conspiracies, or restraints of trade out of harmony with the law or the public interest."

An exhaustive and intensive investigation resulted, and the facts brought out were surprising in the extreme.

FOOD CONTROL BY "THE FIVE PACKERS."

The report of the commission states that five corporations—Armour & Co., Swift & Co., Morris & Co., Wilson & Co., and the Cudahy Packing Co., known as "the packers"—not only have a monopolistic control over the American meat industry but have secured control similar in purpose, if not yet in extent, over the principal substitutes for meat, such as eggs, cheese, and vegetable-oil products, and are rapidly extending their power to cover fish and nearly every kind of foodstuff. According to the Federal Trade Commission, the "Big Five," in addition to meat, "sold in 1916, through their branch houses alone, nearly 100,000,000 pounds of poultry, 90,000,000 pounds of butter, 75,000,000 pounds of cheese, and over 135,000,000 dozen eggs." The packers are also important factors in breakfast foods, condensed milk, and canned fruits and vegetables. The canned goods business is now about $16,000,000 a year. Recently they have extended their operations to include various staple groceries and vegetables, such as rice, potatoes, beans, and coffee. The Trade Commission reports: "Here, again, the immense selling organization of the packers, built up in connection with their meat business, assures them almost certain supremacy in any line of food handling which they may wish to enter. Armour's drive into the rice market in a single year is perhaps the most striking instance of the potentialities in this direction. Early in 1917 Armour & Co. first undertook the handling of rice, and in that one year sold more than 16,000,000 pounds of rice, thus becoming at a single move, on the statement of the vice president of the company, 'the greatest rice merchant in the world.'"

During this period the wholesale price of rice increased 65 per cent. At the present rate it is estimated that the wholesale grocer business will disappear in five or six years. Incidentally, the commission mentions monopolistic dominance in sales of leather and wool, necessary for the production of shoes and clothes, resulting in unprecedented profits to the packers. The "Big Five" handle more than three-fourths of the hides, and tan a large part of the leather in the United States. They deal in hundreds of commodities unrelated to the meat-packing industry.

The commission states: "In 1917, the 'Big Five's' combined sales of meats and all other commodities totaled $2,127,245,000; in 1918, they were over $3,000,000,000." The report adds: "At the present rate of expansion, within a few years the big packers would control the wholesale distribution of the Nation's food supply."

SOURCES OF CONTROL.

The Federal Trade Commission further charges that these conditions were originally made possible through combinations, rebates, and special privileges of the packers. It is stated that they have resulted from the ownership of:

"Stockyards, with their collateral institutions, such as terminal roads, cattle loan banks, and market papers."—The packers own a controlling interest in nearly every chief stockyard company in the United States.

"Private refrigerator car lines for the transportation of all kinds of perishable foods."—Ninety-three per cent of meat refrigerator cars and 50 per cent of the other refrigerator cars are owned by the same group.

"Cold storage plants for the preservation of perishable foods."

"Branch-house system of wholesale distribution."—The packers operate over 1,000 branch houses and about 1,300 peddler car routes.

"Banks and real estate."—The packers are interested in scores of the larger banks in 15 cities from Boston to San Francisco.

The Federal Trade Commission's report recites that the result of this control has been forcing down the prices paid to producers at one end and a rise in cost to consumers at the other. The packers can manipulate markets and dispose of their products without regard to supply and demand.

We learn that in 1917, a war year of patriotism, sacrifice, and suffering, though the sales of the packers had barely doubled, their profits were four times as great as in an average year prior to the war.

CONCLUSION DRAWN BY FEDERAL INVESTIGATORS.

One conclusion reached by the Federal Trade Commission has been widely approved. It is generally agreed that the control by a few private individuals of the food supply of 100,000,000 people is a power altogether too great to be allowed to continue without governmental regulation and supervision.

SUGGESTED FEDERAL LEGISLATION.

Many interested and important organizations have joined in urging corrective legislation affecting the meat-packing industry. Among them may be mentioned:

The American Live Stock Association, whose activities inaugurated the Federal Trade Commission's investigation; the National Grange; the Farmers' National Council; the National Board of Farm Organizations; the American Federation of Labor; the Wholesale Grocers' Association; the National Consumers' League; the Women's Trade Union League; and the National League of Women Voters.

As a result of many conferences and much discussion, two bills were introduced in the Senate—the Kendrick bill and the Kenyon bill, the latter being also introduced in the House of Representatives by Representative ANDERSON. The Kenyon-Anderson bill provided for a licensing system under the Department of Agriculture, designed to accomplish the following results:

"1. To remove the stockyards from the control of packers.

"2. To limit the packers' control over other industries producing unrelated food products.

LOCAL FOOD CENTERS AND WAREHOUSES.

Of great interest to the consumers is the provision in the Gronna bill for Federal authorization and encouragement of local efforts to establish food warehouses and retail distributing centers. This would assure small producers, municipal groups, and cooperatives better opportunities to do business than now exist under the packers' control, and would materially aid in the elimination of unnecessary middlemen.

Mr. GRONNA. Mr. President, much has been said with reference to the damage done to these corporations in foreign countries by the Federal Trade Commission. I have here a newspaper article which I clipped from this morning's Washington Post, entitled "Say New Zealand Barred Armours."

Mr. President, if I can read the English language correctly, this article does not say that they were barred from shipping meat into that country, but they were denied the right to export meat products from New Zealand.

So far as the farmers are concerned, they might well take exception to the methods of doing business by the packers. The packers claim to be the friends of the farmers, but if anyone will take the time to make the investigation it will be found that the packers are not as much concerned about the welfare of the farmer as they claim to be. If you will make the investigation, you will find that to-day the warehouses of the packers are filled with frozen mutton and frozen lamb imported from Australia, from Argentina, and other foreign countries. If the packers have the welfare of the American farmers at heart, as they claim, why do they not buy in the United States? We all know that they can take an American dollar and go to foreign countries and buy much more cheaply on account of the difference in exchange. We know what the reasons are. It is not for the purpose of benefiting the American farmer, and that has been the burden of the testimony of the five great packers all through the hearings, that this bill will injure the stock raiser and the farmer generally. Yet to-day there is no market for American mutton or for American lambs simply because these packers, the great friends of the farmer, have gone to foreign lands and shipped in large quantities, great cargoes, and filled the cold-storage warehouses of the country with frozen mutton and frozen lamb.

What more do they ask? They ask that these products be exempt from the provisions of the cold-storage bill—this bill is still in conference, and it has been in conference since the last session of Congress—they ask that we do not include frozen meats. They do not want frozen meats to be included in the cold-storage bill because meats are imported into this country by the packers in a frozen condition. The packers have discriminated against the American cattle grower; they have fleeced the American cattle grower and the American farmer, and now they want to continue their profiteering and fleece the consuming public on mutton and lamb, on the sale of a product which they have bought in foreign countries with American money worth 100 cents, commanding a large premium in exchange for foreign money. So much for the interest of the packers in the American producer.

I have here a pamphlet dated December 15, 1920, issued by the Irving National Bank, showing that the pound sterling was worth in November $3.46. The high point was $3.53, low $3.44½, and on December 14 $3.46½. That makes quite a difference and gives an advantage to the packers. They take a dollar worth 100 cents and go to these foreign countries and buy with money which is at a premium all the way from 25 to 30 per cent. It makes the product that much cheaper to the packers.

I ask unanimous consent to have printed in connection with my remarks certain statements made by Mr. Armour and Mr. Swift affecting prices and profits, and also a statement of Mr. Chase, a certified public accountant.

The VICE PRESIDENT. Without objection permission is granted.

Mr. GRONNA. I hope that the friends of the measure will take into consideration the fact that for several years this question has been debated; that the Committee on Agriculture and Forestry, having the assistance of the Senator from Iowa [Mr. KENYON] and other good lawyers, has for months been working on the committee bill. At no time, I will say, have the members of the committee tried to be unfair with those who are engaged in the packing industry. We have at all times tried to be fair with them. I could cite instances if I had the time——

The VICE PRESIDENT (at 2 o'clock and 5 minutes p. m.). The time of the Senator from North Dakota has expired.

The matter referred to is as follows:

EXHIBIT No. I.

STATEMENT OF MR. ARMOUR.

Senator NORRIS. It would not include the profit you make in perfumery, either?

Mr. ARMOUR. I think not. Before we were in the tanning business we had to sell our hides to the United States Leather Co., or to anybody else. It cuts off there.

Senator NORRS. I understand that.

Mr. ARMOUR. I did not try to mislead you, Mr. Heney.

The CHAIRMAN. This dollar is on the 55 per cent of the animal that dresses out into meat, is it?

Mr. ARMOUR. Yes, sir. But all our profits—our total business—whether it is made out of perfumery or potash or anything we do, is included in those figures. There is nothing not included. Our leather business is included in those figures.

Senator NORRIS. I understand.

Mr. HENEY. In those figures of fifteen millions profits you have written off something for income tax and excess-profit taxes?

Mr. ARMOUR. Yes, sir.

Mr. HENEY. How much does that amount to?

Mr. ARMOUR. $6,300,000 or $6,800,000.

Mr. MEYER. I will give you the exact figures. It is right on the statement. [Referring to statement.] The total amount for income and excess-profit taxes is $6,800,000.

Mr. HENEY. It does not include anything from Armour's interest in South America?

Mr. ARMOUR. No, sir.

Mr. HENEY. Were they included in the 1917 profits?

Mr. ARMOUR. No, sir. They are a separate company.

Mr. MEYER. They do not do any business in the United States.

Mr. HENEY. But Armour & Co. owns the stock?

Mr. ARMOUR. Yes.

Mr. HENEY. And gets dividends on it?

Mr. ARMOUR. No, sir.

Mr. HENEY. How does that happen?

Mr. ARMOUR. We do not get any dividends from South America, because, in the first place, we are spending more money in South America than we are making, and we have been in the last five years. That is the reason that probably Armour & Co. are big, because we spend more money than we make.

Mr. HENEY. You mean you are spending the money you make, do you not, to make it accurate?

Mr. ARMOUR. And more, too. You are speaking about South America?

Mr. HENEY. Yes.

Mr. ARMOUR. And more, too. I hope it will not always be so, but we have been.

Mr. HENEY. You have been enlarging your plant down there; almost doubling the capacity in Argentina?

Mr. ARMOUR. Yes. But you asked me if Armour & Co. had gotten any dividends from South America.

Mr. HENEY. Yes.

Mr. ARMOUR. We have not.

Senator NORRIS. Is the business in South America run at a loss?

Mr. ARMOUR. No; at a profit.

Senator NORRIS. But you invest the profit in South America?

Mr. ARMOUR. Yes.

Senator NORRIS. Instead of declaring dividends?

Mr. ARMOUR. Yes, sir.

Senator NORRIS. Armour & Co. here as a corporation owns that stock in South America?

Mr. ARMOUR. Yes, sir.

Senator NORRIS. Then, Mr. Armour, how can you explain the fact that you did not account for it?

Mr. ARMOUR. Because it is a separate company.

Senator NORRIS. Exactly. But if you own the stock why should not that be a part of the income of Armour & Co., and if you make any investments——

Mr. ARMOUR (interrupting). I think because we have not brought the money over here. I think the minute we brought the money over here we would have to pay on it. But I think there is a ruling on that, Senator.

Senator NORRIS. So you do not have to do that?

Mr. MEYER. It is only when it is declared as a dividend.

Mr. ARMOUR. We have not taken any money from South America into this company at all. In fact, we could not if we wanted to, because we are spending more money in South America, and have been.

Senator NORRIS. You are building up plants there?

Mr. ARMOUR. Yes. I hope some day that will discontinue.

Senator NORRIS. I rather got the impression from your first statement that you were running your business there at a loss.

Mr. ARMOUR. No, sir. At least, we have not the last two years.

Mr. HENEY. I understood; but probably because I knew a little more about it. In Uruguay recently—and I am speaking from something I read in the newspapers, so if I am wrong correct me—your South American company enters into some contract with Uruguay under which you were to erect a cold-storage plant at the line of Brazil?

Mr. ARMOUR. At Montevideo.

Mr. HENEY. You have put $750,000 into that plant?

Mr. ARMOUR. Yes.

Mr. HENEY. What are the terms under which you erected that plant?

Mr. ARMOUR. I do not know. I think we are to erect that plant with the idea of having so much beef pass through. We do not kill any cattle at Montevideo. The beef that goes through the Montevideo plant will be killed at a place called Santa Anna. That is in Brazil, away from the railroad. We will kill the cattle at Santa Anna, ship them down to Montevideo, which is on the water front, and the boat will come along and take them over to where they are going, and this plant we built at Montevideo is a cold-storage plant; simply a receptacle to take the beef and keep it until it is ready to be shipped on the boat.

Mr. HENEY. Under your contract with the Uruguayan Government you agreed, did you not, that anybody else could use the cold-storage plant as you do for storing meat, by payment, just as if it was a public utility, and at the end of 10 years, unless renewed, the Government is to take it over at a certain price?

Mr. ARMOUR. Yes; I think that is true. But I think there is a reason for that being true. They are giving us a building down there. All we are doing is to put some insulation in it. They are giving us a building that is already erected.

Mr. HENEY. At the end of 20 years they take the insulation and everything else without paying you anything?

Mr. ARMOUR. I do not know what the terms of the contract are. As a matter of fact, I think that does probably include that they can use outside storage by paying us what it is worth.

Mr. HENEY. Have they a building there that is sufficiently large for that purpose?

Mr. ARMOUR. Oh, yes.

Mr. HENEY. So that all you have to do is to put in the cold-storage insulation?

Mr. ARMOUR. I have not seen it. But that is the report we get from our people.

Mr. HENEY. In the interior of the building there must be considerable to do.

Mr. ARMOUR. We have to put in floors and ice machines. You know, $700,000 nowadays does not go very far when you have to buy machinery and pipes and different things at the present market.

Mr. HENEY. I noticed that, signing checks for breakfast.

Mr. MEYER. I hope they are not as big as that.

Senator NORRIS. I find that out when I eat bacon.

Mr. HENEY. I refer to that because it appears to me to be an interesting sidelight on what is being done there.

Mr. ARMOUR. That is hardly a criterion of anything analogous to what you might want to do in this country. I presume that is what you are getting at.

Mr. HENEY. Certainly, that is what I had in mind.

Mr. ARMOUR. But it is not a criterion at all. In that country over there it is not possible—no, I will not say possible—it is not probable that we will be called upon to give anybody space. In the first place, you have to go up in the country and spend a lot of money, as we have had to spend at Santa Anna, which is away from the seashore, and ship down, and up in that country people are not doing the sort of business we have gone into. All they have done up there is to kill cattle and do what they call the jerked-beef business.

Mr. HENEY. Are they not slaughtering the cattle right there in the town?

Mr. ARMOUR. Where?

Mr. HENEY. Where your plant is to be?

Mr. ARMOUR. Yes; but this place is on the dock. This would not be of any use for anybody in the town. I mean they could take beef there. Theoretically that is all very fine, but practically it does not amount to anything. Do you know what I mean? That may be all in there, but practically it does not amount to anything—probably will not be used.

Mr. HENEY. About how far are you away from there with your plant?

Mr. ARMOUR. Santa Anna?

Mr. HENEY. Yes.

Mr. ARMOUR. I guess 250 or 300 miles.

Mr. HENEY. There is no railroad, you say?

Mr. ARMOUR. Oh, yes; there is a railroad. This railroad comes down to Montevideo, and that is the seaport.

Senator NORRIS. I would like to ask Mr. Armour a question right there. This business in South America is owned by the corporation Armour & Co. here in this country?

Mr. ARMOUR. Yes.

Senator NORRIS. It is not owned individually by members of the corporation?

Mr. ARMOUR. No; I do not think so. Is it, Mr. Meyer?

Mr. MEYER. No.

Senator NORRIS. Is Armour & Co. the owner of any other stock located anywhere in the world in the same way? I mean does the corporation of Armour & Co. own other stock in other institutions, whether it is a packing institution or not?

Mr. ARMOUR. Do you mean in the United States?

Senator NORRIS. Anywhere. I do not mean the individuals; I mean the corporation.

Mr. ARMOUR. Yes, Senator. If you will look at the statement here——

Senator NORRIS. You have not that South American stock included in the statement, have you?

Mr. ARMOUR. Investment in allied companies. Our original investment is here; yes.

Senator NORRIS. The amount of stock you have now in it?

Mr. ARMOUR. The original investment is given here.

Senator NORRIS. What I am trying to get at is, Is that an isolated case or is that a common occurrence for the corporation itself to own stock in some other concern?

Mr. ARMOUR. Oh, no. We own stocks in a large number of companies.

Senator NORRIS. Do you own any in any railroad companies?

Mr. ARMOUR. No, sir. These are just companies that we use for Armour & Co.

Senator NORRIS. For instance, is the stock in the plant at Omaha owned by Armour & Co.?

Mr. ARMOUR. No; that is not a separate company. I can give you an illustration.

Senator NORRIS. I wish you would.

Mr. ARMOUR. The Loudon Packing Co.

Senator NORRIS. Where is that?

Mr. ARMOUR. That is at Terre Haute. It is a company that has been in business for many years, and they make catsup.

Senator NORRIS. I do not care so much about their business. I am interested in the stock. Does Armour & Co., as a corporation, own the stock in that corporation?

Mr. ARMOUR. We own 51 per cent of the stock and handle their goods, and that is in that report.

Mr. MEYER. The stock of all the companies in the United States.

Senator NORRIS. Are there any others where the corporations in which you own the stock use the profit of the business for that particular corporation?

Mr. ARMOUR. You are getting at the income. We pay all the stock, all the money, from South America. We do not bring any money over here. The minute we brought any money over in the way of dividends or anything else we would have to pay income tax on it. That is what you are trying to arrive at, is it not?

Senator NORRIS. I do not care about the income tax. I just wanted to get the general idea of the income.

Mr. ARMOUR. We are spending a lot of money over there and are not bringing any money over here.

Senator NORRIS. If this Terre Haute institution was spending a lot of money and wanted to use it and not declare a dividend, but put it all into the business, would you do that? Would Armour & Co. permit that?

Mr. ARMOUR. It would not make any difference, because that would show on our books.

Senator NORRIS. Whether it makes any difference or not, I want to know what the facts are.

Mr. ARMOUR. I could not answer whether we would permit that at all, because it would depend on circumstances.

Senator NORRIS. Are there cases where you do it that way?

Mr. ARMOUR. No; I do not know of any cases. They made a dividend last year and we got our percentage of it. The Loudon Packing Co. and other companies we own when they earn dividends we get them. When they do not earn them, naturally, they do not pay anything.

Mr. HENEY. I would like to ask just a question or two further about the South American business. Does Armour & Co. raise any cattle in South America?

Mr. ARMOUR. No.

Mr. HENEY. Has it not acquired a large amount of land down there?

Mr. ARMOUR. No.

Mr. HENEY. In South America? When I say "large," I mean about 3,000,000 acres.

Mr. ARMOUR. No. We are building at Brazil, and I think we bought 1,200 acres, or something like that.

Mr. HENEY. I meant a large tract.

Mr. ARMOUR. Oh, no, sir. We may have to, but we have not yet.

The CHAIRMAN. Are you interested in any packing house or slaughtering establishment except the three you have mentioned—the one in Argentine, the one in Uruguay, and the one in Brazil? Do you own any in New Zealand?

Mr. ARMOUR. No.

The CHAIRMAN. Australia?

Mr. ARMOUR. No, sir.

The CHAIRMAN. In any European country

Mr. ARMOUR. No, sir.

The CHAIRMAN. Or in Asia?

Mr. ARMOUR. No. That is all, Mr. Chairman; we do not own anything else.

The CHAIRMAN. Have you figured out how much you make per head on your hogs?

Mr. ARMOUR. I can not answer that question.

The CHAIRMAN. Or sheep?

Mr. ARMOUR. The sheep business, as a rule, does not make much money. But I can not answer that question.

Mr. HENEY. Perhaps you can get this information for us by to-morrow morning. How much has Armour & Co. made on hogs during the time it has been under the Food Administration control?

Mr. ARMOUR. I do not think we could get you that by to-morrow morning. We will try to, but I do not think we can get that. I do not think anything we can get you on hogs would be worth anything unless it was up to a certain period of the year.

Mr. HENEY. Suppose you get it for a year.

Mr. ARMOUR. We close our books the 1st of November. I do not think anything we would get you from November on would be worth anything.

Mr. HENEY. Suppose you take it from November 1 to November 1.

The CHAIRMAN. Your fiscal year ends October 31?

Mr. ARMOUR. Yes. We will try to get it for you.

The CHAIRMAN. Generally speaking, your profits on hogs have been larger than the profits on cattle?

Mr. ARMOUR. Yes, naturally, the last three or four years.

Senator GRONNA. I understood from your answer, Mr. Armour, to Senator NORRIS, that part of your capital, as shown in this statement, is in the South American plant. Am I mistaken about that?

Mr. MEYER. That appears there in that report.

Senator GRONNA. Does the amount of profit, then, show in the amount of profits here? Of course, you have not taken out any dividends. But you admit that you have made profits.

Mr. ARMOUR. We have not added any profits at all. That is an entirely separate company, and they have not declared any dividends.

Senator GRONNA. That would hardly answer my question. If you have part of your capital stock, on this statement, as shown in this statement, invested in the South American plant, and you are making a profit on that plant, it does not make any difference whether you declare dividends or not, so long as you have made the profits. Should it not be shown in this statement?

Mr. ARMOUR. I do not think so.

Senator GRONNA. In order to show the real profit that Armour & Co. made?

Mr. ARMOUR. Not necessarily so. We have not thought so, because it is an entirely separate business.

Mr. HENEY. Has the total amount of business you have shown included your South American business?

Mr. ARMOUR. No, sir.

The CHAIRMAN. What is the capital stock of the South American company.

Mr. ARMOUR. I can not tell you. It is either five or ten million dollars.

Senator NORRIS. Do you know what the profit has been down there?

Mr. ARMOUR. Yes.

Senator NORRIS. How much?

Mr. ARMOUR. Do you mean for the last year?

Senator NORRIS. The last year and the year before, or any other years.

Mr. ARMOUR. I do not know what they were for the year before. I think they were in the neighborhood of $10,000,000.

Senator NORRIS. What were they last year?

Mr. ARMOUR. I am talking about last year. I would think in that neighborhood.

Mr. HENEY. By "last year" you mean 1918?

Mr. ARMOUR. Yes.

The CHAIRMAN. That is on your South American plant, your Argentine plant?

Mr. ARMOUR. Yes, sir. I would think it was in that neighborhood.

Mr. HENEY. I have running in my mind for 1917 something like six or seven million.

Mr. ARMOUR. It may have been.

The CHAIRMAN. And the investment is either five or ten million?

Mr. ARMOUR. The investment is a good deal more than that.

Mr. MEYER. It would appear from this statement in evidence that the investment in the allied companies is $43,000,000.

The CHAIRMAN. Could you enumerate those allied companies?

Mr. ARMOUR. We could; but it is a very long list.

Senator GRONNA. It is hard to get through my head, and I am somewhat slow in figuring out these things. I am at a loss to understand the kind of bookkeeping that you would use in adding in your state-

ment here the capital stock or the assets for these outside companies, and then not including the profits that you make.

Mr. ARMOUR. We do. All the profits have been declared; all the dividends have been declared.

Senator GRONNA. That is not the profit.

Mr. ARMOUR. I do not think it is necessary, if you allow me to say so. We can not divide up profits if we are spending the money again.

Senator GRONNA. Just so that you will understand me: I am a man who deals in a small way. I started a little bank close to my home in 1901. We did not declare any dividends at all, but in about 10 years we had made enough profit to double our capital stock.

Mr. ARMOUR. Yes, sir.

Senator GRONNA. We considered that that was profit, whether we issued it or not. So we simply increased our capital stock.

Mr. ARMOUR. From your surplus?

Senator GRONNA. From our surplus.

Mr. ARMOUR. The same as we increased ours from $20,000,000 to $80,000,000.

Senator GRONNA. But every year when we made a statement—we had to render statements quite often, as you know, under the banking laws—every time we had to show that surplus, and we had to account for that profit. In making a statement such as you have made here, why should not the profits be shown? You have said you have made $10,000,000 profit.

Mr. ARMOUR. We have not thought it was necessary to do it.

Senator GRONNA. But is it not necessary that the public should know how much you have made?

Mr. ARMOUR. We issued a statement down in South America. This will show what our profits are down there. But we do not bring them back here.

Senator GRONNA. Let me ask you this question, then: What right have you to take American capital—we will consider that your capital in South America is South American capital—what right have you to take American capital and charge it in this statement, so long as you are not showing the profit?

Mr. MEYER. They are compelled to, in showing their assets under the reports of the Federal Trade Commission.

Senator GRONNA. Would it not be fairer, then, to the public here to deduct that capital, the $5,000,000, because then that would not tend to reduce your profits, while you must admit that this will tend to reduce your percentage of profits with the kind of bookkeeping you are showing here?

Mr. ARMOUR. I do not think so. I think we can explain that to you. I can not explain it to you now, but that we have a separate company in South America, and that company owns the stock in that separate company.

Senator GRONNA. But it is included in this statement?

Mr. ARMOUR. Yes, sir. They do not necessarily have to declare a dividend unless they want to. If they are spending the money, they do not want to declare a dividend.

Senator GRONNA. Let us give an illustration of that. We will say that Armour & Co. have $100,000,000 capital. Five million of that you take to South America.

Mr. ARMOUR. Yes, sir.

Senator GRONNA. And invest it there. You will actually employ, as a matter of fact, only $95,000,000 here in the United States.

Mr. ARMOUR. Yes.

Senator GRONNA. It will make some difference, will it not, whether you use ninety-five million or a hundred million, so far as the rate of percentage of profit is concerned, when you come to figure that? Have I made that plain?

Mr. ARMOUR. Yes; I think you have. I think we can explain that to you. I can not explain it to you now, but I think I can give you a satisfactory explanation of that if it is necessary.

Mr. MEYER. Senator, I am not in the accounting department, but, as I understand it, they are compelled—and I think Mr. Heney may concur—in making their report, to show all their capital, which includes all their assets.

Senator GRONNA. I am trying to show that your figures showing the rate of percentage are not altogether what they might be, but that, to some extent at least, they might be criticized.

—

EXHIBIT II.

STATEMENT OF MR. SWIFT.

The CHAIRMAN. You were not here when Mr. Swift started this morning, Mr. Heney. At that time he stated that he would rather finish his statement, and then be subjected to questions later.

Mr. HENEY. Oh, I beg your pardon; I did not know that.

Senator NORRIS. We are all subject to that criticism, as we have all interrupted him.

The CHAIRMAN. Yes; occasionally we will forget and interrupt him; but Mr. Heney was not present when Mr. Swift began, and so did not know that he made that request.

Senator NORRIS. Yes; perhaps we had better all refrain from interrupting him until he has finished his statement.

Mr. HENEY. But perhaps Mr. Swift would like to have his explanation of his answer to my last question made at this time, in order to go along with his answer.

The CHAIRMAN. All right.

Mr. SWIFT. That 25 cents is figured out on the values, on a parity between St. Paul and Chicago. That means, perhaps, if the cattle were on the same basis at St. Paul and Chicago. Now, at times, when cattle are scarce, then, of course, they run up on this basis, and they cost more money in proportion in St. Paul, and that 25 cents advantage does not exist, or a portion of it sometimes does not exist; sometimes it is cut to nothing.

Mr. HENEY. Well, the proportion that is the freight and the shrinkage.

Mr. SWIFT. Well, if we pay more for cattle in St. Paul, there is no difference or advantage of killing there—and that often happens.

Mr. HENEY. It often happens, but on the bulk of the cattle you buy in St. Paul that would not be true?

Mr. SWIFT. It is true a good deal. I know a good many times we buy sheep at St. Paul at a higher price, in order to get them.

Mr. HENEY. Well, I will not interrupt you any more.

Mr. SWIFT. Another statement that has been made before this committee that we are very much exercised about and think is very unfair is this statement that has been made here: That the packers made more money under the Food Administration regulations in 1918 than they made in 1917.

The CHAIRMAN. Let me interrupt you just a minute. Was that statement made here, Mr. Heney?

Mr. HENEY. During the first four months of 1918—I think it was limited to that.

The CHAIRMAN. I never understood that they made more than during the preceding year; and I wanted to be certain about that.

Mr. HENEY. During the first nine weeks of 1918.

Mr. SWIFT. If you will examine book 2, page 50, you will find the statement, and it does not say the first nine weeks.

The CHAIRMAN. Well, if you say the statement was made, we will accept that.

Mr. SWIFT. Yes; I do. And the statement covers the entire year 1918; it does not say for a nine weeks' period. Now, that kind of statement, when it is made, does an awful injustice to the packing interests. Even Mr. Chase, the auditor of the Federal Trade Commission, who is doing all the auditing for the Food Administration, because they have no auditors of their own, says the figures are not yet in; they are not compiled, and he does not know what the showing is. But this is what I say, as to Swift & Co., and I am prepared to take oath upon it, and Mr. Chaplin will bear me out—that Swift & Co.'s total profits——

Senator GRONNA (interposing). Mr. Chairman, I dislike very much to interrupt Mr. Swift, but I think it is very important to the committee to know how these profits were figured. I want to say for the benefit of Mr. Swift that it developed when Mr. Armour was before this committee, in the last three days, that all the profits made by Armour & Co. were not included in the statement made by Armour & Co.——

Mr. SWIFT (interposing). Let me tell you what the profits are——

Senator GRONNA (interposing). Now, might not the same thing be true with regard to Swift & Co.?

Mr. SWIFT. No, sir; I think not. I make the statement that all the profits are in here [indicating], and we have a certified audit to that effect; and I do not think there is any question of that kind.

Senator GRONNA. It is due to Mr. Swift to know this. I know that, as one member of the committee, I am absolutely satisfied that we found $10,000,000 of profits made in the South American plant, which was not included in Mr. Swift's statement——

Mr. HENEY. You mean Armour & Co.'s statement.

Senator GRONNA. Yes; Mr. Armour's statement. Whereas, the parts of the assets included in that plant were taken from the American capital and included in the statement, which, of course, would reduce the percentages——

Mr. SWIFT (interposing). Of course, you must not blame me for that.

Senator GRONNA. No; I do not. But I simply wanted to give you an opportunity to say to the committee and to convince the committee—now, in my mind there is a doubt as to how you packers keep books, and I want to bring that question up and to be fair to you, and to let you know that there is a doubt in my mind as to the correctness of your bookkeeping.

Mr. SWIFT. Let me tell you what the figures are, and then I will show you that we have included all there is in the way of profits.

Senator GRONNA. Certainly; I apologize for interrupting you.

Mr. SWIFT. Swift & Co.'s total profits, for all departments for the fiscal year 1918, were $21,157,277.44. This was in 1918, under the Food Administration year. This is 1¾ cents per dollar of sales.

The CHAIRMAN (interposing). Your turnover, you said a while ago, was about a week, on beef.

Mr. SWIFT. Yes, sir. The volume during this year was $1,200,000,000. Now, that is the past year, 1918; and the Food Administration had full control over our profits, as far as related to the meat products—all of the cattle, sheep, and hogs, the profits on those are regulated, but I have not subdivided them into States. This statement [indicating] covers Swift & Co.'s profits from all sources.

The CHAIRMAN. That is in the aggregate.

Mr. SWIFT. Yes; in all departments.

The CHAIRMAN. Does that statement show the capitalization of the various concerns in the aggregate, and the percentage of earnings on that?

Senator NORRIS. Is that statement printed? Could you give us copies of your financial statement?

Mr. SWIFT. Yes, sir; I will have them passed around.

(Copies of the statement were handed to members of the committee.)

Mr. SWIFT (continuing). This statement shows a profit of 1¾ per cent on the sales——

The CHAIRMAN. What I am trying to get at is the capital stock of these various concerns and the rate of profits on them. I do not think that the percentage of earnings on the dollars signifies anything, and I do not think that is entirely ingenuous—I do not mean that offensively—but you said that the earnings were less than 2 cents on the dollar of turnover. Now, that does not mean anything. That is intended to convince the average man, but it is mere trifling. The standards by which to judge earnings is either the capital stock or the capital invested, and the rate of earnings as related to the capital. Now, that is what I wanted to get at.

Mr. SWIFT. Suppose I told you what the percentage of earnings on the capital and surplus is. The surplus is the same thing as money invested.

The CHAIRMAN. Yes. I would like to have that first, on the capital stock, and then on capital stock plus the surplus.

Mr. SWIFT. We have not got it figured on the capital stock; we only figured on the capital and surplus, Mr. Chairman.

Mr. Chaplin, please give the percentage of earnings, capital stock, and surplus.

Mr. CHAPLIN. Eleven and two-tenths per cent.

Senator NORRIS. What is it, Mr. Chaplin, on the capital stock?

Mr. CHAPLIN. I could not tell you exactly; it would be about——

Senator PAGE. Why do you separate the capital from the capital and surplus, Senator NORRIS?

Senator NORRIS. Because the surplus, I presume it will develop on examination, are the profits made in excess of dividends that have been paid during the years in which the surplus has accumulated, and therefore it represents money paid to Swift & Co. by the men who eat the meat. If they have paid dividends in the meantime, at a rate that is fair and reasonable, then this is really the excess profits.

Senator PAGE. For this year?

Senator NORRIS. Any year—whenever it has accumulated. Now, whether the stockholders received the dividends or did not receive dividends is a matter that can be determined by evidence—and also what the dividends were.

Senator PAGE. Well, is there any reason to believe that this surplus is not excessive earnings that have been held in reserve?

Senator NORRIS. There is no reason whatever. I have no doubt that this surplus of about $85,000,000, as shown in this financial statement of Swift & Co., is excess of earnings; that is, a profit above the payment of a reasonable dividend during the years in which it accrued.

Senator PAGE. Yes; but do you know how many years it has taken to build up that surplus?

Senator NORRIS. No.

Senator PAGE. Is that not material?

Senator NORRIS. No; and I am not saying that, during all of these years, a dividend has been declared; but that is something that can be shown by the witness on the stand, I presume.

Mr. SWIFT. But, according to your argument, if this $84,000,000 shown in this statement as surplus—if the capital was increased and stock issued to represent that capital, and we had no surplus, this $84,000,000 would be shown as part of the capital. That is to say, as it is now, Swift & Co.'s capital is shown there at about $116,000,000——

Senator NORRIS (interposing). The capital stock is given as $150,000,000.

Mr. SWIFT. No, sir; there is some on hand in the treasury.

Mr. HENEY. There is $35,000,000 on hand in the treasury.

Mr. SWIFT. Just to get the figures even and not have any fractions, I will say that if the capital was $116,000,000, and you took this surplus of $84,000,000 and issued capital against it, then the capital would be $200,000,000.

Senator NORRIS. Exactly, but that would not make a bit of difference. That would simply be a stock dividend. But if the facts developed should show that it was, that you had never put the money in, but that that had come from the excessive earnings, and the people who eat meat had paid it, that is a thing that ought to be shown. I was not arguing the question as to whether it was right or wrong; but it is certainly a thing that we have a right to know, what your dividends are on your capital stock.

Mr. SWIFT. Certainly.

Senator NORRIS (continuing). And what your surplus earnings are on what the people have eaten in excess of a reasonable profit, is a different thing——

Mr. SWIFT (interposing). Wait just a minute, please; you have a right to know what the earnings are on the capital stock.

Senator NORRIS. Yes.

Mr. SWIFT. Now, as I said, if this surplus of $84,000,000 was put into the capital account, then the capital would be $200,000,000, and then, in figuring the earnings on $200,000,000, you would get back to the same thing as figuring the thing on capital and surplus.

Senator NORRIS. But I would not figure it that way. If it developed that it was a stock dividend that had not been paid in in cash, I would deduct it, in determining what you rate of profit was, or your dividends.

Mr. HENEY. In other words, you want to know what part of the present capital comes from stock dividends.

Senator NORRIS. Yes, how much is watered?

Mr. HENEY. And whether the stock was sold for par, and if not, what it was sold for.

Senator NORRIS. Did he answer my question?

Mr. CHAPLIN. About 15 per cent.

Mr. SWIFT. Earnings on the capital.

Senator NORRIS. Have you ever declared a stock dividend? Is any of this capital stock a stock dividend?

Mr. SWIFT. Yes; we have declared a stock dividend.

Senator NORRIS. Of how much and when?

Mr. SWIFT. Of $25,000,000, against a reappraisal of our inventory of the packing house.

Senator NORRIS. Yes. Now, how much actual cash is represented, Mr. Swift, in your capital stock?

Mr. SWIFT. Oh, it is all actual stock.

Senator NORRIS. Well, there was stock dividend. I mean actual cash paid in by the people who own the stock; you would have to take out any water that is in it, if there is any.

Mr. SWIFT. I beg your pardon, there is none.

Senator NORRIS. I did not say there was. I am trying to find out. You would have to take out any stock dividend that is in it, and then if it is true that you have always declared a dividend, I would like to know that, because that would make a difference. You are entitled to a fair profit all the time, of course.

Mr. SWIFT. The general dividend has been 7 per cent for a majority of the time.

The CHAIRMAN. Has that been paid pretty uniformly for the past 25 or 30 years?

Mr. SWIFT. Yes, sir; but we got up to 8 per cent dividend a couple of years ago.

Senator NORRIS. Mr. Chaplin gave the answer to my question as 15 per cent. Was that figuring on a capital stock of $150,000,000?

Mr. CHAPLIN. No.

Senator NORRIS. How much?

Mr. CHAPLIN. I think it was about $135,000,000; it was $135,000,000 a part of the time and $150,000,000 part of the time.

Senator NORRIS. Yes.

Mr. SWIFT. Would you gentlemen please turn to the page of the pamphlet's financial statement that is marked "Summary of profits for the fiscal year November 3, 1917, to November 2, 1918"——

The CHAIRMAN (interposing). Before you go to that, you say that $25,000,000 of stock was issued against a reappraisement?

Mr. SWIFT. Yes.

The CHAIRMAN. Was that an increased value of the physical properties over and above the appraisal that was formerly put in?

Mr. SWIFT. Yes, sir.

The CHAIRMAN. And that $25,000,000 would probably represent the unearned increment, probably on real estate values?

Mr. SWIFT. Yes, sir; but that came out of our surplus, too. We made our surplus that much less. You might say this, Mr. Chairman, that these stockholders of ours have only been getting 7 per cent for a period of, say, 30 years, or whatever it is. Now, a man ought to be entitled to 7 per cent interest on his money, even if he has the collateral for it and did not take any risk at all.

The CHAIRMAN. Yes.

Mr. SWIFT. Now, these men have put their money into the company, and they took all this risk, and they only got 7 per cent, and they are likely to lose it all. Now, the policy of the company was not to pay any stock dividend until lately. Now, if they see fit to put out this $25,000,000 in a stock dividend, as you call it, it is only an adjustment for those men that are only getting 7 per cent on their money, with all that risk.

The CHAIRMAN. I was not raising a point at this time as to the propriety of the policy; I was merely inquiring as to the facts.

Mr. SWIFT. Yes.

Senator NORRIS. On the first page of your financial statement you have set aside $16,500,000 for taxes. That is the Federal income tax and foreign taxes, is it not?

Mr. SWIFT. Yes.

Senator NORRIS. How much of that is for foreign taxes, if you know?

Mr. SWIFT. What page is it on?

Senator NORRIS. It is stated among the liabilities.

Mr. SWIFT. It is for Federal and foreign taxes. Can I have Mr. Chaplin answer that question?

Senator NORRIS. Yes; certainly.

Mr. CHAPLIN. About $5,000,000 for foreign taxes.

Senator NORRIS. Where are the foreign taxes paid?

Mr. CHAPLIN. In Great Britain, South America, and Australia.

Senator NORRIS. Australia? Have you a packing plant in Australia?

Mr. SWIFT. Yes.

Senator NORRIS. Well, is that incorporated—your plant in Australia?

Mr. SWIFT. Yes, sir.

Senator NORRIS. Is that one of your subsidiary companies?

Mr. SWIFT. I will explain about that. I would like to do it a little later. The Australian and South American plants have been separated from Swift & Co.

Senator NORRIS. Yes.

Mr. SWIFT. I will go into that a little later.

Senator NORRIS. You have got the factors included here in this statement. I think you ought to state, while you are on that subject, whether you included in your assets here [indicating] the incomes that have come from South America, Australia, and Great Britain.

Mr. SWIFT. That will develop on the next page, if you will turn over one page of the financial statement.

Senator NORRIS. Just in a general way, is it included in this statement—all the incomes from those foreign properties?

Mr. CHAPLIN. Yes; it is.

Senator NORRIS. That is all here, is it?

Mr. CHAPLIN. Yes, sir.

Mr. SWIFT. Would you turn over to where it says, "Summary of profits for fiscal year November 3, 1917, to November 2, 1918?" It says this is the first year under the regulations of the United States Food Administration, and is for 12 months; and down below it says this is business under regulations of the United States Food Administration, being the manufacture and sale of products from the slaughter of cattle, calves, sheep, and hogs.

It says:

"The earnings from this business were limited by the regulation to 9 per cent on the capital employed and not to exceed 2½ per cent of the sales."

Now, in lieu of the 9 per cent that we were allowed, we actually earned the 7.57 per cent, and in lieu of the 2½ per cent on the turnover, it figures out actually 2.04 per cent.

Senator KENYON. You did not make as much as you could have made under the Hoover regulations?

Mr. SWIFT. That is right; that first subdivision, above that note, relates to fresh meat. That was under the control of the Food Administration.

Now, the other articles, that were not food products, are covered in the general statement below that note on the financial statement.

All put together, they show that we have net earnings for the year of 21,000,000-odd dollars. Now, I say, "net," because we have reserve, as you will see right above those figures, $21,000,000—$11,000,000 that we expect to pay out for taxes. That leaves us a net of $21,000,000, of which $9,000,000 has been paid out for dividends, and $13,000,000 has been transferred to the surplus account.

The CHAIRMAN. Do you exclude all the taxes in arriving at the percentage of profit on investment?

Mr. SWIFT. Well, when you say "net profit" in a case like this, Mr. Chairman, and show the taxes right in connection with it, that does exclude them; but we cover both. It says, on one line, "less reserve for Federal and foreign taxes, $11,000,000"; and on the next line below that it says, "net earnings for year, $21,000,000."

The CHAIRMAN. Then, plus the taxes, it would be $30,000,000?

Mr. SWIFT. Thirty-two million dollars.

The CHAIRMAN. Was it your understanding that Mr. Hoover's regulation of 9 per cent meant 9 per cent apart from the amount necessary to pay for taxes?

Mr. SWIFT. None of those taxes came out of the Food Administration part of the business; none of those taxes have come out of the Food Administration Department.

The CHAIRMAN. That is what I am trying to get at. You construed Mr. Hoover's order to permit you to earn 9 per cent, and in addition to that to earn enough to pay your taxes?

Mr. SWIFT. No; we paid the taxes out of the 9 per cent.

The CHAIRMAN. I did not get it, if that is true.

Senator NORRIS. No; that is not shown by this financial statement.

Mr. SWIFT. None of these taxes are shown in the figures under the Food Administration part of the business; they do not come out of that.

The CHAIRMAN. Then, your 9 per cent which you are allowed by the Food Administration covers this $21,000,000, and also covers the $11,000,000 reserved for taxes.

Senator NORRIS. No; the $21,000,000 does not refer to the part of the business that is regulated by the Food Administration.

Mr. SWIFT. The 9 per cent limited by the food regulations referred only to food items; that refers only to beef and mutton and pork, as they had only the authority to deal with those things.

The CHAIRMAN. And your products are not only beef but other products?

Mr. SWIFT. Yes; a great many others, such as fertilizer, soap, etc.

The CHAIRMAN. And that was limited to 15 per cent, was it?

Mr. SWIFT. That was limited afterwards. There are only two subdivisions.

The CHAIRMAN. What I am trying to get at is this: The $21,000,000 does not include your taxes; as I understood, your taxes are in addition to that, which would make the total profit amount to $32,000,000, including the taxes.

Mr. SWIFT. That is right. But the figures that we give with regard to the food products, under the Food Administration, are not on the same basis; their share of the taxes has come off of that.

The CHAIRMAN. Well, including your share of the taxes, what per cent would the earnings be on your capital stock?

Mr. SWIFT. Mr. Chaplin, can you tell me that?

Mr. CHAPLIN. It would be about 16 per cent on the capital and surplus.

The CHAIRMAN. Well, how much on the capital stock?

Mr. CHAPLIN. About 25 per cent, I think.

Mr. HENEY. A little over 28 per cent on $116,000,000.

Mr. CHAPLIN. No; it was $100,000,000 at the beginning of the year, and $116,000,000 during part of the time, and the rest of the time $135,000,000.

Mr. HENEY. But during that time you had the profit on Libby, McNeill & Libby, and on the International Co.

Mr. CHAPLIN. Yes, sir.

Mr. SWIFT. Shall I go on with my statement?

The CHAIRMAN. Yes.

Senator KENYON. Before you leave that subject: How do those profits compare with the year before? Before you answer I will say that I noticed a statement in the Paris papers that you claimed you had lost $10,000,000 under these Hoover regulations.

Mr. SWIFT. Our profits are only about half what they were the previous year.

Senator NORRIS. Did you write a letter to Mr. Hoover in Paris and tell him you had lost $10,000,000?

Mr. SWIFT. No; I did not write any letter to Mr. Hoover. I suppose the way he got at that was that our statement had been sent broadcast, that our profits for the year 1918 was $21,000,000, and the statement of the year before, that our net profits, after reserving for the taxes, were $34,000,000. Now, he, in his mind, has said here was a reduction of at least $10,000,000, or something like that.

Senator NORRIS. Then Mr. Hoover is wrong in this statement, so widely distributed, which was cabled over here about your losing $10,000,000 in the last year's operations, is he not?

Mr. SWIFT. Of course, Senator, it could not be a loss; a man can not lose what he does not have.

Senator NORRIS. I understand that; but I am speaking of Mr. Hoover's published statement.

Mr. SWIFT. If he said that our earnings were $10,000,000 less than the previous year——

Senator NORRIS (interposing). No; I understand that he said you had lost $10,000,000.

Senator KENYON. No; he said the profits were $10,000,000 less than the previous year.

Senator NORRIS. Oh, was that it?

Mr. SWIFT. If he said our earnings were $10,000,000 less than the previous year, to be technically right, he should have said $13,000,000.

—

EXHIBIT III.

STATEMENT OF STUART CHASE, CERTIFIED PUBLIC ACCOUNTANT, 1648 EAST FIFTY-FOURTH STREET, CHICAGO, ILL.

Mr. CHASE. My name is Stuart Chase, certified public accountant, 1648 East Fifty-fourth Street, Chicago, Ill.

Senator NORRIS. Are you in the employ of the Federal Trade Commission?

Mr. CHASE. I am.

Senator NORRIS. How long have you been an expert accountant? How long have you been at the business?

Mr. CHASE. Since September, 1910.

Senator NORRIS. How old are you?

Mr. CHASE. Thirty.

Senator NORRIS. As such accountant, were you called upon by the Federal Trade Commission to make an examination of the packers' books?

Mr. CHASE. I was.

Senator NORRIS. When was that?

Mr. CHASE. That was in September, 1917.

Senator NORRIS. That was while this investigation was on?

Mr. CHASE. Yes.

Senator NORRIS. How long did you work on their books and what did you do?

Mr. CHASE. I was put in charge of the investigation of costs at Armour & Co.; and that work lasted for two months, until about the 1st of November, at which time I was called to Washington and wrote a report on packers' costs; discussed the matter with the Federal Trade people, and then at the instance of Mr. Dana Durand and Mr. Cotton I was transferred from the Federal Trade Commission to the Food Administration, to take charge of the accounts that the packers were to render the Food Administration profit regulation. I remained with the Food Administration until the 15th of May, 1918, at which time the Food Adiminstration, having made an arrangement with the Federal Trade Commission that the commission should take over the certification and the inspection of the packers' accounts transferred me back to the Federal Trade Commission.

Senator NORRIS. And you are there now?

Mr. CHASE. I am still in their employ.

Senator NORRIS. I wish you would tell the committee what you found in regard to the profits of the packers. Take Swift & Co., for instance, first.

Mr. CHASE. I recently prepared for the commission a statement of packers' profits for the entire business for the years 1912 through 1917.

Senator NORRIS. That is the calendar year?

Mr. CHASE. That is their fiscal year.

Senator NORRIS. When does that commence?

Mr. CHASE. Well, that commences about the 1st of November.

Senator NORRIS. You mean, then, commencing November 1, 1917?

Mr. CHASE. Yes.

Senator NORRIS. Or 1916?

Mr. CHASE. That would be ending November 1, 1917.

Senator NORRIS. And commencing in 1916?

Mr. CHASE. November 1, 1916; yes.

Senator NORRIS. And up to and including the first year ending November 1, 1917—that is the last?

Mr. CHASE. Yes. The packers are just reporting their results for 1918.

Senator NORRIS. Now, tell the committee what the profits were.

Mr. CHASE. Well, I first ought to preface any statement that I make of profits as an accountant by the fact that neither myself nor the packers, nor anybody else, knows accurately what the packers' profits are.

Senator NORRIS. Why?

Mr. CHASE. Because of a great number of reasons, of which the most important are their methods of taking inventories and their methods of handling subsidiary company profits. Those are the outstanding difficulties that are encountered. And in addition, we find such matters as excessive or deficient depreciation charges; items that properly should be capital expenditures are charged against profit and loss. And many other things that I could go into at some length if you desire. But this matter of inventories——

Senator NORRIS (interposing). Well, does that method have a tendency to cover up the profits? Is that the effect of it?

Mr. CHASE. That is the effect of it, yes; whether it is done consciously in every case I could not affirm for a minute. There are certain inherent difficulties in packers' accounting that make it impossible for the packers themselves always to accurately determine their profits. But they can do a great deal better than they have been doing, in my judgment.

Senator NORRIS. Well, take the one item of charging up to expense accounts something that should be capital account. What is the effect of that?

Mr. CHASE. Why, of course, the effect of that is to decrease the true statement of profits in that particular year.

Senator NORRIS. In other words, it covers up some of their profits?

Mr. CHASE. It covers up their profits; yes.

Senator NORRIS. All right, go ahead with your statement.

Mr. CHASE. Now taking the five companies combined, their published figures, as amended by such analysis as the commission has made—which is by no means a complete analysis, and the commission does not certify in any way to these figures; it simply believes them to be a more accurate statement of profit than as published by the packers—we find that the total for the five companies in 1912 was $18,715,000; in 1913, $20,217,000; in 1914, $22,108,000; in 1915, $40,052,000; in 1916, $60,759,000; in 1917, $95,639,000.

Senator NORRIS. You don't have them for 1918? Did you give any part of the year 1918?

Mr. CHASE. No part at all; no.

Senator NORRIS. Now, the profits since the Food Administration has had control of the packers have been greater than they ever were before, have they not?

Mr. CHASE. That I could not say.

Senator NORRIS. Do you know when the Food Administration took charge?

Mr. CHASE. Yes; November 1, 1917. The packers' profits, as reported by them, are rather less than in the year 1917; but as we have not made any careful audit for the year 1918, books having just been closed within the last few days, I could not give you any statement as to what we really believe the profits for 1918 to be.

Senator NORRIS. You haven't made any examination, then, since the Food Administration took charge?

Mr. CHASE. I have made a series of test examinations on specific items, but no comprehensive examination of profits as a whole.

Senator NORRIS. What do those tests show, that you took, if they show anything?

Mr. CHASE. Well, they show a great many things. For instance, the Food Administration regulations provided that the inventories of the packers should be at market, full and fair market, and on November 1, 1917, Swift & Co. raised all their inventories to comply with the Food Administration regulations, but the other packers, with the possible exception of Morris & Co., did not do so. They continued to take their inventories at market, or at cost, and the result was that the packers started the year on a different basis. Here was Swift with his inventories way up, Morris with his inventories part way up, and the other three back on the old basis, contrary to the regulations of the Food Administration. But when it came to the end of the first accounting period on January 1, 1918, or thereabouts, Swift & Co. dropped back to their old method of cost and market; the others dropped still lower; and the result was that the first periods' profits came out very low; and before any comprehensive or accurate statement can be made as to packers' profits for the year 1918 that inventory situation has got to be straightened out.

Subsequently the Food Administration amended its regulations so as to provide that the packers might inventory at market or at cost, where they had costs, and that, of course, ruled out Swift's original inventory, which had the interesting effect of throwing into the month of October—that is, the month before the regulation went into effect—about $11,000,000 profit which under the amended regulations was really a part of 1918 profits. Swift thereby kept out perhaps four or five million dollars of profits—threw it back into the old year—which really belonged in the new year. Of course, Swift & Co. can not be blamed for following the regulations of the Food Administration on November 1, but it is rather dark as to why, having started off in such an exemplary fashion, they dropped back to their old method at the end of the first accounting period.

That was one part of our examination—inventories—and the more we go into inventories the more dubious the whole situation becomes. The packers have said all along that their inventories were at cost, wherever they could get cost, and at market where they could not secure cost; but we find by analyzing those departments where costs rule that these costs are from the accounting point of view not dependable. For instance, Armour & Co. reported that their glue-department inventories were founded on cost, and when we came to investigate Armour's glue department we found that back in 1907 certain costs per pound of various grades of glue had been determined and that those 1907 costs had been used ever since in making up their inventories. Of course, as a matter of fact, true costs had increased sharply, and Armour & Co. had been calculating their costs for memorandum purposes, and we took those memorandums that they had accumulated of their glue costs and applied them to the year 1918, and we found that it made a difference of about $300,000 in that one department alone. That is, by using their old 1907 costs they had—I won't say covered up, but they had eliminated from their total profits $300,000 that under a proper cost system should appear in that year.

Senator NORRIS. For glue?

Mr. CHASE. For glue alone. And we find that Cudahy is including selling and administrative items with their costs. From the accounting point of view costs for inventory purposes should be cut off with the manufacturing expenses. Selling expenses are something that are on beyond, and the administrative expenses are largely on beyond. But Cudahy includes all three of these items in their inventory cost.

And we found considerable difficulty in getting at the true costs of Swift's glue. That department was pointed out to us as the best cost department that Swift had, but my assistant, Mr. Tatar, has just been examining inventory costs there and finds them in a very sad state indeed. So much for inventories at cost.

When we get onto those departments which are inventoried at market we find that a great many of the products have no ascertainable market against which any governmental or outside reviewing body can measure the accuracy of the prices taken for inventory purposes. In other products the packers, through their great system,

more or less dominate the market and can make it what they choose, while for the remaining products there is an outside market that can be used to check the prices that they use. But their practice is to deduct from that market price certain items for carrying costs, and so on, which are very difficult to certify to. And, in fact, the whole inventory situation may be summed up, so far as these market prices are concerned, by the remark of Mr. Chaplin, of Swift & Co., their chief accountant—a very able man, who probably knows more about packers' accounting than anyone else in the country—and after a long conference, in which we had been trying to get at the bottom of this situation, he finally came out rather impatiently and said, "We get our inventory prices out of our own heads."

Now, that is probably true. The various managers of the departments and various officials set the prices of these market departments according to their own judgment, and that judgment is the basis of many years' experience; and, while it may be sound judgment—particularly from the packers' point of view—it precludes any governmental investigating body from certifying to the accuracy of the market inventories, excepting to a very limited degree; and as these inventories are enormous, and as their effect on profits is profound, you can see immediately how difficult it is to determine accurately what packers' profits are and how easy it is for the packers, by exerting their own individual judgment, "out of their heads," to transform a large profit into a smaller profit, or even into a positive loss, without serious chance of discovery.

Senator NORRIS. Do you know anything about the different classes of business upon which certain profits were allowed by the Food Administration to the packers?

Mr. CHASE. Yes, sir.

Senator NORRIS. Well, can you tell us whether under their system of bookkeeping it was possible for them to transfer what should be a profit in one of those classes to another?

Mr. CHASE. Oh, very easily, and practically impossible to detect.

Senator NORRIS. For instance, they were allowed to make 9 per cent on one class of business, 15 per cent on another, and then on another class there was no limit.

Mr. CHASE. No limit.

Senator NORRIS. Well, were they able to hold the profit down to 9 per cent on one, 15 per cent on the other, and manipulate the items and the business in such a way that the profits would go into the class where there was no limit?

Mr. CHASE. It would be very easy to do so, and almost impossible to detect. We have found in our examination a number of instances where the transfer of prices from class 1 to class 2 seemed to us to be unduly low. I remember Morris & Co. in their first period transferred their native cattle hides from their hide department, which is in class 1, to their leather department, which is in class 2, at a figure about 4 cents under what the other packers apparently were transferring at.

Senator NORRIS. That would enable them to make 15 per cent instead of 9?

Mr. CHASE. Yes, sir.

Senator NORRIS. If they were transferred on some basis that was not the real value, it would increase it still more, would it, or would it not?

Mr. CHASE. Well, of course the lower the transfer price used in class 1 the less the credit in class 1 and the less the profit in class 1 and the more the profit in class 2.

Senator NORRIS. If they were transferred at a low price, it would increase the profit they could make off of it in the class to which it was transferred?

Mr. CHASE. Yes.

Senator NORRIS. Could you tell from your examination, and do you know, to what extent this was carried on?

Mr. CHASE. I could not say. We have been, largely during my absence from Chicago, making an examination of transfer prices on about 20 standard products that went from class 1 to classes 2 and 3; and the final results of that study I have not seen as yet, but I saw the start of it, and there were some quite surprising variations between the several packers in the transfer prices used.

Senator NORRIS. Now, these profits, I wish you would give them, if you can, showing the profit of each one of the five big packers instead of in gross. Have you got it analyzed so you can do that?

Mr. CHASE. You could have a copy of this, if you want it [indicating paper].

Senator NORRIS. If you can read it, then give the reporter a copy, if you have it tabulated.

Mr. CHASE. I also have it by the index of growth, taking the year 1912 as 100.

Senator NORRIS. Go over it in each way that you have it.

Mr. CHASE. Here is Armour & Co. I also show the profit for the fiscal year 1904 for Armour, because the Bureau of Corporations at that time made a report in which it exhibited the figures. Armour & Co., 1904, $1,850,000; 1912, $5,702,000; 1913, $6,158,000; 1914, $7,640,000; 1915, $11,156,000; 1916, $22,849,000; 1917, $27,137,000.

Senator NORRIS. Now, can you give the per cent of profit each time as you go along, or have you that differently?

Mr. CHASE. The per cent of increase?

Senator NORRIS. No; not of increase, but the per cent of profit, the dividend that could be declared, or was declared. Of course, the amount of profit without their capital stock and so forth would not give us very much information.

Mr. CHASE. Well, the fairest way probably to show that is the per cent on their net worth—that is, the capital and surplus.

Senator NORRIS. Yes; could you put that in as you go along in giving the gross profits?

Mr. CHASE. I think so.

Senator NORRIS. I wish you would do that.

Mr. CHASE. I haven't it for 1904, but I have it for——

Senator NORRIS (interposing). That is Armour & Co. you are speaking of now?

Mr. CHASE. Yes. Here is Armour in 1912, 6 per cent on the net worth; 1913, 6.1 per cent; 1914, 7.3 per cent; 1915, 10.2 per cent; 1916, 19.2 per cent; 1917, 19.8 per cent.

The prewar average—that is, for the years 1912, 1913, and 1914—is 6.5 per cent; and the "war" average—that is, for the years 1915, 1916, and 1917—is 16.7 per cent.

Senator NORRIS. You mean 16 per cent?

Mr. CHASE. Yes; the average for the three war years.

Senator GRONNA. In other words, it is 10 per cent higher during the war than before the war?

Mr. CHASE. No; 10 per cent additional—over 250 per cent higher.

Senator GRONNA. What is that percentage based upon?

Mr. CHASE. That is on their net worth, capital stock and surplus.

Senator GRONNA. Capital stock and surplus. Are any bonds taken into consideration there?

Mr. CHASE. No.

Senator GRONNA. Just capital stock and surplus?

Mr. CHASE. Yes.

Senator GRONNA. The same as a bank would make a statement with reference to its percentage. Of course, there is such a difference in making these returns that many people who are not familiar with accounts do not understand that. I will take it that our chairman is familiar with it, but I find a good many of the lawyers who are not expert accountants—I don't claim to be one myself, but I do know something about making returns for banking institutions, as I own two small banking institutions myself, and the bankers, of course, when they pay a percentage they pay a percentage upon the stock alone, not upon surplus. Now, do the packing concerns, in figuring their percentage, do they take surplus into consideration?

Mr. CHASE. They declare dividend on the stock, of course.

Senator GRONNA. Just the stock?

Senator NORRIS. This is not the packers' reports; this man is from the Trade Commission.

Senator GRONNA. I understand that, Mr. Chairman; but I want to know what he has based it upon; whether it is upon the stock or upon stock and surplus.

Senator NORRIS. Upon stock and surplus, I think he said.

Mr. CHASE. Upon stock and surplus.

Senator NORRIS. Now, take up the other packers and go through the other way. You can put the percentage in all at once.

Senator GRONNA. Now, I want to have that clear in my mind. That is important. Is it upon stock and surplus or upon the stock?

Mr. CHASE. Upon stock and surplus. "Net worth" is the accounting idiom for that total.

Senator NORRIS. Then the percentage they make is a great deal more than you have it in your figures, because they have a tremendous surplus?

Mr. CHASE. A tremendous surplus; yes. This really is the percentage of profit upon the stockholders' equity.

Senator GRONNA. Well, take a case, now, where the stock is $100,000,000 and assume that the surplus is $50,000,000; now, the way a bank would figure that dividend or profit would be simply upon the stock, the $100,000,000. We would never think of basing it upon the $50,000,000. Of course, if you make it upon the $150,000,000, the dividend or the profit necessarily would be much smaller.

Mr. CHASE. Yes. The reason that we select the figure of net worth is because it is the only way that you can compare the five packers with any fairness to themselves or anyone else, because if you figured the percentage on the stock alone, the fact that some of them have issued stock dividends and capitalized their surplus and others have not, would give you tremendous percentage in some cases on the capital stock, and much lower percentages in other cases; and you could not really get any sound basis of comparison. But I can read, Mr. Chairman, at the same time the percentages on their capital stock, which I have here.

Senator NORRIS. I wish you would.

Mr. CHASE. Which show the very reason why I don't consider this method the soundest by and large.

Armour & Co., 1912, 28.5 per cent. This is on their capital stock.

Senator NORRIS. That would be their dividend, or what they could declare as dividend.

Mr. CHASE. That is what they could declare; 1913, 30.8 per cent; 1914, 38.2 per cent; 1915, 55.8 per cent; 1916, 114.2 per cent; 1917, 27.1 per cent.

Now, you see by examining that alone you would be led to believe that they made a tremendous profit in 1916 and fallen off sharply in 1917, but the fact of the matter is that on the net-worth basis they had a higher percentage in 1917 than they did in 1916, the answer being that Armour's capital stock in 1916 was $20,000,000, and they issued a stock dividend of $80,000,000, and by the time they got around to the next year you have to figure it on a $100,000,000 basis.

Senator GRONNA. They increased their capital stock issue?

Mr. CHASE. Yes; but no cash was paid in; not a penny of cash.

Senator NORRIS. They did it by converting the surplus into capital stock?

Mr. CHASE. Yes: into capital stock.

Now, we can take Swift & Co. I will read the actual money, the percentage on net worth, and then the percentage on capital stock. Swift & Co., 1904, $3,850,000.

Senator NORRIS. Now, name it as you go along. That is profit?

Mr. CHASE. Yes, profit; 1912, $8,745,000; 1913, $9,449,000; 1914, $9,651,000; 1915, $23,387,000; 1916, $24,195,000; 1917, $47,236,000.

Now, the percentage on net worth for Swift was, in 1912, 8.6 per cent; 1913, 8.7 per cent; 1914, 8.5 per cent; 1915, 19.8 per cent; 1916, 19.1 per cent; 1917, 33.4 per cent.

Their prewar average was 8.6 per cent. Their war average was 24.5 per cent.

They have pretty nearly trebled their rate in the war years over the prewar years.

Their percentage on capital stock was, in 1912, 11.6 per cent; 1913, 12.6 per cent; 1914, 12.8 per cent; 1915, 31.2 per cent; 1916, 32.2 per cent; 1917, 63 per cent.

I think in the case of Swift there was also an increase in the capital stock. They went from $75,000,000 to $100,000,000 during that period. I think it was in 1916. That affects these last percentages, of course.

Senator GRONNA. But, at any rate, they made more profit during 1917 than they did in the years before?

Mr. CHASE. Oh, yes; 1917 is the banner year in the packing industry. There never was such a year.

Now, Morris & Co., their gross profit in dollars in 1912 was $1,813,000; 1913, $1,917,000; 1914, $2,206,000; 1915, $2,321,000; 1916, $4,890,000; 1917, $8,012,000.

Their profit on their net worth was, in 1912, 6.1 per cent; 1913, 6.9 per cent; 1914, 7.5 per cent; 1915, 7.5 per cent; 1916, 15 per cent; 1917, 22.6 per cent.

Their prewar average was 7.2. Their war average was 15.4.

Now, on the rate on capital stock you will see some very amusing figures. In 1912 it was 60.4 per cent; in 1913, 63.9 per cent; 1914, 73.5 per cent; 1915, 77.3 per cent; 1916, 163 per cent; 1917, 267.7 per cent.

You see Morris never capitalized their surplus. They kept their old figures of $3,000,000 through a great number of years without raising it.

Senator NORRIS. Well, it might be interesting there to know whether in the meantime they had declared dividends and actually paid them to their stockholders.

Mr. CHASE. Oh, yes.

Senator NORRIS. They had always declared dividends during all those years?

Mr. CHASE. Yes.

Senator NORRIS. So that, as a matter of fact, this increase in their capital stock came about not from money that they put in, but from profits in the business?

Mr. CHASE. That is the case of the other companies, but Morris did not increase their capital stock.

Senator NORRIS. I understand they did not.

Mr. CHASE. But their surplus piled up.

Senator NORRIS. But it is important to know whether that increase was a proper basis upon which to pay dividends. It is important to know whether there were dividends in the meantime paid to their stockholders. Of course, their stockholders were entitled to at least a reasonable dividend. They were paid all the time?

Mr. CHASE. Oh, I am sure they got their reasonable dividend right along. I understand they did.

Senator NORRIS. And the surplus came out of the excess profits?

Mr. CHASE. Yes; which the American public paid for.

Senator NORRIS. Yes.

Mr. CHASE. Wilson & Co., in 1912 their profit in dollars was $1,326,000; in 1913, $1,364,000; in 1914, $1,209,000; in 1915, $2,464,000; in 1916, $5,314,000; in 1917, $8,319,000.

Their profit on their net worth was in 1912—we have not figured that because of the unreliability of Wilson & Co.'s profits in 1912 to 1915. They reported as I have read them to you, but subsequently a firm of accountants went over the books and revised them completely, finding all kinds of errors. Those revised figures we did not see, and so we have not given the per cent of profit on the net worth for Wilson, excepting in the years 1916 and 1917. In 1916 the net worth was 14.5 per cent; 1917, 29.6 per cent. Which, on their capital stock, amounts to 7.9 per cent in 1916 and 27.6 per cent in 1917.

Now, Cudahy, in round dollars, in 1904, $928,000; 1912, $1,129,000; 1913, $1,329,000; 1914, $1,402,000; 1915, $724,000; 1916, $3,511,000; 1917, $4,935,000.

The profit on net worth for Cudahy in 1912 was 7.1; in 1913, 7.8; in 1914, 7.9; in 1915, 4 per cent; in 1916, 19.4 per cent; 1917, 23.2 per cent.

Their prewar average is 7.6 per cent, and their war average is 16 per cent.

Senator NORRIS. How do you account for that small profit there of 4 per cent in one of the war years?

Mr. CHASE. Well, I haven't any personal knowledge of it at all. It has been told to me by some of the other investigators that at that time Cudahy had come to some misunderstanding with the other packers.

Senator NORRIS. What year was that?

Mr. CHASE. That was in 1915.

Cudahy's profits on their capital stock were, in 1912, 9.4 per cent; in 1913, 11.1 per cent; 1914, 11 per cent; 1915, 6 per cent; 1916, 29.2 per cent; in 1917, 35.2 per cent.

That completes the list. But I want to say again, as I said before, that I can not in any way certify to these figures, but simply believe them to be more accurate than the profits as reported by the packers themselves.

Senator NORRIS. Well, they are the figures that you believe to be as near correct as you can reach a conclusion, are they?

Mr. CHASE. Yes; so far as our analysis has extended. You see, the packers have a way in reporting their profits to the public through advertisements and annual statements and elsewhere, of deducting their reserves for excess-profits taxes. Now, the law in regard to excess profits is that such taxes shall be paid out of profits as determined. Therefore the true profit is the amount before making any provision for these excess-profits taxes. Swift & Co. in 1917 announced broadcast throughout the country that their profits were $34,000,000, but they had arbitrarily deducted from their true profits a reserve of $10,000,000 to take care of excess-profits taxes. Now, properly from an accounting, technical point of view, their real profit was $44,000,000 at least. And all the packers do that. I have noticed that in their last annual statements they have followed the same procedure.

Senator NORRIS. Did you determine, or did you try to, and if you did try, did you determine or find out any evidence in regard to the expenses of those various institutions? For instance, can you tell us the salaries of the officials of the various packing institutions?

Mr. CHASE. I have those in my office at Chicago. I only remember one or two of them.

Senator NORRIS. Tell us those you remember.

Mr. CHASE. Well, Mr. Thomas M. Wilson receives $125,000.

Senator GRONNA. A year?

Mr. CHASE. Yes. And Mr. Valentine, of Armour & Co., receives $50,000, with $35,000 bonus, making $85,000. I think Mr. White, vice president of Armour & Co., receives the same figure. Young Mr. Morris, president of Morris & Co., receives $50,000, and then $25,000 more as president of one of the stockyard companies, making $75,000. And, as I say, we have the whole list in Chicago.

Senator NORRIS. Do you know what Mr. Swift gets?

Mr. CHASE. No; I don't remember. I think that, so far as their books show, they are rather nominal salaries—$25,000 or $50,000; not over that.

Senator NORRIS. Is $50,000 salary nominal?

Mr. CHASE. Why, in comparison with Mr. Wilson's salary, I should say it was nominal.

Senator NORRIS. Well, do you know what they expended in the way of expenses for looking after legislation in various places, if they spent anything?

Mr. CHASE. I believe the commission has the facts in regard to these. I remember during my own work on the books of Armour & Co., finding an account which—it had to do with legal fees for attorneys in a number of States in the Union, the capital cities of those States. The item as it appeared on the ledger was "services introducing bills," watching the legislature, etc. Those items were not large. They ran from $500 to $1,500. I don't suppose the whole account amounted to more than $50,000. But that was only a very small item of their legislative outgo.

Senator NORRIS. Do you know anything—for instance, Mr. Veeder, who seemed to be looking after the interests of all the packers, do you know what he got?

Mr. CHASE. I haven't any idea. I don't think the salary was reported by Swift & Co. on our salary schedules. I think the commission has some figures as to his total office expense.

Senator NORRIS. You don't know what this is?

Mr. CHASE. No; I do not.

Senator NORRIS. Now, Mr. Chase, is there anything else that you think of that would throw any light on this investigation that the committee is making?

Mr. CHASE. Of course, I don't feel that the profit regulation of the Food Administration has amounted to anything, so far as regulating the packers' profit is concerned. At the time that I took charge of those records and accounts under Mr. Cotton I made a report to Mr. Cotton soon after the packers had sent in their first period returns for the months of November and December, 1917, and in that report I made some estimates—which since have been substantiated by the final year's results—that the packers were being allowed to make on their whole business, under the Food Administration regulation, as much as they had made in the year 1917, which was the most profitable year in their entire history. Now, it may be that the regulation prevented them from making more than that which they made in the most profitable year in their entire history, but it certainly did not operate to reduce the profit in any way, and I do not feel that this regulation as it has been carried out by the Food Administration has helped the public or the consumer. Perhaps rather the contrary, because the packers have announced publicly that they were being regulated, which, I suppose, tended to satisfy the public that profits actually were cut down.

Now, in justice it must be said that the packers have not equaled—or they don't appear to have equaled—their profit allowance, but from the standpoint of the profit allowed the regulation was nothing more than a comedy, in my estimation.

Senator NORRIS. As I understand you, the regulation of the Food Administration, allowing them a certain profit on different classes of business, in reality did not amount to anything?

Mr. CHASE. That is what I should conclude; yes.

Senator NORRIS. In other words, that as far as those regulations were concerned their profit was unlimited?

Mr. CHASE. No; it was not unlimited, but it was way up to the most they had ever made in their previous history.

Senator GRONNA. Wasn't it more than that? According to Mr. Cotton's own statement before this committee, he said that the packers—he allowed the packers to make a profit, or, rather, to include their borrowed money as well as capital stock. Now, did the packers do that before the Food Administration took charge of it?

Mr. CHASE. Well, that was simply for the purpose of determining a rate upon which to base the 9 per cent; that is, the 9 per cent on the capital stock, plus surplus, plus borrowed money.

Senator GRONNA. Plus bonds?

Mr. CHASE. Yes; plus bonds.

Senator GRONNA. Plus everything?

Mr. CHASE. Plus everything but accounts payable.

Senator GRONNA. Well, wouldn't that permit them to make more money than, in fact, what the chairman has stated—an unlimited amount?

Mr. CHASE. Well, it allowed them to make a good deal more than 9 per cent on their own money, and a great deal more than 9 per cent on capital stock.

Senator GRONNA. They might borrow a good deal more than their capital stock, and the more money they could borrow the more money they could make?

Mr. CHASE. Yes; and in that connection the statement made by one of the officials of the Food Administration is rather interesting. He told my assistant, Mr. Tator, at the time these regulations were under consideration that they were going to base this percentage—to include borrowed money, because the public effect would be to make the rate appear lower.

Senator NORRIS. What member of the Food Administration was that?

Mr. CHASE. I think it was Mr. Durand. Mr. Tator would have to tell you about that.

Senator GRONNA. The figures you have given the committee with reference to profits, are they net or are they gross?

Mr. CHASE. They are net profits.

Senator GRONNA. And from the figures you have given us here this afternoon it indicates that during the war period and during these regulations the packers have made more money than they did before the war, with the exception of that one year, 1915, the Cudahy Co.?

Senator NORRIS. Yes; and that only applied to one packer.

Senator GRONNA. Yes.

Mr. CHASE. Taking the total, I think you might summarize it by saying they made three times as much on their net worth during the war years as they made before the war.

Senator NORRIS. And if you would figure it on their actual capital stock it was a good deal more than that.

Mr. CHASE. Well, we can't tell, because of these new issues that have come in all the time.

Mr. McCUMBER. Mr. President, I regret very much that, through interruptions, those who have spoken since 10 o'clock this morning had their addresses so elongated that it was impossible for anyone else to get the floor who desired to speak more than five minutes upon the bill.

I wish I could satisfy myself that this bill placing one of the greatest industries of the country under the management of a commission will inure to the benefit of the stock growers and the ultimate consumers in the United States. When I recall the earnest efforts of my colleague, during all the time that he served in the House and in the Senate, to subserve the interests of the agricultural and stock-raising industries of the country I find it very difficult to disagree with his conclusions upon any one of these matters. The difference between us, however, is not in reference to the evils to be eliminated or sought to be eliminated by the bill. They are rather of a fundamental character. The question with me is not whether certain evils exist, but the method of dealing with them; whether we should meet them by a law declaring the evils to be unlawful and then prosecuting offenders, or whether we should create a new commission to control and direct the business itself.

The slogan during the campaign and that of the President elect himself was "More business in government and less gov-

ernment in business." I agree with that Harding philosophy. I think it was one of the great elements that entered into and swelled his victory in the campaign. People were tired of being governed by bureaus and by commissions. They were suffering from their operations in the operation of railways, shipping, and other industries. When I recall the effect of the control of our railways by the Government; when I recall the effect of the operation of our Shipping Board, the awful extravagance, the more than awful inefficiency that was exercised, I want to get away just as far as I can from commissions and go back to a government by law rather than a government by bureau, board, or commission.

Government control and operation of railways bankrupted every railway in the United States, increasing the cost of transportation to an unheard-of extent, is primarily responsible for the present excessive cost of living. Government interference in the operation of coal mines has raised the price of coal beyond the reach of the public to pay, and except for providential interference in the form of a mild winter the suffering of the public would have been shocking. I insist the right, the logical, way to effect a remedy is to declare by law that any wrongful act shall be a crime, and then punish the violation. I would govern business by law and not turn it over to a commission to manage, knowing that their management is never efficient or economic.

We have a right to declare every one of the offenses mentioned in the bill to be unlawful and punish the perpetrator. I think they are already so declared under the Trade Commission, and we already have a right to punish them and put a stop to them. I believe that is the only proper way to reach the offenses. We should govern these packers by law and not attempt to govern them by managing their business by a commission.

I wish I had the time to go into a discussion of this matter. I find that I am sustained in my views by the stock raisers of my own section of the country. The western half of the State of North Dakota is engaged to a great extent in stock raising, and I have found nearly all of those so engaged are against any proposition to create a commission to control the business. My time having about expired, I must ask that their suggestions, showing their opposition to this method of meeting the situation, their petitions and resolutions asking me to vote against this bill be printed in the RECORD as a part of my remarks.

Following these letters, and there are many others, a delegation of stock raisers and members of the Stock Growers' Association of Western North Dakota, consisting of Mr. Baird, Mr. Burnett, and Mr. Richards, came to Washington and vigorously protested against the enactment of this bill into law.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

Resolutions opposing Senate bill 3944.

To the Hon. PORTER J. MCCUMBER,
United States Senate, Washington, D. C.:

We, the undersigned stockmen and members of the North Dakota Stock Growers' Association of Western North Dakota, respectfully petition that you use your influence in opposition to the Senate bill 3944, known as the Gronna bill, as we consider said bill detrimental to the best interests of the live-stock industry throughout the United States.

W. L. Richards, secretary North Dakota Live Stock Association, Dickinson, N. Dak.; D. C. Beck, H. C. Christenson, Fred Christensen, C. S. Lee, Thos. S. Johnson, Geo. T. Grayson, Wyeth Tuthill, Kildeer, N. Dak.

—

OBJECTIONS TO SENATE BILL 3944.

Objections to the above bill to create a Federal live stock commission from the live-stock producers' viewpoint:

The live-stock market just now is badly demoralized and prices are low. Any legislation in a new and untried field will tend to further demoralize it and continue the unsettled conditions now existing. What the live-stock producer wants is a restoration of confidence and the stabilizing of the industry.

This law is probably unconstitutional because it seeks to regulate private intrastate business not concerned in interstate business, and because it provides for the enactment, administration, and enforcement of the rules of the commission, which have the effect of laws, by the commission itself, which commission also will punish violations of its own orders. In other words, the commission is clothed with legislative, executive, and judicial powers. This will mean that the law will be resisted and tested in the courts, with resultant delays of two or three years. This litigation will unsettle market conditions and curtail the live-stock industry.

Even if the creation of this commission is a good thing, on account of the unsettled conditions hereinbefore referred to, it should not be brought up now.

The live-stock producers in our State and business interests more or less dependent on live-stock producers are opposed to this bill because it puts the control of a highly developed, sensitive business under a political body not trained in the business, not interested in its efficiency, and not permanent.

The bill is socialistic, and our experience in our State is that such measures work to the detriment of the majority of the people and do not improve the industry sought to be affected.

—

SENTINEL BUTTE SADDLERY CO.,
Sentinel Butte, N. Dak., August 29, 1919.

Senator PORTER J. MCCUMBER,
Washington, D. C.

DEAR SENATOR MCCUMBER: As you know, the writer has been for many years one of the large stock growers of the State, and consequently vitally interested in all that pertains to the live-stock industry.

There are two bills now before Congress, known popularly as the Kenyon bill and the Kendrick bill, which, I believe, if enacted, would work serious injury to the stock business of the Nation. I believe the organization of the packing industry should be controlled, but it should not be destroyed. The interests of the packers, the stock growers, and the public are one. Just because the cost of living is high is no excuse for people to throttle a great industry to which all stockmen must look for a sale for their products.

Of the two bills I think the Kendrick bill is least objectionable. I know you have the interests of the stockmen at heart and would not willingly vote for the passage of a bill that would in any way work a grievance against them, or even against the packers, because if the packers are trammeled in their operations to no purpose, the cost must be borne by the stockmen and by the consumers.

Things will adjust themselves in the packing business, just as they will in every other business, if they are allowed to do so without undue interference. The country needs a little patience. Uneasiness and uncertainty are preying upon the live-stock business, due to the agitation produced by these two measures.

I believe you will give them careful consideration and vote "no" when the time comes.

I am, very sincerely, yours,

LEWIS F. CRAWFORD.

—

STINSON IMPLEMENT & FUEL CO. (INC.),
Grand Forks, N. Dak., August 18, 1919.

Hon. P. J. MCCUMBER, Senator,
Washington, D. C.

MY DEAR FRIEND: Senate bill 2202, introduced by Mr. KENYON, has been called to my attention. In going into this matter, feel that this bill is but a stepping-stone to radical socialism and will mean Government control and ownership of the basic industries of this country.

For one thing, the very idea of giving one man, namely, the Secretary of Agriculture, the power as outlined in this bill is, in my opinion, plain czarism. Do not feel that our Secretary of Agriculture is equipped or in position to become equipped to handle business of such magnitude as the packing industry of this country. Do not believe this legislation is necessary and can see nothing but harmful results to be derived therefrom.

Earnestly protest against the passage of any legislation such as this and sincerely hope that your views in this matter will coincide with mine and that you can conscientiously use your influence against the passage of this bill.

Your friend,

LESLIE STINSON.

—

THE MERCHANTS' NATIONAL BANK OF DICKINSON,
Dickinson, N. Dak., August 15, 1919.

Senator MCCUMBER,
Washington, D. C.

DEAR SENATOR: Inclosed find a petition signed by some of the stockmen in our country that oppose the Kenyon and Kendrick bills that are about to come before Congress.

Hoping that this may be of some use to you in the opposition of this legislation, I am,

Yours, truly,

W. L. RICHARDS.

—

We, the undersigned, producers and live-stock shippers of the Northwest, strongly object to the Kenyon, Kendrick, and like bills on the ground that Government control of packing plants, packers' refrigerator cars, and stockyards would retard the growing live-stock industry of the great Northwest. We know packers can not maintain a stable market for live stock without their refrigerator cars. We also know there has been an enormous improvement in the Stock Yards Co. in the way of service and permanent improvements since the packers took over the Stock Yards Co., compared with the previous private ownership. We want progress, not restriction in the production and marketing of live stock, also in the distribution of live-stock products from South St. Paul, Minn.

W. L. Richards, Dickinson, N. Dak.; Wilson Eyer, Dickinson, N. Dak.; Joe F. Parker, Dickinson, N. Dak.; Anton Armbrust, Dickinson, N. Dak.; John P. Berrmyer, Dickinson, N. Dak.; C. T. Langley, Dickinson, N. Dak.; M. L. McBride, Dickinson, N. Dak.; M. Byers, Dickinson, N. Dak.; Crosby Richards, Dickinson, N. Dak.; Max Hendrick, Dickinson, N. Dak.; Joseph P. Ziegler, Dickinson, N. Dak.; L. R. Baird, Dickinson, N. Dak.

—

THE MERCHANTS NATIONAL BANK OF DICKINSON,
Dickinson, N. Dak., August 5, 1919.

Hon. P. J. MCCUMBER,
Washington, D. C.

DEAR SIR: It has lately been brought to my notice that the Kenyon and Kendrick bills are to be brought before Congress in the near future. I have made a study of these bills and have found them, in my estimation as well as the estimation of most of the stockmen of this locality, to be very detrimental to the live-stock interests of the country.

There have been numerous petitions circulated opposing the bills. The number of signers among the stockmen have been great, which gives a good insight on the feeling of those interested.

Hoping that you are of the same opinion as the majority of the stockmen of this community and see fit to oppose the said legislation, I am,

Yours, truly,

W. L. RICHARDS.

NEW MEAT MARKET,
Wahpeton, N. Dak., August 11, 1919.

Senator MCCUMBER,
Washington, D. C.

HONORABLE SIR: I respectfully call your attention to the so-called Kenyon bill (S. 2202), which is now before our Congress for consideration, or which will soon be considered by that body.

I wish to enter a protest against the passage of this bill at this time, and to ask that you use your best efforts to insure its defeat.

From information gained through a reading of the bill, it appears that the purpose of the measure is to place under governmental control all of the various branches of the meat business, both wholesale and retail, entirely upsetting conditions with reference thereto.

I have a large investment at the present time in a retail-meat business and have fully equipped myself to meet the demands of the trade in this locality. I am now receiving prompt and efficient service from the larger packing concerns in the matter of all goods ordered from them, and the arrangements which I have made with these concerns is proving very satisfactory both to myself and to my patrons. Further, I have at considerable expense to myself installed the necessary facilities for handling such meats as I slaughter myself and have complied fully with all laws relating to sanitation in the preservation of meats, etc.

It is apparent that all these conditions will be changed should the proposed bill be enacted into law. Better service will not be had; a better quality of meats will not be given the public; and the service, especially with reference to the refrigerator facilities, will be materially lessened. It will mean a great financial loss to me and to others similarly situated to be compelled to dispose of our equipment within the time specified in the bill, with practically no prospective purchasers to be had.

The operation of this bill, should it be enacted into law, will work a great injustice upon all retail dealers in meats and farm products; so great, in fact, that many of us will be compelled to close our places of business, while, on the other hand, the public will receive a service less prompt, less efficient, and less satisfactory.

I respectfully request that you carefully investigate this bill, and I am sure that you will recognize its pernicious purpose and will not hesitate to use your vote and influence to secure the defeat of this measure.

Yours, truly,

FRANK BENDA.

—

AVERY CO.,
Grand Forks, N. Dak., August 12, 1919.

Hon. PORTER J. MCCUMBER,
United States Senate, Washington, D. C.

DEAR SIR: I have read a copy of the Kenyon bill (No. 2202) now before the Committee on Agriculture and Forestry of the United States Senate.

In our opinion, the proposed legislation contained therein is extremely radical. If this bill is passed in its present form, it appears to us that eventually it will mean Government ownership, and in view of our past experiences with the railroad, telephone, and telegraph companies, we feel that there is good reason for objection to this bill.

We hope you will use your influence against the passage of legislation of this character.

Yours, respectfully,

AVERY CO.,
CASPER O. OLSON, *Manager.*

—

THE MERCHANTS NATIONAL BANK OF DICKINSON,
Dickinson, N. Dak., August 27, 1919.

Hon. P. J. MCCUMBER,
Washington, D. C.

DEAR SENATOR: Yours of the 18th regarding the Kenyon and Kendrick bills received, and I am much obliged to you for your assistance in this matter, as I feel this is no time for any troubles which things of this kind might bring out.

I feel that the live-stock industry in this part of the country and its upbuilding is due to the packing, cold storage, and refrigerator cars which have been inaugurated by the larger packing industries in the market.

Yours, truly, W. L. RICHARDS.

P. S.—If you think that my presence before this committee on these bills would be of any benefit, I will gladly come.

—

WAHPETON, N. DAK., *August 11, 1919.*

Senator MCCUMBER,
Washington, D. C.

HONORABLE SIR: I respectfully call your attention to the so-called Kenyon bill, S. 2202, which is now before our Congress for consideration, or which will soon be considered by that body.

I wish to enter a protest against the passage of this bill at this time and to ask that you use your best efforts to insure its defeat.

From information gained through a reading of the bill it appears that the purpose of the measure is to place under governmental control all of the various branches of the meat business, both wholesale and retail, entirely upsetting conditions with reference thereto.

I have a large investment at the present time in a retail meat business and have fully equipped myself to meet the demands of the trade in this locality. I am now receiving prompt and efficient service from the larger packing concerns in the matter of all goods ordered from them, and the arrangements which I have made with these concerns is proving very satisfactory both to myself and to my patrons. Further, I have at considerable expense to myself installed the necessary facilities for handling such meats as I slaughter myself, and have complied fully with all laws relating to sanitation and the preservation of meats, etc.

It is apparent that all these conditions will be changed should the proposed bill be enacted into law. Better service will not be had, a better quality of meats will not be given the public, and the service, especially with reference to the refrigerator facilities, will be materially lessened. It will mean a great financial loss to me and to others similarly situated to be compelled to dispose of our equipment within the time specified in the bill, with practically no prospective purchasers to be had.

The operation of this bill, should it be enacted into law, will work a great injustice upon all retail dealers in meats and farm products; so great, in fact, that many of us will be compelled to close our places of business, while, on the other hand, the public will receive a service less prompt, less efficient, and less satisfactory.

I respectfully request that you carefully investigate this bill and I am sure that you will recognize its pernicious purpose and will not hesitate to use your vote and influence to secure the defeat of this measure.

Yours, truly, J. P. DIETZ.

—

BANGS, HAMILTON & BANGS,
Grand Forks, N. Dak., October 20, 1919.

Hon. P. J. MCCUMBER,
United States Senate, Washington, D. C.

DEAR SENATOR: My attention was attracted this day by another scare headline from the Federal Trade Commission anent the packers, and I wondered what the animus.

When men carrying on a reputable business and rendering valuable assistance to the Government in time of war are so assailed as in this case without tangible proof or cause, about the only deduction is either personal pique or deliberate attempt to tear down a Government prop and continuance of the assault after peace, points to personal pique.

Thinking of these things, my mind turned to the so-called Kenyon bill, of which I had intended writing you some time ago.

I do not believe in imposing personal views on legislators when dealing with purely legislative matters, but the matters involved in the Kenyon bill are not confined to questions of commercial policy, neither are they strictly legislative.

The effect of the bill is not limited to packers, but goes to a vital and fundamental principle of government.

It is paternalistic in the extreme, and I can not refrain from raising my voice in protest when our country that has developed beyond all conception in every phase of commercial life on the principle of free competition and individualism is confronted with the deadening blight of paternalism.

The late Justice Brewer once said:

"The paternal theory of government to me is odious. * * * The utmost possible liberty to the individual and the fullest possible protection to him and his property is both the limitation and the duty of government."

The quotation expresses in apt language the views of the great majority of the thinking men of to-day.

I trust you may see your way clear to use your great influence against any such socialistic doctrine as this act imposes.

This particular act of which I am writing is, however, not only paternalistic and socialistic but is in itself decidedly unfair to the business interests toward which it is directed.

The business as now carried on is to be broken up in a claimed effort to protect the public, but in what is in reality an attempt to stifle because of its size.

The continued holding of a license depends upon regulations of the act itself that seem detrimental rather than beneficial, and in addition on regulations to be made by the Secretary of Agriculture, and finally upon the belief of a commissioner of foodstuffs who may not know as much about the packing industry as a lawyer about shipping.

If there were no other questions involved the power vested in the commissioner of foodstuffs is enough to damn the bill. Even the circuit court of appeals can not give relief unless the order of the commissioner is "unsupported by evidence," etc. In other words, the life of a great business depends upon the whim of some political appointee not necessarily even remotely acquainted with the business, apt to be moved by political emotions, whose order is unimpeachable if supported by any evidence.

I have no doubt but that many theorists honestly believe that the public good would be subserved by placing all business, especially if it is large and successful, under strict governmental control.

I have no doubt but that some people feel that the present high cost of living is traceable to the "big business interests," of which we read so much, completely overlooking the cost of labor and increased profit to the producer, two items of increased cost that outrank all the balance.

I have no doubt there are men who really believe that the high cost of living can be reduced by legislation and hope to see a material reduction in their expenses when the packers who now sell at a profit that amounts to less than one-half of 1 cent per pound, dressed meat (and less than 8 per cent on capital), are forced by legislation to reduce that profit.

It seems to me that very little investigation must show the fallacy of their beliefs.

England once tried to regulate the price of practically all foodstuffs by restrictive legislation, but finally repealed the statutes against forestalling, engrossing, and regrating with a preamble reciting, "Whereas it hath been found by experience that the restraints laid by several statutes upon the dealing in corn, meal, flour, cattle, and sundry other sorts of victuals by preventing free trade in said commodities have a tendency to discourage the growth and to enhance the price of the same," etc.

I know how history repeats itself, but let us put off the repetition of the mistakes as long as possible.

The Kenyon bill I consider one of the mistakes and most respectfully urge its defeat.

Sincerely.

TRACY R. BANGS.

—

THE AMENIA AND SHARON LAND CO.,
Amenia, N. Dak., August 16, 1919.

Hon. P. J. MCCUMBER,
United States Senate, Washington, D. C.

DEAR SIR: One of the Swift representatives whom we buy of has been in asking my influence to aid in defeating the Kenyon bill; and while I am not accustomed to meddling in other people's business, it seems to me that there is an important general principle involved here, and I know you like to get as wide an expression of opinion as possible.

I refer to the hampering of these big (and highly efficient and useful) organizations, with a view to facilitating competition by smaller, less efficient, and less useful corporations. Beginning with the Roosevelt régime, we have had a deluge of these bills. Some of them were excellent, in my opinion. However, if you will accept a layman's point of view, I believe that most of them have been propagated not to benefit the public but to please the public. There is a vast difference. Such a bill I consider the Kenyon document.

I am a firm believer in Federal restriction up to a reasonable point. We have seen the results of unrestricted business in our own Standard Oil. We can also see the results of "unrestricted restriction" all about us; for instance, in Russia. Let us admit frankly, though, that

the United States of America owes much of its marvelous industrial acceleration to its big businesses, including the packers and Standard Oil, and let us be reasonable.

Very truly, yours, E. W. CHAFFEE.

Mr. WALSH of Montana. Mr. President, my State is one of the greatest stock-raising States in the Union, and obviously our people are very much interested in the pending measure. The time-rule limit prevents me from entering into any discussion of the reasons which impel me to this belief. The subject has been agitated extensively for years, and very earnest demand has gone out, particularly from the smaller stock raisers, in favor of some kind of Government regulation, at least of the stockyards business.

But I rose particularly to say a word with respect to some objections that have been made touching the constitutionality of the measure. Of course, we have been accustomed to listen to objections upon constitutional grounds to almost every measure which passes outside of the usual line of legislation. I have before me a pamphlet, doubtless sent to every member of the Senate, entitled "Analysis of the bill creating a Federal live-stock commission and a statement on behalf of the packing industry by the Institute of American Meat Packers." The pamphlet raises the question of the constitutionality of the measure, and particularly because of the important provision thereof, which, it seem, is void for uncertainty. I quote as follows:

Section 12 provides that it shall be unlawful for any packer "to engage in any unfair, unjustly discriminatory, or deceptive practice or device in commerce." No definition is given of any of these descriptive words. It is left entirely for the commission to determine according to its judgment, opinion, taste, whim, or caprice what under any given circumstances may constitute a "practice" or "device" of the kind inhibited.

We are all familiar with that line of argument, because it was indulged in without limit and without end in connection with the bill to create the Federal Trade Commission. Indeed, the bill before us in its essential features transfers to a commission to be created by it some of the most important functions of the Federal Trade Commission. The bill provides that it shall be unlawful for any packer "to engage in any unfair, unjustly discriminatory, or deceptive practice or device in commerce, or in any deceptive practice or device to cheat or defraud in commerce," and then provision is made for a hearing as to whether any practices of that character do exist, and for their suppression if they are found to exist.

The real question is exactly the same, so far as the legal aspect is concerned, as that which was presented by the bill for the creation of the Federal Trade Commission. That has been determined past all controversy by two decisions of the circuit court of appeals. It came first before the circuit court of appeals for the seventh circuit in the case of Sears, Roebuck & Co. versus Federal Trade Commission. Decision was rendered, in which all the judges concurred as to that, by Judges Baker, Alschuler, and Carpenter.

I forbear from reading at length from the opinion and content myself with quoting simply from paragraph 3 thereof, as follows:

But such a construction of section 5, according to the petitioner's urge, brings about an unconstitutional delegation of legislative and judicial powers to the commission. Grants of similar authority to administrative officers and bodies have not been found repugnant to the Constitution. (Butterfield *v.* Stranahan, 192 U. S., 470; Union Bridge Co. *v.* United States, 204 U. S., 365; Pennsylvania Railroad Co. *v.* International Coal Co., 230 U. S., 184; National Pole Co. *v.* Chicago & Northwestern Railway Co., 211 Fed., 65.)

Then follows a discussion by the court of the questions involved. I read:

With the increasing complexity of human activities many situations arise where governmental control can be secured only by the "board" or "commission" form of legislation. In such instances Congress declares the public policy, fixes the general principles that are to control, and charges an administrative body with the duty of ascertaining within particular fields from time to time the facts which bring into play the principles established by Congress.

The decision thus rendered by that court was concurred in in the case of the National Harness Manufacturers' Association against the Federal Trade Commission, a decision by the circuit court of appeals for the sixth circuit, Judges Knappen, Denison, and Donahue sitting, all circuit judges, and all concurring in the opinion. I read briefly as follows:

The constitutionality of the act is assailed, first, as assuming "to combine legislative, executive, and judicial powers and functions and to confer them upon one and the same administrative body, contrary to Articles I, II, and III of the Constitution, and because it assumes to authorize the commission, which is ostensibly an administrative body, to deprive persons of their property without due process of law, contrary to the fifth amendment to the Constitution.

This proposition—

The court says—

is, to our minds, without merit. Congress plainly has power—

Plainly has power—

to declare unfair methods of competition unlawful and to require that their practice cease. This Congress has done by the act in question.

The PRESIDING OFFICER (Mr. ROBINSON in the chair). The time of the Senator has expired.

Mr. WALSH of Montana. I ask that both of the opinions to which I have referred may be printed in the RECORD.

The PRESIDING OFFICER. Without objection, leave will be granted. The Chair hears no objection.

The opinions referred to are as follows:

In the United States Circuit Court of Appeals for the Seventh Circuit. No. 2659. October term, 1918, April session, 1919.

Sears, Roebuck & Co., petitioner, *v.* Federal Trade Commission, respondent. Original petition to review order of Federal Trade Commission.

Before Baker and Alschuler, circuit judges, and Carpenter, district judge.

Baker, circuit judge, delivered the opinion of the court:

This is an original petition to review an order entered by the respondent, the Federal Trade Commission, against the petitioner, Sears, Roebuck & Co., a corporation, commanding the petitioner to desist from certain unfair methods of competition in commerce. Respondent's order was based on its complaint, filed on February 26, 1918, on the petitioner's answer, and on a written stipulation of facts. Procedure before the commission and also before this court on review is prescribed in section 5 of the act to create a Federal Trade Commission, approved on September 26, 1914. Respondent's authority over the subject matter of its order is derived from the following provision in the same section: "Unfair methods of competition in commerce are hereby declared unlawful." Section 4 is a dictionary of terms used in the act. "Commerce" means interstate or foreign commerce; but the general term, "unfair methods of competition," is nowhere defined specifically, nor is there a schedule of methods that shall be deemed unfair.

In its complaint respondent averred that petitioner is engaged in interstate and foreign commerce, conducting a "mail-order" business; that petitioner for more than two years last past has practiced unfair methods of competition in commerce by false and misleading advertisements and acts, designed to injure and discredit its competitors and to deceive the general public, in the following ways:

1. By advertising that petitioner, because of large purchases of sugar and quick disposal of stock, is able to sell sugar at a price lower than others offering sugar for sale.

2. By advertising that petitioner is selling its sugar at a price much lower than that of its competitors and thereby imputing to its competitors the purpose of charging more than a fair price for their sugar.

3. By selling certain of its merchandise at less than cost on the condition that the customer simultaneously purchase other merchandise at prices which give petitioner a profit on the transaction, without letting the customer know the facts.

4. By advertising that the quality of merchandise sold by its competitors is inferior to that of similar merchandise sold by petitioner, and that petitioner buys certain of its merchandise in markets not accessible to its competitors and is therefore able to give better advantages in quality and price than those offered by its competitors.

Petitioner extensively circulated the following advertisements, among others:

"We can afford to give this guaranty of a 'less than wholesale price' because we are among the largest distributors of sugar, wholesale or retail, in the world. We sell every year 35,000,000 pounds of sugar. And buying in such vast quantities, and buying directly from the refineries, we naturally get our sugar for less money than other dealers.

"For instance, every grocer carries granulated sugar in stock, but does he tell you which kind? There are two kinds—granulated cane sugar and granulated beet sugar—and they look exactly alike. Some people prefer the one and some the other. But beet sugar usually costs less than cane sugar, so if you are getting beet sugar you should pay less for it. Do you know which kind you are getting and which you are paying for?

"Our teas have a pronounced, yet delicate, tea flavor, with an appealing fragrance, because we spare neither time nor expense to get the very best the greatest tea gardens of the world can produce.

"First, because of the difficulty of getting in this country the exact character and flavor of certain teas, we do our own importing and critically test every tea. Our representative goes to the various tea-growing countries and makes the selection in person. Then the greatest care is taken to get only first-crop pickings from upland soil.

"Also, by buying direct from the tea gardens, while the crops are being harvested, we are able to have them always perfectly fresh.

"It would be natural for you to conclude that all this care in buying and selecting would make our teas very high in price, but in reality our prices are unusually low for such high quality. Here is a reason: By buying direct from the tea gardens we cut out the middle-man's profit.

"Over land and sea, from the greatest coffee regions in the world, we bring you the choicest of the crop, and make it possible for you to have that fresh, savory, and fragrantly tempting cup of coffee for your breakfast. You see, we buy direct from the best plantations in the world. We get the pick of the crop—upland coffees from rich, healthy soil and growers of unquestioned experience and skill. We buy enormous quantities and pay cash, thus making it possible to offer our customers the very best coffees at very low prices."

Petitioner's sales of sugar during the second half of 1915 amounted to $780,000, on which it lost $196,000. Petitioner used sugar as a "leader" ("You save 2 to 4 cents on every pound"), offering a limited amount at the losing price in connection with a required purchase of other commodities at prices high enough to afford petitioner a satisfactory profit on the transaction as a whole, without letting the customer know that the sugar was being sold on any other basis than that of the other commodities. Petitioner obtained its sugar in the open market from refiners and wholesalers. Competitors got their sugar from the same sources, of the same quality, and at the same price. Sugar is a staple in the market. Price concessions upon large purchases are unobtainable. From the facts respecting petitioner's methods of advertising and buying and selling sugar respondent found, and properly so in our judgment, that petitioner intentionally injured and discredited its competitors by falsely leading the public to believe

that the competitors were unfair dealers in sugar and the other commodities which petitioner was offering in connection with sugar.

Petitioner purchased 75 per cent of its teas from wholesalers and importers in the United States. The remainder it purchased through its representative Peterson in Japan; but there was no proof that Peterson made or was qualified to make "selections in person" or "first-crop pickings from upland soil." All of petitioner's coffees were purchased from wholesalers and importers in the United States. Respondent found that petitioner's advertisements of teas and coffees were false and designed to deceive the public and injure competitors.

By the order, issued on June 24, 1918, petitioner was commanded to desist from:

"(1) Circulating throughout the States and Territories of the United States and the District of Columbia catalogues containing advertisements offering for sale sugar, wherein it is falsely represented to its customers or prospective customers of said defendant or to customers of competitors or to the public generally, or leads them to believe, that because of large purchasing power and quick-moving stock, defendant is able to sell sugar at a price lower than its competitors.

"(2) Selling, or offering to sell, sugar below cost through catalogues circulated throughout the States and Territories of the United States and the District of Columbia among its customers, prospective customers, and customers of its competitors.

"(3) Circulating throughout the various States and Territories of the United States and the District of Columbia, among customers, prospective customers, and customers of its competitors, catalogues containing advertisements representing that defendant's competitors do not deal justly, fairly, and honestly with their customers.

"(4) Circulating throughout the various States and Territories of the United States and the District of Columbia, among customers, prospective customers, or customers of its competitors, catalogues containing advertisements offering for sale its teas, in which said advertisements it falsely stated that the defendant sends a special representative to Japan who personally goes into the tea gardens of said country and personally supervises the picking of such teas.

"(5) Circulating through the various States and Territories of the United States and the District of Columbia, among customers, prospective customers, or customers of its competitors, catalogues containing advertisements offering for sale its coffees, in which it falsely stated that the defendant purchases all of its coffees direct from the best plantations in the world."

I. Petitioner insists that the injunctional order was improvidently issued because, before the complaint was filed and the hearing had, petitioner had discontinued the methods in question and, as stated in its answer, had no intention of resuming them. For example, no sugar offers of the character assailed were made after August, 1917. But respondent was required to find from all the evidence before it what was the real nature of petitioner's attitude. It was permissible for respondent to take judicial notice of the Government's war-time control of sugar sales and consumption. It was also proper to note that petitioner was contending (and still contends) that the act is void for indefiniteness, that the act is unconstitutional, and that the act, even if valid, under any proper construction has not been infringed by petitioner's practices. In Goshen Manufacturing Co. *v.* Myers Manufacturing Co. (242 U. S., 202), which was a suit for infringement of a patent, the defendant company averred and introduced evidence to prove that six months before the bill was filed and with notice to complainant it had sold its factory, wound up its business, and had no intention of resuming. But throughout the intervening period and also in the answer to the bill the defendant company was attacking the validity of the patent and the right of the complainant to compel desistance. This conduct was held to be such a continuing menace as to justify the maintenance of the bill. So here, no assurance is in sight that petitioner, if it could shake respondent's hand from its shoulder, would not continue its former course.

II. Petitioner urges that the declaration of section 5 must be held void for indefiniteness unless the words "unfair methods of competition" be construed to embrace no more than acts which on September 26, 1914, when Congress spoke, were identifiable as acts of unfair trade then condemned by the common law as expressed in prior cases. But the phrase is no more indefinite than "due process of law." The general idea of that phrase as it appears in constitutions and statutes is quite well known; but we have never encountered what purported to be an all-embracing schedule or found a specific definition that would bar the continuing processes of judicial inclusion and exclusion based upon accumulating experience. If the expression "unfair methods of competition" is too uncertain for use, then under the same condemnation would fall the innumerable statutes which predicate rights and prohibitions upon "unsound mind," "undue influence," "unfaithfulness," "unfair use," "unfit for cultivation," "unreasonable rate," "unjust discrimination," and the like. This statute is remedial, and orders to desist are civil, but even in criminal law convictions are upheld on statutory prohibitions of "rebates or concessions" or of "schemes to defraud," without any schedule of acts or specific definition of forbidden conduct, thus leaving the courts free to condemn new and ingenious ways that were unknown when the statutes were enacted. Why? Because the general ideas of "dishonesty" and "fraud" are so well, widely, and uniformly understood that the general term "rebates or concessions" and "schemes to defraud" are sufficiently accurate measures of conduct.

On the face of this statute the legislative intent is apparent. The commissioners are not required to aver and prove that any competitor has been damaged or that any purchaser has been deceived. The commissioners, representing the Government as parens patriae, are to exercise their common sense, as informed by their knowledge of the general idea of unfair trade at common law, and stop all those trade practices that have a capacity or a tendency to injure competitors directly or through deception of purchasers, quite irrespective of whether the specific practices in question have yet been denounced in common-law cases. But the restraining order of the commissioners is merely provisional. The trader is entitled to his day in court, and there the same principles and tests that have been applied under the common law or under statutes of the kinds hereinbefore recited are expected by Congress to control. This prima facie reading of legislative intent is confirmed by reference to committee reports and debates in Congress, wherein is disclosed a refusal to limit the commission and the courts to a prescribed list of specific acts. (CONGRESSIONAL RECORD, 63d Cong., 2d sess., pp. 13, 18, 533, 12246.) And this interpretation is not affected by the subsequent adoption of the Clayton Act, October 15, 1914, condemning certain specific acts.

III. But such a construction of section 5, according to petitioner's urge, brings about an unconstitutional delegation of legislative and judicial power to the commission. Grants of similar authority to administrative officers and bodies have not been found repugnant to the Constitution. Butterfield *v.* Stranahan (192 U. S., 470); Union Bridge Co. *v.* United States (204 U. S., 365); Pennsylvania Railroad Co. *v.* International Coal Co. (230 U. S., 184); National Pole Co. *v.* Chicago & North Western Railway Co. (211 Fed., 65).

With the increasing complexity of human activities many situations arise where governmental control can be secured only by the "board" or "commission" form of legislation. In such instances Congress declares the public policy fixes the general principles that are to control, and charges an administrative body with the duty of ascertaining within particular fields from time to time the facts which bring into play the principles established by Congress. Though the action of the commission in finding the facts and declaring them to be specific offenses of the character embraced within the general definition by Congress may be deemed to be quasi legislative, it is so only in the sense that it converts the actual legislation from a static into a dynamic condition. But the converter is not the electricity. And though the action of the commission in ordering desistance may be counted quasi judicial on account of its form, with respect to power it is not judicial, because determination is only that which is embodied in a judgment or decree of a court and enforceable by execution or other writ of the court.

IV. In the second paragraph of the order petitioner is commanded to cease selling sugar below cost. We find in the statute no intent on the part of Congress, even if it has the power, to restrain an owner of property from selling it at any price that is acceptable to him or from giving it away. But manifestly in making such a sale or gift the owner may put forward representations and commit acts which have a capacity or a tendency to injure or to discredit competitors and to deceive purchasers as to the real character of the transaction. That paragraph should therefore be modified by adding to it "by means of or in connection with the representations prohibited in the first paragraph of this order, or similar representation."

Sufficient appears in this record and in the presentation of the case to warrant us in expressing the belief that petitioner's business standards were at least as high as those generally prevailing in the commercial world at the times in question, and that the action of the commission is to be taken rather as a general illustration of the better methods required for the future than a specific selection of petitioner of reproof on account of its conduct in the past.

Respondent is directed to modify its order as above stated; and in other respects the petition is—

Denied.

By Alschuler, Cir. J.:

In my judgment the order of the commission should be further modified by striking out the third paragraph, which relates to alleged representation that petitioner's competitors do not deal fairly and honestly with their customers. In so far as the sugar, coffee, and tea advertisements ascribe petitioner's asserted lower prices and superior qualities to quantity purchases and special facilities and advantages for inspection, selection, and purchasing, they would tend to negative any imputation upon competitors of unfair dealing with their patrons. I believe the charge of imputing to competitors unfair dealing with their patrons rests wholly on petitioner's so-called "Caveat Emptor" advertisement in its catalogue of March and April, 1916, wherein the public is cautioned in regard to white sugar, stating that some is cane and some beet sugar, alike in appearance, but the former usually higher in price; that petitioner plainly designates which of the two it offers, and the query is suggested, where else are goods so plainly described, and whether the customer gets elsewhere what he thinks he is buying. It seems to me that this does not amount to more than a statement or boast that petitioner, without being asked, describes the white sugars it proposes to sell, and the intimation is carried that competitors do not volunteer such description, but it is not suggested that they actually misrepresent the truth.

The facts before the commission appear by stipulation, and those concerning this advertisement, aside from the advertisement itself, are as follows:

"When Mr. A. M. Daly, the attorney in charge of the investigation in these proceedings, was in Chicago, in March, 1916, he submitted to Mr. A. V. H. Mory, chief chemist of Sears, Roebuck & Co., and Mr. Joseph Scott, manager of the grocery department, a copy of the advertisement entitled 'Caveat Emptor' hereinbefore mentioned, and hereto attached, and requested them to state their views as to this particular advertisement and what it meant. They stated that this advertisement was for the purpose of calling attention to the distinction between beet sugar and cane sugar and laying stress upon the point of the facilities that Sears, Roebuck & Co. have for marking everything plainly so that the customer would know better from description the exact nature of what he was buying. After this explanation, Mr. Daly went to his hotel. In a short time Mr. Mory called on him there and stated, in substance, that he had submitted the above-mentioned advertisement to Mr. A. H. Loeb, the vice president of Sears, Roebuck & Co., and that Mr. Loeb said that this course of advertising was unfair and unjust, and declared that it must be discontinued, and further that it was against the policy of the house to send out such advertisements. Thereupon, on March 28, 1916, Mr. A. V. H. Mory, chief chemist, wrote to the commission in part as follows: 'The young man who wrote this was in to-day, and I pointed out to him wherein he had made a mistake and acted against house policy. He promised to use the soft pedal on all references to the dealer in the future. He tells me that this is an angle that had not occurred to him. He had not thought of the write up in the light of a criticism of the dealer, so intent was he on pointing out that with our system of marking everything plainly and our facilities for knowing what we are selling, the customer would know better from our description the exact nature of what he was buying in the case of those things difficult to judge than if he had them placed before him—which, of course, is true.'"

But assuming, as did petitioner's vice president, that this advertisement does carry the imputation that competitors deal unfairly with their customers, under the circumstances indicated by the quotation, ought this advertisement to be the basis of a finding and order? The publication was in the catalogue for March and April, 1916. The complaint was filed nearly two years afterwards. The act authorizes the commission to proceed when it shall have reason to believe that unfair methods of competition are or have been used, "and if it shall appear to the commission that a proceeding by it in respect thereof would be of interest to the public." In a monitory proceeding such

as this seems to be it could hardly be said that it would be "of interest to the public" to predicate action on a transgression for which due amends had long before been made without remotest cause to believe there would be a repetition. To revive a stale advertisement of this nature which the advertiser immediately after the publication distinctly disavowed as having been unintentionally and inadvertently unfair to competitors, and ordered discontinued, without directly or indirectly repeating or renewing it for so long an interval, far from subserving the public interest, might, in my judgment, have the contraty tendency of raising an imputation of oppressive, or at least uncalled-for action, in predicating any proceeding or order on this advertisement.

Nor am I impressed with the authoritative relevancy here of decisions respecting injunctions. In a proceeding such as this, neither remedial nor punitive, decisions of courts respecting injunctional relief in equity are not more analogous than are common-law decisions defining unfair trade practices, arising out of controversies between individuals, as fixing thereby the limitation of the commission's authority or scope.

The suggested modification would necessitate corresponding modification of the commission's findings of facts, eliminating paragraphs Nos. 4 and 5 thereof. Paragraphs 2, 6, and 7 (as well as paragraphs 4 and 5) of the findings state the circulation of the several advertisements to have been in each case for "more than two years last past," indicating thereby the two years next before the date of the findings, which is June 24, 1918. This is in contravention of the stipulated fact that none of the advertisements were more recent than August, 1917—some of them even antedating the passage, September 24, 1914, of the Trade Commission act itself. These findings should, in my judgment, be modified to comply with the stipulated fact.

A true copy.

Teste:

Clerk of the United States Circuit Court of Appeals for the Seventh Circuit.

United States Circuit Court of Appeals, Sixth Circuit. No. 3289.

National Harness Manufacturers' Association of the United States of America, appellant, *v.* Federal Trade Commission of the United States of America, William P. Colver, John Franklin Fort, and Victor Murdock, Commissioners of the Federal Trade Commission of America, appellees. Petition to set aside order of the Federal Trade Commission.

Submitted November 8, 1920.

Decided December 7, 1920.

Before Knappen, Denison, and Donahue, circuit judges.

KNAPPEN, *Circuit Judge:*

Original petition under section 5 of the Federal Trade Commission act (Sept. 26, 1914, C. 311; U. S. Comp. Stat. 1916, secs. 8836 a, et seq.) to review an order of the commission requiring petitioner and its corespondents to cease and desist from certain alleged unfair methods of competition in interstate commerce.

The proceeding was brought against both petitioner, the National Harness Manufacturers' Association of the United States of America (hereinafter called the Harness Manufacturers' Association or the petitioner), its officers and the members of its executive committee by name, as well as about 20 local associations composing the membership of the Harness Manufacturers' Association, and the Wholesale Saddlery Association of the United States (hereinafter called the Saddlery Association), its officers and the members of its executive committee by name, and a large number of named persons, firms, or corporations composing the membership of that association. The order to cease and desist included both associations. The Saddlery Association asks no review of the commission's order.

The petitioner here assails that order on the grounds, first, that the Federal Trade Commission act is unconstitutional; second, that the commission had no jurisdiction in this particular case; and, third, that the order to cease and desist is not supported by the evidence.

1. The constitutionality of the act is assailed, first, as assuming "to combine legislative, executive, and judicial powers and functions and to confer them upon one and the same administrative body, contrary to Articles I, II, and III of the Constitution, and because it assumes to authorize the commission, which is ostensibly an administrative body, to deprive persons of their property without due process of law, contrary to the fifth amendment of the Constitution."

This proposition is to our minds without merit. Congress plainly has power to declare unfair methods of competition unlawful and to require that their practice cease. This Congress has done by the act in question. It with equal clearness has the power to authorize an administrative commission to determine (*a*) the question what methods of competition the given trader employs, and (*b*) provisionally the mixed question of law and fact whether such methods are unfair. These questions being determined against the trader, the administrative requirement to cease and desist prescribed by Congress follows as matter of course, but only provisionally. The commission's determination of these questions is not final. Not only does the statute give a right of review thereon upon application by an aggrieved trader to a circuit court of appeals of the United States, but the commission's order is not enforceable by the commission, but only by order of court. "It is for the courts, not the commission, ultimately to determine as matter of law" what the words "unfair methods of competition" include. (Federal Trade Commission *v.* Gratz, 40 Sup. Ct. Rep., 572, 575.) Throughout the proceedings, not only before the commission but before the court, the trader is given the right and opportunity to be heard. The act delegates to the commission no judicial powers, nor does it, in our opinion, confer invalid executive or administrative authority. (Buttfield *v.* Stranahan, 192 U. S. 470; Union Bridge Co. *v.* United States, 204 U. S. 364; Pennsylvania Railroad *v.* International Coal Co., 230 U. S., 184; Coopersville Co. *v.* Lemon, C. C. A., 6, 163 Fed., 145, 147, et seq.; National Coal Co. *v.* C. & N. W. Ry. Co., C. C. A., 7, 211 Fed. 65.) The criticism that the statute makes the commission both judge and prosecutor is too unsubstantial to justify discussion. The constitutionality of the act, against objections similar to those presented here, has recently been sustained by the Circuit Court of Appeals of the Seventh Circuit in a considered and persuasive opinion. (Sears, Roebuck & Co. *v.* Federal Trade Commission, 258 Fed., 307.) None of the petitioner's citations contain, in our opinion, anything necessarily opposed thereto. Upon this record we have no occasion to consider the construction or effect of the provision of the act which makes conclusive, if supported by testimony, the commission's findings as to facts as distinguished from conclusions of law, or of mixed fact and law. In saying so, however, we must not be understood to intimate that the provision referred to is invalid. (See the discussion in Buttfield *v.* Stranahan, supra, at pp. 494 et seq.; also in Union Bridge Co. *v.* United States, supra, at pp. 377–387; also in Coopersville Co. *v.* Lemon, supra, at pp. 147 et seq.)

The act is also assailed as violating the fourth amendment to the Federal Constitution, which protects against "unreasonable searches and seizures," which petitioner asserts are provided for by the so-called inquisitorial feature of section 9, in the declaration that "for the purposes of this act the commission, or its duly authorized agent or agents, shall at all reasonable times have access to, for the purpose of examination, and the right to copy any documentary evidence of any corporation being investigated or proceeded against"; a provision whose enforcement is provided for by section 10, which subjects any person to fine or imprisonment, or both, "who shall willfully refuse to submit to the commission or to any of its authorized agents, for the purpose of inspection and taking copies, any documentary evidence of such corporation in his possession or within his control."

Of this criticism it is enough to say that the provisions in question of sections 9 and 10 are not before this court. The commission has not attempted to exercise them. Section 9 otherwise contains complete provision for enforcing, by subpœna, the attendance and testimony of witnesses and the production of all documentary evidence relating to any matter under investigation. Beyond this the commission has not gone. That one attacking a statute as unconstitutional must show that the alleged unconstitutional feature injures him is settled by a long line of authorities, among which are Tyler *v.* Judges (179 U. S., 405, 409); Turpin *v.* Lemon (187 U. S., 51, 60, 61); Hooker *v.* Burr (194 U. S., 415, 419).

2. By section 5 of the Federal Trade Commission act the commission is given jurisdiction when it has reason to believe that "any person, partnership, or corporation has been or is using any unfair methods of competition in commerce, and if it shall appear to the commission that a proceeding by it in respect thereof would be to the interest of the public." Section 4 of the act defines a corporation as "any company or association, incorporated or unincorporated," which either (a) is organized to carry on business for profit and has shares of capital or capital stock, or (b) is "without shares of capital or capital stock, except partnerships, which is organized to carry on business for its own profit or that of its members." The Harness Manufacturers' Association is a voluntary, unincorporated association and thus without capital stock. It is not itself engaged in business. Petitioner contends that it therefore is not within the act. But this contention overlooks the fact that the association is not the only one proceeded against; but that its officers and the members of its executive committee, as well as its membership generally, are included in the proceedings as parties and made subject to the commission's order. The language of the act affords no support for the thought that individuals, partnerships, and corporations can escape restraint, under the act, from combining in the use of unfair methods of competition, merely because they employ as a medium therefor an unincorporated, voluntary association, without capital and not itself engaged in commercial business. The order may be enforced by reaching the officers and members, personally and individually. A voluntary association, having many members, may be brought into court by service on its officers and such of its members as are known and can be conveniently reached, sufficient being served to represent all the diverse interests. Evanson *v.* Spalding (C. C. A., 9; 150 Fed. 517). Among the cases under the antitrust act which have enforced the liability of individual members for acts in violation of the statute, although done through a voluntary, unincorporated association, are Loewe *v.* Lawlor (208 U. S., 274); Dowd *v.* United Mine Workers of America (C. C. A., 8; 235 Fed., 1, 5, 6); and (apparently) Eastern States Lumber Co. *v.* United States (234 U. S., 600). These cases we think present a satisfactory analogy to the instant case.

The contention that the Harness Manufacturers' Association is not engaged in commerce is answered by the consideration, first, that many of its members are so engaged, and, second, that interstate commerce is claimed to have been directly affected by the alleged unfair methods of competition. Loewe *v.* Lawlor, supra; Eastern States Lumber Co. *v.* United States, supra; Nash *v.* United States (229 U. S., 373, 379). The objection that the public is not interested in the activities of the association is answered by the fact that if the commission's findings are to be accepted, trade conditions in the harness and saddlery trade have been substantially affected by the methods of competition in question. This subject will more fully appear by consideration of the nature and effect of the commission's findings.

3. The harness and saddlery trade consists broadly of three divisions: (a) Manufacturers of saddlery hardware, harness goods, and horse furnishing goods; (b) wholesalers and jobbers who buy the last-mentioned classes of goods from the manufacturers and themselves manufacture harness in wholesale quantities, selling both classes of products to the retailer; (c) retail harness dealers who sell saddlery goods at retail and to a small extent manufacture harness.

The commission's findings of fact, so far as now important, may be thus summarized: Prior to the organization of the Saddlery Association it was the general custom for accessory manufacturers to sell direct to retailers; and in large and important sections of the United States the wholesale and retail saddlery business has long been conducted as one operation. The Harness Manufacturers' Association is a voluntary, unincorporated association, its membership being composed largely of city and district associations in various cities throughout the States of the Union, the membership of these associations being composed of concerns engaged in manufacturing and selling harness and saddlery goods at retail, and who purchase their supplies of harness and saddlery goods largely from wholesalers and jobbers in interstate commerce, including members of the Saddlery Association. The membership of the Saddlery Association, which comprised the greater part of the wholesale saddlery trade of the United States, consisted of persons and concerns engaged in selling at wholesale harness and saddlery goods in interstate commerce throughout the various States and Territories of the United States to retail dealers, both members and nonmembers of the Harness Manufacturers' Association, and in direct competition with other persons or organizations similarly engaged, its declared policy being (at variance with the condition above set forth) to promote a system of trade by which the manufacturers should sell to jobbers only, the jobbers to the retailers only, and the retailers alone direct to consumers; that the Saddlery Association accordingly adopted and established a rule that concerns doing a combined and closely affiliated

wholesale and retail business were not eligible to new admission into the Saddlery Association (although some of its old members were still, in various parts of the United States, doing a combined wholesale and retail business), as well as a policy that such concerns were not entitled to recognition as legitimate jobbers, and that the adoption of such rule and policy were brought about in part by the influence and pressure, and in response to the overtures, of the Harness Manufacturers' Association.

The commission further found that the officers, committees, and members of the Harness Manufacturers' Association and of the Saddlery Association have actively cooperated to establish the principle that a combined and closely affiliated wholesale and retail business was not a legitimate wholesale business (it is to be noted that one of the objects of the Harness Manufacturers' Association, as stated in its constitution and by-laws, is "to protect the harness dealers from the unjust sale of goods by wholesale dealers direct to consumers"); that the secretary of the Saddlery Association has attempted to prevent accessory manufacturers from recognizing as legitimate jobbers wholesalers whose names were furnished by the Harness Manufacturers' Association to the Saddlery Association, as complained of by retailers, for competing with them; and that the Harness Manufacturers' Association has used its influence with the Saddlery Association to prevent the admission of specific concerns to membership in the latter association and the recognition of such concerns as legitimate jobbers. The commission further found that the Harness Manufacturers' Association has requested and secured the cooperation of members of the Saddlery Association in a refusal to sell to mail-order houses, hardware stores, general stores, and other competitors of retail harness manufacturers not recognized by the Harness Manufacturers' Association as legitimate; that the latter has refused the privilege of associate membership to accessory manufacturers and jobbers who sell to mail-order houses, establishing, however, an associate membership restricted to manufacturers and jobbers who do not sell to consumers and to mail-order houses, and who are otherwise in harmony with the policy of the association, and issuing credentials thereof to the traveling salesmen of associate members and urging and encouraging the affiliated retailers to withdraw and withhold patronage from concerns whose salesmen were not so equipped; and have induced the members of the Saddlery Association to use their influence with the accessory manufacturers not to sell to mail-order houses; and that by reason of refusals of accessory manufacturers, due to objections of the Saddlery Association, to recognize as jobbers certain competitors of members of that association, such competitors have been forced to buy from the Saddlery Association at prices higher than charged by manufacturers to recognized jobbers. The commission further found that, as a result of the opposition of the Harness Manufacturers' Association to sales by manufacturers and jobbers to the classes of competitors before mentioned, the latter had been prevented from purchasing as freely in interstate commerce as they would have been without such opposition. The findings detail many instances of specific means used to accomplish the various classes of alleged unfair methods of competition, and which we deem it unnecessary to set out.

Both the Saddlery and Harness Manufacturers' Association, its officers, committees, and members of its subsidiary and affiliated associations, were ordered to cease and desist from conspiring or combining between themselves to induce, coerce, and compel accessory manufacturers to refuse to recognize as legitimate jobbers, entitled to buy from manufacturers at jobbers' prices and terms, individuals and concerns doing or endeavoring to do a combined and closely affiliated wholesale and retail business, and from carrying on between themselves communications having the purpose, tendency, and effect of so inducing, coercing, and compelling accessory manufacturers in the respect above referred to.

The Harness Manufacturers' Association, its officers, committees, and members of its subsidiary and affiliated associations, were ordered to cease and desist from (a) conspiring or combining among themselves to induce, coerce, and compel manufacturers and jobbers to refuse to sell to any of the competitors of retail harness manufacturers; (b) using any scheme whereby the active membership of the Harness Manufacturers' Association concerted to favor with or confine their patronage to manufacturers and jobbers comprising the associate membership of that association, or who had not complied with its active membership by selling to certain competitors thereof; (c) using or continuing any system of credentials or other indication of manufacturers' and jobbers' sales policies with regard to certain competitors and consumers, and from encouraging and urging retailers to confine their patronage to or to patronize manufacturers and jobbers whose sales policy is in harmony with the Harness Manufacturers' Association's requirements as before set out; (d) inducing members of the Saddlery Association to use their influence with accessory manufacturers not to sell to mail-order houses or other competitors of retail harness manufacturers.

In our opinion, the commission's finding of fact and the existence of the combinations, schemes, and practices directed to be discontinued are amply sustained either by undisputed testimony or by the great preponderance of the evidence. This conclusion is not overcome by petitioner's criticisms addressed to specific features of the testimony. The findings of fact being so supported, the commission's order is, in our opinion, fully justified by the authorities to which attention has been already called, including especially Eastern States Lumber Co. *v.* United States, supra, where a state of facts quite similar to that found here was held to amount to a violation of the Sherman Antitrust Act.

In view of what has appeared, the criticism of lack of public injury is without force. The suggestion that no damage has been shown, even if true in fact, is answered by the consideration that the remedy afforded by the statute is preventive, not compensatory.

The order of the commission, so far as it relates to the Harness Manufacturers' Association, its officers, committees, and the members of its subsidiary and affiliated associations, is affirmed.

Mr. WARREN. Mr. President, I do not intend to occupy the time of the Senate further than to say that I shall vote against the bill now under consideration. I shall ask the Secretary to read in my time a telegram which I have received from the secretary of state of Wyoming, reciting a resolution adopted by the legislature of that State.

The PRESIDING OFFICER. The Secretary will read as requested.

The Assistant Secretary read as follows:

CHEYENNE, WYO., *January 22, 1921.*

Hon. F. E. WARREN,
United States Senate, Washington, D. C.:

I am forwarding to-night to you, Senator KENDRICK, and Mr. MONDELL, and to committee chairmen certified copy of following memorial:

House joint memorial No. 2.

Be it resolved by the House of Representatives of the State of Wyoming (the Senate concurring), That the Senate of the United States be memorialized as follows:

Whereas on January 24, 1921, 4 p. m., the Senate of the National Congress will by special order vote on the Gronna bill, which provides for the control of the packing and meat-producing industry through a live-stock commission clothed with power to make rules and regulations, said commission to be appointed by Federal Government: And therefore be it

Resolved, That we respectfully urge your honorable body that you give the said Gronna bill the most serious consideration, as it may relate to all of those industries which are directly affected by legislation which is aimed at the packing industry at a time when our business conditions are in a state of unparalleled disturbance and distress; and be it further

Resolved, That a certified copy of this joint memorial be sent to each of the members of the Wyoming delegation in our National Congress and to the chairmen of the Senate and House committees which have this bill under consideration.

FRANK E. LUCAS,
Vice President of the Senate.
L. R. EWART,
Speaker of the House.

Mr. KENYON. Mr. President, I should like to ask the senior Senator from Wyoming what was the vote on that resolution in the house and senate of the Wyoming Legislature?

Mr. WARREN. I will say to the Senator from Iowa that I have not the faintest idea, because the telegram is the only evidence I have. This telegram was unsolicited and unexpected, and was received an hour and a half or, perhaps, two hours ago. It simply says that it is a house resolution which was concurred in by the senate.

Mr. KENYON. I think I know what the vote was, and I think I know how it came about and the purposes of it. There are some 16 stockmen in the lower house of the Wyoming Legislature. I understand nearly all of them opposed the resolution. There are nine stockmen in the Wyoming senate. There were nine votes against the resolution in the senate. I do not say that they were the nine votes of the stockmen—I do not know—but it is a coincidence. Just how many bankers, if any, holding Swift stock voted for it I do not know. I do know that there went from the El Paso convention a representative of the Swift interests to the State of Wyoming, and he has been in charge of this matter.

Mr. WARREN. Will the Senator permit me to interrupt him?

Mr. KENYON. Yes, sir.

Mr. WARREN. The Senator states that there are 16 stockmen in the lower house of the Legislature of Wyoming. I am very proud of that fact. Does the Senator from Iowa assume that those 16 all voted together, either yes or no?

Mr. KENYON. I do not say that. I said most of them voted against the resolution, as I am informed.

Mr. WARREN. The Senator from Iowa seems to be in some doubt as to how many bankers there are in the Wyoming Legislature. I will ask him what his information is as to the number of bankers in that legislature?

Mr. KENYON. I have no information on that subject, but I hope when the members of the legislature get back home the folks will find out about it, and I think they will. I think the action was designed to injure the junior Senator from Wyoming [Mr. KENDRICK], but it will fail.

Mr. WARREN. Will the Senator allow me to say if there are bankers in the Legislature of Wyoming I do not happen to know how many, if any. I have had no correspondence other than that which has come to me officially, and I am assuming that if the Senator knows more about the Legislature of Wyoming than I do, of course, he will assume the responsibility of making the statement.

Mr. KENYON. I assume no responsibility for the statement about the bankers; it may not be correct. I have been informed as to the stockmen; and I do assume responsibility for the statement that an agent of Swift & Co. went to Wyoming from the El Paso convention. Of course it is an attempt to injure the junior Senator from Wyoming. I think he is above any slurs—I do not mean on the part of the senior Senator.

Mr. WARREN. I wish the Senator would distinctly disavow——

Mr. KENYON. I do.

Mr. WARREN. Or avow that statement, if he applies it to me in any manner.

Mr. KENYON. I do not apply it to the senior Senator from Wyoming at all.

Mr. WARREN. No.

UMI

Mr. KENYON. But it simply illustrates the methods and the power of this gigantic monopoly, which cares nothing for law, which cares nothing for courts, and is able to swing entire legislatures of States and join with it in this instance the Republican majority in the Legislature of Wyoming. It is a piece of cheap politics to injure the junior Senator from Wyoming.

In this connection, that Senator has been slurred on this floor as trying to legislate for his own interest in a manner, I think, that his friends have a right to resent. I have been glad to make this fight with him in a gentlemanly way. We have not been engaged in the slurring business. The junior Senator from Wyoming has been standing for the stockmen whom he knows; he has not been legislating for himself. A more honest and faithful servant of the people never sat in this Chamber than is the junior Senator from Wyoming. There will not be much accomplished by the Legislature of Wyoming if they are trying to discredit him, but it will arouse the folks back home, who are beginning to understand the packers' tactics, who are beginning to understand the propaganda that they spread from every source, even swinging legislatures.

Mr. WARREN. Will the Senator from Iowa again yield?

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Wyoming?

Mr. KENYON. I yield.

Mr. WARREN. I wish to say that I know personally a great many members of the Wyoming Legislature, and I desire further to say as to my colleague [Mr. KENDRICK] that his reputation in my State is such that no legislature that has ever assembled would undertake to discredit his character for political or other purposes, because he is known to be a man selected by a large majority to represent the State without regard to politics. He is serving here to the best of his ability. This legislation he believes to be right; I have other views. He understands that, and I understand his views. However, I do not relish at all the idea advanced here by anyone, even by my good friend from Iowa, that the Legislature of Wyoming, whatever may be the Senator's opinion of the Legislature of Iowa, can be traduced, bought, or brought by Mr. Swift or anybody else into committing an act such as the Senator is assuming they have committed.

Mr. KENYON. The Legislature of Wyoming apparently is the one legislature in the United States that has been moved to such action, and it is very strange, in view of the prominent position of the junior Senator from Wyoming in this legislation and the known presence of a Swift agent at Cheyenne.

In this connection I ask to have printed in the RECORD as part of my remarks an editorial from the El Paso Times with reference to the junior Senator from Wyoming.

The PRESIDING OFFICER. Without objection, leave will be granted. The Chair hears no objection.

The editorial referred to is as follows:

[From the El Paso Times of Friday, Jan. 14, 1921.]

CASE OF THE CATTLEMEN.

The speech of Senator JOHN B. KENDRICK, of Wyoming, president of the American National Livestock Association, at the opening of the organization's annual convention at El Paso, was in many respects a notable effort—the effort of a man of seasoned experience and common sense, who thoroughly understood his subject.

True, he painted a rather dark picture of the past trials and present plight of the live-stock industry, but it was the picture of a man who faced facts and saw them in their proper perspective. There was no deepening of shadows and touching up of high lights for the sake of contrast.

He made a strong case for the live-stock grower, but it was not the case of a special pleader. His brief was sound in logic and immaculate in fact—the brief of a man who understood conditions, appreciated their causes, and accurately gauged their effect. One was especially struck by the lack of playing to the gallery. There was no flapdoodle about "plotting of the interests."

Calmly and dispassionately he reviewed the recent troubles of the cattlemen, beginning with drought and culminating in the after-the-war depression. Without malice he presented the facts regarding the evils of the present marketing system; without rancor he described the financial handicaps of the cattle raiser; without bitterness he discussed the competition of cheap foreign meats. And most convincingly he presented a program which he said would save the day for the American live-stock industry.

Senator KENDRICK'S proposals for rehabilitating the cattlemen included such measures as a tariff on farm products equal at least to the cost of production abroad, increased credits for the benefit of small producers as well as big concerns, and early adoption of legislation now pending for a commission to supervise the live-stock industry. The advisability of these measures, of course, is a matter of opinion—a matter which is being discussed widely and vigorously in Congress just now. There are persons who oppose protective tariff on principle; there are those who hold increased credits would mean more of the evils of monetary inflation; there are others who think we already have too much Government supervision of industry. But regardless of all that, there can be no denying that Senator KENDRICK'S program, as he presented it, sounded reasonable and founded on the bedrock of facts.

Mr. POMERENE. Mr. President, before the vote is taken I wish to call the attention of the Senate to the committee amendment proposed on page 16, and I should like the attention of the junior Senator from Iowa while I make a statement with respect to it. In section 20 the committee recommends the striking out of the following language:

cause notice in writing to be served upon such packer or operator specifying the alleged violations, and requiring such packer or operator to attend and testify at a hearing before the commission at a time and place designated therein, and at such time and place the commission shall afford to such packer or operator a reasonable opportunity to be heard in person or by counsel and through witnesses, under such regulations as the commission may prescribe.

And in lieu thereof the committee recommends that the following be inserted:

afford to such packer or operator a reasonable opportunity to be heard in person or by counsel and through witnesses under such regulations as the commission may prescribe at a hearing before the commission, at a time and place designated in a written notice served upon such packer or operator.

It seems to me that that proposed amendment of the committee ought to be defeated, for this reason: The original text requires the filing of charges. I care not who the man is or what his business is, he is entitled to have a charge preferred against him if he is to be tried. It may be that the proposed language confers upon the commission power to file a charge, but there is no requirement that a charge shall be filed. It seems to me that in all other respects the provisions with respect to a hearing are substantially the same; but it is because I feel that the proposed statute ought to specially provide for the formulating and presentation of charges that I think the amendment should be defeated. That is all I care to say about it.

The PRESIDING OFFICER. The Chair is informed by the Secretary that the amendment referred to by the Senator from Ohio has already been agreed to as in Committee of the Whole. The Chair makes that announcement for the information of the Senator from Ohio.

Mr. POMERENE. I am obliged to the Chair. Then, if that is so, I ask unanimous consent that the vote whereby the amendment was agreed to may be reconsidered.

The PRESIDING OFFICER. The Senator from Ohio asks unanimous consent that the vote by which the following amendment was agreed to as in Committee of the Whole be reconsidered. The Secretary will state the amendment.

The READING CLERK. In the original print, on page 15, lines 2 to 9, both inclusive, were stricken from the bill and the following inserted:

Afford to such packer or operator a reasonable opportunity to be heard in person or by counsel and through witnesses under such regulations as the commission may prescribe at a hearing before the commission, at a time and place designated in a written notice served upon such packer or operator.

Mr. POMERENE. Mr. President, I think the Secretary has been reading from a print of the bill which is different from the one before me.

The PRESIDING OFFICER. The Secretary, of course, reads from the authentic print of the bill which is the original copy as reported.

Mr. POMERENE. While I was discussing the bill I had before me, the print of December 10, 1920, and in that print the amendment appears on pages 16 and 17.

The PRESIDING OFFICER. The amendment as read, however, is the same as that referred to by the Senator.

Mr. POMERENE. I realize that.

The PRESIDING OFFICER. The Senator from Ohio asks unanimous consent that the vote by which the amendment was agreed to be reconsidered. Is there objection? The Chair hears no objection, and the vote whereby the amendment was agreed to is reconsidered. The question is on agreeing to the amendment which has just been reconsidered.

Mr. GRONNA. Mr. President, I do not rise to oppose the amendment of the Senator from Ohio, but our time is limited, and I wish to call attention in the hearings before the committee to a portion of the testimony of Mr. Armour; that answers, I think, in part, the question asked by the Senator from Ohio with reference to this uniform system of accounting.

Mr. Armour was asked if a part of the capital of Armour & Co. in the United States was used as capital of Armour & Co. in Argentina or in some foreign country, and it is to that that I wish to refer.

Senator GRONNA. I understood from your answer, Mr. Armour, to Senator NORRIS, that part of your capital, as shown in this statement, is in the South American plant. Am I mistaken about that?

Mr. MEYER.—

Mr. Meyer was the attorney for Mr. Armour.

That appears there, in that report.

Senator GRONNA. Does the amount of profit, then, show in the amount of profits here? Of course, you have not taken out any dividends. But you admit that you have made profits.

Mr. ARMOUR. We have not added any profits at all. That is an entirely separate company, and they have not declared any dividends.

Senator GRONNA. That would hardly answer my question. If you have part of your capital stock, on this statement, as shown in

this statement, invested in the South American plant, and you are making a profit on that plant, it does not make any difference whether you declare dividends or not, so long as you have made the profits. Should it not be shown in this statement?

Mr. ARMOUR. I do not think so.

Senator GRONNA. In order to show the real profit that Armour & Co. made?

Mr. ARMOUR. Not necessarily so. We have not thought so, because it is an entirely separate business.

Mr. HENEY. Has the total amount of business you have shown included your South American business?

Mr. ARMOUR. No, sir.

The CHAIRMAN. What is the capital stock of the South American company?

Mr. ARMOUR. I can not tell you. It is either five or ten million dollars.

Senator NORRIS. Do you know what the profit has been down there?

Mr. ARMOUR. Yes.

Senator NORRIS. How much?

Mr. ARMOUR. Do you mean for the last year?

Senator NORRIS. The last year and the year before, or any other years?

Mr. ARMOUR. I do not know what they were for the year before. I think they were in the neighborhood of $10,000,000.

Senator NORRIS. What were they last year?

Mr. ARMOUR. I am talking about last year. I would think in that neighborhood.

Mr. HENEY. By "last year" you mean 1918?

Mr. ARMOUR. Yes.

The CHAIRMAN. That is on your South American plant, your Argentine plant?

Mr. ARMOUR. Yes, sir. I would think it was in that neighborhood.

Mr. HENEY. I have running in my mind for 1917 something like six or seven million.

Mr. ARMOUR. It may have been.

The CHAIRMAN. And the investment is either five or ten million?

Mr. ARMOUR. The investment is a good deal more than that.

Mr. MEYER. It would appear from this statement in evidence that the investment in the allied companies is $43,000,000.

The CHAIRMAN. Could you enumerate these allied companies?

Mr. ARMOUR. We could; but it is a very long list.

Senator GRONNA. It is hard to get through my head, and I am somewhat slow in figuring out these things. I am at a loss to understand the kind of bookkeeping that you would use in adding in your statement here the capital stock or the assets for these outside companies, and then not including the profits that you make.

Mr. ARMOUR. We do. All the profits have been declared; all the dividends have been declared.

Senator GRONNA. That is not the profit.

Mr. ARMOUR. I do not think it is necessary, if you allow me to say so. We can not divide up profits if we are spending the money again.

Senator GRONNA. Just so that you will understand me: I am a man who deals in a small way. I started a little bank close to my home in 1901. We did not declare any dividends at all, but in about 10 years we had made enough profit to double our capital stock.

Mr. ARMOUR. Yes, sir.

Senator GRONNA. We considered that that was profit, whether we issued it or not. So we simply increased our capital stock.

Mr. ARMOUR. From your surplus?

Senator GRONNA. From our surplus.

Mr. ARMOUR. The same as we increased ours from $20,000,000 to $80,000,000.

Senator GRONNA. But every year when we made a statement—we had to render statements quite often, as you know, under the banking laws—every time we had to show that surplus, and we had to account for that profit. In making a statement such as you have made here, why should not the profits be shown? You have said you have made $10,000,000 profit.

Mr. ARMOUR. We have not thought it was necessary to do it.

Senator GRONNA. But is it not necessary that the public should know how much you have made?

Mr. ARMOUR. We issued a statement down in South America. This will show what our profits are down there. But we do not bring them back here.

Senator GRONNA. Let me ask you this question, then: What right have you to take American capital—we will consider that your capital in South America is South American capital—what right have you to take American capital and charge it in this statement, so long as you are not showing the profit?

Mr. MEYER. They are compelled to, in showing their assets under the reports of the Federal Trade Commission.

Senator GRONNA. Would it not be fairer, then, to the public here to deduct that capital, the $5,000,000, because then that would not tend to reduce your profits, while you must admit that this will tend to reduce your percentage of profits with the kind of bookkeeping you are showing here?

Mr. ARMOUR. I do not think so. I think we can explain that to you. I can not explain it to you now, but that we have a separate company in South America, and that company owns the stock in that separate company.

Senator GRONNA. But it is included in this statement?

Mr. ARMOUR. Yes, sir. They do not necessarily have to declare a dividend unless they want to. If they are spending the money, they do not want to declare a dividend.

Senator GRONNA. Let us give an illustration of that. We will say that Armour & Co. have $100,000,000 capital. Five million of that you take to South America.

Mr. ARMOUR. Yes, sir.

Senator GRONNA. And invest it there. You will actually employ, as a matter of fact, only $95,000,000 here in the United States.

Mr. ARMOUR. Yes.

Senator GRONNA. It will make some difference, will it not, whether you use ninety-five million or a hundred million, so far as the rate of percentage of profit is concerned, when you come to figure that? Have I made that plain?

Mr. ARMOUR. Yes; I think you have. I think we can explain that to you. I can not explain it to you now, but I think I can give you a satisfactory explanation of that if it is necessary.

Mr. MEYER. Senator, I am not in the accounting department, but, as I understand it, they are compelled—and I think Mr. Heney may concur—in making their report, to show all their capital, which includes all their assets.

Senator GRONNA. I am trying to show that your figures showing the rate of percentage are not altogether what they might be, but that, to some extent at least, they might be criticized.

I want to call attention to the fact that Mr. Armour admitted that five or ten million dollars of American capital was employed in the South American plant, and when Mr. Armour was pressed for an answer he admitted that they had made a profit of $10,000,000 in the South American plant. Now, Mr. President, in figuring profits, if the capital stock of Armour & Co. was $100,000,000 in the United States, and $10,000,000 was taken to another country, there would be only $90,000,000 left here. Now, instead of figuring the percentage on the $90,000,000 it was figured on the $100,000,000, and yet a portion of that capital was used in the South American plant. I simply want to call attention to this to show that the packers do not always present the facts as they ought to be presented to the American public, because here they made a profit of $10,000,000 in South America that was not accounted for at all. It was entirely left out, and yet a part of the American capital was employed in making that $10,000,000; yet we are asked the question why we want to investigate and inquire into the affairs of this monopoly?

Mr. EDGE. Mr. President, in the very short time allotted to me I am not going to attempt to define the comparative guilt of the banker, the packer, and perhaps the farmer. I presume the law is supposed to regulate that. However, I am going to vote against this bill because I think it is a mistaken policy to erect additional machinery of this kind for the purpose of administering the business of the country.

There may be, and perhaps are, some things in connection with the administration of the packing interests which should be under greater regulation. I believe some of the facts brought out would lead us all to admit that; but to erect additional machinery to add to the already perplexing labyrinth of boards and institutions and courts and commissions in order to set up a court over one particular industry seems to me absolutely without successful defense.

I have advocated, in the very short time that I have had the honor of being a Member of this body, a budget system. So have many other Senators; and of course the entire policy of a budget system is to coordinate, to bring together these various scattered activities of the Government, and try to introduce a little common-sense business into what should be the greatest business in the world—the business of government. Here we propose under this law to create an entirely new court, new commissioners at high salaries, with all the clerical equipment that is necessary in order properly to conduct such a court.

If additional regulation is necessary—and I repeat that perhaps it is—then why do we not use some of the machinery we already have, the Federal Trade Commission, the Bureau of Markets in the Department of Agriculture, or in some way try to live up to the policy that the Congress has already gone on record for, the establishment of a budget system, instead of the addition which is designed under the bill now under consideration?

We are all wondering throughout the country just what is the real fundamental reason for business inertia and hesitation. There are many answers, and I have not time to go into the solution of that great problem at this time. It would be a very difficult problem to solve; but I am convinced that one of the main reasons for a lack of initiative and enterprise on the part of those business men who have contributed so much in the past to make the country great is simply the fear of overgovernmental regulation and governmental administration of business.

I can imagine that some Senator right now may be wondering, and I am going to anticipate the question, as to why I can speak from this general viewpoint and at the same time, serving, as I have been, as a member of the special committee investigating the coal situation, give acquiescence, so far as that is possible before a bill is actually before the Senate and being debated, to the suggested Calder bill, now being considered by a committee of the Senate, which bill proposes some additional control over the coal situation. That bill, however—and that bill, of course, must receive careful consideration in detail—as it is now prepared, provides for no new machinery. It refers to existing boards, existing commissions, all the questions and prohibitions provided by that legislation. I am not entirely satisfied, however, that that bill, as introduced, meets the situation. I contend, however, that extreme conditions require extreme remedies; and in all the reports of the reduction of the prices of staple articles during the past few months, anthracite coal has gone up, and practically every other commodity has gone down, including the products of the packers and the products of agricultural activities. So, therefore, I am prepared to consider whatever is necessary to bring about the relief contemplated under the Calder bill, irrespective of the measure now under consideration.

The VICE PRESIDENT. The time of the Senator from New Jersey has expired.

Mr. McLEAN. Mr. President, I should like to call the attention of the Senate to the views of the President of the United States on the remedial value of the pending bill. I do not do this with the expectation that it will change any votes, but there may be a few of us who would like to know how easy it is for many of us to fall into bad habits. I am reading from an article written by Mr. Wilson for the American Lawyer:

> Governmental control, which we are undertaking so extensively and with so light a heart, sets up not a reign of law but a reign of discretion and individual judgment on the part of governmental officials in the regulation of the business of stock companies owned by innumerable private individuals and supplying the chief investments of thousands of communities. I can see no radical difference in principle between Government ownership and governmental regulation of this discretionary kind. Regulation by commission is not regulation by law, but control according to the discretion of governmental officials. Regulation by law is judicial, by fixed and definite rule, whereas regulation by commission is an affair of business sense, of the comprehension and thorough understanding of complex and various bodies of business. There is no logical stopping place between that and the actual conduct of business enterprises by the Government.
>
> Such methods of regulation, it may be safely predicted, will sooner or later be completely discredited by experience. Commissions in the future as in the past will reflect rather public opinion than business discretion. The only safe process, the only American process, the only effective process, is the regulation of transactions by the definite prohibition of the law, item by item, as experience discloses their character and their effects, and the punishment of the particular individuals who engage in them.

Mr. President, I do not know that I go quite as far as the President of the United States does in objecting to regulation by commission, but this bill fixes prices, and, in my judgment, it crosses the dead line, and once you cross it you never can return. Fixing prices never lowered the cost of production of anything. It has been tried over and over again. Every civilized nation has tried it; every one of the older States of the Union has tried it, and it has always ended in disaster, because it removes from the industrial engine its motive power.

I have not time to discuss the power of the Congress to pass this law, but I should like a few minutes to discuss the effect of this law.

We all know that everything our civilization has which the savage did not have is due to the fact that society has permitted unusual rewards to go to the man who has made 3 or 30 or perhaps 300 blades of grass grow where but one had grown before; and experience has demonstrated again and again that political liberty without economic liberty is the husk without the ear. History is full of instances where society has escaped from the clutch of the profiteer into the arms of the price fixer, to find the latter the less considerate highwayman of the two.

Mr. President, we know that the wars of the future will be industrial wars, and they will be fought to the finish, and we know that the nation that survives will be the nation that produces the necessities and the comforts of life for less money and with less labor than any other nation.

I want to insist that the men who will lead this Nation to victory will not be the price fixers. Restrictive legislation never reduced the price of anything on earth. People accept unsound and fallacious politico-economic doctrines because they are popular and because when people come to Congress and ask for them they will always find sympathetic political chemists who will pass out something which tastes good. But if we survive as a Nation it will be due not to the price fixers but to our discoverers. It has been well said that the prayers of the poor are answered in the garret of the inventor. Our victory will be due to the discoverers in chemistry, in mechanics, in medicine, in surgery, and last, but not least, in organization and concentration of effort. In punishing monopoly we must be careful not to destroy opportunity.

The VICE PRESIDENT. The time of the Senator has expired.

Mr. McLEAN. Mr. President, I move to amend this bill by striking out the fourteenth section.

The VICE PRESIDENT. There is an amendment pending, and the amendment offered by the Senator from Connecticut is not in order.

Mr. KENYON. I ask what amendment is pending?

The VICE PRESIDENT. The Secretary will state the pending amendment.

The ASSISTANT SECRETARY. When the bill was last under consideration the Senator from Iowa [Mr. KENYON] offered an amendment, on page 15 of the original bill——

Mr. KENYON. I understand that all those amendments were agreed to, and there will have to be unanimous consent to reconsider.

The VICE PRESIDENT. The vote by which they were agreed to has been reconsidered.

Mr. KENYON. I am a little in the dark as to whether I spoke on this or another amendment.

The VICE PRESIDENT. The Senator has not spoken on the pending amendment.

Mr. KENYON. Mr. President, the argument of the Senator from Missouri [Mr. REED] is one we always hear against any regulation of this character. I think we will have to come to the proposition before long that private business, so called and so supposed to be, can pass the line of private business and be charged with a public use, and if that is socialistic doctrine, then the Supreme Court of the United States has become socialistic.

I have not time to argue it as I should like to, but I call attention to the case of Munn *v.* Illinois (94 U. S., p. 125). There is to be found a discussion by the court, a reference to the old decision by Lord Chief Justice Hale, more than 200 years ago, in his treatise De Portibus Maris, which has been accepted without objection as an essential element in the law of property ever since. The court said:

> Property does become clothed with a public interest when used in a manner to make it of public consequence and affect the community at large. When, therefore, one devotes his property to a use in which the public has an interest, he, in effect, grants to the public an interest in the use, and must submit to be controlled by the public for the common good, to the extent of the interest he has thus created.

The Supreme Court in a rather recent case, in Two hundred and thirty-third United States, page 389, the German Alliance Insurance Co. against Kansas, has gone so far as to hold that insurance is of such a public nature that it is charged with a public use, and they refer to the very line of argument the Senator from Missouri has been following, and say, on page 409:

> Against that conservatism of the mind, which puts to question every new act of regulating legislation and regards the legislation invalid or dangerous until it has become familiar, government—State and National—has pressed on in the general welfare; and our reports are full of cases where in instance after instance the exercise of regulation was resisted and yet sustained against attacks asserted to be justified by the Constitution of the United States. The dread of the moment having passed, no one is now heard to say that rights were restrained or their constitutional guaranties impaired.

In the case of Jones *v.* City of Portland (245 U. S.), where the question arose over the establishment of a public yard for fuel, it was resisted by the taxpayers as being a business to sustain which taxes could not be levied on private property. I commend the reading of that case to the Senator from Missouri and the Senator from Maine.

In other words, all these cases proceed on the theory that property, by its use, can pass beyond a mere private matter and become subject to a public use and subject to public control, and if insurance can be subject to control because it partakes of a public use, how much more can the question of the food supply of the Nation, without which it can not live, be subject to public control?

Coal, to which the Senator refers, is coming along as another question, where a few corporations—seven or eight—own and control all the anthracite coal of the United States. Will it be contended that it is socialism to regulate it; that it is entirely out of the domain of law for the Government to have anything to say about the coal proposition when the life of the people of this country depends upon getting coal?

That doctrine has been established by the Supreme Court. It is a doctrine that is in harmony with enlightened common sense and judgment, and if that be State socialism, then the Supreme Court is committed to the doctrine.

Mr. WALSH of Massachusetts. Mr. President, the phase of this question I desire to discuss is the interest the consumer has or should have in this bill. The producers of live stock while numerous and naturally keenly interested are by no means a very large proportion of the population. The recent census has disclosed that more than half of the residents of the United States are residents of the cities. Obviously this part of the community can not raise live stock in a commercial way. Yet city dwellers as well as country dwellers are all consumers. Even many of the country dwellers are engaged in other pursuits than agriculture.

In a word, the citizens of the country are consumers of the necessaries of life, of which meat is the most prominent, and practically all secure their supply through the agency of the retail market. Therefore any measure which has relation to the price the consumer must pay is of interest to all sections of the country, both city and country. New England has reason to be especially interested in this question of fresh meat prices. The consumers there must buy well nigh 100 per cent of their meats from the so-called packers. While I know of six moderate sized packing plants in various parts of New England, which turn out mainly pork products, and which, judging from their names, would appear to be independent, yet I am reliably informed they are all either owned or controlled by

Chicago packers. Thus New England is entirely dependent upon the fair dealing and honesty of the packers to escape extortionate prices and limitless profiteering.

There is one peculiarity about meat prices. Some are much better known than others. The prices on the hoof at the leading markets are generally known among the producers, being reported regularly by the daily newspapers and trade papers. The retail prices are almost equally well known because of the vast number of housewives who come in daily contact with them. The intermediate prices, the packers' wholesale prices to the retailers, are much less widely known. They are known to the wholesalers and retailers concerned and a few trade papers. The daily papers give very little attention to these prices, believing the public is more interested in what the meat will cost the consumer. So within limits the wholesale prices of meats can be changed without attracting any particular attention. The retailer will see to it that a sufficient amount is added to the wholesale price to give him a profit.

The senior Senator from Utah [Mr. SMOOT] has said that all the profiteering in meat prices has been done by the retailers and none by the packers, and that therefore the packers do not need regulating. He made out a good case against some retailers and there is no doubt considerable profiteering is done by them. But I consider open to grave question the theory that the packers have done no profiteering.

Some very instructive charts were recently prepared showing packers' wholesale prices on fresh beef, lamb, and pork for a year, from December 1, 1919, to November 30, 1920, inclusive. With the single exception of the live hog price line on the pork chart, which is taken from the Chicago Drovers' Journal daily hog averages, the prices are all taken from the Bureau of Markets daily live stock and meat trade conditions report, which gives prices for every day in the week except Saturday and Sunday. Saturday's prices are charted as the same as Friday's, as Saturday is a very light day in the wholesale meat business. The pork chart compares the live hog price at Chicago per hundred pounds with the price per hundred pounds of pork loins at New York, Chicago, Philadelphia, and Boston.

The pork cut selected was the 8–10 pound pork loin. Mr. J. Ogden Armour said in a recent statement, December 11, that the light pork loin price is the index of all fresh-pork cuts. The heavier pork loins follow the fluctuations of the lighter loin closely, although at lower price levels. It is realized that the pork loins do not constitute more than 10 per cent of the hog, but in making comparisons for fresh-pork price it seems legitimate to take the cut whose price, as Mr. Armour says, is the index of all fresh-pork cuts.

Some of the things brought out by these charts—being on our guard against drawing any conclusion about absolute profits, as the pork loin is admittedly not more than 10 per cent of the hog—were most interesting.

In the first place, it is apparent from the chart prices that the fluctuations of live-hog prices are much less than those of the pork loins. The maximum for the live hog during the year was $17.20 per hundred on September 20, and $9.70 on November 25 is the minimum; a maximum difference during the year of $7.50 per hundred or 7½ cents per pound. On the other hand, the maximum difference during the year on the pork loin wholesale selling price per hundred pounds is $18.50, or 18½ cents per pound for New York; $20 for Boston, or 20 cents per pound; $21 per hundred, or 21 cents per pound for Chicago; and $21.50 per hundred, or 21½ cents per pound for Philadelphia.

Secondly, the pork loin wholesale prices often vary as much as $5 or $6 a hundred, or 5 or 6 cents per pound between two of the cities. The freight rate to Boston and New York on fresh meat is the same, 96½ cents a hundred, and to Philadelphia only 2 cents a hundred less, which would appear to justify an increase of $1 per hundred pounds in price in the eastern cities over Chicago prices. Chicago-killed pork distributed in Chicago, of course, has no railroad freight to pay. This matter of freight seems to cut very little figure as far as wholesale prices are concerned. Prices in Chicago with no freight to pay are often higher than in the eastern cities.

To illustrate by the prices in a recent month: On November 1 wholesale pork loin prices in Boston and Chicago were the same—$32 a hundred, or 32 cents per pound. They then began to separate. By November 12 prices in Boston had been advanced to $38 a hundred, while the Chicago price did not get above $33. After the 12th prices were allowed to drop in Chicago while being maintained in the eastern cities. On November 22 the Chicago price was $25 per hundredweight, while in Boston, New York, and Philadelphia the prices were $37.50, $34.50, and $34, respectively—a difference of 12 cents per pound. The Boston Transcript, in its editorial columns, invited attention to the fact that at wholesale prices fresh pork was 12½ cents per pound higher in Boston than Chicago on the 22d and 14 cents per pound higher on the 23d. In fact, the variation between Chicago and Boston prices on these days was greater than the entire cost per pound of the live hog, which was 11 cents per pound.

Another feature shown by these price charts is the marked advance in all markets during September and October.

Live hogs during this period had a maximum advance of about $2 per hundred pounds or 2 cents per pound. Fresh pork was advanced from $8 to $10 a hundred or 8 to 10 cents per pound on the strength of this and held the advance till about the middle of October.

This sort of a price advance is not peculiar to the year 1920. A similar price phenomenon appeared in the summer and fall of 1919. There was a severe drop in the price of live hogs, but fresh pork loins maintained their price in the eastern markets and even advanced a little. The Boston Transcript about the date of October 20, 1919, noticed this situation editorially under the title "Again the pork barrel." This is brief but very much to the point and is as follows:

> It does not take an expert in figures to deduce that there is profiteering in pork and that the excessive margin in this instance is extorted before the pork reaches the retailer. The wholesale price of pork loins—considered as best cuts for roasting—ranged in Boston yesterday at $34 to $38 per hundredweight for loins ranging in weight from 8 to 14 pounds. This fresh pork came largely from the West according to reports of the United States Department of Agriculture's Bureau of Markets. A strike at packing plants near Boston is reported as curtailing the supply of pork cuts in the market from near-by sources. There seems to have been, however, an adequate supply of western dressed fresh cuts—available speedily by refrigerator-car service—arriving constantly. In fact the receipts from this source during the week were 470 per cent of receipts of a week ago.
>
> Now as to the cost at Chicago. Live hogs sold in Chicago yesterday at $11.85 to $12.85 for bulk of sales. The prices of live hogs in Chicago have declined steadily since July 31, when a top figure of $23.60 per hundredweight was reached. Pork loins are retailing in Boston at the same old high figures and recent United States Bureau of Markets Reports show the wholesale figures of loins to be even higher than when top figures of live hogs were reached.
>
> The men who buy live hogs in Chicago can deliver fresh loins from these hogs to the retail trade in Boston within a very few days. With the price of live hogs reduced in Chicago nearly 50 per cent and the price of fresh pork loins in Boston remaining at the same old level—or slightly increased as the Government figures show—it is easy to see how, somewhere between the stockyard and the wholesaler's delivery, there is profiteering in pork.

This editorial attracted attention. Organizations like the Consumers' League discussed the subject of high pork prices in various parts of the country. The packers evidently did not like the publicity and deemed it prudent to make some modifications in the wholesale prices of pork loins. The result was that there was a drop of some $10 a hundred in November, 1919.

Now let us take the situation on September 20, 1920, when live hogs sold at the highest of the year, $17.20 per hundred. At that time the wholesale selling price of 8 to 10 pound loins at Chicago was $41.50, at New York $42.50, at Boston $41.50, and at Philadelphia $41.

Taking the same date, September 20, in 1919, we find that live hogs were selling at $17.30, only 10 cents a hundred higher than the same date in 1920. Yet we find that with live hogs at practically the same price, 8 to 10 pound loins were selling in Chicago at $37.50, in New York at $38, in Boston at $38.50, and in Philadelphia at $36.50. In other words, we find that with live hogs one-tenth of a cent per pound lower in 1920 than in 1919 the packers were treating the public substantially worse in fixing their wholesale prices, the fresh pork being $4.50 a hundred higher in New York, $4 higher in Chicago, $4.50 higher in Philadelphia, and $3 higher in Boston.

I now pass to the consideration of beef and lamb prices, which perhaps are more representative of the points I am trying to bring out, inasmuch as they compare the live price of the animal with the price of the entire edible part of the animal when dressed.

The margin or spread between the live-steer price and the dressed carcass runs as low as $4.50 a hundred and as high as $12.40 a hundred. The actual live price of this class of steers ranged from $11.95 to $16.80, or a variation of $4.85, or 5 cents per pound. As was the case with pork, the carcass price in the cities named had a much wider range during the year than did the live animal. For New York the extreme range was $13.50 per hundred, or 13½ cents per pound; for Chicago, $8; for Boston, $13.50; and for Philadelphia, $10.55.

An examination of this beef price chart shows the same exaggerated increase in dressed price in response to a minor increase in live price that we found in the case of hogs. For example, in the latter part of April dressed carcasses went up, while live steers came down. This must have resulted in less business, for in May prices were lowered to coax in more busi-

ness, after which, in June, prices went to the highest of the year with very slight increase in the price of the live animal. We have the same wider spread during the summer and early fall months. The table of prices clearly shows that the packers in fixing their wholesale prices do not give the consumer the benefit of the low prices prevailing for cattle.

We now come to the lamb chart, which ought to be interesting, as this is the part of the industry which some fear is threatened with extinction.

There is somewhat more range between the high and low prices of the year in live lambs than was the case with steers or hogs. The high price was $20.50 a hundred and the low price $10.50, a range of $10.

The range in prices in dressed lambs was $19 for Boston, $18 for New York, $16 for Philadelphia, and $11.50 for Chicago. A striking feature is that at the beginning of the year covered, the margin between the live and dressed lambs was $5.75 per hundred, or 6¾ cents per pound, and at the end of the year $12.75 per hundred, or 12¾ cents per pound. An attempt will doubtless be made to show that the reduced value of the pelt, the principal by-product, is responsible for this, but I shall point out later why the decreased pelt value is insufficient to justify this wide increase in margin.

During the first three months of the year 1920 the price of live lambs increased about $5 a hundred. The dressed lamb prices increased from $11 to $12 a hundred. During that period of the year the value of the pelt was steadily advancing.

The margin between the price of the live and dressed lamb for the last five months of the period was substantially more than the cost of the live lamb.

To put this more concretely in the form of figures the price of live lambs at the beginning of the year was $14.75; at the end of the year it was $11.75, a decrease of $3 a hundred, or 3 cents per pound. We would naturally expect that the consumer would be given the benefit of this decline in the form of lower wholesale prices. What do we find? At the beginning of the period the average price of the dressed lambs at the four cities was $21.50 per hundred; at the close of the period $24.37, a price of $2.87 or nearly 3 cents per pound more than at the beginning. The price of live lambs went down while the price of dressed lambs went up.

I have not the time to answer some possible objections that have been made; it is enough to say that there has been no increase in the cost of labor and only one-fourth of 1 cent per pound in freight.

The VICE PRESIDENT. The time of the Senator from Massachusetts has expired.

Mr. McLEAN. Mr. President, will it be in order for me to discuss the amendment?

The VICE PRESIDENT. It will.

Mr. McLEAN. I would like to call the attention of the Senator from Massachusetts [Mr. WALSH] to the fact that the thing that interests the Massachusetts housewife is the price which she pays for mutton and ham. The Massachusetts housewife, when she goes to market, is not interested in the biography or history of hogs or sheep. She wants to know why the price which is exacted of her is anywhere from three to five times as much as that which she reads about in her morning paper.

I wish also to call the attention of the Senator from Massachusetts to the fact that this bill raises the price of beef, if it does anything. It would not have the support of the cattlemen in the West if they did not believe that it would raise the price of beef to the producer of beef. The commission has power to see to it that the packers can not depress the prices of beef to the producer, and that is all the bill attempts to accomplish.

I call the attention of the Senator from Massachusetts to the fact that there are more than 1,200,000 retail dealers in the United States to-day—nearly 1,300,000. The retail dealers employ, on the average, about one assistant each. That means that there is a retailer in the country for every 35 or 40 people. That means that there is a retailer for every seven or eight families.

Mr. HARRISON. Mr. President——

Mr. McLEAN. I can not yield for a question or an interruption. My time is too short.

They—the retail dealers—can not compete, because many of them went into business on a rising market, and they find that they possess goods that cost them a great deal more than they can sell them for, and consequently competition is impossible.

What is the remedy? Congress certainly has no jurisdiction over the matter. So far as Congress has any jurisdiction over the matter, it is confined to products in interstate commerce. If the legislatures of the States are moribund, if they are indifferent to monopolistic prices that are being charged by retailers, that is not the fault of the American Congress. I suggest to the Senator from Massachusetts that if there is any conspiracy to raise the price of beef that affects the price to the consumer, it is a matter for the legislatures of the States and not for the Congress.

I do not object to giving the Federal Trade Commission all the power that may be necessary to enable it to assist the Department of Justice to bring to account the men who conspire to restrain trade in interstate commerce. Congress can do two things: Congress can maintain the hope of reward for the honest business man and it can punish the guilty. It seems to me that this legislation is a confession that the Department of Justice is of no use and that the Federal Trade Commission is of no use; and now we are here endeavoring to create new commissions that will only add to the difficulties instead of offering a real remedy. It seems to me it is the duty of Congress to see that the right thing is done and punish the guilty before we indulge in processes which we know by experience will, if they do anything, raise prices and discourage production.

The VICE PRESIDENT. The time of the Senator from Connecticut has expired.

Mr. HARRISON. Mr. President, will the Senator from Connecticut now in my time answer the question which I desired to propound to him when he was occupying the floor? The Senator from Connecticut was answering the Senator from Massachusetts [Mr. WALSH] touching the high prices of meat. I wish to ask whether he favors subdivision No. 11 of section 1 of the emergency tariff bill, which places a 30 per cent ad valorem duty on cattle and 2 cents per pound on fresh and frozen lamb, mutton, and pork?

Mr. McLEAN. Whether I am in favor of a tariff on imported meats?

Mr. HARRISON. Yes. Is the Senator in favor of the provision in the emergency tariff bill which proposes to raise the price of cattle 30 per cent ad valorem and 2 cents per pound on other fresh meats?

Mr. McLEAN. I am, most decidedly; and if the Senator wants my reasons I shall be glad to give them to him at any time. I do not think that I had better now enter into a discussion of the tariff question. It would not affect, as the Senator knows very well, the price of beef consumed by the American people when the article reaches the consumer.

Mr. HARRISON. Who is affected, then, by this 30 per cent ad valorem and 2 cents per pound?

Mr. McLEAN. It helps to protect the American producer of beef against ruinous foreign competition.

Mr. HARRISON. How does it help protect the producer of beef if it does not affect the consumer?

Mr. McLEAN. Because the difference in price between the producer and the consumer is so great that the effect of the tariff is negligible to the consumer. The Senator knows as well as I do that there are plenty of instances where the objection which he raises has little or no effect on the cost of the article to the consumer.

Mr. HARRISON. The Senator is opposing here a bill which proposes to help the consumers to get their beef and various other meats more cheaply, but he is in favor of the emergency tariff bill, which places a greater burden on the consumers when it places 2 cents per pound on certain fresh meats and 30 per cent ad valorem on cattle.

Mr. McLEAN. That is for the Senator to say. I am opposed to this bill not because it lowers or raises prices but because it fixes prices.

Mr. WALSH of Montana. Mr. President, in my time I desire to ask the Senator from Connecticut if his answer to the Senator from Mississippi does not destroy the argument that he has just been making, directed to the Senator from Massachusetts, namely, that this is a plan to raise the price to the producer, and, therefore, must of necessity raise the price to the consumer, and accordingly the Senator from Massachusetts, under the argument of the Senator from Massachusetts, ought to be opposed to the bill.

Mr. McLEAN. I understand the Senator from Montana is claiming that I should favor the bill because it raises the price to the producer of cattle.

Mr. WALSH of Montana. Not at all. The Senator from Connecticut was making the argument that because the bill would raise the price of cattle to the producer the Senator from Massachusetts ought to be opposed to it, because it would raise the price to the consumer. The Senator from Connecticut now says in answer to the Senator from Mississippi that the price to the consumer has nothing at all to do with the price to the producer.

Mr. McLEAN. Oh, no; I did not say that.

Mr. WALSH of Montana. That is the argument as I understood it. The Senator is in favor of the tariff because——

Mr. McLEAN. If that is true, it is because the dealers in the product are so many that between the producer and the consumer the processes of legerdemain in raising prices are so adequate that the price to the consumer is not affected at all by the price to the producer.

Mr. WALSH of Montana. In one case the difference will be consumed by the intermediary and in the other case it will not.

Mr. McLEAN. I repeat I am opposed to this bill because it fixes prices, not because it raises or lowers them.

Mr. WALSH of Massachusetts. Mr. President——

The VICE PRESIDENT. Does the Senator from Massachusetts wish to address himself to the amendment? He has already had five minutes.

Mr. GRONNA. Mr. President, a parliamentary inquiry.

Mr. WALSH of Massachusetts. How is it that the Senator from Connecticut could speak twice upon the amendment?

The VICE PRESIDENT. The Senator from Connecticut answered in the time of the Senator from Mississippi, which was given to him.

Mr. HARRISON. I ask the Chair if my time has expired. If not, I yield to the Senator from Massachusetts.

The VICE PRESIDENT. The Senator's time has expired.

Mr. WALSH of Massachusetts. A parliamentary inquiry, Mr. President. How does it happen that the Senator from Connecticut [Mr. McLEAN] has just had a second opportunity of addressing the Senate? Prior to his recent statement, had not the Senator from Connecticut addressed the Senate?

The VICE PRESIDENT. The Senator from Connecticut has been addressing the Senate in the time of the Senator from Mississippi [Mr. HARRISON], who yielded his time to the Senator to ask him a question.

Mr. HARRISON. I ask the Vice President has my time expired? If not, I yield to the Senator from Massachusetts.

The VICE PRESIDENT. The time of the Senator from Mississippi has expired; he has exhausted his five minutes.

Mr. GRONNA. A parliamentary inquiry, Mr. President. Is the amendment which has been offered by the Senator from Ohio [Mr. POMERENE] now the pending question?

The VICE PRESIDENT. The question is on the amendment which has been offered on behalf of the committee, which has been reconsidered.

Mr. GRONNA. I wish to say that I know there are a number of amendments which Senators wish to offer to the bill. So far as I am concerned, I shall be very glad to accept the amendment of the Senator from Ohio, that is to disagree to the committee amendment. I believe that course would be preferable to agreeing to the amendment proposed by the committee.

Mr. KENYON. Mr. President, is the question now on the amendment of the Senator from Ohio?

Mr. POMERENE. Yes; I so understand.

The VICE PRESIDENT. The question is on the amendment offered by the committee. The Senator himself offered the amendment.

Mr. KENYON. Mr. President, I will say to the Senator from Ohio that the purpose of the amendment was to endeavor to change the meaning so as to conform to a recent decision of the Supreme Court which has not yet been reported. I refer to the decision of the Federal Trade Commission against Anderson Gratz. If the chairman of the committee does not object to the amendment, personally I do not care about the change, for I think the text as originally reported covered the ground. The purpose of the amendment, however, was as I have stated.

Mr. POMERENE. Mr. President, if I may be permitted to say a word, the original text of the bill requires the filing of a complaint and the giving of notice thereof to the party against whom the complaint is made. The committee amendment simply provides that the party shall be given a hearing, but there is no requirement that a complaint shall be filed.

In the case referred to by the Senator from Iowa the question was not one as between complaint and no complaint, but the question was rather as to the sufficiency of the complaint filed in the case. For that reason, it seems to me the committee amendment should be disagreed to.

Mr. STERLING. Mr. President, may the pending amendment be stated?

The VICE PRESIDENT. The pending amendment will be stated.

The ASSISTANT SECRETARY. The Senator from Iowa has offered the following amendment, using the original text of the bill: On page 15, section 20, title 5, beginning with line 2, to strike out that line and all down to and including the word "prescribe" on line 9, and in lieu thereof to insert:

Afford to such packer or operator a reasonable opportunity to be heard in person or by counsel and through witnesses under such regulations as the commission may prescribe at a hearing before the commission, at a time and place designated in a written notice served upon such packer or operator.

Mr. KENYON. Mr. President, the Secretary states the amendment as being on page 15, which creates some confusion. In the copy of the bill which most Senators have the amendment is on page 17.

The VICE PRESIDENT. The original text of the bill must be used at the desk as there is no other way in which the record may be properly kept. The question is on the amendment of the committee.

The amendment was rejected.

Mr. HITCHCOCK. Mr. President, I wish to say a word or two on the bill, and then it is my purpose to offer an amendment at this time.

I shall support the pending bill, although the opinion in my section of the country is somewhat divided as to its merits. I shall support it on the general principle stated by the Senator from Iowa [Mr. KENYON] that the packing-house business has become of such stupendous size and of such great importance to the food supply of the people and has so nearly drifted into the hands of a few people, who are under suspicion, at least, of controlling it, or temptation to do so, that it has ceased to be a private matter and has become a matter in which the vital interests of the American people are deeply concerned. It has become a matter in connection with which the Government may legitimately reach out its strong hand for the protection not only of the consumer who requires meat supplies from the market but also for the protection of the shippers of live stock, who at the present time and for a number of years past have been under the necessity of selling their products in a market in which they had practically no voice in fixing the price.

Mr. President, I have not any idea that the bill is anywhere near perfection. It is like every regulatory measure that Congress has passed; it will inevitably require future amendment from time to time, just as every bill we have passed of a regulatory nature in the past has required amendment from time to time when experience has demonstrated the need. To my mind there is a defect in the bill as presented for the consideration of the Senate, and the amendment which I shall offer will, if agreed to, I believe, cure that defect.

As it is now, when the shipper of live stock puts his live stock into the car and sends it to market he loses control over it. He sends it to a market in which he has no knowledge as to what the price will be and no voice in fixing the price. His shipment may arrive on a day of great scarcity, and then possibly he may get a good price; it may arrive on a day of overwhelming plenty, and then he will get a price which will be destructive to his industry and unprofitable. It seems to me that that condition should be remedied; it seems to me that the packers should not be left to make their bids upon the live stock until the very hour of purchase, until the cattle are there in the pens beyond the control of the shipper, but that they should make their bids in advance, so that the shippers will have some knowledge, at least, of the price that their product is to secure. So far as I know, the producer of no other product in America is so absolutely dependent upon the buyer. The producer of no other product in America, so far as I know, is compelled to sell his goods in a necessity market entirely beyond his own control.

For that reason, Mr. President, I shall offer before taking my seat an amendment which should constitute a new section of this bill. It is designed to do these things: First, to provide that the commission created by the bill may establish a Government classification of live stock in each market; second, that packers and other buyers in that market shall be given an opportunity to bid on that classification one week or more in advance as to what they will pay for any particular classification of live stock and the quantities they will buy of that classification on the day set.

Mr. President, the Cudahy Packing Co. or the Armour Packing Co. know to-day, Monday, just as well as not, how many head of live stock they will want a week from to-day in their packing houses. They know to-day, just as well as a week from to-day, what they can afford to pay for the live stock. There is no reason why they should not make their bids to-day and have them filed with the commission as to what they will pay next Monday for the live stock which will be shipped to them.

The amendment does not make it compulsory, of course, on the packers to make bids, but provides that they may make them; they may file them with the commission, and when they file them with the commission they are given certain rights; they

UMI

are given a preference in the purchase of that live stock at that price a week from to-day.

It may be said that shippers will not desire to have their live stock sold in that way. It is provided in my amendment that a shipper may specify when he sends his stock to market that he does not send it there under this provision, but that he desires to take his chances. The effect of my amendment will be that, after the bids are filed with the commission, the commission will publish them in the newspapers, just as they publish the market reports of to-day, so that the farmer or the shipper in picking up his paper to-night will know what the price will be on a certain number of cattle next Monday, and he can decide now or to-morrow whether he wants to send his cattle to market to get that price. The bidders, if they make bids, are under compulsion to make them good on the days set, and they have the preference in buying the cattle against those who have made no bids.

Mr. WADSWORTH. Mr. President, will the Senator yield?

Mr. HITCHCOCK. I yield.

Mr. WADSWORTH. Under the proposal of the Senator would the bidders have to make good the bids, no matter how many cattle came to market?

Mr. HITCHCOCK. They would only make good for the number they bid upon. They would specify how many they could consume. Such a plan would stabilize the market. Instead of having on to-day, Monday, when there is an inadequate number of head of cattle on the market, the price go up, the price would be what was agreed upon a week ago, and on to-morrow, instead of that price going away down because of a great arrival of cattle, the price would be stabilized to what had been bid on Tuesday a week before.

Mr. WADSWORTH. Mr. President, will the Senator yield again?

Mr. HITCHCOCK. Yes.

Mr. WADSWORTH. Would it not be necessary to follow the same plan clear on down to include the retail butcher, and have him announce a week in advance what he will sell meat for, or, rather, to have the ultimate consumer announce to-day what he will pay for meat in the butcher shop next Monday?

Mr. HITCHCOCK. No; Mr. President. I think the Senator can hardly make that contention seriously. I think the shipper should have some sort of knowledge as to what the market will be to which he ships his goods and not ship them, dependent wholly upon the packers, who control the market and dominate it and at present even own the stockyards themselves. I do not assume that all the cattle and all the hogs so shipped will be sold at the bid price, but I say it can be made sufficiently to the advantage of the packers to make their bids in advance, because they will be given preference in the purchases. The packers are interested in a steady market; they are interested in a steady run of live stock to that market.

But that is not all, Mr. President. Any one who has visited a live-stock market knows that there is another great industrial evil in the market. Every morning when the time comes to open the gates to the packing houses there will be found thousands of men there clamoring for admission. They are the packing-house workers, who do not know till the day comes how many men are to be employed. If the stock receipts are large and the packer has many animals to slaughter, most of them will find employment. If not, hundreds may be turned away and forced to endure a day of nonemployment. This is due in part to the irregularity of the receipts. If receipts are to be regulated and standardized or equalized, employment will be equalized and one of the uncertainties of packinghouse employment greatly improved.

The VICE PRESIDENT. The time of the Senator from Nebraska has expired.

Mr. HITCHCOCK. Mr. President, I should like to offer the amendment so as to have it pending.

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. It is proposed to add a new section in the bill at the end of title 3, as follows:

SEC. —. The commission shall also have power to formulate and publish for the use of shippers and packers a classification of live stock for each stockyard market, and this classification shall be known as the Government classification for said market, and in the absence of any special agreement or stipulation to the contrary in any case the prices quoted, the bids made, and the sales of live stock upon said market shall be upon said Government classification.

The commission shall have power at each stockyard to receive and publish bids for live stock from packers and other buyers on Government classification for a week or more in advance, which bids shall bind the bidders to purchase at the prices stated on the days named the number of head of live stock specified according to classification, and which shall entitle said bidders on the dates named to preference in purchasing at prices specified up to the amount of live stock named in their advance bids if receipts are sufficient to cover all bids, but if not sufficient, then allotments to be made pro rata among bidders by said commission.

The commission shall, one week in advance, from day to day notify each common carrier delivering live stock to a stockyard of the approximate number of head of live stock for which advance bids have been received for each particular day, and the probable proportion which each common carrier can wisely deliver on each day at said stockyard, based on its average proportion of deliveries in the past.

In the absence of any declaration to the contrary, it shall be presumed that all live stock received at any stockyard is sent there under the protection and provisions of this section, but any shipper may expressly provide to the contrary.

Mr. SHERMAN. Mr. President, I believe I have not used the five minutes to which I am entitled on the bill. If the plan proposed by the Senator from Nebraska should be embraced in one of the rules made by the proposed live stock commission, then there ought to accompany it a rule that the shipper, on the day when he contemplates starting a shipment in Texas or Wyoming, shall notify his commission man, who in turn shall post the notice on a bulletin board at the destination to which the cattle are consigned, and, in addition, the consumer at the local meat market ought to post his wants at the meat market so that he may keep track of his cook. That would be no more preposterous than to expect a shipper days in advance to announce that he proposes to ship a certain number of head of cattle to Chicago or Omaha.

The singular thing to me, Mr. President, is that everybody knows how to run the packing business except the packers. For 25 years everybody in the United States knew how to run the railroads but the railroad men, but finally in the Esch-Cummins law it was admitted that probably railroad men know more than anybody else about the operation of railroads.

There will be, no doubt, a number of rules, if the live-stock commission provided for in this bill should be created, that will greatly enhance the price of cattle, if such a thing be possible. I do not hear much complaint from the hog raisers. I have not found a single hog raiser that specifically has made any complaint, except as he may be incidentally a member of some of these numerous active civic bodies engaged in the agitation; but, as the Senator from Connecticut inquired, when the price of cattle is raised it implies a rise in the dressed-meat products that come from the steer. That leads me to inquire why somebody here has not complained about the retailer.

Now, I happen to know that the retailers are a little too numerous for you folks to tackle. That is what is the matter with you. All of these gentlemen who are loaded down with reforms of various kinds never tackle the retailer. They remember, maybe, that there are 430,000 retail grocers in the United States, and about one-third of them sell meats, to say nothing of the great number of retail meat markets. That is the reason why the reformer does not go after the retailer; and still a retailer in Washington with $800 in business, put in the bank, made $8,000 in one year. That is the sworn testimony in the District of Columbia a year ago this summer—a fairly good per cent—and the retailer generally, in the market in which he sells to the private consumer the same meat that is complained about here, gets 100 per cent advance. Nobody complains about the retailer, and still there is where the spread occurs.

I have bought, by the carload lot, meats of all kinds on the market, from independent packers and from the five large packers, and I have followed the meat from the inventory that came to my desk—the same cut of meat, beef and pork—into my kitchen, and detected the retailer in charging me from 100 to 140 per cent advance in my own town. I did not complain about it. I suppose the retailer has to live, like the rest of us. You go to Mr. Retailer, and he says, "Oh, it is the dreadful packer that is doing all this." He lays it onto the packer. Why does he not have nerve enough to stand up? Nobody is going to hang him. Why does he not tell the truth about it? Yet there are over half a million of them in the United States that are keeping as still as if they had no more power of speech than an Egyptian mummy down here in the Museum. They know what is the matter, but they give the packer no help. They think the packer can take care of himself; and still they are in part responsible for this tremendous agitation that has occurred here, resulting in such measures as this.

Mr. RANSDELL. Mr. President, merely a few words on the bill itself.

I have the honor of being a member of the Agricultural Committee which considered this bill, and I should like to remind the Senate that the committee gave very painstaking care and attention to the measure.

It was before us for a good long while, and we heard a large number of witnesses from every portion of the country. I do not know that I ever participated in a more thorough-going in-

vestigation, or a more patient one, than was given to this bill; and, as I recall, the report of the committee was unanimous.

We realized the extreme difficulty of preparing a bill to eradicate what everyone admitted was an evil. I think there was hardly a witness before us who did not admit, at least in substance, that something should be done. It was admitted by all that the packing business is one of the largest in the world, some of the witnesses maintaining that it was equal in volume to that of the railroads. It certainly affects every man, woman, and child in the Nation just as much as the railroads do. It was of the greatest importance; and in substance, Mr. President and Senators, we found that this great business, so intimately related to every one of us, was owned and controlled by five packing companies, the so-called "Big Five." They completely dominated and controlled this business. They were too powerful! To those who would like to have one great central power here in Washington controlling everything, and doing away with State governments, and municipal governments, and parochial governments, and all local governments, it may appeal strongly to have a great, dominant organization like the five big packers controlling the food products of the country; but to people who believe in democratic principles, who believe in only a reasonable government in Washington, a reasonable government in the States, in the counties, in the municipalities, down to the families themselves, and no more interference than we are obliged to have, I say, to those people a bill like this must appeal strongly.

Ah, you will come back and say, "Why, you are going to control private enterprise."

Tell me it is private enterprise when five allied companies control the food of this, the greatest country on earth? Tell me it is private enterprise when these five big packers get the benefit of interstate commerce, the benefit of all the laws of this land, to enable them to carry on their business? They invoke all the agencies of the Government to help them, and they object to any control, to any interference from the Government.

Senators, one of the things which the five big packers have been doing in the past—I believe to some extent they are now controlled by the consent decree entered into with the Attorney General—was to dominate, own, and control the stockyards of this country.

What does that mean? It means that the farmer who ships stock into those yards sends them to a man to sell for him, to act as his agent, when he knows that the only buyer in those yards is the very man who is the owner of the yards, and that the commission merchant is selling to himself. That is the substance of it. If I own, control, and dominate the stock yard and regulate it in every way, and I am the only buyer in that yard, tell me that there is going to be fair dealing? I can not think it.

I happen to be engaged in a small way in the business of producing cotton. Cotton is consumed by the great spinners of this country and the foreign spinners. How would I like, when I send my cotton to market, to have it sold by men who are in the spinning business? I send it to commission merchants who are not connected with the spinners and are entirely disinterested parties.

The VICE PRESIDENT. The time of the Senator from Louisiana has expired.

Mr. OWEN. Mr. President, the soul of this bill is to make it unlawful for any packer to engage in any unfair, unjustly discriminative, or destructive practice or device in commerce. It is to prevent the buyers combining, so that when the producer of cattle gets to the market he is confronted with but one buyer. When there is but one buyer in the market, by a combination of these interests, that one buyer dictates the terms of life and death to the producer of food products in this country, and that is intended to be controlled by this bill.

I produced cattle for many years. For seven years I ran a cattle ranch. I sent 18,000 head of steers to the market. There was but one buyer. That buyer dictated the terms upon which those cattle were sold, and at the end of seven years I was compelled to give up the business, because I made nothing out of it.

The cattle-producing elements of this country are entitled to reasonable encouragement. After 40 years we have been unable to control the monopoly in the beef-packing business, and if the Senate fails or refuses to pass this bill it will fail to discharge a very great duty to this country. We ought to pursue a policy which will encourage the production of foodstuffs. We ought not to follow a policy which will discourage the production of food.

The bill is simple in its terms. It provides only for the control of monopoly. It provides a reasonable mechanism.

Senators say they do not favor any further commissions. I want to say to Senators that they have to be content with a private commission, controlled by a private interest, for private profit, or have to have a public commission protecting the rights of those who produce the foodstuffs and the rights of those who are consumers in this country. You have to take your choice. For myself, I choose to prefer what this bill affords, a public commission, to protect the producers of foodstuffs and to protect the consumers of foodstuffs.

Mr. HENDERSON. Mr. President, a very startling but interesting situation has developed in the course of the debate. I understand the Senator from Connecticut [Mr. McLEAN] to claim that if this legislation is enacted into law it will increase the revenues of the producer. I understand the Senator from Massachusetts [Mr. WALSH] to claim that if this legislation is enacted into law it will reduce the price to the consumer. If that is true, this is a very desirable bill, because it will give the producer more and cost the consumer less.

Out of my time I would like to ask the Senator from Massachusetts whether the charts he has upon the wall show that the price will be reduced to the consumer if this bill becomes a law?

Mr. WALSH of Massachusetts. The prices quoted by me in my earlier remarks are all wholesale prices. There have been no retail prices quoted by me. The charts show that almost invariably when the price of the live animal has decreased the wholesale dressed-meat price has increased. That is the history of this business during the year from December 1, 1919, to November 30, 1920.

I can not too greatly impress upon the Members of the Senate the folly of the argument that the cost of the live animal means a higher cost to the consumer, for these charts, if they prove anything, prove that to be absolutely absurd; and they not only prove that to be absurd, but they prove that there is a juggling of prices in all the large cities of the country.

Mr. PITTMAN. Mr. President, I can say little in the five minutes permitted me under the agreement. This bill has a splendid purpose. It is the outgrowth, I think, of the study and experience of the junior Senator from Wyoming [Mr. KENDRICK], who possibly knows more about the live-stock industry in this country than any other man in the Senate, or at least as much. He is trying to reach certain wrongs. Those wrongs are as to the marketing of live stock. He did not intend by this act to have Congress create a commission to take the place of the Federal Trade Commission.

The troubles have all been stated. The shippers of live stock are not informed so that they can anticipate a congestion of the market. There is another wrong, and that wrong is that when live stock reach these great stockyards, in the great markets, they are subject to discrimination in the method in which they are handled there and prepared for purchase.

Those are the two things. Those things can be reached by a clear statement of the remedies for those wrongs. This bill does not do that. We are talking about the four or five great packers. But this bill reaches practically every stockman, every butcher, and every farmer in this country. The stringent regulations which are intended to control the great packers will be used to harass our live-stock raisers.

Let us see whom it includes. It says:

> The term "packer" means any person engaged in the business of slaughtering live stock or preparing live-stock products for sale, or of marketing live-stock products as a subsidiary of or an adjunct to any such business.

That will take in practically every live-stock raiser and farmer in this country.

Further, what does the term "stockyard" mean? It provides:

> The term "stockyard" means any place, establishment, or facility commonly known as stockyards, consisting of pens or other inclosures and their appurtenances in which live cattle, sheep, swine, horses, mules, or goats are received, held, or kept for sale, feeding, feed, watering, or shipment.

Practically every cattleman in our country out there has a pen of that character, and would be subjected to the stringency of this bill. Read what this bill says. It allows this commission to establish a system of bookkeeping for practically every cattleman and farmer in our country.

Not only that, but it allows them to arrange when they shall sell, how they shall sell, under what conditions they shall sell, how the stockyards shall be made sanitary, and so on.

The commission has the right to make all kinds of rules and regulations and then to sit as judges as to whether they are violated.

Let this bill go back to the committee and let it be drawn in accordance with the way the Senator from Wyoming [Mr. KENDRICK] wanted it, and it will get an almost unanimous vote

in this body. But when you confuse this character of legislation with antimonopoly legislation you can not accomplish what you are seeking to accomplish, and you are establishing a commission here that is going to cause more trouble than good.

I am ready and willing to vote for anything which will remedy the unfortunate condition, but I say that this bill has not been properly considered. It has been considered in the matter of hearings, but it has not been considered as a matter of law, nor as to its effect upon the producer, and it has not been considered at all in connection with the existing Federal Trade Commission law. The whole thing is involved and confusing. It is almost impossible to understand it. I have read the bill a dozen times, and I do not understand the scope and effect of it yet; and I do want to understand it.

The people of our State are as much interested in the purpose of this bill as are those of any State in the Union. I am for the purpose of it, but I say that this bill can not pass in this form, and it would be a misfortune to have it voted down now, when it would not be voted down by reason of the principles involved, but by reason of the complications which are involved in the language of the bill. What we want to do is to overcome a specific wrong. We already have laws against monopoly. Let us enforce those laws.

For that reason, Mr. President, I move that this bill be recommitted, so that there may be an opportunity for every Senator in this body to appear before the committee and offer any amendments he has to offer, and to assist in preparing an intelligent bill. We now have too little time to offer and to explain amendments. We are all opposed to monopoly. We are all determined to put an end to the unjust discriminations and practices of the great packers. We of the West are for this bill so far as it reaches the guilty parties, but we know our stock raisers and our farmers are not guilty. They do not get one-third of the price charged the consumers for the product they raise.

I will not vote for this bill in its present form. I intend to offer an amendment protecting our stock raisers and farmers, and if that amendment is adopted I will vote for the bill.

Mr. ROBINSON. Mr. President, I make the point of order that the motion to recommit is not in order under the unanimous-consent agreement under which the Senate is proceeding, and on that, if the Chair desires to hear me, I will be glad to address the Chair.

The VICE PRESIDENT. The Chair has heretofore ruled on this identical point of order, and under identically the same circumstances, that a motion to recommit is not in order. There was no appeal from the Chair when the question arose before, and the Chair suggests, in order definitely to settle the precedent, an appeal from the present ruling. The Chair stands by the original ruling.

Mr. ROBINSON. A parliamentary inquiry. In the opinion of the Chair, if an appeal should be taken from the decision of the Chair, would the question be debatable?

The VICE PRESIDENT. Until 4 o'clock. The Chair does not think it would be debatable after 4 o'clock.

Mr. SMITH of Georgia. Mr. President, I desire to offer two amendments——

Mr. PITTMAN. Mr. President, can an appeal from the decision of the Chair be made later, or must it be made now?

The VICE PRESIDENT. It must be made now.

Mr. PITTMAN. In accordance with the suggestion of the Vice President, I respectfully appeal from the ruling of the Chair.

Mr. ROBINSON. I ask to be heard briefly on the appeal.

Mr. SMITH of Georgia. I believe I was recognized, and I wish to offer two amendments.

The VICE PRESIDENT. They can be offered at any time. There is no reason why they can not be offered after 4 o'clock.

Mr. SMITH of Georgia. But I can not give any explanation of them later.

The VICE PRESIDENT. The Senate is considering the point of order.

Mr. ROBINSON. Mr. President, on at least two occasions this identical question has been presented to the Senate, the last time on January 15, 1918, when the Senator from Ohio, Mr. Harding, made a point of order, under conditions identically the same as that now existing, that a motion to recommit could not be entertained. The reasons the Chair then gave for sustaining the point of order are as good, in my opinion, as anyone can offer.

The Senate understands, of course, that this question can not be determined upon the merits of the bill in controversy; that it presents purely a question of law, and a decision of the question will in all probability govern the proceedings of the Senate throughout the future. When the question was raised upon the point of order made by the Senator from Ohio, Mr. Harding, the Chair said:

> The Chair may be misaken about it; that would be quite natural; but the present recollection of the Chair is that he ruled that it could not be recommitted to the committee; that that was not a final disposition at all, but the measure would simply go back to the committee and again be reported to the Senate, and that such a course was a violation of the unanimous-consent agreement. That is the Chair's recollection of the ruling he made, although he may be mistaken, and it might be well to take a moment to look it up.

Subsequently the recollection of the Chair was confirmed by an investigation of the precedents.

I find that recently the Senate has recommitted one bill three times to the committee, and if a motion to recommit is in order, the bill might never be finally acted upon, should the ruling of the Chair be reversed. Moreover, Mr. President, I call attention briefly to the language of the unanimous-consent agreement itself, that—

> the Senate will proceed to vote, without further debate, upon any amendment that may be pending, any amendment that may be offered, and upon the bill * * * to its final disposition.

If the bill can be recommitted to-day, reported to-morrow, recommitted again the next day, and so on any number of times, which I believe is possible under the rules of the Senate, then unquestionably to recommit the bill now would not constitute a final disposition of the bill.

The agreement was to vote "upon any amendment that may be pending, any amendment that may be offered," and upon the bill itself, "to its final disposition," and, of course, the legal question that arises is whether a recommittal is a final disposition of the bill.

The VICE PRESIDENT. The hour of 4 o'clock having arrived, the Chair rules that no further debate is in order. The question is, Shall the ruling of the Chair stand as the decision of the Senate?

Mr. SMOOT. On that question I call for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. GORE (when his name was called). I have a general pair with the junior Senator from New York [Mr. CALDER]. I do not know how he would vote on the pending question, and therefore withhold my vote. If at liberty to vote, I would vote "yea."

Mr. HENDERSON (when his name was called). I have a general pair with the junior Senator from Illinois [Mr. MCCORMICK], who was called from the city last night on account of illness in his family. I am not informed how he would vote on the pending question or on the bill. I have been unable to secure a transfer and therefore withhold my vote.

Mr. KNOX (when his name was called). I have a general pair with the senior Senator from Oregon [Mr. CHAMBERLAIN]. I am informed that the Senator from Montana [Mr. WALSH] has a pair with the junior Senator from New Jersey [Mr. FRELINGHUYSEN], and that it has been arranged upon the votes on the pending bill that our respective pairs shall be paired, and that the Senator from Montana and myself shall be allowed to vote. Am I correct?

Mr. WALSH of Montana. That is correct.

Mr. KNOX. I vote "nay."

Mr. MCCUMBER (when his name was called). I have a general pair with the senior Senator from Colorado [Mr. THOMAS]. Not knowing what his vote would be upon the pending question, I withhold my vote.

Mr. MOSES (when his name was called). I have a general pair with the junior Senator from Louisiana [Mr. GAY]. He is absent, and I have arranged to transfer my pair to the senior Senator from Indiana [Mr. WATSON] on all votes upon the pending bill, and I am therefore at liberty to vote. I vote "nay."

Mr. POMERENE (when his name was called). I have a general pair with the senior Senator from Iowa [Mr. CUMMINS]. I am not advised how he would vote on the pending question and therefore withhold my vote. If at liberty to vote, I would vote "yea."

Mr. WALSH of Montana (when his name was called). Referring to the statement made by the junior Senator from Pennsylvania [Mr. KNOX], which expresses my understanding, I feel at liberty to vote notwithstanding the absence of my pair. I vote "yea."

Mr. WILLIAMS (when his name was called). I have a standing pair with the senior Senator from Pennsylvania [Mr. PENROSE]. I understand that if he were present he would vote as I am about to vote, and I therefore consider myself released for this purpose. I vote "nay."

The roll call was concluded.

Mr. GORE. I have been released from my pair previously announced and am therefore at liberty to vote. I vote "yea."

Mr. HARRISON. I have been requested to announce that the Senator from Colorado [Mr. THOMAS] is detained on account of illness in his family, and that the Senator from Oregon [Mr.

CHAMBERLAIN] and the Senator from Delaware [Mr. WOLCOTT] are detained on account of illness.

Mr. CURTIS. I wish to announce that the Senator from New Mexico [Mr. FALL] is paired with the Senator from Rhode Island [Mr. GERRY].

The result was announced—yeas 50, nays 30, as follows:

YEAS—50.

Ashurst	Harrison	McKellar	Smith, Ga.
Borah	Heflin	McNary	Smith, Md.
Capper	Hitchcock	Myers	Smith, S. C.
Culberson	Johnson, Calif.	Nelson	Spencer
Curtis	Johnson, S. Dak.	Norris	Sterling
Dial	Jones, N. Mex.	Overman	Swanson
Fletcher	Jones, Wash.	Owen	Townsend
France	Kellogg	Phelan	Trammell
Glass	Kendrick	Poindexter	Walsh, Mass.
Gooding	Kenyon	Ransdell	Walsh, Mont.
Gore	Kirby	Robinson	Willis
Gronna	La Follette	Sheppard	
Harris	Lenroot	Simmons	

NAYS—30.

Ball	Hale	Page	Stanley
Beckham	Keyes	Phipps	Sutherland
Brandegee	King	Pittman	Underwood
Colt	Knox	Reed	Wadsworth
Dillingham	Lodge	Sherman	Warren
Edge	McLean	Shields	Williams
Elkins	Moses	Smith, Ariz.	
Fernald	New	Smoot	

NOT VOTING—16.

Calder	Frelinghuysen	McCormick	Pomerene
Chamberlain	Gay	McCumber	Thomas
Cummins	Gerry	Newberry	Watson
Fall	Henderson	Penrose	Wolcott

The VICE PRESIDENT. The ruling of the Chair stands as the decision of the Senate. The question is now on the amendment offered by the Senator from Nebraska [Mr. HITCHCOCK].

Mr. REED. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. WADSWORTH. I should like to have the amendment stated.

Mr. LODGE. I ask to have it read.

The VICE PRESIDENT. The amendment offered by the Senator from Nebraska will be read.

The ASSISTANT SECRETARY. Add a new section in the bill at the end of title 3, on page 14, after line 22, which will be section 20, as follows:

SEC. 20. The commission shall also have power to formulate and publish for the use of shippers and packers a classification of live stock for each stockyard market, and this classification shall be known as the Government classification for said market, and in the absence of any special agreement or stipulation to the contrary in any case the prices quoted, the bids made, and the sales of live stock upon said market shall be upon said Government classification.

The commission shall have power at each stockyard to receive and publish bids for live stock from packers and other buyers on Government classification for a week or more in advance, which bids shall bind the bidders to purchase at the prices stated on the days named the number of head of live stock specified according to classification, and which shall entitle said bidders on the date named to preference in purchasing at prices specified up to the amount of live stock named in their advance bids if receipts are sufficient to cover all bids, but if not sufficient, then allotments to be made pro rata among bidders by said commission.

The commission shall one week in advance from day to day notify each common carrier delivering live stock to a stockyard of the approximate number of head of live stock for which advance bids have been received for each particular day and the probable proportion which each common carrier can wisely deliver on each day at said stockyard, based on its average proportion of deliveries in the past.

In the absence of any declaration to the contrary it shall be presumed that all live stock received at any stockyard is sent there under the protection and provisions of this section, but any shipper may expressly provide to the contrary.

The VICE PRESIDENT. The yeas and nays have been ordered, and the Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. HENDERSON (when his name was called). Making the same announcement concerning my pair as on the previous roll call, I withhold my vote.

Mr. KNOX (when his name was called). Referring to the statement I made upon the last roll call, I will allow that statement to stand for this and all subsequent roll calls upon the bill, and will vote. I vote "nay."

Mr. McCUMBER (when his name was called). Making the same announcement concerning my pair as on the previous roll call, I withhold my vote.

Mr. POMERENE (when his name was called). Again referring to my pair with the senior Senator from Iowa [Mr. CUMMINS], I am advised that if present his vote would be the same as my own. I therefore feel privileged to vote, and vote "nay."

Mr. WALSH of Montana (when his name was called). Repeating the announcement as to my pair and its transfer made on the last roll call, I vote "nay."

Mr. WILLIAMS (when his name was called). I have a standing pair with the Senator from Pennsylvania [Mr. PENROSE]. As I am unable to secure a transfer of that pair, I withhold my vote.

The roll call was concluded.

Mr. CURTIS. I desire to announce that on this vote the Senator from New Mexico [Mr. FALL] is paired with the Senator from Rhode Island [Mr. GERRY].

Mr. HARRISON. I desire to announce the absence of the Senator from Colorado [Mr. THOMAS] on account of illness in his family, and also that the Senator from Oregon [Mr. CHAMBERLAIN] and the Senator from Delaware [Mr. WOLCOTT] are absent because of illness.

The result was announced—yeas 8, nays 70, as follows:

YEAS—8.

Fletcher	Hitchcock	Kirby	Owen
Gronna	Kendrick	La Follette	Pittman

NAYS—70.

Ashurst	Hale	Moses	Smith, Md.
Ball	Harris	Myers	Smith, S. C.
Beckham	Harrison	Nelson	Smoot
Borah	Heflin	New	Spencer
Brandegee	Johnson, Calif.	Norris	Stanley
Capper	Johnson, S. Dak.	Overman	Sterling
Colt	Jones, N. Mex.	Page	Sutherland
Culberson	Jones, Wash.	Phelan	Swanson
Curtis	Kellogg	Phipps	Townsend
Dial	Kenyon	Poindexter	Trammell
Dillingham	Keyes	Pomerene	Underwood
Edge	King	Ransdell	Wadsworth
Elkins	Knox	Reed	Walsh, Mass.
Fernald	Lenroot	Sheppard	Walsh, Mont.
France	Lodge	Sherman	Warren
Glass	McKellar	Shields	Willis
Gooding	McLean	Simmons	
Gore	McNary	Smith, Ariz.	

NOT VOTING—18.

Calder	Gay	Newberry	Watson
Chamberlain	Gerry	Penrose	Williams
Cummins	Henderson	Robinson	Wolcott
Fall	McCormick	Smith, Ga.	
Frelinghuysen	McCumber	Thomas	

So Mr. HITCHCOCK's amendment was rejected.

Mr. POMERENE. A parliamentary inquiry, Mr. President. Are general amendments now in order?

The VICE PRESIDENT. They are.

Mr. POMERENE. Then, Mr. President, I move to strike out of the bill section 25.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Ohio.

Mr. KENYON. I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. HENDERSON (when his name was called). Making the same announcement as on previous votes relative to my pair, I withhold my vote.

Mr. McCUMBER (when his name was called). Making the same announcement as on the previous vote, I withhold my vote.

Mr. POMERENE (when his name was called). Again referring to my pair with the senior Senator from Iowa [Mr. CUMMINS], I am advised that if he were present he would vote "nay." If permitted to vote, I should vote "yea." I therefore withhold my vote.

Mr. SIMMONS (when his name was called). On this bill I have a pair with the junior Senator from New York [Mr. CALDER]. I am not able to secure a transfer, and in his absence I withhold my vote. If I were at liberty to vote, I should vote "nay."

Mr. WALSH of Montana (when his name was called). Referring to the statement heretofore made with respect to my pair, I vote "nay."

Mr. WILLIAMS (when his name was called). I have a standing pair with the senior Senator from Pennsylvania [Mr. PENROSE]. I notice that he has not voted. I do not know how he would vote on the pending amendment and therefore withhold my vote.

The roll call was concluded.

Mr. HARRISON. I desire to announce that the Senator from Colorado [Mr. THOMAS] is absent on account of illness in his family, and also that the Senator from Oregon [Mr. CHAMBERLAIN] and the Senator from Delaware [Mr. WOLCOTT] are absent because of illness.

The result was announced—yeas 34, nays 43, as follows:

YEAS—34.

Ball	Hale	Page	Stanley
Beckham	Keyes	Phipps	Sterling
Brandegee	King	Reed	Sutherland
Colt	Knox	Sherman	Underwood
Dial	Lodge	Shields	Wadsworth
Edge	McLean	Smith, Ariz.	Warren
Elkins	Moses	Smith, Ga.	Willis
Fernald	Myers	Smith, Md.	
France	New	Smoot	

NAYS—43.

Ashurst	Harris	Kirby	Ransdell
Borah	Harrison	La Follette	Robinson
Capper	Heflin	Lenroot	Sheppard
Culberson	Hitchcock	McKellar	Smith, S. C.
Curtis	Johnson, Calif.	McNary	Spencer
Dillingham	Johnson, S. Dak.	Nelson	Swanson
Fletcher	Jones, N. Mex.	Norris	Townsend
Glass	Jones, Wash.	Overman	Trammell
Gooding	Kellogg	Owen	Walsh, Mass.
Gore	Kendrick	Phelan	Walsh, Mont.
Gronna	Kenyon	Poindexter	

NOT VOTING—19.

Calder	Gay	Newberry	Thomas
Chamberlain	Gerry	Penrose	Watson
Cummins	Henderson	Pittman	Williams
Fall	McCormick	Pomerene	Wolcott
Frelinghuysen	McCumber	Simmons	

So Mr. POMERENE's amendment was rejected.

Mr. STERLING. Mr. President, I move the following amendment to the bill: On page 2, in lines 5 and 6, I move to strike out the words "live stock commission created by this act" and to insert in lieu thereof the words "Trade Commission," so that it shall read:

The term "commission" means the Federal Trade Commission.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from South Dakota.

Mr. STERLING. I ask for the yeas and nays on the amendment.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. HENDERSON (when his name was called). Making the same announcement as heretofore as to my pair, I withhold my vote.

Mr. McCUMBER (when his name was called). Making the same announcement as on previous roll calls, I withhold my vote.

Mr. POMERENE (when his name was called). Again announcing my pair with the senior Senator from Iowa [Mr. CUMMINS], I am advised that if he were present and voting he would vote "nay." I, if at liberty to vote, would vote "yea." I withhold my vote.

Mr. SIMMONS (when his name was called). Making the same announcement as before as to my pair and my inability to obtain a transfer, I withhold my vote. If I were at liberty to vote, I should vote "nay."

Mr. WALSH of Montana (when his name was called). Repeating the statement made on previous roll calls, I vote "nay."

The roll call was concluded.

Mr. CURTIS. I desire to announce that the Senator from New Mexico [Mr. FALL] is paired with the Senator from Rhode Island [Mr. GERRY].

Mr. HARRISON. I desire to announce that the Senator from Colorado [Mr. THOMAS] is absent on account of illness in his family; also that the Senator from Oregon [Mr. CHAMBERLAIN] and the Senator from Delaware [Mr. WOLCOTT] are absent, due to illness.

The result was announced—yeas 34, nays 43, as follows:

YEAS—34.

Ball	Hale	Moses	Spencer
Curtis	Heflin	Myers	Sterling
Dial	Jones, Wash.	Nelson	Sutherland
Edge	Kellogg	New	Townsend
Elkins	Keyes	Page	Wadsworth
Fernald	King	Phipps	Warren
Fletcher	Knox	Poindexter	Willis
France	Lenroot	Reed	
Gore	McLean	Smith, Ga.	

NAYS—43.

Ashurst	Harris	McNary	Smith, Ariz.
Beckham	Harrison	Norris	Smith, Md.
Borah	Hitchcock	Overman	Smith, S. C.
Brandegee	Johnson, Calif.	Owen	Smoot
Capper	Johnson, S. Dak.	Phelan	Stanley
Colt	Jones, N. Mex.	Pittman	Swanson
Culberson	Kendrick	Ransdell	Trammell
Dillingham	Kenyon	Robinson	Underwood
Glass	Kirby	Sheppard	Walsh, Mass.
Gooding	La Follette	Sherman	Walsh, Mont.
Gronna	McKellar	Shields	

NOT VOTING—19.

Calder	Gay	McCumber	Thomas
Chamberlain	Gerry	Newberry	Watson
Cummins	Henderson	Penrose	Williams
Fall	Lodge	Pomerene	Wolcott
Frelinghuysen	McCormick	Simmons	

So Mr. STERLING's amendment was rejected.

Mr. WALSH of Montana. Mr. President, an obvious error. On page 3, in line 3, after the word "sale," the words "in commerce" should be inserted. I move that amendment.

Mr. KENYON. That is an error. The words "in commerce" should be there.

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. After the words "products for sale," on page 3, line 1, of the original copy of the bill, it is proposed to insert the words "in commerce."

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Montana.

The amendment was agreed to.

Mr. SPENCER. I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. On page 13, it is proposed to strike out lines 16, 17, 18, and the first four words of line 19.

The VICE PRESIDENT. What copy has the Senator from Missouri before him?

Mr. SPENCER. Perhaps I have the wrong copy of the bill.

The VICE PRESIDENT. What are the words?

Mr. KENYON. Mr. President, I think that amendment was a committee amendment that was adopted. The Senator would have to ask to reconsider the vote. I can see no objection to the words the Senator has suggested going out, but I suppose that means a reconsideration. The amendment has been adopted.

The VICE PRESIDENT. The entire difficulty is that when there are three or four copies of a bill the Secretary must know to what copy a motion applies.

Mr. KENYON. These words are not in the original bill. They are in a committee amendment that was adopted.

Mr. SPENCER. I can read the words. They are the last sentence of the committee amendment that provides for the accounts which the commission must keep. The words which I move to strike out are found in the printed bill on page 13, beginning with line 16, and read as follows:

If such uniform systems are prescribed and required by the commission, no packer or operator shall keep any accounts, records, or memoranda other than those prescribed or approved by the commission.

The VICE PRESIDENT. Is that what the Senator wishes to strike out?

Mr. SPENCER. Those are the words to be stricken out. If that committee amendment has already been adopted, I inquire whether it may not be necessary to reconsider the adoption of the amendment?

The VICE PRESIDENT. It will be. The Senator from Missouri moves to reconsider the vote whereby the committee amendment was adopted.

The motion to reconsider was agreed to.

The VICE PRESIDENT. The Senator from Missouri now moves to strike out certain words, which will be stated by the Secretary.

The ASSISTANT SECRETARY. It is proposed to strike out the following words:

If such uniform systems are prescribed and required by the commission, no packer or operator shall keep any accounts, records, or memoranda other than those prescribed or approved by the commission.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Missouri to the amendment of the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. SPENCER. I offer the amendment, which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. On page 11, line 19, after the word "determine," it is proposed to insert the following words——

Mr. FLETCHER. That must refer to some other amendment. That does not appear in the original print.

Mr. SPENCER. In the other printed copy it is on page 11, line 8, after the word "determine."

The ASSISTANT SECRETARY. On page 11, line 8, in section 13, after the word "determine," it is proposed to insert the following words: "That such ownership or control or interest is not in violation of the purposes of this act, or," so that if amended it will read:

SEC. 13. After two years from the date when this act becomes effective, no packer engaged in commerce shall own or control or have any interest in, directly or indirectly, by community of stock ownership or otherwise, any stockyard, unless the commission shall determine that such ownership or control or interest is not in violation of the purposes of this act, or that such packer has been unable, despite due diligence, to dispose of such ownership or control of or interest in such stockyard, etc.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Missouri.

The amendment was agreed to.

Mr. STERLING. Mr. President, on page 20, the first 3 lines of subdivision (2) on that page read as follows——

Mr. KENYON. What section is that?

Mr. STERLING. Page 20 of the original print, the first print of the bill.

Mr. KENYON. What section is it? That will enable us to find it.

Mr. STERLING. Section 25, page 20, subdivision (2). The first three lines of the subdivision read as follows:

To furnish the services and facilities of its business on fair and reasonable terms and without unjust discrimination to persons applying for such service and facilities.

Then subdivision (3) repeats the same idea exactly and reads as follows:

To impose only such charges and rates as are reasonable for the service or facility afforded.

I move to strike out subdivision (3).

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. It is proposed to strike out subdivision (3) on page 20, which reads as follows:

(3) To impose only such charges and rates as are reasonable for the service or facility afforded.

Mr. GRONNA. Mr. President, I realize that this amendment can not be debated, but I hope it will not be adopted.

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from South Dakota.

On a division, the amendment was rejected.

Mr. WADSWORTH. Mr. President, I move to amend the bill by striking out, on page 2 of the original print, line 15, the words "horses, mules, or goats."

Mr. BORAH. What page is it of the other print?

Mr. WADSWORTH. Page 2 of the reprint.

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. The paragraph reads:

The term "live stock" means live or dead cattle, sheep, swine, horses, mules, or goats.

Mr. WADSWORTH. I move to strike out the words "horses, mules, or goats," and to insert the word "and" between the words "sheep" and "swine." I do not think it is necessary for every horse auction in the United States to be run by the Government.

Mr. KENYON. I make the point of order that it is past the time for argument.

The VICE PRESIDENT. The point of order is sustained.

The question is on the amendment offered by the Senator from New York.

On a division, the amendment was agreed to.

Mr. WADSWORTH. In order that the bill may be made consistent in this respect, I offer another amendment, and I apologize for having made so much of an argument. On the same page, line 22, I move to strike out the words "horses, mules, or goats," and to insert the word "and" between the words "sheep" and "swine," striking out the comma.

The amendment was agreed to.

Mr. SMITH of Georgia. I move to amend on page 17 by adding at the close of the third line the words "the weight of the," so that it will read:

No such order of the commission shall be modified or set aside by the circuit court of appeals unless it is shown by the packer or operator that the order is unsupported by the weight of the evidence, or was issued, and so forth.

Mr. KENYON. In what section, I will ask the Senator?

Mr. SMITH of Georgia. Section 21. I can not state my reason for offering the amendment.

Mr. KENYON. No; I understand.

On a division, the amendment was agreed to.

Mr. SMITH of Georgia. Now I move to amend, on the same page, in line 22, by striking out the words "appealed from" and adding "or modified order," so that it will read as follows:

If the circuit court of appeals affirms or modifies the order of the commission, its decree shall operate as an injunction to enjoin the packer or operator, and its officers, agents, and employees from further violating the provisions of the order or the modified order.

If the Secretary will read the original provision, the Senate will see the effect of the amendment.

The VICE PRESIDENT. The Secretary will read as requested.

The ASSISTANT SECRETARY. The paragraph reads as follows, beginning on page 17, line 8:

If the court determines that the just and proper disposition of such an appeal requires the taking of additional evidence, the court shall order such additional evidence to be taken before the commission in such manner and upon such terms and conditions as the court may deem proper. The commission may modify its findings as to the facts, or make new findings by reason of the additional evidence so taken, and it shall file such modified or new findings and its recommendations, if any, for the modification or setting aside of its original order with the return of such additional evidence. If the circuit court of appeals affirms or modifies the order of the commission, its decree shall operate as an injunction to enjoin the packer or operator, and its officers, agents, and employees from further violating the provisions of the order.

Then follows the proposed amendment:

or the modified order.

The amendment was agreed to.

Mr. FRANCE. I desire to offer an amendment, which I send to the desk.

The VICE PRESIDENT. The Secretary will report the amendment.

The ASSISTANT SECRETARY. Add a new section, to be known as section 5 and to read as follows:

SEC. 5. The principal office of the commission in the District of Columbia and its places of business outside of the District shall be of the character of open courtrooms to which the public and representatives of the press shall be at all times admitted, and there shall be provisions made for the accommodation of the public and the representatives of the press. The commission shall sit as a court, its business shall at all times be conducted in the open, its records shall be always open to public scrutiny, and its orders, decrees, and findings shall be delivered and promulgated from the bench in open session. It shall be illegal and a presumption of criminal collusion on the part of the commission to enter upon secret sessions with packers or others for the purpose of arriving at a conclusion as to what would be considered by the commission to be an unreasonable charge or rate of service as provided in section 14 of this act.

Any citizen or person, consumer, producer, or packer shall have the privilege of filing a complaint either in person or in writing against any packer or operator, and it shall be the duty of the commission to summon before it for a hearing all interested parties, every such hearing to be in the open as heretofore provided.

The amendment was rejected.

Mr. FRANCE. Mr. President, I offer another amendment.

The VICE PRESIDENT. The Secretary will report the amendment.

The ASSISTANT SECRETARY. At the end of section 21 insert the following proviso:

Provided, however, That any producer, dealer, person, packer, or operator who may have been aggrieved shall have the right in said petition filed with said clerk of the court not only to pray that the commission's order be set aside but to set forth any evidence which might lead to the belief that improper influences had been exerted on the commission or improper decisions had been rendered, and it shall be the duty of the United States district attorney of the district in which such petition may be filed to examine such evidence and submit it, if it seems best, to the Federal grand jury, and the Federal grand jury may bring an indictment against the commission or any member of it in the same manner as against packer, operator, or private citizen for collusion or complicity to avoid the law.

The amendment was rejected.

Mr. PITTMAN. Mr. President, I offer an amendment to be an additional section, section 30, to be added to the pending bill.

The VICE PRESIDENT. The Secretary will report the amendment.

The ASSISTANT SECRETARY. Add a new section to the bill, section 30, as follows:

SEC. 30. None of the provisions of this act shall be construed to include or be binding upon a person whose chief business is the raising of live stock or agricultural products.

Mr. WADSWORTH. On that I ask for the yeas and nays.

The yeas and nays were ordered.

The reading clerk proceeded to call the roll, and Mr. ASHURST answered in the affirmative.

Mr. KENYON. Mr. President, may we not have the amendment stated?

The VICE PRESIDENT. It would be a violation of the rule. The roll call has started.

The reading clerk resumed the calling of the roll.

Mr. HENDERSON (when his name was called). Making the same announcement of my pair as on the previous vote, I withhold my vote.

Mr. MCCUMBER (when his name was called). Making the same announcement of my pair as on the previous vote, I withhold my vote.

Mr. POMERENE (when his name was called). Again announcing my pair with the senior Senator from Iowa [Mr. CUMMINS], and not knowing how he would vote on this question, I withhold my vote.

Mr. SIMMONS (when his name was called). Making the same announcement of my pair as on the previous roll call, I withhold my vote.

Mr. WALSH of Montana (when his name was called). Repeating the announcement of my pair and transfer heretofore made, I vote "nay."

Mr. WILLIAMS (when his name was called). I understand that my pair, the senior Senator from Pennsylvania [Mr. PENROSE], if present, would vote "yea" upon the pending amendment. I therefore feel at liberty to vote, and vote "yea."

The roll call was concluded.

Mr. CURTIS. I wish to announce that the Senator from New Mexico [Mr. FALL] is paired with the Senator from Rhode Island [Mr. GERRY].

Mr. HARRISON. I desire to announce the absence of the Senator from Colorado [Mr. THOMAS] on account of illness in his family; also that the Senator from Oregon [Mr. CHAMBERLAIN]

and the Senator from Delaware [Mr. WOLCOTT] are absent due to illness.

The result was announced—yeas 38, nays 37, as follows:

YEAS—38.

Ashurst	Hale	Phelan	Smith, S. C.
Beckham	Heflin	Phipps	Stanley
Colt	Keyes	Pittman	Sterling
Dial	King	Poindexter	Sutherland
Edge	Knox	Reed	Townsend
Elkins	Lodge	Sherman	Wadsworth
Fernald	McKellar	Shields	Williams
Fletcher	Moses	Smith, Ariz.	Willis
France	Myers	Smith, Ga.	
Gore	New	Smith, Md.	

NAYS—37.

Ball	Harris	La Follette	Smoot
Borah	Hitchcock	Lenroot	Spencer
Brandegee	Johnson, Calif.	McNary	Swanson
Capper	Johnson, S. Dak.	Nelson	Trammell
Culberson	Jones, N. Mex.	Norris	Underwood
Curtis	Jones, Wash.	Owen	Walsh, Mass.
Dillingham	Kellogg	Page	Walsh, Mont.
Glass	Kendrick	Ransdell	
Gooding	Kenyon	Robinson	
Gronna	Kirby	Sheppard	

NOT VOTING—21.

Calder	Gerry	Newberry	Warren
Chamberlain	Harrison	Overman	Watson
Cummins	Henderson	Penrose	Wolcott
Fall	McCormick	Pomerene	
Frelinghuysen	McCumber	Simmons	
Gay	McLean	Thomas	

So Mr. PITTMAN's amendment was agreed to.

Mr. SMOOT. I offer the following amendment.

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. On page 2, line 20, amend by adding after the word "stockyards," the words "conducted or operated for compensation or profit."

The VICE PRESIDENT. There has been an amendment at that point already agreed to.

Mr. SMOOT. I know; but it is not exactly like the amendment I have offered, and these words ought to go in in connection with it.

The VICE PRESIDENT. The Secretary will state the previous amendment.

The ASSISTANT SECRETARY. The amendment agreed to was to strike out, in line 20, the words "commonly known as stockyards" and insert "maintained and conducted at or in connection with a public market," so that the paragraph reads:

The term "stockyards" means any place, establishment, or facility maintained and conducted at or in connection with a public market, and consisting of pens or other inclosures, etc.

Mr. SMOOT. Will the Senator having the bill in charge——

Mr. KENYON. I object to any debate.

Mr. SMOOT. I am not debating it at all.

Mr. KENYON. I know the Senator is not, but he is trying to do so.

Mr. ASHURST. Mr. President, I call for the regular order.

Mr. GRONNA. The regular order!

Mr. SMOOT. I will modify that to read "or operated for compensation or profit."

The VICE PRESIDENT. The vote by which the previous amendment was agreed to will have to be reconsidered. Without objection, it is reconsidered, and the question is on agreeing to the amendment proposed by the Senator from Utah to the amendment.

The amendment to the amendment was rejected.

The VICE PRESIDENT. The question recurs on the original amendment.

The amendment was agreed to.

Mr. BORAH. At the end of section 5 I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. Add at the end of section 5:

That all proceedings of the commission other than conferences between the members thereof will be open to the public.

The amendment was agreed to.

Mr. POMERENE. At the end of the amendment just agreed to I offer the following amendment.

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. Add, at the end of the amendment just agreed to, the following:

Upon the taking effect of this act the jurisdiction of the Federal Trade Commission, in so far as it relates to live stock and live-stock products in domestic commerce, shall be terminated.

The amendment was agreed to.

Mr. WADSWORTH. I move to amend the bill, on page 21 of the original print, by striking out lines 15 to 21, inclusive, and I ask that the Secretary may read that paragraph.

The VICE PRESIDENT. The Secretary will read the paragraph proposed to be stricken out.

The ASSISTANT SECRETARY. On page 21 strike out paragraph numbered 1, beginning on line 15, which reads:

(1) Prepare standardized plans and specifications for grounds, buildings, and other facilities suitable for the business conducted or to be conducted by registrants, and to furnish such plans and specifications free of charge to such registrants or to applicants for certificates of registration who have given assurances of undertaking the construction and operation of such buildings and facilities.

The amendment was agreed to.

The VICE PRESIDENT. If there are no further amendments as in Committee of the Whole, the bill will be reported to the Senate.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed and to be read a third time.

The bill was read the third time.

The VICE PRESIDENT. The question is, Shall the bill pass?

Mr. KENYON. On the final passage of the bill, I call for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. HENDERSON (when his name was called). Making the same announcement of my pair that I made on the previous vote, I withhold my vote.

Mr. McCUMBER (when his name was called). I have a general pair with the senior Senator from Colorado [Mr. THOMAS]. I am informed by that Senator that he would vote the same way I shall vote upon the final passage of the bill, and I therefore am at liberty to vote. I vote "nay."

Mr. POMERENE (when his name was called). Again announcing my pair with the senior Senator from Iowa [Mr. CUMMINS], I am advised that his vote would be the same as my own, and I am therefore privileged to vote. I vote "yea."

Mr. SIMMONS (when his name was called). I have a pair with the junior Senator from New York [Mr. CALDER]. In his absence, and because of my inability to procure a transfer of that pair, I withhold my vote. If I were at liberty to vote, I should vote "yea."

Mr. SMITH of South Carolina (when his name was called). On this vote I am paired with the Senator from Pennsylvania [Mr. PENROSE]. I therefore withhold my vote.

Mr. WILLIAMS (when his name was called). I have a standing pair with the Senator from Pennsylvania [Mr. PENROSE], but I understand that that pair has been transferred to the Senator from South Carolina [Mr. SMITH], and that I am at liberty to vote. That being the case, I vote "nay."

The roll call was concluded.

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Oregon [Mr. CHAMBERLAIN];

The Senator from New Mexico [Mr. FALL] with the Senator from Rhode Island [Mr. GERRY]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Louisiana [Mr. GAY].

Mr. HARRISON. I desire to announce the absence of the Senator from Colorado [Mr. THOMAS] on account of illness in his family, and also that the Senator from Oregon [Mr. CHAMBERLAIN] and the Senator from Delaware [Mr. WOLCOTT] are absent because of illness.

The result was announced—yeas 47, nays 33, as follows:

YEAS—47.

Ashurst	Hitchcock	McNary	Robinson
Borah	Johnson, Calif.	Myers	Sheppard
Capper	Johnson, S. Dak.	Nelson	Smith, Ga.
Culberson	Jones, N. Mex.	Norris	Spencer
Curtis	Jones, Wash.	Overman	Sterling
Fletcher	Kellogg	Owen	Swanson
Glass	Kendrick	Phelan	Townsend
Gooding	Kenyon	Pittman	Trammell
Gore	Kirby	Poindexter	Walsh, Mass.
Gronna	La Follette	Pomerene	Walsh, Mont.
Harris	Lenroot	Ransdell	Willis
Harrison	McKellar	Reed	

NAYS—33.

Ball	France	Moses	Stanley
Beckham	Hale	New	Sutherland
Brandegee	Heflin	Page	Underwood
Colt	Keyes	Phipps	Wadsworth
Dial	King	Sherman	Warren
Dillingham	Knox	Shields	Williams
Edge	Lodge	Smith, Ariz.	
Elkins	McCumber	Smith, Md.	
Fernald	McLean	Smoot	

NOT VOTING—16.

Calder	Frelinghuysen	McCormick	Smith, S. C.
Chamberlain	Gay	Newberry	Thomas
Cummins	Gerry	Penrose	Watson
Fall	Henderson	Simmons	Wolcott.

So the bill was passed.

Mr. REED. Mr. President, I desire to say a word in explanation of my vote on the bill which has just passed.

As the Senate knows, I have been confined to my home for some time by sickness. During that time the discussion of the bill chiefly took place. Immediately upon the resumption of my duties I was appointed to sit on the committee investigating the coal situation, and therefore missed the debate. A hasty examination of the bill, particularly of section 25, led me to the understanding that the industry concerned would be forced to take out a Federal license in order to do business. After making some remarks this morning, I found, however, on examining the bill, that the provision of the bill for registration is voluntary. That presents an entirely different aspect to the question and does not open the bill to the objection which I urged this morning.

In addition to that, amendments have been adopted to the bill this afternoon which I think very greatly relieve it from the same objection. One of them was the amendment offered by the Senator from Nevada [Mr. PITTMAN], which excludes from the operation of the bill the live-stock raisers and associations and confines the bill to the packers. Another amendment was the one offered by the Senator from Georgia [Mr. SMITH], which gave to the courts the right to interfere in the event a finding was not sustained by the weight of the evidence.

I think, notwithstanding those improvements, that the bill could have been further improved, and I trust it will be further improved. However, I am in accord with the thought that the main purpose of the bill is that of publicity and of laying the facts regarding the trade and business before the public. I am in favor of every measure which will give to the public all the light possible with reference to the packing industry or any other line of business.

AIR MAIL SERVICE (S. DOC. NO. 358).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read and referred to the Committee on Post Offices and Post Roads and ordered to be printed:

To the Senate and House of Representatives:

I transmit herewith for the consideration of the Congress a special report of the National Advisory Committee for Aeronautics, in which the committee sets forth its views as to the value to the Nation of the air mail service of the Post Office Department, based on broad, general considerations of national interest and policy.

I concur in the opinions expressed by the National Advisory Committee for Aeronautics and indorse its recommendation for the continuance of the air mail service.

WOODROW WILSON.

THE WHITE HOUSE,
24 January, 1921.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 15130) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1922, and for other purposes, agreed to the conference asked for by the Senate, and that Mr. DAVIS of Minnesota, Mr. CRAMTON, and Mr. BUCHANAN were appointed managers at the conference on the part of the House.

PETITIONS AND MEMORIALS.

Mr. KNOX presented a petition of sundry citizens of Lancaster Pa., praying for the adoption of legislation to protect Sunday in the District of Columbia from commercialism and safeguard it as a day of rest, which was referred to the Committee on the District of Columbia.

He also presented a petition of sundry citizens of Lancaster, Pa., praying for the adoption of an amendment to the Constitution of the United States providing for the establishment and enforcement of uniform laws for marriage and divorce, which was referred to the Committee on the Judiciary.

He also presented a resolution of the Altoona Real Estate Board, of Altoona, Pa., favoring an amendment to the Federal tax laws, exempting the income from mortgages secured by real estate (except the real estate of Public Utilities Corporations) from a Federal income tax for a period of five years from December 31, 1921, which was referred to the Committee on Finance.

He also presented resolutions of Pride of Allen Council, No. 182, of Allentown; Clover Leaf Council, No. 180, of Tamaqua; and Pride of West Hazleton Council, No. 201, of Hazleton, all in the State of Pennsylvania, favoring restriction of the immigration of aliens for at least two years, which were referred to the Committee on Immigration.

ESTATE OF AGNES INGELS.

Mr. ROBINSON, from the Committee on Claims, to which was referred the bill (S. 4692) for the relief of the heirs of Agnes Ingels, deceased, reported it favorably with an amendment, and submitted a report (No. 715) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. PHELAN:

A bill (S. 4904) granting a pension to W. S. Cooper (with accompanying papers); and

A bill (S. 4905) granting an increase of pension to John J. Rogers (with accompanying papers); to the Committee on Pensions.

By Mr. LODGE (by request):

A bill (S. 4906) to amend the act approved February 7, 1916, entitled "An act to provide for the maintenance of the United States Section of the International High Commission; to the Committee on Foreign Relations.

By Mr. SMOOT:

A bill (S. 4907) granting a pension to Richard A. Norris; to the Committee on Pensions.

By Mr. KING:

A bill (S. 4908) making an appropriation for the purchase of property adjoining the Federal building at Salt Lake City, Utah; to the Committee on Appropriations.

AMENDMENTS TO INDIAN APPROPRIATION BILL.

Mr. SHEPPARD submitted an amendment proposing to appropriate $10,000 for education and civilization of Alabama and Coushatta Indians in Polk County, Tex., intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

Mr. POINDEXTER submitted an amendment proposing to appropriate $44,309.67 for the county of Stevens and $71,460 for the county of Ferry, both in the State of Washington, to compensate those counties in lieu of taxes upon lands allotted to the Colville Indians at the regular rate at which similar lands in those counties, respectively, were assessed for the years 1901 to 1920, inclusive, and in pursuance of law, etc., intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

EMERGENCY TARIFF.

Mr. SMOOT. I ask that the unfinished business may be laid before the Senate.

The VICE PRESIDENT. Is there objection? The Chair hears none.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 15275) imposing temporary duties upon certain agricultural products to meet present emergencies, to provide revenue, and for other purposes.

Mr. CURTIS. I move that the Senate adjourn.

The motion was agreed to; and (at 5 o'clock and 20 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, January 25, 1921, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

MONDAY, *January 24, 1921.*

The House met at 12 o'clock noon.

The House was called to order by Mr. TILSON as Speaker pro tempore.

Rev. John H. Jeffries, of the Ryland Methodist Episcopal Church, Washington, D. C., offered the following prayer:

O Lord, open Thou our lips and our mouths shall show forth Thy praise. Let not the course of the business of this day disturb our trust in Thee. Grant us, O Lord, to pass this day in gladness and peace without stumbling and without sin, that reaching eventide victorious over all temptations we may praise Thee. In the name of our common Lord and Master. Amen.

The Journal of the proceedings of Saturday, January 22, 1921, was read and approved.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

Mr. ROGERS, by direction of the Committee on Appropriations, reported the bill (H. R. 15872) making appropriations for the Diplomatic and Consular Service for the fiscal year ending

June 30, 1922, which was read a first and second time, and, together with the accompanying report, referred to the Committee of the Whole House on the state of the Union and ordered printed.

Mr. GARNER. Mr. Speaker, I do not see the gentleman from Virginia [Mr. FLOOD] here, and I therefore reserve all points of order.

The SPEAKER pro tempore. The gentleman from Texas reserves all points of order.

EXTENSION OF REMARKS.

Mr. TIMBERLAKE. Mr. Speaker, I ask unanimous consent to have extended in the RECORD a speech delivered by my colleague, Mr. VAILE, in New York City on the subject of immigration from the American standpoint. I believe it is something that would be of interest to the membership of the House, as Mr. VAILE has had large experience in the Committee on Immigration.

The SPEAKER pro tempore. Is there objection?

There was no objection.

DISTRICT APPROPRIATION BILL.

Mr. DAVIS of Minnesota. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the District of Columbia appropriation bill, disagree to all the amendments placed thereon by the Senate, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. The gentleman from Minnesota asks unanimous consent to take from the Speaker's table the District appropriation bill, disagree to all of the Senate amendments, and agree to the conference. Is there objection?

Mr. ANDREWS of Nebraska. Mr. Speaker, reserving the right to object, I want to ask a question or two to decide whether I shall object or not. Is there an appropriation in this bill for the purchase of a building on Fifth Street near the Court House Square for the use of the recorder of deeds?

Mr. DAVIS of Minnesota. There is an item put on in the Senate to that effect. Nothing of that kind was carried in the House bill.

Mr. ANDREWS of Nebraska. How much does it carry?

Mr. DAVIS of Minnesota. Sixty or seventy thousand dollars, something of that kind.

Mr. ANDREWS of Nebraska. Mr. Speaker, unless some understanding can be reached with reference to the manner of handling this question I shall be obliged to object to the reference of the bill at this time.

Mr. DAVIS of Minnesota. Mr. Speaker, I shall state for the benefit of the gentleman that I certainly will not agree to that in conference without bringing it back to the House for consideration by the House.

Mr. ANDREWS of Nebraska. The House committee did not include that or give its approval to it.

Mr. DAVIS of Minnesota. It was not asked for in the estimates.

Mr. BLANTON. Mr. Speaker, the conferees would not have jurisdiction of that in any event until after it is voted upon by the House under the rule.

Mr. GARNER. Mr. Speaker, reserving the right to object, is the minority conferee willing to have this bill go to conference at this time?

Mr. DAVIS of Minnesota. Yes; he is. The gentleman from Texas [Mr. BUCHANAN] and myself have conferred frequently on the matter.

The SPEAKER pro tempore. Is there objection?

Mr. HAUGEN. Mr. Speaker, reserving the right to object, will the gentleman from Minnesota kindly indicate the character of legislation which has been placed upon the bill by the Senate which is subject to a point of order in the House?

Mr. DAVIS of Minnesota. I have not the bill with me; but, generally speaking, it pertains to the fiscal relations of the District, to the surplus that is in the Treasury, and to changing the financial system as regards making estimates and things of that kind. Those are the only really important items in the bill that are new legislation.

Mr. HAUGEN. With that understanding, I withdraw my objection.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears no objection, and, without objection, appoints as conferees Mr. DAVIS of Minnesota, Mr. CRAMTON, and Mr. BUCHANAN.

DISCHARGE OF ENLISTED MINORS FROM THE ARMY.

Mr. BLANTON. Mr. Speaker, I ask unanimous consent to proceed for two minutes.

The SPEAKER pro tempore. Is there objection?

Mr. DYER. Mr. Speaker, on what subject?

Mr. BLANTON. I want to call attention to a letter which I have received from The Adjutant General bearing upon the requirements placed upon a service man who has enlisted, when under the age of 18 years, where his parents desire him to get out of the service.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. BLANTON. Mr. Speaker, on the 17th of this month I called attention to the fact that where a recruiting officer succeeds in getting a young minor to leave home and enter the service, where the minor through patriotism or otherwise makes an affidavit that he is 18 years of age and has no dependents, when as a matter of fact he is under 18 years of age, sometimes 15 or 16 years of age, and has dependents, and when his parents thereafter seek to have him discharged, the War Department has a rule whereby they will not discharge him except under these conditions: They forfeit all of his pay, they turn him loose wherever he is and send him home on his own expense and allow him no mileage, giving him a discharge that is not honorable. I called attention to that fact, and the Secretary of War on the 20th wrote to me a letter intimating that I had done his department an injustice. I immediately took the matter up with Maj. Gilmor, who had on several occasions put this rule into effect, concerning my constituents, and asked him to write me a letter showing exactly what is the rule of the War Department. I have received the letter, which is signed by The Adjutant General, and I ask unanimous consent to insert it in the RECORD in connection with my remarks, because it shows that this practice does exist in the War Department; that they will not give a young man an honorable discharge; that they do forfeit his pay; that they do send him home, sometimes 1,500 and 2,000 miles, without travel allowance; and that they call his enlistment a fraudulent enlistment, simply because he represented his age to be 18, when he was only 15, 16, or 17, and when, as a matter of fact, he had been persuaded to leave his home and to so misrepresent his age by some recruiting officer, who is paid a good fee for obtaining such enlistment.

The SPEAKER pro tempore. The gentleman from Texas asks unanimous consent to extend his remarks in the RECORD by printing the matter indicated by him. Is there objection?

There was no objection.

The letter referred to is as follows:

WAR DEPARTMENT,
THE ADJUTANT GENERAL'S OFFICE,
Washington, January 22, 1921.

Hon. THOMAS L. BLANTON,
House of Representatives.

DEAR SIR: In reply to your telephonic request of this date in reference to the discharge of enlisted men from the Army on account of fraudulent enlistment, I beg to inform you as follows:

The Articles of War are direct legislation by Congress under the authority of the Constitution of the United States, which empowers Congress to raise and support armies, etc. Article 54 reads as follows:

"ART. 54. Fraudulent enlistment.—Any person who shall procure himself to be enlisted in the military service of the United States by means of willful misrepresentation or concealment as to his qualifications for enlistment, and shall receive pay or allowances under such enlistment, shall be punished as a court-martial may direct."

Army Regulations are issued under authority of the President, acting under his constitutional authority, and have the direct force of law, though not necessarily based on any specific law. The issuing of the various kinds of discharge certificates is governed by Army Regulations 150, and forfeiture of pay in cases of minors discharged for fraudulent enlistment is covered by Army Regulations 1380.

"150. Blank forms for discharge and final statements will be furnished by The Adjutant General's Department, and will be retained in the personal custody of company commanders. Discharge certificates will be used in the discharge of enlisted men, and for no other purpose, and will be of three classes—for honorable discharge, for discharge, and for dishonorable discharge. They will be used as follows:

"1. The blank for honorable discharge, when the soldier's conduct has been such as to warrant his reenlistment, except that this blank will not be used when the discharge is due to the commission of some crime or some misconduct prior to entry into the service, nor in case of discharge under the provisions of paragraph 148. The fact that the soldier is being discharged because of physical disability will not in itself preclude the use of this blank in his case if otherwise appropriate, although his physical or mental condition would not warrant his reenlistment.

"2. The blank for dishonorable discharge; for dishonorable discharge by sentence of a court-martial or a military commission.

"3. The blank for discharge when the soldier is discharged except as specified under subparagraphs 1 and 2 of this paragraph.

"1380. An enlisted man discharged for minority concealed at enlistment, or for other cause involving fraud on his part in the enlistment, is not entitled to pay and allowances, including those for travel, and will not receive a final statement unless deposits are due him, in which case a final statement, containing a full statement of the soldier's accounts at date of discharge, will be furnished."

In reference to the forfeiture of pay of men discharged for fraudulent enlistment, minority concealed, attention is invited to the following decision of the comptroller, April 29, 1916 (22 Comp. Dec., 538):

"Where fraudulent enlistment has been repudiated by the Government the enlisted man concerned can lawfully claim no rights thereunder with respect to pay, he being viewed not as having forfeited such pay but as never having earned pay under such enlistment contract."

It will be seen from the above-quoted Articles of War that the War Department might, if it saw fit, bring a minor who had fraudulently

enlisted, concealed his age, and thereby procured his enlistment, to trial before a court-martial. It has, however, been the policy of the Government, on account of the youth of such persons, not to exercise this authority, but rather to discharge the men on account of fraudulent enlistment, minority concealed, without recourse to punitive action. It has been the policy of the War Department to discharge men of this class with discharge certificates reading, "Discharged from the service," and not to issue an honorable discharge, as under Article of War 54 such men have been guilty of an offense for which they can be tried by court-martial.

It has been the policy to discharge the man at whatever station he may be when the occasion arises to take action relative to his discharge, except when the man is on service without the United States. In such a case the man is returned to the United States and discharged at the nearest post to the port of debarkation.

As will be seen from the above-quoted Army Regulations and the decision of the Comptroller of the Treasury, the forfeiture of pay and travel pay necessarily follows,

Very respectfully,

P. C. HARRIS,
The Adjutant General.

AGRICULTURAL APPROPRIATION BILL.

Mr. ANDERSON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15812, the Agricultural appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15812, the Agricultural appropriation bill, with Mr. HICKS in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15812, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 15812) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1922.

The CHAIRMAN. When the committee rose on Saturday there was a point of order reserved by the gentleman from Iowa [Mr. HAUGEN].

Mr. ANDERSON. The point of order was withdrawn, Mr. Chairman.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For all necessary expenses for investigations and experiments in animal husbandry; for experiments in animal feeding and breeding, including cooperation with the State agricultural experiment stations, including repairs and additions to and erection of buildings absolutely necessary to carry on the experiments, including the employment of labor in the city of Washington and elsewhere, rent outside of the District of Columbia, and all other necessary expenses, $282,820: *Provided*, That of the sum thus appropriated $58,640 may be used for experiments in poultry feeding and breeding: *Provided further*, That of the sum thus appropriated $8,000 is hereby made immediately available for the erection of necessary buildings at the United States sheep experiment station in Clark County, Idaho, to furnish facilities for the investigation of problems pertaining to the sheep and wool industry on the farms and ranges of the Western States.

Mr. HAUGEN. Mr. Speaker, I make a point of order against lines 11, 12, 13, 14, 15, 16, and 17.

The CHAIRMAN. On what grounds?

Mr. HAUGEN. On the ground that it makes the appropriation immediately available. There is no authority by law.

Mr. ANDERSON. Does the gentleman make a point of order against the provision which appropriates $58,640 for experiments in poultry feeding and breeding?

Mr. HAUGEN. No; beginning with line 11:

Provided further, That of the sum thus appropriated $8,000 shall be immediately available.

I will reserve the point of order so as to hear the gentleman.

Mr. ANDERSON. The gentleman knows this provision has been carried in the law for a number of years and that new additions to buildings as well as repairs and improvements are constantly necessary as the station grows. The department submitted a very ambitious program of construction involving about $16,250, but the committee did not feel that we were warranted in authorizing a larger proportion of the sum to be spent for additions and repairs than the committee had allowed heretofore, consequently it limited the amount to $8,000, which was the sum which has heretofore been allowed for that purpose. In reference to the immediately available clause, I might say that if there is to be any construction work done it is desirable that it should be begun in the spring of the year, and, of course, unless this money is available for construction immediately no work can be done until the 1st of July and a large part of the construction work would have to go over until the next fiscal year.

Mr. HAUGEN. The gentleman has stated that a number of appropriations have been made for these buildings in the past. It would seem that an appropriation of $8,000 for a sheep barn is rather extravagant, taking into consideration the amount appropriated heretofore. It seems that we might come to an end in appropriating for these buildings.

Mr. ANDERSON. I quite agree with the gentleman——

Mr. HAUGEN. Eight thousand dollars will build quite an extensive building.

Mr. ANDERSON. Of course, there are several additional buildings contemplated. In the first place there is a lambing shed necessary and a horse barn is necessary. The committee did not feel, not being on the ground and not knowing all the circumstances except as we got the information from those who had been on the ground, that we could say what buildings ought to be constructed and what buildings ought not to be constructed. We did feel that some amount ought to be allowed for the construction of buildings as well as repairs and additions thereto. It may be that the sum allowed is larger than is necessary or justifiable under the circumstances. If the gentleman from Iowa, who knows fully as much about this as I do, thinks it is too much, I shall have no objection to its reduction.

Mr. HAUGEN. As the gentleman knows, the committee has gone into this matter very thoroughly in the years past and liberal appropriations have been made. An $8,000 barn out in a forest miles and miles away from anybody seems large. The appropriation started with $10,000 a few years ago. It seems to me the amount is large.

Mr. ANDERSON. The $8,000 was intended to cover a horse barn costing $3,000, winter headquarters at some distance from the present headquarters in order that flocks might be separated and maintained at another place part of the year, extension of the lambing shed $3,500, and a storage reservoir $3,000. This station is located considerable distance from any town. It is up in a rough country, and it is contemplated that by building a dam in a coulee there a storage reservoir could be established which would provide water for the sheep, and also fire protection for the buildings. Then there is proposed a superintendent's residence costing $5,000, which the committee did not think necessary at this time, but I do think the horse barn and winter headquarters, extension of lambing shed, and possibly the storage reservoir there are necessary now.

Mr. HAUGEN. How much money is required?

Mr. ANDERSON. The total amount of the item was $16,250, but we did not feel like increasing the amount above what was allowed last year.

Mr. HAUGEN. What is the amount expended?

Mr. ANDERSON. The total amount which has been expended for construction at the station is $15,000.

Mr. SMITH of Idaho. May I ask the gentleman a question? What does the hearings show in reference to returns to the Government by the conduct of this experiment station? It is almost self-sustaining, is it not?

Mr. ANDERSON. It is not self-sustaining.

Mr. SMITH of Idaho. From the proceeds of the sale of wool and blooded stock raised at this experimental station the Government is at a very little expense in conducting it.

This field station of the Bureau of Animal Industry is devoted to the study of problems of the sheep ranchman and the farmer on stock-raising homesteads. It is located in Clark County, Idaho, 6 miles northeast of the town of Dubois. It comprises 28,000 acres and was established in 1915 by Executive order. The work and sheep formerly maintained by the bureau in Wyoming were transferred to the new location in 1917. Before anything could be done a well had to be dug, fences constructed, and buildings erected. The principal buildings are the headquarters building, which houses the superintendent, provides office space, and is also used as a cook house; the lambing shed, which is also used as a stable; a foreman's cottage, a bunk house, a combined pump house and garage, and an icehouse. These buildings cost $15,000, but could not be duplicated at present for almost twice that amount.

Two thousand sheep are now run on the station. The plan of work is divided into two general subjects:

I. Breeding problems.

II. Range utilization and feed production.

(1) The work in breeding is devoted to studying the production of a mutton-producing, heavy-shearing type of Rambouillet sheep; and

(2) Studying the different types of crossbred sheep to determine the best means of producing the crossbred type most suitable to the western ranges. This work has been in progress since the inauguration of the project in 1906 in Wyoming. Excellent progress has been made with the Rambouillet flock, and a pen of 25 buck lambs brought the second highest price paid at the Salt Lake ram sale in 1920. Scientific study with the Rambouillet flock shows that it pays to increase the length of the wool, even though the fiber may be a little less fine, and that open-faced sheep shear quite as much wool as those with densely wooled faces.

Corriedale sheep were imported from New Zealand in 1914 and are being studied in comparison with Lincoln-Rambouillet and

other crossbreds. The development of the Lincoln-Rambouillet crossbreds has been quite an achievement in animal breeding and has progressed so well that the name "Columbia" has been given to the sheep. The type has become quite well fixed in a remarkably short time—five years. Thus far the Columbias have produced more wool and mutton than the Corriedales or than other crossbreds.

Problems of range utilization and feed production began this year, when fencing and building equipment first made it possible. The successful solution of these problems is necessary if sheep ranching is to be a stable, profitable business. They are divided into two main heads:

First. A comparative study of different methods of utilizing range land for sheep grazing and of different methods of supplying water to dry ranges.

Second. The production of silage, roughage, and grain crops on arid ranges that may be utilized for winter feeding of sheep.

The first problem will cover such subjects as the grazing capacity of fenced ranges versus herding in the open, the grazing capacity in fenced pastures under continuous versus deferred grazing, the utilization of dry ranges by means of an artificial water supply (hauled to tanks in wagons), the winter use of the range in connection with feeding, and the reseeding of abandoned plowed areas found too dry for farming.

Crop production for winter feed was a success in 1920. A heavy crop of sunflower silage was produced. The mammoth Russian variety was planted and yielded 4½ tons per acre. Corn, feterita, kafir corn, and sorghum were planted for forage. They do not yield so well as sunflowers for silage but promise to produce dry roughage. Speltz was grown for grain and roughage.

In the estimates for the fiscal year 1921 the department recommended the purchase of irrigated land for use as an auxiliary to the station where hay would be grown for winter feed. In view of the success which has met the attempt to grow winter feed this year under dry-land conditions at the station the idea of depending on irrigated land has been abandoned. In excessively dry years some danger will undoubtedly be encountered, but it is believed that the information obtained for the benefit of the ranchmen of the Northwest will justify such a risk. The flock is being kept on the station this winter for the first time.

The station turned into the United States Treasury $6,996.41 during the fiscal year 1920. In addition $1,764 worth of products were exchanged. It is not expected that the returns for next year will be so great, but with the return of normal conditions the station will be able to show annual sales more nearly approaching its cost. This will be especially true when the flock reaches its maximum size of 4,000 ewes. The overhead expenses for a flock of this size will be little, if any, more than for a flock of 2,000 head—the present number. The returns will therefore be proportionately greater. The Government will not in many years have an opportunity to increase its flock such as now exists. Good pure-bred, unregistered Rambouillet ewes can be bought for $9 per head as against $18 to $25 a year ago. Other sheep are equally cheap in proportion. By increasing the flock to 4,000 ewes the station will have a "sheep outfit" which will rank with good commercial plants in size and which will command attention and respect from all sheep ranchmen. A sheep ranchman can then see range problems being studied scientifically under conditions closely similar to his own.

It is desirable that the equipment of the station be completed at the earliest possible date. The problems now facing the sheep ranchman are the most serious in a generation. The United States Sheep Experiment Station can not remove the financial difficulties confronting the ranchman, but it can study problems in breeding, flock management, and range utilization and obtain information thereon which will enable the business to become stabilized in future. The sooner the erection of needed buildings is out of the way the sooner the superintendent of the station can devote his entire time and attention to the study of range-sheep problems.

Mr. BLANTON. Will the gentleman yield there?

Mr. ANDERSON. Certainly.

Mr. BLANTON. I want to congratulate the distinguished chairman of the Committee on Agriculture on still retaining sufficient functioning powers to force this new appropriations committee to economize; otherwise I do not know what would become of the Treasury.

Mr. HAUGEN. The policy of the chairman of the committee has always been for economy, but to appropriate sufficient money to carry on the work of the department. I have no desire to cripple the department, but to provide it with every dollar required. But when gentlemen suggest $8,000, after $15,000 has been appropriated in the past, out in a rough country 100 miles from anywhere, it seems to me $8,000 is extraordinary. I believe we should make adequate appropriations. But the Government has already spent $15,000, and now $8,000 for a barn, where the neighbors get along with barns costing $200 or $300, seems to me to be out of proportion.

Mr. ANDERSON. As I have stated, the barn proposed is estimated to cost about $3,000.

Mr. HAUGEN. I understood the gentleman to say he might cut the amount.

Mr. ANDERSON. I have no objection to reducing it somewhat if the gentleman wants it.

Mr. HAUGEN. I am going to leave it to the chairman, who has the matter in charge.

Mr. ANDERSON. I am unable to find in the record, I will say to the gentleman from Idaho [Mr. SMITH], the figures in respect to the receipts of this station. But I think they are considerable.

Mr. SMITH of Idaho. The expense of maintaining the station is but little more than the income from the sale of sheep and wool.

Mr. HAUGEN. I understand the bottom has fallen out of the market and that it is not profitable at present.

Mr. SMITH of Idaho. And we want to keep the experiment station there in order to encourage the farmers to continue in the business.

Mr. HAUGEN. I want to encourage it as much as the gentleman, but at the present time we can not waste money on such a matter.

Mr. SMITH of Idaho. We are not wasting money in an experiment of this kind.

Mr. HAUGEN. I am willing to give every dollar required, but am opposed to throwing our money away at this time.

Mr. ANDERSON. The committee assumed that the committee that has heretofore considered this matter and carried this item of $8,000 for some years had given the matter consideration, and we only provided as an appropriation for repairs and construction the same amount as appropriated heretofore.

Mr. HAUGEN. As the gentleman knows, the committee referred to has never given this appropriation for future expenditure any consideration. I am perfectly willing to abide by the judgment of the new committee. However, I believe we have a right to inquire what the expenditures are to be made for. Even if this is a wise expenditure we have the right to inquire into it.

As I recall, these gentlemen appeared before the committee and asked for appropriations for this purpose. We started this appropriation of $10,000 a few years ago. We have expended $15,000 in buildings, and now we are asked to appropriate another $8,000 out in the desert.

Mr. SMITH of Idaho. That is the place to spend money, where men are handling sheep, and not in the city.

Mr. BLANTON. Mr. Chairman, I make the point of order that it is new legislation on an appropriation bill.

Mr. ANDERSON. Mr. Chairman, it is not subject to that point of order. It is not new legislation. It may not be authorized, if that is the gentleman's point of order.

Mr. BLANTON. I stated, and the gentleman did not hear the balance of my point of order, that it is new legislation on an appropriation bill, not authorized by law.

The CHAIRMAN. Is that the point of order the gentleman makes?

Mr. BLANTON. Yes; that there is no authority in law.

Mr. ANDERSON. I desire to call the attention of the Chair, on the "immediately available" part of it, to a decision rendered by the Chair a few days ago, the gentleman from Illinois [Mr. MANN] being in the chair at the time. As I recall, the Chair at that time held that the Committee on Appropriations, having the jurisdiction to report a deficiency, had the power to report such a deficiency either in the general deficiency bill or in the form of an "immediately available" clause upon a bill which the committee has the authority to report. I can not cite the Chair to the decision, but I think the parliamentary clerk will be able to refer to it.

Mr. BLANTON. If that is the proper rule, Mr. Chairman, you can put any kind of a deficiency on any one of these appropriation bills.

Mr. ANDERSON. Unquestionably that is the effect of the decision of the Chair, who was at that time, as I said, the distinguished gentleman from Illinois [Mr. MANN], whose ability as a parliamentarian I think even the gentleman from Texas [Mr. BLANTON] will admit.

I should also like to call the attention of the Chair to the fact that the general language——

The CHAIRMAN. The Chair would like to ask the gentleman from Minnesota if he can point to any provision of the law authorizing the erection of these buildings?

Mr. HAUGEN. And making it immediately available. It has been universally held that by carrying the language in an appropriation bill makes it subject to a point of order and does not make it in order. I do not think it is necessary to make an extended discussion on that.

Mr. ANDERSON. I am not able to point to any language. I was referring entirely to the "immediately available" clause.

The CHAIRMAN. The Chair feels, and inasmuch as he has been unable to have pointed out to him the "immediately available" provision for these buildings, that he should sustain the point of order, and sustains the point of order. The Clerk will read.

The Clerk read as follows:

For investigating the disease of hog cholera, and for its control or eradication by such means as may be necessary, including demonstrations, the formation of organizations, and other methods, either independently or in cooperation with farmers' associations, State or county authorities, $510,000: *Provided*, That of said sum $195,000 shall be available for expenditure in carrying out the provisions of the act approved March 4, 1913, regulating the preparation, sale, barter, exchange, or shipment of any virus, serum, toxin, or analogous product manufactured in the United States and the importation of such products intended for use in the treatment of domestic animals: *And provided further*, That of said sum $29,520 shall be available for researches concerning the cause, modes of spread, and methods of treatment and prevention of this disease.

Mr. SNELL. Mr. Chairman, in line 8 I move to strike out "$510,000" and insert "$410,000."

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SNELL: Page 15, line 8, strike out the figures "$510,000" and insert in lieu thereof the figures "$410,000."

Mr. SNELL. Mr. Chairman, I fully appreciate the importance of this work. Last year the Agricultural Committee brought in an appropriation of $510,000, and it was cut down to $410,000 on the floor of the House. I have looked over the hearings on this proposition very carefully. As near as I can learn, the reason why the experts claimed they need more money this year than they had last year is from the fact that the individual States have not properly cooperated with them in fighting this disease, and if these individual States had done so the $410,000 that was appropriated last year would be fully enough to carry on this work in a satisfactory manner during the present year. And in this connection I want to call the attention of the House to the hearings in this matter, and the statement made by Dr. Mohler, who is the man in charge and who testified before the committee. And I do this for the purpose of further calling the attention of the committee to the fast-growing practice of the Federal Government paying all the expenses in connection with these local activities, and I am opposed to that tendency.

This was in answer to a question by the chairman of the committee, Mr. ANDERSON, in regard to the cooperation that was received by the different States in regard to this one individual item. Dr. Mohler says:

There is relatively little money being expended by the States at the present time. As in a great many other lines of work, the various States like to have some kind of a leader and they can get more money from their legislatures in that way than when we drop out of the work.

Now, there is the actual testimony adduced before the committee, and there is no testimony there to show but that if the individual States would cooperate to the extent that the Federal Government has gone in this one proposition they would be able entirely to control this disease. Therefore, on the evidence of the committee and the statement of the chairman of the committee and Dr. Mohler himself, I feel that $410,000 is enough to appropriate for this purpose at this time. This is not a question of the character or need of this work, but a question of whether the Federal Government will go ahead and do all the work and let the States stand idly by and look on. I am against this policy and I hope this committee is.

Mr. RUBEY rose.

The CHAIRMAN. The gentleman from Missouri is recognized in opposition to the amendment.

Mr. RUBEY. Mr. Chairman, I am opposed to this amendment. This matter was fully discussed on the floor of the House at the last session. It is true that the amendment now offered is in amount the same as that to which the appropriation was then reduced on the floor of the House. I want to call the attention of the gentleman from New York to a speech found in the RECORD of Saturday by a gentleman on his side of the House. I opposed the reduction of the hog-cholera item in the last Congress, but my arguments did not seem to have the desired effect. I want to give the gentleman from New York an argument made by a gentleman on his side of the House, because I feel that coming from that source the argument will have more effect than if presented by myself. The gentleman from Nebraska [Mr. KINKAID], in discussing this matter in the RECORD, set forth in the best possible way the reasons for this increase. He called attention to the work that has been done and to the amount of the losses from hog cholera during the fall of 1920, and here is what he says:

According to the testimony of the able and efficient Dr. Mohler, Chief of the Bureau of Animal Industry, the breaking out and spread of hog cholera was increased over that of the previous fiscal year very noticeably in the States of Iowa, Kansas, Nebraska, Kentucky, Wisconsin, Illinois, North Carolina, and Michigan. The testimony of Dr. Mohler shows that 400 outbreaks occurred in October, an increase of over 1,000 per cent over the same month in 1919; that in Michigan 488 outbreaks occurred between July and November 30, 1920, with a loss of over 6,000 hogs. In North Dakota 216 outbreaks have occurred since the commencement of this fiscal year, the most of it in October. Dr. Mohler stated that in Iowa the reports he has received show that hog cholera is prevalent generally throughout the State, and that it has been found where formerly it had been unknown; further, the witness stated that in Wisconsin the disease has been more prevalent during the last three months than for any like period since the cooperative work of his bureau, meaning with the States, commenced. Dr. Mohler attributes the greater prevalence of hog cholera during this fiscal year directly to the failure of veterinarians to meet the emergencies.

Dr. Mohler attributes the greater prevalence of hog cholera during this fiscal year directly to the reduced number of veterinarians and consequent failure of the veterinarians to meet the emergency. I want also to quote the Secretary of Agriculture when he appeared before the subcommittee that had this bill then in charge. The Secretary made this statement, calling attention to the fact of the failure of Congress to make adequate appropriations, and he gave this instance:

For instance, in the last bill the hog-cholera appropriation was reduced by nearly $250,000, but that money was not really saved, gentlemen. Of course, nobody can put down on paper what it has cost this country because of the apparent saving of $250,000, but I feel certain that it has cost $25 for every dollar saved, so far as the farmers are concerned.

That means that by a reduction of $250,000 in this House a year ago we have lost to the hog raisers of this country $6,250,000.

Now, while I would like to see this item increased to the amount of the estimate, which is over $600,000, I am perfectly willing that we shall give to the Department of Agriculture this year for this splendid work the same amount which the Committee on Agriculture reported to this House in the last session of Congress. Five hundred and ten thousand dollars was reported by the Committee on Agriculture a year ago, and on the floor of the House, as I had the right to do, I moved to increase that appropriation by $100,000. What happened? Why, the chairman of the Committee on Agriculture came to me and said in substance, "If you will withdraw your amendment, we will give you the $510,000, but if you do not do that we will move to cut it down $100,000." I said, "If those are your tactics, go ahead and move to cut it down by $100,000." The gentleman from Connecticut [Mr. TILSON] made the motion to cut it down by $100,000. The motion failed in the Committee of the Whole, according to my recollection, but when we got back into the House, on a roll call, it lacked 7 votes of being defeated, and the amendment of the gentleman from Connecticut prevailed. You saved, therefore, in money $250,000 and you lost to the hog raisers of this country over $6,000,000. I do not believe in that sort of economy. I want this item to stand as it is to-day and as it was reported by the Committee on Agriculture one year ago. [Applause.]

Mr. McKENZIE. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois moves to strike out the last word.

Mr. McKENZIE. I do so, Mr. Chairman, for the purpose of asking the gentleman from Missouri [Mr. RUBEY] a question. The gentleman from Missouri has stated that according to the testimony taken before the Committee on Agriculture, by the withholding of $250,000 from this appropriation the hog raisers of this country probably lost $6,000,000 or more. I would like the gentleman from Missouri to point out in what manner that loss occurred. What activities would have not been carried on by the Government which, if we had made the appropriations, would have saved the lives of those hogs?

Mr. RUBEY. If you had made the appropriation as it was reported by the committee last year you would have had 140 veterinarians located in the hog centers of the country, ready to go out at a moment's notice and investigate every outbreak of hog cholera. When July 1, 1920, came, because of the lack of appropriations this force was reduced from 140 down to 54, and the department did not have the men necessary to investigate these outbreaks. I know that in my own country, in south Missouri, there were outbreaks of hog cholera, and we

telegraphed to Jefferson City, where the department work is located, asking them to send veterinarians, and they did not have them to send. They could not meet these outbreaks. If they had had the men to do this, to stop these outbreaks right in their incipiency, these great spreads of hog cholera would not have come. Hog cholera is a disease which spreads very rapidly. Within a few days it will go through a whole herd, and you have got to get it right when it starts, and you must have an adequate number of men in order to handle it.

Mr. McKENZIE. Is it not a fact that it has been demonstrated that if the farmers will have the hogs vaccinated they will be immune from this disease?

Mr. RUBEY. That is true.

Mr. McKENZIE. And the outbreak will not come?

Mr. RUBEY. That is true; but it is impossible to get the farmers of the country to do that. It is somewhat expensive, and they do not all take this precaution. Then it is rather a difficult thing to do. Veterinarians are required to do the work, and the result is that the farmer waits, hoping that the outbreak will not come. But at the very moment when it does come, if he can get the help, he can stop the spread of it.

Mr. REAVIS. Will the gentleman yield to me?

Mr. McKENZIE. Yes.

Mr. REAVIS. One of the items for which this money is to be expended, as shown by line 5, is to form organizations. One of the chief values of the participation of the Agricultural Department in fighting hog cholera is the formation of such organizations not alone to combat the disease but to prevent it. These organizations include the farmers living within certain zones. The moment an outbreak comes it is reported. The entire organization takes up the effort to combat it. Such organizations stimulate local interest, and to remove them results always in carelessness and indifference. Then follows the loss of thousands of hogs.

Mr. McKENZIE. Does the gentleman favor making vaccination compulsory?

Mr. REAVIS. I do not know whether we could do it without having somebody make a point of order on the item.

Mr. HAUGEN. The chairman of the Committee on Agriculture has no recollection of going to the gentleman from Missouri suggesting the withdrawal of the amendment. The gentleman from Missouri [Mr. RUBEY] is mistaken. I recall the gentleman's amendment. I recall that the Committee on Agriculture reported $510,000 for this purpose last year and that the House, after giving the matter due consideration, cut the appropriation to $410,000.

Mr. RUBEY. If the gentleman will yield, I will say that I have a very distinct recollection of it.

Mr. HAUGEN. That is neither here nor there.

Mr. WHEELER. If the amendment of the gentleman from Missouri [Mr. RUBEY] had prevailed last year, does the gentleman think the farmers would have sustained any losses of hogs from hog cholera?

Mr. HAUGEN. I do not think they sustained any loss because of the cut. What is necessary to do is to provide adequate funds for the supervision of the plants producing the serum, so that the hog raiser may know that the serum he buys is potent serum. The bill provides for this inspection. The bill carries an appropriation of $195,000 available for expenses and for carrying out the provisions of the act approved March 4, 1913, regulating the preparation, sale, barter, exchange, and shipment of serum. It also carries an item of $29,520 for research work, which also is absolutely necessary. Under the amendment suggested it would leave $185,480 for administration and demonstration work.

The gentleman has stated that it is a difficult task to perform. The gentleman is aware of the fact that some associations have passed resolutions declaring that it is not necessary to employ the services of veterinarians to administer the serum; nearly anybody can vaccinate a hog without the aid of a veterinarian. Of course, the all-important thing is to have a potent serum.

Mr. REAVIS. Does the gentleman believe the appropriation of $510,000 is too much?

Mr. HAUGEN. That is for the House to determine. We got along very nicely last year with $410,000. Let me state to the gentleman that when the question of potency of the serum was raised some years ago the committee said to this bureau that it was first up to them to demonstrate the value or merits of this serum. We stated that we would give them all the money required, with the understanding that the work would be completed in a few years. It was assumed that the work would be completed in two or three years. We have now appropriated for this purpose for a number of years. Instead of cutting the appropriation there is a request for a large increase.

The CHAIRMAN. The time of the gentleman has expired.

Mr. REAVIS. I move to strike out the last word.

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in 20 minutes.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that all debate on the paragraph and amendments thereto close in 20 minutes. Is there objection?

There was no objection.

Mr. REAVIS. Mr. Chairman, I would like to ask again the gentleman from Iowa if he thinks the appropriation of $510,000 is too much?

Mr. HAUGEN. I did not have an opportunity to examine the witnesses. I do not know what testimony developed; but I am satisfied it will make no material difference, whether it is $510,000 or $1,000,000. The proposition is this——

Mr. REAVIS. I am not asking what the proposition is. I am asking whether the gentleman believes that $510,000 is too much. Does the gentleman believe that it is?

Mr. HAUGEN. I have answered that I did not have an opportunity to examine the witnesses.

Mr. REAVIS. I take it, then, for granted that the gentleman's answer is that he does not know. I understood the gentleman from Iowa to make the suggestion, in answer to a question by the gentleman from Illinois [Mr. WHEELER] as to the cutting of the appropriation down in the last appropriation bill to $410,000, that in his judgment it resulted in no loss to the farmer.

Mr. HAUGEN. I do not believe that it did.

Mr. REAVIS. I understood the gentleman to reply that he did not think it was any loss?

Mr. HAUGEN. Exactly.

Mr. REAVIS. Then, if we can get the same result with $410,000, this appropriation of $510,000 is too much.

Mr. HAUGEN. That is the gentleman's conclusion; he has answered his own question.

Mr. REAVIS. Mr. Chairman, I am frank to say that I have sometimes been very doubtful about the beneficial service of many of the appropriations carried in the Agricultural bill. I live in an agricultural community and have lived in one all my life. I have been connected more or less with farming. There are many appropriations carried in this bill annually where I have failed to discover any beneficial service going at least to the people of my section, but I do not think that there is any greater benefit or one of more value than that which calls for an appropriation for the eradication of hog cholera.

A number of years ago a distinguished citizen of my State, Hon. J. Sterling Morton, who was afterwards Secretary of Agriculture in the Cabinet of President Cleveland, made the statement that if any man would discover a cure or preventive of hog cholera, it would remove the mortgages from the farms in the Middle West.

One of the most beneficial things the Government has done for the farmer, so far as my observation goes, has been the cooperation and assistance in eradicating one of the worst diseases that afflict the live stock of the Middle West. It seems to me that to cut this appropriation down and cripple what I think is one of the most beneficial services that the Government has ever contributed to the agricultural section of this country, a service whose benefit can be traced directly, would be false economy and one of which this House should not be guilty.

I am quite sure that one of the benefits of cooperation of the Government rests largely in not only taking care of the live stock, not only providing potent serum, but getting the public sentiment in the community in favor of the administration of the serum.

There are many farmers even at this time who are prejudiced against vaccination or inoculation. I know that the sending out of these veterinarians by the Government to participate in the creation of organizations, provided for in this section, creating a sentiment among the farmers looking to the protection of their live stock is a service that is beneficial in the extreme. In the absence of that, if there is no cooperation, if the organizations are permitted to die, the result is that the farmers will grow careless, and instead of protecting their swine by making them immune from hog cholera they will permit them to go without inoculation, and the result is that it breaks out in one herd and many other farmers who do provide against it and try to protect their herds become victims of the carelessness of one individual.

The CHAIRMAN. The time of the gentleman from Nebraska has expired.

Mr. REAVIS had leave to extend his remarks.

Mr. TOWNER. Mr. Chairman, I am in entire agreement with the gentleman from Nebraska regarding the unwisdom of cutting down this appropriation. Let us consider for a moment the

nature of the problem. It may, of course, be said, Let the farmer take care of his hogs, let him inoculate them if he desires, and let him protect himself if he desires. But, Mr. Chairman, the farmer can not protect himself. If his neighbor's hog has the cholera, even if he tries to protect his own hogs, he will find infection from his neighbor's yards will soon reach his own.

Suppose we say, Let the States take care of it. That has been shown to be equally ineffective. If one State takes care of it which is adjacent to another State that does not, then across the border comes the infection, so that even States can not protect themselves effectively by quarantine regulations. It will be seen, therefore, that this problem is nation wide in its extent, not that the Nation should control it, but certainly the Nation should become interested in it. It is a difficult proposition for the Nation to control it, because constitutionally the only right that the Nation would have would be by quarantine regulations, and those have been shown to be so ineffective in many cases and so abhorrent to the people upon whom these regulations are enforced that it should be the last thing which the Government should undertake to do. What else can we do? We can do just exactly what is proposed to be done, and what has been done for some years with regard to this matter. As the gentleman from Nebraska [Mr. REAVIS] has well said, stimulate the interest of the people, stimulate above everything else the cooperation of the people, and educate the people. Gentlemen should understand that it is not universally agreed that these serums do reach and are a cure for this terrible infectious and contagious disease. Gentlemen should understand that there are being circulated by privately interested parties statements against the efficacy of this remedy, advocating some patent remedy that they desire to sell themselves. All kinds of influences are at work against the farmers pursuing a demonstrated and admitted help and remedy. It is absolutely necessary now, even after these years of trial and demonstration, that special effort should be made to secure this cooperation on the part of the farmers throughout the United States. It will require not only every dollar, but advantageously twice this amount could be used, and it would redound to the advantage of the people of the United States, because let me suggest to those gentlemen who are not immediately interested in expenditures that are rural in their nature that there is no other food product which can be so immediately increased in amount, with a consequent decrease in value to the consumer, if we can eliminate the robber middleman, as the production of meat from swine. I sincerely hope that the amendment will not be agreed to.

Mr. SNELL. Mr. Chairman, I have no controversy with the distinguished gentleman from Missouri [Mr. RUBEY] in regard to the statement he made about the loss of hogs during the last year, or the importance of this proposition, but I simply call the attention of the House to the fact that the Federal Government, according to the statement in the hearings, is doing most all of this work. The reason for the great loss last year, if we can place any dependency on the hearings, is because the States themselves did not do the proper amount of work in cooperation with the Federal Government.

As the gentleman from Iowa [Mr. TOWNER] has just said, it is for the purpose of stimulating cooperation. We have been stimulating cooperation long enough until the work is now done entirely on the part of the Federal Government. The States have almost entirely ceased to function in this matter, and will as long as they can get the Federal Government to do it for them. That is the point which I wish to bring before the House. The States are placing all of the burden on the Federal Government, and we are assuming it, and if we make the appropriation the same as it was last year, we are certainly giving a fair amount to this proposition at this time.

Mr. WHEELER. Does the gentleman contend that the States prior to these appropriations made by the Government were more liberal in their appropriations?

Mr. SNELL. I can not say that they were more liberal previous to this, but I can say from the statement of gentlemen in charge of the work that the States are not properly cooperating at this time.

Mr. FESS. Does the gentleman's amendment reduce the amount to the amount which we appropriated last year?

Mr. SNELL. Yes; to the same amount that we appropriated last year—$410,000.

Mr. ANDERSON. Mr. Chairman, I ask for a vote.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from New York.

Mr. JOHNSON of Mississippi. Mr. Chairman, may we have the amendment reported?

The CHAIRMAN. Without objection, the amendment will be again reported.

There was no objection, and the Clerk again reported the amendment offered by Mr. SNELL.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

The amendment was rejected.

The Clerk read as follows:

For all necessary expenses for the investigation, treatment, and eradication of dourine, $50,000.

Mr. HAYDEN. Mr. Chairman, I move to strike out the last word. I notice in the hearings that the Chief of the Bureau of Animal Industry states that the bureau could stand a cut of $10,000 in this appropriation. The committee took him at his word and not only reduced the amount by $10,000, but cut it $3,000 more.

Mr. ANDERSON. Mr. Chairman, the committee after somewhat careful investigation of the situation felt confident that a cut of that amount would not reduce the work beyond the point where it will bring about satisfactory results.

Mr. HAYDEN. I am interested in this matter because the Bureau of Animal Industry has been engaged in the destruction of Indian horses affected with this disease on the Indian reservations in my State. Unless an ample appropriation is made, the work that has been done heretofore will be lost. I hope that the gentleman in charge of the bill is correct in his statement that this is an ample sum with which to carry on this important work for the next fiscal year.

Mr. ANDERSON. The remaining infection is very small and is confined to the Indian reservations among the Indian ponies. I feel confident that the amount asked for is sufficient.

Mr. HAYDEN. If ample appropriations are made, this disease ought to be entirely eradicated in the next three or four years, while if not enough money is appropriated Congress must ultimately appropriate a larger total sum, although a less sum annually, because the expense will extend over a larger period of years.

Mr. ANDERSON. Mr. Chairman, I think the sum is ample for the purpose.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The committee informally rose; and the Speaker pro tempore having taken the chair, a message in writing from the President of the United States was communicated to the House of Representatives by Mr. Sharkey, one of his secretaries.

AGRICULTURAL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

Total for Bureau of Animal Industry, $6,070,576.

Mr. BLANTON. Mr. Chairman, I move to strike out the last word for the purpose of asking the chairman a question in respect to the next paragraph.

Mr. ANDERSON. Can not the gentleman wait until that is read?

Mr. BLANTON. I have a reason for asking him now, because it may save the making of a point of order a little later.

Mr. ANDERSON. Very well.

Mr. BLANTON. It provides for a seed inspector and also for a seed warehouse. Will the rare farm seeds and the rare foreign seeds we still carry in this bill require these two offices?

Mr. ANDERSON. Yes. If the gentleman had gone over the statutory roll carefully——

Mr. BLANTON. I have.

Mr. ANDERSON. He will note that we have eliminated one assistant in the seed distribution and one seed warehouse. Those were the employees on the roll connected with the congressional seed distribution.

Mr. BLANTON. And these employees had to do only with the foreign and the rare seeds?

Mr. ANDERSON. Yes.

Mr. BLANTON. Mr. Chairman, I withdraw the pro forma amendment.

The Clerk read as follows:

BUREAU OF PLANT INDUSTRY.

Salaries, Bureau of Plant Industry: Physiologist and pathologist, who shall be chief of bureau, $5,000; assistant to the chief, $3,000; officer in charge of publications, $2,250; landscape gardner, $1,800; officer in charge of records, $2,250; executive clerks—4 at $2,250 each, 5 at $1,980 each; seed inspector, $1,000; seed warehouseman, $1,400; clerks—12 of class 4, 18 of class 3, 10 at $1,500 each, 31 of class 2, 92 of class 1, 2 at $1,100 each, 5 at $1,080 each, 7 at $1,020 each, 30 at $1,000 each; 2 clerks or draftsmen at $1,200 each; artist, $1,620; clerks or artists—1 $1,400, 2 at $1,200 each; laboratory aids—2 at $1,440 each, 1 $1,380, 7 at $960 each, 2 at $900 each, 6 at $840 each; 4 laboratory aids or clerks at $1,200 each; laboratory aids, clerks, or skilled laborers—1 $1,080, 3 at $1,020 each; map tracer or laboratory aid, $900; assistants in technology—1 $1,400, 1 $1,380; gardeners—2 at $1,440 each, 6 at $1,200 each, 8 at $1,100 each, 20 at $900 each, 10 at $780 each; general mechanic, $1,400; mechanician, $1,080; mechanical assistants—1 $1,400, 1 $1,200; teamster, $840; skilled laborers—3 at $1,100 each, 1 $960, 2 at $900 each, 3 at $840 each;

laborers—1 $780, 88 at $720 each; 22 messengers or laborers at $480 each; messenger boys—5 at $660 each, 14 at $600 each, 10 at $480 each; charwomen—11 at $480 each, 21 at $240 each; in all, $498,500.

Mr. BLANTON. Mr. Chairman, I move to strike out the last word. Mr. Chairman, this one paragraph provides for 51 messengers. My colleagues, some of them who are here, will remember that last February when we had the last Agricultural bill up for the present fiscal year I made a fight on the messenger service which was in that bill. That bill provided for 743 messengers for the Department of Agriculture alone. I congratulate this committee because they have cut off 169 of those messengers from the present bill.

Mr. ANDERSON. May I direct attention of the gentleman to the fact, too, that in many cases the designation has been changed to messenger or laborer? The men are employed not as messengers but as laborers.

Mr. BLANTON. Yes; and that is a little scheme of the department down here and bureau heads by which they have been running it over our committee year after year. They have enough laborers down there already, and whenever you object to a certain item they put some other designation on it so they can have excuse for carrying it on. Now, instead of providing for 743 messengers as last year, they provide only 574, or in other words they have cut down the messenger service 169, and yet I want to say there are three or four hundred more messengers in this bill that ought to come out, and they would come out but for the very fact they are on what they call the statutory roll. Congress has not yet gotten to such a point where it has bravery enough to interfere with the statutory roll, even though the statutory roll is composed of idle employees drawing salaries from this Government.

Mr. HAUGEN. It is true as stated by the gentleman that a number of salaries have been dropped, low salaries, but the gentleman will observe a number of the new salaries ranging from $1,100 to $2,250 have been added.

Mr. BLANTON. Quite a number. This is the first time since the distinguished gentleman from Iowa has been serving on this committee so zealously that he has ever admitted that on this floor. I take it that he only admits it now because some other gentlemen are in charge of this bill and he feels a little peeved that his authority has been taken away.

Mr. HAUGEN. Oh, well, that is an old story the gentleman has been giving us almost every day. I will tell the gentleman what has been taking place. The Committee on Agriculture carried these low salaries and the contention has been all the time that they should be dropped and higher salaries should be substituted——

Mr. BLANTON. I hope the gentleman will not take up all of my time.

Mr. HAUGEN. The gentleman raised the question. That is exactly what has been done now. The low salaries have been dropped and the high salaries have been added; as, for instance, here they have four at $2,250, and they dropped a few at $720. If they carried $720 and they were not employed, it did not cost the Government one cent——

Mr. BLANTON. Does the gentleman approve of that?

Mr. HAUGEN. No; but the gentleman seems to be in favor of dropping the low salaries and adding the high salaries. He is in favor of dropping the $720 salary and making the $2,250 salary, which is inconsistent with economy.

Mr. BLANTON. No; I am trying to have them all dropped, every surplus one of them. When the last bill carried 743 messengers, I was in favor of dropping 700 of such messengers, as 43 were enough to allow. I was in favor of taking them off the pay roll; and this committee has partly adopted the very suggestion I made last year, because it has seen fit to cut out of this new bill 169 messengers, but they did not go far enough. They ought to use the snickersnee of the gentleman from Wyoming and cut about 500 more from the bill, which they would have done if they were carrying out the pledges made to the country through their party on the hustings prior to the last election. To keep from offering an amendment at the end of each paragraph I intend to offer a motion to recommit to strike out 500 of these messengers from this bill, because there is no reason for supplying every little bureau chief down there with a messenger to run his errands every time he wants to order theater tickets from the opera house. There is no reason why he should have Tom, Dick, and Harry at his beck and call to do his private errands for him. Let him do his own errands. We have to do ours.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ANDERSON. Mr. Chairman, I suppose the gentleman from Texas would like to have the bureau chiefs use their own time to run the messenger service. As far as I am concerned I prefer to use the services of a $600 messenger boy instead of using the service of a $5,000 bureau chief to run messages. Now, it is true there are a lot of messenger boys carried on these rolls, but gentlemen must remember that the Department of Agriculture is scattered in 42 buildings and these buildings are scattered all over the city of Washington. Many of these messengers are carried outside of the District of Columbia. For instance, messengers are used in connection with the Weather Bureau stations and in connection with the other stations established by the Department of Agriculture outside of Washington. It is possible that a careful examination of all these statutory rolls will enable us eventually to reduce still further the number of messengers carried on the Agricultural Department roll, and I assure the gentleman from Texas and gentlemen of the House, that whenever that course is possible, if I have anything to do with the bill in the future, it will be adopted, but it can not and ought not to be done to the extent of crippling the service of the department or to the extent of necessitating the use of higher paid employees for messenger service.

Mr. BLANTON. If the distinguished chairman of this subcommittee could cut some of these $5,000 men out of this and have them run errands and take these errands boys off, he would get some service for the Government, whereas we do not get any service for the Government, because it is impossible to find some of them in their offices.

Mr. ANDERSON. The bureau chiefs?

Mr. BLANTON. I would like to have the gentleman ring up some of them there now and try to find them.

Mr. ANDERSON. The gentleman is so anxious to run errands and spend his time that way, perhaps if he will go down there he would find them.

Mr. HAUGEN. I notice that on line 17 you drop nine at $780.

Mr. ANDERSON. Nine what?

Mr. HAUGEN. Skilled laborers at $780, and you add two at $1,200. That is carrying out the policy suggested by the gentleman from Texas [Mr. BLANTON]. Will the gentleman explain why it is necessary to increase the salaries from $720 to $1,200?

Mr. ANDERSON. I will say, in the first place, there have been no salaries increased from $750 to $1,200.

Mr. HAUGEN. That will be the effect of it.

Mr. ANDERSON. That will not be the effect of it. The effect of what the committee has done on the statutory roll is to save the Government nearly $20,000 and give the bureau a more efficient class of clerks. That is what we have done.

Mr. HAUGEN. I think the gentleman is mistaken about the saving. I think he is aware these messengers have not been employed, and they did not cost the Government one cent. What is done now is to add positions at a higher salary, and they will be employed, as I take it, at about what they were employed for this year.

Mr. ANDERSON. I think the gentleman will admit that there is no reason in the world for carrying places on the statutory roll which are not filled and can not be filled. It would be a scheme of camouflage to do so. I am in favor of giving them men they can use, and not men that they can not use, and of paying salaries that will enable them to get such men. I want to say this, that I think an examination of this bill will demonstrate that the Department of Agriculture has not gotten more out of this committee than it has out of the Agricultural Committee, as a general rule. We have cut down the estimates of the department more than $19,000,000. We have cut down every statutory roll in the bill, and I do not believe any man can say that this committee has been over liberal in giving the Department of Agriculture what it asked for. As a matter of fact, he can not cite any case in any statutory roll in which they have gotten what they asked for.

Mr. HAUGEN. Why was it necessary to increase four at $750?

Mr. ANDERSON. Four what?

Mr. HAUGEN. In line 16 there are four places at $2,250. Are they to take the place of the $720 messengers the gentleman refers to, to carry out the policy of the gentleman from Texas?

Mr. ANDERSON. Oh, no.

Mr. HAUGEN. Let us have an explanation.

Mr. ANDERSON. They are to give the bureau a more efficient organization than it has at present, to give them a class of clerks that they can use instead of a class of clerks that they can not use.

Mr. HAUGEN. And the same applies to line 18?

Mr. ANDERSON. The same applies to all the items in the bill, so far as that is concerned. That has been the policy of the committee, to give the department men that they can use instead of men they can not use.

Mr. BYRNES of South Carolina. And the actual result on the statutory roll amounts to a reduction of $18,000?

Mr. ANDERSON. Yes.

Mr. BYRNES of South Carolina. Even allowing for the places the gentleman refers to in the bill, it amounts to $18,000 less than the gentleman from Iowa [Mr. HAUGEN] had last year.

Mr. HAUGEN. I venture the statement that it will not reduce the amount 1 cent, but will increase it; but that is neither here nor there——

Mr. BYRNES of South Carolina. They can not spend it if it is not appropriated.

Mr. HAUGEN. That has not so much to do with the expenditure.

Mr. BYRNES of South Carolina. If it is not appropriated, how can they spend it on the statutory roll?

Mr. HAUGEN. They can not spend it on the statutory roll.

Mr. BLAND of Indiana. Mr. Chairman, I would like five minutes.

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that all debate on this paragraph and amendments thereto close in five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. BLAND of Indiana. Mr. Chairman, I do not know just what paragraph the remarks I am going to make may apply to, but I wonder if the section covers the experts in the Department of Agriculture that are devoting their energies toward eradicating the various kinds of bugs. I had a personal experience in trying to find out why we lost so much rice during the last war through the action of the weevil. We are sending out bulletins telling people about the weevil in their wheat and how to exterminate it. The Department of Agriculture is doing this, but I find there is need of cooperation between the different departments of our Government to save the Government's own material. I finally secured the services of the Assistant Secretary of Agriculture, in an attempt to locate and get in touch with one of "seven bug swatters," so to speak. Six of them were not in their offices. They finally sent a messenger and got the seventh. All the others were out in the city. [Laughter.]

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. BLAND of Indiana. Yes; I yield.

Mr. ANDERSON. The gentleman, I think, will admit that a "bug nut," as he calls him, can do more in the field, and ought to do more in the field, than he can do sitting at a desk here in Washington.

Mr. BLAND of Indiana. Oh, they were in the fields in Washington. They were temporarily out. [Laughter.]

Mr. JOHNSON of Washington. Mr. Chairman, will the gentleman yield?

Mr. BLAND of Indiana. Yes.

Mr. JOHNSON of Washington. Did the gentleman ever hear of a "bug nut" who could spare the time to read any other "bug nut's" documents? [Laughter.]

Mr. BLAND of Indiana. I can not say.

Finally, as I say, we got one "bug swatter," and he came before the committee and testified that it was a very simple and inexpensive matter to exterminate the weevil in rice; that it could be done at a very slight cost and with very little inconvenience. We had the quartermaster general there, and asked him why he did not use the formaldehyde solution recommended, and thus save the 2,000,000 bushels of rice that had become infected and which were sold at a low figure. His answer was, "Well, I did not do it." I asked him why he did not call upon the Agricultural Department to do it. I obtained no satisfactory answer.

You are sending out bulletins and spending a great amount of money on them attempting to teach farmers and others how to save their grain from the ravages of the weevil, but you are sacrificing your own property, the property of the Government. I think a movement should be started to make the different departments cooperate with each other. I do not desire to belittle the necessity for scientific knowledge of these insects and pests. It is highly important that the department have these men, and their scientific knowledge is of great value if properly applied. We need men in the departments who have scientific knowledge of the subject of insect pests, but they ought to turn their scientific knowledge to a good account, in the interest of saving the Government's own property, and they ought to stay in their office once in a while, where they could be consulted from time to time by the other branches of the Government. [Applause.]

The CHAIRMAN. The gentleman withdraws his pro forma amendment. The Clerk will read.

The Clerk read as follows:

General expenses, Bureau of Plant Industry: For all necessary expenses in the investigation of fruits, fruit trees, grain, cotton, tobacco, vegetables, grasses, forage, drug, medicinal, poisonous, fiber, and other plants and plant industries, in cooperation with other branches of the department, the State experiment stations, and practical farmers, and for the erection of necessary farm buildings: *Provided*, That the cost of any building erected shall not exceed $1,500; for field and station expenses, including fences, drains, and other farm improvements; for repairs in the District of Columbia and elsewhere; for rent outside of the District of Columbia; and for the employment of all investigators, local and special agents, agricultural explorers, experts, clerks, illustrators, assistants, and all labor and other necessary expenses in the city of Washington and elsewhere required for the investigations, experiments, and demonstrations herein authorized, as follows.

Mr. DALLINGER. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Massachusetts moves to strike out the last word.

Mr. DALLINGER. I do so for the purpose of asking the gentleman from Minnesota [Mr. ANDERSON], in charge of this bill, a question. I understood him to say a moment ago that one reason why provision has to be made for so many messengers and other employees is because the Agricultural Department is occupying forty-odd buildings which incidentally are leased from private parties at a very large expense to the Government, thus causing more or less inefficiency in administration because of the scattered locations. I want to ask the gentleman from Minnesota, who has been on the Committee on Agriculture for a number of years, whether or not it would not be well in the interest of the taxpayers to complete the present unfinished Agricultural Department Building so that all the bureaus of that department can be housed under one roof, and thus obviate the necessity of employing so many messengers, clerks, and other employees.

Mr. ANDERSON. I think the gentleman from Iowa [Mr. HAUGEN] can answer that question better than I can, but it is my impression that three or four years ago the gentleman from Iowa, as chairman of the Committee on Agriculture, appointed a subcommittee to go into that question, and some estimates were submitted at that time as to the cost of a building which would meet the immediate and future requirements of the Department of Agriculture. I do not remember the sums involved, but they were staggering in amount. The cost of constructing a building sufficiently large to meet the present and future requirements of the Department of Agriculture would be very high indeed. I thought at that time, on the basis of the cost of money, that even with that enormous cost it might be desirable to erect such a building, but I doubt very much if it would be desirable at the present time.

The CHAIRMAN. The pro forma amendment is withdrawn. The Clerk will read.

The Clerk read as follows:

For conducting such investigations of the nature and means of communication of the disease of citrus trees known as citrus canker, and for applying such methods of eradication or control of the disease as in the judgment of the Secretary of Agriculture may be necessary, including the payment of such expenses and the employment of such persons and means, in the city of Washington and elsewhere, and cooperation with such authorities of the States concerned, organizations of growers, or individuals, as he may deem necessary to accomplish such purposes, $79,720, and, in the discretion of the Secretary of Agriculture, no expenditures shall be made for these purposes until a sum or sums at least equal to such expenditures shall have been appropriated, subscribed, or contributed by State, county, or local authorities or by individuals or organizations for the accomplishment of such purposes: *Provided*, That no part of the money herein appropriated shall be used to pay the cost or value of trees or other property injured or destroyed.

Mr. SNELL. Mr. Chairman, I offer the following amendment: Page 18, line 21, strike out "$79,720" and insert "$25,000."

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SNELL: Page 18, line 21, strike out "$79,720" and insert "$25,000."

Mr. SNELL. Mr. Chairman, when this appropriation was first inserted in the bill, three or four years ago, I was fully in accord with it, because I appreciated the fact that it was a very important matter, and that it had reached to such an extent that probably the local authorities would not be able to cope with it. But reading from the testimony given before the committee, at this time I am satisfied in my own mind that it is now so thoroughly under control that a very small appropriation on the part of the Federal Government, to be used in a general way to take charge of the work and supervise the inspection, will be sufficient at the present time and in no way decrease the efficiency of the work. In the testimony here that

is given before the committee I find that in the year closing December 31, 1919, there were 4,069 cases of this disease. In the first six months of the fiscal year ending June 30, 1920, there were only six outbreaks of this disease, so that it is shown conclusively that the work has accomplished something, and that the disease is practically eradicated, and no further need of so large appropriation. In the testimony of Dr. Kellerman it is stated:

> That is the only section where that disease has been found in Florida for over a year and a half. The previous finding of the disease was one case in a property near Tampa. The history of the other States is almost as completely satisfactory. One case of citrus canker has been found in Alabama in the past 12 months. No cases have been found in Mississippi. A few in sections are still being found in Louisiana, but all of the commercial districts, which means the district south of New Orleans, has been free of canker for almost the full two years.
>
> People are going into the citrus business again in these regions where citrus growing was temporarily abandoned during the hysteria of the citrus canker panic. Land values have returned. The citrus business in the South is again considered to be a perfectly safe investment and on a sound basis. It is an industry valued at about $500,000,000 in Florida and considerable in other States.
>
> The situation in Texas is the only serious proposition at the present time. The Supreme Court of Texas has decided that the State has not the authority to condemn as a nuisance trees affected with citrus canker. That has prevented the completion of a campaign almost in the last stages of satisfactory development.

From Dr. Kellerman's testimony it is shown that the disease is entirely eradicated, or practically so, except in the State of Texas, and that has not been done on account of local laws over which they have no control. Now, it does seem to me this is another case where the Federal Government has taken up a line of work and appropriated very liberally, and the States have hung back and tried to shoulder off the entire burden on the Federal Government. If a reasonable amount, such as $25,000, as is proposed in my amendment, were appropriated, it would be plenty to superintend the work of controlling this disease at the present time.

Mr. FESS. Mr. Chairman, will the gentleman yield?

Mr. SNELL. Yes.

Mr. FESS. I understand that the decision of the supreme court makes this cooperation impossible in the State of Texas.

Mr. SNELL. Practically impossible, and it will always continue impossible in the State of Texas until the present laws in that State are changed.

Mr. FESS. I think as a stimulus to the State of Texas to put her laws in shape, we ought to withdraw the appropriation at least until that is done.

Mr. SNELL. Well, I do not think we should carry this appropriation forever, when we can not overcome local conditions that exist in Texas. And furthermore, this is another place where the Federal Government is paying all the bills and certain States are not doing their share.

Mr. ANDERSON. Does the gentleman think that Texas is the only State in the Union, and that in order to discipline Texas we are going to leave the citrous fruit industry of this country subject to this most infectious and communicable disease of citrous fruits?

Mr. FESS. No; I do not think that in order to discipline any particular State, to compel it to do its duty, we ought to allow other States to suffer; but at the same time the chairman of the subcommittee must recognize that if this is cooperative work the Government ought to take steps to compel cooperation or else withdraw, at least from that State.

Mr. ANDERSON. The Secretary of Agriculture now has a right, under the language of this provision, to withdraw cooperation in any State which does not supply cooperative funds. If the gentleman will read the language of the section he will find that to be the case. So that if the situation is such that it is necessary to withdraw cooperation in Texas in order to compel that State to take some action which will make adequate work possible, that can be done under the language of the bill.

Mr. FESS. The gentleman agrees, does he not, that we ought not to let the States believe that the Federal Government will assume this entire burden if the States decline to do it?

Mr. ANDERSON. No; and I think that is one reason why that provision was put into the item in the first place.

Mr. FESS. Does not the gentleman think we are drifting toward the point where the Federal Government will do all this work?

Mr. ANDERSON. I think there is a certain tendency to drift in that direction, but I do not think we will drift too far if we keep in mind the relative fields of the States and the Federal Government. Of course there are cases, such as are presented by communicable diseases of this kind, which spread with great rapidity, in which the Federal Government would not be safe in leaving the eradication of the disease to the States. In many instances they do not have the experts. In many cases they do not have the money, as their legislatures meet only once in two years; and in such cases as this it is not safe to leave the eradication and control entirely to the efforts of the State.

Mr. FESS. I sympathize with the efforts here, and I am not sure but that the General Government would be justified in doing all the work if it would not be done otherwise; but if it is possible to secure the cooperation of the States in matters of this kind in which they are so vitally interested, that cooperation should be secured.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SNELL. I ask unanimous consent to proceed for three minutes. I have yielded most of my time for the purpose of interruptions.

The CHAIRMAN. The gentleman from New York asks unanimous consent that his time be extended three minutes. Is there objection?

There was no objection.

Mr. SNELL. I notice from the questions asked by the chairman of the committee himself that he is to a large degree in sympathy with my position, for he was continually asking Dr. Kellerman during the hearing, "Do the States furnish men and money to help carry on this work?" And Dr. Kellerman, on page 211 of the hearing, says that the work is being borne by the Federal Government. Now, that is the point I want to bring out prominently before this House. The Federal Government is doing practically all this work at the present time, and I can not see any reason why we should continue the appropriation to such a large amount as is now being carried. I appreciate the importance of the work, but I fully believe that the $25,000 carried in my amendment is enough to supervise it, and if the States do cooperate to the extent that it is expected they will, we will be fully able to combat this disease.

Mr. ANDERSON. Mr. Chairman, this item presents a rather unique situation in appropriations for a department of the Government. Everybody knows that in the usual course of events when an appropriation is granted to a department it is seldom voluntarily reduced. If they do not have a use for it for the purpose for which it was originally appropriated, they usually find a use. But in this case that situation has been reversed. The first appropriation made by Congress for the eradication of this disease was $430,000, in 1918. In 1919 that sum was reduced to $250,000, in 1920 to $196,000, and in 1921 to $109,720, and this year the department itself suggested an additional reduction of $30,000.

Mr. SNELL. Will the gentleman yield for a question there?

Mr. ANDERSON. In just a moment. I do not believe it is safe to reduce this appropriation below the point to which we have reduced it, and I say again that this is one of the most serious, most rapidly spreading, and most difficult of diseases to control. I think that the work that has been done in the eradication of this disease is one of the most remarkable achievements in the history of the control and eradication of plant and animal diseases in the United States. Now I yield to the gentleman from New York.

Mr. SNELL. The gentleman states that the department itself requested a smaller appropriation this time. How could they consistently ask for the same appropriation again when their own testimony shows—and the facts bear it out—that the disease is practically eradicated?

Mr. ANDERSON. "Practically eradicated" means nothing.

Mr. SNELL. What does it mean?

Mr. ANDERSON. This disease can spread from one tree so rapidly as to threaten the entire citrus industry of the country in a very few weeks. It is not practically eradicated except in the sense that the known infections are very much smaller in extent, in area, and in number than they were three or four years ago; but there is still an infection in Louisiana, which may communicate itself to Mississippi and Alabama and Florida. There is still infection in Texas, and for all we know there may still be infections in Florida. The only way that we can be certain or practically certain that the disease is wiped out or that it will be wiped out is to continue the inspection in the regions that have been infected, so that we shall know that we have not overlooked any of the infected trees in the destructive measures that have heretofore been taken. I do not think it is safe from the standpoint of the citrus industry of the country to reduce this appropriation beyond the point where the committee has reduced it.

Mr. FESS. Mr. Chairman, the statement of the chairman of the subcommittee is somewhat reassuring and stands out rather as an unusual position for a department to take, namely, that for a series of years there has been a gradual reduction in this appropriation. That is not the rule; it has been the other way. So far as that statement goes I think it is very commendable, not only on the part of the gentleman who made it but of the bureau. What I am concerned about is the statement that the

supreme court decisions makes it impossible for the State to cooperate with the Federal Government. There ought to be some way to reconcile that situation.

I recognize also as clearly as any Member here that it might be as well that the General Government under certain conditions take full charge without cooperation if the cooperation can not be obtained. For example, if it is for the preservation of the health of the people in the exercise of the quarantine law, probably the State would not be called upon to cooperate. The Federal Government would be under such stress of necessity as to take over the full control of it. It might be in the case of a contagious disease in plant industry that the Federal Government should take control. I am not contending along that line, but every Member of the House knows that it is the humor of the membership of the House, as well as the practice of all departments, that when you start a movement it continues to enlarge. It exacts new charges on the Treasury.

What I am trying to call attention to is that if the burden on the Treasury is to be partly felt by the State authority as well as the Federal authority, then they will not be so free to ask for an appropriation. There has been a movement in the last 10 years to enter upon this cooperative work, and it is one of the most prominent features of legislation. When the State is asking the Federal Government to do something and the State shows itself willing to put up dollar for dollar or work for work, that is a saving element on the Treasury of the Government.

I want now to commend this bureau and to commend the chairman of the subcommittee in his success in reducing the appropriation in a series of years, and it seems to me that that ought to be, that when we undertake to eradicate some particular injury, that it ought not to be a permanent, continuous, increasing charge upon the Treasury. We ought to see the time when the demand on the Treasury will cease.

What I had in mind a moment ago was looking to cooperation, and if there is any reason in the State law why the State can not cooperate, it would be wise, it seems to me, that the State law be put in a position where it can cooperate with the Federal Government.

Mr. BLANTON. Mr. Chairman, I move to strike out the last three words.

Mr. ANDERSON. If the gentleman will pardon me, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in 10 minutes. There is really no contest about this matter, and we ought to make some progress with the bill.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that all debate on this paragraph and amendments thereto close in 10 minutes. Is there objection?

Mr. GARD. Reserving the right to object, does that contemplate subsequent amendments to this same paragraph?

Mr. ANDERSON. Yes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BLANTON. Mr. Chairman, it was intimated that the State of Texas was arbitrarily refusing to cooperate with the department in the extermination of citrus canker. It was also intimated by the gentleman from Ohio and the gentleman from Minnesota that it might be that some steps will be taken to force Texas to act.

I will tell you one reason, probably, why Texas is not cooperating. The hearings show that in the whole United States last year this Government spent $109,000 to act on six cases of citrus canker. Think of it. It has practically been exterminated. On page 211 of the hearings Dr. Kellerman testified that from December 31, 1919, to June 30, 1920, citrus canker was found only on six pieces of properties, and that State officers in Texas were cooperating with the United States department. One hundred and nine thousand dollars to act on six little cases, and the State of Texas likely has sense enough to quit spending its money when the exigency has passed away. I will tell you what the trouble is. The distinguished gentleman from New York a while ago tried to save $100,000 on one item by reducing the $510,000 appropriation for hog cholera. Several hundred thousand dollars of this each year is to keep a whole army of veterinarians on the pay roll. I challenge any man on either side of the House to give me the name of a single veterinary in his district of this great bunch that is on the pay roll of the Agricultural Department to whom his farmers can apply if they have an outbreak of cholera.

Mr. MICHENER. I can give the gentleman a name—Dr. Killem.

Mr. BLANTON. Well, the doctor ought to change his name. We do not want any Dr. Killem; we want Dr. Saveu. [Laughter.] Mighty few men in the House can name one of these numerous veterinarians. The great trouble is they are on the pay roll drawing money from the Government and doing very little work, and the farmers, when they have hog cholera, without them have learned through long experience what to do to save their own hogs.

Mr. CLARK of Florida. Will the gentleman yield?

Mr. BLANTON. I will yield to the gentleman.

Mr. CLARK of Florida. Here is what the hearings state—one case of citrus canker——

Mr. BLANTON. Oh, I do not yield for reading the 1,200 pages of the hearings.

Mr. CLARK of Florida. There were 600 trees in one case.

Mr. BLANTON. Yes; when I said six cases I, of course, meant six orchards.

Mr. CLARK of Florida. Here is a case where there were 600 trees——

Mr. BLANTON. All right; I do not yield further. Of course, everybody knew by a case I meant an orchard. There would not be one tree growing all by itself affected. It, of course, is in an orchard that is affected. I will tell you what the trouble is about the efforts of the gentleman from New York in failing to get $100,000 cut off the appropriation. We have 5 men in this House only, out of 435 Members, who frame this bill, who know anything about it, and we have had all the morning only about 60 men on the floor.

When a man like the distinguished gentleman from New York [Mr. SNELL] seeks to carve wasteful appropriations out of the bill, the committee and its adherents here, and the ones who want always to support the committee, snow him under with a vote. The great trouble is that you do not have enough Members of Congress who know anything about the bill under consideration. Every amendment to be effective must be offered as soon as each paragraph is read, and hour after hour that passes every day every time a paragraph is read in this Committee of the Whole it becomes a law of the land unless an amendment is offered as soon as it is read and it is then changed in this committee. Knowing that to be the fact, now is the time to save the money, if any is to be saved of this $33,000,000 in this bill charged up to the name of agriculture, when, as a matter of fact, very little of it really goes to agriculture, for most of it is for overhead. The time ought to be here when the membership of this House should look into these items, and they ought to cut out the overhead and this waste and extravagance and get down to where the people can depend upon receiving 100 cents on the dollar for every dollar of the Government's money that is expended.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, I think we must admit that there are many Members on the floor who know all too little about these things, and I observe that some of them who know the least talk the most. [Applause and laughter.]

Mr. BLANTON. Oh, I knew that the gentleman is always here.

Mr. McLAUGHLIN of Michigan. This is one of the newer items in the bill. The work was begun only a few years ago. The sections of the country in which the work has been done were facing a very serious situation. It was taken hold of by the department in a skillful way, splendid work has been done, and magnificent results have been reached. It ought not to be stopped. In my judgment the committee has acted wisely in making a small reduction below what was carried last year, and I approve their action now in recommending an appropriation of $79,000. I am sure that it will be well spent.

Mr. CLARK of Florida. Mr. Chairman, will the gentleman yield?

Mr. McLAUGHLIN of Michigan. Yes.

Mr. CLARK of Florida. The gentleman from Texas [Mr. BLANTON] said that the State of Texas would not contribute because the disease had been conquered. The hearings show that the Supreme Court of the State of Texas has decided that the State has no authority to condemn as a nuisance trees affected with citrus canker, and that is the reason they have not contributed.

Mr. McLAUGHLIN of Michigan. I may be misinformed, but I understand there is a provision in the constitution of the State of Texas which forbids cooperation of this kind—which forbids the use of State money for cooperation with Federal money—and for that reason work on some things has never been done in the State of Texas. But here is the situation: We have never found the people of the State of Texas unwilling to permit work to be done in their State if the Government of the United States is supplying all of the money.

Mr. PARRISH. Mr. Chairman, will the gentleman yield?

Mr. McLAUGHLIN of Michigan. Yes.

Mr. PARRISH. I would state that, to some extent at least, the gentleman is mistaken about the constitution prohibiting

UMI

cooperation in all things. The decision of the supreme court is to the effect that has been announced here, but that has no application to other branches of the Department of Agriculture, such as eradicating the cattle tick, or the improvement of public highways, or the continuation of the health service, or anything of that kind.

Mr. McLAUGHLIN of Michigan. I think I am right in much that I have said, and that the constitution forbids cooperation in Texas.

Mr. SNELL. Mr. Chairman, will the gentleman yield?

Mr. McLAUGHLIN of Michigan. Yes.

Mr. SNELL. I want the gentleman to know that I have no contention with him in regard to the value of this work. I fully appreciate it and supported it in the first instance, but at the present time it does seem to me that $25,000 provided in my amendment would be ample for some persons to watch the matter and see that there is no breaking out of this disease.

Mr. McLAUGHLIN of Michigan. It is very difficult for the committee to know particularly what gentlemen in the field are doing, but we were impressed by the seriousness of the situation and the need of immediate action. There was a call for a considerable sum of money, and we were not slow in answering that call. I believe the situation is still serious, and I have such confidence in the officers who are doing the work that I willingly vote to place this money in their hands to carry it on.

Mr. SNELL. Mr. Chairman, will the gentleman yield further?

Mr. McLAUGHLIN of Michigan. Yes.

Mr. SNELL. How can the gentleman state that it is really serious when the testimony in the hearings shows that the gentleman in charge of the business says that the disease is practically extinct?

Mr. McLAUGHLIN of Michigan. I have not read that testimony.

Mr. SNELL. If the gentleman reads that testimony, I do not see how he can say the proposition is serious at this time.

Mr. McLAUGHLIN of Michigan. I have talked with the men who are doing the work, and I am impressed that there is still a situation there requiring their care, and that they ought to have the money necessary to do the work.

The CHAIRMAN. The time of the gentleman from Michigan has expired. All time has expired. The question is on the amendment offered by the gentleman from New York.

The question was taken; and on a division (demanded by Mr. BLANTON) there were—ayes 14, noes 59.

So the amendment was rejected.

Mr. GARD. Mr. Chairman, on page 18, line 21, after the word "and," I move to strike out the words "in the discretion of the Secretary of Agriculture."

The CHAIRMAN. The gentleman from Ohio offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. GARD: Page 18, lines 21 and 22, after the word "and," in line 21, strike out "in the discretion of the Secretary of Agriculture."

Mr. GARD. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GARD. As I understand it, there is no time for debate upon this amendment?

The CHAIRMAN. The gentleman is correct. The question is on the amendment offered by the gentleman from Ohio.

The amendment was rejected.

The Clerk read as follows:

For applying such methods of eradication or control of the white-pine blister rust as in the judgment of the Secretary of Agriculture may be necessary, including the payment of such expenses and the employment of such persons and means, in the city of Washington and elsewhere, in cooperation with such authorities of the States concerned, organizations, or individuals as he may deem necessary to accomplish such purposes, $100,000, and, in the discretion of the Secretary of Agriculture, no expenditures shall be made for these purposes until a sum or sums at least equal to such expenditures shall have been appropriated, subscribed, or contributed by States, county or local authorities, or by individuals or organizations for the accomplishment of such purposes: *Provided*, That no part of the money herein appropriated shall be used to pay the cost or value of trees or other property injured or destroyed.

Mr. GARD. Mr. Chairman, on line 19, page 19, after the word "and," I move to strike out the words "in the discretion of the Secretary of Agriculture."

The CHAIRMAN. The gentleman from Ohio offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. GARD: Page 19, line 19, after the word "and," strike out "in the discretion of the Secretary of Agriculture."

Mr. GARD. Mr. Chairman, there was no time under the limitation fixed by unanimous consent to discuss the amendment which I last offered to the same effect. I have no desire to discriminate either against the citrous fruit industry or the white pine tree industry, but I would ask the chairman of the subcommittee what is the policy of his committee and also of the Committee on Agriculture in respect to the manner of these expenditures? Unless the interest of the States can be maintained in some way, I feel that it is only a question of time until the Federal Government is going to bear all of the expense of a great number of what are purely local improvements.

Now, if that is the policy of the committee and the policy of the House, it is all right; but we must understand whether the State is bearing its full obligation or whether all these things are being shunted over upon the shoulders of the Federal Government. Now, if my amendment shall prevail, and the amendment I suggested in the last paragraph on the same order, then the interest of the State is maintained, because of the necessity of continuing such interest in order to get Federal contribution, whereas if you permit it to be in the discretion of the Secretary of Agriculture it is open to all sorts of local conditions, all sorts of local importunities, as to whether the State shall not pay its part and whether the Federal Government shall pay the entire part. It is for the purpose of inquiring that I ask the gentleman from Minnesota, who has charge of this bill, what the policy is to be and if he does not think it the proper way of continuing the compulsory responsibility of the State?

Mr. ANDERSON. Mr. Chairman, I agree with the gentleman from Ohio that frequently the amount which the States and the local authorities are willing to contribute to a work which is about to be carried on in them is not the best index of the value of this work; but I do not think this is a safe rule to apply inflexibly to an appropriation for the eradication of a plant or animal disease in the case of insect pests. These pests, these diseases, do not know any State line, and the failure of a State to do its part in the eradication work means a menace to the neighboring States. We put this provision in the law because we desire the cooperation of the States, but we do not think it is safe to make that cooperation a condition precedent to the use of the money. Besides, that part of this money is used for quarantine, for establishing and maintaining quarantines against woods or against articles that carry infection.

Mr. GARD. Will the gentleman yield?

Mr. ANDERSON. That is no part of the State's obligation. If the amendment of the gentleman were adopted, it would make impossible the carrying on of the quarantine work, because the States would have to contribute to that as well as the other.

Mr. GARD. How many States have evidence in their forests of the white-pine blister rust?

Mr. ANDERSON. Practically all the forests, I think, east of the Rocky Mountains are infected or liable to be infected.

Mr. GARD. All States east of the Rocky Mountains?

Mr. ANDERSON. Where there is white pine.

Mr. GARD. Now, in a considerable number of those States is there any State cooperation or participation?

Mr. ANDERSON. There is being spent this year on the part of the States for the eradication and control of the white-pine blister rust $137,000, and that will be more than the sum we are appropriating for the next fiscal year.

Mr. GARD. In how many States?

Mr. ANDERSON. I think there are 10 States cooperating now.

Mr. SNELL. Will the gentleman from Minnesota allow me to ask a question?

Mr. ANDERSON. Certainly.

Mr. SNELL. What is the object of carrying this language in this bill if it is not going to be applied equally to all the States? I noticed in the hearing that 10 States cooperate and 28 do not.

Mr. ANDERSON. Twenty-eight may not have the white-pine blister.

Mr. SNELL. We spend money in those States.

Mr. ANDERSON. That is spent, I will say, for scouting work to ascertain whether the rust is present or not.

Mr. SNELL. We spend from three to five thousand dollars in some?

Mr. ANDERSON. Yes.

Mr. SNELL. Why do we carry that language in the bill? I think we either ought to cut it out entirely or make it applicable to every State fairly and squarely. I think the amendment of the gentleman from Ohio should be adopted at this time.

Mr. ANDERSON. Well, I will refer to that in my own time. The gentleman from New York I know is not in sympathy with this appropriation, nor is he much in sympathy with very much that is carried in this bill, but personally I do not think it is wise to put into legislation for the eradication of com-

municable diseases a provision which makes it impossible to utilize the fund appropriated for that purpose. I appreciate, of course, the gentleman from Ohio and the gentleman from New York are actuated by the best of motives and they desire to conserve the Federal Treasury.

Mr. GARD. The point I desire to emphasize is this: If, as the gentleman says, it traverses State lines very speedily and therefore is not to be considered in all respects and at all times a local condition, then why do not we make this provision by the Federal Government for that purpose? Because if it is necessary, I for one would be very frank and very eager to have such an appropriation made. On the contrary, this is what occurs, as I would view it: Under this language, if the discretion is given, some States will cooperate and some States will have departments and some States will not have departments. Some States will not cooperate. Now, there is no way by which any Secretary of Agriculture or any other department can get beyond the importunity of States for Federal relief. I am not discriminating against the white-pine blister or citrus canker, because I do not, but it is only to find what the proper policy should be. If it be more than a State-wide affair, should not we at once set it forth here and say that the Federal Government is protecting its forests in the interests of itself and cut out all question of discretion and State cooperation and contribution?

The CHAIRMAN. The time of the gentleman from Ohio [Mr. GARD] has expired.

Mr. ANDERSON. Mr. Chairman, as I have said, the effect of the amendment of the gentleman from Ohio is to prevent this work being effectively carried on. In the first place, it would prevent any expenditure for quarantine, which is the principal thing which is now necessary, and would also prevent any work being done in those States which do not cooperate. Now, it may be where there is a slight infection in the State which can be stamped out promptly, it is not desirable to wait for a State appropriation, and it ought to be possible in those States—and that ought to be discretionary with the Secretary—to go in promptly and do the things that are necessary to stamp out the disease immediately. On the other hand, there may be a place where the infection is isolated, and where it is not likely it will be communicated to other forests, and in that case the Secretary may very properly say, "All we will do in this instance is to establish a quarantine which will prevent the shipment of destroyed trees or destroyed parts of trees from the infected territory," and leave it to the State to stamp out the infection, because it is clearly the State's work in that case. So it seems to me clearly the amendment of the gentleman from Ohio ought not to be adopted, and I hope it will not be.

Mr. FESS. Will the gentleman yield?

Mr. ANDERSON. Certainly.

Mr. FESS. Had the States been very active before the Federal Government took up the work of fighting these diseases generally?

Mr. ANDERSON. That varies a great deal with the States. Some of them have efficient departments of agriculture, efficient public health departments in the case of animal diseases that are communicable to men, and they do cooperate to a very large extent. In other States that is not true to the same degree.

Mr. FESS. The gentleman does not believe that this whole matter will ultimately fall upon the Federal Government?

Mr. ANDERSON. I do not think so. The establishment of a quarantine, the prevention of the spread of the disease from State to State, is a Federal function as to this particular disease; it is not a question of eradication in the places where the disease is now prevalent, but it is a question of such control as will prevent its spreading into the white-pine regions west of the Rockies.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio [Mr. GARD].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For the investigation of diseases of cotton, potatoes, truck crops, forage crops, drug and related plants, $95,400.

For investigating the physiology of crop plants and for testing and breeding varieties thereof, $51,860.

Mr. HAYDEN. Mr. Chairman, I move to strike out the last word.

An appropriation similar to this has been carried in the Agricultural bill for a number of years, and it has proved to be one of the best investments ever made by Congress. It was by means of the money appropriated in this way that the Egyptian cotton industry was developed and firmly established in the Southwest. America now produces a better grade of cotton than any cotton ever grown in Egypt, and this year there will be a total production of 100,000 bales. That small appropriation added this new industry to the Southwest, from which the Federal Government has collected in income and excess-profits taxes many, many hundred times more than the sums appropriated. It was through this same appropriation that Peruvian alfalfa was introduced. That excellent variety produces two crops more each year than ordinary alfalfa in the Southwest. It appears from the hearings that the department asked for an increase of $20,000 for this item, but I observe that the committee allowed but $5,000 in the way of an increase.

Mr. ANDERSON. Of course, in the appropriation for this particular work no increase was asked for except for date culture.

Mr. HAYDEN. I am aware that the principal objective now is the development of the date industry. May I inquire whether in prior years the appropriation for this service has been more than the sum now allowed by this bill?

Mr. ANDERSON. Not under this item. There have been quite some decreases, but those have been by reason of transfers to the statutory roll.

Mr. HAYDEN. Is this small sum all that the committee is willing to allow for the development of the date industry?

Mr. ANDERSON. And $5,000 is allowed for that purpose. We go as far as we can on $5,000.

Mr. HAYDEN. In view of the importance of that industry, I believe the full increase of $20,000 should be allowed. In southern California, Nevada, Arizona, New Mexico, and in west Texas there are many areas of land where the conditions are such that date culture undoubtedly can be developed into a large and paying industry. At the present time large quantities of dates are imported from Asia and Africa, which come here in a dirty condition. It is perhaps well that we do not know under what insanitary conditions foreign dates are packed. In this country well picked, carefully grown dates will sell for the same price as the best candy. Through the investigation made by me, as a result of this appropriation there was developed in 1919 a new method of covering the bunches of dates with paper bags to keep out dust and insects and to prevent damage by birds, and at the same time the fruit ripens in a very satisfactory manner. If the date industry can be successfully promoted, in time it will be possible to produce in this country a large part of the supply of dates consumed by the American people. There are a number of places in the West where the only available supply of water for irrigation is alkaline, but a date tree will grow in the most alkaline kind of water, thus making it possible to produce a profitable crop where nothing else can be produced. I am anxious to get the opinion of the chairman of the subcommittee in regard to this appropriation. He seems to have been convinced to the extent of $5,000. Why not go on now and give the bureau the full amount asked for in order that this important work can be advanced as rapidly as possible?

Mr. ANDERSON. The department is now spending a very considerable proportion of this sum on that work, and the committee felt it ought to develop more or less gradually, and that $5,000 would enable them to expand somewhat.

I am frank to say there was some question as to whether there ought to be any expansion at all in view of the rule that ought to apply throughout the bill. But in view of the fact that it is a new industry, the committee have felt we might begin an expansion on a small scale this year, but we did not feel, considering the entire bill as a whole, that we were justified in granting a larger increase than $5,000.

Mr. HAYDEN. It is very evident that with the opposition of the gentleman in charge of the bill it would be useless to offer an amendment to increase this appropriation to the amount requested in the estimates. I could not let this opportunity pass, however, without calling attention to the importance of this appropriation, because I am convinced that the expenditure of a modest sum in this manner will result in the development of a large industry in the Southwest which will enable American citizens to produce dates of a better quality than any ever imported.

Mr. RUBEY. Is the gentleman prepared to furnish the committee with samples? [Laughter.]

Mr. HAYDEN. I believe that can be accomplished without difficulty. Under the privilege granted me I shall extend my remarks by printing the following memorandum in regard to the establishment of the date industry in the Southwestern United States.:

Twenty years of experimental work in cooperation with the State experiment stations of Arizona and California have shown that the hot, irrigated valleys of the Southwest are well adapted to commercial date culture. For 10 years date culture was problematical and no marketable dates ripened. Just at the beginning of the Great War marketable dates began to be produced in both the Coachella Valley, in California,

and the Salt River Valley, in Arizona, but because of the war this promising new industry attracted little attention. At the present time the date industry is attracting much attention, and abundant capital stands ready to push this new fruit industry just as fast as the experimental work of the Department of Agriculture blazes the way.

In many ways the date palm is unique. It stands large amounts of alkali in the soil, is not affected by hot winds or sand storms, and is strikingly adapted to culture under extreme desert conditions, provided water for irrigation is available. On the other hand, the date palm reproduces with extreme slowness, and the best varieties produce on the average only a dozen offshoots during their whole lifetime, producing only one or two a year until the offshoot bearing age is past. In the second place, the date palm can not, like all other fruit trees, be budded or grafted. If the wrong variety is planted, the trees must be dug up at great expense and destroyed and offshoots of better varieties set in their place.

This new industry is in a critical condition, therefore, having been proven to be adapted to the Southwest, but having unusual handicaps which interfere with its power of rapid expansion which are not inherent to any other fruit industry.

Preliminary experiments give promise that new methods of rooting offshoots will make possible considerably greater offshoot production, and at the same time experiments in date breeding have shown the possibility of originating new and very choice varieties especially adapted to local conditions provided the single-choice tree so produced can be multiplied rapidly until plantings can be made on a commercial scale. Also it is very desirable to introduce under proper safeguards additional choice offshoots from the Old World, since substitution later on is impossible; the right variety must be planted at the start.

In the present stage of the date industry in the United States the $20,000 increase requested for this work in the appropriation for the Office of Crop Physiology and Breeding, Bureau of Plant Industry, is really to be considered as a high-class investment. There can be no doubt that from now on the money invested in the scientific study of the date industry will revert to the Federal Government in tenfold amount in the form of income-tax returns.

This same Office of Crop Physiology and Breeding 10 years ago established in the Southwest the Peruvian alfalfa through scientific investigation. This alfalfa yields two more cuttings than the ordinary alfalfa grown in the Southwest, and is rapidly replacing all other varieties in this region. This same office, in cooperation with four other offices of the Department of Agriculture, established in the Salt River Valley the culture of Pima cotton, the longest-fibered Egyptian cotton in the world.

In the case of the Peruvian alfalfa and the Egyptian cotton the returns to the Federal Government in the form of income taxes exceed each year twentyfold the total cost of the work by the Department of Agriculture. It will undoubtedly prove to be true also in the case of the date palm, and it is not economy, but rather the reverse, to withhold the small amount necessary to push this industry and establish it on a flourishing basis in the next few years.

There is every reason to expect the date industry to grow rapidly until a capital of from $25,000,000 to $50,000,000 is invested. It will supply the whole of America with the cleanest and best dates that are to be found in any part of the world, and will prove beneficial not only to the growers but to the consumers as well.

Mr. KAHN. Mr. Chairman, the gentleman from Arizona [Mr. HAYDEN] has referred to the date industry in Arizona and in southern California. It is a comparatively new industry. When the late James Wilson was Secretary of Agriculture he undertook this work.

The gentleman from Arizona refers to the dates ripening under paper. I think if the gentleman will investigate the matter he will find that the dates are cut from the trees when they have reached a certain degree of ripeness, and then are hung in caves or huts, which are kept very warm and where humidity is introduced by means of water carried in pans. The climate of Arizona and southern California is quite dry. Originally the fruit did not ripen in those States; then investigators of the Department of Agriculture found that in Africa, whence the plants were brought, there is considerable humidity in the air during the ripening season, hence the introduction of artificial humidity to help them ripen in this country.

The development of the date industry of this country is a very interesting story. Thousands of acres in Arizona and in California, and probably in Nevada, can be made to produce vast quantities of this very delicious fruit if given an opportunity by proper appropriation. At Indio, Calif., where nothing whatever was grown a few years ago, there are now over a thousand acres planted in date trees, and the crop is a very profitable one.

I hope that the Committee on Agriculture will try to help this industry wherever it can, because it is making desert lands productive.

Mr. ANDERSON. Mr. Chairman, if I may be indulged for a moment, I will say to the gentleman from California that I have been personally very much interested in this date industry, and I want to see it developed, and I want to see the Government help the people who are interested in it develop it as fast as the general situation will permit us to appropriate for it.

The CHAIRMAN. The pro forma amendment is withdrawn. The Clerk will read:

The Clerk read as follows:

For acclimatization and adaptation investigations of cotton, corn, and other crops introduced from tropical regions, and for the improvement of cotton and other fiber plants by cultural methods, breeding, and selection, and for determining the feasibility of increasing the production of hard fibers outside of the continental United States, $120,000: *Provided*, That not more than $7,500 of this sum may be used for experiments in cottonseed interbreeding.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Michigan moves to strike out the last word.

Mr. McLAUGHLIN of Michigan. I believe there is a large increase in that appropriation from last year. What induced the committee to recommend an amount so much larger than before?

Mr. ANDERSON. I will say to the gentleman that the increase was allowed for the purpose of beginning a piece of work in the South which I think is likely to develop into considerable proportions and be extremely valuable.

Some gentleman who is familiar with the cotton culture of the South can give the gentleman more detailed information than I can, but in general, as I understand the situation, it is this: A large number of different varieties of cotton are grown in the same general locality, and as a result there is more or less interbreeding and more or less deterioration in the character of the cotton plants and the quality of the cotton grown. It is desirable, so far as possible, to standardize in a community the classes of cotton grown and to eliminate the inferior kinds of cotton. Besides, this work will result in introducing into these sections varieties that mature earlier, and are thus more resistent to the boll weevil than existing kinds.

Mr. McLAUGHLIN of Michigan. My recollection is that the interbreeding station in Texas was established for the purpose of making these very investigations, and that it was established in the first place without authority, as we considered it. When I say "we," I mean the committee of a year or two ago. We considered it an improper use of the money, but it had been started, was doing good work, and the committee was willing to have it continued, so made an appropriation of $7,500, as provided in line 1 of page 21. We understood that the work done at that interbreeding station would be the same kind of work as it is proposed to carry on at other places which might be established if this appropriation were increased, as the chairman of the committee suggests. Results of experiments carried on at the station in Texas will be available at other places, so we doubted the advisability of providing a number of other stations for the same kind of work.

Mr. ANDERSON. The increased appropriation was not allowed for investigational purposes. The increase was carried for the purpose of demonsfrating through cooperation in the different sections of the cotton-growing South the possibilities of new and better varieties that have been brought out by those experiments.

Mr. McLAUGHLIN of Michigan. The gentleman's earlier remarks led me to believe that some of the work which that increase would provide for would be just like the work which this $7,500 does in Texas.

Mr. ANDERSON. Oh, no. It is an entirely different proposition.

Mr. McLAUGHLIN of Michigan. A little further: The work done at the experimental station in Texas, for which $7,500 has been carried on several bills, is experimentation in cottonseed breeding and in investigating as to how these new varieties there developed will grow in that locality and in other localities. It strikes me that the very things they are doing at the Texas station would apply to and serve the entire area where similar soil and climatic conditions exist.

Mr. ANDERSON. That is true, but it is unfortunately also true that the conditions under which cotton is grown in the South are such, and the character of the people mainly engaged in directly cultivating it is such, that it is very difficult to introduce these new breeds of cotton. It can only be done through some form of organization in the localities which will make it possible to introduce these new breeds and to standardize the entire cotton raising of the section on the basis of the new introduction.

That is the purpose of this small increase in the appropriation. I went into it at some length, because I felt that it was the beginning, possibly, of very large appropriations, and I was not willing to give them the amount they asked for. But I did feel that there were such possibilities of improvement in cotton types and in cotton culture in the program that they proposed that it would be worth while to try it out in a single section on a small scale, and if it works out, all right, and if it does not we can cut it out.

Mr. BYRNES of South Carolina. Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. The gentleman from South Carolina moves to strike out the last two words.

Mr. BYRNES of South Carolina. Mr. Chairman, may I add to what has been suggested by the gentleman from Minnesota [Mr. ANDERSON] this? The illustration given by the representa-

tives of the bureau of the work under this item was as to the new variety of cotton seed known as the Meade.

The sea-island cotton formerly grown along the coast of Georgia and South Carolina is rapidly disappearing because of the destruction by the boll weevil. The department believes that this Meade cotton which they have developed—a long-staple cotton—will prove a good substitute for the sea-island cotton. It can be used in the manufacture of automobile tires. Now, in order to induce the farmers of a given section to grow this Meade cotton, an agent must be sent there who can enlist the support of the county agent, and with the assistance of the county agent induce a whole community of farmers to embark upon the planting of this new cotton seed. If they do not, when the crop is made and they proceed to gin it, there will not be sufficient of the Meade cotton to keep one gin busy, and it will become mixed up with the short-staple cotton and will lose its value. During the cultivation of the crop the agents must keep in touch with the farmers they induce to plant this new variety of seed.

Furthermore, if they can do what they hope to do and popularize the use of this new variety of cotton seed they must keep it pure, and the only way in which that can be accomplished is by inducing a community of farmers to engage in planting only this variety of cotton. The department representatives express the opinion that this Meade cotton can be grown under boll-weevil conditions, and if this is true it may result in reestablishing the long-staple cotton industry in the coastal section of the South Atlantic States.

Mr. HASTINGS. I want to state that I have given considerable attention to the list of farmers' bulletins that have been issued by the Department of Agriculture within the past few years, and I have never found a bulletin that dealt with the growth of cotton. I think there are two or three bulletins that deal in some way with the subject of cotton, one perhaps with the boll weevil, but I think it has been unfortunate that the Department of Agriculture has not gotten out better bulletins on the growth of cotton generally, and these various varieties that have been referred to in this debate.

The CHAIRMAN. The pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

For the investigation, testing, and improvement of plants yielding drugs, spices, poisons, oils, and related products and by-products, and for general physiological and fermentation investigations, $39,820.

Mr. LINTHICUM. Mr. Chairman, I move to strike out the last word. Being detained in the Foreign Affairs Committee this morning, I was unable to be on the floor of the House at the time the appropriation for the eradication of tuberculosis in dairy cattle was taken up.

I want at this time to congratulate the committee on the splendid appropriation that they have made for that purpose and to congratulate the Agricultural Department for the wonderful progress it is making in eradicating tuberculosis among the dairy cattle of this country. When we think that only a few years ago there was no appropriation for this purpose, and that to-day we have an appropriation of $1,978,800 in this bill, it shows that the work is going ahead with great rapidity, and it shows that there was great necessity for it. I remember when I introduced the resolution in reference to tuberculosis in cattle and called the attention of the House to the many children who were dying from this disease, there was also another leg to that proposition, and that was the investigation of the creameries and dairies of this country which are producing butter. I note in the Baltimore Sun of to-day a short article which I would like to have the Clerk read to the House in my time.

The CHAIRMAN. If there be no objection, the Clerk will read the article in the time of the gentleman.

There was no objection.

The Clerk read as follows:

$5,000,000 SEEN AS COST OF RANCID CREAM RULING—PACKERS AND BUTTER MANUFACTURERS WILL BE PLACED UNDER HEAVY EXPENSE.

CHICAGO, *January 23.*

The decision of Attorney General Palmer that neutralized butter made from rancid cream is taxable at the rate of 10 cents a pound may cost packers and butter manufacturers $5,000,000.

"Eighty per cent of the butter made in the United States is neutralized," an official of a butter company said. "Since most of the butter fat has to be transported from 300 to 1,000 miles to the centralized butter-making districts, the cream is usually rancid before it arrives at the plants. This does not hurt the cream, but before it can be churned it must be treated with lime to reduce the acidity.

"This decision of the Attorney General will mean that 80 per cent of the butter manufactured is to be taxed. The amount of revenue to the Government could not quickly be figured, but at a guess I would say it will net $5,000,000 a year."

Mr. LINTHICUM. Here is an admission on the part of one of the large creameries that 80 per cent of all the cream that is made into butter in this country is rancid, and the testimony before the committee at the time I introduced that resolution was that it was far worse than rancid. I refrain from stating the degree. Now, when you realize that all cream which goes into the making of oleomargarine is inspected by the Agricultural Department and that all cream which goes into renovated butter is inspected by the Agricultural Department, you can readily see that it is becoming high time that we inspected the creameries of this country, which admit that 80 per cent of the cream is rancid; that it has to be carried for miles and miles to these centralized creameries. Shall oleomargarine and renovated butter be more cleanly and pure than real butter? I merely want to call the attention of the Committee on Agriculture to the fact that it seems to me that there must positively be some legislation for the inspection of these dairy products which go into the making of food for the children and the aged and all the people of this country. I want to call particular attention to that article, and in due time I shall introduce a resolution similar in some respects to the one introduced in 1916, No. 137, except that the question of tuberculosis will be eliminated. I want to thank our former colleague, the gentleman from Nebraska, Mr. Sloan, who took great interest in this question, and the gentleman from Michigan [Mr. McLAUGHLIN], who helped put the appropriation into the bill to check and remove tuberculosis. I want to ask the gentlemen of the committee to take special interest in this question and see if we can not purify the dairy products of this country. We owe it to the children, the sick, and the aged, and we owe it to all the people. [Applause.]

The CHAIRMAN. The pro forma amendment will be withdrawn and the Clerk will read.

The Clerk read as follows:

For the investigation and improvement of cereals and methods of cereal production and the study of cereal diseases, and for the investigation of the cultivation and breeding of flax for seed purposes, including a study of flax diseases, and for the investigation and improvement of broom corn and methods of broom-corn production, $359,705: *Provided*, That $50,000 shall be set aside for the investigation and control of the diseases of wheat, oats, and barely known as black rust, leaf rust, and stripe rust: *Provided also*, That $147,200 shall be set aside for the location of and destruction of the barberry bushes and other vegetation from which such rust spores originate.

Mr. ANDERSON. I ask unanimous consent that the Clerk be authorized to correct the spelling of the word "barley," in line 3, on page 22.

The CHAIRMAN. Without objection, it will be so ordered.

There was no objection.

Mr. YOUNG of North Dakota. Mr. Chairman, I move to strike out the figures "$147,200" and insert in lieu thereof the figures "$300,000"

The CHAIRMAN. The gentleman from North Dakota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. YOUNG of North Dakota: Page 22, line 4, strike out the figures "$147,200" and insert in lieu thereof the figures "$300,000."

Mr. YOUNG of North Dakota. Mr. Chairman, in the general debate on this bill I called attention to some of the reasons why it seemed wise and necessary to increase this appropriation. I rather think that if we attack this problem vigorously and actively with the idea of exterminating the barberry bushes, we will save money in the long run by appropriating $300,000 at this time. By an appropriation of the size mentioned in this bill we may be at this 12 or 15 years. I really think we can clear the infested areas in the United States entirely in two years or, at most, in three years if we will appropriate enough money to do it.

Mr. SINNOTT. Will the gentleman yield?

Mr. YOUNG of North Dakota. Certainly.

Mr. SINNOTT. How are the States cooperating in the eradication of the barberry bush? Are the States doing anything?

Mr. YOUNG of North Dakota. Yes; they have men out pulling the bushes every year in North Dakota, and the same is being done over in Minnesota. It is not a proposition that you can entirely clean up in one year. For instance, in North Dakota, in areas where the State sent out men and where they attempted to get all of them, we find that in Pembina County there were hundreds of bushes found by men sent out by the Department of Agriculture, and the same was true in Walsh, Traill, and Grand Forks Counties. The gentleman will understand that it only takes a few bushes to infect a very big area, because the powder that comes from the barberry bush consists of millions of little particles which are taken up in the air and are blown for miles and miles and miles, sometimes several hundred miles. The value of the wheat crop is so great and we have suffered so largely from the black-stem rust in recent years, it makes it of

very vital importance to the wheat growers, also to those who buy flour or bread.

Mr. GOODYKOONTZ. Will the gentleman yield?

Mr. YOUNG of North Dakota. Yes.

Mr. GOODYKOONTZ. What is the barberry bush?

Mr. YOUNG of North Dakota. Well, you will find them over here decorating the grounds of the Library of Congress. Here it is a low bush about a foot and a half high. Where they grow wild they are sometimes 8 or 10 feet high. It is an ornamental shrub that has been carried into most parts of the country simply for ornamental purposes, and without knowing that it was so damaging to the wheat raisers.

Mr. GOODYKOONTZ. Why does not the farmer take enough interest in the matter to cut down the bushes?

Mr. YOUNG of North Dakota. That is one way to get rid of them, but they also grow in areas not under cultivation, along rivers and in forests.

The CHAIRMAN. The time of the gentleman has expired.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, the trouble with the proposition of the gentleman from North Dakota is that most of the work required to be done is ordinary physical labor which the people can do themselves, and which the State can provide for without assistance, suggestion, or compulsion from the Federal Government. It is true that in the case of the barberry bush, as in a number of other diseases affecting agriculture, it was necessary to have scientific investigation in order to disclose the trouble and to find a remedy. That investigational work has very properly been done by the Federal Government. It is now known that the black rust comes from the barberry bush, and all that remains to be done is to appropriate the money to do the physical labor of destroying the bushes. How much money should the Federal Government furnish and how much of this should the State furnish in order to do the work which is so generally understood and as easily done? Everybody understands it, and there is no difficulty and no secret about it.

It seems to me that after scientific men of the department have worked out a remedy, the State or the people themselves who are directly interested ought to apply it and do the work, and, if necessary, supply the money.

I am one of those who believe in appropriating all money necessary to make investigation, scientific and otherwise, carry on experiments, to give demonstrations, but when the thing is all reduced to a certainty and the ease with which the result can be reached is shown, as in this case, I am inclined to think the duty of the Federal Government ceases and the rest of the work should be done by those who are interested in it, or, perhaps, by the State.

Mr. SNELL. I am glad the gentleman from Michigan has reached the same conclusion and the same feeling in regard to this item that I have had in regard to other items. I think the time has come when the Federal Government should cease appropriating money to do that which the State ought to do itself.

Mr. McLAUGHLIN of Michigan. I have always felt that way, but sometimes these troubles are so large and so menacing that the State needs help. Sometimes the trouble exists in one State and is not taken care of, or the State is careless about taking care of it, and the trouble may extend to other States and cover the entire country. For example, the corn borer makes its appearance in the State of Massachusetts. It is an awful menace to this country. If it should break loose and get into the real corn-growing sections of the country, the loss would be incalculable. Whereas in the State of Massachusetts, where it was first discovered, they do not raise corn enough altogether for more than one or two good corn roasts; they are not interested enough to spend money to stamp out the disease. The rest of the country is interested in seeing it confined to the State of Massachusetts, so Federal money is used to keep it there or to prevent its spread.

That is a case where the Federal Government has to put its hand in its pocket and do some work for the purpose of saving the rest of the country.

But in North Dakota they know all about the remedy. Almost everybody there knows what a barberry bush is and it only requires a little physical labor to dig it up and destroy it. So it is unwise for us to make a large appropriation for this work to be done by the Government as it has been carrying on the work. I have great regard for those who have charge of the work of the bureau; there are no better men in the service, but some abuses have crept in even in this bureau, and in connection with this particular work of destroying the barberry bush.

If this extra money which the gentleman from North Dakota [Mr. YOUNG] wishes is to be expended just as in the past, it seems to me the Congress ought not to grant the increase he asks.

Mr. MADDEN. Mr. Chairman, the amendment of the gentleman from North Dakota [Mr. YOUNG] is extraordinary. There can be but one object in introducing this, and that is to compel the Government of the United States to dig the barberry bushes up that may be on North Dakota farms, or on any other farms in the United States. We might just as well reach the conclusion that because there are stumps where the trees have been cut we ought to appropriate to remove the stumps. Any farmer that has a barberry bush on his field which he thinks is a menace and does not remove it is not fit to be a farmer, and the Government of the United States ought not under any circumstances to appropriate money to move it for him.

Mr. YOUNG of North Dakota. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Yes.

Mr. YOUNG of North Dakota. My friend from Illinois is a good farmer himself, and he has a nice farm in Illinois. Suppose a farmer digs up all there are on a farm and there is a tract of land perhaps that is not even settled, which is covered with these bushes, would the gentleman be expected in that case to dig up three or four hundred thousand acres of them?

Mr. MADDEN. No; but the man who owns the land which is to be settled, when it is settled, ought to dig them up and the Government of the United States ought not to be engaged in doing it for him.

Mr. YOUNG of North Dakota. Does the gentleman know that the seed or powder from these bushes will be carried in the wind for sometimes three or four hundred miles, so that this is not exactly a local question for each farmer himself to solve?

Mr. MADDEN. A great many farms in the United States are covered with stones, and you may just as well propose that the Government appropriate the money to move the stones off the fields as to remove these bushes. It would be just as sensible and reasonable. There is no justice in the proposal to put your hand into the Treasury of the United States in order to make a farm tillable for a man who owns it. Let him make it tillable himself.

Mr. ANDERSON. Mr. Chairman, the loss incident to rust in wheat is the largest loss due to any single plant disease in the United States. It is estimated that the loss due to rust in 1916 amounted to 180,000,000 bushels of wheat, in 1919 to 75,000,000 bushels, and in 1920 to 75,000,000 bushels. I think it may easily be said that the losses incident to this disease in the last five years have not been less than a half billion dollars. I am not only interested in saving this loss for the farmer, but I am interested in saving it for the constituents of my friend from Chicago [Mr. MADDEN]. If we can save this loss, it will make that many more bushels of wheat, that many more barrels of flour, and thus it would tend to cheapen the price which the constituents of my friend have to pay for the flour they use. The department did not estimate for a larger sum for this eradication work than was carried in the bill of last year, and the committee allowed them the estimate, which is the amount carried in last year's bill. The work is progressing very satisfactorily on that bases. While I personally am very much interested in the work, and while an increase in this appropriation would be very agreeable to me and to my constituents, still I feel that considering all of the items in the bill and the action which the committee took with respect to them, the amount we have appropriated here is a reasonable amount for this purpose, and as much as ought to be appropriated under present conditions. I hope the amendment of the gentleman from North Dakota [Mr. YOUNG] will not be agreed to.

I would like to emphasize this fact: While I recognize the position and appreciate the attitude of the gentleman from Michigan [Mr. McLAUGHLIN] the fact still remains that unless we undertake this campaign of eradication, the barberry bushes will not be eradicated, and these losses will go on from year to year. If we start it, if it is continued in the way in which it is now being conducted, it will be only a matter of a very few years when the losses from rust will be a negligible quantity, and I think that result is well worth the amount which we are proposing to expend upon it. I ask for a vote.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Dakota.

The amendment was rejected.

The Clerk read as follows:

For the investigation and improvement of tobacco and the methods of tobacco production and handling, $30,000.

Mr. BYRNS of Tennessee. Mr. Chairman, I offer the following amendment which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. BYRNS of Tennessee: Page 22, line 19, strike out the figures "$30,000" and insert in lieu thereof the figures "$32,000."

Mr. BYRNS of Tennessee. Mr. Chairman, this is a very small increase of the amount carried in the bill. I hope the gentleman from Minnesota, who is in charge of the bill, will not object to the amendment. While it carries a very small amount, it means a great deal to the tobacco growers in several States of the Union, and particularly at this time do I think the appropriation carried for the current year should not be reduced. The present appropriation for this purpose is $32,000. The bill as reported provides an appropriation of $30,000. There was an estimate for $41,000 submitted by the Department of Agriculture, the extra $9,000 being desired for the investigation of root-rot resistance strains of broad leaf in the Pennsylvania district and a certain form of root rot in the Connecticut River Valley district and also certain experimentations desired to be carried on in a new tobacco district down in southern Georgia. Personally I would be very glad indeed to see the entire estimate allowed, but I realize the conditions under which this bill has been framed and the desire of Congress and of the House to hold appropriations down just as much as possible. Let me say this in regard to the necessity, as I view it, of maintaining the present appropriation: This appropriation is for the purpose of developing better methods of curing tobacco and also investigating diseases which affect tobacco. In the last year or two in the tobacco-growing section of Tennessee, from which I come, and also in Kentucky, and possibly other States, there has been a certain disease, sometimes called black rust, which attacks the tobacco. It is a form of speck which attacks the lower leaves first, and in the course of two or three days spreads to the entire plant and destroys it unless it is quickly cut, and in some cases the farmers have cut the tobacco green and put it in the barn in order to save as much as possible of it.

Now, that is under investigation. I communicated with the Department of Agriculture last summer, asking them to investigate the cause of this new disease. There are some who think it is due to bacteria in the soil or stalk of the plant, and others think it is due to wet weather, but it has not been determined, and is now under investigation by the Department of Agriculture. It may be if this appropriation is reduced it will seriously affect the efforts of the Agricultural Department along the line of investigating this disease, for the present appropriation is needed and used each year.

Mr. BARKLEY. Will the gentleman yield?

Mr. BYRNS of Tennessee. I will.

Mr. BARKLEY. Is it not true also that this disease has been increasing in the last year or two more than any other time, and there is great danger of the disease being communicated to seed for the next crop, and this investigation ought to be carried on at this particular time?

Mr. BYRNS of Tennessee. The gentleman is correct. This disease is now costing many farmers hundreds of dollars, and in some cases thousands of dollars, because I have seen some farmers who have lost nearly all of their crop on account of this disease, and it is extremely important that the cause of this disease be determined, in order that steps may be taken to eradicate it. I hope the gentleman from Minnesota will not oppose this amendment.

Mr. ANDERSON. Mr. Chairman, the committee reduced this item with the general idea of reducing items which could be reduced without direct injury to the work being performed. The gentleman from Tennessee called my attention to the matter some days ago, and I have gone over the hearings again and have given the matter some consideration, and I am inclined to think the reduction of $2,000 in this item is scarcely worth while, considering the effect it may have upon this work, and therefore I do not oppose the amendment.

The CHAIRMAN. The question is on the amendment of the gentleman from Tennessee.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

For investigations in connection with western irrigation agriculture, the utilization of lands reclaimed under the reclamation act, and other areas in the arid and semiarid regions, $70,000: *Provided*, That of this sum $11,000 shall be immediately available.

Mr. SINNOTT and Mr. HAYDEN rose.

The CHAIRMAN. Is the gentleman from Oregon a member of the committee?

Mr. SINNOTT. No; I am not.

The CHAIRMAN. Is the gentleman from Arizona a member of the committee?

Mr. HAYDEN. No; I am not.

The CHAIRMAN. The gentleman from Oregon.

Mr. SINNOTT. Mr. Chairman, I move to strike out the last word. I do this for the purpose of interrogating the gentleman in charge of the bill. I understand there are some seven Government irrigation projects upon which this experimental work is being carried on, and that last year the work on some of them was discontinued, including the work upon the Umatilla project at Hermiston, Oreg. Can the gentleman tell me what disposition is going to be made of this $70,000 of appropriation?

Mr. ANDERSON. Well, the committee had in mind that the restoration of the item would permit the resumption of the activities under this item to take place where it was cut off last year.

Mr. SINNOTT. Was it the intent of the committee that the work should be resumed upon this Oregon project?

Mr. ANDERSON. The Oregon project was one of the places where it was expected it would be possible to resume work through the restoration of the item.

Mr. SINNOTT. Is the matter of the disposition of this fund wholly discretionary with the Secretary of Agriculture?

Mr. ANDERSON. Yes.

Mr. SINNOTT. The Secretary of Agriculture last year immediately after the Democratic convention in San Francisco went north to Oregon and made a speech there, and he particularly commented upon and criticized the work of Congress in cutting down this estimate, particularly mentioning the Hermiston-Umatilla project, where the work was discontinued, and placed the whole blame upon Congress. Now, I wish to know whether or not he had last year wholly within his discretion the expenditure of this fund?

Mr. ANDERSON. Of course, there was nothing in the item which indicated the place where the sums would be expended or how the appropriation was divided, that being left entirely with the discretion of the Secretary; that is, the question of what work should be cut off as the result of the reduction made was a matter which was entirely in the discretion of the Secretary.

Mr. SINNOTT. I will say that he discontinued the work upon this Oregon project, although the State itself had contributed $3,000 to be expended in cooperation with the Government. Can the gentleman tell me whether or not the projects in other States are enjoying a like contribution from the States?

Mr. ANDERSON. I think all of this work is done in cooperation with the States; that in practically all of them the States do contribute to the salaries of the men employed; but as to what extent that is true I have not the figures before me at this moment.

Mr. SINNOTT. I withdraw the pro forma amendment.

Mr. HAYDEN. Mr. Chairman, I move to strike out the last word. I would like to state that last year I had a similar experience to that related by the gentleman from Oregon. The citizens of northern Arizona are greatly interested in the establishment of a reclamation project on the Little Colorado River near Winslow. On August 26, 1920, I wrote to the Chief of the Bureau of Plant Industry and suggested that he send some one out to Winslow to assist in determining what crops could be best grown under irrigation in that neighborhood. I received a reply from the chief of the bureau under date of September 1, 1920, in which he said that in view of the fact that Congress had reduced the amount asked for under this heading by $31,000 he not only could not undertake any new work, but the bureau had been compelled to abandon other important activities which had been going on in other places.

I am glad to note that the committee has increased the amount from $58,000 appropriated last year to $70,000, but the amount asked for in the estimates was $94,420. If this work has any value at all it should be extended wherever it is needed, so as to give the settlers proper advice on all of the new reclamation projects. It seems to me that since the committee was half convinced and allowed an increase of $18,000, the House should go to the full length and appropriate the amount asked for in the estimates. In order to test the sentiment of the Members present I offer the following amendment.

The CHAIRMAN. The gentleman from Arizona offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. HAYDEN: Page 23, line 18, strike out "$70,000" and insert "$94,420."

The CHAIRMAN. Does the gentleman from Arizona desire to be heard further on his amendment?

Mr. HAYDEN. Only to say that my amendment allows the full amount asked for by the department in the estimates as submitted and will permit this work to be undertaken in various parts of the West where it is urgently needed.

Mr. ANDERSON. Mr. Chairman, in view of the fact that the Agricultural Committee last year in considering this item reduced it somewhat, we felt we were going as far as we were justified in going by restoring it this year to its former proportions. And in line with the general rule of the committee not to increase the items, with a view of increasing the quantity of the same kind of work done, we did not feel justified in allowing the increase asked for.

Mr. HAYDEN. I understood that last year the cut was $31,000.

Mr. ANDERSON. No.

Mr. HAYDEN. And this year the committee restored $18,000?

Mr. ANDERSON. No. We restored the item to its previous proportions in 1920. It was $73,580, and it was reduced last year to $52,380. Allowing for some transfers that have been made from the item, the amount of $70,000 practically restores it to the estimate of 1920.

Mr. HAYDEN. The cut referred to by Dr. Taylor in his letter to me would indicate that last year $31,000 more was asked for than was allowed.

Mr. ANDERSON. I think very probably that is true. For 1921 they asked for $82,380, which was a larger sum than was appropriated for that year.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arizona [Mr. HAYDEN].

The question was taken, and the Chair announced that he was in doubt.

The committee divided; and there were—ayes 15, noes 27.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For the investigation and improvement of fruits, and the method of fruit growing, harvesting, and, in cooperation with the Bureau of Markets and Crop Estimates, studies of the behavior of fruits during the processes of marketing and while in commercial storage, $83,200.

Mr. HAUGEN. Mr. Chairman, I desire to ask the gentleman in charge of the bill why the new language is added?

Mr. ANDERSON. The Secretary estimated this year on the basis of consolidation of the Bureau of Markets and the Bureau of Crop Estimates, and as the consolidation seemed to be in accord with the idea of economy and also the idea of coordinating activities of the same kind, the committee carries in the bill appropriations based upon the consolidation of those two bureaus. And this language is carried here in conformity with that consolidation.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For continuing the necessary improvements to establish and maintain a general experiment farm and agricultural station on the Arlington estate, in the State of Virginia, in accordance with the provisions of the act of Congress approved April 18, 1900, $20,500: *Provided*, That the limitations in this act as to the cost of farm buildings shall not apply to this paragraph.

Mr. BLANTON. Mr. Chairman, I make a point of order.

The CHAIRMAN. On what grounds?

Mr. BLANTON. Against the proviso beginning in line 7 and ending in line 9. It is legislation.

The CHAIRMAN. Does the gentleman from Minnesota desire to be heard on the point of order?

Mr. ANDERSON. Yes, Mr. Chairman. This proviso relates to the general limitation in the language of the original paragraph with respect to all of the items in this bill. That is, there is in the general language affecting all the paragraphs in the bill a limitation that not more than $1,500 shall be spent for the construction of a single building; so that this provision only excepts this $20,500 from that limitation. It seems to me if there is general authority authorizing the Secretary of Agriculture to construct buildings at Arlington, this limitation in no way would affect that authority.

Mr. BLANTON. Will the gentleman yield?

Mr. ANDERSON. In just a moment. I want to read for the information of the Chair a part of the language under which the experimental farm at Arlington was established:

That the Secretary of Agriculture will take immediate and absolute control of said property—

That is, the Arlington property—

described in section 1, and by clearing, underdraining, grassing, laying out proper roads and driveways, constructing proper bridges and buildings, and in other ways as his judgment may dictate bring said property as rapidly as possible into the proper condition for which it is set apart.

Then there follow some provisions which do not limit the general authority in any way except as to preserving the scenic situation.

Now, Mr. Chairman, the general authority for the construction of buildings at Arlington exists, and is in no way changed by this provision. One of these provisions, it seems to me, neutralizes the other, and thereby leaves the situation exactly as it was, with the Secretary having the authority to construct buildings on the Arlington estate for the purposes for which that experimental station was created. It might be held that if this exception did not appear in the paragraph that the limitation did apply, notwithstanding this statute. But this simply eliminates the limitation in the preceding language, leaving the statute as it is.

Mr. BLANTON. Mr. Chairman, I call the attention of the Chair to the fact that the House has already adopted a provision that places a limitation upon all buildings constructed by this department. That is the general limitation and controls the department. Now, if we take away that limitation and give a general authority, why this department could pursue the very costly, expensive, and extravagant method of building that we unfortunately carried on during the war, the cost plus 10 per cent, and so forth, a method which the Congress has sought to do away with and control at every opportunity. And that is my purpose in insisting on this limitation. The general limitation on this bill has already been passed by the committee and it has become the rule with respect to this department. I insist that this is new legislation, changing the present provision with respect to the expenditure of money by this department for the construction of buildings.

Mr. ANDERSON. Mr. Chairman, I want to call the attention of the Chair to the fact that there is no law which limits the cost of farm buildings to $1,500. That is simply a provision in this appropriation bill, which is not yet effective. We can certainly say that one provision in this appropriation bill shall not limit another provision in this bill. That is not legislation; that is simply an amendment to a provision in the bill itself. There is no law making such a limitation.

The CHAIRMAN. The Chair would like to ask the gentleman from Minnesota if in the act of 1900 there was a limitation on the cost of these buildings? The gentleman has not a copy of that act here?

Mr. ANDERSON. Does the Chair refer to the act that I read a few moments ago?

The CHAIRMAN. Yes.

Mr. ANDERSON. No. There is no limitation of cost in that act.

The CHAIRMAN. Was there any limitation of cost in the language of the act passed for this purpose?

Mr. ANDERSON. No. I will say to the Chairman that the limitation is the limitation which he will find in the general language preceding these appropriations for the Bureau of Plant Industry, beginning on page 17. The Chair will find in line 20 this language:

And for the erection of necessary farm buildings.

That is general language which applies to all the items which follow. Then following that is this proviso:

Provided, That the cost of any building erected shall not exceed $1,500.

Now, that is not law yet, and clearly it seems to me it is within the province of the House to say that that general limitation shall not apply to any particular paragraph that follows it.

Mr. BLANTON. Mr. Chairman, it is law so far as this committee is concerned, because this committee now, except by unanimous consent or by a rule, could not go back and change that item. The gentleman must realize that.

Mr. ANDERSON. This committee can, by rule or unanimous consent, do anything. While it is within the power of the committee to change it, it is not yet law.

Mr. CARTER. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. CARTER. Is there any law limiting the cost of these buildings?

Mr. ANDERSON. Not so far as I know.

Mr. CARTER. The only limitation as to the cost is carried in this bill, which has not yet passed the House and has not passed the Senate and has not become a law.

Mr. ANDERSON. That is true.

The CHAIRMAN. The Chair would like to ask the gentleman from Minnesota a question along the line of the question which the gentleman from Oklahoma [Mr. CARTER] asked him. This proviso making the limitation, page 25, is not a limitation in existing law, but is only a limitation in this particular bill, which has not yet become a law? Is that correct?

Mr. ANDERSON. The Chair is correct. That is the exact situation.

Mr. STEVENSON. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. STEVENSON. Then the language on page 25 to which exception was taken was in the bill when this other language was adopted?

Mr. ANDERSON. Yes.

Mr. STEVENSON. And therefore it was contemplated that it should also be adopted?

Mr. ANDERSON. Yes.

Mr. CARTER. The language referred to occurs only in this particular bill, and it is not law.

The CHAIRMAN. The Chair rules that this is not subject to a point of order. The Chair overrules the point of order. The Clerk will read.

The Clerk read as follows:

For the purchase, propagation, testing, and distribution of new and rare seeds; for the investigation and improvement of grasses, alfalfa, clover, and other forage crops, including the investigation of the utilization of cacti and other dry-land plants, $125,000: *Provided*, That of this amount not to exceed $56,600 may be used for the purchase and distribution of such new and rare seeds.

Mr. LANGLEY. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Kentucky offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LANGLEY: Insert as a new paragraph, page 25, after line 22, the following:

"Purchase and distribution of valuable seeds: For purchase, propagation, testing, and congressional distribution of valuable seeds, bulbs, trees, shrubs, vines, cuttings, and plants; all necessary office fixtures and supplies, fuel, transportation, paper, twine, gum, postal cards, gas, electric current, rent outside of the District of Columbia, official traveling expenses, and all necessary material and repairs for putting up and distributing the same; for repairs and the employment of local and special agents, clerks, assistants, and other labor required, in the city of Washington and elsewhere, $360,000. And the Secretary of Agriculture is hereby directed to expend the said sum, as nearly as practicable, in the purchase, testing, and distribution of such valuable seeds, bulbs, shrubs, vines, cuttings, and plants, the best he can obtain at public or private sale, and such as shall be suitable for the respective localities to which the same are to be apportioned, and in which same are to be distributed as hereinafter stated, and such seeds so purchased shall include a variety of vegetable and flower seeds suitable for planting and culture in the various sections of the United States: *Provided*, That the Secretary of Agriculture, after due advertisement and on competitive bids, is authorized to award the contract for the supplying of printed packets and envelopes and the packeting, assembling, and mailing of the seeds, bulbs, shrubs, vines, cuttings, and plants, or any part thereof, for a period of not more than five years nor less than one year, if by such action he can best protect the interests of the United States. An equal proportion of five-sixths of all seeds, bulbs, shrubs, vines, cuttings, and plants shall, upon their request, after due notification by the Secretary of Agriculture that the allotment to their respective districts is ready for distribution, be supplied to Senators, Representatives, and Delegates in Congress for distribution among their constituents, or mailed by the department upon the receipt of their addressed franks, in packages of such weight as the Secretary of Agriculture and the Postmaster General may jointly determine: *Provided, however*, That upon each envelope or wrapper containing packages of seeds the contents thereof shall be plainly indicated, and the Secretary shall not distribute to any Senator, Representative, or Delegate seeds entirely unfit for the climate and locality he represents, but shall distribute the same so that each Member may have seeds of equal value, as near as may be, and the best adapted to the locality he represents: *Provided also*, That the seeds allotted to Senators and Representatives for distribution in the districts embraced within the twenty-fifth and thirty-fourth parallels of latitude shall be ready for delivery not later than the 10th day of January: *Provided also*, That any portion of the allotments to Senators, Representatives, and Delegates in Congress remaining uncalled for on the 1st day of April shall be distributed by the Secretary of Agriculture, giving preference to those persons whose names and addresses have been furnished by Senators and Representatives in Congress and who have not before during the same season been supplied by the department: *And provided also*, That the Secretary shall report, as provided in this act, the place, quantity, and price of seeds purchased, and the date of purchase; but nothing in this paragraph shall be construed to prevent the Secretary of Agriculture from sending seeds to those who apply for the same. And the amount herein appropriated shall not be diverted or used for any other purpose but for the purchase, testing, propagation, and distribution of valuable seeds, bulbs, mulberry and other rare and valuable trees, shrubs, vines, cuttings, and plants."

Mr. BLANTON. Mr. Chairman, I make a point of order on that.

The CHAIRMAN. The gentleman will state it.

Mr. BLANTON. I make the point of order against the amendment, that it is legislation upon an appropriation bill; that it is unauthorized by law; that it is an attempt to place, by an amendment, a new subject in an appropriation bill; that it is not germane to the bill, or to the paragraph immediately preceding it. I would like to be heard on it.

Mr. CARTER. Mr. Chairman, I make the point of no quorum.

The CHAIRMAN. The gentleman from Oklahoma makes the point of no quorum, and the Chair will count. [After counting.] One hundred and nine gentlemen are present—a quorum.

Mr. BLANTON. Mr. Chairman, I ask to be heard on the point of order.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. BLANTON. Mr. Chairman, I would expect every chairman of every committee in this House, except the Committee on Appropriations, to vote for this amendment seeking to restore unto them their seeds, but I do not think it ought to go into the bill. It involves an expenditure of $360,000, and it is a waste.

I want to call the attention of the Chair to the fact that this question has been passed upon on numerous occasions in the House. I cite the Chair back to the original precedent, decided by Mr. Carlisle over 40 years ago, prior to the time when he became the distinguished Speaker of this House, when he was presiding over the Committee of the Whole, when he held that a Member from the floor can not offer on an appropriation bill a new subject, even though same could have been placed in the bill by the committee; that any attempt by a Member from the floor to place a new subject in a bill is held to be unauthorized on an appropriation bill. Just such a point as this was raised.

Mr. CARAWAY. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. CARAWAY. Does not the gentleman think that the statute of limitations would bar that ruling of Mr. Carlisle's?

Mr. BLANTON. Down in Arkansas it would, but here in the House, where the House does business upon precedents, it would not. You can not get action here except by precedents. The House has to have a precedent for everything it does, and I call the attention of the distinguished Member of this House, who so soon is to go to the other end of the Capitol and there harass Senators as he has harassed us sometimes [laughter], to the fact that later than 40 years ago, after Mr. Carlisle was Speaker and left this House, the distinguished gentleman from Connecticut [Mr. TILSON], who is an expert parliamentarian and was presiding over the committee just about a year ago, made such a decision when practically the same question arose in the House.

Mr. LANGLEY. Was it on the Agricultural bill?

Mr. BLANTON. It was on another appropriation bill, but it involved practically the same question.

Mr. LANGLEY. It did not involve the seed question, did it?

Mr. BLANTON. No; because at that time the distinguished gentleman from Kentucky had his seeds.

Mr. LANGLEY. Yes; and I am going to get them again, too. [Laughter.]

Mr. BLANTON. But, Mr. Chairman, I ask the Chair to revert to the decision made by the gentleman from Connecticut [Mr. TILSON], and I ask the Chair to advert to the more recent decision made by the gentleman from Massachusetts [Mr. WALSH], both of whom are expert parliamentarians, and both of whom held that it is absolutely improper for any Member to attempt from the floor to offer an amendment to an appropriation bill that seeks to place a new subject in the bill.

Mr. LANGLEY. Will the gentleman yield?

Mr. BLANTON. I yield.

Mr. LANGLEY. This is no new subject, because the preceding paragraph deals with the distribution of similar articles.

Mr. BLANTON. The preceding paragraph nowhere deals with the propagation and distribution of valuable seeds, or of vegetable seeds or garden seeds, and nowhere provides for their distribution all over the United States under the frank of the gentleman from Kentucky, nowhere makes provision for houses, and for glue, and for twine, and for this, that, and the other thing.

I submit to the Chair that the amendment offered by the gentleman from Kentucky in his earnest effort to get back the $360,000 seed appropriation into this bill has at least a dozen new subjects that are not in the present appropriation bill.

The CHAIRMAN. The Chair wishes to ask the gentleman from Texas, was not the decision rendered by Chairman TILSON in reference to an item placed on the general deficiency bill?

Mr. BLANTON. Oh, yes; but it applies equally to any other appropriation bill, because I call attention to the ruling of Mr. Speaker Carlisle.

Mr. CLARK of Florida. That is out of date.

Mr. BLANTON. He called attention to the fact that when an appropriation committee holds hearings on a bill to frame the bill and passes on estimates made by the department, and that committee finally agree upon certain matters that they place in the bill, and have their hearings printed, it is presumed that the membership of the House can go to those hearings and go to the bill which the committee have prepared and put into circulation by having it printed, and can tell exactly what items the House is to be called on to consider. And Mr. Speaker Carlisle went on to say that it would be unfair to the membership of the House to force them to consider items which the committee did not consider, which the committee had not put into their bill, and con-

cerning which there was no evidence in the hearings. I call attention to that fact to show that it is applicable to any kind of an appropriation bill.

Mr. LANGLEY. Mr. Chairman, I realize that the committee is anxious to hurry along with this bill as rapidly as possible, and also that I can not properly discuss the merits of my amendment on a question of a point of order. But I hope I may be pardoned for saying that my purpose in introducing this amendment, which my friend from Texas [Mr. BLANTON] has discussed, is not to waste the public money, but to continue a practice which has been followed more or less for more than three-quarters of a century, and which, in my judgment, is a real aid to the agricultural interests of the country. In the first place, I think that by continuing this appropriation for the distribution of vegetable seeds we assist in preventing profiteering by the seed dealers. If we discontinue the congressional distribution of seeds, as the committee has proposed, it is my opinion that the private seed dealers will immediately advance their prices 20 or 25 per cent, and perhaps more, so that my amendment is intended partly to prevent profiteering at the expense of the farmers. I am aware that the seed producers are opposed to this congressional distribution of seeds, and I think that one reason for it is that the Government furnishes the highest grade of seed that are obtainable, and that, of course, compels the private dealers to do the same thing. But as a matter of fact this congressional distribution is, in my judgment, a real aid to the private dealers in seeds, although they may not realize it, because it stimulates interest in farming and gardening, and thereby increases the demand for seeds. I read recently a very interesting article by an expert on the question, who contends—and I think correctly—that the present market value of the products of a package of garden seeds, properly planted and cultivated, is from $6 to $8, so that the value of the products of the vegetable seeds that would be purchased under my amendment would amount to about $150,000,000, and that is worthy of consideration, particularly in these days of underproduction.

The gentleman from Texas states that there is no provision in this bill which is germane to the question involved in my amendment. I beg to call his attention and the attention of the Chair to the fact that the paragraph preceding the point in the bill where I have offered this amendment provides for the purchase, propagation, testing, and distribution of new and rare seeds, for the investigation and improvement of grasses, alfalfa, and other forage crops, and so forth. Therefore I think, Mr. Chairman, that the gentleman's argument that my amendment is not germane to the bill is without foundation. It may be that there are some provisions in the amendment which, standing alone, could be properly regarded as new legislation, but they are necessarily subordinate to and a logical part of the main proposition, which involves the question as to whether there is existing law which authorizes the purchase and distribution of these seeds. I felt so sure that the amendment, which is an exact duplicate of what was carried in the last appropriation bill, is in order that I did not look up all of the law and the precedents bearing upon the question. My friend from Florida [Mr. CLARK] suggests that I quote from the organic act creating the Department of Agriculture. I do not happen to have a copy of that act before me, but I do recall the substance of the provisions of section 526 of the Revised Statutes, which clearly vests in the Secretary of Agriculture the power and, in fact, imposes upon him the duty of developing and distributing to the agricultural interests of the country seeds which will aid in the furtherance of the interests of agriculture.

The gentleman from Texas referred to an antiquated ruling of a former Speaker who happened to be one of the distinguished men of my own State, Mr. Carlisle, but long since that ruling was made the question came up again in committee. I think it was 10 or 12 years ago. At any rate, I am sure it has been since I have been a Member of this body. A proposition similar to my amendment was offered, and the Chairman of the Committee of the Whole House on the state of the Union held that it was not in order. An appeal was taken from that decision, and the committee overruled it, and ever since that time it has been held in order. I am sure that the present incumbent of the chair is familiar with this.

A question has been raised as to whether that portion of my amendment providing for the distribution through Members of Congress is authorized by existing law. I beg to call the attention of the gentleman from Texas and the Chair to the fact that in the last session of Congress, when the Agriculture appropriation bill was under consideration, the gentleman from Texas offered an amendment to an amendment which I had offered, and the gentleman's amendment proposed to change the method of distribution so that the Department of Agriculture should make it instead of Members of Congress, and the Chairman of the committee, Mr. WALSH of Massachusetts, sustained my point of order that this amendment was not in order, because it proposed to change existing law, which provided that Members of Congress should have charge of the distribution. I have not had the time to look up the statute to which I am referring, because I assumed that my amendment was clearly in order, but I have no doubt that the Chair is familiar with the debate to which I refer and knows that there is such a law on the statute books.

As I stated a moment ago, this amendment is in the exact language of the law which passed at the last session, except that I propose to increase the amount from two hundred and thirty-nine thousand and odd dollars to $360,000, which is approximately an increase of 50 per cent. I propose this increase for the reason that Members know that the amount of seeds that could be purchased with the appropriation carried in the bill of last year was not sufficient to meet the demands of our respective districts, and if we are going to have this congressional distribution at all, I think we ought to make it large enough to enable us to treat everybody alike and supply all the demands from our districts.

I do not wish to take the time of the committee further, and, as far as I am personally concerned, I am entirely willing to submit the matter to the committee without further debate if the Chair rules my amendment is in order. [Applause.]

Mr. CANDLER. Mr. Chairman, section 526 of the Revised Statutes provides:

> That there is hereby established at the seat of government a Department of Agriculture, the general design and duties of which shall be to acquire and to diffuse among the people of the United States useful information on subjects connected with agriculture, in the most general and comprehensive sense of that word, and to procure, propagate, and distribute among the people new and valuable seeds and plants.

That is the organic law creating the Department of Agriculture and the distribution of seed is one of the primary purposes for which the department was established.

The truth of it is the distribution of seeds was first made through the Patent Office. Then under the organic act establishing the Department of Agriculture, I quoted above, it was transferred to that department, under the provision for the procuring, propagating, and distribution of seed among the people. This amendment of the gentleman from Kentucky provides for that very identical thing and certainly is in order. This question was up before, and this direct point of order was made and sustained at that time by the Chair in the House on January 29, 1907; but I appealed from the decision of the Chair, and the House overruled the decision of the Chair and held the provision in order; and from that time until this I know of no occasion when the Chairman has held it out of order. The House itself held this very provision offered by the gentleman from Kentucky by a decisive vote to be in order, and I cite that as a precedent of the highest authority.

An appropriation for seed has been made since 1865 down to the present time year after year without a single omission. Attempts have been made just as now to leave the appropriation out of the bill, but from 1865 down to the present hour it has been made, and hence from time immemorial the custom as well as the law has been that this appropriation should be made. If you take it away from the people, you will do them an injustice for which you will be sorry in the years to come. [Applause.]

Mr. BLANTON. I am addressing my remarks to the Chairman, because I know that my other brothers here are somewhat prejudiced on the question. [Laughter.] If the distinguished gentleman from Kentucky had so framed his amendment that he had copied the very words that the gentleman from Mississippi [Mr. CANDLER] read, and then had sought to attach this $300,000 appropriation to it, still it would have been out of order, although it was quoted from the organic act creating the department. In that connection I call the attention of the Chair to the very same attempt that was made with respect to the Department of Labor. The gentleman from Massachusetts [Mr. GALLIVAN] sought by an amendment to have $10,000,000 appropriated to carry on what was known as the United States Employment Service. He copied almost the exact language that was contained in the organic act creating the Department of Labor, and when I made a point of order against his amendment the distinguished chairman who presided over that committee held that it was out of order; that it was not germane; and that it was subject to the point of order; and such amendment embracing an appropriation of $10,000,000 was stricken out and held not in order.

Then the gentleman from New York, Mr. London, offered an amendment in a different form, leaving out only a few words of

the organic act creating the department, to which I again made a point of order, and that amendment was held subject to a point of order. Then the gentleman from Missouri, Mr. Decker, came in with an amendment that was word for word the very organic act creating the Department of Labor; there was not a change in the dotting of an "i" or the crossing of a "t," seeking to have the $10,000,000 amendment apply to the bill. I again made a point of order against it, and the Chairman, the gentleman from Tennessee, Mr. GARRETT, held that it was out of order, and every single year since then the amendment has been held out of order upon just that ground—that it is not germane and introduced a new subject not in the bill. If this amendment had been placed in the exact language of the organic act creating the Agricultural Department, it would have been out of order. This amendment creates 10 different new subjects in the bill. If the Chair will read it carefully he will see that there are 10 subjects of legislation in the amendment which are nowhere mentioned in the bill. There is no reference to the disposition of garden seeds under Members' or Senators' franks in the bill. There is no mention of flower seeds to be distributed under frank in the bill; there is no mention of their getting the seed before March 1, or else the Department of Agriculture will distribute them. There is no mention of the machinery provided for in the amendment; they are all new subjects.

Mr. LANGLEY. The gentleman from Texas says that this is not in order. What remedy has the House if the committee leaves out an item which the committee wants to put in; what remedy has it?

Mr. BLANTON. I will tell the gentleman: When the committee refuses to bring in his proposed bill for building an apartment house at Government expense for every Member of Congress and the gentleman brings it on the floor, he will make the same argument to get the chairman of the committee to hold it in order.

Mr. LANGLEY. The gentleman's answer is not responsive to my question, but, taking his own statement, I make the prediction now that when we build the official apartment hotel the gentleman from Texas will insist upon having a corner apartment with southern exposure. [Laughter.]

Mr. BLANTON. No; I will not, because I do not believe in that kind of legislation, wasting the public money.

The CHAIRMAN. The Chair will rule. The Chair is aware that the seed-distribution proposition has been a bone of contention in Congress for a number of years, and the present occupant of the chair approaches the subject with some trepidation. The ruling which the Chair is going to make is in direct opposition to the real opinion of the Chairman himself, but he founds it entirely on the precedent that was established by this committee a number of years ago when they by a decisive vote overruled the Chairman and held in order this proposition.

In view of the fact that the Chair is ruling contrary to his own views, he asks the indulgence of the committee to take up briefly a few of the points that have been advanced on both sides of the argument.

As to the question of germaneness, the Chair fails to see why the amendment is not in order, for the part of the bill immediately preceding refers to the subject of seeds and their distribution. The argument of the gentleman from Texas [Mr. BLANTON], who cites a ruling of Chairman TILSON, is not well advanced, it seems to the Chair, for in that case the ruling was applied to an amendment offered to a deficiency bill. There is a difference, in the opinion of the Chair, between a general appropriation bill and a deficiency bill from a parliamentary standpoint. The Chair would be loath to take exception to a ruling made by Mr. TILSON and does not do so when he considers that this amendment is germane.

There are certain portions of the amendment which the Chair thinks are in order, for they are authorized by statute law creating the Department of Agriculture and other laws pertaining to this department; but other portions, it seems to the Chair, are not so authorized, and this taint of irregularity in one part would taint the whole and would make the amendment subject to the point of order, and so the Chair would rule was it not for the precedent already referred to.

The Chair desires to take up another argument, that advanced by the gentleman from Mississippi [Mr. CANDLER] which, as the Chair caught it, was to the effect that the repetition of legislation on an appropriation bill gave that legislation the standing of statute law; that custom created an authorization, while it is true that this proposition has been carried in previous appropriation bills, the Chair does not feel that that fact relieves it of objection. To fortify the Chair's opinion, he cites volume 14 of Hinds', section 3822:

The reenactment from year to year of a law intended to apply during the year of its enactment does not relieve the provision from the point of order.

In the opinion of the Chair, legislation in a legislative act is an authorization, which will operate until repealed, unless a limit has been stated.

As an appropriation bill provides only for supplies during the year for which it is enacted, it would seem to the Chair that any legislation carried thereon, unless expressly provided otherwise, would cease to be operative when the life of the appropriation bill terminated. Therefore the mere enactment, year after year, of legislation on an appropriation bill, in the judgment of the Chair, does not make it permanent law.

Mr. CANDLER. Will the Chair allow me? I did not intend to assert that the mere fact that the provision appeared in the appropriation bill year after year made it permanent law. I stated that it had appeared in the appropriation bill from 1865 down to the present time, and that it had also become the custom and usage of the House and it was held in order.

The CHAIRMAN. The Chair did not desire to misquote the gentleman and is glad of his explanation. With this statement and basing his decision solely on the ruling made by the committee some years ago, which is higher authority than any ruling or any opinion made by the Chair, the Chair will overrule the point of order. [Applause.] The question is on the amendment offered by the gentleman from Kentucky.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, I move to amend the amendment by striking out the figures "$360,000" and inserting "$240,000," the amount carried in the bill for the current year. I do this not because I am in favor of it at all, for I am opposed to the whole proposition, but do not let us spend any more money on this foolish proposition than is necessary.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Mr. McLAUGHLIN of Michigan moves to amend the amendment by striking out the figures "$360,000" and inserting in lieu thereof "$240,000."

Mr. ANDERSON. Mr. Chairman, I move that all debate on this amendment and amendments thereto be now closed.

The CHAIRMAN. The gentleman from Minnesota moves that all debate on the amendment and amendments thereto be now closed.

The motion was agreed to.

The CHAIRMAN. The question now is on the amendment to the amendment.

The question was taken; and on a division (demanded by Mr. McLAUGHLIN of Michigan) there were 65 ayes and 81 noes.

So the amendment to the amendment was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Kentucky.

The question was taken; and the Chair being in doubt, on a division, there were 89 ayes and 66 noes.

Mr. BLANTON. Mr. Chairman, I demand tellers.

Mr. ANDERSON. Mr. Chairman, I demand tellers.

Tellers were ordered; and the Chair appointed Mr. LANGLEY and Mr. BLANTON to act as tellers.

The committee again divided; and the tellers reported—ayes 83, noes 72.

So the amendment was agreed to.

The Clerk read as follows:

Total for Bureau of Plant Industry, $2,705,270.

Mr. LANGLEY. Mr. Chairman, I suggest that the Clerk be permitted to correct the total to correspond with the amendment which has just been adopted.

The CHAIRMAN. The gentleman from Kentucky asks unanimous consent that the Clerk correct the total so as to correspond with the amount which has been included in the bill by the amendment just adopted.

Mr. BLANTON. Mr. Chairman, I object for the present.

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent that when the bill is concluded the Clerk be authorized to correct all totals.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that at the conclusion of the reading of the bill the Clerk be empowered to correct all totals. Is there objection?

There was no objection.

Mr. BLANTON. Mr. Chairman, I move to strike out the figures "$2,705,270," in line 7.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 26, line 7, strike out "$2,705,270."

Mr. BLANTON. Mr. Chairman, I call attention to the fact that my colleagues on the Republican side of the aisle who are pledged to economy, who pledged the people of this country that they will give them an economic administration and a nonwasteful Government, have just permitted by a small majority vote a

provision to go into this bill to waste $360,000 out of a Public Treasury that is now facing a deficit of nearly $3,000,000,000.

Mr. STEPHENS of Ohio. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. In just a moment. I call the attention of the country to the fact, which everyone in the country realizes, that this item has been a disgraceful waste for years and years.

Mr. STEPHENS of Ohio. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. In just a moment. I have just five minutes.

Mr. SEARS. Mr. Chairman, I make the point of order that the gentleman from Texas is not discussing the point of order.

Mr. BLANTON. I am discussing the saving of $2,705,270, which I have asked to be stricken from this bill, and I am trying to tell the country why I want it stricken out.

The CHAIRMAN. The Chair thinks the gentleman is proceeding in order.

Mr. BLANTON. Mr. Chairman, I call the attention of the American people to the fact that it was a Republican Member [Mr. LANGLEY] who offered the amendment to place in this bill $360,000 for free distribution of seeds. I call on the distinguished majority leader [Mr. MONDELL], who has just come in in the last few minutes, that it is up to him and up to his party when the time comes to vote this seed item out of the bill as soon as we can get a record vote in the House.

Mr. MONDELL. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. MONDELL. And I call attention to the fact that a majority of the Republicans voted against its inclusion, while a majority of the Democrats voted for it.

Mr. BLANTON. I can not admit that, but I am going to give the majority leader a chance to prove that when we have the roll call on this proposition, because I am going to try to force a roll-call vote on it when we get it in the House. I ask him now to help me do it, and I call upon him now to get his men in here and help us defeat it. It is a waste. It has brought Congress into disgraceful disrepute for the last quarter of a century. Congressmen vote for it who seem to believe that they can not stay in Congress except by sending out to their constituents a little old measly package of 10-cent garden seed that has cost the Government about 50 cents to prepare and mail. It is a disgraceful proceeding. The Secretary of Agriculture has denounced it. He has asked that it be discontinued. We took it out of the bill last year, and by holding it up in conference for several months it was finally forced back into the bill. I ask the gentleman from Wyoming, the majority leader, if he is going to stand for it? I ask the steering committee of this House, Are you going to stand for it? It is not the policy of your incoming President. Your incoming President has promised to the people that this waste and extravagance is going to stop. Are you going to stand behind him, are you going to uphold his hands? Even though a Democrat, but favoring economy, I am trying to uphold his hands, I am trying to carry out the policy that he promised on the hustings, and I hope that the gentleman from Wyoming will whip enough of you fellows into line to take this item out of the bill when we get a record vote on it in the House.

Mr. QUIN. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Texas and in opposition to the statements made by the gentleman from Texas. It occurs to me that all the talk that the gentleman from Texas [Mr. BLANTON] has engaged in about appropriations is quite unusual. It seems rather strange that he would rise up here and ask the committee to strike out an item of $2,705,270, which goes to the farmers of the United States. It seems strange that this gentleman would argue against the class who to-day is suffering more than any other class of workers in all this Republic. Economy! Would it be economy to take away from the farmer the fertilizer to produce food and raiment? Would it be economy to cut seed away from the farm so that farmers could not have seed to sow after they have put the land in condition to raise a crop? According to the gentleman from Texas, the farmer should not have any rare field seeds, which have demonstrated themselves to be so valuable in the past, as they will in the future. I call to the attention of the gentleman from Texas the fact that the tomato crop alone in the United States is worth more than $500,000 annually. These very garden seeds, flower seeds, and rare field seeds that go out to the homes of the United States are worth many times $360,000—the cost to the Government. Is it possible that the gentleman is such a big statesman that he overlooks the man up yonder on the hills, living in his little box house, who is endeavoring to produce food and raiment for the world? Is it possible that the gentleman in his anxiety overlooks the poor in the towns and cities who have a little back yard they wish to plant in seeds to raise vegetables in order to feed their children?

Is it possible that the gentleman from Texas in his zeal will vote for great appropriations to support great standing armies and big guns that will shoot 35 miles in time of peace, when the world is prostrate, and yet will vote against the people of the United States having something to put in the ground to raise food for the starving? [Applause.] Over the world to-day we have the sad intelligence brought to us that millions are dying of starvation in China, Japan, across the seas, over in Armenia, Hungary, Czechoslovakia, and that poor children are actually starving for something to put into their stomachs, and here the American Congress is endeavoring to send out some seed so that those who work in the soil can produce food.

Mr. STEPHENS of Ohio. I ask unanimous consent that the gentleman be given five minutes longer.

Mr. JOHNSON of Washington. I object.

The CHAIRMAN. The time of the gentleman has not yet expired.

Mr. THOMAS. Mr. Chairman——

The CHAIRMAN. Does the gentleman yield to the gentleman from Kentucky?

Mr. QUIN. I have not the time. I will tell you, my friends, when the American people wake up to the position of the gentleman from Texas and those who stand with him; when they realize that the big interests of the United States have been taken care of, but that the poor and the weak, the great inarticulate mass, has been neglected; that it has been done by such speeches and efforts as the gentleman from Texas has put forth here to keep away from those who need and are anxious to get the seed to put into the ground for those who are willing and anxious to raise something to feed the people, and yet the gentleman from Texas rises up and says "No"—at that time the people will speak.

Mr. LANGLEY. If the gentleman will permit, I am very much interested in the gentleman's speech, but apparently he has taken the gentleman from Texas seriously, and none of the balance of us do. [Laughter.]

Mr. BLANTON. The gentleman will when he gets a roll call on this.

Mr. QUIN. I hope you gentlemen will not take him seriously. He seems to take himself seriously. [Laughter.] He stands up on this occasion against the great mass of poor people of the United States. Is it possible that he would not want them to have a little flower yard, with beautiful flowers growing in the springtime to delight the wife, mother, and children? Is it possible that he would want a barren waste extended over the United States, and have this great Government reach out its strong arm of taxation into the pockets of all the people and say, "No; this Government will not help to give seeds to the poor, who wish to work to feed the people"? [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. STEPHENS of Ohio. Mr. Chairman, I ask unanimous consent that his time be extended five minutes.

The CHAIRMAN. The gentleman from Ohio asks unanimous consent that the time of the gentleman from Mississippi be extended five minutes. Is there objection?

Mr. SNELL. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard. The question is on the amendment offered by the gentleman from Texas.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

FOREST SERVICE.

Salaries, Forest Service: Forester, who shall be chief of bureau, $5,000; chief of office of accounts and fiscal agent, $2,500; inspector of records, $2,400; 7 district fiscal agents at $2,120 each; forest supervisors—1 $3,240, 1 $2,880, 8 at $2,500 each, 16 at $2,380 each, 44 at $2,180 each, 60 at $1,980 each, 5 at $1,780 each; deputy forest supervisors—1 $1,980, 4 at $1,880 each, 25 at $1,780 each, 28 at $1,680 each, 15 at $1,580 each; forest rangers—11 at $1,620 each, 23 at $1,520 each, 78 at $1,420 each, 288 at $1,320 each, 590 at $1,200 each; clerks—1 $2,100, 4 at $2,000 each, 19 at $1,800 each, 21 at $1,600 each, 9 at $1,500 each, 23 at $1,400 each, 9 at $1,300 each, 138 at $1,200 each, 95 at $1,100 each, 54 at $1,020 each, 30 at $960 each, 100 at $900 each, 2 at $840 each, 1 $600; clerk or compositor, $1,600; clerk or proof reader, $1,400; clerk or translator, $1,400; compiler, $1,800; draftsmen—1 $2,000, 3 at $1,600 each, 2 at $1,500 each, 9 at $1,400 each, 4 at $1,300 each, 16 at $1,200 each, 2 at $1,100 each, 3 at $1,020 each, 1 $1,000, 1 $960; draftsmen or surveyors—2 at $1,800 each, 3 at $1,600 each, 16 at $1,500 each, 6 at $1,400 each; 12 draftsmen or map colorists, at $900 each; draftsman or artist, $1,200; draftsman or negative cutter, $1,200; artists—1 $1,600, 1 $1,000; photographers—1 $1,600, 1 $1,400, 1 $1,200, 1 $1,100; lithographer or photographer, $1,200; lithographer's helper, $780; blueprinters—1 $900, 1 $720; 2 telephone operators, at $600 each; machinist, $1,260; carpenters—2 at $1,200 each, 3 at $1,000 each, 1 $960; electrician, $1,020; laboratory aids and engineers—1 $1,000, 9 at $900 each, 2 at $800 each; laboratory helpers—1 $720, 1 $600; packers—1 $1,000, 1 $780; messengers or laborers—2 at $960 each, 3 at $900 each, 4 at $840 each, 3 at $780 each, 5 at $720 each, 6 at $660 each; messenger boys—5 at $600 each, 2 at $540 each, 3 at $480 each, 3 at $420 each, 13 at $360 each; charwomen—1 $540, 1 $480, 1 $300, 11 at $240 each; in all, $2,465,020.

Mr. JOHNSON of Washington. Mr. Chairman, I move to strike out the last word. Mr. Chairman, it is a long step from

the matter of appropriating $350,000 for seeds to distribute over the country to the matter of appropriating something in excess of $6,000,000 for the Forest Service of the United States. I am inclined to think that anyone who will examine the subject will agree that while the Forest Service is doing the very best it can to handle the great estate, the great domain of the United States which belongs to that service or is under its control, the whole procedure is but another example of the failure made by a Government like ours when it undertakes to go into business. I want to ask the chairman now in regard to salaries. The first paragraph here calls for salaries and charges apparently for overhead amounting to some $2,400,000. In that are enumerated supervisors, deputy supervisors, head forest rangers, and other rangers. Does that cover the entire list of rangers within the Forest Service?

Mr. ANDERSON. No; I think not. There are some rangers, some forest guards, some supervisors, I think, who are paid out of the sums carried for the different forests.

Mr. JOHNSON of Washington. In addition to the $2,400,000 item on page 29 there is a paragraph for the employment of forest supervisors, deputy forest supervisors, forest rangers, and forest guards, $175,000. And then, on pages 30 to 37, we find individual appropriations for the various forests. Do these individual appropriations carry any sums for rangers?

Mr. ANDERSON. I just said I thought they did.

Mr. JOHNSON of Washington. I took that to be so. Now, as I understand the provisions of previous laws the sums appropriated for individual forest amounting to $160,000 are interchangeable to the extent of 10 per cent?

Mr. ANDERSON. Yes; 10 per cent.

Mr. JOHNSON of Washington. That is, 10 per cent of these sums is interchangeable. Then the sum named here is in addition to the $2,400,000?

Mr. ANDERSON. The gentleman is correct. Of course, the gentleman appreciates it is impossible accurately to forecast 18 months in advance just what sales will take place. Where a sale takes place in the forest it is necessary to administer that sale and cut the timber and transfer it, and sometimes it is necessary to take care of additional work.

Mr. JOHNSON of Washington. I notice further—and I do this to transfer to the RECORD some items in the hearings—the net receipts for the year 1920 were $4,763,482.28, and the expenditures were $5,366,869.

Mr. ANDERSON. That does not include a deficiency of about $800,000.

Mr. JOHNSON of Washington. That table which is put out, and which Members of Congress see, shows an expenditure of $5,366,000, but in the text of these hearings it says that the expenditures in 1920 amounted to $5,966,000 under all of the regular appropriations, and $2,950,000 under deficiency.

Mr. ANDERSON. The bill carried last year a total of $5,872,000 in the regular estimate, and in addition to that there was a deficiency of between $700,000 and $800,000.

Mr. JOHNSON of Washington. Whatever the bill carried, the regular expenses brought the thing up to $5,366,000, and then there was a deficiency of $2,950,000 for the fiscal year. The statement is being continually made that the Forest Service is catching up with itself. It is so often printed that whereas seven or eight years ago the expenditures were three or four million dollars, and the income was only $2,100,000, now the United States is catching up at the ratio of 15 per cent, so that this year the income is given at $4,793,000, and that is the information that the public gets.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. JOHNSON of Washington. Mr. Chairman, I ask for an additional five minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. JOHNSON of Washington. Now, I contend that in an effort to keep the people informed as to what their great Forest Service is costing them, this sum of $5,366,000 should have added to it in the tables which are given out the additional sum of $2,950,000, and two or three hundred thousand dollars that seem to have been spent from nowhere.

Now, I want to call attention to the further fact that in these hearings it is disclosed that recently we have had certain eastern Members of Congress out in the forest-reserve country who have had their eyes opened—and when I speak of the forest reserves I speak of the reserves with forests on them and not the great desert wastes in Arizona and some other parts of the country. It is disclosed in these hearings that the gentleman from New York [Mr. MAGEE] was out there on an aeroplane investigating committee in the States of Washington and Oregon, and noticed that enormous trees of spruce and hemlock timber in the forest reserves were going to waste at a time when the country was clamoring for material of that very kind of timber. You find in this report that the Forest Service itself became interested in an effort to develop pulp mills and sell that sort of timber in Alaska, overlooking entirely that which is in the continental United States, and getting under way the sale of that timber at a lower price than yet offered, in the hope that it might encourage paper making in Alaska.

Mr. SNYDER. Will the gentleman yield for a question?

Mr. JOHNSON of Washington. Yes.

Mr. SNYDER. I was going to remark that since he was discussing forest-reserve expenditures, the gentleman should note that $2,000,000 was added to them, and he might point out that in the Indian bill there is carried $475,000 for them.

Mr. JOHNSON of Washington. It is idle to complain that these very appropriations carry the same old standard survey items, and these particular things are to be done under the supervision, I believe, of the Secretary of Agriculture, and some under the Interior Department, thus making that old duplication about which I have complained frequently. It strikes me, however, that at a time when the Forest Service is undertaking to find bidders for great amounts of stumpage in Alaska and to make leases for as long a time as 30 years, in the hope that we can make paper up there, it might make the same prices and offer the same inducements in the Pacific Northwest States, because while we need the paper everywhere, I am inclined to believe that if capital, under any low price, is induced to go into the forest reserve in Alaska it will find the same difficulty that the paper makers in Oregon and Washington now find—that the freight rates are such as to prohibit the sale of that paper to the markets of the East, and they will be much more from Alaska.

I find here somewhere in the report that the amounts appropriated for fire protection are less than, I think, a quarter of 1 per cent in the amount of timber involved. Now, while we in the West see this service growing we have long ago ceased to protest against its encroachments, its servants and agents running over and managing the affairs of the State in the name of the Government and driving an occasional cow off of a reserve at some expense to the Government. And we do feel that a little more equitable division of the appropriations might be made so that the Federal Government could run with the State governments in an effort to protect these great timber domains from fire. I am not desirous of criticizing the administration, but I desire to call attention to the fact that in every single appropriation bill that comes out from the Agricultural Committee, and in the one which now comes from the subcommittee, the Forest Service gets in and keeps "inching along," to use the phrase of the old song, getting a little bit more legislative authority for control of its affairs, and this particular set of appropriations is no exception to the rule.

Mr. MADDEN. Will the gentleman yield?

Mr. JOHNSON of Washington. I yield.

Mr. MADDEN. The gentleman suggested there ought to be some equitable division of the appropriations. I would like to ask him what is the division now?

Mr. JOHNSON of Washington. The division here in the general overhead is $2,465,000, and scattered throughout the bill are such small appropriations that a living soul can not pick them out. I asked just now to find the exact appropriation for rangers. The appropriation for fire protection is in a different item from that which I am discussing.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. JOHNSON of Washington. I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection?

There was no objection.

The Clerk read as follows:

General expenses, Forest Service: To enable the Secretary of Agriculture to experiment and to make and continue investigations and report on forestry, national forests, forest fires, and lumbering, but no part of this appropriation shall be used for any experiment or test made outside the jurisdiction of the United States; to advise the owners of woodlands as to the proper care of the same; to investigate and test American timber and timber trees and their uses, and methods for the preservative treatment of timber; to seek, through investigations and the planting of native and foreign species, suitable trees for the treeless regions; to erect necessary buildings: *Provided*, That the cost of any building purchased, erected, or as improved shall not exceed $1,000; to pay all expenses necessary to protect, administer, and improve the national forests, including tree planting in the forest reserves to prevent erosion, drift, surface wash, and soil waste and the formation of floods, and including the payment of rewards under regulations of the Secretary of Agriculture for information leading to the arrest and conviction for violation of the laws and regulations relating to fires in or near national forests, or for the unlawful taking of, or injury to, Government property; to ascertain the natural conditions upon and utilize the national forests; and the Secretary of Agriculture may, in his discretion, permit timber and other forest products cut or removed from the national forests to be exported from the State or

Territory in which said forests are respectively situated; to transport and care for fish and game supplied to stock the national forests or the waters therein; to employ agents, clerks, assistants, and other labor required in practical forestry and in the administration of national forests in the city of Washington and elsewhere; to collate, digest, report, and illustrate the results of experiments and investigations made by the Forest Service; to purchase necessary supplies, apparatus, office fixtures, law books, and technical books and technical journals for officers of the Forest Service stationed outside of Washington, and for medical supplies and services and other assistance necessary for the immediate relief of artisans, laborers, and other employees engaged in any hazardous work under the Forest Service; to pay freight, express, telephone, and telegraph charges; for electric light and power, fuel, gas, ice, washing towels, and official traveling and other necessary expenses, including traveling expenses for legal and fiscal officers while performing Forest Service work; and for rent outside of the District of Columbia, as follows:

Mr. JOHNSON of Washington. Mr. Chairman, I reserve a point of order on the paragraph.

The CHAIRMAN. The gentleman from Washington reserves a point of order on the paragraph.

Mr. JOHNSON of Washington. Mr. Chairman, I want to ask if this provision to the effect that the cost of any building purchased, erected, or as improved shall not exceed $1,000 is not new in the appropriations for the Forest Service?

Mr. ANDERSON. Oh, no. Only the word "purchased" is new.

Mr. JOHNSON of Washington. That is a new scheme, then, is it, to permit the purchase hereafter? Heretofore the service has been permitted to erect buildings at a cost not to exceed $800.

Mr. ANDERSON. Yes.

Mr. JOHNSON of Washington. At first it was $600. They were permitted to go into the woods and construct a building for $600. Then it was raised to $800. Now they can purchase. Is that the scheme?

Mr. ANDERSON. Where there is a building suitable for that purpose they would be allowed to do that new thing.

Mr. JOHNSON of Washington. Has not the Forest Service general authority to do almost anything they want under this paragraph?

Mr. ANDERSON. They have authority to do almost anything they want under the paragraph as it stands.

Mr. JOHNSON of Washington. It is like the authority of the governor of a State. It is a blanket authority. Have not the forest officials authority to do what they want without this particular authorization?

Mr. ANDERSON. I doubt if they would have the authority to make the purchase of a building.

Mr. JOHNSON of Washington. Mr. Chairman, I make a point of order against the word "purchased;" in line 13, of page 28.

Mr. ANDERSON. Mr. Chairman, to save time, I concede the point of order on the word "purchased."

The CHAIRMAN. The gentleman from Washington makes the point of order, the chairman concedes it, and the Chair sustains it. The Clerk will read.

The Clerk read as follows:

Kaibab National Forest, Ariz., $2,708.

Mr. JOHNSON of Washington. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Washington moves to strike out the last word.

Mr. JOHNSON of Washington. Mr. Chairman, I want to ask the gentleman in regard to these appropriations for individual forests. Here, for instance, is the Kaibab National Forest, Ariz., which is a heavily wooded forest, and receives an appropriation here for some purpose of $2,708. The next item, the Kaniksu National Forest, Idaho and Washington, receives $28,000. Can the chairman say whether that sum is necessary because certain timber is being marketed, or is it for road building, or what makes the difference?

Mr. ANDERSON. I can say it is not for road building.

Mr. JOHNSON of Washington. Or any part of it?

Mr. ANDERSON. No road building is paid out of this item. I presume it is for administering sales in that forest. We did not go into the separate items for each forest.

Mr. JOHNSON of Washington. I do not ask the gentleman to do that now, but why is it that some items are large and some are small?

Mr. ANDERSON. I think it depends in a large degree on whether or not there are timber-sale contracts on the forest, and to some extent it depends upon the number of people who visit the forest, and the fire hazards due to that, and the general situation.

Mr. JOHNSON of Washington. Is not 10 per cent allowed for roads and trails?

Mr. ANDERSON. I think the gentleman has in mind the provision in the Federal road act which makes an appropriation for the construction of roads in the national forests.

Mr. JOHNSON of Washington. That is one provision, but there is another; a certain part of the receipts goes to roads and trail making, and then, so far as I am informed, there has been interchange of 10 per cent of the money for additional roads.

Mr. ANDERSON. Under the existing law 10 per cent of the forest receipts is expended on the construction of roads and trails, and 25 per cent is authorized to be paid to the States by the Federal Government for the improvement of county roads. That is in order to neutralize the fact that the lands in the forests are not subject to State taxation.

Mr. JOHNSON of Washington. Yes. And, as the gentleman knows, there are whole counties in the State of Washington and in other States which are almost entirely inside the forest reserves, and there is nothing left for the counties or State to tax. I do not understand why the Kaniksu National Forest receives $28,000 and the Columbia National Forest in the State of Washington receives only $9,758.

Mr. ANDERSON. I can not state what the particular reason is, because we did not go into the separate items. It may be due to the grazing situation. Practically all of the cost of carrying on the grazing of animals is accounted for under the sums carried in the individual forest items. If the gentleman knows whether there is a large amount of grazing in this forest or not, he can make a guess, at least, as to the purpose for which the sums are recommended.

Mr. JOHNSON of Washington. Mr. Chairman, I withdraw the pro forma amendment.

The CHAIRMAN. The pro forma amendment is withdrawn. The Clerk will read.

The Clerk read as follows.

For fighting and preventing forest fires, $250,000, or so much thereof as may be necessary; and to enable the Secretary of Agriculture to cooperate with the War Department in the maintenance of an air patrol for fire prevention and suppression on the national forests of the Pacific coast and the Rocky Mountain regions, $50,000: *Provided*, That no part of this appropriation shall be used for the purchase of land or airplanes or for the construction of permanent buildings; in all, $300,000.

Mr. HAYDEN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Arizona moves to strike out the last word.

Mr. HAUGEN. Mr. Chairman, I reserve a point of order on the paragraph.

Mr. HAYDEN. I would like to inquire of the gentleman in charge of the bill whether he really believes $250,000 will be all that will be needed to fight forest fires during the next fiscal year?

Mr. ANDERSON. I will say to the gentleman it has never been sufficient.

Mr. HAYDEN. If that is the case, why not appropriate the average amount which has been annually expended, which is three-quarters of a million dollars?

Mr. ANDERSON. The Chief of the Forest Bureau came before our committee with a very ambitious program, involving the employment of a large additional number of rangers and forest guards and the purchase of a large amount of equipment, and so forth, for the protection of the forests from fire. It was his idea that by spending that money from the regular appropriations for the forests the deficiencies which had heretofore occurred might to some extent be eliminated. I was somewhat impressed with his statement, but I was not impressed to the extent of granting the two million and odd dollars that he asked for that purpose. But the committee did increase one lump sum carried in the bill by $50,000 with a view to providing additional rangers and forest guards, and did add a lump sum of $125,000, which the gentleman will find at the top of page 37, beginning with line 3, with the idea of furnishing more fire-fighting material and forces, so that there is in the bill a larger permanent fire-fighting force in the forests than has been provided heretofore.

Mr. HAYDEN. But the expenditures from emergency appropriations have averaged over $750,000 for the past 10 years, and this is an emergency appropriation, as I understand it, which can only be used in cases where there is an actual fire.

For several years Congress appropriated $1,000,000 for that purpose. I note in the estimates that $400,000 is asked for, while only $250,000 has been allowed by the committee for this purpose.

Mr. ANDERSON. No; $350,000 was asked for this purpose, not $400,000.

Mr. HAYDEN. I find $400,000 on page 260 of the Book of Estimates.

Mr. ANDERSON. That is the total of the items. The amount asked for in the estimates for fighting fire was $350,000.

Mr. HAYDEN. I can realize that the gentleman wants to keep the totals in this bill as low as possible, but that does not mean an actual saving of money. It must be presumed that in the next fiscal year we will spend about the same average amount as has been spent in previous years in fighting forest fires, namely, $750,000, so that there will be no net saving to the taxpayers by this reduction.

Mr. BARBOUR. I should like to ask the chairman of the committee how the amount appropriated for air patrol compares with the amount in the last bill?

Mr. ANDERSON. The same amount this year as last, and no increase was asked in the item.

Mr. BARBOUR. I should like to say that I have observed the work of the air patrol in fighting forest fires, and that they have done a wonderful work.

The CHAIRMAN. The gentleman from Iowa has reserved a point of order. Does the gentleman make the point of order?

Mr. HAUGEN. I reserved the point of order for the purpose of asking the chairman of the committee a question. As I understand, in lines 3, 4, 5, and 6 there is an increase of $125,000.

Mr. ANDERSON. Yes.

Mr. HAUGEN. And by striking out the words—

And not to exceed $150,000 of this fund shall be expended except in case of extraordinary emergency.

The appropriation is increased another $150,000, leaving nothing for emergencies, or no specific appropriation for emergencies.

Mr. ANDERSON. Of course, the striking out of the language to which the gentleman refers does not increase the amount in the bill at all.

Mr. HAUGEN. No; but it makes that amount available for other purposes.

Mr. ANDERSON. If the gentleman wants me to answer the question, let me answer it as far as I can. The history of the matter is that all of this money has been spent every year, so that the limitation that $150,000 should be used only in case of emergency did not save a dollar. The only effect of that provision was that nothing could be done to fight the fires until the forest had been destroyed; and as long as we are spending the money anyhow we might better spend it at a time when we can stop the fire at its inception.

Mr. HAUGEN. It has been customary to appropriate money to meet emergencies, but, as the bill stands now, no appropriation has been made for that specific purpose. Last year this appropriation was qualified by the words "but not to exceed $150,000 of this fund shall be expended except in cases of extraordinary emergency." It is wise to make large appropriations to meet emergencies if it is also provided that except in the case of emergency the appropriation shall not be made available. That is not done, however, in this item this year.

Mr. ANDERSON. There are two propositions connected with forest fire fighting. In the first place, we have in the national forests a permanent force of men who patrol the forests constantly and who are expected to catch these fires before they assume great proportions. Of course, this item is intended to apply to emergency men who are employed for temporary purposes to fight fires that have got started.

Mr. SUMNERS of Texas rose.

The CHAIRMAN. Does the gentleman from Iowa yield to the gentleman from Texas?

Mr. SUMNERS of Texas. I do not desire to address a question to the gentleman from Iowa. I thought the gentleman in charge of the bill had the floor.

Mr. ANDERSON. Let us dispose of the reservation of the point of order.

Mr. HAUGEN. The appropriation is subject to a point of order; however, I believe we should provide money to meet any emergency that might arise. I recall that Congress has been criticized severely for not providing adequate appropriations to meet emergencies. One year this bill carried an appropriation of $1,000,000 for emergency purposes.

The paragraph is subject to a point of order, and unless some provision is made for using the amount in case of an emergency, I shall feel constrained to make the point of order.

The CHAIRMAN. Does the gentleman make the point of order?

Mr. HAUGEN. I make the point of order.

The CHAIRMAN. On what ground?

Mr. HAUGEN. That there is no authority in law for the appropriation suggested.

The CHAIRMAN. Will the gentleman specify?

Mr. HAUGEN. That part which requires the Secretary of Agriculture to cooperate with the War Department.

The CHAIRMAN. Does the gentleman mean beginning after the semicolon, in line 17, and continuing down to the proviso?

Mr. HAUGEN. Yes; that part which reads as follows:

And to enable the Secretary of Agriculture to cooperate with the War Department in the maintenance of an air patrol for fire prevention and suppression on the national forests of the Pacific coast and the Rocky Mountain regions, $50,000.

Mr. ANDERSON. Mr. Chairman, the appropriation is not subject to a point of order, because there is ample authority in the statute providing for the fighting of forest fires, and if there were not it is perfectly clear that it is within the power of Congress to appropriate for the protection of Government property. That has been held over and over again.

The only question arising here, as I understand it, is on the language which enables the Secretary of Agriculture to cooperate with the War Department in the maintenance of an air patrol for fire prevention and suppression on the national forest on the Pacific coast and the Rocky Mountain region, $50,000. The proviso is a pure limitation and not subject to a point of order. There is, so far as I know, no specific law authorizing the Department of Agriculture to cooperate with the War Department in the maintenance of an air patrol, but there is very broad language in the statute imposing very considerable duty upon the Secretary of Agriculture in the protection of national forests. This is simply an appropriation for one means of fighting forest fires. The mere fact that it is a new means does not make the provision subject to a point of order if the Department of Agriculture has general authority to prevent forest fires. I want to read from the statute with reference to the authority of the Secretary in that respect.

The statute refers to the Secretary of the Interior, but those duties have since been transferred to the Secretary of Agriculture by law. It says that he shall make provision for the protection against destruction by fire and depredation from the public forest and forest reserves which may have been set aside or which may hereafter be set aside under the act of March 3, 1891; that he shall make such rules and regulations and establish such service as will insure the object of such reservation, namely, to preserve the forests from destruction. Now, one means of destruction is clearly fire, and under this statute the Secretary has authority to establish such service as will protect the national forests from depredation or destruction by fire. So it seems to me clearly that it is in order to make an appropriation for the protection from fire that is to establish an air-patrol service for that purpose. I do not think that anything could be clearer from the general language of the statute, which authorizes the Secretary of Agriculture to establish such service as may be necessary to protect the forests from destruction by fire.

Mr. HAUGEN. Mr. Chairman, I grant that broad powers are given to the Secretary of Agriculture, but they do not include the power to cooperate with the War Department in the maintenance of an air patrol for fire prevention and suppression. That is stretching the authority.

The CHAIRMAN. The Chair will rule. The Chair realizes that there are many cases on points of order to be decided by the Chair which are very close. The Chair feels that the organic law dealing with the Department of Agriculture is an extremely broad one and that the provisions are very comprehensive. The Chair will read the act of June 4, 1897:

The Secretary of the Interior shall make provisions for the protection against destruction by fire and depredations upon the public forests and forest reservations. * * * And he may make such rules and regulations and establish such service as will insure the objects of such reservations, namely, to regulate their occupancy and use and to preserve the forests thereon from destruction.

The Chair feels that in the matter of fire prevention every means should be taken by the Department of Agriculture to prevent fire, and that it was the intention of the organic law cited above to take every precaution in this respect in our national forest reserves. Surely there can be no higher prerogative of government than to protect itself and its property. The Chair feels that these provisions of the law are sufficiently broad to authorize the establishment of a fire patrol as indicated in this bill; therefore the Chair overrules the point of order.

Mr. SUMNERS of Texas. Mr. Chairman, I move to strike out the last word for the purpose of getting some information. I was in the West this summer and made as careful an investigation as I could in the short length of time I was there with reference to the problems and difficulties connected with the maintenance of these public forests. It seemed to me that they had solved in a way most of the big problems connected with the forests, except this one of preventing and controlling forest fires. The trees grow themselves. They do not need much attention, but when one of these forest fires gets into that magnifi-

cent forest out there it leaves complete destruction in its pathway, and the trees that come up afterwards in the burnt area are not the trees of greatest commercial value.

As the tourists are going into that country more and more, the danger from fire increases, and I believe that the country at large and I believe the membership of the House, irrespective of where they live, would support this committee in proposing to Congress an appropriation which would take care of that great reservoir of national wealth that we have in the western forest reserves. When the fire gets in there it goes. It seems to me from a hurried examination of the testimony before the committee when this item was under consideration, that the item is not sufficient. I can appreciate the desire and the need for economy, but it seems to me that we are economizing in the place where economy is mighty poor economy. Whatever sum, in reason, is required to protect this great item of national wealth we should provide.

Mr. ANDERSON. Mr. Chairman, I would say to the gentleman that if an increase were granted it would not be wise to put it in this item, because notwithstanding what the gentleman from Iowa [Mr. HAUGEN] says about it it is an emergency appropriation. If we are going to spend more money in preventing forest fires, I think it would be wiser to spend it in the employment of a permanent fire-fighting force, that would be there when the fire starts, instead of spending it as an emergency appropriation, which can only be expended after the fire has started and which does not serve to prevent the hazard in the first place.

May I say in addition that I have a good deal of sympathy with the gentleman's view, but in a short session of Congress, in the short time in which the committee has to consider the entire matter, it is not possible to go into the whole proposition to the extent we ought to go into it, if we are going to change the policy of fighting forest fires to one of preventing forest fires.

Mr. SUMNERS of Texas. I think you want to take care of both, because they do get sometimes where you have to fight them.

The Clerk read as follows:

For the selection, classification, and segregation of lands within the boundaries of national forests that may be opened to homestead settlement and entry under the homestead laws applicable to the national forests; for the examination and appraisal of lands in effecting exchanges authorized by law and for the survey thereof by metes and bounds or otherwise by employees of the Forest Service under the direction of the Commissioner of the General Land Office; and for the survey and platting of certain lands, chiefly valuable for agriculture, now listed or to be listed within the national forests, under the act of June 11, 1906 (34 Stats., p. 233), and the act of March 3, 1899 (30 Stats., p. 1095), as provided by the act of March 4, 1913, $75,000.

Mr. BLANTON. Mr. Chairman, I move to strike out the last word. I do it for the purpose of correcting an error of statement which I do not think should be in the RECORD, put in by my good friend from Mississippi [Mr. QUIN]. He said that I would vote for a big standing army and then vote against items for the farmer. I am against a big standing army, and I have voted against it every time it has come up. I have voted to materially decrease both our Army and Navy. I have voted for every provision that is offered for the benefit of the farmer. In trying to save this $360,000 to be wasted on garden seeds I was fighting in the interest of all our farmers. My idea of saving $360,000 for free seed distribution was for the benefit of the farmer, and him alone, as no farmer ever derives any substantial good from them. I want to make that correction and to call attention further to the fact that now that the seed proposition is settled, so far as this Committee of the Whole House is concerned, and the $360,000 for garden seeds is put back into the bill to tax farmers to the extent of $360,000, our seed Members are all gone, and we have, by my count, 41 Members present on the floor to attend to the people's business. Our brothers came in long enough to add $360,000 to this bill, and to further burden taxpayers, and have then departed from the legislative hall, and we drones must continue our work.

Mr. HAYDEN. Mr. Chairman, I move to strike out the last two words. I notice that the committee has cut the amount appropriated for this service from $87,000 to $75,000, a reduction of $12,000. I remember distinctly the difficulty that the Members from the West experienced in having this appropriation increased some years ago in order to do away with the excuse made by the Forest Service as to why homesteaders could not be permitted to make entries in the national forests. The reason then given was that Congress had not provided the necessary funds to examine, classify, and survey the land desired by homeseekers. If the highest use is to be made of lands suitable for agriculture in the national forests—that is, to make homes—we must provide the necessary funds for a survey and a classification of such lands. I can find nothing in the hearings which justifies a reduction of $12,000 in this appropriation.

Mr. ANDERSON. The testimony of the gentleman who is in charge of this work before the committee was to the effect that it was 90 per cent complete. It was just a question of whether we would begin to cut this down now or continue it and proceed to cut it down later on.

Mr. HAYDEN. Mr. Chairman, I think the gentleman from Minnesota has misread the testimony or misunderstands the gentleman testifying before the committee. Mr. Sherman did state that the work of classifying the lands in the national forests was 90 per cent complete, but the classification of areas of unsurveyed land, as to whether the land is agricultural in character or valuable for grazing or for the production of timber, is one thing, but the survey of tracts of land desired by people for homes is entirely another matter. The classification work has been going on for several years and may be 90 per cent complete, but the bulk of this appropriation is used to survey tracts of land, principally by metes and bounds, which has been classified as chiefly valuable for agriculture, in order to provide farms for those who desire to make homestead entries within the national forests.

There is no desire on the part of Congress, I am sure, to prevent any citizen from obtaining title to a tract of land in the national forest that is chiefly valuable for agriculture for the purpose of making a home. It is to assist such citizens that ample appropriations for surveys have been made from year to year. I fear that the gentleman will find that he has acted rather hastily, because even if the classification work is 90 per cent complete the survey work must be provided for as heretofore.

Mr. ANDERSON. Twenty-five thousand dollars is spent for classification and $37,000 is for survey work, and I am confident that the small cut which the committee made in this appropriation will not limit the department or Forest Service to a point where it can not do the work that is necessary to be done for the benefit of the settlers.

Mr. HAYDEN. My principal concern is that when a settler applies for a tract of land on any national forest on which to make a home he will not be told that he will have to wait indefinitely because Congress has not appropriated enough money for the necessary surveys.

Mr. ANDERSON. I do not think that situation will arise.

The Clerk read as follows:

For investigations of methods for wood distillation and for the preservative treatment of timber, for timber testing, and the testing of such woods as may require test to ascertain if they be suitable for making paper, for investigations and tests within the United States of foreign woods of commercial importance to industries in the United States, and for other investigations and experiments to promote economy in the use of forest products, and for commercial demonstrations of improved methods or processes, in cooperation with individuals and companies, $250,000.

Mr. RAKER. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. RAKER: Page 39, line 2, strike out "$250,000" and insert "$400,000."

The CHAIRMAN. Does the gentleman from California desire to be heard on his amendment?

Mr. RAKER. I do.

The CHAIRMAN. The gentleman is recognized.

Mr. RAKER. Mr. Chairman, the last act contained an appropriation of $223,260. The estimate for this item by the department was $400,000 for the next fiscal year. The testimony before the committee is found on pages 336 to 340 of the hearings. I realize the committee are endeavoring to cut down expenses. That is right. But where the cutting down of the expense stops proper investigation or prevents the proper development, undoubtedly the committee do not intend to carry the pruning of the appropriations to that extent. For instance, in one item, where gentlemen appeared before the committee having charge of this work, they stated that in the use of woods alone there is a loss of $25,000,000 to $100,000,000 a year in just handling the boxes, because there was not a proper analysis made of the strength of the wood. Each item here is analyzed by the parties in charge, by the Forest Products Laboratory, and by Mr. Greeley, the Chief Forester, and particularly by Mr. Clapp, who shows the splendid work that has been done, the great advancement made, and the necessity for the additional appropriation. I refer in particular to Mr. Clapp's statement before the committee, which is found on pages 337 to 339 of the hearings.

Mr. LAYTON. Will the gentleman yield?

Mr. RAKER. I yield.

Mr. LAYTON. I just wanted to ask whether or not the men engaged in the private enterprise of making wood pulp and paper do not have a force of their own?

Mr. RAKER. Oh, well, that is only one item of the work that is required under this appropriation.

Mr. LAYTON. Or are we going to throw everything on the Government?

Mr. RAKER. Oh, no; not at all. There are possibly 2,500 different methods of handling lumber. There are some places where from 10 to 50 per cent of the wood or the timber is not utilized. Proper investigation is demonstrating that you can cut your log, put it through the mill and utilize it up to 5 per cent, instead of wasting 45 or 50 per cent of the timber, when timber is getting short, and when every effort ought to be made to utilize it.

In speaking on this matter there is a man, a Mr. Cornwall, that seems to cover the matter quite clearly and who covers also many other subjects. I will read his letter:

PORTLAND, OREG., *January 10, 1921.*

Hon. JOHN E. RAKER,
House of Representatives, Washington, D. C.

MY DEAR SIR: For a number of years I have watched the development of the Forest Service and kindred private organizations, particularly in connection with fire protection, putting the Timberman behind the movement at all times, since it has been clear to me that the protection of the existing stand of timber is the most effective and practical sort of conservation.

There is another phase of this matter that is of nearly equal importance, that is the increased utilization of the tree cut in the forest. At present only about one-third of the tree is utilized, suggesting the urgent need and opportunity for definite and early accomplishment in conserving the forest supply through more vigorous prosecution of scientific and industrial research in wood utilization. Now, there is just one institution in this country that is concentrating upon devising means of saving wood, the Forest Products Laboratory, Madison, Wis., and this laboratory has at all times received the support of the Timberman.

It is in connection with this laboratory that I write you. It is my understanding that the Secretary of Agriculture has requested Congress for $400,000 for the Forest Products Laboratory for the coming year. This may be cut in the House or Senate, just as the Secretary's request for $350,000 was finally cut to $226,000 last year. Surely an annual appropriation of $500,000 for an institution that is doing research work for industries—lumber and wood using—whose annual production is valued at over $10,000,000,000 is entirely reasonable.

You being familiar with the economic aspects of the lumber and wood-using industries makes it unnecessary for me to dwell on this matter. There is one phase, however, that I will touch on briefly. We know that it has been argued that the lumber and wood-using industries should finance their own fundamental research the same as is done in some other lines. As a practical matter, we know that this is entirely out of the question. The fact that it has not been done is the most convincing proof that, because of fundamental economic reasons, these industries can not organize and finance their research. Who would argue that lumbermen have less business acumen than other business men? We must remember that the lumber business is extremely individualistic, consisting of thousands of separate operating units; that only large industries—industries that are in a position to monopolize and capitalize their research—can afford to carry on organized research.

Respectfully, yours, G. M. CORNWALL.

During the reading of the letter the following occurred:

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. RAKER. Mr. Chairman, I ask unanimous consent for one minute more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

The reading of the letter was concluded.

Mr. RAKER. Mr. Chairman, I ask that I may insert the letter in the RECORD.

The CHAIRMAN. The gentleman from California asks unanimous consent to be allowed to include in his remarks the letter which he has just read. Is there objection?

Mr. McARTHUR. Reserving the right to object, I would like to know the name of the writer of the letter?

Mr. RAKER. I have already read all the letter, except the heading and the other part. I have already stated the man's name.

Mr. FESS. Does the gentleman mean to read the letter?

Mr. RAKER. I have already read it into the RECORD, and I want simply to add the date and signature. I have given the man's name.

The CHAIRMAN. The time of the gentleman from California has expired. The question is on the amendment offered by the gentleman from California.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

For other miscellaneous forest investigations, and for collating, digesting, recording, illustrating, and distributing the results of the experiments and investigations herein provided for, $31,280.

Mr. HAYDEN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Arizona offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HAYDEN: Page 39, after line 23, insert: "For preventing and combating infestations of insects injurious to forest trees on or near the national forests, independently or in cooperation with other branches of the Federal Government, with States, counties, municipalities, or with private owners, $25,000."

Mr. ANDERSON. Mr. Chairman, I make the point of order against the amendment on the ground that it is not germane to the paragraph.

The CHAIRMAN. Does the gentleman from Arizona desire to be heard?

Mr. HAYDEN. Yes. Mr. Chairman, the amendment is taken from the Book of Estimates. It is germane at any place under the heading of "General expenses of the Forest Service." It does not seem to me that it makes any difference where it is offered, provided it is offered somewhere under that head. It does not relate to the preceding paragraph, but it relates to the general activities of the Forest Service, which is the general subject which the committee has under consideration, beginning on page 28.

Mr. ANDERSON. I make the further point of order, Mr. Chairman, that it is not authorized by law.

The CHAIRMAN. Does the gentleman from Arizona desire to discuss that phase?

Mr. HAYDEN. Mr. Chairman, the quotation from the act creating the Forest Service made very recently by the gentleman in charge of the bill to the effect that the Secretary of Agriculture is authorized to use any practical means to protect the stand of timber on the national forests would undoubtedly authorize an appropriation of this kind. It is a well-known fact that the damage done by insects on the national forests causes even greater losses every year than the destruction wrought by fire.

Mr. ANDERSON. Mr. Chairman, to save time I will withdraw the point of order.

The CHAIRMAN. The gentleman from Minnesota withdraws the point of order.

Mr. HAYDEN. Mr. Chairman, I would like to be heard briefly on the matter.

This matter was brought to my attention by reason of an infestation of bark beetles in the Grand Canyon National Park and in the national forest adjacent thereto. The Bureau of Entomology of the Department of Agriculture has worked out methods whereby these beetles can be destroyed, but the actual work of destruction, for which this appropriation would provide, must be undertaken by the Forest Service. It seems to me that the committee has not appreciated the distinction that an appropriation for experimental work done by one bureau of the department which has demonstrated a practical way to destroy such insects might properly be supplemented by an appropriation for use by the bureau in charge of the forests to carry out the actual work of destruction.

Mr. MONDELL. Is the gentleman referring to the pine beetle?

Mr. HAYDEN. Yes.

Mr. MONDELL. The Forest Service without a specific appropriation for that purpose has been destroying the pine beetle for 15 years. That work has been carried on near my own home for at least 10 years, and I have no manner of doubt but that the Forest Service is now carrying on the work of pine-beetle destruction and can continue it under the appropriation of this bill. It is just another effort on the part of the department to get a little more money under another heading. And in that connection let me say that while the Forest Service has discovered a method of destroying the pine beetle, which was known to everybody in that country before they discovered it, yet they have not been very successful in their efforts to exterminate the beetle. Nature does so much more toward exterminating it than the Forest Service that the efforts of the Forest Service in that direction are of but little value.

Mr. HAYDEN. The gentleman from Wyoming having used up the remainder of my time, I ask unanimous consent, Mr. Chairman, to revise and extend my remarks on this bill.

The CHAIRMAN. The gentleman from Arizona asks unanimous consent to revise and extend his remarks on this bill. Is there objection?

There was no objection.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Arizona.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For the construction and maintenance of roads, trails, bridges, fire lanes, telephone lines, cabins, fences, and other improvements necessary for the proper and economical administration, protection, and development of the national forests, $400,000: *Provided*, That the Secretary of

Agriculture is authorized to use not to exceed $5,000 of the funds herein appropriated for the purchase of lands needed for ranger stations: *And provided*, That 10 buildings may be erected at a cost of not to exceed $2,000 each: *Provided further*, That not to exceed $50,000 may be expended for the construction and maintenance of boundary and range division fences, counting corrals, stock driveways, and bridges, the development of stock watering places, and the eradication of poisonous plants on the national forests: *And provided further*, That hereafter no part of any funds appropriated for the Forest Service shall be used to pay the transportation or traveling expenses of any forest officer or agent except he be traveling on business directly connected with the Forest Service and in furtherance of the works, aims, and objects specified and authorized by law: *And provided also*, That hereafter no part of any funds appropriated for the Forest Service shall be paid or used for the purpose of paying for, in whole or in part, the preparation or publication of any newspaper or magazine article, but this shall not prevent the giving out to all persons, without discrimination, including newspaper and magazine writers and publishers, of any facts or official information of value to the public.

Mr. HAUGEN. Mr. Chairman, I make a point of order on the paragraph.

Mr. BLANTON. Mr. Chairman, I make the point of no quorum.

The CHAIRMAN. The gentleman from Texas makes the point of no quorum.

Mr. MONDELL. Mr. Chairman, I hope the gentleman from Texas will withhold that until we can finish the next paragraph in the bill.

Mr. BLANTON. I thought we would spend 30 minutes on settling the point of order.

Mr. MONDELL. I think we can dispose of it quickly.

Mr. HAUGEN. I make the point of order on lines 3, 4, 5, 6, and 7, on page 40, and on the word "hereafter" wherever it appears.

Mr. ANDERSON. I concede the point of order, Mr. Chairman.

The CHAIRMAN. The gentleman from Iowa [Mr. HAUGEN] makes the point of order, the gentleman from Minnesota concedes it, and the Chair sustains it, and the Clerk will read.

Mr. ANDERSON. Mr. Chairman, I understand that on the point of order only the language objected to goes out of the paragraph, and the rest of the language remains?

The CHAIRMAN. Yes. The Chair would like to ask the gentleman from Iowa if it takes in the word "*Provided*" in line 3?

Mr. HAUGEN. Yes; after the figures "$400,000."

The CHAIRMAN. Then it runs down to the colon in line 7, after the word "each"?

Mr. HAUGEN. Yes.

The CHAIRMAN. And the word "hereafter" in line 17 and the word "hereafter" in line 18?

Mr. HAUGEN. Exactly.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Total for Forest Service, $6,389,302.

Mr. ANDERSON. Mr. Chairman, I move that the committee do now rise.

The CHAIRMAN. The gentleman from Minnesota moves that the committee do now rise. The question is on agreeing to that motion.

The motion was agreed to.

Accordingly the committee rose; and Mr. TILSON having resumed the chair as Speaker pro tempore, Mr. HICKS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 15812) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1922, had come to no resolution thereon.

LEAVE TO EXTEND REMARKS.

By unanimous consent, leave was granted to Mr. RAKER, to Mr. SMITH of Idaho, and to Mr. MCARTHUR to extend remarks on the Agricultural appropriation bill.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted—

To Mr. RIORDAN, indefinitely, on account of illness.

To Mr. SABATH, for five days, on account of important business.

ORDER OF BUSINESS ON WEDNESDAY.

Mr. MONDELL. Mr. Speaker, I ask unanimous consent that the House dispense with Calendar Wednesday business on Wednesday next.

The SPEAKER pro tempore. The gentleman from Wyoming asks unanimous consent that the House dispense with Calendar Wednesday business on next Wednesday. Is there objection?

Mr. FESS. Reserving the right to object, what bill will come up after this one?

Mr. MONDELL. The Diplomatic and Consular appropriation bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. ANDERSON. I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 20 minutes p. m.) the House adjourned until Tuesday, January 25, 1921, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

365. A letter from the president of the Chesapeake & Potomac Telephone Co., transmitting the annual report of that corporation for the year ended December 31, 1920; to the Committee on the District of Columbia.

366. A letter from the Secretary of War, transmitting draft of requested legislation for the relief of certain officers in the Army of the United States, and for other purposes; to the Committee on Claims.

367. A letter from the Secretary of the Treasury, transmitting schedules and lists of useless executive papers and requesting their disposition; to the Committee on Disposition of Useless Executive Papers.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. ROGERS, from the Committee on Appropriations, to which was referred the bill (H. R. 15872) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1922, reported the same without amendment, accompanied by a report (No. 1226), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. SNYDER, from the Committee on Indian Affairs, to which was referred the bill (H. R. 15780) to amend section 1 of the act of Congress approved March 2, 1895 (28 Stat. L., p. 907), and to extend restrictions against alienation of lands allotted to and inherited by certain Quapaw Indians, and for other purposes, reported the same with amendments, accompanied by a report (No. 1225), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. ROGERS: A bill (H. R. 15872) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1922; committed to the Committee of the Whole House on the state of the Union.

By Mr. SELLS: A bill (H. R. 15873) to authorize the appropriation of additional sums for Federal aid in the construction of post roads, and for other purposes; to the Committee on Roads.

By Mr. O'CONNOR: A bill (H. R. 15874) authorizing the city of New Orleans, La., to extend Dauphine Street in said city across the United States military reservation known as the Jackson Barracks; to the Committee on Military Affairs.

By Mr. McLAUGHLIN of Nebraska: A bill (H. R. 15875) to provide that all meetings of the Federal Reserve Board and Interstate Commerce Commission shall hereafter be open to the public, and for other purposes; to the Committee on the Judiciary.

By Mr. SNYDER: A bill (H. R. 15876) to reorganize the Indian Service, to expedite the settlement of Indian affairs, and for other purposes; to the Committee on Indian Affairs.

By Mr. ZIHLMAN: A bill (H. R. 15877) to be known as the Daughters of the American Revolution old trails act, to provide a national ocean-to-ocean highway over the pioneer trails of the Nation; to the Committee on Roads.

By Mr. SNYDER: Joint resolution (H. J. Res. 457) inquiring as to the rights of the Montauk Indians of New York; to the Committee on Indian Affairs.

By Mr. CARTER: Concurrent resolution (H. Con. Res. 72) providing for the printing of 8,000 copies of the proceedings in

Congress upon the statue of Sequoyah; to the Committee on Printing.

By Mr. JONES of Texas: Resolution (H. Res. 651) authorizing the Committee on Interstate and Foreign Commerce to investigate the proposed raise in prices of farming implements by the International Harvester Co.; to the Committee on Rules.

By the SPEAKER (by request): Memorial of the Legislature of the State of Minnesota, urging an appropriation for aid in the construction of public roads; to the Committee on Roads.

By Mr. BRIGGS: Memorial of the Legislature of the State of Texas, indorsing the Jones bill providing for the establishment of so-called central time in the western part of the United States; to the Committee on Interstate and Foreign Commerce.

By Mr. CHRISTOPHERSON: Memorial of the Legislature of the State of South Dakota, favoring the reduction in the supply of water in Lake Andes, S. Dak.; to the Committee on Indian Affairs.

By Mr. DYER: Memorial of the Legislature of the State of Missouri, favoring a reduction of the Army and Navy of the United States; to the Committee on Military Affairs.

By Mr. McARTHUR: Memorial of the Legislature of the State of Oregon, asking for the continuation of Federal aid to highways; to the Committee on Roads.

Also, memorial of the Legislature of the State of Oregon, favoring emergency tariff legislation; to the Committee on Ways and Means.

Also, memorial of the Legislature of the State of Oregon, favoring adjusted compensation for ex-service men; to the Committee on Ways and Means.

By Mr. STEENERSON: Memorial of the Legislature of the State of Minnesota, favoring Federal aid for building roads; to the Committee on Roads.

By Mr. YOUNG of North Dakota: Memorial of the Legislature of the State of North Dakota, urging immediate legislation extending time of payment on entries in the Standing Rock Indian Reservation in North and South Dakota; to the Committee on Indian Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CROWTHER: A bill (H. R. 15878) granting a pension to Priscilla J. Raisbeck; to the Committee on Invalid Pensions.

By Mr. FERRIS: A bill (H. R. 15879) granting an increase of pension to Seph J. Jones; to the Committee on Invalid Pensions.

By Mr. FIELDS: A bill (H. R. 15880) granting a pension to Edgar F. Bradley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15881) granting an annuity to Henry M. Hutchinson; to the Committee on Reform in the Civil Service.

Also, a bill (H. R. 15882) granting an annuity to Thomas F. King; to the Committee on Reform in the Civil Service.

By Mr. HICKS: A bill (H. R. 15883) to authorize the President to reappoint J. P. D. Shiebler a major of Infantry; to the Committee on Military Affairs.

By Mr. KEARNS: A bill (H. R. 15884) granting a pension to Belle Kirgan; to the Committee on Pensions.

By Mr. KELLY of Pennsylvania: A bill (H. R. 15885) granting a pension to Willie E. Persell; to the Committee on Pensions.

Also, a bill (H. R. 15886) granting a pension to Ora Agnes Carter; to the Committee on Invalid Pensions.

By Mr. LEA of California: A bill (H. R. 15887) granting an increase of pension to Eliza F. Platt; to the Committee on Invalid Pensions.

By Mr. McARTHUR: A bill (H. R. 15888) granting a pension to Cynthia Rudler Osgood; to the Committee on Invalid Pensions.

By Mr. RICKETTS: A bill (H. R. 15889) granting a pension to Cynthia J. Hart; to the Committee on Invalid Pensions.

By Mr. THOMAS: A bill (H. R. 15890) granting a pension to Isa Ann Boyd; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15891) granting a pension to Charlottie Myers; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5217. By the SPEAKER (by request): Petition of New England Purchasing Agents' Association, concerning the decentralization plan of the railroads; to the Committee on Interstate and Foreign Commerce.

5218. Also (by request), petition of council of the city of Cleveland, Ohio, urging the extension of aid to the starving nations of Europe; to the Committee on Foreign Affairs.

5219. By Mr. EMERSON: Petition of sundry citizens of Cleveland, Ohio, protesting against the deportation of Mayor O'Callaghan; to the Committee on Foreign Affairs.

5220. By Mr. EDMONDS: Petition of Philadelphia Board of Trade, recommending early return to the general system of taxation followed by the Government prior to the war; to the Committee on Ways and Means.

5221. By Mr. JOHNSTON of New York: Petition of Chamber of Commerce of the State of New York, favoring the passage of Senate bill 4594 (House bill 14461) as amended; to the Committee on Immigration and Naturalization.

5222. By Mr. LAMPERT: Petition signed by citizens of Chilton, Wis., protesting against giving away of any of the people's money loaned by our Government to other nations and asking that the payment of all interest be made by those nations promptly when due, in order to reduce the burden of taxation; to the Committee on Ways and Means.

5223. By Mr. LEHLBACH: Petition of 27 citizens of Newark, N. J., protesting against the occupation of Germany by French colonial troops; to the Committee on Foreign Affairs.

5224. By Mr. McLAUGHLIN of Michigan: Petition of residents of Benzonia, Benzie County, Mich., urging enactment of so-called Sheppard-Towner maternity bill; to the Committee on Interstate and Foreign Commerce.

5225. Also, petition of residents of Benzonia, Benzie County, Mich., urging enactment of House bill 8063, to punish violation of the Volstead Liquor Act by United States citizens while in foreign countries; to the Committee on Foreign Affairs.

5226. By Mr. PAIGE: Petition of sundry citizens of Leominster, Mass., protesting against the occupation of Germany by French colonial troops; to the Committee on Foreign Affairs.

5227. By Mr. TAGUE: Petition of New England Purchasing Agents' Association, Boston, Mass., favoring the decentralized plan of the railroads which permits each system to regulate its own conditions; to the Committee on Interstate and Foreign Commerce.

5228. By Mr. TEMPLE: Petition of Susquehanna Grange, Patrons of Husbandry, No. 1812, in support of emergency tariff bill; to the Committee on Ways and Means.

5229. Also, petition of Susquehanna Grange, Patrons of Husbandry, No. 1812, opposing passage of a bill for daylight saving; to the Committee on Interstate and Foreign Commerce.

5230. Also, petition of Ambridge Board of Trade, of Ambridge, Pa., indorsing the American Legion program with respect to renewed help and assistance for disabled soldiers; to the Committee on Interstate and Foreign Commerce.

5231. By Mr. TINKHAM: Petition of Indiana Branch of the National Association for the Advancement of Colored People, concerning the reapportionment of representation in the Southern States; to the Committee on Rules.

5232. By Mr. WATSON: Petition of women residents of Newton, Bucks County, Pa., favoring appropriations to enforce prohibition and for educational purposes; to the Committee on Appropriations.

5233. By Mr. YOUNG of North Dakota: Petition of H. L. Reads, State fire marshal of North Dakota, urging the passage of House bill 15327, making an appropriation for the prevention of forest fires; to the Committee on Agriculture.

5234. Also, petition of 77 citizens of New Salem, N. Dak., protesting against the occupation of Germany by French colonial troops; to the Committee on Foreign Affairs.

SENATE.

TUESDAY, *January 25, 1921.*

Rev. J. J. Muir, D. D., the Chaplain, offered the following prayer:

Our Father and our God, we recognize the hand that leads us and the blessings which are vouchsafed to us as from Thee. Grant us Thy care this day and all days. For Christ's sake. Amen.

The reading clerk proceeded to read the Journal of the proceedings of the legislative day of Tuesday, January 18, 1921, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

FINAL ASCERTAINMENT OF ELECTORS.

The VICE PRESIDENT laid before the Senate a communication from the Secretary of State, transmitting, pursuant to law, certificates of the governors of Kentucky, Massachusetts, New Hampshire, Nevada, New York, North Carolina, and Oklahoma

of the final ascertainment of electors for President and Vice President in their respective States at the election November 2, 1920, which were ordered to lie on the table.

CHESAPEAKE & POTOMAC TELEPHONE CO.

The VICE PRESIDENT laid before the Senate a communication from the Chesapeake & Potomac Telephone Co., transmitting, pursuant to law, a report of that company for the year 1920, containing the actual figures for the year to be substituted for the report submitted on January 14, which was referred to the Committee on the District of Columbia.

LEASE OF DOCKS, PIERS, WAREHOUSES, ETC.

The VICE PRESIDENT laid before the Senate a communication from the Secretary of War, transmitting, in response to Senate resolution 409, submitted by Mr. JONES of Washington, December 23, 1920, information as to what steps are being taken to lease any docks, piers, warehouses, or other facilities, etc., which was referred to the Committee on Commerce.

T. A. GILLESPIE LOADING CO. (S. DOC. NO. 363).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting a communication from the Secretary of War submitting a supplemental estimate of appropriation in the sum of $285,141.41, required to pay amounts found due on claims for damages to and loss of private property occasioned by the explosion and fire at the plant of the T. A. Gillespie Loading Co., at Morgan, N. J., October 4, 5, and 6, 1918, which was referred to the Committee on Appropriations and ordered to be printed.

RELIEF OF EMPLOYEE IN ASSISTANT TREASURER'S OFFICE, CHICAGO (S. DOC. NO. 362).

The VICE PRESIDENT laid before the Senate a communication from the Acting Secretary of the Treasury transmitting, pursuant to law, an estimate of appropriation in the sum of $315.44 required by the Treasury Department for the relief of John M. Rogers, an employee in the office of the Assistant Treasurer of the United States at Chicago, which was referred to the Committee on Appropriations and ordered to be printed.

WEEKLY ISSUE OF PATENTS (S. DOC. NO. 361).

The VICE PRESIDENT laid before the Senate a communication from the Assistant Secretary of the Treasury transmitting, pursuant to law, a communication from the Secretary of the Interior submitting a supplemental estimate of appropriation in the sum of $75,000 required by the Patent Office for printing the weekly issue of patents, etc., which was referred to the Committee on Appropriations and ordered to be printed.

CHICKAMAUGA AND CHATTANOOGA NATIONAL PARK COMMISSION (S. DOC. NO. 360).

The VICE PRESIDENT laid before the Senate a communication from the Acting Secretary of the Treasury transmitting, pursuant to law, a communication from the Secretary of War submitting a supplemental estimate of appropriation in the sum of $8,000 required by the Chickamauga and Chattanooga National Park Commission for the restoration of "Bond Bridge" in the park, fiscal year 1921, which was referred to the Committee on Appropriations and ordered to be printed.

GEORGETOWN BARGE, DOCK, ELEVATOR & RAILWAY CO.

The VICE PRESIDENT laid before the Senate a communication from the Georgetown Barge, Dock, Elevator & Railway Co. transmitting, pursuant to law, a report of that company for the year ended December 31, 1920, which was referred to the Committee on the District of Columbia.

DISPOSITION OF USELESS PAPERS.

The VICE PRESIDENT laid before the Senate a communication from the Secretary of Commerce, transmitting, pursuant to law, schedules of useless papers devoid of historic interest accumulated in the files of the Department of Commerce, and asking for action looking to their disposition, which was referred to a Select Committee on Disposition of Useless Papers in the Executive Departments, to be selected by the Chair. The Vice President appointed Mr. WALSH of Montana and Mr. FRANCE members of the committee on the part of the Senate, and directed the Secretary of the Senate to notify the House of Representatives thereof.

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting, pursuant to law, schedules of useless papers devoid of historic interest accumulated in the files of the Department of the Treasury, and asking for action looking to their disposition, which was referred to a Select Committee on Disposition of Useless Papers in the Executive Departments, to be selected by the Chair. The Vice President appointed Mr. WALSH of Montana and Mr. FRANCE members of the committee on the part of the Senate, and directed the Secretary of the Senate to notify the House of Representatives thereof.

The VICE PRESIDENT laid before the Senate a communication from the Secretary of War, transmitting, pursuant to law, samples of "Industrial file" containing 10,000,000 cards which are now useless and devoid of historic interest, and asking for action looking to their disposition, which was referred to a Select Committee on Disposition of Useless Papers in the Executive Departments, to be selected by the Chair. The Vice President appointed Mr. WALSH of Montana and Mr. FRANCE members of the committee on the part of the Senate, and directed the Secretary of the Senate to notify the House of Representatives thereof.

CREDENTIALS.

The VICE PRESIDENT laid before the Senate a certificate of the governor of Georgia, certifying to the election of THOMAS E. WATSON as a Senator from that State for the term of six years beginning March 4, 1921, which was read and ordered to be filed as follows:

STATE OF GEORGIA,
Executive Department, Atlanta.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 2d day of November, 1920, THOMAS E. WATSON was duly chosen by the qualified electors of the State of Georgia a Senator from said State to represent said State in the Senate of the United States for a term of six years, beginning on the 4th day of March, 1921.

Given under my hand and the great seal of the State at the capitol in the city of Atlanta this the 5th day of January, 1921.

[SEAL.] HUGH M. DORSEY, *Governor.*

By the governor:

S. G. MCLENDON,
Secretary of State.

PETITIONS AND MEMORIALS.

Mr. NELSON presented a petition of the Northwest Mushroom Growers' Association, of St. Paul, Minn., favoring a tariff upon mushrooms, which was referred to the Committee on Finance.

He also presented a memorial of Hart & Murphy, of St. Paul, Minn., protesting against an increase in the tariff duty on wrapper tobacco, which was referred to the Committee on Finance.

He also presented a concurrent resolution of the Legislature of Minnesota, favoring an appropriation to continue Federal aid to the several States in the construction of roads, which was referred to the Committee on Post Offices and Post Roads and ordered to be printed in the RECORD, as follows:

Concurrent resolution memorializing the Congress of the United States to appropriate money in aid of the construction of public roads.

Whereas the Congress of the United States has given great impetus to road building in the State of Minnesota and aided materially in financing the construction of State roads through the appropriation of Federal aid for that purpose; and

Whereas the State of Minnesota is depending upon the continuation of such Federal aid to assist it in carrying out its road-building program, and which program must be formulated and provided for by acts of the legislature of this State at its present session: Therefore be it

Resolved by the Senate of the State of Minnesota (the House of Representatives concurring), That the Congress of the United States be, and hereby is, requested to continue the Federal road aid to the several States, and that the amount of such Federal road aid for the next four years be in the amount of $100,000,000 per year, to be apportioned and expended in accordance with the provisions of the present Federal road aid act; be it further

Resolved, That a copy of this resolution be forwarded to the Speaker of the House, the President of the Senate, and to each Member of the Senate and the House of Representatives in Congress from the State of Minnesota.

LOUIS L. COLLINS,
Lieutenant Governor.
W. I. NOLAN,
Speaker of the House of Representatives.

Passed the senate the 14th day of January, 1921.

GEO. W. PEACHEY,
Secretary of the Senate.

Passed the house the 14th day of January, 1921.

OSCAR ARNESON,
Chief Clerk House of Representatives.

Approved January 18, 1921.

J. A. O. PREUS,
Governor.

Filed January 19, 1921.

MIKE HOLM,
Secretary of State.

I, Mike Holm, secretary of state of the State of Minnesota and keeper of the great seal, do hereby certify that the above is a true and correct copy of the resolution filed in my office January 19, 1921.

[SEAL.] MIKE HOLM,
Secretary of State.

Mr. ROBINSON presented a resolution of Belle Point Lodge, No. 520, International Association of Machinists, of Fort Smith, Ark., opposing a reduction of the mechanical force of the Southern Pacific, Santa Fe, and other railroad corporations, etc., which was referred to the Committee on Interstate Commerce.

He also presented a petition of George T. Carnall et al., of Fort Smith, Ark., praying for the repeal of the tax on real-estate mortgages, which was referred to the Committee on Finance.

He also presented a petition of Harry E. Kelley, president of Kelley Trust Co., of Fort Smith, Ark., praying that an increased appropriation be made for the destruction of predatory animals, which was referred to the Committee on Agriculture and Forestry.

Mr. GRONNA. I present a concurrent resolution of the Legislature of North Dakota. I ask that it may be read and referred to the Committee on Public Lands.

The concurrent resolution was read and referred to the Committee on Public Lands, as follows:

DEPARTMENT OF STATE.
State of North Dakota.

To all to whom these presents shall come:

I, Thomas Hall, secretary of state of the State of North Dakota, do hereby certify that the following resolution was adopted by the seventeenth legislative assembly on the 17th day of January, 1921:

Dated at Bismarck, N. Dak., this 18th day of January, 1921.

THOMAS HALL,
Secretary of State.

Concurrent resolution.

Whereas crops in the vicinity of and on the Standing Rock Reservation, located in the States of North Dakota and South Dakota, have been practical failures during the past three years; and

Whereas, under and pursuant to the proclamation of the President of the United States, under date of March 18, 1915, approximately 2,500 settlers made entries upon the lands of said Standing Rock Reservation and have settled and made homes thereupon; and

Whereas, on account of aforesaid crop failures and losses sustained in stock raising, practically all of said entrymen are in default in their payments to the Government of the United States on account of said entries; and

Whereas no provision is made for the extension of time for the payment of said installments upon said entries in meritorious cases under the provisions of the act of Congress of February 14, 1913, as is disclosed by the Department of the Interior Circular No. 680; and

Whereas, under and by virtue of a ruling of the Department of the Interior as disclosed by said Department of the Interior Circular No. 680, registers and receivers of the Federal land offices located at Bismarck, N. Dak., and Lemmon, S. Dak., have been instructed as follows:

"You are directed, therefore, in all cases where payments are now due and unpaid, and where payments hereafter become due and are not paid, to serve notice on the entrymen, of the defaults, and that in the event of their failure to make the payments in the time allowed by you for that purpose, you will report their entries to this office for cancellation.

"You will allow a period of 60 days from receipt of notice for the payment of sums now due and unpaid; but in all cases where payments hereafter become due and are not paid, you will require the payments to be made within a period of 30 days from receipt of notice."

Now, therefore, be it

Resolved by the Legislative Assembly of the State of North Dakota assembled in regular session, That by virtue of the foregoing facts and circumstances great hardships and misfortunes will be and are being endured and suffered by such entrymen to the great detriment of the States of North and South Dakota, and the citizens thereof;

Therefore we respectfully urge the National Congress in session assembled to immediately consider and relieve this most deplorable condition by proper legislation; be it

Resolved further, That the secretary of state of the State of North Dakota be requested to forward copies of this concurrent resolution immediately upon its passage and approval to the President of the Senate of the United States and the Speaker of the National House of Representatives at Washington, D. C., and to the Members of the Senate and the House of Representatives of the National Congress from the States of North and South Dakota.

Mr. McCUMBER. Mr. President, bills covering the same subject were introduced some time ago, one in the House and the other by myself in the Senate, providing for the extension referred to. Both bills are pending before the Committee on Public Lands of the respective Houses. It is my information that there will be a meeting of the Committee on Public Lands of the Senate to-morrow and that the bill will be ordered reported. The Senator from Utah [Mr. SMOOT], of course, understands the necessity for prompt action in the matter if we are to have the relief.

Mr. SMOOT. I will say to the Senator from North Dakota that the Committee on Public Lands will meet to-morrow morning at 10.30, and I shall call the matter to the attention of the committee at that time.

Mr. McCUMBER. I hope that the Senator can get a report and immediate action on it. It is very important.

Mr. SMOOT. The bill has been referred to the department for a report. I can not state whether the report is before the committee, but I shall endeavor to ascertain to-day, and if not I shall ask for the report at once.

Mr. McCUMBER. I will say that the report is before the committee, because I have a copy of it myself, and the original I sent to the committee.

Mr. McNARY presented a resolution of the Legislature of the State of Oregon, relating to the Fordney emergency tariff bill, which was read and ordered to lie on the table, as follows:

UNITED STATES OF AMERICA, STATE OF OREGON,
Office of the Secretary of State.

I, Sam A. Kozer, secretary of state of the State of Oregon and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of senate joint memorial No. 1 with the original thereof adopted by the Senate and House of Representatives of the Thirty-first Legislative Assembly of the State of Oregon and filed in the office of the secretary of state January 17, 1921, and that the same is a full, true, and complete transcript therefrom and of the whole thereof, together with all indorsements thereon.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 18th day of January, A. D. 1921.

[SEAL.]

SAM A. KOZER,
Secretary of State.

Senate joint memorial 1.

Whereas this country is being flooded with foreign products which are destroying the home markets for the produce from the American farm, thereby causing financial disaster to overtake our farmers and stock raisers, and in this way destroy the very foundation of American prosperity: Therefore be it

Resolved by the Senate of the State of Oregon (the House of Representative concurring), That the Congress of the United States be, and it is hereby, memoralized to pass at the earliest possible moment the Fordney emergency tariff bill; be it further

Resolved, That the Congress of the United States is hereby further memorialized to enact a comprehensive tariff bill protecting American labor, American products, and American industry; be it further

Resolved, That the secretary of state be, and he is hereby, authorized and directed to transmit by telegraph one copy of this resolution to each Senator and Representative in Congress from Oregon.

Adopted by the senate January 10, 1921.

ROY W. RITNER,
President of the Senate.

Adopted by the house January 13, 1921.

LOUIS E. BEAN,
Speaker of the House.

Indorsed: Senate joint memorial No. 1. Introduced by Senator Dennis. John P. Hunt, chief clerk. Filed January 17, 1921. Sam A. Kozer, secretary of state.

Mr. McNARY presented the following concurrent resolution of the Legislature of Oregon, which was read and referred to the Committee on Finance and ordered to be printed in the RECORD:

UNITED STATES OF AMERICA,
STATE OF OREGON,
Office of the Secretary of State.

I, Sam A. Kozer, secretary of state of the State of Oregon, and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of house joint memorial No. 2 with the original thereof adopted by the Senate and House of Representatives of the Thirty-first Legislative Assembly of the State of Oregon and filed in the office of the secretary of state January 17, 1921, and that the same is a full, true, and complete transcript therefrom and of the whole thereof, together with all indorsements thereon.

In testimony whereof, I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 18th day of January, A. D. 1921.

[SEAL.]

SAM A. KOZER,
Secretary of State.

House joint memorial 2.

To the honorable Senate and the House of Representatives of the United States of America in Congress assembled, your memorialists, the Legislative Assembly of the State of Oregon, respectfully represent that—

Whereas it has come to the attention of this body that there is before the Congress of the United States a measure known as the Fordney or fourfold adjustment compensation plan for ex-service men submitted by the American Legion; and

Whereas the purpose of this measure is to equalize the sacrifice of the American people in the World War so that the men who served in our Armies, Navy, and Marine Corps, and who were required to leave their home and employment in defense of the country, may be assisted in readjusting themselves to the economic and industrial life of the country; and

Whereas a decision by Congress has been delayed for nearly two years, creating a situation wherein the people of many States recognizing the validity, justice, and urgency of such compensation have been moved in their impatience at the failure of Congress to act to take upon themselves the partial payment of this obligation; and

Whereas this obligation is essentially and fundamentally a Federal obligation and which is long overdue; and

Whereas the House of Representatives of the United States have passed favorably upon this measure:

Resolved, That we, your memorialists, the Senate and House of Representatives of the State of Oregon, in regular session assembled, do respectfully and earnestly petition the Congress of the United States forthwith to act in concurrence with the House of Representatives to the end that this just claim of the men who served in the World War may be liquidated without further delay.

Resolved, That the secretary of the State of Oregon be, and he is hereby, directed to forward a copy of this joint memorial under his certificate and seal to the President of the United States, Vice President of the United States, the Speaker of the House of Representatives, and to each Senator and Representative from the State of Oregon in the Congress of the United States.

Adopted by the senate January 12, 1921.

ROY W. RITNER,
President of the Senate.

Adopted by the house January 12, 1921.

LOUIS E. BEAN,
Speaker of the House.

Indorsed: House joint memorial No. 2. Introduced by Korell, Johnson, Hammond, Pierce, North, Wells, Marsh, and Leonard. W. F. Drager, chief clerk. Filed January 17, 1921. Sam A. Kozer, secretary of state.

Mr. McNARY presented the following concurrent resolution of the Legislature of Oregon, which was read and referred to the Committee on Post Offices and Post Roads and ordered to be printed in the RECORD:

UNITED STATES OF AMERICA,
STATE OF OREGON,
Office of the Secretary of State.

I, Sam A. Kozer, secretary of state of the State of Oregon, and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of the house joint memorial No. 3 with the original thereof adopted by the senate and house of representatives of the Thirty-first Legislative Assembly of the State of Oregon and filed in the office of the secretary of state January 17, 1921, and that the same is a full, true, and complete transcript therefrom and of the whole thereof, together with all indorsements thereon.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 18th day of January, A. D. 1921.

[SEAL.]

SAM A. KOZER,
Secretary of State.

House joint memorial 3.

To the Senate and House of Representatives of Congress of the United States of America:

We, your memorialists, the Senate and House of Representatives of the State of Oregon, in regular session convened, respectfully represent that:

Whereas the American Association of Highway Officials, in convention assembled at Louisville, Ky., in December, 1919, adopted a series of resolutions, copies of which were transmitted to the House of Representatives and the Senate of the United States, in which resolutions there were, among other matters urged upon the attention and consideration of the Congress of the United States, the following facts:

That the States within whose boundaries are included large national forest reserves have expended during the last five years millions of dollars in the improvement of State and county highway systems; that the majority of these States have issued bonds in large amounts in order to finance modern highway construction; that there are within the boundaries of these States approximately 150,000,000 acres of national forest reserves; that State and county highways of national importance traverse these reservations through areas involving the most difficult highway construction in the West; that the forests in these various States are great national assets which should be preserved, and the construction of roads and highways traversing the said forests facilitates the control of forest fires, which have, in the past, caused tremendous losses; that the appropriations heretofore made by Congress have been inadequate to permit of sufficient road construction within such national forests to keep pace with State and county highway systems and construction, or to provide for a standard of construction equaling that of the several States and counties; that the withdrawal of large areas by the Government has decreased the taxable resources of the States and counties wherein such withdrawals have been made, thereby reducing the bonding capacity of said States and counties; that it is the duty of the National Government to provide sufficient funds to develop its national resources to the same extent and standards as that of the States and counties similarly situated; and

Whereas the facts and conditions heretofore stated apply with equal force, as emphasized by the American Association of Highway Officials, to Indian and other Federal reservations, and to unappropriated lands of the United States; and

Whereas the said Association of Highway Officials did, by said resolutions, urge upon the United States Congress, the appropriation of the sum of $100,000,000 per year for a series of years, for the construction of rural post roads in the several States; and

Whereas the Public Land States Highway Association, in regular session convened in Washington, D. C., in February, 1920, unanimously indorsed the principles involved in the Louisville resolution; and

Whereas as a result of said conferences the Hon. GEORGE E. CHAMBERLAIN, United States Senator from the State of Oregon, introduced a bill for the continuation of the Federal aid for the construction of rural post roads, and for the construction of roads and trails, within and partially within the forest reserves; and

Whereas at a subsequent annual meeting of the American Association of Highway officials, in convention assembled in Washington, D. C., in December, 1920, said Association of Highway Officials, 47 States of the Union being represented, unanimously indorsed the principles involved in said bill introduced by Senator CHAMBERLAIN; and as a result of said convention, and the recommendations of said American Association of Highway Officials, the Hon. C. N. MCARTHUR, of Oregon, introduced in the House of Representatives a bill embodying in substance that contained in the Chamberlain bill; and

Whereas said American Association of Highway Officials, after full consideration of the McArthur bill, unanimously indorsed the same; and

Whereas said legislation is now pending before the two branches of Congress; and

Whereas your memorialists, the Senate and House of Representatives of the State of Oregon, unanimously indorse the Chamberlain-McArthur bill, and in support thereof respectfully urge upon the Congress of the United States the further fact that the State of Oregon occupies a peculiar and special position, with reference to national forests and other national and Federal reserves, and therefore is in a peculiar and special need of adequate highway construction; and

Whereas the State of Oregon has expended during the past four years over $27,000,000 in the construction of a permanent highway system in the State of Oregon; and

Whereas the State of Oregon has expended its full quota of Federal aid funds allotted to Oregon, and unless further extension of Federal aid in the construction of rural post roads, and the construction of forest roads and trails, is granted by this Congress, a serious breach in the highway program of the State of Oregon must necessarily follow: Therefore be it

Resolved by the Senate and House of Representatives of the State of Oregon, in regular session convened, That we do hereby most respectfully urge and request that the Congress of the United States of America give special and immediate attention to the passage of the Chamberlain-McArthur bill, and appropriate for highway construction the amounts designated in said bill, both for the construction of rural post roads in the several States and for the construction of forest roads and trails in the public land States, as designated in said bill, or so much thereof as can be justly and rightly appropriated this session of Congress; and be it further

Resolved, That the secretary of the State of Oregon be, and is hereby, authorized and directed to transmit a copy of this memorial, under the seal of his office, to each Member of the Oregon delegation in Congress and to the presiding officer of the Senate and House of Representatives and to the chairman of the Committee on Roads and Highways of the House of Representatives and the chairman of the Committee on Post Offices and Post Roads of the United States Senate.

Adopted by the senate January 12, 1921.

ROY W. RITNER,
President of the Senate.

Adopted by the house January 12, 1921.

LOUIS E. BEAN,
Speaker of the House.

Indorsed: House joint memorial No. 3. Introduced by Mr. Bean; W. F. Drager, chief clerk. Filed January 17, 1921. Sam A. Kozer, secretary of state.

Mr. SHEPPARD (for Mr. CHAMBERLAIN) presented three concurrent resolutions of the Legislative Assembly of the State of Oregon, which took the same course as the identical concurrent resolutions appearing above presented by Mr. MCNARY.

Mr. WARREN presented a concurrent resolution of the Legislature of Wyoming in relation to the so-called packers' bill, which was ordered to lie on the table and to be printed in the RECORD, as follows:

THE STATE OF WYOMING,
OFFICE OF THE SECRETARY OF STATE.

UNITED STATES OF AMERICA,
State of Wyoming, ss:

I, W. E. Chaplin, secretary of state of the State of Wyoming, do hereby certify that the annexed copy of original house joint memorial No. 2, of the Sixteenth State Legislature of the State of Wyoming, has been carefully compared with the original on file in this office and that the same is a full, true, and correct transcript of said memorial and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State of Wyoming.

Done at Cheyenne, the capital, this 22d day of January, A. D. 1921.

[SEAL.]

W. E. CHAPLIN,
Secretary of State.
By H. M. LYMANN,
Deputy.

House joint memorial 2.

Be it resolved by the House of Representatives of the State of Wyoming (the Senate concurring), That the Senate of the United States be memorialized as follows:

Whereas on January 24, 1921, 4 p. m., the Senate of the National Congress will by special order vote on the Gronna bill, which provides for the control of the packing and meat-producing industry through a live-stock commission clothed with power to make rules and regulations, said commission to be appointed by Federal Government: And therefore be it

Resolved, That we respectfully urge your honorable body that you give the said Gronna bill the most serious consideration, as it may relate to all of those industries which are directly affected by legislation which is aimed at the packing industry at a time when our business conditions are in a state of unparalleled disturbance and distress; and be it further

Resolved, That a certified copy of this joint memorial be sent to each of the Members of the Wyoming delegation in our National Congress and to the chairmen of the Senate and House committees which have this bill under consideration.

FRANK E. LUCAS,
Vice President of the Senate.
L. R. EWART,
Speaker of the House.

Mr. KENDRICK presented an identical concurrent resolution of the Legislature of Wyoming, which took the same course as the resolution appearing above.

He also presented a telegram in the nature of a memorial from the Sheridan Woman's Club, of Sheridan, Wyo., remonstrating against commercializing the national parks, which was referred to the Committee on Commerce.

Mr. LENROOT presented a petition of Women of the War Veterans of Milwaukee, Wis., favoring the passage of a bonus bill for ex-service men, which was referred to the Committee on Finance.

Mr. HALE presented a memorial of the State Grange, of Maine, opposing a daylight saving law or a zone composed of certain Eastern States, which was referred to the Committee on Interstate Commerce.

He also presented a petition of the Maine State Grange, of Auburn, Me., favoring an embargo on all foreign shipments of potatoes for a period of one year, which was referred to the Committee on Finance.

Mr. ELKINS presented a petition of sundry citizens of Richwood, W. Va., praying for the enactment of legislation restricting the immigration of aliens, which was referred to the Committee on Immigration.

He also presented a petition of sundry members of the board of directors of the Young Women's Christian Association, of Wheeling, W. Va., favoring the enactment of legislation to create a department of education, which was referred to the Committee on Education and Labor.

Mr. CAPPER presented a resolution adopted by Wasco Farm Center, of Wasco, Calif., favoring legislation to prohibit gambling in grain products, which was referred to the Committee on Agriculture and Forestry.

He also presented a memorial of Farmers' Union No. 225, of Bache, Okla., protesting against speculation in farm products, etc., which was referred to the Committee on Agriculture and Forestry.

He also presented a resolution of the Kansas-Oklahoma Fruit Jobbers' Association, of Wichita, Kans., favoring a duty on potatoes, onions, and lemons to be included in the emergency tariff bill, which was ordered to lie on the table.

REPORTS OF COMMITTEES.

Mr. LODGE, from the Committee on Foreign Relations, to which was referred the message of the President of May 25, 1920, transmitting a communication from the Secretary of State, regarding certain property in London as a residence for the American ambassador, etc., reported a bill (S. 4916) to acquire land and buildings in London, England, for the use of the diplomatic representative of the United States, which was read twice by its title, and submitted a report (No. 716) thereon.

Mr. FLETCHER, from the Committee on Banking and Currency, to which was referred the bill (S. 4666) to amend section 13 of an act known as the Federal reserve act, approved December 23, 1913, reported it favorably with an amendment, and submitted a report (No. 717) thereon.

Mr. NELSON, from the Committee on the Judiciary, to which was referred the bill (S. 4897) to amend section 9 of an act entitled "An act to define, regulate, and punish trading with the enemy, and for other purposes," approved October 6, 1917, as amended, reported it favorably without amendment.

He also, from the same committee, to which was referred the bill (S. 4719) conferring jurisdiction upon the United States District Court for the Eastern District of South Carolina to hear and determine the claim of the owners of the Danish steamship *Flynderborg* against the United States, and for other purposes, reported it favorably with an amendment and submitted a report (No. 718) thereon.

Mr. McKELLAR, from the Committee on Military Affairs, to which was referred the bill (H. R. 1949) for the relief of George F. Reid, reported it favorably without amendment and submitted a report (No. 719) thereon.

Mr. SPENCER, from the Committee on Military Affairs, to which was referred the bill (H. R. 13319) for the relief of Wilson Certain, reported it favorably without amendment and submitted a report (No. 720) thereon.

Mr. LENROOT, from the Committee on Military Affairs, to which was referred the bill (H. R. 1299) for the relief of George LeClear, reported it favorably without amendment.

He also, from the same committee, to which was referred the bill (H. R. 1900) for the relief of Alfred E. Lewis, reported it favorably without amendment.

Mr. TOWNSEND, from the Committee on Post Offices and Post Roads, to which was referred the bill (H. R. 15441) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1922, and for other purposes, reported it with amendments and submitted a report (No. 721) thereon.

ANNIVERSARY OF THE ADMISSION OF MISSOURI.

Mr. McLEAN. From the Committee on Banking and Currency I report back favorably with an amendment the bill (S. 4893) to authorize the coinage of a 50-cent piece in commemoration of the one hundredth anniversary of the admission of Missouri into the Union, and I ask for its immediate consideration.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

Mr. UNDERWOOD. I do not think I have any objection to the consideration of the bill, but such bills should first be read, and then we can determine the question.

Mr. BORAH. If there is going to be any discussion of the bill, I shall object. We have not had morning business for about 10 days, and we ought to get through with that. Does the Senator think there will be any discussion?

Mr. McLEAN. I do not think there will be any opposition to the bill.

The VICE PRESIDENT. The bill will be read.

The Secretary read the bill; and, by unanimous consent, the Senate, as in Committee of the Whole, proceeded to its consideration.

The amendment was, in section 1, page 1, line 6, before the word "thousand," to strike out "five hundred" and insert "two hundred and fifty," so as to make the bill read:

Be it enacted, etc., That in commemoration of the one hundredth anniversary of the admission of Missouri into the Union there shall be coined at the mints of the United States 50-cent pieces to the number of 250,000, such 50-cent pieces to be of the standard troy weight, composition, diameter, device, and design as shall be fixed by the Director of the Mint, with the approval of the Secretary of the Treasury, which said 50-cent pieces shall be legal tender in any payment to the amount of their face value.

SEC. 2. That all laws now in force relating to the subsidiary silver coins of the United States and the coining or striking of the same, regulating and guarding the process of coinage, providing for the purchase of material and for the transportation, distribution, and redemption of the coins, for the prevention of debasement or counterfeiting, for security of the coin, or for any other purposes, whether said laws are penal or otherwise, shall, so far as applicable, apply to the coinage herein authorized: *Provided*, That the United States shall not be subject to the expense of making the necessary dies and other preparations for this coinage.

The amendment was agreed to.

The bill was reported to the Senate as amended and the amendment was concurred in.

The bill was ordered to be engrossed and to be read a third time.

The bill was read the third time and passed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. LODGE:

A bill (S. 4909) to authorize the payment of an indemnity to the Norwegian Government for the detention of three subjects of Norway in Hudson County, N. J.; to the Committee on Foreign Relations.

By Mr. EDGE:

A bill (S. 4910) to provide for the advertising for bids on purchases of supplies and contracts for labor and materials for the construction and repair of vessels under the United States Shipping Board or the United States Emergency Fleet Corporation; and

A bill (S. 4911) authorizing and directing examination and survey of the Hudson River channel along the Weehawken-Edgewater water front; to the Committee on Commerce.

By Mr. NELSON:

A bill (S. 4912) to authorize the appointment of an ordnance storekeeper in the Army; to the Committee on Military Affairs.

By Mr. POINDEXTER:

A bill (S. 4913) to provide that engineer field clerks shall have the same military status and be subject to the same obligations and benefits as Army field clerks; to the Committee on Military Affairs.

By Mr. JONES of New Mexico:

A bill (S. 4914) for the consolidation of forest lands in the Carson and Santa Fe National Forests, N. Mex., and for other purposes; to the Committee on Public Lands.

By Mr. MOSES:

A bill (S. 4915) granting an increase of pension to Nellie A. Sanborn (with accompanying papers); to the Committee on Pensions.

By Mr. SPENCER:

A bill (S. 4917) to amend the income tax law, being Title II of the revenue act of 1918, by permitting the deduction from net income subject to tax of contributions made by corporations to organizations formed for certain enumerated purposes; to the Committee on Finance.

By Mr. KENDRICK:

A bill (S. 4918) granting a pension to William J. Swift; to the Committee on Pensions.

CHIEF OF MILITIA BUREAU.

Mr. CAPPER. I submit a resolution calling upon the Secretary of War for certain information in regard to the appointment of the Chief of the Militia Bureau, and I ask unanimous consent for the consideration of the resolution at this time.

Mr. SMOOT. Let the resolution be read, Mr. President.

The VICE PRESIDENT. The resolution will be read.

The resolution (S. Res. 432) was read, as follows:

Whereas section 81 of an act entitled "An act to amend an act entitled, 'An act for making further and more effectual provision for the national defense, and for other purposes,' approved June 3, 1916, and to establish military justice," approved June 4, 1920, provides that, "The Chief of the Militia Bureau shall be appointed by the President, by and with the advice and consent of the Senate, by selection from lists of present and former National Guard officers, recommended by the governors of the several States and Territories as suitable for such appointment"; and

Whereas in compliance with the provisions of this act the governors of 35 States recommended to the War Department the appointment of Charles I. Martin, Adjutant General of the State of Kansas, president of the Adjutant Generals' Association of the United States, and a veteran of the War with Spain and the World War, as Chief of the Militia Bureau; and

Whereas it is believed by a large number of National Guard organizations that the appointment of a Chief of the Militia Bureau made on December 29, 1920, ignores the recommendations of the governors of 35 of the 48 States duly filed with the War Department in accordance with the provisions of an act of Congress, and is contrary to the spirit and purpose of Congress in enacting a law providing for such appointment: Therefore be it

Resolved, That the Secretary of War be, and he is hereby, directed to advise the Senate, if not incompatible with the public interest, as to the number, nature, and source of the recommendations filed in behalf of each officer considered in connection with the appointment of a Chief of the Militia Bureau, and present to the Senate all other information in the possession of the department having a bearing on this appointment.

The VICE PRESIDENT. Is there any objection to the present consideration of the resolution?

Mr. UNDERWOOD. Mr. President, I have no objection to the present consideration of the resolution if the Senator from Kansas desires it to be passed in the form in which he has presented it, but I desire to call attention to the fact that it calls on the Secretary of War for his reasons in making the appointment therein referred to. I doubt whether it is in line with a resolution of inquiry to call on the Secretary of War for his reasons in making a certain appointment. The Senator from Kansas is entitled to call on a department chief for facts and statements, but calling for his reasons for an appointment I think would give him good ground to decline to respond to the resolution. We have no right to demand a Cabinet officer's reasons for his action. I shall not object to the Senator's resolution, but I doubt whether it is in proper form.

Mr. CAPPER. Mr. President, I have no objection to eliminating that part of the resolution, if the Senator from Alabama prefers that I shall do so.

Mr. UNDERWOOD. I should prefer to have that part of the resolution stricken out. I think the Senator, however, is entitled to the facts for which his resolution asks.

Mr. CAPPER. That is what we want, and is really all we want.

Mr. UNDERWOOD. I do not intend to object to the resolution, if the Senator desires it to pass as he has written it, but I would much prefer that the portion calling for the Secretary's reasons be stricken out, because, I repeat, I do not think we have any right in the Senate to call on a Cabinet officer for the reasons governing his action.

Mr. JONES of Washington. The resolution is somewhat long and contains several whereases. I think it should go over until to-morrow.

The VICE PRESIDENT. The resolution will go over under the rule.

SUSPENSION OF NAVAL BUILDING PROGRAM.

Mr. BORAH. I submit the resolution which I send to the desk, and ask unanimous consent for its immediate consideration.

The VICE PRESIDENT. The resolution submitted by the Senator from Idaho will be read.

The resolution (S. Res. 433) was read, as follows:

Resolved, That the Committee on Naval Affairs be, and is hereby, directed to report to the Senate whether in its opinion it is practical and also a sound policy to suspend our naval building program now in progress for the period of six months to the end that a full investigation and free discussion may be had as to what constitutes a modern fighting navy—a navy with the types of ships and with the air and submarine weapons that would be most effective in the strategy and tactics of future war on the sea; and also to the end that we may avail ourselves in the matter both as to economy and efficiency of any possible agreement between naval powers providing for the reduction of armaments.

Second. That said committee report to the Senate such data and information (not already printed and made public) as the said committee has had before it for consideration relative to the probable value of surface ships in future naval warfare.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. UNDERWOOD. Mr. President, I should like to ask the Senator from Idaho to state what is the purpose of the resolution and why he desires its immediate consideration.

Mr. BORAH. Mr. President, the naval appropriation bill will be here shortly, I presume. I had intended to discuss the matter briefly, but I do not desire to do so in the morning hour. I will simply say that the resolution calls upon the Committee on Naval Affairs for information with reference to the feasibility and the wisdom of suspending the naval building program for six months. As the Senator perhaps knows, Great Britain has suspended her building program for six months for the purpose of ascertaining, if she may, the real revelations in the war with reference to what constitutes a modern navy.

Mr. UNDERWOOD. Of course, I realize the importance of the question. It is a problem that not only confronts this country but confronts all the world as to whether present plans for naval armaments shall be proceeded with. The Senator has directed his resolution of inquiry to a committee of the Senate. Of course, all of us have great respect for their conclusions, where they have been deliberately worked out; but I do not know whether or not the Senator is informed if the committee to which the resolution is directed has developed such a study of the situation that they are prepared to make a report based on the facts and upon the consideration which they have given to the subject.

Mr. BORAH. What I desire to ascertain is whether or not the Committee on Naval Affairs has considered the question, and if so, what information it has in order that it may be laid before the Senate. If the report is satisfactory, I intend to follow this by a resolution directing an investigation of the entire question.

The VICE PRESIDENT. Is there any objection to the present consideration of the resolution?

Mr. KING. Mr. President, speaking for myself and as a member of the Naval Affairs Committee, I hope the resolution will be adopted. I think the Naval Affairs Committee within a reasonably short time and during its consideration of the naval appropriation bill may obtain the information which, as I heard it read, the resolution calls for. It seems to me that now is an appropriate time for this Government to indicate to the world its purpose not to continue the burdens of military and naval armament. I hope that the Naval Affairs Committee, if this resolution shall be adopted, will make an adequate investigation to determine whether or not we may not suspend the naval program for the period indicated in the resolution, with a view ultimately to relieving the American people from the tremendous burden which is now bearing upon them.

Mr. LODGE. Mr. President, the chairman of the Committee on Naval Affairs is not present, but certainly I can see no objection to the adoption of the resolution of inquiry. It will require considerable time to make the proper investigation and present a satisfactory report.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution? The Chair hears none, and the resolution is agreed to.

SUPPLY OF COMMERCIAL FERTILIZER.

Mr. FLETCHER. I submit a resolution and ask unanimous consent for its present consideration. It calls for a report from the Department of Agriculture on the subject of fertilizers. We are having a great many complaints about the high cost of commercial fertilizers. The department made a report in 1916, in response to a resolution offered by the Senator from South Carolina [Mr. SMITH]. That report is very instructive and valuable. In it the department stated that they were carrying on certain experiments and investigations in certain bureaus looking to a reduction in the cost of the elements entering into commercial fertilizer. The resolution introduced by me would bring that report down to date. I think it very important that we have the information.

Mr. SMOOT. I ask that the resolution be read.

The VICE PRESIDENT. The resolution will be read.

The resolution (S. Res. 435) was read, as follows:

Resolved, That the Secretary of Agriculture is hereby authorized and directed to ascertain as nearly as possible, and to report to the Senate as soon as practicable, the following: The amount of commercial potash, nitrogen, and phosphoric acid available for fertilizer purposes, and the price of each of these articles as compared with the prices for 1913; and to furnish any suggestions as to relieving the situation in case the amount of any or all of these is insufficient or the price prohibitive, and to report what investigations were made and with what results, mentioned in Senate Document 262, Sixty-fourth Congress, first session.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. JONES of Washington. Mr. President, I think that resolution ought to go over until to-morrow. It is rather broad in its scope, as I understand the language from hearing it read.

The VICE PRESIDENT. The resolution will go over.

APPOINTMENT OF POSTMASTERS.

Mr. FLETCHER. Mr. President, I submit the resolution which I send to the desk and ask unanimous consent for its present consideration. I am inclined to think that a somewhat similar resolution, offered the other day, was misunderstood to some extent. The chairman of the Committee on Post Offices and Post Roads made a motion to have it referred to that committee, I think with the idea that it called for a report from that committee on the nominations, and that it asked for the names of service men and ex-service men and widows of ex-service men. It did not ask for that. It simply called for information; that information to be furnished to the Senate and then subsequently disposed of by the Senate. This resolution relieves the committee entirely of that work and directs the information to be furnished to the Senate by the Postmaster General.

I ask for the present consideration of the resolution.

Mr. LODGE. Let us have it read.

The VICE PRESIDENT. The Secretary will read the resolution.

The resolution (S. Res. 434) was read, as follows:

Resolved, That the Postmaster General be, and is hereby, directed to send to the Senate the names of all former service men, and the widows of such, recommended by him to the President for appointment as postmasters and by the President submitted to the Senate for confirmation and not as yet acted upon.

Mr. LODGE. In the absence of the chairman of the Committee on Post Offices and Post Roads, I think the resolution had better go over. A resolution dealing with the same subject matter was objected to heretofore.

The VICE PRESIDENT. The resolution will go over.

CHANGES IN CUSTOMS SERVICE (S. DOC. NO. 359).

The VICE PRESIDENT laid before the Senate a message from the President of the United States, which was read, referred to the Committee on Commerce, and ordered to be printed, as follows:

To the Senate and House of Representatives:

The sundry civil act approved August 1, 1914, contains the following provisions, viz:

The President is authorized from time to time, as the exigencies of the service may require, to rearrange, by consolidation or otherwise, the several customs collection districts and to continue ports of entry by abolishing the same or establishing others in their stead: *Provided*, That the whole number of customs collection districts, ports of entry, or either of them, shall at no time be made to exceed those now established and authorized except as the same may hereafter be provided by law: *Provided further*, That hereafter the collector of customs of each customs collection district shall be officially designated by the number of the district for which he is appointed and not by the name of the port where the headquarters are situated, and the President is authorized from time to time to change the location of the headquarters in any customs collection district as the needs of the service may require: *And provided further*, That the President shall, at the beginning of each regular session, submit to Congress a statement of all acts, if any, done hereunder and the reasons therefor.

Pursuant to the requirements of the third proviso to the said provision, I have to state that the following changes in the organization of the Customs Service have been made by Executive order:

By Executive order dated February 2, 1920, customs collection district No. 27 (southern California) was abolished and customs collection districts Nos. 25 (San Diego) and 27 (Los Angeles) were created.

By Executive order dated February 27, 1920, the county of Alexandria, Va., including the port of Alexandria, was transferred from customs collection district No. 13 (Maryland) to customs collection district No. 14 (Virginia).

By Executive order dated March 6, 1920, the port of Cedar Keys, customs collection district No. 18 (Florida) was abolished.

By Executive order dated September 1, 1920, the port of Sulzer, customs collection district No. 31 (Alaska), was abolished and a port of entry was created at Craig in the same collection district.

All of the above changes were dictated by considerations of economy and efficiency in the administration of customs and other statutes with the enforcement of which the customs service is charged, as well as the necessities and convenience of commerce generally.

WOODROW WILSON.

THE WHITE HOUSE,
25 January, 1921.

THE CALENDAR.

The VICE PRESIDENT (at 12 o'clock and 35 minutes p. m.). The morning business is closed. The calendar under Rule VIII is in order.

Mr. JONES of Washington. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Senate bill 4554, to amend an act entitled "An act to create a Federal power commission," and so forth.

Mr. ASHURST. Mr. President, we should have the calendar considered. It is the experience of the Senate that we ought to have one day a week when we can consider bills as they are reached on the calendar. I object, and call for the regular order.

Mr. JONES of Washington. I move that the Senate proceed to the consideration of Senate bill 4554.

Mr. ROBINSON. Mr. President, I make the point of order that the motion of the Senator from Washington is not in order, the bill not having been reached on the call of the calendar.

The VICE PRESIDENT. The point of order is sustained.

Mr. JONES of Washington. Mr. President, I did not know that it had been arranged that to-day should take the place of Monday. I did not understand that, or I would not have made the motion; so I withdraw it.

The VICE PRESIDENT. It was agreed, by unanimous consent, that to-day was to take the place of Calendar Monday.

Mr. JONES of Washington. I was not aware of that, or I should not have made the request at all.

Mr. SMOOT. Mr. President, I ask unanimous consent that we begin at Order of Business 504. That is the place where the Senate discontinued the consideration of the calendar on the last calendar day.

Mr. ASHURST. That is fair.

Mr. KING. May I inquire whether in the event of the completion of the calendar from that number before the expiration of the morning hour recurrence can be had to the first part of the calendar?

The VICE PRESIDENT. Undoubtedly.

Mr. KING. I have no objection to the request of my colleague.

The VICE PRESIDENT. By unanimous consent, the call of the calendar will begin with Order of Business 504.

The bill (S. 3318) for the relief of Willis B. Cross was announced as first in order on the calendar.

Mr. THOMAS. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 515) to correct the military record of Charles K. Bond, alias Kimball W. Rollins, was announced as next in order.

Mr. THOMAS. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (H. R. 8038) to amend section 4 of the act approved July 17, 1916, known as the Federal farm loan act, extending its provisions to Porto Rico, was announced as next in order.

Mr. McLEAN. I think that had better go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 4076) to amend section 4404 of the Revised Statutes of the United States as amended by the act approved July 2, 1918, providing that the supervising inspectors of the Steamboat-Inspection Service be included under the classified civil service, was announced as next in order.

Mr. KING. I should like an explanation of that bill. I reserve the right to object to its consideration.

Mr. JONES of Washington. I do not know whether the senior Senator from Utah objects to the consideration of that bill at this time or not.

Mr. SMOOT. Yes, Mr. President; I object.

Mr. JONES of Washington. The Senator objects. I knew that he had objected before.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 2903) to provide that robbery of a Federal reserve bank or member bank shall constitute a felony, and for other purposes, was announced as next in order.

Mr. THOMAS. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (H. R. 12266) to amend an act entitled "An act to provide for vocational rehabilitation and return to civil employment of disabled persons discharged from the military or naval forces of the United States, and for other purposes," approved June 27, 1918, as amended by the act of July 11, 1919, was announced as next in order.

Mr. SMOOT. That bill can not be considered under the five-minute rule, and I therefore ask that it may go over.

The VICE PRESIDENT. The bill will be passed over.

W. T. DINGLER.

The bill (H. R. 974) for the relief of W. T. Dingler was considered as in Committee of the Whole. It proposes to pay $60.63 to W. T. Dingler, the amount paid by him as bondsman for postmistress at Zebulon, Ark., to cover loss occasioned by the destroying of the post office by cyclone April 29, 1909.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

C. V. HINKLE.

The bill (H. R. 4184) for the relief of C. V. Hinkle was considered as in Committee of the Whole. It proposes to pay to C. V. Hinkle, late clerk in post office, Conway, Ark., $1,308.33 for salary for 29 months at the rate of $1,000 per annum, the period during which he was dismissed from duty as said post-office clerk, upon charges preferred, which charges were found untrue, and by Executive order he was reinstated, it being found that the real culprit was not said Hinkle, but another person, who is now serving a Federal penitentiary term.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

OSCAR SMITH.

The bill (H. R. 644) for the relief of Oscar Smith was announced as next in order.

The reading clerk read the bill.

Mr. KING. Mr. President, I shall be glad to hear the report of the Senator from Missouri [Mr. SPENCER], who has this bill in charge, as to whether there is any liability upon the part of the Government to make payment for the amount named in the bill.

Mr. SPENCER. The department were of the opinion that there was. The service was rendered, and the committee were of the opinion that the man was entitled to his compensation.

Mr. KING. May I inquire of the Senator if there was an obligation upon the part of the Government and the man rendered services, whether there is not some authority now by which the department could make compensation?

Mr. SPENCER. The committee found no such authority. The passage of this bill by the House was the reason for its approval by the Committee on Claims. There is quite an elaborate report on the bill, which I shall be glad to read to the Senator. It sets out the facts in the case somewhat at length, and the opinions of the departments are in it as well.

Mr. KING. I shall not ask the Senator to take the time of the Senate for that purpose. If the Senator can recall the facts and upon his recollection of them is of the opinion that this is a valid claim against the Government, I shall not object. If, upon the contrary, there is dubiety in the Senator's mind with regard to that matter, I shall object to its consideration.

Mr. SPENCER. I can not say to the Senator that the facts in the case, which are somewhat extensive, are clear in my own mind.

Mr. KING. Then I ask that the bill go over, and I shall be glad to examine the report between now and the next calendar Monday.

The VICE PRESIDENT. The bill will be passed over.

BILLS PASSED OVER.

The bill (H. R. 1789) for the relief of Thomas P. Darr was announced as next in order.

Mr. KING. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 1313) for the relief of Francis Nicholson was announced as next in order.

Mr. SMOOT. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

EXPORTATION OF SUGAR.

The bill (S. 4420) to prohibit the exportation of sugar, and for other purposes, was announced as next in order.

Mr. SMOOT. Mr. President, the Senator from Oregon [Mr. MCNARY] introduced and reported this bill. The last time the calendar was under consideration I made the statement that the bill ought to be indefinitely postponed, but that I would not make the motion until I had spoken to the Senator. Since that time I have called the Senator's attention to the bill, and he agrees that it shall be indefinitely postponed. Therefore I make that motion.

The motion was agreed to.

INTERFERENCE WITH COMMERCE.

The bill (S. 4204) to prohibit interference with commerce was announced as next in order.

Mr. POINDEXTER. Mr. President, the Senator from Wisconsin [Mr. LA FOLLETTE], who is greatly interested in this bill, is not here and wanted to be here when it was considered. I therefore ask that it go over.

The VICE PRESIDENT. The bill will be passed over.

AWARD OF DECORATIONS.

The bill (S. 4432) to provide for awarding decorations, devices, or insignia to the next of kin of deceased persons who would have been entitled to receive the same, and making it unlawful for anyone other than the person authorized to do so to wear such decoration, device, or insignia, was announced as next in order.

Mr. KING. Mr. President, I should like to inquire of some member of the Military Affairs Committee what is the reason of the provision found in the last lines of section 2, which reads as follows:

That honorable separation from the service of the United States of persons who would otherwise be entitled to receive them shall not prohibit or preclude the issuance to such persons of such decorations.

I would like to inquire whether or not the existing law prohibits the reception of such honors by persons who are not within the service and who would be entitled to such insignia, decorations, and so forth, if they were within the service; and if there is an existing law which prohibits it, is it the intention to repeal that law by this enactment? It would seem to me that if there is a law prohibiting the devices, decorations, and emblems from being distributed to those who have been separated from the service, there must have been some reason for such a statute, and if this is intended to repeal that statute, there ought to be some reasons assigned for such action. I should be very glad if some member of the Military Affairs Committee would offer some explanation in regard to that matter. I dislike very much to object to this bill, because I am in entire sympathy with it, if I understand its terms; yet I do not quite understand why such a provision of law is necessary.

Mr. SMOOT. I object to its consideration.

The VICE PRESIDENT. The bill will be passed over.

CLAIM OF WILLIAM H. H. HART.

The bill (S. 2665) for the relief of Prof. William H. H. Hart, principal of the Hart Farm School and Junior Republic for Dependent Children, to establish Hart University, and to provide for its maintenance and support, was announced as next in order.

Mr. SMOOT. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

The resolution (S. Res. 377) referring to the Court of Claims the bill (S. 2665) for the relief of Prof. William H. H. Hart, principal of the Hart Farm School and Junior Republic for Dependent Children, was announced as next in order.

Mr. POINDEXTER. May I ask the Senator from Utah a question? This resolution and the bill just passed over refer to the same matter?

Mr. SMOOT. They refer to the same matter, but I think that as this claim of Prof. Hart has been here so long it ought to go to the Court of Claims, so that court can decide as to whether he has any actual claim against the Government or not.

Mr. POINDEXTER. It occurred to me that as both refer to the same matter, one or the other of them ought to be indefinitely postponed and taken off the calendar.

Mr. SMOOT. That will be done. The bill will be indefinitely postponed if the claim is referred to the Court of Claims. That is all there is to it. If the resolution is agreed to, I shall move immediately for the indefinite postponement of Senate bill 2665.

The VICE PRESIDENT. Is there any objection to the consideration of Senate resolution 377?

Mr. UNDERWOOD. Let it be reported.

The VICE PRESIDENT. The Secretary will read the resolution.

The reading clerk read the resolution (S. Res. 377) reported by Mr. SPENCER from the Committee on Claims, as follows:

Resolved, That the bill (S. 2665) for the relief of Prof. William H. H. Hart, principal of the Hart Farm School and Junior Republic for Dependent Children, now pending in the Senate, together with all the accompanying papers, be, and the same is hereby, referred to the Court of Claims, in pursuance of the provisions of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911; and the said court shall proceed with the same in accordance with the provisions of such act and report to the Senate in accordance therewith.

Mr. UNDERWOOD. Before the resolution is disposed of, I would like to ask the Senator from Utah on what terms the claim is to go to the Court of Claims. Is the court to find a judgment, ascertain the facts, or what?

Mr. SMOOT. Under the resolution the court will ascertain the facts in the case. There is no requirement for a judgment, and Congress will have to make an appropriation to cover whatever the court may decide is due Prof. Hart. This is to determine the facts in the case.

Mr. FLETCHER. Will the action of the Senate adopting the resolution dispose of Senate bill 2665?

Mr. SMOOT. Yes; I have just stated that I would immediately move for the indefinite postponement of Senate bill 2665 if the resolution is agreed to.

Mr. LENROOT. I should like to ask the Senator from Utah, or the chairman, or some other member of the committee, whether the committee are satisfied that this is a valid claim?

Mr. SMOOT. I think there is an amount really due Prof. Hart. I would like to have the Court of Claims ascertain the amount. I do not know whether the Senator has ever read the long hearings which have been held before the Appropriations Committees for several years in regard to the burning of Prof. Hart's school; but I have gone through the testimony carefully, and I have concluded, as I think any other Senator will who will read it, that Prof. Hart has a valid claim, and I just want it to go to the Court of Claims that the court may ascertain the amount.

The resolution was agreed to.

Mr. SMOOT. I move that the bill (S. 2665) for the relief of Prof. William H. H. Hart, principal of the Hart Farm School and Junior Republic for Dependent Children, to establish Hart University, and to provide for its maintenance and support, be indefinitely postponed.

The motion was agreed to.

SUPERINTENDENT OF WEIGHTS, MEASURES, AND MARKETS.

The bill (H. R. 8067) to establish standard weights and measures for the District of Columbia; to define the duties of the superintendent of weights, measures, and markets of the

District of Columbia, and for other purposes, was announced as next in order.

Mr. SMOOT. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

BOULEVARD ON MISSIONARY RIDGE.

The bill (H. R. 12502) providing for a report on the cost of improving and maintaining the Government boulevard on Missionary Ridge, in the Chickamauga and Chattanooga National Military Park, was considered as in Committee of the Whole.

Mr. SMOOT. There is no report accompanying the bill, and I would like to have the Senator from Tennessee [Mr. McKELLAR] give an explanation of it.

Mr. McKELLAR. There is a full explanation given in the bill itself. It states the facts concerning this road.

Mr. SMOOT. Then let it be read.

Mr. McKELLAR. I hope the Senator will permit it to be read, because that is the best way to get a statement of the facts.

The VICE PRESIDENT. The bill will be read.

The Assistant Secretary read the bill, as follows:

Be it enacted, etc., That for the purpose of ascertaining the cost of improvement and maintaining in proper condition for travel the Government boulevard on Missionary Ridge, in the Chickamauga and Chattanooga National Military Park, from the north end of said road, near East Chattanooga, in Hamilton County, Tenn., to Rossville, in Walker County, Ga. (a distance of 7 or 8 miles), the Secretary of War is hereby authorized and directed to cause an examination of said road to be made, and a report to be made by the Chickamauga and Chattanooga National Military Park Commission of the approximate cost of such improvement and the manner in which it can be and should be done. The said commission shall report estimates of the cost of said improvement by concrete surface, and other proper methods. The cost of concrete surface, gutters, excavations, and fills wherever necessary shall be reported, and the cost of graveling excavations and fills, if that method shall be deemed best; and the maintenance of such road, per annum, by oiling and other means, shall also be reported.

No material change shall be made in the line of the road as now established, nor shall the cost of any excavations or fills be considered except where it may be absolutely necessary for a first-class boulevard; but estimates for the cost of widening the road wherever it shall be necessary shall be made.

It shall also report what the cost of concreting the road in its present condition, without additional fills or excavations, will be; and the cost of graveling and maintenance per annum would be, including oiling and the difference between the cost and maintenance of a concrete road per annum and the graveled and oiled road.

The commission shall report to the Secretary of War, as herein provided, within four months from the passage of this act, and the Secretary of War shall transmit this report to Congress with his recommendations in the premises.

The cost of such examination and report shall not exceed $1,000, and so much of said sum as is necessary to make such examination and report is hereby authorized to be appropriated out of any money in the Treasury not otherwise appropriated.

Mr. SMOOT. Why does the Senator ask for an appropriation to carry out this work? Can it not be done under the general appropriations which are made?

Mr. McKELLAR. I understand not. It is a House bill, and I understand that it will require a small appropriation to carry out what is provided in the bill. If the Senator feels that the amount provided is too much and wants it made $500, I should think the work could be done for $500.

Mr. SMOOT. It seems to me that $500 would be ample.

Mr. McKELLAR. The only trouble about it is that it is now so late in the session that if we amended the bill it would be difficult to have it become a law. I hope the Senator will let it pass without amendment, because it is a matter which ought to be attended to, and it ought to be attended to at once.

Mr. SMOOT. Is this survey and examination to be made upon Government-owned lands entirely?

Mr. McKELLAR. I understand that the road is largely through the park and goes out a short distance to the fort. The Government owns and controls it. It is Government property.

Mr. SMOOT. The Government owns the whole of it?

Mr. McKELLAR. It owns the whole of it, I understand.

Mr. SMOOT. I move to strike out "$1,000" and insert "$500."

Mr. McKELLAR. I hope the Senator will not offer that amendment, because it will be difficult to get the bill through at this session unless we agree to it as it is.

Mr. SMOOT. There will be plenty of time for a conference.

Mr. McKELLAR. Very well.

The VICE PRESIDENT. The Secretary will report the amendment.

The Assistant Secretary. On page 3, line 2, strike out "$1,000" and in lieu insert "$500."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

BILLS PASSED OVER.

The bill (S. 4357) to authorize the Secretary of the Treasury to provide medical, surgical, and hospital services and supplies for discharged soldiers, sailors, marines, Army and Navy nurses (male and female), and for other purposes, was announced as next in order.

Mr. THOMAS. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

The resolution (S. Res. 380) referring to the Court of Claims the bill (S. 2673) for the relief of James L. Vai was announced as next in order.

Mr. KING. Let the resolution go over.

The VICE PRESIDENT. It will be passed over.

The bill (S. 3483) for the relief of George T. Hamilton was announced as next in order.

Mr. KING. Let it go over.

The VICE PRESIDENT. It will go over.

The bill (S. 4057) to authorize the Secretary of the Navy to remove the charge of desertion under certain conditions from the records of former members of the naval service, and for other purposes, was announced as next in order.

Mr. THOMAS. Let the bill go over.

The VICE PRESIDENT. It will be passed over.

The bill (S. 4322) for the relief of Philip A. Hertz was announced as next in order.

Mr. THOMAS. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

ESTATES OF I. G. WICKERSHAM AND OTHERS.

The bill (S. 4501) for the relief of certain estates was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the personal or legal representative of the estate of I. G. Wickersham, late of California, the sum of $4,884.51; to the estate of George W. Clayton, late of Colorado, the sum of $710.01; to the estate of Samuel H. Galpin, the sum of $187.31; to the estate of William I. Townsend, the sum of $5,780.27—all late of Connecticut; to the estate of Amanda S. Cook, the sum of $997.98; to the estate of Everell F. Dutton, the sum of $222.66; to the estate of George W. Hoffman, the sum of $1,096.20; to the estate of Theodore Lattan, the sum of $205.90; to the estate of Abner M. Lewis, the sum of $303.30; to the estate of Aaron H. McClurg, the sum of $142.50; to the estate of William J. McDowell, the sum of $92.96; to the estate of Francis E. Rigby, the sum of $715.14; to the estate of William H. Salisbury, the sum of $350.43; to the estate of Francis T. Wheeler, the sum of $5,427.34—all late of Illinois; to the estate of Helen P. Carson, the sum of $166.73; to the estate of Elizabeth Campbell, the sum of $365.62—all late of Indiana; to the estate of Booth F. Glover, the sum of $557.19; to the estate of U. Marinoni, the sum of $1,011.71—all late of Louisiana; to the estate of Mary C. Carson, the sum of $142.06; to the estate of Henry W. Kingsbury, the sum of $300.88; to the estate of William Renshaw, the sum of $353.52—all late of Maryland; to the estate of Clara A. H. Adams, the sum of $238.37; to the estate of Charles W. S. Adams, the sum of $184.31; to the estate of John K. P. Balch, the sum of $413.13; to the estate of Robert Bartlett, the sum of $110.57; to the estate of Julia A. Beal, the sum of $148.50; to the estate of Lyman Brooks, the sum of $118.56; to the estate of John W. Corey, the sum of $181.82; to the estate of Harriet B. Chapman, the sum of $385.40; to the estate of Susan Emily Cunningham, the sum of $382.54; to the estate of Nancy M. Downer, the sum of $3,811.74; to the estate of William G. Doe, the sum of $646.65; to the estate of Chauncey G. Fuller, the sum of $208.40; to the estate of Mary E. Fletcher, the sum of $118.74; to the estate of Elizabeth J. Greeley, the sum of $118.20; to the estate of Pauline Gerry, the sum of $943.53; to the estate of Mary H. Grosvenor, the sum of $163.42; to the estate of Frederick A. Gilbert, the sum of $355.26; to the estate of David N. Holway, the sum of $132.68; to the estate of Elizabeth F. Harvey, the sum of $1,011.90; to the estate of Susan B. Lyman, the sum of $2,578.96; to the estate of Elizabeth P. Loring, the sum of $1,805.55; to the estate of Mary S. Moore, the sum of $77.34; to the estate of Esther S. B. Pettee, the sum of $185.81; to the estate of Eliza A. Paine, the sum of $1,247.61; to the estate of Charles H. Pinkham, the sum of $1,014.66; to the estate of George A. Sammet, the sum of $374.30; to the estate of George Shorey, the sum of $583.58; to the estate of Mary E. Stearns, the sum of $891.14; to the estate of Adeline G. Seccomb, the sum of $128.60; to the estate of Cecilia Tully, the sum of $114.01; to the estate of Gilman J. Wright, the sum of $159.75; to the estate of Francis W. Wright, the sum of $189.94; to the estate of Francis W. Wood, the sum of $306.24; to the estate of Mary Davis Denny, the sum of $118.53; to the estate of James F. Stevens, the sum of $273.40—all late of Massachusetts; to the estate of Jay A. Hubbell, the sum of $1,236.44, late of Michigan; to the estate of Eliza C. Gardner, the sum of $633.42; to the estate of Frederick Heman, the sum of $334.18; to the estate of William Koken, the sum of $900.01; to the estate of Thomas M. Page, the sum of $1,894.80; to the estate of Charles E. Pearce, the sum of $2,994.94; to the estate of Eliza R. Paschall, the sum of $836.36; to the estate of Thomas Rankin, jr., the sum of $716.65; to the estate of William Senter, the sum of $1,689.21; to the estate of Edward Walsh, the sum of $1,100.99; to the estate of Catherine D. Wainwright, the sum of $15,176.30—all late of Missouri; to the estate of John E. Caffrey, the sum of $426.36; to the estate of Peter C. Diehl, the sum of $667.47; to the estate of Hope Z. Deacon, the sum of $798.58; to the estate of Walter Ferrier, the sum of $437.12; to the estate of Garret A. Hooper, the sum of $558.64; to the estate of Frederic Wood, the sum of $924—all late of New Jersey; to the estate of Serena P. Appleton, the sum of $387.15; to the estate of William H. Appleton, the sum of $2,589.34; to the estate of Theodore M. Barnes, the sum of $303.88; to the estate of Alice A. Bacon, the sum of $133.19; to the estate of Sophia E. Beach, the sum of $645.88; to the estate of Catharine Bolken, the sum of $113.29; to the estate of Thomas H. Barowsky, the sum of $845.69; to the estate of Frank A. Burnham, the sum of $91.62; to the estate of Alex Gordon Bradley, the sum of $509.83; to the estate of Julius P. Child, the sum of $172.02; to the estate of James A. Christie, the sum

of $564; to the estate of Lucretia G. Clowes, the sum of $4,249.35; to the estate of James Devlin, the sum of $179.63; to the estate of Milo N. Dayton, the sum of $242.23; to the estate of Cornelia B. De Peyster, the sum of $172.41; to the estate of William G. Evans, the sum of $465.06; to the estate of Benjamin T. Frothingham, the sum of $3,338.92; to the estate of Virginia D. Furman, the sum of $515.22; to the estate of Thomas Fenton, the sum of $997.75; to the estate of Thomas Gould, the sum of $695.12; to the estate of William H. Gelshenen, the sum of $2,325.57; to the estate of Margaret Hilliard, the sum of $598.56; to the estate of Mary Ann Hayes, the sum of $605.22; to the estate of Pierre Humbert, the sum of $2,615.08; to the estate of Emma F. Hall, the sum of $234.96; to the estate of Mary Hanstein, the sum of $171.42; to the estate of Philip J. Holzderber, the sum of $270.36; to the estate of J. Lee Judson, the sum of $2,681.76; to the estate of Sarah M. Knight, the sum of $454.02; to the estate of Edward Kelly, the sum of $1,805.94; to the estate of Mary Ann Kissam, the sum of $668.30; to the estate of Daniel D. Lake, the sum of $282.86; to the estate of J. Nelson Low, the sum of $83.68; to the estate of Phoebe A. Lowerre, the sum of $98.38; to the estate of John McCullough, the sum of $121.72; to the estate of John McDermott, the sum of $292.66; to the estate of Morris Mark, the sum of $1,847.26; to the estate of John H. Moss, the sum of $734.88; to the estate of Jane D. Marks, the sum of $612.13; to the estate of Michael Murphy, the sum of $2,640.90; to the estate of Courtlandt D. Moss, the sum of $1,061.10; to the estate of Alfred Ray, the sum of $4,508.89; to the estate of Agnes H. Robinson, the sum of $525.68; to the estate of James Robley, the sum of $383.84; to the estate of William M. Rice, the sum of $2,690.27; to the estate of Mary R. Swan, the sum of $4,204.15; to the estate of Helene Sommerhoff, the sum of $1,022.63; to the estate of Julia Stansbury, the sum of $584.29; to the estate of John R. Thomas, the sum of $1,697.73; to the estate of Julia K. Thomas, the sum of $102.03; to the estate of Sarah A. Townsend, the sum of $1,951.12; to the estate of Sarah A. Thomson, the sum of $331.90; to the estate of Charles Unger, the sum of $7,655.58; to the estate of Daniel E. Wyand, the sum of $106.02; to the estate of Sarah M. Weston, the sum of $2,929.53; to the estate of William Sanford Weeks, the sum of $161.12; to the estate of Nicolaus Will, the sum of $310.36—all late of New York; to the estate of Charles Baker, the sum of $1,118.81; to the estate of Emerine Baldwin, the sum of $1,070; to the estate of John W. Moore, the sum of $380.55; to the estate of James M. Smith, the sum of $532.56—all late of Ohio; to the estate of Charles Caleb Cresson, the sum of $1,139.45; to the estate of James S. Cox, the sum of $959.34; to the estate of Franklin B. Eisen, the sum of $965.58; to the estate of George W. Farr, the sum of $527.86; to the estate of Morton P. Henry, the sum of $1,766.15; to the estate of David Hey, the sum of $185.98; to the estate of Griffith Morgan Hopkins, the sum of $2,600.83; to the estate of Annie Henderson, the sum of $172; to the estate of Susan W. Longstreth, the sum of $105.49; to the estate of William M. Levering, the sum of $357.96; to the estate of Josiah Miller, the sum of $515.32; to the estate of Stephen P. M. Tasker, the sum of $883.35; to the estate of Josephine S. White, the sum of $282.93—all late of Pennsylvania; and to the estate of John Scowcraft, late of Utah, the sum of $603.93, or so much thereof as may be due under the decisions of the Supreme Court of the United States (see United States *v.* Jones, and McCoach *v.* Pratt, reported in 236 U. S. Rep., decided in January, 1915).

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER.

The bill (H. R. 1856) for the relief of Arthur J. Burdick was announced as next in order.

Mr. SMOOT. Let the bill go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (H. R. 9794) for the relief of Wendell Phillips Lodge, No. 365, Knights of Pythias, was announced as next in order.

Mr. SMOOT. There is no report accompanying the bill. I ask that it may go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (H. R. 7567) for the relief of G. T. and W. B. Hastings, partners trading as Hastings Bros., was announced as next in order.

Mr. KING. Let the bill go over.

The VICE PRESIDENT. It will be passed over.

The bill (S. 4005) to carry out the findings of the Court of Claims in the case of the Fore River Shipbuilding Co. was announced as next in order.

Mr. OVERMAN. Let the bill go over.

The VICE PRESIDENT. The bill will be passed over.

REUBEN R. HUNTER.

The bill (S. 676) for the relief of Reuben R. Hunter was announced as next in order.

Mr. KING. Let the bill go over.

Mr. JONES of New Mexico. Mr. President, I hope there will be no objection to the consideration of the bill. It is a very meritorious matter. It has been fully considered by the committee having the bill in charge, and I feel sure it would be regarded as a meritorious bill by Senators if they understood it.

Mr. KING. I will withhold objection while the Senator may make an explanation of it.

Mr. JONES of New Mexico. The case is a simple one. In 1916 there was a forest fire in New Mexico, and Mr. Hunter, with others, volunteered to help fight that fire. In doing so he suffered such injuries that he became totally blind. The bill simply makes provision for him to come within the terms of the compensation act of 1916, the same as though he were an employee of the United States. The young man is totally blind, totally dependent, and the bill gives him the right of a Federal employee in that respect. I hope that the bill may be passed.

Mr. KING. May I inquire of the Senator whether he has considered the wisdom and propriety of putting into the compensation class individuals who are not employees of the Government? Would it not be better to make a direct appropriation rather than assign to such persons a class or status which they do not enjoy?

Mr. JONES of New Mexico. I will say to the Senator that the bill as originally prepared by me provided for a lump-sum appropriation, but the Committee on Claims, which had the matter in hand, decided that it would be better to deal with it in this way. So the bill as amended is really the bill of the Committee on Claims. They considered the matter at great length. The Senator from Nevada [Mr. HENDERSON], the Senator from Missouri [Mr. SPENCER], and other members of the committee gave very careful consideration to the bill and suggested this manner of dealing with the matter.

I see no reason in the world why the young man should not have the status of an employee serving the Government of the United States at the time of a desperate emergency, aiding in saving a very large amount, in value, of property of the United States. The committee has given the matter full consideration, and, being a unanimous report of the committee, I trust there will be no objection to the bill.

Mr. SMOOT. This is virtually a pension for life. There is no telling what it will cost. It provides for the payment of $66.67 per month. We have had men fight for our country and receive as great injuries who do not receive so much per month. There ought to be some rule applied in these cases.

Mr. JONES of New Mexico. If the Senator will permit me, the bill merely proposes to comply with the rule which has been already established in the case of Federal employees. This is a case of total blindness. If the individual had been an employee of the United States, he would have been entitled under existing law to precisely this amount of compensation. It is in order to conform with that law and put him in the same status as an employee that the bill is proposed to be amended by the committee. I think that the bill as amended by the committee complies with the suggestion which the Senator from Utah has just made.

Mr. SMOOT. I have not looked it up, and I do not know whether the amount is correct or not.

Mr. JONES of New Mexico. The report of the committee contains a statement from the department upon the subject. The department suggested the amount, in order to make it conform to what the beneficiary would have received had he been in the employ of the United States. That is all in the report of the committee. At the end of the report of the committee the Senator will find the statement from an official of the department.

Mr. SPENCER. Mr. President, may I say to the Senator from Utah that the department stated that the maximum compensation provided for employees of the United States is $66.67 a month and suggested that the bill be changed so as to allow Mr. Hunter compensation in the sum of $66.67, which is the provision of the amended bill. There can be no doubt that if the man had been in the employ of the Government he would have been entitled to this amount under the compensation law of the United States.

Mr. SMOOT. There is no such suggestion here. Mrs. Axtell, of the United States Employees' Compensation Commission says:

> Senator HENDERSON's amendment appears to be in proper form to permit the commission to compensate Mr. Hunter in the manner outlined by the act of September 7, 1916. The maximum compensation provided for employees of the United States, however, is $66.67 a month, whereas it would seem that the amendment contemplates that Mr. Hunter shall receive $100 a month. I would suggest that the amended bill be changed to allow Mr. Hunter compensation in the sum of $66.67 a month, which is the maximum allowed under the provision of section 6 of the compensation act. I would also suggest that the provisions of the compensation act might be extended to Mr. Hunter to take effect from September 7, 1916, the date of the passage of the act.

Mr. JONES of New Mexico. The committee advised that compensation should be fixed at the rate of $100 a month. The department suggested that it ought to be reduced to the compensation allowed under the act.

Mr. FLETCHER. May I inquire of the Senator from New Mexico whether the injury occurred while the party was actually doing work for the Government?

Mr. JONES of New Mexico. That is quite true, I may say to the Senator. He, together with other parties in the vicinity where the forest fire was raging, volunteered their services and went into the forest reserve and engaged in putting out a very large forest fire. In doing that he suffered injury to his eyes which resulted in total blindness. He has no means of support,

UMI

and, of course, is dependent upon others, as anyone would be who is totally blind. He is a young man about 22 or 23 years of age and through his whole future must suffer in that condition.

The VICE PRESIDENT. Is there objection to the consideration of the bill?

Mr. SMOOT. I suppose since we are going to enter upon the policy of having individuals outside of the Government service pensioned by the Government, this is just as good a way as any. Perhaps I had better not object to it.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Claims with an amendment, to strike out all after the enacting clause and to insert:

That the United States Employees' Compensation Commission is hereby authorized and directed to award and pay to Reuben R. Hunter, of Deming, N. Mex., who suffered a total and permanent loss of sight in both eyes as a result of voluntarily fighting a forest fire on Government land in the vicinity of Cloudcroft, Otero County, N. Mex., in May, 1904, in an effort to protect valuable standing timber and other property of the United States, compensation at the rate of $66.67 per month, from September 7, 1916, for the period and in the manner provided by the act entitled "An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes," approved September 7, 1916, for the payment of compensation for permanent disability of a civil employee resulting from personal injury sustained while engaged in the performance of his duty.

The amendment was agreed to.

The bill was reported to the Senate as amended and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

AWARD OF DECORATIONS.

Mr. PHELAN. Mr. President, I ask unanimous consent to recur to Senate bill 4432, which came up on the calendar during my temporary absence and was objected to. The bill was introduced by me.

Mr. SMOOT. Mr. President, I think we had better proceed with the calendar in regular order and get through with it before returning to bills which have been objected to.

Mr. PHELAN. I submit that 2 o'clock may arrive before the regular call is completed.

Mr. SMOOT. Then the bill may be called up later.

Mr. KING. I join in the request of the Senator from California. The bill went over on my objection, but since talking with the Senator from California I think it is a measure which ought to be passed. It is a bill granting decorations and insignia to the next of kin of certain persons upon whom they were originally bestowed and who have since died.

Mr. PHELAN. It is Order of Business 592 on the calendar, and I trust the senior Senator from Utah will yield for its consideration.

Mr. SMOOT. I have no objection to the consideration of the bill referred to; but I am going to object to the consideration of any other bills out of order. I should like to go on with the calendar.

The VICE PRESIDENT. Is there objection to the consideration of the bill named by the Senator from California [Mr. PHELAN]? The bill has been read.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (S. 4432) to provide for awarding decorations, devices, or insignia to the next of kin of deceased persons who would have been entitled to receive the same, and making it unlawful for anyone other than the person authorized to do so to wear such decoration, device, or insignia, as follows:

Be it enacted, etc., That whenever under the laws of the United States or under any rules and regulations of the War or Navy Departments made in conformity therewith any decoration, cross, medal, clasp, button, badge, ribbon, star, or other emblem, device, or insignia has been, or shall hereafter be, awarded to any person by reason of any act, deed, conduct, or service in, or in connection with, any war, campaign, or expedition in which the United States has engaged or shall hereafter engage, and such person shall have died prior to receiving the same, said decoration, device, or insignia shall be delivered to such of the next of kin of the deceased person or to his widow, as the President may prescribe, and upon such terms and conditions as the President may prescribe, and if such person has died or shall hereafter die prior to the award to which he would otherwise have been entitled such award may be posthumously made, in the discretion of the President, and such decoration, device, or insignia delivered to such next of kin, or to his widow, upon such terms and conditions as the President may prescribe.

SEC. 2. That honorable separation from the service of the United States of persons who would otherwise be entitled to receive them shall not prohibit or preclude the issuance to such persons of such decorations, devices, emblems, or insignia as may have been or as may hereafter be authorized, allowed, or ordered to be awarded, issued, or bestowed upon persons in the service of the United States; and the Secretary of War and the Secretary of the Navy are authorized, after the proper award thereof is made, to issue such decoration, device, emblem, or insignia to the former personnel of their respective departments so entitled thereto, regardless of their previous separation from the service of the United States: *Provided*, That such decorations, emblems, devices, or insignia will hereafter be issued without charge to officers, warrant officers, and enlisted men entitled thereto.

SEC. 3. That it shall be unlawful for any person to wear or to display upon his or her person within the United States or any other place subject to its jurisdiction with intent to deceive or mislead, any decoration, cross, medal, bar, clasp, button, star, ribbon, badge, stripe, or other emblem, insignia, or device heretofore or hereafter authorized, conferred, issued, or authorized to be worn under the laws of the United States, or under any rules and regulations of the War or Navy Departments made in conformity with the laws of the United States, by reason of, or to indicate heroic, distinguished, or meritorious acts, deeds, or conduct in the service of the United States, or honorable participation in the service of the United States in any war, campaign, or expedition in which the United States has been, or is, or shall be, a party, except the person upon account of whose acts, deeds, conduct, participation in, or connection with, such war, such emblem, insignia, or device was awarded, bestowed, or issued, or such other person as may be authorized by law or the order pursuant to which the same was awarded, bestowed, or issued to wear the same. Any person violating the provisions of this section shall upon conviction be punished by a fine not exceeding $300 or imprisonment for not exceeding 90 days, or by both such fine and imprisonment.

SEC. 4. That no print, cut, or pictorial representation of any medal, cross, clasp, button, badge, ribbon, emblem, or other decoration or award to any person by reason of any act, deed, conduct, or service in or in connection with any war in which the United States has participated or may hereafter participate shall be used, published, printed, or exhibited on, or in connection with, an advertisement by any firm, company, or corporation for any purpose other than such as may be authorized by the Secretary of War or Secretary of the Navy. Any person violating the provisions of this section shall, upon conviction thereof, be punished by a fine not exceeding $1,000 or imprisonment not exceeding one year, or by both such fine and imprisonment.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BUSINESS PASSED OVER.

The bill (S. 4372) to encourage the establishment of farms and suburban homes by veterans of the World War was announced as next in order.

Mr. KING. Let that bill go over.

The VICE PRESIDENT. The bill will go over.

The next business on the calendar was the joint resolution (S. J. Res. 203) authorizing the Secretary of War, in his discretion, to turn over to the county commissioners of Dickinson County, Kans., suitable pontoon equipment for temporary use across the Smoky Hill River at Chapman, Kans.

Mr. CURTIS. I move that the joint resolution be indefinitely postponed.

The motion was agreed to.

NATIONAL BUDGET SYSTEM.

The bill (H. R. 14441) to provide a national budget system and an independent audit of Government accounts, and for other purposes, was announced as next in order.

Mr. SMOOT. Let that bill go over.

Mr. KING. Mr. President, I desire to ask my colleague whether this is the bill which finally came from conference and was passed by the other House?

Mr. SMOOT. The bill was passed by the other House, I will say to the Senator from Utah, in order to conform to the objection which was made to the original budget bill by the President. There are a number of Senators who desire when the bill comes up for consideration to be present. I know there are many Senators who feel that the bill as it was originally reported and passed the other House and first came to the Senate ought now to be insisted upon when the subject is considered by the Senate.

Mr. KING. I expressed the view some time ago that we ought to pass the bill over the President's veto, because I do not believe that the objection urged by the President was grounded upon a proper interpretation of the Constitution of the United States.

The VICE PRESIDENT. There being objection, the bill will be passed over.

WATER-POWER PROJECTS WITHIN NATIONAL PARKS.

The bill (S. 4554) to amend an act entitled "An act to create a Federal Power Commission; to provide for the improvement of navigation; the development of water power; the use of the public lands in relation thereto; and to repeal section 18 of the river and harbor appropriation act, approved August 8, 1917, and for other purposes," approved June 10, 1920, was announced as next in order.

Mr. KING. Let that bill go over.

Mr. WALSH of Montana. Mr. President, I wish to inquire if objection was made to the present consideration of Senate bill 4554?

Mr. KING. May I inquire of the Senator from Washington [Mr. JONES] if this is the measure to which he referred?

Mr. JONES of Washington. Yes.

Mr. KING. Then I have no objection to the consideration of the bill, Mr. President.

The VICE PRESIDENT. The Secretary will read the bill.

The Assistant Secretary read the bill, as follows:

Be it enacted, etc., That hereafter no permit, license, lease, or authorization for dams, conduits, reservoirs, power houses, transmission lines, or other works for storage or carriage of water, or for the development, transmission, or utilization of power, within the limits of any national park or national monument shall be granted or made without specific authority of Congress, and so much of the act of Congress approved June 10, 1920, entitled "An act to create a Federal Power Commission; to provide for the improvement of navigation; the development of water power; the use of the public lands in relation thereto; and to repeal section 18 of the river and harbor appropriation act, approved August 8, 1917, and for other purposes," approved June 10, 1920, as authorizes licensing such uses of national parks and national monuments by the Federal Power Commission is hereby repealed.

Mr. BORAH. That bill can not be disposed of this morning.

The VICE PRESIDENT. Then the Senator from Idaho may object to its consideration.

Mr. BORAH. I object to its consideration.

Mr. WALSH of Montana. Mr. President, I desire to say a few words in connection with the bill which has just been read. I was not able distinctly to hear the reading of the bill, but I understand that it was introduced by the Senator from Washington [Mr. JONES] for the purpose of eliminating national parks from the jurisdiction of the Water Power Commission.

Mr. JONES of Washington. That is correct.

Mr. WALSH of Montana. I think, perhaps, it would be appropriate to say in this connection that the Senator from Washington, as well as myself, is under obligation to bring this matter to the consideration of the Senate with all speed, and unless there is some special reason I hope the measure will have consideration.

When the water power bill was transmitted to the Senate for consideration an objection was made——

Mr. BORAH. Mr. President, I do not desire to object to the remarks of the Senator from Montana, but I understand the bill is not under consideration. There was objection to the bill.

Mr. WALSH of Montana. I so understand; but I will take occasion at this time to say what I desire to say, with the permission of the Senate.

An objection was made to the bill by the Secretary of the Interior, Mr. Payne, upon the ground that it granted the water-power commission created by that act the authority to authorize the construction of dams for power purposes within the national parks, and it seemed not unlikely that the bill would be vetoed by the President in consequence of the objection to it thus pointed out by the Secretary of the Interior. In that connection the Senator from Washington and myself, both being very deeply interested in the speedy enactment of the measure, called upon the Secretary of the Interior and stated to him that if he would withdraw his objection to the bill we would at the ensuing session of Congress charge ourselves with the duty of introducing a bill to relieve the water-power measure of the objection and urge its passage upon the Senate. Accordingly, I feel obligated to do what I can to remove any objection that might be made against the bill. I feel that both of us stand pledged to do everything we can to expedite the passage of the bill.

In this connection I also desire to say, Mr. President, that in all of the long discussion of and consideration given to the water-power bill I do not recall that anybody ever called attention to the feature of that bill to which reference is now made. It was embodied in the bill as it was originally prepared by the Secretary of War, the Secretary of the Interior, and the Secretary of Agriculture. It was not the subject of discussion upon the floor. Apparently it passed without any attention whatever being given to it. No one was particularly interested in it, so far as I can understand; yet, notwithstanding this condition of affairs, and the pledge given by the Senator from Washington as well as myself, a very active, energetic campaign is being waged, and the country is being deluged with appeals from civic associations of all kinds charging something in the nature of intrigue or indirection in getting this provision into the water-power bill and calling on all the friends of the national parks throughout the country to assist in sweeping away all possible objection to the legislation now proposed and speedily accomplishing its enactment, reminding one of some of the adventures of Don Quixote and his celebrated mount. I do not believe that there is any serious objection to the enactment of this measure. I hope that we shall have it speedily considered. I say this in explanation of my own attitude with respect to it.

Mr. BORAH. Mr. President, I am not going to stand in the way of the consideration of the bill if it comes up on a proper occasion when we can consider it for a reasonable length of time, but I do object to it at the present time. It is a matter of some importance, and we could not possibly dispose of it under the rules with the time which we have this morning.

Mr. FLETCHER. Mr. President, I will simply say that this is the first time I ever heard of any objection to the bill. It has been reported unanimously by the Committee on Commerce, I believe, and I never knew heretofore there were any objections to it.

Mr. BORAH. There are some objections to it, Mr. President, which have been presented to me. What my final attitude upon the bill will be I do not know, but it is a matter of a great deal of importance to some people. I therefore do not desire that the Senate shall undertake to dispose of it this morning.

Mr. JONES of Washington. Mr. President, I have been seeking to get this bill up for some time. I knew that the Senator from Idaho was interested in it, and possibly might have some objection to it. I have delayed asking for its consideration in order that the Senator from Idaho might procure some information concerning the bill which he desired to obtain. As I have said before, at the very first opportunity I expect to call the bill up. As the Senator from Montana [Mr. WALSH] has stated, I feel under obligation to do whatever may be possible to secure action upon the measure by the Senate, and I expect to secure such action.

The VICE PRESIDENT. The bill will be passed over.

COPPER RIVER & NORTHWESTERN RAILWAY CO.

The bill (S. 551) for the relief of the Copper River & Northwestern Railway Co. was considered as in Committee of the Whole. It directs the Secretary of the Treasury to pay to the Copper River & Northwestern Railway Co., a corporation organized and existing under the laws of the State of Nevada, $3,102.92, in refund of the gross income tax paid by that company to the collector of internal revenue at Tacoma, Wash., on May 21, 1915, pursuant to a tax levied under the act of Congress approved July 18, 1914 (38 Stat., p. 517), for the period beginning January 1 and ending June 30, 1914, for which period the company had previously paid the license fee or tax provided by the act approved March 3, 1899 (30 Stat., pp. 1336, 1337), as amended by the act approved June 6, 1900 (31 Stat., pp. 330, 331).

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CIVIL GOVERNMENT OF PORTO RICO.

The bill (H. R. 11769) to amend an act entitled "An act to provide a civil government for Porto Rico, and for other purposes," approved March 2, 1917, was considered as in Committee of the Whole.

The bill was read, as follows:

Be it enacted, etc., That paragraph 19 of section 2 of the act entitled "An act to provide a civil government for Porto Rico, and for other purposes," approved March 2, 1917, is hereby amended to read as follows:

"That no public money or property shall ever be appropriated, applied, donated, used, directly or indirectly, for the use, benefit, or support of any sect, church, denomination, sectarian institution, or association, or system of religion, or for the use, benefit, or support of any priest, preacher, minister, or other religious teacher or dignitary as such. Contracting of polygamous or plural marriages hereafter is prohibited."

SEC. 2. That section 3 of said act to provide a civil government for Porto Rico is hereby amended to read as follows:

"SEC. 3. That no export duties shall be levied or collected on exports from Porto Rico, but taxes and assessments on property, internal revenue, and license fees, and royalties for franchises, privileges, and concessions may be imposed for the purposes of the insular and municipal governments, respectively, as may be provided and defined by the Legislature of Porto Rico; and, when necessary to anticipate taxes and revenues, bonds and other obligations may be issued by Porto Rico or any municipal government therein as may be provided by law, and to protect the public credit: *Provided, however*, That no public indebtedness of Porto Rico or of any subdivision or municipality thereof shall be authorized or allowed in excess of 10 per cent of the aggregate tax valuation of its property, and all bonds issued by the government of Porto Rico, or by its authority, shall be exempt from taxation by the Government of the United States or by the government of Porto Rico or of any political or municipal subdivision thereof, or by any State, or by any county, municipality, or other municipal subdivision of any State or Territory of the United States, or by the District of Columbia. In computing the indebtedness of the people of Porto Rico, bonds issued by the people of Porto Rico secured by an equivalent amount of bonds of municipal corporations or school boards of Porto Rico shall not be counted."

Mr. KING. Mr. President, I should like to ask the Senator from Washington [Mr. POINDEXTER] the purpose of the bill and wherein it changes existing law?

Mr. POINDEXTER. Mr. President, it changes existing law in two particulars. The act "to provide a civil government for Porto Rico, and for other purposes," which was approved March 2, 1917, contained this provision:

That no public money or property shall ever be appropriated, applied, donated, used, directly or indirectly, for the use, benefit, or support of any sect, church, denomination, sectarian institution, or system of religion, or for the use, benefit, or support of any priest, preacher, minister, or other religious teacher or dignitary as such. Contracting of polygamous or plural marriages hereafter is prohibited.

UMI

Or for charitable, industrial, educational, or benevolent purposes, to any person, corporation, or community not under the absolute control of Porto Rico.

The first change that is made is to leave out of the section which I have just read the words "or for charitable, industrial, educational, or benevolent purposes, to any person, corporation, or community not under the absolute control of Porto Rico."

The preceding part of the section as to religious sects, priests, and so forth, is left as it was originally.

The circumstances which suggested this amendment of the law were quite numerous. One of them, for instance, was the desire of Porto Rico to send 12 young men each year to the United States to be educated in the United States at the expense of the island. It was held by the Attorney General that under the provision which I have just read the island was prohibited from doing that.

Another case arose in the effort to provide money, at public expense, to be used by certain charitable institutions to take care of earthquake sufferers. That was prohibited by the provision which I have just read. That is the first change the bill makes in the existing law. The next change is simply to increase the amount of public indebtedness which the island may incur from 7 per cent of the taxable value of the property to 10 per cent, it having been demonstrated that in the town of San Juan, for instance, on account of the small taxable value of the property and the comparatively slow increase in wealth, the city was unable to provide an adequate water system under the limitation of 7 per cent. It was deemed by the House of Representatives and by the Senate committee that it was reasonable to increase the limit to 10 per cent.

Mr. KING. Mr. President, may I inquire of the Senator whether that limitation extends to municipalities and applies to public purposes of the character to which the Senator has just referred? The Senator will recall that in Territorial days the limitation placed by Congress upon the right of municipalities in the Territories to create indebtedness was fixed at 4 per cent. To go beyond that and permit an indebtedness of 10 per cent seems to me very dangerous. The conditions justifying such action must be extraordinary.

Mr. POINDEXTER. They are quite extraordinary. I think the Senator is justified in asking for information in regard to the matter, and I will call attention briefly to the conditions. The provisions of the existing law relate to municipalities. The law provides:

No public indebtedness of Porto Rico, or of any subdivision or municipality thereof, shall be authorized or allowed in excess of 7 per cent of the aggregate tax valuation of its property.

This amendment proposes to strike out "seven" and insert "ten." The consideration is stated as follows:

Porto Rico is as yet poor as compared with any portion of the United States. Under Spanish rule the island was kept poor by the exactions of the Spanish Government. Most of the accumulation of property has been made within 20 years under the American occupancy. Progress has been made which on the whole has been remarkable. Still it is impossible to provide for schools and the necessary public buildings and other improvements demanded by the progress and development of the island. Especially is this true in the remote rural sections and municipalities. The current rates of interest paid range from 10 to 18 per cent. The amount of money in circulation is very small, amounting to about $4 per capita. Even the rapidly growing capital city, San Juan, finds it impossible to provide an adequate water system with the limitation of 7 per cent, as provided in the organic act. In many parts of the island schoolhouses can not be built to provide school facilities for the children because of this limitation. Only about 65 per cent of the school population have adequate school facilities.

It is a very bad condition, and it was considered that the circumstances justify this increase.

The VICE PRESIDENT. If there be no amendment to be proposed, the bill will be reported to the Senate.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

FORCIBLE ENTRY AND DETAINER.

The bill (S. 4746) to amend the act entitled "An act to establish a code of laws for the District of Columbia, approved March 3, 1901, and the acts amendatory thereof and supplementary thereto, in relation to forcible entry and detainer," was announced as next in order.

Mr. POINDEXTER. I object to the consideration of that bill, Mr. President.

Mr. BORAH. Mr. President, if I can, I desire to move to take up this bill.

The VICE PRESIDENT. The question is on the motion of the Senator from Idaho.

Mr. BRANDEGEE. Mr. President, I understand under the unanimous-consent agreement only uncontested matters can be considered.

The VICE PRESIDENT. The Chair does not so construe the rule. The Chair thinks that is what Senators tried to do, but he does not think they did it.

Mr. BRANDEGEE. I beg the Chair's pardon. I assumed that we were proceeding under a unanimous-consent agreement to consider uncontested matters.

The VICE PRESIDENT. No; this is taking the place of Calendar Monday, and that rule reads:

Provided, however, That on Mondays the calendar shall be called under Rule VIII, and during the morning hour no motion shall be entertained to proceed to the consideration of any bill, resolution, report of a committee, or other subject upon the calendar except the motion to continue the consideration of a bill, resolution, report of a committee, or other subject against objection as provided in Rule VIII.

It is provided in Rule VIII that when an objection is interposed a motion may be made to continue the consideration of the subject.

The Chair thinks that the Committee on Rules did not intend it that way, but the Chair is compelled to rule that on Calendar Monday no motion is in order to take up a bill until it is reached on the call of the calendar; and then, if there is an objection, that a motion may be made to continue the consideration of the bill notwithstanding the objection.

Mr. SMOOT. Mr. President, I simply want to say that that will do away with Calendar Monday in the future.

Mr. SMITH of Georgia. Mr. President, I think it takes care of it. As one member of the Committee on Rules, I understood that it meant that a motion to proceed to the consideration of a bill regularly reached on the calendar could be made, and the Senate could permit it.

Mr. FLETCHER. Mr. President, a parliamentary inquiry. If the bill is taken up on motion, then is debate limited to five minutes?

Mr. SMITH of Georgia. No.

Mr. SMOOT. Oh, no.

Mr. SMITH of Georgia. Rule VIII expressly provides that if the Senate determines to proceed with the measure, the operation of the 5-minute rule ceases, and the measure can be considered in the usual way.

The VICE PRESIDENT. That is correct. The question is on the motion of the Senator from Idaho [Mr. BORAH].

On a division, the motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 4746) to amend the act entitled "An act to establish a code of laws for the District of Columbia, approved March 3, 1901, and the acts amendatory thereof and supplementary thereto, in relation to forcible entry and detainer."

The bill was reported to the Senate as amended.

Mr. POINDEXTER. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ashurst	Harris	McNary	Smoot
Ball	Harrison	Moses	Spencer
Borah	Heflin	New	Stanley
Brandegee	Henderson	Owen	Sterling
Capper	Johnson, Calif.	Page	Sutherland
Curtis	Jones, N. Mex.	Phelan	Swanson
Dial	Jones, Wash.	Phipps	Thomas
Dillingham	Kellogg	Pittman	Trammell
Edge	Kenyon	Poindexter	Underwood
Elkins	Keyes	Pomerene	Wadsworth
Fernald	King	Ransdell	Walsh, Mont.
Fletcher	Kirby	Reed	Warren
France	Knox	Sheppard	Williams
Glass	La Follette	Smith, Ariz.	Willis
Gooding	McCumber	Smith, Ga.	
Gronna	McKellar	Smith, Md.	
Hale	McLean	Smith, S. C.	

Mr. McKELLAR. I desire to announce that the Senator from Delaware [Mr. WOLCOTT] is detained by reason of illness.

Mr. HARRISON. I desire to announce that the Senator from Oregon [Mr. CHAMBERLAIN] and the Senator from South Dakota [Mr. JOHNSON] are absent on account of illness.

The VICE PRESIDENT. Sixty-five Senators have answered to the roll call. There is a quorum present. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, and was read the third time.

The VICE PRESIDENT. The question is, Shall the bill pass?

Mr. POINDEXTER. Mr. President, there has been no statement from the advocates of this bill, so far as I have been able to ascertain, indicating any emergency existing justifying its enactment. This bill, if it should be enacted, would deprive the District of Columbia of the ordinary and familiar remedy of any owner of property which is common to practically every State in the Union. It would require the owner of property to

bring a suit, at great expense and with great delay, in a court of record for ejectment before he could enforce the terms of a lease.

In the case of property of any kind, whether it is great or whether it is small, that is held by a tenant in the District of Columbia at a certain rental agreed upon in the contract, for a certain term, when that term expires the owner of the property has a right, under the Code of the District of Columbia, to bring suit for forcible entry and detainer in the magistrate's court to recover his property for any purpose for which he may want to use it, or for the purpose of selling it.

If this bill becomes a law he will be deprived of that remedy, and the tenant could continue indefinitely to hold the property after the term of the lease has expired, pending the prosecution of a suit in the Supreme Court of the District for its recovery. In that way it would limit one of the fundamental rights of a citizen of the United States. It would fundamentally change the nature of property in the District of Columbia, in so far as remedies for enforcing property rights are concerned. It is true that an owner could go into the Supreme Court and prosecute a case for its recovery, and would be required to do that, however plain and undisputed the facts might be as to the expiration of the lease.

When the war was on, when it was charged that the owners of property in the District of Columbia were guilty of profiteering, of unconscionable impositions upon people who were compelled to have houses or apartments in which to live, as a war measure probably Congress would have been justified in enacting such a law as this. It is possible that there may be conditions in the District of Columbia now which justify it, but I have not heard any statement of them at all. It seems to me that before Congress passes this measure and deprives the people of the District of Columbia of a remedy for the recovery of property, which is an ancient one and almost a universal one throughout the United States, there ought to be some showing made to Congress as to the need for such unusual legislation, and the need ought to be a very pressing one.

One of the fundamental elements of individual liberty in the United States is the right to the ownership of property. As I recollect it, that is one of the first things enumerated in the great Virginia Bill of Rights as constituting one of the inherent rights of man; that is, the right to own property. While this would not destroy the principle of property, it would modify and limit it.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER (Mr. SUTHERLAND in the chair). Does the Senator from Washington yield to the Senator from Florida?

Mr. POINDEXTER. I yield.

Mr. FLETCHER. I understood the Senator to say that the bill would confer jurisdiction on the Supreme Court in such cases. I do not so read it. I understand that it refers to the municipal court, and that is not the court the Senator had in mind. I do not understand that the case must be brought in the Supreme Court. It is in the municipal court that the case is to be brought. Is not the Senator in error in regard to that?

Mr. POINDEXTER. I think not. I think I am not in error. I may not have made my statement clear, and the fact that there is a misunderstanding about that illustrates, I think, the inadvisability of enacting this legislation at this time, without an opportunity for very full discussion of it.

Mr. BORAH. I will say to the Senator that he is in error in regard to that. It does not deprive the municipal court of jurisdiction. It simply gives a little longer notice to the tenant; that is all.

Mr. POINDEXTER. My understanding is that it does deprive it of jurisdiction in the case I have mentioned. I am somewhat surprised to hear that there is any difference of opinion about that on the part of those who are familiar with the bill. As the law now stands, at the expiration of a lease, or for any forfeiture of a lease, the lessor can go into the municipal court and bring an action of forcible entry and detainer. The purpose of this bill is to amend the law of forcible entry and detainer and modify it, curtail it, so that only in certain particular cases can he go into the municipal court to recover, and in all cases except those which are enumerated in this amended law he will be compelled to go into the Supreme Court. Otherwise there is no purpose in passing the bill. If owners of property would have the same remedies after this bill was enacted, the action of forcible entry and detainer in the municipal court, that they have now under the Code of the District of Columbia, what is the purpose of enacting the bill? The purpose of the bill is to limit and to curtail the jurisdiction of the municipal court in those cases, to confine it to certain special conditions, and to leave the lessor to his remedy in the Supreme Court in all other cases. That is the purpose of the bill. Otherwise, it has no purpose at all.

I stated a case where the lease had expired by limit of time. As the Code of the District of Columbia is now an action of forcible entry and detainer could be brought for the recovery of the property without giving any particular reason at all why the owner wanted to recover his property. He could recover it for any lawful use; he could recover it if he wanted to sell or convey it to somebody else on the expiration of the tenant's lease. But, if this bill passes, he could not bring an action of forcible entry and detainer in the municipal court, I will say to the Senator from Florida [Mr. FLETCHER], because it is amended so as to limit it to certain specific cases, and the case of the expiration of the lease by time is not included within those specific cases.

There was an amendment agreed to on the floor of the Senate some time ago, as I recollect, while the bill was under consideration, somewhat enlarging the class of cases in which the lessor might bring an action of forcible entry and detainer, as compared with those which are mentioned in the original bill. But, notwithstanding the adoption of that amendment, he would be limited to a specified number of cases and conditions, and those do not include the expiration of the lease by time.

I do not think the Senator from Idaho [Mr. BORAH] will dispute that proposition. I think the Senator from Idaho will admit that if this bill passes, an action of forcible entry and detainer can not be brought in the municipal court, as it can be at the present time, under the code, in certain cases. It can only be brought in certain other cases which are specified in this bill. Among those cases is the one I have just mentioned, which is the most ordinary case, of expiration of a lease.

I assert that would be the effect of the passage of the bill, after considerable examination of it, and after hearing the debate and hearing the amendments which were offered by the Senator from South Dakota, and which were adopted on the floor of the Senate, which specified that if he desired to recover the property for the purpose of occupying it, the owner might recover it by the action of forcible entry and detainer, but did not specify a great number of cases which are included in the present code.

On the former discussion of the bill a case was called to the attention of the Senate in which the Court of Appeals of the District of Columbia, as I recollect it, had held that the general legislation relating to tenants and lessors which had been enacted by Congress during the war, providing for the creation of a rent commission, investing in that commission arbitrary power to fix rentals and to hold that certain rentals were unreasonable, was unconstitutional. They went into quite an extensive, and I think quite convincing, exposition of the law relative to property, and held that one of the essences of property was the right to sell it. If a man can not dispose of property which he owns, it is manifest that its value to him is lessened.

Notwithstanding the fact that that act was passed during the war, probably as a war measure, the court held that it was unconstitutional, a violation of the constitutional privileges of a citizen of the United States. I do not hold that this bill, if enacted, would be unconstitutional, and I only cite the case to which I have referred as bearing upon the general policy of this kind of legislation.

This bill, as it has been amended, would still vest in this rent commission power to fix the rates at which property shall be rented, and while it would not deprive the owner of all remedy in case he did not comply with the findings of the rent commission, it would deprive him of certain remedies. It would deprive him of a speedy remedy. It would deprive him of the privilege of going into the municipal court and filing an action of forcible entry and detainer, and recovering the property if the tenant of the property is willing to accept the rate that is fixed by this commission, which was established by Congress as one of the acts growing out of the emergencies of war, and compel the lessor to go into the Supreme Court of the District. Every lawyer in the Senate knows what that means. It means, in the first place, that he has to employ a lawyer and pay him a fee. He has to pay the costs of the proceeding in the supreme court, and he has to wait until the time of the summons has expired, he has to wait until the period for answer or demurrer has expired, and has to wait on the postponements of the case and continuation from week to week and month by month, which are familiar, and which obviously can be taken advantage of by any tenant occupying the property who desires to continue in its possession, when he really has no right to continue in it, because he is continuing in violation of the terms of his lease. That is the effect of this bill, and while probably it would not come within the ruling made by the Court of Appeals of the

District of Columbia, because it does leave him a remedy, such as it is, nevertheless it is a continuance of the same policy to the extent of depriving him of an adequate and speedy remedy, which was condemned by the court of appeals in the decision to which I have referred. I am not mistaken about that, I will say to the Senator from Idaho.

Mr. BORAH. We have only about a minute left. I wonder if the Senator would be willing to let the bill pass?

Mr. POINDEXTER. If it were a matter in which the Senator from Idaho had any personal interest, or if it affected his State, I would allow it to pass. But it is not a matter in which he is personally interested, and I believe it is a very important bill, and that the invasion of the rights of the individual citizen, in so far as remedies are concerned, which would result if this bill were passed, would be entirely unjustifiable in a time of profound peace, however the case might be in time of war.

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The READING CLERK. A bill (H. R. 15275) imposing temporary duties upon certain agricultural products, to meet present emergencies, to provide revenue, and for other purposes.

Mr. WALSH of Montana. Mr. President, I move that the Senate proceed to the consideration of the bill which has just been before the Senate.

Mr. UNDERWOOD. I understand that the unfinished business is the so-called emergency tariff bill, and that it is now the order of business before the Senate.

The PRESIDING OFFICER. That is now the business before the Senate, without a motion.

Mr. WALSH of Montana. A motion has been made to proceed to the consideration of the bill which has been before the Senate.

Mr. BRANDEGEE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Hale	McNary	Smith, Ga.
Ball	Harris	Moses	Smith, Md.
Borah	Harrison	Myers	Smith, S. C.
Brandegee	Heflin	Nelson	Smoot
Capper	Johnson, Calif.	New	Spencer
Colt	Jones, Wash.	Overman	Stanley
Curtis	Kellogg	Owen	Sutherland
Dial	Kendrick	Pittman	Thomas
Dillingham	Kenyon	Poindexter	Townsend
Edge	Keyes	Pomerene	Trammell
Elkins	King	Ransdell	Underwood
Fernald	La Follette	Reed	Wadsworth
Fletcher	Lenroot	Sheppard	Walsh, Mass.
Glass	Lodge	Sherman	Walsh, Mont.
Gooding	McCumber	Shields	Willis.
Gore	McKellar	Simmons	
Gronna	McLean	Smith, Ariz.	

The PRESIDING OFFICER. Sixty-six Senators have answered to their names. There is a quorum present.

EMERGENCY TARIFF.

Mr. McCUMBER. Mr. President——

Mr. HARRISON. Mr. President, a parliamentary inquiry. I understand that the motion which is now pending is the motion made by the Senator from Montana [Mr. WALSH] to proceed to the consideration of the bill that was before the Senate when the hour of 2 o'clock arrived. That is the motion which is pending?

Mr. McCUMBER. That is the motion pending.

The PRESIDING OFFICER. So the Chair understands.

Mr. McCUMBER. Mr. President, we have as the unfinished business the emergency tariff bill. A motion is made by the Senator from Montana [Mr. WALSH] to displace that as the unfinished business and to substitute therefor the bill pertaining to the matter of leases in the District of Columbia. The immediate question before the Senate is, therefore, the relative importance of the two bills and whether the emergency tariff bill reported by the Committee on Finance should give way to a bill the purpose of which is, as I understand, to enable tenants to hold over after the expiration of their lease.

While I can not speak at all for the landlords or for the tenants, as I am not acquainted with the particular wording of the bill, certainly the number affected by it are infinitesimal as compared with the vast number of people affected by this proposed emergency tariff legislation.

The emergency tariff bills covers generally agricultural products—the grain, stock-raising, meat, and wool industries. The population in the grain section of the Northwest affected directly and who are suffering most by reason of heavy importations—those in eastern Montana, all of North and South Dakota, and Minnesota—number about 4,500,000 people. The number of people in the United States who are dependent upon grain raising may be fairly estimated at nearly 30,000,000 of people. So the real question here is whether the 30,000,000 people desperately interested in the result of legislation before the Senate shall have their bill swept aside for the interests of a few people in the District of Columbia who can not agree with their landords as to whether they shall quit the premises.

I do not think that any Senator can fail to understand the desperate situation in certain agricultural sections of the United States. I will take the State of North Dakota alone, where, during the last two months, according to the last report that I have, 32 banks have failed. They include not only State banks, but also national banks. I have not seen any reports from that State for the last week, so it may be that three or four more banks have closed during that period. I find a somewhat similar situation affecting those who are interested in woolgrowing and in the banks that have been financing that industry.

The trouble in my State is due to two causes: First, a very light crop—and in some sections the crop has been light for several years—and, secondly, to the vast amount of importations absolutely duty free of the same kind of grain, which is ground at the same mills and produces the same grade of flour. So, Mr. President, I want to give somewhat in detail the situation in the northwestern section of this country where the farmers depend entirely upon their spring-wheat crop.

We may divide the United States, so far as wheat raising generally is concerned, into eight different sections, each one of those sections growing an entirely different kind and grade of wheat, each of which produces a different kind of flour. These different species of grain may be mixed to a slight extent, but only to a slight extent, without changing the grade of flour. Therefore, in considering the wheat question we must consider not only distinct species but those species as being produced in distinct sections of the country and in some instances far separated. You may raise a certain kind of melon in one section of the country and another kind of melon in another section of the country. While the price of one may affect the consumption of the other, they are not at all dependent upon each other for their particular value in the markets of the country.

We raise a wheat which produces what is called the "hard wheat flour," that has a reputation throughout the world. The millers of Minneapolis and the Northwest generally are engaged almost exclusively in the production of that kind of flour. They must depend upon the spring-wheat section of the United States to secure a sufficient number of bushels of wheat to meet their demands. If the production of wheat in that section is about equal to the consumption of the mills, we will generally secure a very fair price for our crop. If it is a little less than the consumption demand, our price very naturally advances. If we have proper protection the price may advance to the full extent of the protection. If there is a good crop in Canada—which raises exactly the same kind of grain that we do—even though our crop is below average, the moment that our price increases a few cents a bushel above the Canadian price the Canadian wheat, under absolutely free importation, naturally flows over the border and drives the price of the American product downward. Mr. President, that is the situation in our State.

Mr. POMERENE. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Ohio?

Mr. McCUMBER. I yield.

Mr. POMERENE. Does the Senator from North Dakota seriously contend that the mere difference of 1 or 2 or 3 cents a bushel in the price of wheat is going materially to change the market conditions along the border?

Mr. McCUMBER. Oh, yes; of course it makes a difference when wheat comes into this country absolutely free. The Senator must cast his eye over the great Red River Valley, which is nearly 200 miles wide at the north end of my State, taking in Minnesota and North Dakota and extending as far north as Winnipeg. It produces the same kind of grain; there is not a foot of waste land; one field merges into another; and the railways all cross the line. Therefore the Canadian wheat is taken over the border and immediately drives down our prices to the Canadian level.

Mr. POMERENE. Mr. President, I do not care to interrupt the Senator's argument, but I remember the same argument was made during the pendency of the Canadian reciprocity measure.

Mr. McCUMBER. Yes.

Mr. POMERENE. I remember that the Senator from North Dakota at that time made an argument along the same line that he is pursuing now. A few days after that he called attention to the fact that the wheat on the Canadian side was a

little lower than it was on this side, and about a week after that the senior Senator from Michigan [Mr. TOWNSEND] made a speech in support of the Canadian reciprocity measure and gave a list of, as I now recall, 20 or 25 different markets on both sides of the Canadian line in most of which the price of wheat on the Canadian side was higher than it was on this side.

I refer to these matters because I am not disturbed about the little differences in the market. I remember, for instance, in my own State, picking up the market reports as between Canton and Akron, 23 miles apart, both very substantial cities, and there may be a difference of 5 cents a bushel in the two markets. The same is true as between Akron and Dayton, or between Akron and Toledo. That condition may exist everywhere. A mere change of a few cents in one market or another means nothing as a general proposition.

Mr. McCUMBER. Oh, no; the mere fluctuation means nothing; but when the whole season's crop is held higher or lower, on a range of from 10 to 20 cents a bushel, it means a great deal. There may be a bullish market in Chicago; at the same time there may be a bearish market in Minneapolis; the one market price may go up and the other may go down, but the general trend of prices as between the two markets will bear about the same relation to each other, and the general trend between the Canadian and the American market will show exactly the same continued relation.

I know that it is often contended that our export market fixes the price of wheat. Mr. President, a great deal of wheat is raised in California, and a considerable portion of it used to go into the export trade. I do not know whether California now raises wheat for export; but suppose California should raise more wheat than could be consumed within the borders of the State or along the Pacific coast, what would she do with it? Would the price which she might receive affect the price of the wheat produced east of the Rocky Mountains? She could not ship her grain east of the Rocky Mountains; it would be impossible; the freight rates would eat it up before it got as far as Minneapolis. She could ship it to Shanghai or grind it into flour and export the flour to Shanghai, but her export price would have not the slightest effect upon the price of grain grown in Ohio or in Michigan or in the spring-wheat raising States. That is true to a certain extent of the grain raised in Texas and in Oklahoma and a portion of Kansas. That grain may find its market either in Kansas City or at the Gulf ports; they have their own market for that kind of wheat and their own market for the character of flour ground from that wheat. So of the grain raised in Ohio and West Virginia and Maryland. It is practically the same kind of grain, is sold in the same market, and makes the same kind of flour.

But what does fix the price of grain in the United States? Is there any general rule that can be applied? The general rule that can not be applied is what is called the Liverpool market. The general rule which can be applied is the rule of world production and consumption; that rule affects the market price of all grains throughout the world. But the most important thing that fixes the price of the American wheat is the price at the principal place of consumption.

The principal place of consumption for the wheat raised in the United States is the United States. It would be foolish to claim if we consume 650,000,000 bushels of wheat in the United States and 100,000,000 bushels of American wheat are consumed in England that the English price rather than the consumption price in America fixes the price of our product. Of course, there will be a relation between the two, because both are affected by the world's supply and demand.

As I remember, in 1909 or 1910 we had rather a short crop in the Northwestern States, and Liverpool and Minneapolis quoted practically the same price for the same kind of grain for several months during the time that the crop was being raised. Why? Because at that time we had a tariff barrier of from 25 to 30 cents a bushel. The American buying Canadian wheat would be compelled to pay the tariff. Our crop being light—and it is when the crop is light that the wheat farmer is entitled to the better price—the millers had to raise the price in order to continue the proper flow of grain. So our prices stayed up to about the Liverpool price, simply because the Canadian grain could not come in without paying a duty. Therefore, the theory that the price of American wheat is fixed by Liverpool is a fallacy of the worst character. The price is fixed by the world's supply and demand, and is affected more seriously by the supply and demand in the United States.

Now, I want to call the attention of the Senate, before I get down to the real crux of this situation, to certain facts that bear directly upon it. I want to take cognizance of the 1920 crop of the United States and Canada.

The estimated crop of the United States for 1920 is 789,878,000 bushels. We shall need for food, according to this estimate, 530,000,000 bushels, and for seed 82,000,000 bushels, leaving us a surplus of the 1920 crop for export of 177,878,000 bushels. Turning to Canada, we find that their estimated crop for 1920 is 293,361,000 bushels. They will need for food in Canada 45,000,000 bushels, and for seed 28,000,000 bushels, leaving a surplus of Canadian wheat to be exported of 220,361,000 bushels. So you will see that while we have for export of our 1920 crop only about 178,000,000 bushels, Canada has for export of her 1920 crop, of exactly the same kind of wheat, about 220,000,000 bushels. I have not included whatever surplus might have remained in the United States and in Canada from the 1919 crop, but I assume that the relative proportions after making allowance for this surplus will be about the same.

Canada, having 220,000,000 bushels of wheat to export, must necessarily look for the best market in which she can dispose of that grain. Of course, she will send it to the nearest market if she can secure as good a price as she can by sending it across the ocean to a foreign market; and here comes into play the difference in the exchange of the American dollar and the Canadian dollar.

Take a period of about the last three months, and I think the difference is about 15 per cent in favor of the American dollar. Therefore, Canada can not only put her wheat into the United States free, but, measured by the Canadian dollar and the American dollar, she can sell it in the United States at an advantage of 15 per cent over the Canadian price without paying any tariff whatever. That gives the importer a vast advantage. On every dollar's worth of imported wheat he can make 15 cents by reason of the difference in exchange.

Now, I want to show Senators just exactly how this will operate.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER (Mr. GOODING in the chair). Does the Senator from North Dakota yield to the Senator from North Carolina?

Mr. McCUMBER. I yield to the Senator.

Mr. SIMMONS. I simply want to ask the Senator if he has taken the trouble to ascertain, in case a certain quantity of wheat is exported to this country from Canada, and in case that wheat is here converted into flour, or is exported from the warehouses here directly to Great Britain or to any European port, whether——

Mr. McCUMBER. Some of it will be converted into flour for export, but only a small proportion. By far the greater proportion is converted into flour and sold in the United States.

Mr. SIMMONS. But that is not the question which I proposed to ask the Senator.

Mr. McCUMBER. I thought that was the question.

Mr. SIMMONS. I was simply prefacing my question by that statement. My question is this: In case wheat purchased in this country from Canada is exported from this country to Europe, either in the form of flour or in the form of wheat, what will be the advantage in the price that we will be able to get for that wheat in Europe by reason of the difference in exchange value as compared with the advantage which the Canadian would get on the same quantity of wheat if imported into this country for the same reason?

Mr. McCUMBER. The general advantage is this: You glut the market at any time with any wheat, you have more than the mills can take care of, and you destroy the immediate demand, and that necessarily sends prices downward. Some of this wheat, we will say, is converted into flour, and we will say that some of that flour is exported.

I do not know whether or not we can say that it would be the same flour, but we will say that an equal amount of flour will be exported. Of course, there is a profit on the flour, or it would not be exported at all; but remember, it is bought with depreciated Canadian money, it is sold when it gets to Europe on the basis of the appreciated American dollar, rather than upon the basis of the British currency.

Mr. SIMMONS. Mr. President, I am not sure that I have yet conveyed to the Senator from North Dakota the thought that I had in my mind. It is this: Of course the difference in exchange in our favor in all international transactions between this country and Canada would give the Canadian an advantage, because of that difference in exchange, in his sales in this market.

Mr. McCUMBER. It would give the person who buys it an advantage.

Mr. SIMMONS. It would give him an advantage in his sales on this market. On the other hand, in our sales of commodities of any character whatsoever—not only of wheat, but of any character whatsoever—to Great Britain, by reason of the same difference in exchange, the advantage is very much in our favor. Now, I ask the Senator if he has compared these advantages and disadvantages, and ascertained whether the advantage of the

Canadian in the sale of the wheat to this country was greater or less than the advantage of the American in the sale of that identical wheat, or some equal quantity of wheat, to Europe by reason of the difference in exchange?

Mr. McCUMBER. I am not considering so much the advantage of the Canadian as I am considering the advantage of the American buyer in buying Canadian wheat with a depreciated Canadian dollar, bringing it into the United States, and either selling it for the advanced value of the American dollar or exporting it upon the American-dollar basis with the advantage in our favor as against Great Britain, the country which takes most of our wheat and flour.

Mr. SIMMONS. I want to say to the Senator that I have not asked this question in any controversial spirit.

Mr. McCUMBER. I understand that.

Mr. SIMMONS. But it occurred to me, in listening to the Senator, that it would be exceedingly enlightening to us, in considering the effect of this difference in exchange in our favor, to know in a concrete case—that of wheat—whether that difference was greater in favor of Canada when we purchase from that country or in our favor when we sell that identical wheat to a European country.

Mr. McCUMBER. Mr. President, the Senator can very easily make that computation.

Mr. SIMMONS. I thought probably the Senator had made it.

Mr. McCUMBER. I have not compared it with the British pound. The Senator can easily make the computation by ascertaining the average difference between the American gold dollar and the English currency and find out in that way what advantage we would have over the English in selling to Great Britain.

Let me make this clear. Taking a simple case, suppose that wheat was worth $1 a bushel in Canada in Canadian money and the American bought it for a dollar. It was worth a dollar in the United States, but the Canadian dollar was worth only 85 cents. Therefore he really purchased it in Canada for 85 cents. The moment he gets it over here, based upon the American dollar, where the quotations are the same, he sells it for a dollar and makes 15 cents a bushel.

Now, holding his dollar-a-bushel wheat, we will suppose that he sells it to Great Britain. When he sells it to Great Britain he does not sell it upon the basis of the depreciated price of the British currency, but he sells it upon the American-dollar price; and if the British money is 15 per cent below the American dollar in value the British will have to pay 15 per cent higher when they purchase the American flour. Just what that difference may be I do not know, because I have made no computation.

Mr. SIMMONS. Mr. President, of course the Senator will understand that I do not mean to say that there is any difficulty in making this calculation, and I should not have interrupted the Senator with this inquiry if I had not supposed that probably he had already made it.

Mr. McCUMBER. No; I have not made the computation comparing the British pound and its present depreciated value, because I was more directly interested in the question of imports and their effect.

Now, I want to give practically the same concrete case that I gave in the committee, which will explain this matter more clearly.

In the month of October, 1913, we imported from Canada 231,464 bushels of wheat. You will see that that was a little over a quarter of a million bushels for the entire year. Now, compare that with the month of October, 1920, when we imported 9,784,307 bushels of which we have a record, or about forty times as many bushels. In fact, we imported very much more, as I can easily explain to the Senator. Along the entire northern line of North Dakota there are elevators on both sides of the boundary on each railway that crosses.

The Canadian during a tariff period can not bring his grain across, even though the elevator may be very much nearer than any elevator in his own country. But the moment you take off your tariff provision and remove your inspectors and agents millions of bushels will come over the border into American elevators of which there is no record whatever, because there is no occasion for making a record.

Mr. STANLEY. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Kentucky?

Mr. McCUMBER. I yield.

Mr. STANLEY. Between 1910 and 1920, taking the entire shipments of wheat from Canada into the United States, imports have exceeded the exports by about 8,000,000 bushels, I believe, for the whole 10 years.

Mr. McCUMBER. I do not know that I understand the Senator. Does he mean that imports of wheat from Canada exceed exports of wheat to Canada?

Mr. STANLEY. Yes.

Mr. McCUMBER. Very well.

Mr. STANLEY. I do not give the figures exactly, but in 10 years, according to the reports made by the Department of Commerce, the excess of imports, as I understand, was about 8,000,000 bushels.

Mr. McCUMBER. The exports to Canada were almost nothing, were they not?

Mr. STANLEY. No; the exports to Canada and the imports from Canada were in the aggregate over 100,000,000 bushels in all. Fifty-eight million bushels moved one way and a little over 50,000,000 the other.

Mr. McCUMBER. If the Senator will allow me to correct him, or at least place his statement so that it will be better understood, he includes both the wheat and flour. In other words, in the estimates as to the number of bushels which may be exported from Canada I think he will find that most of it is represented in the form of flour and figured upon the basis of 4½ bushels to the barrel.

Mr. STANLEY. No; they gave the flour separately. I was surprised to find that up until the last three years exports and imports of wheat had depended upon the nearness of elevators or the facilities for travel, and that there seemed to be no general movement of grain either one way or the other, no great excess either of export or import. But what I wished to ask the Senator was this, To what does he attribute the recent excess of imports of wheat?

Mr. McCUMBER. There are two reasons, Mr. President. The one is the better price. The second is that during 10 years we have had a tariff, and during those years much of the imports have been in bond, the goods simply being imported and shipped right through, by reason of our railways being better equipped, or something of that character. These imports could not be used in the United States, because after paying the tariff there would be no profits. That would account for those being imported in bond; and, of course, as a rule, we have railways along the border which are a little more convenient to all sections than even the Canadians have.

Mr. STANLEY. It has been some time since we have had any considerable duty on wheat to Canada. Does not the Senator believe that this present movement of wheat is due entirely to the difference in the rate of exchange between the two countries?

Mr. McCUMBER. No; not in the Northwest; not entirely; but to a great extent it is due to it. The other feature I mentioned was the rather short crop in the spring-wheat section.

Mr. STANLEY. If it is due to the rate of exchange, it is probable that that matter will adjust itself.

Mr. McCUMBER. Yes; undoubtedly it will, some time; but that may be years.

Mr. STANLEY. And if it does not adjust itself, the difference in the rate of exchange would in that case measure the amount of duty which would be necessary to prevent this excess of imports, would it not?

Mr. McCUMBER. Oh, yes; if we should make the rate of duty equal to the difference in the rate of exchange, they would be put upon a parity, of course. That would be equivalent then to free trade. At present it is a little better than free trade for the importer.

Mr. STANLEY. The proposed duty is more than double the difference in the rate?

Mr. McCUMBER. Oh, yes; the proposed duty is to give the American farmer a protection. The proposed duty is to raise the price of his product so that it will measure up somewhere near to what it costs to raise it in the United States. We are trying to give the farmers of the United States a special benefit by this proposed legislation, because of their deplorable condition, which has flowed from the heavy importations of wheat from Canada.

Mr. STANLEY. Mr. President, I beg the Senator's pardon, and with this question I conclude. Does the Senator believe that a duty sufficiently high upon all agricultural products to prevent any degree of importation from Canada would be a beneficial thing at this time?

Mr. McCUMBER. I certainly do, Mr. President. I would not be supporting this bill if I did not.

Mr. STANLEY. Would not such a duty exclude exports from the United States to Canada, as well as imports from Canada to the United States?

Mr. McCUMBER. No, Mr. President, it would not. Canada is going to buy the things she wants where she can get them the

cheapest. If she can get them cheaper in the United States, she will get them from the United States. If she can get them cheaper from Great Britain, she will get them from Great Britain. People sell where they can get the most for their products and they buy where they can buy cheapest; and we are not going to change that rule of human conduct.

Of course, Mr. President, you may say that if we will help enrich Canada, Canada may buy more from us. But that will depend on whether we can sell cheaper than some other country from which Canada can buy.

Mr. STANLEY. International trade is a matter of international barter. The Senator surely does not believe we can erect a wall which will impede the flow of traffic into the United States but will not impede the flow of traffic out of the United States?

Mr. McCUMBER. Mr. President, I can answer that in a nutshell. For more than 50 years Great Britain has taken practically half of all the exports of the United States. For more than 50 years our exports to Great Britain have been about double what our imports from Great Britain have been. Great Britain has lived during those years, and we have gotten a better price for our products because we held the tariff wall, and it has not destroyed either of the countries. Great Britain made up her differences somewhere else. She may have had a trade with other countries, and her monetary interests, her loans, her investments in other countries might have equaled the difference, so as to place her on more or less of an equality with the United States. But Great Britain bought her wheat and her meats during all of that time where she could buy cheapest. She bought from the United States because she had to. We sold there because we could get a better price there than possibly we could get anywhere else.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Colorado?

Mr. McCUMBER. I yield.

Mr. THOMAS. I suppose the Senator knows, of course, that the great bulk of the commodities which we sold to Great Britain, including cotton, were agricultural products——

Mr. McCUMBER. Yes.

Mr. THOMAS. Which had at the time practically no protection here.

Mr. McCUMBER. We did not need much protection here until the Great Canadian northwest was developed, and then we had protection most of the time.

Mr. THOMAS. I was going to ask a question in connection with that. I have always understood that the difference between our exports and British imports was made up by Great Britain through the investments which she had in the United States prior to the war.

Mr. McCUMBER. Which she had all over the world.

Mr. THOMAS. But the Senator, of course, knows that the importations of Canadian wheat into the United States are not paid for in money. They are paid for in articles of commerce and merchandise which are obtained in exchange, of course, Canada being able now to make these exchanges with profit to herself, because of the difference in the value of her money as compared with that of the United States.

Mr. McCUMBER. No, Mr. President; I do not understand that the exchange is not made in money. We do not trade so many yards of cloth for so much wheat. We pay money for the wheat, and Canada pays money for the cloth. Whatever we import is always converted into money first, and that money will always buy where it will buy cheapest.

Mr. THOMAS. The Senator knows the money to which he refers is in the form of acceptances, which represent exports and imports, the only money changing hands being the amount of the difference between the two?

Mr. McCUMBER. No, Mr. President; it is not always represented in that way. Of course, it is very convenient, so far as it can go, to exchange it that way; but if Great Britain sends us one billion and buys from us $4,000,000,000 worth of property, it can not all be settled for in acceptances between the two, because our credits are four times as much as that of Great Britain, and the difference must be represented in cash. Of course, the money is not transferred from one country to the other except to cover the balance due one country or the other.

Mr. STANLEY. Mr. President, assuming for the sake of the argument that the Senator is correct, that in our dealings with Great Britain will she continue on the former basis notwithstanding our tariff legislation, or the height of our tariff wall, and will permit us to exclude her commodities without a reciprocal exclusion on her part?

Mr. McCUMBER. She has done it for 50 years, and she will probably continue it just so long as it is to her advantage to do so.

Mr. STANLEY. Assuming that to be true, Canada's policy has been the other way, has it not?

Mr. McCUMBER. Canada has had some protection.

Mr. STANLEY. Canada has been in the habit of levying duties on her products, and of adopting retaliatory measures?

Mr. McCUMBER. Yes.

Mr. STANLEY. And she will in all human probability continue that policy?

Mr. McCUMBER. She is doing it now.

Mr. STANLEY. And whenever we put a duty on wheat she will put a duty on some other article?

Mr. McCUMBER. She is doing that this very moment. We are taking everything Canada exports without one penny of duty, while on practically everything we send over to Canada she collects a tariff, and she will continue to do that as long as it is to her advantage to do so, and she will continue to take advantage of our situation to allow her chief products to come in free, while she charges us from 10 to 30 per cent ad valorem duty on the things we send to Canada.

Mr. STANLEY. Has the Senator any statement of the excess of Canadian duties upon imports from this country over our duties on imports into the United States?

Mr. McCUMBER. Canada imports manufactured products. She exports agricultural products. She has a duty levied upon all manufactured products, so far as I know. We have no duty levied upon our importation of agricultural products from Canada.

Mr. STANLEY. I am sure the Senator is laboring under a misapprehension. Canada is to-day, and has been for the last 10 years, purchasing much more of our agricultural products than she has ever sold. In tobacco alone Canada purchases more than the entire excess of her wheat exportations in the last 10 years.

Mr. McCUMBER. Of course, Mr. President, Canada does not raise any tobacco, and she has to import it, and as Canadians are all good smokers, they buy the American product. They would buy it somewhere else if they could buy it cheaper.

Mr. STANLEY. She can buy her tobacco elsewhere. She imports enormous quantities of peanuts, but she can buy them elsewhere. She imports millions of dollars worth of flaxseed every years, but she can buy that elsewhere. She imports fruits of all kinds, millions of dollars worth, but she can buy them elsewhere. If the bill becomes a law and goes into effect and Canada reciprocates by raising her tariff duties over what they are now proportionately to what we raise ours, the naked loss in trade to the United States will be five times as great as the total of the wheat importation into the United States, and if Canada reciprocates by putting an export duty on pulp paper and we take $500,000,000 worth of it a year, the amount of wheat sold will be a mere bagatelle in comparison with that stupendous loss.

Mr. McCUMBER. Canada is not going to cut her own throat in any kind of a commercial war between herself and the United States. When we send our tobacco over to Canada she collects duty, and a good duty, too. When she sends her wheat into the United States we do not collect one penny of duty. If we are going to have reciprocity, let us have it. The advantage to-day is entirely with the Canadians. We can not send a thing over there on which we do not pay a duty. If she can get her peanuts any cheaper in China than she can get them from North or South Carolina, she is going to get them from China, tariff or no tariff. When the merchant buys his stock to sell he buys it where he can buy it the cheapest. In business he is not possessed of a single ounce of international altruism. He does not care anything for reciprocity. What he is looking for is the price at which he can buy a thing and the price at which he can sell it. The idea that we can not sell to any country unless we buy freely what that country produces has not the slightest application in this case.

But, Mr. President, I was diverted a little while. I was showing the difference between the Canadian exports to the United States for the years just prior to the war and for the year 1920. I showed that in October, 1920, the Canadian imports were forty times as much as they were in any month of a previous year. In November, 1913, we imported 104,000 bushels, while our importations in 1920 for the same month were about 10,000,000 bushels. In December, 1913, we imported 127,000 bushels, and that was all, while in December, 1920, we imported 12,000,000 bushels, or one hundred times as many bushels in November, 1920, as we imported in November, 1913.

The excessive importations of wheat began about the middle of September, 1920. I wish Senators who think these importations had no influence upon our prices to note the decline in the price of American wheat concurrent with the vast importations of Canadian wheat. The Modern Miller, in Russell's weekly wheat report, shows the importation from Canada for the whole year—and that has all come within a few months—of 58,000,000 bushels, while the imports of wheat converted into flour, or flour with its equivalent in wheat, were 3,390,475 bushels. This would give us a total importation of wheat from the 1920 crop of about 61,390,475 bushels, and this, added to our 178,000,000 bushels for export, would force us to provide for the export of 239,268,475 bushels of the 1920 crop.

If that were all we had to look out for, we might cease our concern, because Canada has already imported that, and any legislation that we can pass will not affect the amount of grain that is in the United States that is at present depressing our crop price. But when we stop to consider there are 150,000,000 bushels more in the same granary, that has ceased moving only because of the frozen lakes, then we can see what the result will be the moment the transportation is reopened.

I have already spoken of the exchange and the difference in exchange. I wish to present that so that Senators will not misunderstand the operation of the law of supply and demand as affected by the difference in exchange.

On December 14, 1920—and I take that because that is the date on which I looked up the situation—No. 1 hard wheat in Chicago was $1.84 per bushel. On the same day No. 1 hard Winnipeg Canadian wheat was $1.85 per bushel. It was really 1 cent a bushel higher than ours on that same day in Canadian currency. However, we must not be misled too much by that alone, because the Canadian No. 1 hard is a better wheat for flour than the American No. 1 hard, not because of the difference in the quality of the two wheats, but because the Canadian rules for grading require a greater proportion of actual hard wheat for No. 1 hard than is required in Minneapolis.

Under ordinary conditions, I presume that would make 5 cents difference in value of the Canadian wheat over our No. 1 hard. At present prices it might make even 8 cents a bushel difference.

Let us see how this exchange difference is taken advantage of by the importer to the detriment of the producer. The average rate of Canadian exchange in American money during several months past has been approximately 15 per cent. On wheat, at $1.84 per bushel, Chicago, the difference in rate of exchange would make a difference of 27 cents a bushel. The bill proposes a duty of 30 cents per bushel, which would be 3 cents above the exchange difference, and has been amended in the committee to 40 cents, which would give an actual protection of about 13 cents per bushel. The price of No. 1 hard wheat in Winnipeg, Canadian currency, was then $1.85, less 15 per cent exchange, which would be 27½ cents, making the price in Winnipeg, in United States currency, $1.85, less 27½ cents, or $1.57½. That is really what the American paid when he bought in Canada.

I think that I ought to explain again, because Senators do not seem to understand that Winnipeg quotations do not mean wheat delivered in Winnipeg. Winnipeg is not a wheat market at all. These quotations are for wheat delivered at some point on the Lakes, either at Fort William, Port Huron, or some other point of Lake export, and have nothing to do with the local price in Winnipeg.

The Chicago market of $1.84, less $1.57½, means 27½ cents per bushel that the American would make in buying Canadian grain quoted at the same price, or even 1 cent a bushel more than the American wheat. So that Senators can see why it is that we have been bringing in this vast quantity of wheat.

If we will look at the prices of grain during the months this enormous quantity was coming into the United States, we will find that the price of the American product went down just to the extent that Canadian grain was shipped into the United States. I will begin with September 13, 1920. I have only taken my figures from the weekly reports, and therefore this was the end of the week on September 13.

Wheat, No. 1 northern, which is our standard grade in Minneapolis, was $2.68½ cents per bushel on that date. Just at this time began the importation. Between that date, September 13, and October 1 there were imported about 1,750,000 bushels, far more than were exported on the average in any previous single year, and on October 4 the price had gone down to $2.07, a loss of 61½ cents per bushel. That was not because of just this one importation, but because there were 200,000,000 bushels more of the same wheat that was ready to come into the American market.

During the month of October the report shows that Canada exported into the United States 9,800,438 bushels. In November we imported wheat to the amount of 10,000,000 bushels, and on November 29 the same grade of wheat had dropped to $1.53 a bushel, making a total loss since September 13 of $1.15½ per bushel. I do not know whether this has reached the lowest possible level or not.

We hear considerable about the raising of the price to the ultimate consumer. I wish to heaven that some Senators could have gone out onto some of the farms in my State and western Minnesota last fall, when the grain crop was so poor and producing so little in the straw that it cost from 30 to 40 cents a bushel for thrashing alone, and have seen the farmers, some of whom rented their farms, attempting to struggle along, exchanging work with each other when they could, for they were unable to pay the enormous prices that were demanded for labor. Labor required to perform the work on the farm at that time commanded from $6 to $8 a day in the busy season of the year. There was not a farmer, of course, who could have paid it. He could not have paid it even in good times. A bill has been introduced and is being pressed by the Senator from California [Mr. JOHNSON] to pay as the lowest minimum wage $1,080 a year. What a heaven that would afford for five or six different families out there upon the prairies during the hard, cold winter!

I have occasion sometimes as I drive home in this city to see the young girls piling out of Government offices, and I can not help but note the fine furs that nearly all of them are wearing; they are queenly dressed as compared with the poor and rather shabby dresses and old shawls and old, threadbare coats that I see worn by the mothers and daughters who are struggling upon the farm; yet it is proposed to give $1,080 a year to every one of these finely clad girls as the very minimum, and from that up to $2,000 a year.

I wish to heaven that you could appreciate the real situation. I think the time is coming when we have got to recognize in this country that the man who raises wheat or raises cotton has as much right to live as has the laborer in the city or the Government; that he has a right—a God-given right—to receive a compensation that will measure up proportionately to the comparatively enormous wages that must be paid in every city in the United States to maintain the standard of high living in the cities.

A short time ago, while visiting in California and stopping at a certain place, I saw every day a beautiful limousine come up to a house on the opposite side of the street. I asked for what the limousine was used and whose it was. I was answered that it belonged to the colored cook, who every day made the journey to cook for the family living there, for which service she received a hundred dollars a month. It is desired to protect that class; it is proposed to pass a bill here to provide that no laborer working for the Government shall be paid less than $1,080 a year; but the moment the Congress is asked to do something for the struggling people upon the farms, who have not any money with which to go to the movies or to pay $4 for a theater seat, they are struck with horror because it will raise the price of bread to poor laboring people. I think that the farmer has as much right to clothe his wife and his daughters and his sons decently as the people in the cities have to spend hundreds of dollars for shows, and who keep every one of the amusement places packed from top to bottom during the entire year.

What awful offense is there in asking for legislation favorable to the farmers? The man who in the city gets $8 for a day and a quarter's work can with that amount buy a barrel of flour, which is all he uses for himself for the entire year; in other words, the wage of one and a quarter days' work of a carpenter in the city of Washington buys all the flour that carpenter uses during an entire year. If the price of flour should be doubled from what it is to-day, he would have to do two and a half days' work in order to enable him to secure flour to last him the whole year. What an awful imposition that would be!

Suppose that even 50 cents a bushel were added to the price of wheat—and the pending bill only proposes a duty of 40 cents, and would only give a real protection of 13 cents—and it were passed on to the ultimate consumer, that would add but $2.25, we will say, to a barrel of flour. It would make the carpenter work one-quarter of a day longer than he is now working in order to get the farmer's wheat for a year's supply. It would not mean anything to him, but it would mean an immense amount to the farmer who is to-day struggling, and to the banks that have been trying to supply him with funds in the falling market and have extended their credit until in some cases they have had to close their doors.

I am merely pleading for justice to the producers on the farm. Senators talk about enacting legislation which will tend

to send people out of the cities and back to the farm. If it is desired to make farming more attractive, there is but one thing, Mr. President, which attracts people in this world, and that is the luring glow of the gold, the glitter of the dollar. Whenever you make farming pay, whenever you so legislate as to give the American market to the American farmer—who, before Heaven, has earned it—you will do something to bring the people out of the cities onto the farms; but just so long as the laborer can get ten times as much in the city as he can on the farm, and so long as he can have the pleasures of city life, denied to the farmer, you are not going to induce him by any kind of suggestion to get out onto the farm.

The virtue I see in the bill of the Senator from California providing a minimum wage is that it raises the wages of the least-paid employees and brings them nearer to a righteous standard. Now, let us do the same for the farmer. Nothing on earth we can do for him will, within our lifetime, place him on a parity with those living in our cities, so far as the ease and pleasures of life are concerned; but we can help him. How? By giving him the American market, which belongs to him, by giving him that advantage over the foreign producers.

The price of land in Canada is not half what it is in my State; the farmer in America has got to pay a greater interest charge if he purchases land. Why, then, let the cheaper produced commodity of Canada, grown upon cheaper land, even though the cost of labor in the western portion of Canada may be nearly equal to that in northern United States, absorb our market to the detriment of our own people?

Mr. President, I am speaking only for the wheat section There are other Senators who can discuss this bill as it affects the wool producer much better than can I. I am merely asking for justice for a section of the country which is in sore need. I am appealing to Senators to lay aside their purpose to blockade a bill that is designed to aid a class of people who, God knows, need it to-day. Let those who desire present their arguments in opposition to the position which I am taking, but when they have stated their arguments and have explained their attitude let us come to a vote and determine whether or not a majority of the Senate desires to extend a helping hand.

Mr. POMERENE. Mr. President——

The PRESIDING OFFICER. Does the Senator yield to the Senator from Ohio?

Mr. McCUMBER. I yield to the Senator from Ohio.

Mr. POMERENE. I am always interested in what the Senator from North Dakota says, particularly when he speaks of the distress of the farmers of North Dakota. Some of them have been in distress; their crops have been blighted by inclement weather and by other causes; I realize that very fully; but I wish to put a question to the Senator. Last week I was in the city of Cincinnati. Upon inquiry I found that the shops there were only running about 40 per cent of their capacity. I am advised that in the great iron and steel centers of Ohio the mills are running about 50 per cent of their capacity. I have in mind at the present time a great manufacturing plant which ordinarily employs about 30,000 men, but which to-day is employing about 7,000. I have in mind another plant which employs, ordinarily, about 9,000 men; it is closed down now. I have in mind another plant that employs, ordinarily, about 4,800 men, whereas now it is employing about 700 men. There is not an industrial center in the State of Ohio or in western Pennsylvania or in New York or Illinois that is not more or less very seriously affected by nonemployment. The other day, adding to my distress of mind, when I picked up one of the Ohio newspapers I found that in the city of Toledo already there had been formed a bread line of 2,000 men; and a day later I found on reading another newspaper that that morning the authorities had to feed 1,200 men for breakfast and to give them baskets of food to take home to their families. Then, I turn to this bill, and I find a duty placed on wheat; I find 8 cents a pound duty added to butter, and as much added to cheese, and in the same relative proportion increased duty is proposed to be levied upon nearly all the substantial food products of the country. What are we to do for those who are now out of employment?

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Colorado?

Mr. McCUMBER. I yield.

Mr. THOMAS. Some days ago I offered an amendment to the pending bill and was accused by the newspapers of being facetious. The amendment provided that the revenues to be derived from the bill should be devoted to supporting those who are involuntarily out of employment. It occurred to me that if we were going to protect one suffering class of the community, the same motives and the same purposes sought to be subserved would apply equally to other needy members of society. To the extent to which that amendment may be effective it might afford some relief in the direction to which the Senator's remarks are leading.

Mr. POMERENE. Mr. President, that would have the merit at least of having some equity in it; but I can not understand the frame of mind of men who approach this subject when we know, if we believe one-half of what is in the public prints, that to-day there are at least three or four million men out of employment; and when they are out of employment, if they do not have credit at their little groceries, we know that they and their families are in distress. That is the situation with these men.

Mr. McCUMBER. Mr. President, does the Senator want me to answer him?

Mr. POMERENE. I intended to put that as a question.

Mr. McCUMBER. I am ready to answer it at any time.

Mr. POMERENE. Very well; I shall be very glad to have the Senator answer it.

Mr. McCUMBER. Mr. President, many of the mills have closed down. Why? I think the Senator from Ohio understands that matter about as well as I do. We put wages up—and when I say "we" I mean the Government—so enormously above what the American people could possibly stand that there must come a reaction. As the wages went up during our war, the Senator knows as well as I do that efficiency went down. Now, you can not get over that situation in a day.

Mr. POMERENE. And, Mr. President, that was true on the farm as well as in the factory.

Mr. McCUMBER. Certainly it was. The farmer suffered from that——

Mr. STANLEY. Mr. President——

Mr. McCUMBER. Just a moment; let me finish. The farmer suffered from that as well as anyone else. Now, I say, you can not mend that in a day. We went on immediately after the war demanding and receiving the same wage, and with little change in efficiency. Efficiency began to go up only to the extent that mills began to close, and people were fearful of losing their jobs. The result of it all was that you sent the price of every commodity up to such an extent that you depleted the public pocketbook. Never was there a time when the retailers made such enormous profits; never was there a time when the manufacturers themselves made such enormous profits; and as long as the high wages continued, and nearly everyone could get work at those high wages, you could continue the big prices. We were living on credit and a day of payment was inevitable. When the slump came it came all at once. We all had our pocketbooks emptied about the same time, and we all stopped buying.

Then the price of everything necessarily tumbled. People are not willing to go to work at the old price and with the old efficiency. They are not willing to labor for a price for which you can afford to hire them.

I want you to go and try to hire one of those men to-day whom you say you are feeding for a price that you can afford to pay him. What is his answer? "No." I want you to go to some of the women and girls in those families, and say that your family is sick, your wife can not do the work, and you want to get some one to help her. Will you get anyone? No. Why? Because the wage she will demand will be beyond your ability to pay. Only the rich can afford to have domestic help to-day. These people will not do that kind of work. You could not get that character of service if you were to pay $50 a month, and board amounting to another $50, making an equivalent of $100 a month. These people can get work, in my opinion, if they will consent to work for what the manufacturer can afford to pay and sell his goods for what the public can afford to pay for the goods.

We have all got to come down to bottom rock again. It does not make much difference which one comes down first. I think we had better all come down together, and go to work to produce goods for what the goods will sell for in the market, and that would start every wheel of industry to moving.

Mr. POMERENE. Mr. President, I agree with the last statement made by the Senator, to the effect that we should all come down together; but while we are coming down we ought not to make food products higher in price.

Mr. McCUMBER. If the food product—I am speaking now of bread—is the cheapest thing in the United States to-day, then it ought to be brought up to a price where the producer can live; and the Senator knows as well as I do that, measured by the amount of energy that produces a bushel of wheat or a barrel of flour, these two are the cheapest things in the United States to-day.

Mr. STANLEY. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Kentucky?

Mr. McCUMBER. I yield.

Mr. STANLEY. I understood the Senator from North Dakota to say that the Government had put up wages, and I understood the Senator from Ohio to concur. I was a little surprised——

Mr. POMERENE. Not in the statement that the Government put up the wages. I concurred in the statement that all should come down together.

Mr. STANLEY. I assumed as much.

Mr. POMERENE. Why, certainly.

Mr. STANLEY. I was a little surprised that my colleague from Ohio should get away from the proposition that supply and demand had something to do with the price of labor.

Mr. McCUMBER. Oh, Mr. President, we are not blind. All of us can remember when all of these buildings around the Capitol were going up during the war. The Senator knows the kind of labor that was performed there. The Senator can not be blind to the reports that have been made by the investigating committees in the case of all the war activities, showing the slacking everywhere; and every time a strike was threatened the Government surrendered. The administration surrendered. It was not necessary for it to surrender. It advised the surrender; it yielded to being held up by the profiteers—in the first instance by the manufacturing profiteers, and then it yielded to the profiteers from the labor basis, and between the two the poor old Government was ground.

Mr. STANLEY. Mr. President——

The PRESIDING OFFICER (Mr. CURTIS in the chair). Does the Senator from North Dakota further yield to the Senator from Kentucky?

Mr. McCUMBER. I do.

Mr. STANLEY. If the high wages paid recently were the result of the fiat of law, why not get away from all this trouble by simply passing another law and setting a high-wage scale? If we did it then we can do it now. If it was the result of law and not supply and demand, there is the same force behind the law now that there was then. If supply and demand have nothing to do with it, we can remedy the evil by an act of Congress.

Mr. McCUMBER. Mr. President, did supply and demand fix the price of wheat, or did the Government fix it? The Government was able to get around the law of supply and demand whenever it came to what the farmer produced. Wheat would have been at least $5 a bushel during the war, but the Government stepped in and said that it should not be above $2.21. It allowed everything that the farmer buys to increase from two to ten times, but it held the farmer down with the strong arm of Government and compelled him to produce, with labor that cost him from $6 to $10 a day, a bushel of wheat for $2.21 at the terminals, and very much less than that upon the farm.

Oh, Mr. President, the same Government that sent the boys into the trenches and into the fire of hell for $30 a month and compelled them to go there, the same Government that fixed the price of a barrel of flour and a bushel of wheat, had the power to fix the prices of commodities, and, above all, it had the power, when it was paying $6 and $8 and $10 a day, to say to every man, "Give the Government in this day of dire distress an honest day's work." It did not do it. It did not try to do it.

Mr. STANLEY. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota further yield to the Senator from Kentucky?

Mr. McCUMBER. I yield, Mr. President.

Mr. STANLEY. If the Government had not touched the price of wheat, I understand the Senator to say that it would have gone to $5 a bushel.

Mr. McCUMBER. Yes, sir.

Mr. STANLEY. What would have caused it to reach that dizzy height?

Mr. McCUMBER. The law of supply and demand. All the countries of the world were jumping over each other to get the grain. They needed it. Those foreign countries paid for munitions probably ten times what they cost. They had to have food for their soldiers, as well as munitions.

Mr. STANLEY. As I understand the Senator, then, the law of supply and demand during the war operated on wheat, or would have operated on it if it could——

Mr. McCUMBER. Just the same as on other things.

Mr. STANLEY. But it did not operate on wages. I thought the Senator said the Government raised the wages.

Mr. McCUMBER. I said the Government yielded to every strike where ships were being produced for the support of the Government and where munitions were being produced for the support of the Government.

The Government yielded to every demand, no matter whether there was justification or not. A strike would be inaugurated one day, and immediately after the administration granted the increase demanded the same people would strike the next day, and the price would be raised and raised and raised again; and, as I say, just as prices went up efficiency went down.

During the war, when we were needing ships and needing them badly, when the peril of the U-boat threatened to destroy our cause and the cause of our Allies, I brought to the attention of the Senate the case of a gang of riveters who had been paid by the piece before the war and had averaged 400 rivets a day. The piecework system was discontinued, and they were paid nearly $14 a day each, and immediately the production of each gang dropped to an average of 51 rivets a day, or only one-eighth of what had been previously accomplished, and the average in the United States was only forty-odd per cent of the prewar average. The Government did not have to submit to that situation, and it would not have submitted to it if the farmer had said, "I demand $5 a bushel for my wheat."

Mr. STANLEY. Mr. President, I heartily sympathize with the distress of the farmer and with all the Senator has so eloquently said concerning his necessities. But my sympathies are broader than that, and I do not believe the high cost of living or high wages are all due to extortion and disloyalty and unwarranted strikes by every man who was not working on a farm at the time of the country's greatest peril. I believe the man with the hoe and the man behind the hammer, the man behind the plow, and the man behind the plane, that labor everywhere, loyal and true, did magnificently during that war, and in its patience and its love of the flag rivaled the gallantry of the boys in the trenches.

Mr. McCUMBER. And the boys in the trenches are now demanding a bonus to equalize the enormous wages paid to the men who were working here. I say the amounts paid were entirely out of proportion to the services rendered. Heaven knows we want good prices for labor; then we want an honest day's work done. We did not get it, as a rule, during the war. There is no use of anyone saying we did, because you can not deny the overwhelming testimony found in the records of all of the investigations. Why was it? I am not blaming those employed in production and construction so much as I am blaming the Government for its abominable system of cost plus, under which it gave a premium to idleness and a premium for padding the rolls; and they were padded and a premium was paid contractors for idleness.

Go through the record of any of the projects for war purposes and you will find the same condition practically everywhere. Let us be honest with each other, both as to the laboring man and as to the capitalist. The administration said to the capitalist, "You pay for your material anything that is demanded; you pay for labor anything that is demanded, and then we will pay you a bonus of 10 per cent upon the cost of anything you turn over to the Government." In other words, "The more you make it cost the Government, the more you get out of it." And they made it cost the Government an enormous amount.

I charge it to the Government's inefficiency. You may place the blame where you will. The result is exactly the same; the poor old United States was bled white, and we will have to levy taxes to the very limit for the next 25 or 50 years to pay for the wrong.

The PRESIDING OFFICER (Mr. CURTIS in the chair). The question is on the motion of the Senator from Montana [Mr. WALSH] that the Senate proceed to the consideration of Senate bill 4746.

Mr. HARRISON. Mr. President, the Senator from Montana [Mr. WALSH], who made the pending motion, was forced to leave the Chamber to go to the Judiciary Committee. That motion was made at 2 o'clock, about two hours ago, and all of the intervening time, except about two or three minutes, has been occupied by the distinguished Senator from North Dakota [Mr. McCUMBER], one of the proponents of the so-called emergency tariff bill, who is now criticizing those who are opposed to this legislation.

I do not know why he should blame those who do not agree with him in the effort to increase the cost of living in this country for occupying some time in a discussion of this matter, and also in the discussion of other pieces of legislation which are called up in the Senate. If there could be statistics made of the time that has been consumed by those who are in favor of this so-called emergency tariff legislation and those who are opposed to it, since the bill was reported from the Finance Committee, I think they would show that the proponents of the emergency tariff legislation have consumed more time of the Senate than those who oppose it. They discussed fully those measures; and the so-called emergency tariff bill, which proposes to place additional burdens upon the consuming masses, has not been discussed by a single proponent of the legislation

until to-day, and that was in the two-hour speech of the distinguished Senator from North Dakota.

The packer bill, which was passed yesterday, was legitimately debated for some hours and some days, I might say. It was an important piece of legislation. Those who believed in it, who helped to frame it, who advocated it upon the floor of the Senate, believed, and justly so, that the five big packers had reached that stage in their life where they controlled such a large percentage of certain products in the live-stock business, and in other industries, that it had become such a giant in strength it should be restricted now before it should give a death blow in its further dealings.

I have no fault to find with those who voted against the packer legislation. If there ever was a piece of legislation which came upon the floor of the Senate about which there might be an honest difference of opinion, it was that legislation. I know how the sympathies and the views of men have been formed against commissions because of their regulatory requirements and the manner in which they have conducted various functions of the Government during the last few years. I am of the opinion that those Senators who saw fit in practically every instance to vote against the so-called packer legislation on yesterday did it not because they did not believe that the five big packers should be controlled and should be regulated and should be restricted further, but because of the provisions in the bill touching the commission. But those who believed in that legislation believed in it because they saw the dangers which lurked in the fact that five concerns controlled practically 60 per cent of the leather in the United States—and I may be wrong as to my figures, but they were quite large, as I recall; controlled between 60 and 70 per cent of all the live stock that is butchered which enters into interstate commerce in the United States; controlled a very large percentage of the eggs and poultry and cheese and mutton, those things which go upon the breakfast tables in this country. They thought the packers should be regulated, and that such regulation might in a way reduce the high cost of living, against which orators used their eloquence and inveighed during the last campaign.

After listening to the speech of the distinguished Senator from North Dakota a few moments ago, when he talked about the laboring man getting such high wages, and how he desired to see flour lifted a little bit in price, and wheat raised higher, and wages lowered, I was not surprised when I recalled that on yesterday a good part of the time of the debate was consumed by the distinguished Senator from North Dakota, who now finds fault with some of us opposing this bill and expressing our opposition for a few moments upon the floor of the Senate.

Mr. McCUMBER. Mr. President, we were under the five-minute rule when I spoke yesterday; consequently I could not speak over five minutes.

Mr. HARRISON. It seemed to me quite a long time.

Mr. McCUMBER. If that was a good deal of the time, I do not know how the Senator makes his computation.

Mr. HARRISON. I was just mistaken. It seemed to me quite a long time. Take the other piece of legislation which has been debated here for a week, the minimum wage bill, which is fathered by the distinguished Senator from California [Mr. JOHNSON], a most worthy measure, legitimately debated upon the floor of the Senate.

If the Government of the United States can not fix a minimum wage for its employees, how can we expect the gigantic corporations of the country, which employ men by the thousands and tens of thousands, to have a minimum wage fixed for them? Yet, because some of us think that that is an important piece of legislation, that it should be discussed fully upon the floor of the Senate, though much of the time spent in the debate be taken up by the proponents of this so-called emergency tariff legislation, the distinguished Senator from North Dakota finds fault.

So there are many pieces of legislation now upon the calendar of the Senate which should be taken up for consideration, which need to be debated. There is the measure which was pending during the morning hour, championed by the distinguished Senator from Idaho [Mr. BORAH]. I have such faith in his good judgment, I have such respect for his splendid patriotism, I like the man so much as a man, and am willing to follow him in so many things, especially when it comes down to dealing with the landlords and tenants of the District of Columbia, that I know it must be a good piece of legislation; and may I say to the Senate that a Senator here feels that he can take time away from the consideration of questions touching his own constituents and his own State and deal with questions of moment and of interest to the District of Columbia.

When I see the name of the distinguished Senator from Idaho attached to that piece of legislation and realize the many great complicated questions, in the study and solution of which his time is taken up, I know that the Senate should give some of its time to the consideration of that bill. I say that notwithstanding the fact that we recently gave so much attention to a bill proposing disarmament, that received the sanction of the Committee on Foreign Relations of the Senate, and when it was placed on the calendar I read in the papers that a distinguished ex-Secretary of State, a former United States Senator, asked that it be put off and not considered until the new President takes his seat and can confer with this great ex-Secretary of State upon the proposed legislation.

To the distinguished Senator from North Dakota with reference to this piece of legislation, of which he is such an advocate, and which he says is of so much interest to the wheat growers along the Canadian border, and which he does not say, but which I say, is of so much interest to the five great packers, and which he does not say, but which I say, is of so much interest to the consumers of the country, who have been burdened with the high cost of living for some time to such an extent that they can hardly make ends meet, I would suggest that it might be well, especially in view of the promise made by the Republican Party in the recent campaign touching the high cost of living, to postpone its consideration and give the new President an opportunity to confer with the ex-Secretary of State upon the future policy with reference to the subject matter of that bill.

I have read the Republican campaign textbook of 1910. Some Senators who have been here a long, long time were here then and will remember that that campaign was fought out upon the proposition of the high cost of living. The Democrats charged the Republican Party with the increased or high cost of living, and they defended it and said that the high protective tariff had nothing to do with it. On the floor of the Senate and from every stump in the country Republican spellbinders tried to free themselves of responsibility in connection with the high cost of living in 1910. In that campaign a textbook was issued, from which I might read paragraph after paragraph in which the Republican Party said that the increased price of foodstuffs could not be laid at the door of the protective tariff which they had placed upon the statute books. I shall read, before the debate is concluded, a report signed by certain Senators, members of a committee appointed by the then Vice President, upon a resolution which was presented by the Senator from Massachusetts [Mr. LODGE], I think, asking for an investigation into the high cost of living. On that committee the distinguished Senator from North Dakota [Mr. McCUMBER] sat, and he, with the Senator from Massachusetts and others, signed the report. I wish to read just one paragraph from the report. The Senator from North Dakota will remember it. Here is what the Senator and other Republican Senators said in that report to the Senate of the United States:

> The tariff seems to have been no material factor in causing the advance in prices during the past decade. The greatest advances have been made in commodities upon which the tariff has little or no effect, and the absolute removal of the tariff on many of these commodities could not have afforded relief at the present time, for the reason that the prices of these commodities, with a few exceptions, were as high or higher in other countries than in the United States.

So when it suits the Senator from North Dakota and suits his party in a campaign when they are charged with the responsibility for the high cost of living, and it is placed at their doors because of a high protective tariff, they say the tariff had nothing to do with it. In my humble opinion, the tariff of 40 cents a bushel on wheat, as provided in the pending bill, will have nothing to do with the price of wheat, for the very reason that was stated by the Senator from Kentucky [Mr. STANLEY] and by the Senator from North Carolina [Mr. SIMMONS].

It has been stated by Republican Senators in Congress and Republican leaders for generations that where there is produced in the country a surplus of exports over imports, as in this case, the tariff does not affect the price. It is a sham; it is a pretense. The price of wheat, in my humble opinion, is fixed in Liverpool, England.

Mr. STANLEY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Kentucky?

Mr. HARRISON. I yield.

Mr. STANLEY. The Senator from Mississippi fails to catch the double purpose of the Senator from North Dakota. He proposes, as I understand, first to raise the price of wheat 40 cents a bushel by the imposition of a tariff, and, secondly, to prevent the importation of Canadian wheat into this country, notwithstanding the fact that wheat here after the bill is passed will bring about 65 cents more per bushel than wheat does in Canada. It is a double purpose that the Senator is going to subserve.

Mr. HARRISON. Absolutely. Of course, it is a sham and a pretense. It is the most specious piece of political hypocrisy ever presented to the United States Senate. It is merely for the purpose of fooling some farmers out West into the belief that they will get more for their wheat in the event the proposition goes through. But if they could get more for their wheat we can not get away from the proposition that somebody pays the bill, and who is it that pays the bill if it is not the consumers of the country, the people who eat bread?

Mr. STANLEY. I understand the principal reason, or one of the reasons given, for the imposition of the tariff is to prevent the importation of Canadian wheat. If the imposition of the duty raises the price of American wheat, I wish to ask the Senator from Mississippi how that is going to stop the flow of Canadian importation?

Mr. HARRISON. It can not do it.

A man with whom I served in the House, a very distinguished Republican who lives not far from the Canadian border, made a speech April 18, 1911, touching the question of a tariff on farm products. I desire to read an extract from that speech:

> Again we find the inspired by cash and patriotism journals and oracles contending that we are discriminating against the American farmer because we cut the Payne tariff rate on wheat from 25 cents per bushel to 12 cents. My answer to this charge is that the 25-cent rate nor the 15-cent rate has not in the past and will not in the future have anything whatever to do with the price of wheat in this country or in Canada. There is not a country in this world that can compete with us in the raising of wheat anyway, and the tariff has been but an idle recital on the statute book, without affording the farmer one grain of protection in sheaf, at the granary, the elevator, or the mill. It is charged that wheat is 10 cents higher on our side than on the Canadian side. That is true partially. Both crops are controlled largely, if not absolutely, by the price at Liverpool, and in some cases from local conditions, usually transportation facilities, there are variances of 10 or more cents per bushel. It is, however, true that wheat in Winnipeg is higher than in the States for more than one-third of the year. I submit the prices of wheat often vary this much within a single State, and the figures do not prove that generally such is the case, and the safe prediction to make is that, the conditions being practically the same, the price of the land and labor being practically the same, both crops being controlled by the Liverpool market, the prices are not essentially different. This, of course, is not a universal rule, for local conditions vary the prices; also corners or hoarding oftentimes are causes for wheat going up or down suddenly.
>
> To the end that we may not be mistaken about the matter, let us consult the statistics to ascertain just how much wheat we sent to Canada last year. In 1910 we sent to Canada to get the benefit of the outrageously low price referred to by those opposing this pact 2,111,370 bushels of wheat; and how interesting it is to observe that only 135,441 bushels of wheat came from Canada to get the benefit of our high prices, asserted to be caused by our tariff on wheat of 25 cents per bushel. The charge of the high-protection advocate will answer itself when these figures are analyzed. How refreshing it must be to the American farmer to know that he is no longer to be the cat's-paw that is to shield the greedy manufacturer while he grows rich from legislation and pleads for the farmer to stand by him because there has appeared on the statute book an idle recital of 25 cents a bushel on wheat. Such a proceeding is merely the selling to the farmers razors that will not shave. It is merely deceiving to get the farmer's help to further deceive the poor consumer of this country, who has hunger gnawing at his very stomach and whose poor cupboard is bare.

Those were the utterances of the distinguished Republican Congressman who lives along the border. I could read from other distinguished Republicans whose remarks I have here, but I shall not take up the time of the Senate this afternoon. I might be charged with filibustering if I should do so, and yet I have occupied less time since the bill was introduced than perhaps any Senator on the floor. So I pass from that, believing that the farmers have been fooled too much and too long, that the bill will not help them a particle, and where if we should help one of them we would hurt 199 consumers in the country.

I do not mind Republican Senators fooling the farmers in their respective localities, but I do not very much relish their coming over into our precincts and trying to fool some of our farmers. The Republicans have gone down into my State and for the first time are trying to hoodwink the cotton farmer there. It is smart; it is an adroit piece of work; but I lift up my voice against it. I do not want the farmers in my section of the country—the cotton farmers or any other farmers—to ever get it into their heads that a tariff upon wheat or upon cotton or upon any other similar product will ever help them, for I know that it will not. If it should I am that much against the principle of levying tribute against many in order to help a few that I would still continue to oppose it.

The pending bill is either intended to place a greater burden upon the consumer or to levy tariff taxes in order to protect the farmer. If an extension of tariff taxes will help the farmers, just that much will it hurt those who must necessarily buy from the farmers.

Before I proceed to analyze the bill I desire to say that I hold in my hand the Republican campaign textbook for 1920, about half of which is taken up by a discussion of the high cost of living, criticizing the present administration for the high cost of living, and stating that the Republicans propose to remedy it when they get in. The other half of that textbook is composed of unwarranted, inexcusable, unjustifiable criticisms of the administration; but as the days pass by and the sunlight of truth shines forth the people will see the hypocrisy of the Republican pretensions. You promised them that you were going to reduce prices, and yet the bill now receiving the attention of the Senate and which Senators on the other side are clamoring to press down our throats and down the throats of the American people is one that is intended either to fool and deceive the farmers or to add to the high cost of living in this country.

Here [exhibiting] is a campaign document issued by the speakers' bureau of the Republican national committee during the campaign. It is labeled "Speakers' Series No. 1." It was put at the head of all the rest; it was made the most important document that should be issued in the form of a campaign pamphlet and it was headed "The High Cost of Living." It was not printed in small type, either; it was so printed as to be attractive, so that when as it was passed around by your campaign messengers people would ask, "What is it?" The reply would be, "It is a document on 'The High Cost of Living.' The Republican Party in that pamphlet states it is going to remove some of the burdens of taxation and prevent the extortion incident to the high cost of living which the Democratic Party is responsible for having perpetrated on the people. Read it; it will be interesting." Of course the little housewife and her husband are interested. They are living or trying to live on small wages and striving to make ends meet, taking the pay check and going down on Saturday night and seeing the proceeds eaten up before they have half of the commodities which they need for the coming week. So that pamphlet was attractive to them; they called for it. I have no doubt that the speakers' bureau of the Republican national committee had to have a reprint and yet another reprint of this pamphlet called "The High Cost of Living." I shall not read it; it may be necessary before the debate is over to do so; but for the present I shall merely call it to the attention of Senators. No doubt the Senator from North Dakota [Mr. McCUMBER] saw it, although it may be that out of courtesy to his constituents, who are clamoring for a higher tariff on foodstuffs, the campaign committee kept it out of his State; but it went from one end of the country to the other.

That was not the only pamphlet which Republicans issued touching the high cost of commodities. The speakers' bureau of the Republican national committee issued pamphlet No. 3 in most attractive form, with the title printed in larger letters than in the case of the "High Cost of Living" pamphlet and with a big question mark under the title. I have no doubt that the distinguished Senator from North Dakota saw the pamphlet. I have not the slightest doubt that the distinguished Senator from Utah [Mr. SMOOT], the economist of the Senate, he who sometimes exercises the power of his office to keep down the expenses of the Government by refusing Senators the privilege of placing speeches or pamphlets or documents into the RECORD—I doubt not that he gave no evidence of a desire of economy on the part of the Republican Party in making demand after demand in his recent campaign in Utah that he be sent thousands on thousands of copies of the pamphlet entitled, "Why 25 Cent Sugar?" It may be that because of the distribution in Utah and in other States of the Union of the pamphlet, "Why 25 Cent Sugar," and the pamphlet entitled, "The High Cost of Living," the Republican Party were enabled to get such large majorities in the recent election.

However, what I am contending is that the Republicans should not fool their constituents so soon after the election.

If you have led them to believe by speeches and pamphlets and propaganda that the Democratic Party had placed a heavy burden upon their backs and was responsible for the high cost of living, then you ought to meet your promises; you ought to redeem your pledges. If you are not going to do that, you should not begin at such an early day throwing those promises and pledges to the winds and disregarding them, as you are doing in the bill now pending before the Senate. You promised to reduce the cost of living, and yet in this bill here is the way you propose to do it: You start off with cherries; you do not want the people even to have cherries, although I know they do not now need cherries for some purposes for which they formerly used them. Apples! You do not want any apples imported into this country. Then we come down to the hides of cattle and find that you desire to prevent hides coming in. Why, Mr. President, Senators who are proposing this legislation evidently are not the fathers of families; evidently they

have not been obliged to visit the stores in the past two or three years and purchase numerous pairs of children's shoes, six or seven pairs a year for each child, costing $6, $7, $8, and sometimes as high as $12 a pair, for those Senators, who promised the people to reduce the cost of living, would impose a tariff, a tax, on every person in this country who has to buy a pair of shoes.

I asked a retailer some days ago what was the present price of shoes. I have here some of the prices which he quoted. They are the prices to-day, after the retailers have unloaded, after "sales" have been held, and when the stocks on hand are small. Men's shoes, $7, $10, $12, and $15 a pair. In October the prices were $10, $12, and $18. The October prices are those which the Republicans in the Senate at least, and evidently those in the House, wish to retain and compel all the people in this country to pay. I repeat, in October the prices were $10, $12, and $18, whereas now they have gone down to $8, $10, and $15. That reduction has taken place within a few months; but now it appears the Republicans want to lift the price back, and the best method they can think of to accomplish that result is to pass a piece of legislation which will put a 15 per cent ad valorem duty on the hides of cattle.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Will the Senator from Mississippi yield to the Senator from North Dakota?

Mr. HARRISON. I yield.

Mr. McCUMBER. When the Senator asked the retail merchant the price of shoes, did he also ask him how much an ad valorem duty of 15 per cent on leather would add to the price of shoes?

Mr. HARRISON. I did not ask him that.

Mr. McCUMBER. It will add between 4½ and 5 cents.

Mr. HARRISON. Between 4½ and 5 cents on a pair of shoes?

Mr. McCUMBER. Yes.

Mr. HARRISON. The distinguished Senator from North Dakota and the distinguished Senator from Utah are such experts that I will not take issue with them as to that, because I have not figured it out; I could not figure it out if I wanted to, and I doubt if they have figured it out correctly; but I know that what they now propose to do is to add a further burden on the people who have to buy shoes.

I am not surprised at that, especially when I heard the distinguished Senator from North Dakota a few moments ago, in referring to wheat, say that to place the proposed tariff on wheat would not make the laboring man now receiving a certain wage work over one-fourth of a day longer. That may be true, but a fourth of a day longer for every workingman in this country is a pretty hard burden, and I am not willing with my vote to say that every workingman in this country who eats biscuits and bread and needs flour will have to work a fourth of a day longer in order to pay tribute to a few farmers along the Canadian border.

Mr. McCUMBER. Mr. President, I know the Senator wants to be accurate. The Senator did not understand me to say a fourth of a day longer every day, but that it would be the equivalent of the earnings of a fourth of one day for one year, which is quite a difference.

Mr. HARRISON. Oh, for one year? Well, I am not willing to go even that far with the Senator. I am glad, though, that the Senator has got it down to one-fourth of a day a year now.

Mr. McCUMBER. The Senator must remember that I was speaking of a barrel of flour a year, which is the average consumption; and it would require, at the present wage of a carpenter, one-fourth of one day's work during a year, provided it was all tacked to the barrel of flour.

Mr. HARRISON. So we are agreed, by admission from the Senators from Utah and North Dakota, that on every pair of shoes it will increase the price 4½ or 5½ cents, and that it will make the wage earner work a fourth of a day a year longer.

Let us go down the line. You have tobacco here. You want to stop the poor old fellow from smoking and chewing. I knew there were some fanatics in the country who were trying to start that propaganda, but I did not know that the Senators from Utah and North Dakota were giving impetus to that movement.

I go down the list.

Mr. McCUMBER. Mr. President, if the Senator wants the genesis of any of these items in the bill on tobacco and hides, I think he will have to go to his own side of the Chamber.

Mr. HARRISON. I thought before this debate was over that the Senator from North Dakota and other Senators on that side would want to excuse themselves from the responsibility.

Mr. McCUMBER. No; I am not excusing myself. I think the Senator who wanted the addition made on hides was the Senator from New Mexico [Mr. JONES]. I think he offered that particular amendment.

Mr. HARRISON. But the Senator voted for it.

Mr. McCUMBER. And the increases on tobacco were made as the result of petitions from the localities where tobacco is raised, and it is raised both north and south of the line. We saw the good reasons for it, and therefore we adopted their rates.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER (Mr. GOODING in the chair). Does the Senator from Mississippi yield to the Senator from North Carolina?

Mr. HARRISON. I yield.

Mr. SIMMONS. I am not able to say, because I do not recollect, who proposed the provision in the bill relating to hides; but I do know, Mr. President, that so far as the action of the committee was concerned, the duty laid upon tobacco in this bill came as the result of a suggestion from the Senator from Connecticut. It applies only to the particular kind of tobacco which is raised in Connecticut. If there is any tobacco in this country that is covered by the provisions of the bill outside of that grown in Connecticut, I do not know of it. At least, so far as the Finance Committee's consideration of this matter is concerned, it was confined to a discussion of the requirements and demands of the tobacco growers in Connecticut, where they grow under cover a tobacco suited almost entirely and used almost entirely for wrappers. It was suggested that this tobacco needed an enormous increase in the tariff already upon it, the tariff on it already being about $2.85 a pound, as I recall, and it was suggested that that duty ought to be increased an additional dollar a pound. Nobody representing the great tobacco interests of this country, especially of the South, suggested that the tobacco grown in that section needed any protection, or that any amount of duty imposed upon tobacco of that character would in the slightest degree affect the domestic market price of that tobacco.

Tobacco is grown chiefly in the South. More than half of all the tobacco of this country is grown in the South, and I have never yet met a southern man who believed that a tariff upon tobacco would be worth one cent to him. I have never heard of their coming to Congress and asking for the imposition of any duty upon the character of tobacco which they grow. So the suggestion that the request for the duty imposed upon tobacco in this bill came from this side of the Chamber, so far as my knowledge goes, is without the slightest foundation whatever.

Mr. HARRISON. We have got it down now to a point where neither side wants to be responsible for certain items in this bill. I am glad this side is not responsible for them, and this side will not be responsible for the passage of the bill should it pass; but it is rather unfair to say that we are unnecessarily debating a piece of legislation of this importance, because during all the time it has been before the Senate there has not yet been four hours—there has not been two hours and a half—of discussion of it.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from North Dakota?

Mr. HARRISON. Yes.

Mr. McCUMBER. I think it perfectly fair to the Senator and to those on this side of the Chamber to say that we expect that all the time that is necessary for a proper discussion of this measure will be granted, and granted cheerfully, and will be taken in the same cheerful manner. I do not think I stated anything to-day about any filibuster. I did believe that Senators should try to dispose of the subject as soon as they had given it full and fair consideration. I have asked no more. But when the Senator from Mississippi some time ago introduced an amendment consisting of the Revised Statutes of the United States, which if we read from early morning until late at night during the entire session we would not have read halfway through, I know the Senator will excuse me if I thought there was in that amendment a mild suggestion of a proposed filibuster; and I gathered the idea, just a little, that possibly the Senator wanted to consume time. Otherwise, I could not see any use of introducing as an amendment to this bill the Revised Statutes of the United States, which would require about three months, I think, merely to read in the ordinary number of hours. I know now, however, that the Senator does not intend anything of that kind, and does not seriously propose to have read the Revised Statutes of the United States; so let us both forget any suggestion or intimation or suspicion that there is any filibuster, and let us try to get through with this bill as soon as we can.

Mr. HARRISON. Let us never hear the word "filibuster" again.

I am glad that the Senator has brought up some of the amendments I have offered to this bill. I think if there is an important matter that is pending before the Senate it is the codification of the laws of the United States. I recall, I think in the Sixty-third Congress, when after working for weeks and weeks and weeks in the House we finally brought out a bill there, and then it came to the Senate, and it died. That bill was brought out by a distinguished Republican Member of the House, Congressman LITTLE, of Kansas, who has given great and earnest and continued thought to the codification of the laws of the United States. It was passed in the House and is pending over here in the Senate, and if the Senate can get to it before the 4th of March, it is a piece of legislation that should be passed, and I thought this would be one of the best ways to pass that legislation.

The Senator forgets, too, that I offered two or three other amendments. I am sorry that the Finance Committee, which is controlled by the Senator's party, did not tack those amendments on to this bill. It is legislation that is worthy, it is just, it commends itself to very patriotic and wise Senator here.

No one could find fault with those amendments. In one of them I wanted really to do something that would be worth while for the farmers of the country, since the farm-loan bank system can not operate because of this case that is pending in the Supreme Court. I might say in passing that I hope, and sincerely hope, and I know I voice the wish of every Senator and every man who is interested in the farm-loan bank system, that a decision will be forthcoming very soon on that important piece of legislation, whether it is favorable to it or against it, so that we can do something toward it. I offered a very short amendment with the idea and in the hope that we might do something for the farmers who are caught in these abnormal times, in the stress of the present-day conditions, with prices declining in some instances; that we might create some medium whereby they might borrow money for short terms—six months—secured by agricultural products, wheat elevator receipts or cotton-warehouse receipts. It was in the hope that we could do something for these men who really need some money now that I offered that amendment; but I find that it received no sympathy upon the part of the Republican majority of the Senate. They turned me down in that effort really to do something for these farmers.

Another amendment that I proposed was to do something for the western people in the way of irrigation, and the other was to do something for the soldiers. There was passed through the House some eight months ago a soldiers' bonus bill. Since that time it has been before the Finance Committee of the Senate, controlled by the Senators with whom I have been debating this question. I wanted to get it out of that committee; but the Republican majority of the Finance Committee turned me down on that amendment. I proposed the bill which was passed by the House and sent to the Senate as an amendment to this legislation to do something for these soldiers, and yet I find myself criticized for doing that.

We are almost together. We both agree now that there is no filibustering about this proposition; that the bill is of such moment that it should be debated fully; and I hope it will be. I do not want to see the big appropriation bills killed. Nearly two months of this session have passed and only about 35 days remain before the session will close. So far we have passed only one of the great supply bills. The first thing we know the calendar will be clogged and we will not be able to give those bills the degree of consideration they warrant and deserve. So, while I am in hopes that we can fully discuss this bill, I fear very much, because of the state of the calendar and the importance of those bills, that we shall not get as much time to discuss this bill as it deserves.

But we will have to work together about it. We will have to cooperate with one another and do the very best we can under the circumstances.

Is the Senate to recess or adjourn this afternoon? The Senator from Montana, who made the motion now before the Senate, is not in the Chamber.

Mr. McCUMBER. The usual time for adjournment is about 5 o'clock, and I would like to have the Senate go on for another 15 minutes. But the Senator from Kansas [Mr. CURTIS], who wishes to be present during the debate, said he would like to have the Senate adjourn at 10 minutes before 5 to-day on account of work he has to do, and if the Senator from Mississippi does not wish to speak any longer now we might as well adjourn at this time. It would be a difference of only five minutes, anyway.

Mr. HARRISON. Very well.

SIZE OF MILITARY ESTABLISHMENTS.

Mr. McKELLAR. Mr. President, before we adjourn I desire to put in the RECORD the figures as to the present strength and expenditures on account of the armies of Great Britain, France, Italy, Japan, and Germany, as given me by the librarian.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

Table showing the relative size of the military establishments of Great Britain, France, Italy, Japan, and Germany, and the expenditures with regard to same.

[Data compiled from Statesman's Year Book, 1919, 1920; World Almanac, 1921; New York Herald, Oct. 3, 1920, p. 17; Current History, December, 1920, pp. 373–379; National Service, August, 1920, p. 124; London Economist, Mar. 20, 1920, p. 643.]

Country.	Present strength.	Expenditures, 1919–20.	Estimated expenditure, 1920–21.
Great Britain	348,000	$300,000,000	$125,000,000
France	378,000	[1] 2,735,000,000	[1] 7,000,000,000
Italy	250,000	[2] 394,503,923	
Japan	600,000	$205,000,000	$200,000,000
Germany	100,000		[3] 1,500,000,000

[1] Francs. [2] Lire. [3] Marks.

UNITED STATES FORCES IN GERMANY.

Mr. McKELLAR. Mr. President, I also desire to make a statement in reference to the testimony of the Secretary of War a few days ago before the Military Affairs Committee of the Senate as to the amount of the cost of our forces in Germany. The total cost of our forces in Germany up to date is the sum of $263,628,320. Up to September 30, 1920, Germany had paid $35,573,658, leaving a balance due the United States of $228,054.62. The average cost to Germany, when she pays it, will be $71,218 per day.

I put these figures in the RECORD for the purpose of calling attention to them, and especially to call attention to the very large amount which Germany apparently still owes us.

There was a good deal of doubt in the testimony which was adduced before our committee, and I have the figures up to September 30, 1920. Since that time an examination has been made, but up to date we have found no subsequent payments. If there have been any payments I will later give the amounts of such payments. At all events, the very stupendous sum of $228,000,000 is due us by Germany to-day, and, so far as I know, no efforts are being made to procure the payment. I ask unanimous consent to put these figures in the RECORD.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

Total cost of United States forces in Germany up to Sept. 30, 1920	$263,628,320
Amount paid United States by Germany up to Sept. 30, 1920	35,573,658
Leaving a balance due United States of	228,054,662
The average strength of the Army was—	
Officers	711
Enlisted men	14,547
Total	15,258

Average cost to Germany per day, $71,218.

Mr. McCUMBER. I move that the Senate adjourn.

The motion was agreed to; and (at 4 o'clock and 50 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, January 26, 1921, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

TUESDAY, *January 25, 1921.*

The House met at 12 o'clock noon.

The House was called to order by the Speaker pro tempore (Mr. TILSON).

Rev. James Shera Montgomery, pastor of Calvary Methodist Church, Washington, D. C., offered the following prayer:

Almighty God accept our gratitude for every expression of Divine care manifested toward our beloved country. May Thy truth flood all of our hearts and nourish therein the roots of every good thing, that our purposes may be high, our vows noble, and all of our desires reaching out toward Thee. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

AERONAUTICS (S. DOC. NO. 358).

The SPEAKER pro tempore laid before the House the following message from the President of the United States, which was read, ordered printed, and with the accompanying documents referred to the Committee on Appropriations.

To the Senate and House of Representatives:

I transmit herewith for the consideration of the Congress, a special report of the National Advisory Committee for Aeronautics, in which the committee sets forth its views as to the value to the Nation of the air mail service of the Post Office Department, based on broad, general considerations of national interest and policy.

I concur in the opinions expressed by the National Advisory Committee for Aeronautics, and indorse its recommendation for the continuance of the Air Mail Service.

WOODROW WILSON.

THE WHITE HOUSE,
24 January, 1921.

AGRICULTURAL APPROPRIATION BILL.

Mr. ANDERSON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15812, the Agricultural appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union, with Mr. HICKS in the chair.

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent to return to the item for general expenses, on page 7 of the bill, for the purpose of making a correction.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to return to page 7 of the bill. Is there objection?

Mr. GARRETT. Reserving the right to object, what is the gentleman's amendment?

Mr. ANDERSON. The item to which I refer makes general appropriation of $1,300,110 for salaries, special observations, telegraph and telephoning. I offered an amendment when that item was pending dividing the total amount into three items into which they had been previously divided for special observations, reports of telegraph and telephone and the amount was placed at $600,080 instead of $697,080. I desire to ask unanimous consent to return to correct the amount. It does not change the total.

Mr. GARD. It is intended to separate them into the different constituent elements?

Mr. ANDERSON. Yes.

The CHAIRMAN. Is there objection?

Mr. BLANTON. Reserving the right to object, will this increase the present number of employees in the office?

Mr. ANDERSON. No; it carries the same amount as last year less the employees that have been transferred out of the lump sum to the statutory roll.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent that the amendment I offered on January 22, which appears on page 1901 of the RECORD, applying to page 7, line 23, that the amount of $600,080, as stated in the amendment, may be changed to $697,080, and that this amendment may be agreed to.

The CHAIRMAN. The Clerk informs the Chair that in the official record it is correct. The Clerk reports that the amount is $697,080.

Mr. ANDERSON. I was under the impression that the amendment was offered in that way, but it appears in the record as $600,080. If the official record is correct, I withdraw the request.

The CHAIRMAN. The official record is evidently correct.

The Clerk read as follows:

BUREAU OF CHEMISTRY.

Salaries, Bureau of Chemistry: Chemist, who shall be chief of bureau, $5,000; chief clerk, $2,500; administrative assistant, $2,500; 4 executive clerks at $2,000 each; clerks—14 of class 4, 16 of class 3, 6 at $1,440 each, 30 of class 2, 6 at $1,300 each, 65 of class 1, 17 at $1,020 each; machine operators—1 $1,100, 2 at $1,000 each; laboratory helpers—8 at $1,200 each, 10 at $1,020 each, 4 at $960 each, 5 at $900 each, 8 at $840 each; laboratory helpers or laborers—6 at $780 each, 27 at $720 each, 15 at $600 each; mechanics—1 $2,280, 2 at $1,800 each, 1 $1,620, 2 at $1,400 each, 3 at $1,200 each, 1 $1,020, 1 $960; 2 student assistants at $300 each; skilled laborers—1 $1,050, 1 $1,020, 1 $900, 1 $840; 2 messengers at $840 each; messenger boys—1 $720, 8 at $600 each, 3 at $540 each, 6 at $480 each; 4 laborers at $480 each; 13 charwomen at $240 each; in all, $330,690.

Mr. BLANTON. Mr. Chairman, I move to strike out the last word. Mr. Chairman, in this paragraph for these services alone the Committee on Appropriations has provided for 20 messengers. Yesterday, when I was protesting at the number of messengers still provided by this bill, the chairman of the subcommittee having in charge the matter stated that he would much prefer that the messengers do errands for these $5,000 men in the employ of the various departments than to have those $5,000 men run their own errands. Of course, that would be a business proposition. I then called the attention of the chairman to the fact that very few of these high-priced heads of bureaus did anything, let alone run errands; that it was very hard to find them in their offices on any occasion. You go to look them up on a business matter and they would be reported at lunch. Go back two hours later and they are still at lunch and have not come back. Along that line the gentleman from Indiana [Mr. BLAND] stated yesterday that on one occasion he found six out of seven bureau chiefs absent from their offices.

Mr. MAGEE. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. MAGEE. I want to say that I have not had that experience.

Mr. BLANTON. I suppose the gentleman has not been at these offices as much as the gentleman from Indiana and myself. Perhaps the gentleman has had his clerks do the work at the departments. Much of that I do myself, and if the gentleman will go around the bureaus himself he will find many of them absent. I had a supervisor down there tell me that the reason they did not require the men and the women to pay much attention to the work was because the heads above them did not do anything. It interferes with the morale of the whole department. But, be that as it may, they do not need 574 messengers in this one department.

I call attention to this question because I want my colleagues to remember that if you want to get rid of the messenger service that is needless, unnecessary, a surplus, that is a waste purely of Government money, I am going to give you an opportunity to do it, because I am going to offer a motion to recommit that will propose to cut out 500 messengers from this service.

If you want to cut down the pay roll, if you want to save this money for the people, you are going to have an opportunity to vote for that motion to recommit; and I want to tell you right now that if you think it is a matter that the people of the country are not concerned about, you are mistaken. I wish you could see the number of letters that I have received, after making one such fight for retrenchment, from people all over the country who are reading the CONGRESSIONAL RECORD, who say, "BLANTON, they ought to be cut off, and I can not understand why your colleagues will not stay with you and vote with you on those matters." I wish you would come around to my office and see some of the letters from your own districts, and then you would be more concerned about it. It is a matter concerning which the people of the country are vitally interested, and I hope when I make the motion to recommit to cut 500 of these useless, idle, unnecessary messengers out of this one department some of you will stay with me and help me vote it out and save this money for the people.

The Clerk read as follows:

Salaries, Bureau of Soils: Soil physicist, who shall be chief of bureau, $4,000; chief clerk, $2,000; administrative assistant, $2,100; executive assistant, $2,000; clerks—4 of class 4, 3 of class 3, 6 of class 2, 1 $1,260, 13 of class 1, 1 $1,000; 2 soil cartographers at $1,800 each; draftsmen—1 $1,600, 8 at $1,200 each; soil bibliographer or draftsman, $1,400; photographer, $1,200; laboratory helpers—1 $1,000, 3 at $840 each; machinists—1 $1,440, 1 $1,380; machinist's helper, $900; instrument maker, $1,200; messenger, $840; 2 messenger boys at $480 each; messenger or laborer, $660; laborers—3 at $600 each, 1 $300; charwoman or laborer, $480; in all $79,240.

Mr. FESS. Mr. Chairman, I move to strike out the last word. I note that several of the bureau chiefs under the Agricultural Department receive a $5,000 salary, while the Chief of the Bureau of Soils and others enumerated, as I look through the bill, receive but $4,000. What is the idea of so classifying these salaries?

Mr. ANDERSON. Of course, some of the bureaus are larger than others, and these salaries are all fixed by law. While I think it would be desirable to have a reclassification of the salaries of the bureau chiefs, this committee has no authority to make such a reclassification.

Mr. FESS. I would take it that the work of the Chief of the Bureau of Soils must be of a very high grade, yet the salary is not so large as the salary of other chiefs. I am not complaining about the salary, but I am asking purely for information. The Bureau of Chemistry, of course, requires a very high-grade man, but I should think that the Bureau of Soils would also require a high-grade man.

Mr. ANDERSON. The salary is fixed by law, and, as I stated, the committee had no authority to change it.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

For exploration and investigation within the United States to determine possible sources of supply of potash, nitrates, and other natural fertilizers, $86,840.

Mr. FESS. Mr. Chairman, I move to strike out the last word, to make an inquiry as to the prospect under this item, so far as the evidence shows, of the development of potash, nitrates, and so on. Have we evidence that there is a supply of these elements within reach under proper development?

Mr. ANDERSON. There are several sources of possible supply of potash, some of which are being developed and some of which are not. There are various deposits of phosphate rock. One of the difficulties connected with that has been the presence of borax. During the war when we had very great need of potash much of this potash was sold with the borax in it, with very disastrous results. Since that time methods have been developed for eliminating the borax down to a point of safety, but something is still necessary to be done in that direction.

Then there are possibilities of securing potash from the by-products of the cement and blast furnaces, which are being developed, and part of the increase carried in this bill is for the purpose of developing potash from those sources.

Mr. FESS. Is that by-product promising in quantity?

Mr. ANDERSON. Oh, yes. Under normal conditions I think it would be clearly desirable and commercially possible to produce a very large quantity of potash from the cement furnaces, but of course the price of cement has been so high that there has been very little inducement to install the apparatus which is necessary to produce this potash from the furnaces.

Mr. FESS. Is there a source of supply of potash in the alkali fields of the West?

Mr. ANDERSON. Oh, yes; and that is the supply that I referred to with the borax in it.

Mr. KINKAID. Mr. Chairman, will the two gentlemen yield?

Mr. ANDERSON. Yes.

Mr. KINKAID. I ask the pardon of the chairman of the committee for the suggestion that I shall make relative to the Nebraska potash, but it is my understanding that the borax which has been complained of was not found in potash produced in Nebraska, but in what came from a certain lake in California.

Mr. ANDERSON. The gentleman is correct about that. It is the California.

Mr. KINKAID. It is due to the California product to say that a means has been found whereby the borax is eliminated and that product now gives good satisfaction.

I desire to say that thousands and thousands of tons have been produced in Nebraska from lakes, and thousands, even millions, of tons remain there now for production. It is potash of a very fine quality, too. The producers in Nebraska are now trying to solve the problem of freight rates by eliminating the raw material which has no value. In this way, if the process proves successful, the weight can be reduced 75 per cent below what it now is, and thus rail rates for the Nebraska product could successfully compete with ocean rates from Germany.

Mr. FESS. Then, in the judgment of the gentleman, it is commercially possible?

Mr. KINKAID. Certainly, when enabled to compete with the foreign potash. We have a good quality in the United States which can be produced abundantly, and if we can reduce the weight three-fourths and be accorded protection in proportion to the difference in labor cost a large industry can soon be developed which can successfully compete with importations from foreign countries.

Mr. ANDERSON. It is just the question of concentrating the fertilizer element so as to eliminate the part of the raw product which is not potash, thus reducing the weight on which they have to pay freight.

Mr. FESS. The expenditure here, then, is not purely experimental?

Mr. ANDERSON. No; it is for demonstrations and for experiments, for the development of better machinery and better methods.

Mr. FESS. Is it under this authority that they have been experimenting out in the kelp fields?

Mr. ANDERSON. No; that is in the item at the bottom of page 47.

Mr. LANHAM. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. LANHAM. Is this sum deemed adequate by the department for the investigation and demonstration contemplated by this provision?

Mr. ANDERSON. The department asked for a total of $25,000 for recovering potash from cement plants and glass furnaces and an additional sum of $35,000 for the development of processes of fixing the nitrates.

Mr. LANHAM. Their work will not be hampered or retarded by the amount that is granted?

Mr. ANDERSON. The committee did not allow the full amount, but I think the desirable portion of the work can be done under the amount which we allow.

Mr. LANHAM. I have been advised that in my State, for instance, there are some possible sources of potash that may be very valuable, and I wanted to be assured that the work would not be hampered.

Mr. ANDERSON. Yes; those deposits are known to the department and were under consideration in connection with the item.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

For the investigation of soils, in cooperation with other branches of the Department of Agriculture, other departments of the Government, State agricultmal experiment stations, and other State institutions, and for indicating upon maps and plats, by coloring or otherwise, the results of such investigations, $168,200.

Mr. HAYDEN. Mr. Chairman, I move to strike out the last word.

I would like to inquire of the gentleman in charge of the bill why this appropriation is reduced by $10,000. When I first came here in 1912, $166,000 was appropriated for soil surveys, and the amount was gradually increased to $216,000 in 1918. But the appropriation has been reduced during the last two years and the committee now proposes a further reduction of $10,000. I am not aware what the situation may be in the rest of the United States, but I know in the West further soil surveys are greatly needed. I presume that in other parts of the United States this work is not completed by any means. What is the idea of reducing this appropriation when so much work remains to be done?

Mr. ANDERSON. This is a character of work of which it is possible to do either a good deal or very little. It can be done at a fast rate or it can be done at a slow rate. It is just a question of the amount of money you want to spend on it at the time. There is no imperative need for it, and in view of the increases which we made in some of the other items in the bill, and in pursuance of the general policy which the committee adopted of finding money for the increases in the bill itself, and in view of the fact that the work could be slowed up without doing anybody any harm, because it is not necessary that this work should be done immediately, we thought the item could be cut $10,000.

Mr. HAYDEN. If such surveys are not worth while, this appropriation should be discontinued entirely. I do not think anyone will dispute that an accurate and scientific soil survey is extremely valuable. Congress having adopted a policy of appropriating about $200,000 a year, a small cut of $10,000 will not make any difference to anybody except the bureau which is actually conducting the work.

I know that in my State there are several areas of agricultural land which should be surveyed, and I do not want to be told that the amount appropriated by Congress will not permit the bureau to do the work. All such surveys are cooperative in character, and I am sure this small reduction, which amounts to so little to the taxpayer, for a service which is important to the country, should not be made without at least a protest.

Mr. ANDERSON. The total amounts expended in the Government service are made up of small sums, and you can not practice any economy if you are going to pay no attention to either small increases or small decreases. And, as I said before, this is a work which is not imperative. It can be very readily slowed up at this time without affecting adversely either the organization or the country. Personally I felt it could be very much further reduced than it was, but the judgment of the committee, in the compromises that are normally effected, resulted in a cut of $10,000, which I think is very reasonable under the circumstances.

The CHAIRMAN. Without objection the pro forma amendment is withdrawn, and the Clerk will read.

The Clerk read as follows:

For examination of soils to aid in the classification of agricultural lands, in cooperation with other bureaus of the department and other departments of the Government, $15,000.

Mr. BANKHEAD. Mr. Chairman, I move to strike out the last word. The question of the wages paid to farm labor, of course, is now, and always has been, probably the most important item in agricultural production. I have some statistics that I found this morning in the Washington Herald, giving a very

comprehensive and rather brief result of the investigation of the Department of Agriculture on this question of wages paid to farm labor in the prewar and postwar periods, from 1913 to 1920. It contains a synopsis of the average wage scale, with board and without board, in the different geographical sections of the country, and I think it contains information that will be of value to the Members of the House. Therefore I ask unanimous consent that it may be incorporated in the RECORD.

The CHAIRMAN. The gentleman from Alabama asks unanimous consent to incorporate certain matter in the RECORD. Is there objection? [After a pause.] The Chair hears none.

The following is the synopsis referred to:

POSTWAR WAGES FOR FARM LABOR EXCEED OLD SCALE—AGRICULTURAL DEPARTMENT FIGURES SHOW INCREASES RANGE TO 150 PER CENT.

[By the Washington Herald's economic expert.]

Everyone will agree that the farmers have suffered severely this year because of the high prices they had to pay during the growing season and finally through the big drop in the price of farm products in recent months. One of the causes for complaint from the agricultural States this summer was the excessive price for farm labor. The Department of Agriculture has published some figures on the wages of farm labor for a series of years. A portion of these figures, together with a percentage comparison with prewar years, is given in the following table:

Wages of male farm labor.

	Per month.			
	With board.		Without board.	
	Actual.	Relative to prewar.	Actual.	Relative to prewar.
		Per cent.		*Per cent.*
1911-1913 (prewar average)	$20.79	100	$29.55	100
1914	21.05	101	29.88	101
1915	21.26	102	30.15	102
1916	23.25	112	32.83	111
1917	28.87	139	40.43	137
1918	34.92	168	47.07	159
1919	39.82	192	56.29	191
1920	46.89	226	64.95	220

	Day labor with board.			
	At harvest.		Not at harvest.	
	Actual.	Relative to prewar.	Actual.	Relative to prewar.
		Per cent.		*Per cent.*
1911-1913 (prewar average)	$1.53	100	$1.13	100
1914	1.55	101	1.13	100
1915	1.56	102	1.13	100
1916	1.69	111	1.26	112
1917	2.08	136	1.56	138
1918	2.65	173	2.07	183
1919	3.15	206	2.45	217
1920	3.60	235	2.86	253

Before the war the average farm hand employed by the month cost $20.79 and his board. In 1920 the farm hand employed under the same conditions received on the average $46.89, or an increase of 126 per cent over the prewar price. Whether employed without board or by the day, the percentage increase has been nearly the same, ranging from 120 to 150 per cent above the prewar average.

Based on the prevailing prices for farm products during the first six months of this year, the farmers were fully justified in paying these wages. This is shown by the following figures on the price index of farm crops calculated from Department of Agriculture data:

Index of farm-crop prices.

AVERAGE 1911–1913, 100.

	Index.
Prewar average	100.0
1914	100.9
1915	100.7
1916	123.5
1917	197.8
1918	211.7
1919	221.0
January, 1920	226.1
April, 1920	254.6
July, 1920	285.1
October, 1920	189.5
December, 1920 (approximate)	126.9

In April of this year crop prices showed an advance of 154 per cent over the average for the prewar years. This was a considerably greater increase than the 125 or 130 per cent increase in labor cost. By July farm prices had advanced still further and reached a point 185 per cent above prewar. But since that time there has been an enormous drop. In October farm prices were less than 90 per cent above prewar, and in December they were only 27 per cent above that base.

Those farmers who could and did dispose of their crops immediately after harvest fared fairly well, but those who still have their crops on hand face a deficit in the year's operations.

Farm wages in different parts of the country are by no means equal. The following table shows the average wages in the principal geographical sections of the country:

Wages of male farm labor by geographical divisions.

Geographical division.	Wages per month, with board.			Wages per day at harvest, without board.		
	1910	1919	1920	1910	1919	1920
North Atlantic	$21.65	$42.18	$51.92	$2.08	$3.86	$4.68
South Atlantic	13.77	30.54	35.75	1.33	2.82	3.30
North Central east of Mississippi River	22.94	42.12	51.49	2.16	4.32	5.00
North Central west of Mississippi River	25.10	50.29	59.63	2.43	5.33	5.94
South Central	15.28	32.42	36.53	1.47	3.14	3.41
Far Western	32.69	62.96	73.21	2.52	4.67	5.39
Average for United States	19.21	39.82	46.89	1.82	3.83	4.36

Wages in the far Western States are more than double those in the South, where the low quality and relative abundance of Negro labor lowers the amount paid.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The committee informally rose; and the Speaker pro tempore having taken the chair, a message in writing from the President of the United States was communicated to the House of Representatives by Mr. Sharkey, one of his secretaries.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 3944. An act to create a Federal live stock commission, to define its powers and duties, and to stimulate the production, sale, and distribution of live stock and live-stock products, and for other purposes.

The message also announced that the Vice President, pursuant to the provisions of the concurrent resolution (S. Con. Res. 38) directing the method of counting the electoral votes for President and Vice President of the United States and declaring the result, had appointed Mr. LODGE and Mr. UNDERWOOD tellers on the part of the Senate.

AGRICULTURAL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

For the completion, operation, and maintenance of the Government kelp plant at Summerland, Calif., $150,000: *Provided*, That the product obtained from such experimentation may be sold at a price to be determined by the Secretary of Agriculture, and the amount obtained from the sale thereof shall be covered into the Treasury as miscellaneous receipts: *Provided further*, That at any time during the fiscal year 1922 or thereafter, when the Secretary of Agriculture shall determine that the interests of the Government will be subserved thereby, he is hereby authorized to appraise the buildings, machinery, marine equipment, kelp harvesters, boats, leasehold or contract rights, and all other property of whatever nature or kind appertaining to the experimental kelp potash plant of the Department of Agriculture situated at Summerland, Calif., and to sell the same at public or private sale, at such price or prices, on such terms, and in such manner as he may deem for the best interests of the Government, and in consummation thereof to execute such instruments of conveyance as may be requisite, the proceeds from such sale to be deposited in the Treasury to the credit of miscellaneous receipts.

Mr. HAUGEN. Mr. Chairman, I make a point of order.

Mr. BLACK. Mr. Chairman, I make the point of order against the following language in the paragraph which has just been read:

For the completion, operation, and maintenance of the Government kelp plant at Summerland, Calif., $150,000: *Provided*, That the product obtained from such experimentation may be sold at a price to be determined by the Secretary of Agriculture, and the amount obtained from the sale thereof shall be covered into the Treasury as miscellaneous receipts: *Provided further*—

If my point of order should be sustained, then that would leave in the paragraph that provision which provides for the sale of the plant. I make the point of order to the language that I have indicated, on the ground that it is an appropriation not authorized by law and is not the continuation of a public work. And I call the Chair's attention to the fact that when the Agricultural appropriation bill was up for consideration for the fiscal year 1920, in December, 1919, this same item was carried in the bill in the following language:

For investigation and demonstration within the United States to determine the best method of obtaining potash on a commercial scale, $192,900, including the establishment and equipment of such plant or plants as may be necessary therefor.

Now, I made the point of order at that time, stating the same ground in substantiation thereof that I now make. Mr. WALSH, of Massachusetts, was in the chair, and after the matter had

been argued he rendered the following opinion sustaining the point of order.

The gentleman from Minnesota contends that this investigation and demonstration, a plant having already been established, is the continuation of a public work. The Chair does not think that the continuation of an investigation such as this is, a scientific investigation by a department, constitutes such a work in progress as may be denominated the continuation of a public work—

And so on. Now, if the Chair will observe by reading the proceedings at that time he will see that the point of order was sustained. And then the gentleman from Minnesota [Mr. ANDERSON] offered the provision again in the following language:

For the completion, operation, and maintenance of the Government kelp plant at Summerland, Calif., $192,900.

Now, to that new language I did not make a point of order, not because I did not think it was subject to a point of order, but for the reason that during the discussion of the point of order at the time the item was up, it was brought out that it was the hope of the department to continue this experiment another year and to develop it in such a way as to show that kelp could be produced at a commercial profit, and that the plant could then be sold at a profit. Therefore, after that statement had been made, when the gentleman from Minnesota [Mr. ANDERSON] again offered the item, I did not make the point of order.

But I do now insist that a year having gone by, the experiment still being of a doubtful nature, that the point of order to the language contained in the bill should be made, and it is just as persuasive and just as effective as the one I made against the language in the bill in 1919, and which the Chairman of the committee sustained, because if this item is in order at all it would be upon the theory that it is the continuation of a public work already in progress, and the Chairman of the committee at that time [Mr. WALSH] gave a ruling to the effect that in his opinion this plant and this experiment was not of such a nature as to bring it within the exception of the continuation of a public work, and unless it can rest upon that exception I do not see how the Chair can hold the item in order. Therefore I make the point of order.

Mr. STEVENSON. Mr. Chairman, I want to make a point of order against the proviso which the gentleman from Texas [Mr. BLACK] leaves out:

Provided further, That at any time during the fiscal year 1922 or thereafter, when the Secretary of Agriculture shall determine that the interests of the Government will be subserved thereby, he is hereby authorized to appraise the buildings, machinery, marine equipment, kelp harvesters, boats, leasehold or contract rights, and all other property of whatever nature or kind appertaining to the experimental kelp potash plant of the Department of Agriculture situated at Summerland, Calif., and to sell the same at public or private sale, at such price or prices, on such terms, and in such manner as he may deem for the best interests of the Government, and in consummation thereof to execute such instruments of conveyance as may be requisite, the proceeds from such sale to be deposited in the Treasury to the credit of miscellaneous receipts.

I do not understand that there is any law now that authorizes the Secretary of the Treasury to liquidate this business, and I make the point of order against that, so that we may have the whole question up.

Mr. ANDERSON. Mr. Chairman, I should like to address myself to both points of order; first, to the point of order made by the gentleman from Texas [Mr. BLACK], and second, to the point of order made by the gentleman from South Carolina [Mr. STEVENSON]. There is no law which specifically authorizes the creation, operation, or maintenance of the Government kelp plant at Summerland, Calif. Therefore, if the item can be sustained at all, it must be sustained under the exception to the general rule prohibiting appropriations for purposes not authorized by law, and I desire in that connection to direct the attention of the Chair to the wording of the rule. Clause 2 of Rule XXI provides:

No appropriation shall be reported in any general appropriation bill, or be in order as an amendment thereto, for any expenditure not previously authorized by law.

Then follow the exceptions to that general rule:

Unless in continuation of appropriations for such public works and objects as are already in progress.

I direct the attention of the Chair especially to the fact that this exception is not confined to public works, but it is also applicable to other objects of expenditure which are in progress. It is true that this exception has usually been taken for the purpose of sustaining items of the character of public works, but the mere fact that the question has usually arisen in connection with appropriations for public works does not of itself limit the application of the exception to public works, and the Chair, of course, has the right to consider the language as it is, and to include within the exception other objects than public works that are in progress.

Now, then, what is the situation with respect to this kelp plant? It was established by an appropriation bill appropriating for its establishment. It has been maintained by congressional appropriations for three years. It is an object which is in progress and in operation to-day.

I think, Mr. Chairman, that we can only arrive at a fair application of the rule and its exception if we have recourse to the reasons which must have inspired the House in making it. Clearly, where a new proposition comes before the House in an appropriation bill for an object not authorized by law it may very properly lie in the mouth of one man to say that that new proposition shall not go in the bill and to raise a point of order against it. But it must have been in the minds of the men who framed this rule that where the House has once passed on a question and permitted the establishment of an object or a public work, it ought not to lie in the mouth of one man to say by a point of order that all that had heretofore been done and all that had heretofore been expended should be for naught. It seems to me that it was the intention of the framers of this rule to provide that once the House had decided upon the propriety of a particular object and agreed to it and the policy had been adopted and the work had been begun and the machinery and equipment and buildings necessary for its continuance had been purchased and put into operation, it should not be possible for one man to say that the work should not continue by raising a point of order against the continuance of the object for which the House had once appropriated. And it seems to me that upon the analysis of what must have been the reason for making the exception this item, which does provide for the maintenance and operation of an object which is in progress, is clearly in order.

Mr. BLACK. Mr. Chairman, just briefly in reply to what the gentleman from Minnesota [Mr. ANDERSON] has stated.

It seems to me that the error of his position lies in this, that the language of the original provision did not contemplate a permanent operation by the Department of Agriculture of a kelp plant for the production of commercial potash. Now, if the position of the gentleman from Minnesota is a correct one, then when once a project of this kind is started as an experiment, it could be carried on indefinitely, unless the House stopped it by striking the item out of the bill.

Now, the Chair very correctly stated yesterday in a ruling that merely because an item is carried in an appropriation bill from year to year does not make it permanent law. In 1917 Congress provided an appropriation of $175,000 to construct an experimental kelp plant and authorizing the Department of Agriculture to experiment in the production of potash on a commercial scale. This is investigational work, and it is not such a definite public work as the construction of a public building, or the construction of an irrigation dam, or the removal of obstructions from a navigable river, or something of that sort.

But this is an experiment that might run indefinitely and would have no terminating period. And if the contention of the gentleman from Minnesota [Mr. ANDERSON] is a correct one, then any experiment that the Government might start out to conduct would be a public work and would be authorized from year to year merely because it was in continuation of an appropriation that Congress might have authorized in some former appropriation bill.

I think that the Chair will find several precedents where Chairmen of the Committee of the Whole have held that an experiment of this kind is not such a public work as the clause in Rule XXI refers to as an exception to the general rule.

Mr. ANDERSON. Mr. Chairman, I did not direct my remarks a moment ago to the point of order raised by the gentleman from South Carolina [Mr. STEVENSON], and I should like to say just a word on that.

The rule which I referred to a moment ago also contains this provision:

Nor shall any provision in any such bill or amendment thereto changing existing law be in order, except such as, being germane to the subject matter of the bill, shall retrench expenditures by the reduction of the number and salary of the officers of the United States, by the reduction of the compensation of any person paid out of the Treasury of the United States, or by the reduction of amounts of money covered by the bill.

Mr. STEVENSON. Will the gentleman yield one minute?

Mr. ANDERSON. Certainly.

Mr. STEVENSON. I have looked into this. It came up on first blush, and I was not willing to let this plant be abolished, as we are very much interested in potash; but, from further information I have received, I am inclined to think this is a judicious proposition, and therefore will withdraw my point of order.

UMI

Mr. HAUGEN. I renew the point of order. This is clearly legislation.

Mr. ANDERSON. If the point of order is still pending, I admit, of course, that the provision direction the sale of this plant is legislation. The only question is as to whether it is legislation which is in order under this rule.

It is in order under the rule if the effect of the legislation is to reduce the amounts of money carried in the bill. For that purpose I assume that the Chair has the right to take into consideration the amounts of money which have heretofore been appropriated for this purpose. Last year, for the operation and maintenance of this plant, we carried an appropriation of $192,000. That was upon the basis of the operation of the plant for 12 months. The appropriation carried in the bill is on the basis of the operation of the plant for approximately seven months, and we have provided for the sale of the plant in order that we might make that reduction; because if the plant is sold as the Secretary is directed to sell it, within seven months, no further appropriation will be required, and through the sale of the plant the amount of the appropriation will not only be reduced this year but it will be reduced next year and every year thereafter until time is no more. It seems to me that this is legislation such as is contemplated under the Holman rule.

The Chair will remember that under the Holman rule we abolished the assay offices. Now, if it is in order under the Holman rule to repeal the law providing for the operation and maintenance of assay offices, it seems to me that it is clearly in order to provide for the sale of Government property the care and maintenance of which requires an expenditure of money out of the Federal Treasury, because, of course, it must be presumed that Congress will provide for the maintenance and care of all Government property.

Mr. HAUGEN. Mr. Chairman, my point of order is that there is no authority to sell this building; and if the gentleman's contention is to be accepted as correct an amendment to a bill proposing to dispose of the Congressinal Library would be in order, because it would retrench expenditures. You could carry it to the Treasury Department and dispose of every building owned by the Government, because it would retrench expenditures and would eliminate a number of employees and their salaries. There ought to be a limit somewhere to the authority granted.

The CHAIRMAN. Will the gentleman from Minnesota permit the Chair to ask him a question?

Mr. ANDERSON. Certainly.

The CHAIRMAN. Was $150,000 the amount originally set aside for the completion of this plant?

Mr. ANDERSON. No; the original appropriation was for $127,000. The appropriation for the current year is $192,000; so that the sum carried in the bill is $42,000 less than was appropriated last year.

Mr. BLACK. Will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. BLACK. Is not the gentleman mistaken in saying that the original appropriation was $127,000? I was under the impression that it was $175,000 originally.

Mr. ANDERSON. The appropriation is stated in the Book of Estimates here as $127,600. There may have been a prior appropriation.

Mr. BLACK. I think there was a prior appropriation in 1917 of $175,000.

Mr. ANDERSON. The gentleman may be correct about that. What he states is in accordance with an impression which I myself have, but which does not appear in the Book of Estimates.

Mr. BANKHEAD. Will the gentleman yield for another question?

Mr. ANDERSON. Yes.

Mr. BANKHEAD. Was the original appropriation that has been referred to made under the general authority of the organic act establishing the department?

Mr. ANDERSON. I think the appropriation as originally made was subject to a point of order, but no point of order was made at that time.

Mr. BANKHEAD. But the activity is being carried on in theory at least under the authority of an executive order?

Mr. ANDERSON. Under the general authority of the department in the organic act.

The CHAIRMAN. The Chair will rule. Three points of order are leveled against this paragraph. The Chair will take them up in their order.

In reference to the first point of order, lines 16 and 17, "operation and maintenance" of the plant, the Chair would think that that was in continuation of a public work and that this paragraph was in order. Without going further into that matter the Chair will go on to the next two points, for there is where the crux of the situation lies, in the opinion of the Chair.

Beginning with line 18 of the proviso and running down through line 21 and the first word of line 22, that seems to the Chair purely legislation. Legislation on an appropriation bill is not in accordance with the rule, unless it shows retrenchment according to the Holman rule, and for that reason the Chair will sustain the point of order that has been made against it.

Coming down to the third objection, beginning on line 22 and continuing to the end of the paragraph, the Chair feels that while the proviso might be sustained on other grounds, there is a point on which he should base his position which has not been brought forward by any Member. That is with reference to the words "or thereafter." It would seem to the Chair, basing his opinion on various precedents, so numerous that it seems needless to refer to them, that legislation on an appropriation bill which contains the word "thereafter" is intended to make it permanent law, and therefore is in violation of the rules of the House, and while this may be an incident, the Chair will sustain the point of order on that count. Therefore the Chair sustains both points of order made.

Mr. BLANTON. Mr. Chairman, I make the further point of order against the whole paragraph that it should all go out.

The CHAIRMAN. The Chair will sustain that point of order, and the whole paragraph is ruled out.

Mr. ANDERSON. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

For the completion, operation, and maintenance of the Government kelp plant at Summerland, Calif., $280,508.

Mr. BLACK. Mr. Chairman, I make a point of order against the amendment on the ground that it is not an appropriation authorized by law and that it is not a continuation of a public work. With all due respect to the decision of the Chair, or rather the Chair's opinion as expressed a moment ago in announcing his decision, that the operation of this experimental kelp plant at Summerland, Calif., was a continuation of a public work, I would like to address the Chair on that point and cite some decisions.

Mr. BLANTON. Before the gentleman does that I will make a further point or order that the amendment as offered from the floor by the gentleman from Minnesota is not germane, and especially it is not germane to the preceding paragraph of the bill to which it is offered. Under the decisions and precedents of the House, as the Chair will remember, it must be germane.

Mr. BLACK. Now, Mr. Chairman, let me say in support of my point or order it was admitted, and I think correctly admitted by the gentleman from Minnesota, that this item, which originated in an appropriation bill for the fiscal year 1917, was not in order and would have been subject to a point of order at that time. But we all know that it was a war experiment, and that a great many items of this nature went through at that time without points of order having been made against them because we believed they were necessary and did not desire to do anything which would impede the war preparations.

The proposition now is that having been once admitted in a bill and having been continued for three or four years, is it a continuation of a public work? Upon that subject I find in the House Manual, page 367, paragraph 820, the following language:

By public works and objects already in progress are meant tangible matters like buildings, roads, etc., and not duties of officials in executive departments or the continuance of a work indefinite as to completion and intangible in nature, like the gauging of streams.

Now, then, the kelp plant at Summerland, Calif., has already been built. The machinery is all installed, and for two or three years the Department of Agriculture has been experimenting in the production of potash on a commercial scale.

The proposition is to demonstrate by experiment that it can be produced on a commercial basis. Is that a tangible proposition? Can the Chair have any assurance as to when that project will be completed? When will the Department of Agriculture demonstrarte to us that they can produce it on a commercial basis? We have the illustration of last year to show the indefiniteness of the idea. When the bill was up I did not make a point of order when the item was offered the second time because of the assurance that had been made from both sides of the House that the experts of the department said if you will authorize us to carry on this experiment for another year before the year is out we will demonstrate that we can produce and sell more products than it will cost to operate the plant. That would have been a conclusion of the experiment. If that had been done it would have demonstrated that they could produce it on a commercial basis.

What are the facts? I have read the hearings, and they have only produced about $60,000 worth of potash as against an ex-

penditure of a good part of $192,000 for the fiscal year. Evidently the experiment is not yet concluded, and so the department desires to carry it on for the fiscal year 1922. All right; suppose we do, then when we come to prepare the bill in 1923 I fear that those in charge of the bill will come in and say, "No, we have not concluded the experiment; we have some more by-products we hope to develop and demonstrate that potash can be produced on a commercial scale from kelp." Therefore, it seems to me that this is an inconclusive matter, one as to which we can not tell when it may come to an end, and it is not such a tangible proposition as is contemplated by the exception to the rule authorizing an appropriation for the continuance of a public work.

Mr. WINGO. Mr. Chairman, will the gentleman yield?

Mr. BLACK. Yes.

Mr. WINGO. What is the object of this work?

Mr. BLACK. The object of it is to demonstrate that potash can be produced from kelp weed at such a price that it will compete in the commercial markets with other sources of potash.

Mr. WINGO. Have they demonstrated that?

Mr. BLACK. Decidedly not. At least, that is my opinion.

Mr. WINGO. And in spite of the fact that the department reports that they have not, they ask to continue the work?

Mr. BLACK. Yes. They say they think they are now at the point where it can be done.

Mr. WINGO. The object is still in progress; they have not completed it.

Mr. BLACK. That is true.

Mr. WINGO. If that is so, under the rule it is in order.

Mr. BLACK. No; I beg to differ with the gentleman, because it would be only the continuation of an experiment. If the Chair will examine the decisions he will find that it has been repeatedly held that an authorization of an experiment by the department or an investigation by the department is not such a public work as comes within the exception of the rule, but that the words "public work" mean a tangible project, such as the construction of a building, the construction of a road, such as the clearing of a river of obstructions in order to enable navigation; but here we have a plant that has long since been completed, and an experiment is going on which it is admitted by the gentleman from Minnesota [Mr. ANDERSON] would have been out of order as an original proposition. My contention is that the mere fact that it is still being carried on would not make it in order because the tangible part of it, namely, the construction of the public building in which the operations are conducted, is completed.

Mr. WINGO. Has it been ruled at any time—and the gentleman suggested that it had—that an appropriation for clearing a stream, keeping it clear of driftwood, of recurring intermittent creation of sand bars, even though the original work was undertaken by an authorization that would have been subject to a point of order, yet, having been carried in a current appropriation bill and the work started, the engineers reporting that they have not yet completed it, notwithstanding the fact that originally it was contended it never could be done—has it ever been decided that an appropriation to continue that work is not in order? The gentleman left that impression with the Chair, and I want to know whether that is true.

Mr. BLACK. I am unable to answer whether a definite proposition of that kind has been decided, but the gentleman heard me read from the Manual to the effect that such public works as the construction of a building or the construction of a road are the public works contemplated and not an intangible proposition like an experiment.

Mr. WINGO. What was the decision in the Mississippi River case? I know that I rendered the decision, but I have forgotten what the facts were. I held it to be in order.

Mr. BLACK. I am sorry to say that I have not had the benefit of reading the gentleman's decision.

Mr. WINGO. Yes; but the gentleman made an argument in favor of the proposition at the time, as I recall, and I agreed with him. I was trying to remember what the facts were in that case.

Mr. BLACK. I do not recall that particular decision.

Mr. ANDERSON. Mr. Chairman, if an appropriation for the establishment and maintenance of this plant had been in order in the first place, it would be in order now, and we would not be arguing the question from the standpoint of an exception to the general rule. The gentleman from Texas [Mr. BLACK] says that this plant is in operation. It is an existing work. Is the Congress without authority to provide for the operation and the maintenance of an existing work? The Chair is not called upon to go back into the objects and purposes for which this work was established, to see whether those objects and purposes were in order in the first place. The Chair is only called upon to determine whether it is in order to operate and maintain a piece of property that the Government now has. That is the whole question here. It is not a question of whether the investigation was originally authorized or not, but under the amendment that I have offered it is simply a question of whether it is in order to provide for the operation and maintenance of an institution which is a going concern and which is the property of the Government, and which if it is not operated and maintained will deteriorate in value from day to day.

Mr. BLANTON. Will the Chair hear me on the point of order?

The CHAIRMAN. The Chair will hear the gentleman from Texas.

Mr. BLANTON. Since the Chair has stricken this paragraph out on a point of order and the committee has failed to put a proper paragraph in the bill not subject to the point of order, the bill comes before the House now with no such subject in it as that offered in the gentleman's amendment. Therefore the Chair will readily see that the amendment offered by the gentleman from Minnesota [Mr. ANDERSON] is a new subject not contained in the bill as it comes from the committee. The Chair will remember the decisions which have been made, almost without change, for years and years in the House with respect to new subject matter offered from the floor. The Chair will remember that with respect to almost every one of those provisions the chairman deciding the question has held that a member of the Appropriations Committee, even the chairman himself, on the floor in charge of the bill, so far as offering amendments containing new subjects is concerned, has no more right than any other Member of the House in Committee of the Whole. In other words, he stands on an equal footing with every other Member of the House, and if no other Member from the floor, not on the committee, may offer the amendment, then even the chairman of the committee himself in charge of the bill on the floor has no such right. Therefore, I submit to the Chair, this being an entirely new subject, which is not contained in the bill, it not being germane to the bill, the amendment not being germane to the paragraph immediately preceding it, it is out of order.

Mr. SNYDER. Mr. Chairman, I rise for the purpose of asking the chairman a question which may have some bearing on the decision of the Chair. The gentleman makes the point of order that the appropriation should be continued because it is a going concern, and unless the appropriation is made the plant will deteriorate and the Government will thereby suffer a loss. I believe it has been said that it is proposed to sell the plant within the next few months.

Mr. ANDERSON. We had a provision of that sort in the item which went out on the point of order.

Mr. SNYDER. What I want to ask the gentleman is this: What will be the loss to the Government if the appropriation is made and the plant is continued for seven months?

Mr. ANDERSON. That, of course, is an open question; but on the basis of the best information that I have, my own judgment is that we would lose next year between $50,000 and $70,000, depending somewhat on how soon it is possible to put the plant on a full-capacity basis.

In order to do that would require the installation of a new electric furnace, so as to increase the quantity of charcoal that can be obtained from a given amount of kelp. If the plant is put on an operating basis early next year, there is a possibility it will make all the appropriation.

Mr. SNYDER. My information was that this plant was to be disposed of at the end of a certain period.

Mr. ANDERSON. That has been deferred now, because a point of order was made on that provision.

Mr. SNYDER. The only point I had in my mind was, if the ruling would continue the plant and it should be based upon the assumption that there was to be a depreciation in the value of the plant, I wanted to offset what might be a loss in the operation of the plant between now and the time it was disposed of. It seems to me if the plant is to be operated the loss would be less if you did not put this appropriation in, but would dispose of the plant now.

Mr. BANKHEAD. Mr. Chairman, it seems to me the question now, as I have said, relates to the germaneness of the present amendment to the bill. The rule provides that no appropriation shall be reported in any general appropriation bill or be in order as an amendment thereto for any expenditure not previously authorized by law. It is admitted here by the chairman of the committee that there is no original authorization of law for this project. It is admitted by him that this is a work in progress, put in effect through the exercise of the discretion of an executive officer of the Department of Agricul-

ture. Therefore it comes back to the original proposition, that the only basis for the germaneness of this amendment is on the fact that it is an existing project that was put into effect by the authority of an executive officer and not by any original specific authorization of law at all. And it seems to me it would be a rather dangerous precedent, Mr. Chairman, to say that the expenditure of public funds, probably appropriated in a lump sum, in the discretion of an officer of the Department of Agriculture, could be made the basis for the violation of this rule, that it was a continuing and existing, unfinished public project, admittedly never authorized by an act of Congress.

The CHAIRMAN. The Chair will rule. The Chair will first take up the point made by the gentleman from Texas [Mr. BLANTON].

The Chair is of the opinion that this amendment is in order in this particular part of the bill. A few paragraphs back of where we now are reference is made to the investigation of the "possible supply of potash, nitrates, and other natural fertilizers." This plant is, of course, a plant that was established to produce potash. It seems to me that it is clearly in order in this place in the bill, and the Chair therefore overrules the point of order made by the gentleman from Texas [Mr. BLANTON].

The Chair will now take up the point of order made by the gentleman from Texas [Mr. BLACK]. The Chair realizes that the gentleman has made a very strong argument in behalf of the point order he has made. The Chair desires to speak first of one or two things with reference to the general proposition.

It has been held in volume 4 of Hinds' Precedents, paragraph 3707, in the ruling of the Chair in that decision, that if the work be a public work, and is already in progress, then there need not be any previous legislative authority for the work. That, the Chair thinks, probably answers the objection made by the gentleman from Alabama [Mr. BANKHEAD] in his point. I think we must assume that that plant has been established in California; that it is in existence. It is a tangible proposition. It is not a theory; it is a fact. And the Chair bases his opinion on a precedent in volume 4 of Hinds, paragraph 3801, which cites that:

An appropriation for operating and repairing a sawmill already constructed by the Government was held to be in continuation of a public work.

Now, if it is in continuation of a public work to maintain a sawmill, it would seem to the Chair it would be a continuation of public work to continue this kelp plant at Summerland, Calif. In view of the fact that the Chair feels, from the rule that was cited by the gentleman from Texas [Mr. BLACK], "that public works already in progress must be tangible matters, like buildings," and so forth, the Chair thinks this is a continuation of a public work within the rule. The Chair so holds and overrules the point of order made by the gentleman from Texas [Mr. BLACK].

Mr. ANDERSON. Mr. Chairman, I offer an amendment to the amendment.

The CHAIRMAN. The gentleman from Minnesota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. ANDERSON to the amendment now pending: Strike out "$208,500" and insert in lieu thereof "$150,000." "*Provided*, That at any time during the fiscal year 1922, when the Secretary of Agriculture shall determine that the interests of the Government will be subserved thereby, he is hereby authorized to appraise the buildings, machinery, marine equipment, kelp harvesters, boats, leasehold or contract rights, and all other property of whatever nature or kind appertaining to the experimental kelp potash plant of the Department of Agriculture situated at Summerland, Calif., and to sell the same at public or private sale, at such price or prices, on such terms, and in such manner as he may deem for the best interests of the Government, and in consummation thereof to execute such instruments of conveyance as may be requisite, the proceeds from such sale to be deposited in the Treasury to the credit of miscellaneous receipts."

Mr. BLANTON. Mr. Chairman, I reserve a point of order on that.

The CHAIRMAN. The Chair would like to ask the gentleman whether or not his amendment is exactly like the bill as read, after the figures "$150,000," with the exception that the proviso, lines 18 to 22, is omitted and the words "or thereafter" on line 23 are omitted?

Mr. ANDERSON. The Chair is correct in that.

Mr. BLACK. Mr. Chairman, I want to speak against the amendment.

Mr. HAUGEN. Mr. Chairman, I make the point of order.

The CHAIRMAN. The gentleman from Iowa makes a point of order against the amendment. On what ground?

Mr. HAUGEN. It is not authorized by law to dispose of the plant, which is new legislation.

Mr. WINGO. Mr. Chairman, I make the further point of order that it is not only not authorized by existing law but it is a different proposition in saying that the Secretary shall sell than that the Secretary shall have discretion to sell if he wants to do so. There is a clear discretion expressed in that.

I think if it shows on its face that it will retrench expenditures, not simply during the coming year but during next year or any year thereafter, that would bring it within the Holman rule. But I do not think you can apply the Holman rule if the legislation is not a retrenching of public expenditure, but which authorizes somebody to exercise a discretion if he wishes to retrench. That is not the Holman rule. The Holman rule is that the House must exercise its judgment and, by its affirmative, direct action, or its action covered by the proposed amendment, retrench. This does not do that at all. The Secretary will direct the sale, perhaps, but it gives him the discretion. We can not speculate and be indefinite. There must be a definite retrenchment on the face of the amendment to be in order under the Holman rule.

The CHAIRMAN. Does the gentleman from Minnesota desire to be heard on the point of order?

Mr. ANDERSON. Mr. Chairman, I have said all I care to say on the question. I think the Chair is already sufficiently informed. I do not desire to discuss the point of order now.

The CHAIRMAN. The Chairman realizes that this point is a close one. The provision of the rule cited by the gentleman from Arkansas [Mr. WINGO] is familiar to all of us, and the Chair will not repeat it.

Mr. WINGO. May I make this suggestion to the Chair? The Chair, when he suggested the "hereafter" matter, really had the crux of it in mind; the indefiniteness of it—that is the trouble with this amendment. The same suggestion that came to the mind of the Chair as to "hereafter" was that this was permanent legislation and gave somebody discretion unless Congress affirmatively repealed this act.

That same defect goes to the pending amendment, that it does not affirmatively legislate and affirmatively retrench, but simply says to the executive officer, "You may exercise a discretion, which Congress has under its rule to retrench, if you see fit, in the future, limited to the fiscal year."

The CHAIRMAN. The Chair will state to the gentleman from Arkansas that he did not intend to convey the idea that the word "hereafter" was the controlling factor. It was merely an incident to the whole situation, and not really the crux of his decision.

As the Chair stated, he is somewhat dubious about this proposition, but the Chair will try to answer one or two questions. Does the proviso reduce the amount of money covered by the bill? On its face it does not. However, it appears that in the current law $192,900 was appropriated for the maintenance of this plant. It is stated that $150,000 was included in the present bill for a portion of the coming fiscal year, based on the prospect of selling the plant as indicated in the proviso. If the plant is sold, it seems a logical conclusion to assume that no further appropriation will be required for it. If the proviso is not agreed to, it will be necessary to increase the appropriation to $208,500 in order properly to maintain this plant during the next fiscal year. Therefore, while the proviso on its face does not indicate a reduction in the amount of money in the bill under consideration, yet it seems to the Chair a logical conclusion that the proviso will bring about a saving of money formerly carried in this bill and liable to be carried in the future. The Chair feels that the principle laid down by the gentleman from Tennessee [Mr. GARRETT] is sound; that an amendment, or a provision in a bill reported from the Committee on Appropriations, changing existing law and clearly a retrenchment within the three methods provided in the rule, may include legislation directly instrumental in accomplishing the reduction, provided it is not permanent legislation, that is, legislation beyond the life of the bill under consideration.

The Chair overrules the point of order.

Mr. BLACK. Mr. Chairman, I rise to oppose the amendment. In considering whether or not we shall adopt this amendment and again appropriate $150,000 for this purpose, it is well to take into consideration how much we have already expended on this experiment. We appropriated in 1917, the original appropriation, $175,000. In 1918 no additional appropriation was made, because the construction of the plant had not yet been completed, and so a reappropriation was made of the unexpended balance. Then in 1919 we appropriated $127,600 more. In 1920 we appropriated $127,600. In the present fiscal year 1921 we appropriated $192,900. Thus we have appropriated or expended on this experiment $623,100, and if we appropriate $150,000 more,

it will mean that we shall have appropriated for this one purpose and one experiment $773,100.

Now, I have no criticism to make of the fact that this experiment has not been a success from a commercial standpoint and has not sold products of anything like as great aggregate value as the cost of operation. It was of course originally authorized as an experiment and not with the idea of yielding a profit to the Government, but it seems to me that we have reached a point where, in the interest of economy, we ought to discontinue it. It seems that about all the information is developed that we could reasonably expect, even if it should be operated further.

Now, how much product has been sold, including potash, iodine, and charcoal? The Book of Estimates shows that up to the 20th of August, 1920, a total of $114,423.04 worth of product had been sold, as against an appropriation aggregating $623,100; and it must be remembered that a great deal of this $114,423.04 was sold at high war prices, because during the war there was a complete cessation of imports into this country of potash, and therefore the price of the product went to unprecedented heights.

Now, the project was originally an experiment. When the Great War broke out in 1914 we were getting most of our potash from Strassburg and Alsace and Lorraine, and Germany immediately put an embargo upon its export, and so we had to set about to develop whatever source we could develop, and one of the methods that was suggested was to go out on the Pacific coast and harvest the great seaweed kelp, carry it to reduction plants, and make it into potash.

Now, Mr. Chairman, what kind of work does that involve? Kelp is 90 per cent water. Therefore it means for every ton of kelp that you carry into the kelp plant you carry 1,800 pounds of water and 200 pounds of solid, and in that 200 pounds of solid only 30 pounds of potash is produced. Therefore that means that out of every ton of kelp that you collect out of the Pacific Ocean and transfer to the kelp plant you get only 30 pounds of potash. Figure out how many tons of kelp seaweed you have to harvest and carry to the kelp plant and reduce to potash before you have got a ton of potash. I figure that it takes 132,000 pounds of kelp to make a ton of potash.

And yet gentlemen tell me that we can develop this experiment to such a success that the prudent business men of this country will take hold of it and endeavor to compete with the great natural deposits in Alsace-Lorraine and Strassburg. Why, since this bill was up I called up the Bureau of Foreign and Domestic Commerce of the Department of Commerce, and they told me that there has already been imported into this country from Alsace-Lorraine—which is now a French Province—and from the German provinces during 11 months 784,370 tons of the different grades of potash, at a total cost of $32,423,000, which, as I figure it out, averages $41.30 per ton, and I am told by the Shipping Board that the freight on potash from European ports to ports on the Atlantic coast ranges from $5.25 a ton to $5.75 a ton. Now, what man in this House is going to contend seriously that business men can harvest seaweed that yields only 30 pounds of potash to a ton and compete with great natural resources of potash which can be sold at a very much less price than the prices which prevailed during the war?

Mr. STEVENSON. What is the per cent of pure potash contained in the 30 pounds produced from the seaweed?

Mr. BLACK. I have not stated that.

Mr. STEVENSON. The gentleman ought to state that.

Mr. BLACK. I have not looked into it. Of the 784,000 tons imported in 11 months of this year about 349,000 tons were kainite, I believe, 308,313 tons were muriates of potash, and the balance of other grades. I do not recall the technical names, but the total tonnage, including the lower grades and the higher grades, was 784,000 and the average prices on all of it, as I figure it, was $41.30 a ton plus the freight.

Mr. STEVENSON. You can not give us the chemical analysis?

Mr. BLACK. No. The gentleman is from a State which uses large amounts of commercial fertilizers and no doubt knows the analysis better than I do.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ANDERSON. I ask unanimous consent that all debate on this amendment close in 20 minutes.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that all debate on this amendment close at the end of 20 minutes. Is there objection?

There was no objection.

The CHAIRMAN. Will the gentleman from Minnesota designate the Members who are to have the time?

Mr. BLANTON. I do not think the gentleman would be authorized to do that.

Mr. BYRNES of South Carolina. Mr. Chairman, I desire to present the views that influenced the subcommittee in recommending the provisions contained in the bill.

I realize that, so far as demonstrating the commercial possibility of potash, this experiment has proceeded so far that we now know that it can not be successfully done unless the by-products—carbon and iodine—shall be so developed as to make it a paying proposition. But the committee was confronted with this situation: Last year by the operation of this plant we lost $80,000. The gentleman who is in charge of the operation of the plant believes that by reason of the development of the by-product carbon during the next year he will be able to run without any loss and, if anything, at a profit. Grant that he can operate not at a profit but without loss, let us determine how it shall be disposed of. If that plant is scrapped, the estimate is that if sold when not in operation we would get for the plant $25,000 or $30,000. If sold as a going plant in operation, we should get about $100,000. If we make no appropriation, but simply direct that it be sold, the corporations of the country who may be interested in the purchase of the property will know that if they wait until July 1 the plant will not be in operation, and after that it can be purchased for a small percentage of what it is worth as a going plant. If we make this appropriation and carry this direction to sell, the Secretary of Agriculture will take steps to sell it. It can run for some months during the next fiscal year, and then we will have a better opportunity to secure for the Government a greater price for the plant. The daily revenues now amount to $430, and will doubtless increase. If it is ordered sold now and we do not provide any money for its operation during the next fiscal year, we will force the sale of the property at a time when business concerns are not extending their purchases but are restricting their activities, at a time when they are unable to borrow money except at high rates of interest. By making this appropriation and providing for its operation for at least part of the next fiscal year we will lose little, if anything, by operation and we will then sell it at a time when money will be easier, when business men will desire to extend their activities, and the Treasury will receive more money than if we follow the policy that is suggested by the amendment to scrap the plant and sell it as an idle plant. It is a business proposition that should appeal to the judgment of the House, regardless of what their views may be as to the wisdom of operating the plant, that we will receive more money by making this appropriation and selling the plant as a going concern.

The CHAIRMAN (Mr. SNYDER). The Chair will recognize the gentleman from Kansas [Mr. TINCHER] for five minutes.

Mr. TINCHER. Mr. Chairman, I will not attempt to add to the argument that we should appropriate $150,000 so that we may sell a plant that we own for $100,000. Every Member of this House knows that when we appropriate money for one of these departments that money is expended. I can not conceive of the argument that we should appropriate $150,000 so that we may sell a plant for $100,000. I can not conceive that that argument will be taken seriously by members of the committee.

The distinguished gentleman who just preceded me [Mr. BYRNES of South Carolina] was absolutely right as a member of this subcommittee while acting as such member. It was his question that elicited the information that last year we spent $192,000 on this plant and manufactured $60,000 worth of products. It was on the same page that another distinguished member of this subcommittee asked this question, and I want the members of the Committee of the Whole to listen to it.

Mr. Harrison, private secretary to the Secretary of Agriculture, testified that he thought if you would let him go on another year he could do better. One member of the subcommittee said, "That is what you said last year, and I went up and buncoed the House on that theory." Dr. Whitney, who comes to the rescue of Mr. Harrison, says, "Do it again; it is all right." [Laughter.]

Then another distinguished member of the subcommittee read from the hearings of last year to Dr. Whitney, and called his attention to the fact that they made that selfsame promise last year, that they were going to get on a business basis if they would let them go along one more year.

Mr. JOHNSON of Mississippi. That is what they said on the floor.

Mr. TINCHER. Yes; and surely we ought not to be buncoed this year by appropriating $150,000 to sell a plant for $100,000.

Mr. SUMMERS of Washington. Will the gentleman yield?

Mr. TINCHER. Yes.

Mr. SUMMERS of Washington. Dr. Whitney says that the charcoal they are developing on the side is worth $500 a ton; that it is a very fine article; but when you get the details as to the disposition of it, up to this time all they could do was to give it away. [Laughter.]

Mr. TINCHER. Yes; the experiment has failed, and now is the Government going to spend money on that experiment which is a failure, and will the record show that year after year, at the request of Dr. Somebody, or the private secretary to the Secretary of Agriculture, they will continue to spend a sum of money greater than they estimate they could sell the plant for? I think we ought to defeat the amendment.

Mr. BYRNES of South Carolina. Mr. Chairman, I think the gentleman from Kansas misunderstood my statement. My statement was based on the acceptance of the opinion of these gentlemen that during the next year they would operate not at a loss, and that being true, the $150,000 which we appropriate for operation would be covered by the profits of the concern. If he does not make good there would be a loss. Outside of the operation the question is whether we will sell for $25,000 a plant that is idle or for $100,000 a plant that is in operation.

Mr. TINCHER. I would not have taken the floor except for the fact that I was one of the Members that was buncoed last year by these same promises, and I do not want to repeat it.

Mr. BYRNES of South Carolina. The gentleman is not referring to the gentleman from South Carolina.

Mr. TINCHER. No; the gentleman who asked the question was more familiar with the facts than is the gentleman from South Carolina. [Laughter.]

Mr. JONES of Texas. Mr. Chairman, the position of the gentleman from South Carolina reminds me of the fellow who, desiring to start a get-rich-quick scheme, started a cat ranch in California. He found that cat hides could be sold for 80 cents each. He decided to purchase 100,000 cats. In order to eliminate the expense of feeding the cats, his plan was to start an adjoining rat ranch and feed the rats to the cats. Of course, he must feed the rats, so he decided to feed the rats on the dead carcasses of the cats that he skinned. [Laughter.] Thus he could operate both ranches practically without cost.

Now, last year this same proposition was up, and Dr. Tarentine, in charge of the plant, in making a plea for the continuation during the last year estimated that the plant would produce $290,000 worth of potash and other products. He said if we let them run the last year it would not lose like it did the year before, but they would make $290,000, and by means of that estimate he secured an appropriation of $192,000. In the hearings of this year Dr. Whitney, the chief of the Bureau of Soils, says that the plant produced $60,000 last year, out of an expenditure of $192,000, and yet on the following page of the hearings, 436, it is shown that they have only produced since the establishment was started a total of $114,423 worth of products. During the war some of it sold at $450 a ton, as that was when we could not import any article of that kind. If they had been compelled to sell the product at its actual value in a competitive market they could not have sold anything like $114,000 worth.

Now, I want to call attention to a further fact. There are in this country actual potash beds, not a lot of seaweeds from which you can squeeze a little potash, but there are in the Southwest certain great salt basins which the Bureau of Chemistry has determined contain a great amount of potash. There is potash in paying quantities if the machinery were placed there to develop it. The only reason it is not developed by private enterprise is the fact that there are many potash mines in foreign countries that can produce potash at a very low figure. It seems to me that if the Government of the United States is going to make any appropriation for potash it ought to make it to be spent not on seaweed but on potash. The idea of continuing an appropriation to carry on a business that on the testimony of the manager has only produced since its establishment about one-half of the appropriation they ask for this year, with the continued promise year after year that they are going to make it a paying proposition when none of the promises have been carried out, is absurd.

Mr. KINKAID. Mr. Chairman, I ask unanimous consent that I may be permitted to extend the remarks in the RECORD that I have already made on potash.

The CHAIRMAN. The gentleman from Nebraska asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, I want to offer an amendment to reduce the sum from $150,000——

The CHAIRMAN. There are still seven minutes left for debate on the amendment as it now stands.

Mr. McLAUGHLIN of Michigan. Will I be recognized at the close of that time to offer an amendment?

The CHAIRMAN. The Chair will recognize the gentleman.

Mr. McLAUGHLIN of Michigan. The time was limited to 20 minutes on this amendment offered by the gentleman from Minnesota. At the expiration of that time other amendments will be in order and time will be allowed on them?

The CHAIRMAN. As the Chair understands, that would be the rule.

Mr. SUMNERS of Texas. Mr. Chairman, the hearings on this kelp item has produced an interesting record. If the record of this and last session were confused one would scarcely notice the fact, except that the record this year clearly shows that they have abandoned all idea of ever making this proposition pay as a potash producer. There is no sort of doubt about that at all. But now they perhaps have more different things, by-products, which they can produce, which they have accumulated as the emergency progressed. I want to direct serious consideration to this rather illuminating testimony in regard to the activities of this plant. Mr. Whitney was on the stand, and I am going to read very briefly from his testimony. Mr. Whitney says:

> We are now developing an absorbent charcoal of the highest grade that the world has produced; it is worth $500 per ton and there is great demand for it.

One would imagine from that statement that they were getting somewhere with the proposition. To continue—

> it is worth $500 a ton and there is great demand for it. We have also been recovering iodine, potash salts—

Then somebody interrupted him, the gentleman from Minnesota [Mr. ANDERSON], and called attention to the fact that the price of charcoal had evidently gone up since his last statement. Mr. ANDERSON called his attention to the fact that in his statement last year it was worth only $300 a ton, but what is a little difference of $200 a ton when you are trying to save a great plant like this? Here is what they did with this $500-a-ton stuff, and I am reading from the testimony, and if anyone questions this I will be very glad to have him read the book.

Mr. HASTINGS. Will the gentleman tell the House who Mr. Whitney is?

Mr. SUMNERS of Texas. Mr. Whitney says:

> It is $500 now.

I can just picture that scene in that committee room—driven by inability to defend this as a potash proposition he proposes to make it a charcoal burner.

> It is $500 now, and the demand is increasing.

I want to show you how this demand is increasing.

> From the chemical industry there is a very great demand.

Mr. Chairman, I can just see the picture of that man sitting across the table from my good friend from South Carolina [Mr. BYRNES] and the gentleman in charge of the bill. A very great demand for this!

Mr. ANDERSON. There is.

Mr. SUMNERS of Texas. Very well, I will show you what sort of a demand there is, although he has not been able to get rid of all that they have as yet. He continues:

> The preparation has been exceedingly difficult. We have not made as much progress as we had hoped. The charcoal has to be reheated in an electric furnace, a very ingenious device that was built at the kelp plant; we had to devise the whole thing for our particular work. We have made sufficient of this to send around for factory demonstration; that is, we will get out a ton and we will send a ton to any person who will give it a thorough trial.

Mr. Chairman, that is the stuff for which there is a very great demand, worth $500 a ton. They will give it to any of these factories which will haul it away!

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, I offer the following as a substitute, reducing the amount from $150,000 to $25,000.

The CHAIRMAN. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

> Amendment offered by Mr. McLAUGHLIN of Michigan as a substitute to the amendment offered by the gentleman from Minnesota [Mr. ANDERSON]: Strike out "$150,000" and insert in lieu thereof "$25,000."

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent that debate on this paragraph and all amendments thereto close at the end of 10 minutes.

Mr. JONES of Texas. Mr. Chairman, I have an amendment upon which I would like to be heard.

Mr. ANDERSON. Then I will confine it to the amendment.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that all debate upon the amendment offered by

the gentleman from Michigan close at the end of 10 minutes. Is there objection?

There was no objection.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, this proposition was started several years ago purely as an experiment, when there was shortage of potash and great need of it, as everyone knows. The Committee on Agriculture was always doubtful, very skeptical, as to the success of the experiment, and I think I am stating the situation correctly when I say that a year ago, previous to the appearing before it of the gentleman representing the bureau, the idea prevailed that no appropriation should be made and that the experiment should be stopped; but statements of the bureau made a year ago were very promising, to the effect that the plant could be operated successfully. It was stated that they were just on the point of success, and, relying upon that, an appropriation of $192,000 for this fiscal year was made. Now it is determined, everybody concedes that the thing is a failure. If we stop appropriating money we close up the business. What is to be done? Shall we continue the appropriation practically as it was before and let the thing run at a loss simply in order that it may be a going concern, with the prospect of getting a little more money than we would get if we stopped? It seems to me that all we ought to be asked to do is to appropriate a little money so that the property will not fall into decay. Let there be watchmen or somebody there to take care of it. I do not think it should be operated. It seems to me $25,000 will be enough. I appreciate the difficulty the committee labored under to know what to do with this white elephant the Government has on its hands at Summerland, Calif. Appreciating their difficulty, I hesitate to criticize their action in now recommending $150,000, but after listening to all that has been said, giving it more thought myself, I venture to differ from them. I think the expenditure of $150,000 during the coming fiscal year would be unnecessary and unwise and that all we ought to appropriate is simply enough to keep the thing in some decent shape, so that it will not materially depreciate, so that it may be kept in shape for sale. Therefore I offer as an amendment the sum of $25,000 instead of $150,000.

Mr. REAVIS. Mr. Chairman, will the gentleman yield?

Mr. McLAUGHLIN of Michigan. Yes.

Mr. REAVIS. I understood the gentleman to say that we should not operate the plant, but should prepare to close it, because it is a failure?

Mr. McLAUGHLIN of Michigan. Every day that it is operated the Government loses a large sum of money. Everybody acknowledges that it is a failure.

Mr. REAVIS. And yet the gentleman's amendment calls for an appropriation of $25,000 to operate the plant?

Mr. McLAUGHLIN of Michigan. That is the wording of the amendment offered by the gentleman from Minnesota [Mr. ANDERSON]. I do not quite approve of that, but what I am trying to do is to save money, and I would reduce the sum from $150,000 to $25,000.

Mr. SNELL. Can the gentleman inform the House how much money, all told, has been lost on this proposition?

Mr. McLAUGHLIN of Michigan. I understand that about three-quarters of a million dollars have been appropriated and spent, and $114,000 worth of product has been sold.

Mr. SNELL. The object of your amendment is simply to close it down as quickly as possible and make the loss as small as possible to the Government?

Mr. EVANS of Nebraska. Will the gentleman yield?

Mr. McLAUGHLIN of Michigan. Yes.

Mr. EVANS of Nebraska. Does the gentleman concede that the amount to be received from the plant, if sold, when not running, is accurately stated?

Mr. McLAUGHLIN of Michigan. I do not know. I think it is speculation on the part of all gentlemen who have talked about it. Nobody knows what that plant, conceded by everybody to be a failure, will bring.

Mr. HASTINGS. Why is it necessary to have any appropriation? If we lose the money, the sooner we sell it the better.

Mr. McLAUGHLIN of Michigan. This bill, if it becomes a law, will be operative only during the next fiscal year. I apprehend if we are going to direct something to be done during this fiscal year it might be subject to a point of order.

Mr. HASTINGS. If we do not make any appropriation for it, of course, there will not be any arrangement for it to be run after June 30. It is incumbent upon them to dispose of it before that time.

Mr. McLAUGHLIN of Michigan. It may be well to have some money in the hands of the bureau to take care of the property and keep it in some sort of shape available for sale, and let that sum be just as small as possible.

The CHAIRMAN. The time of the gentleman from Michigan [Mr. McLAUGHLIN] has expired.

Mr. JONES of Texas. Mr. Chairman, I offer an amendment to the substitute.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

Mr. JONES of Texas. As I understand, the substitute is to amend certain language in the Anderson amendment, and my amendment simply amends the substitute by striking out certain language.

Mr. ANDERSON. I make the point of order that another amendment is not in order at this time.

Mr. JONES of Texas. An amendment to the substitute is in order. The amendment of the gentleman from Minnesota [Mr. ANDERSON] reinserts the language of the bill, and a substitute is offered, and the substitute carries the language which I designate.

Mr. ANDERSON. Mr. Chairman, there can be but one amendment to an amendment pending at the same time.

Mr. JONES of Texas. I am offering an amendment to the substitute.

Mr. ANDERSON. Let us listen to the reading of the amendment and see.

The CHAIRMAN. The Clerk will read the amendment offered by the gentleman from Texas [Mr. JONES].

The Clerk read as follows:

Mr. JONES of Texas offers an amendment: Page 47, line 22, after the word "at," strike out "any" and insert in lieu thereof the word "some," and on page 48, line 1, after the word "authorized," insert the words "and directed."

Mr. ANDERSON. Mr. Chairman, I make the point of order that the portion of the bill to which the amendment is offered is not in the bill now, and the further point of order that there being one amendment to the amendment that I offered pending another amendment is not in order.

Mr. JONES of Texas. As a matter of fact, I do not think the gentleman had a right to offer the second amendment, but that has been passed over. The gentleman from Minnesota offers an amendment, and then he offers another amendment in which he includes the language which I mention. Now, another gentleman offered a substitute, the gentleman from Michigan [Mr. McLAUGHLIN], which leaves most of the language of both the amendments of the gentleman from Minnesota in the bill. In other words, it just reduces the appropriation. Now, I offered to amend the substitute, which substitute includes the language of both amendments, with the exception of the words that are specified and stricken out. I offered to amend that substitute by an amendment which strikes out certain language included in the substitute and those amendments.

Mr. ANDERSON. The substitute does not contain the language which the gentleman proposes to amend. You can offer it after the McLaughlin amendment is disposed of, but can not offer it now.

Mr. JONES of Texas. I beg the gentleman's pardon. The amendment of the gentleman from Michigan includes all language of both the amendments of the gentleman from Minnesota, except certain figures, which he strikes out. And so all that language is included. I do not insist on the page and line designation. But where the words occur in the Anderson amendment I offer a substitute to the substitute of the gentleman from Michigan, which carries the language. And the amendment to the substitute is in order.

The CHAIRMAN. As the Chair understands the gentleman, his amendment to the substitute refers to these various lines, but he has not referred to the lines of the bill, because those have been stricken out.

Mr. JONES of Texas. I did not have the lines, and I asked that the Clerk in reading not designate the lines at all, but just refer to the words in the substitute which are identified in that way.

The CHAIRMAN. The Chair does not want to preclude the gentleman from Texas from offering an amendment, but we seem in the condition that here is an amendment which the gentleman desires to offer, which does not have a proper place in the procedure at the present time, and the Chair feels the point of order made by the gentleman from Minnesota [Mr. ANDERSON] is well taken. Perhaps it will be possible for the gentleman from Texas to have his amendment considered at some other stage of the proceedings.

Mr. ANDERSON. Mr. Chairman, I rise to debate the amendment of the gentleman from Michigan. Of course, the gentleman from Texas can offer his amendment to the amendment I offered as soon as the amendment of the gentleman from Michigan is disposed of, and I hope the House will consider it, as it undoubtedly will.

The debate that has taken place this morning I think very clearly indicates the disposition on the part of the House to close up this proposition and get rid of it. I think it is the sense of the House to sell this plant. And the committee was of that opinion. The only other question that the committee considered was the question whether it was wiser to close up the experiment immediately at the end of this fiscal year and sell the plant for its junk value or allow the plant to run for six or seven months of the next fiscal year, during which time an attempt might be made to put it on a better commercial basis and sell it as a commercial proposition for its going value.

Mr. HUSTED. Will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. HUSTED. What reasonable prospect would there be of selling this plant as a going concern when it is admittedly a failure?

Mr. ANDERSON. The gentleman says it is admittedly a failure. I do not think it is.

Mr. HUSTED. That seems to be the general sentiment of the committee.

Mr. ANDERSON. That may be true; that may be the opinion of the committee. I think that so far it has failed to demonstrate the thing for which it was originally established, but I do not think it is a failure in the sense that it is not possible to demonstrate that thing within the next fiscal year. However, I was of the opinion that it was not desirable to appropriate for the entire fiscal year.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I should like to make a statement, but I will yield to the gentleman.

Mr. BLANTON. The gentleman said he did not think this was a failure. It might not be a failure in war time, but——

Mr. ANDERSON. I did not make quite that statement.

Mr. BLANTON. I understood the gentleman to say he did not think it was a failure, in reply to the gentleman from New York [Mr. HUSTED]. I want to say to the gentleman that in peace times a plant that had been running approximately three years and had cost the Government between $800,000 and $900,000 and had brought in just a little over $100,000—I would like to know how anything like that could be anything but a failure in peace times?

Mr. ANDERSON. Well, it was started as an experiment, and it has been necessary to work out these problems as we went along. It was not expected that the plant could be put upon a commercial basis immediately. All of these problems were new. The machinery for making it had to be developed out of thin air, as it were. Nobody had any idea of the method it was necessary to employ, except as might be gathered from general research along chemical and mechanical lines.

Now, then, as I said, there were three propositions to be considered:

One to drop the project at the end of the fiscal year and sell the plant; the next was to run it five or six months and try to dispose of the plant in that time; and third, to let it run the entire year, and then try to dispose of the plant at the end of the year. Those were the three propositions. As between the three the committee thought the wisest policy, taking everything into consideration, was to let the plant run for six months and in the meantime give the Secretary of Agriculture the power to dispose of it, and that is the proposition embodied in the amendment I have offered. The amendment of the gentleman from Michigan will result in the stoppage of the operation of the plant at the end of this fiscal year. It will thereafter only be maintained for the purpose of preventing depletion, and I suppose will have to be sold for its dismantled value.

Those are the propositions presented by the gentleman from Michigan and myself by the amendment he has offered and by the amendment I have offered. Mr. Chairman, I ask for a vote.

The CHAIRMAN. The vote now comes on the amendment offered by the gentleman from Minnesota, the second amendment he offered, an amendment to the amendment.

Mr. SUMMERS of Washington. Mr. Chairman, may we have the amendment reported?

The CHAIRMAN. Without objection, the Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. ANDERSON to the original Anderson amendment: Strike out "$208,500" and insert "$150,000," and add the following: "*Provided*, That at any time during the fiscal year 1922 or thereafter, when the Secretary of Agriculture shall determine that the interests of the Government will be subserved thereby, he is hereby authorized to appraise the buildings, machinery, marine equipment, kelp harvesters, boats, leasehold or contract rights, and all other property of whatever nature or kind appertaining to the experimental kelp potash plant of the Department of Agriculture situated at Summerland, Calif., and to sell the same at public or private sale, at such price or prices, on such terms, and in such manner as he may deem for the best interests of the Government, and in consummation thereof to execute such instruments of conveyance as may be requisite, the proceeds from such sale to be deposited in the Treasury to the credit of miscellaneous receipts."

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. ANDERSON. Mr. Chairman, does not the vote first come on the amendment offered by the gentleman from Michigan to this amendment?

The CHAIRMAN. While the Chair feels that the language of the amendment offered by the gentleman from Michigan indicates that it is in substance an amendment, he considered it as a substitute, for he thought the gentleman had so determined it when he offered it in order that it could be pending. The parliamentary situation is that an amendment has been offered to which another amendment has been presented. This precludes another amendment, and in order to get around that parliamentary situation the gentleman from Michigan [Mr. MCLAUGHLIN] offered his amendment as a substitute.

Mr. ANDERSON. I understood, as the Clerk read it, that the amendment of the gentleman from Michigan is simply to strike out "$150,000" from my amendment and insert "$25,000"; and if that is so his proposition was clearly an amendment and not a substitute.

The CHAIRMAN. That is undoubtedly the case. The Chair thinks the reason why the gentleman from Michigan offered it as a substitute was to avoid offering an amendment in the third degree.

Mr. ANDERSON. No point of order was made. The question should be on that amendment first, because if my amendment is agreed to the sum of $150,000 would be agreed to, and an amendment to change the amount would not be in order.

The CHAIRMAN. While the gentleman from Minnesota has stated the proposition correctly, the Chair feels he is bound by the practice of the House, which, as he understands it, would bring the vote first on the amendment to the amendment; second, on any amendment that might be offered to the substitute; third, on the substitute; and fourth, on the original amendment to the text. To remedy the situation the Chair, if the committee will permit, would suggest that by unanimous consent the order of voting on the amendments be altered so that the vote will come on the amendment of the gentleman from Michigan before the amendment of the gentleman from Minnesota. If this should be done the amendments will be disposed of in their proper sequence.

Mr. FESS. That can be done if the Chair decides that the amendment of the gentleman from Michigan is a substitute.

The CHAIRMAN. That is what the Chair did decide, but as the gentleman from Minnesota points out it will not clear the situation in the way intended, for it will make futile a vote on the other amendment in case his amendment prevails. The Chair feels a change in the order of voting is the best and quickest remedy.

Mr. SNELL. Mr. Chairman, I ask unanimous consent that we may vote on the McLaughlin amendment first. That would solve the situation, as it seems to me.

The CHAIRMAN. The Chair thinks that the best solution. The Chair will put the unanimous-consent request of the gentleman from New York [Mr. SNELL] that the vote be first taken on the substitute amendment offered by the gentleman from Michigan before the vote is taken on the amendment offered by the gentleman from Minnesota. Is there objection?

There was no objection.

The CHAIRMAN. The vote now comes on the amendment offered by the gentleman from Michigan [Mr. MCLAUGHLIN].

The question was taken, and the Chairman announced that the ayes appeared to have it.

Mr. ANDERSON. Mr. Chairman, I ask for a division.

The CHAIRMAN. A division is asked for.

The committee divided; and there were—ayes 44, noes 19.

So the amendment was agreed to.

The CHAIRMAN. The vote now comes on the second amendment offered by the gentleman from Minnesota, as amended by the amendment just adopted.

The question was taken; and on a division (suggested by the Chair) there were—ayes 69, noes 0.

So the amendment as amended was agreed to.

Mr. BLACK. Mr. Chairman, I offer a substitute for the amendment as amended.

Mr. ANDERSON. Mr. Chairman, I make the point of order that that motion is not now in order.

Mr. FESS. There is nothing now before the House.

Mr. BLACK. The amendment as amended must now be submitted to the House. Is it not in order, then, to offer a substitute?

Mr. BLANTON. The original Anderson amendment is before the House now, Mr. Chairman. The last vote was on the second Anderson amendment.

Mr. BLACK. I offer my amendment as a substitute for the original amendment as amended.

Mr. ANDERSON. I withdraw my point of order. That is correct, if it is a substitute to the whole proposition.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Texas [Mr. BLACK].

The Clerk read as follows:

Amendment offered by Mr. BLACK as a substitute for the amendment offered by Mr. ANDERSON as amended: "For the care and maintenance of the Government kelp plant at Summerland, Calif., $5,000: *Provided*, That at any time during the fiscal year 1922 or thereafter, when the Secretary of Agriculture shall determine that the interests of the Government will be subserved thereby, he is hereby authorized to appraise the buildings, machinery, marine equipment, kelp harvesters, boats, leasehold or contract rights, and all other property of whatever nature or kind appertaining to the experimental kelp potash plant of the Department of Agriculture situated at Summerland, Calif., and to sell the same at public or private sale, at such price or prices, on such terms, and in such manner as he may deem for the best interests of the Government, and in consummation thereof to execute such instruments of conveyance as may be requisite, the proceeds from such sale to be deposited in the Treasury to the credit of miscellaneous receipts."

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close at the end of seven minutes.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that debate on this paragraph and all amendments thereto close in seven minutes. Is there objection?

There was no objection.

Mr. BLACK. Mr. Chairman, I will not take up any time discussing the merits of the amendment, but will just simply explain to the House what the amendment is. The Anderson amendment as amended by the amendment from the gentleman from Michigan [Mr. MCLAUGHLIN] provides $25,000 for the operation of the plant in the fiscal year 1922. Now, my amendment changes that so as to provide $5,000 for its care and maintenance, so that the department can put a man out there to look after it and see that it does not deteriorate, burn up, or something of that kind. Then I use the same language as the Anderson amendment, and authorize the Secretary of Agriculture to go ahead and appraise the property and make a sale of it. Not only that, I have changed it, and make it apply to the rest of the fiscal year 1921, so that he can begin now to look for a buyer during the rest of this fiscal year and continue on until he sells the plant. That is the nature of the amendment, and that is all I wish to say.

Mr. JONES of Texas. I offer an amendment to the Black amendment by inserting, after the word "authorized," the words "and directed."

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Mr. JONES of Texas offers an amendment to the Black amendment to insert, after the word "authorized," the words "and directed."

Mr. JONES of Texas. The purpose of the amendment is clear. It is simply to direct the Secretary of Agriculture to dispose of this.

Mr. ANDERSON. The only result of that amendment would be to make it impossible for the Secretary of Agriculture to get anything for the plant, because everybody who knows he has got to sell it is not going to pay him much for it.

The CHAIRMAN. The question is on the amendment to the substitute offered by the gentleman from Texas [Mr. JONES].

The question being taken, the amendment was rejected.

The CHAIRMAN. The vote now comes on the substitute offered by the gentleman from Texas [Mr. BLACK].

The question being taken, the substitute was agreed to.

The CHAIRMAN. The vote now comes on the amendment offered by the gentleman from Minnesota [Mr. ANDERSON] as amended by the substitute just adopted.

The question being taken, the amendment as amended by the substitute was agreed to.

The Clerk read as follows:

For investigations of insects affecting deciduous fruits, orchards, vineyards, and nuts, $178,500.

Mr. SHREVE. Mr. Chairman, I move to strike out the last word. I do so for the purpose of asking the gentleman from Minnesota [Mr. ANDERSON], chairman of the subcommittee having the bill in charge, if the various activities in connection with the entomological service rendered to the various vineyards in the United States are taken care of in this bill?

Mr. ANDERSON. Oh, yes. The same amount is appropriated this year as in previous years, and in some instances increases have been made.

Mr. SHREVE. Back in the Sixty-third Congress I secured the passage of a bill providing for the service of an entomologist in northeastern Pennsylvania, in the heart of the Pennsylvania grape belt, and this was carried for a number of years, but I notice that in the last few years a number of these items have been dropped out. I just wanted to be satisfied that the great grape interests of Pennsylvania, New York, Ohio, California, and other States of the Union will be provided for under this bill.

Mr. ANDERSON. From time to time provisions have been made for investigation and control work in connection with various insects. The policy has been to cover these different provisions into the general item, which now carries all the money that is necessary for work of the character which the gentleman has in mind.

Mr. SHREVE. Then I understand that when some insect pest is discovered in any one of the vineyards, all we have to do is to send down to the Department of Agriculture and they will take care of it. Is that the idea?

Mr. ANDERSON. They have a man to send out for that purpose.

Mr. SHREVE. All right.

The CHAIRMAN. The pro forma amendment is withdrawn, and the Clerk will read.

The Clerk read as follows:

For investigations of insects affecting cereal and forage crops, including a special investigation of the Hessian fly and the chinch bug, $150,660.

Mr. WATSON. Mr. Chairman, I move to strike out the last word in order to ask the chairman of the committee if there is any appropriation in this bill providing for the investigation of the rose midge or the strawberry beetle? There are millions of dollars invested in rose culture, and I understand that the roses are destroyed by a midge and that an insecticide is desired to destroy the midge but not the flower. I would like to introduce an amendment to cover that without increasing the appropriation.

Mr. ANDERSON. I will say that there is ample authority in the general appropriations in the bill to do that work. If no additional money was provided the situation would not be changed at all in that respect.

Mr. WATSON. What part of the bill provides for the investigation of the rose midge? The many rose growers in my district are very anxious that an investigation be made, as it is not possible to destroy the midge without destroying the flower.

Mr. ANDERSON. The provision for doing that sort of work is carried now under the item for the investigation of insects affecting citrus and other tropical and subtropical fruits.

Mr. WATSON. Would that include insects indoors also?

Mr. ANDERSON. Yes; some work is now being done on the bug that the gentleman has in mind.

Mr. WATSON. Would the chairman of the subcommittee object to the introduction of an amendment to insert the words "strawberry beetle and insects indoors, including the rose midge"?

Mr. ANDERSON. It has no relation whatever to the item that has just been read.

Mr. WATSON. I do not know where else to put it, because there does not seem to be any place where it can be introduced.

Mr. ANDERSON. If it belongs in the bill at all—and I am not discussing that question now—it ought to be included on page 50, in the paragraph beginning on line 11—

For investigations of insects affecting citrus and other tropical and subtropical plants, and for investigations and control of the Mediterranean and other fruit flies, in cooperation with the Federal Horticultural Board, $51,500.

There is where it belongs, if it belongs anywhere in the bill.

Mr. WATSON. Then I withdraw my pro forma amendment.

The CHAIRMAN. The gentleman from Pennsylvania withdraws his pro forma amendment.

Mr. YOUNG of North Dakota. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 49, line 21, after the word "fly" insert the word "grasshopper", and in line 22, strike out the figures "$150,660" and insert in lieu thereof "$175,660."

Mr. YOUNG of North Dakota. Mr. Chairman, this amendment calls for an increase in this item of $25,000. I have been informed by the department that the appropriation item carried in this and former bills was never designed to cover the matter of grasshopper control or eradication, and that any money that has been used in the past for this purpose has been robbed from some other use for which the money was expected to be used.

Now, we have suffered in our State very seriously from this pest. In one county alone, Bottineau, there was promise of 4,000,000 bushels of wheat last year, and they did not market a single bushel of wheat in that county. The grasshoppers took the crop entirely. In some other counties the crop was almost entirely destroyed.

On June 18 a telegram was sent to the Secretary of Agriculture from the board of county commissioners of Bottineau County that read like this:

Bottineau County seeks immediate Federal aid in the sum of $100,000 for fighting grasshopper pest to save one of the most promising crops it has had for years. On account of three successive crop failures the available reserves of the county for this purpose, $50,000 in all, have already been exhausted. Considerable damage has already been done. Private individuals doing their best to combat the pest but outside help must be immediately sent if we are to save crop of hard spring wheat, estimated at 4,000,000 bushels. The expenditure of this money will be confined solely to purchase of material. All of the citizens of this county are engaged in this campaign and will bear the expense of distribution, mixing, spreading, and all other expense. Even the road funds of the townships have been diverted for this purpose. The Province of Manitoba, joining us on the north, are taking effective steps through provincial aid and are successfully combating the pest. Wire me the amount of money that the Federal Government is willing to contribute to this county for this purpose with authorization for its immediate use.

BOARD OF COUNTY COMMISSIONERS,
GEO. SIDINER, *Chairman.*

Mr. ANDERSON. How was that $50,000 expended?

Mr. YOUNG of North Dakota. Buying poison; not a dollar was used in hiring men to spread it. It was used entirely to buy poison, and the farmers themselves spread and used it.

The telegram received in reply to this telegram from the Secretary of Agriculture was that they had no appropriation and at that particular time they had no men available that they could send to North Dakota. Later on they sent a man from Oregon, but it was necessary to wait until he completed his work there and he did not arrive in North Dakota as soon as he should. I am not criticizing the department for the delay in getting him there; the department was doing the best it could with the means available. Now, I am hoping that the chairman of this subcommittee will not object to this moderate increase in this item.

The grasshopper pest is liable to strike any State at any time, and the time to fight it and resist it is when it comes and not afterwards.

Mr. McKENZIE. Will the gentleman from North Dakota yield?

Mr. YOUNG of North Dakota. Yes.

Mr. McKENZIE. Is it the purpose of this amendment to use this money in the purchase of some sort of insect powder or Paris green and scatter it over the country?

Mr. YOUNG of North Dakota. No; every dollar of it will be used to give these people who want to fight it a proper kind of leadership and a proper kind of instruction.

Mr. McKENZIE. What is the character of the instruction?

Mr. YOUNG of North Dakota. The instruction that they have been giving in the past is how to put out poison. Arsenic is the kind of poison used mixed with bran.

Mr. McKENZIE. Do the farmers buy the poison?

Mr. YOUNG of North Dakota. We are not proposing in the bill that the United States shall buy it, but we feel that if the Government of the United States will take hold of the question in each area, North Dakota, Illinois, or anywhere where it is reported, organize the farmers of each community and give them proper instructions, it will be of immense value to the farmers whose crops are threatened, and also of value to the people of the country whether living in cities, towns, or country districts.

Mr. McKENZIE. I am seeking information. The appropriation will be expended by hiring certain individuals to go out into North Dakota or Illinois and tell the farmers how to exterminate the grasshopper?

Mr. YOUNG of North Dakota. That is the proposition.

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in 15 minutes.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that all debate on this paragraph and amendments thereto close in 15 minutes. Is there objection?

Mr. BLANTON. Reserving the right to object, will the gentleman give me three minutes?

Mr. ANDERSON. I do not think we ought to take 20 minutes on this little matter of grasshoppers.

Mr. BLANTON. It may be a little matter to the gentleman from Minnesota because he does not have grasshoppers.

Mr. ANDERSON. Oh, yes; we have them in Minnesota, but we take care of them and without the aid of the Federal Government. Mr. Chairman, I will make it 18 minutes.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that all debate on this paragraph and all amendments thereto close in 18 minutes. Is there objection?

There was no objection.

Mr. STEENERSON. Mr. Chairman, I rise to support the amendment offered by the gentleman from North Dakota. I am familiar with the condition he speaks of. The grasshopper scourge in North Dakota was a very serious one last year and it came unexpectedly. That pest was not limited to North Dakota, for it extended into a part of Minnesota, into my district. In times past there have been various methods of fighting grasshoppers.

Away back in 1873 we had a serious grasshopper pest throughout the whole of the Red River Valley, extending clear down into the district of the gentleman from Minnesota [Mr. ANDERSON], the chairman of this subcommittee. They then invented what was called a "hopper dozer," which consisted of a long, narrow piece of sheet iron, with a wire attached to each end; it was bent upward on the back, so as to resemble a shovel, but something like 24 feet long. This was filled with coal tar. They would hitch a horse to that and drag it over the field and the grasshoppers would jump into it and stick in the tar, and when it was filled they would burn them. The late Prof. Luger, entomologist of the University of Minnesota, was the designer of the instrument. They discovered later on that they had more success fighting grasshoppers by watching the time when the eggs were being hatched out and plowing the ground at the right time, thereby destroying the young. There may be other methods that may be developed by scientific investigation which will be more effectual. I think it is worth while to spend $25,000 on this particular pest in order that we may fight it more successfully.

This item includes special investigation of the Hessian fly and the chinch bug, but the Hessian fly and the chinch bug, so far as the hard-wheat region of the Northwest is concerned, are not very serious pests. They may be of some local significance, but the grasshoppers cover a very large area when they do come, and they are a hundred times more serious and destructive in their ravages than the Hessian fly or the chinch bug. For that reason it seems to me that the amendment offered by the gentleman from North Dakota [Mr. YOUNG] has great merit. I know from personal knowledge, talking with people who were in North Dakota through last year, who lost all of their crops, that they suffered great loss. They had the most promising crop of wheat ever known, which would have yielded from 25 to 30 bushels to the acre if allowed to mature. It was totally destroyed, and some of the families that I personally know had to leave the region by reason of the destruction of their crops.

Mr. CLARK of Missouri. Mr. Chairman, will the gentleman yield?

Mr. STEENERSON. Yes.

Mr. CLARK of Missouri. Has anybody ever discovered any remedy for the grasshopper?

Mr. STEENERSON. We have discovered the methods that I have just spoken of.

Mr. CLARK of Missouri. I know, but do they get away with the grasshopper?

Mr. STEENERSON. I was just explaining that one way is to plow the ground when the eggs are ready to hatch. They are then exposed and they are then destroyed. Another method is to kill them after they are mature. Undoubtedly by scientific investigation we may find more effective methods. But even with present methods the hoppers have been fought with some success.

Mr. CLARK of Missouri. Did the gentleman ever observe a big field of corn when the chinch bugs were at work?

Mr. STEENERSON. I certainly have. I have seen the chinch bugs both in the wheat and in the corn. They are not so serious with corn as they are with wheat.

Mr. CLARK of Missouri. Well, they clean it out.

Mr. PARRISH. Mr. Chairman and gentlemen of the committee, I appeared before the subcommittee framing the Agricultural bill in support of this item, and requested that some provision be made by which the Department of Agriculture would have authority and funds to investigate and direct the forces necessary to exterminate the grasshopper wherever it may appear. I am therefore very much interested in the adoption of the amendment offered by the gentleman from North Dakota [Mr. YOUNG] for the reason that in the western part of the State of Texas grasshoppers in large numbers invaded the farms and destroyed a large portion of the crops in at least five counties in my district. If a force had been organized in advance to fight this pest, the people of my district and the surrounding districts in my State would have been saved many

thousands of dollars. In my candid judgment the assistance of the Department of Agriculture would have avoided very much of the loss that our people sustained last year.

Mr. MADDEN. Will the gentleman yield?

Mr. PARRISH. Yes.

Mr. MADDEN. What sort of relief does the Government grant, or can it grant?

Mr. PARRISH. In reply to the gentleman from Illinois, I will say that the plan is simply this:

The Department of Agriculture will place into the infested areas in charge of this work a sufficient force to perfect an organization of the farmers themselves, advising them where they may obtain the necessary poison and cooperate with them in uniformly prosecuting this work.

Almost without warning great numbers of these insects invade certain sections of the United States, and unless there is cooperative effort one man can not save his crop from destruction; but if the work is taken in hand in due time under the supervision and direction of scientific men, such as the Department of Agriculture can and will furnish if allowed sufficient funds, the damages usually wrought by these pests will be almost, if not entirely, averted. The grasshopper is not a respecter of county lines, or of State lines for that matter, but have been known, especially in the seventies, to overrun in multitudinous numbers large sections of the country. In 1917, under the appropriation for the stimulation of agriculture provided by Congress, specialists from the Department of Agriculture, by means of a survey, discovered that the eggs of grasshoppers existed in enormous numbers in certain parts of Kansas, and plans were immediately laid to combat the pest. Winter meetings were held throughout the infested regions, and I am informed by the Department of Agriculture that plans were matured for the purchase of materials in sufficient quantities to meet the approaching emergency. This campaign resulted in the distribution of 36,000 pounds of white arsenic and 366 tons of wheat bran used in making poisonous bait and was distributed in eight counties in the State of Kansas. The result of this cooperation meant the saving of 113,000 acres of wheat and 100,000 acres of alfalfa, which in terms of dollars and cents is estimated at $5,500,000. Similar work, perhaps of a lesser magnitude, was done in California, Nebrasks, Arizona, Oregon, Washington, and especially in North Dakota. During 1918–19 in the State of North Dakota a great campaign was inaugurated under the direction of the Department of Agriculture, resulting in the distribution of some 3,000,000 pounds of poison bran, paid for by the farmers themselves at a cost of about $600,000, the cost to the Federal Government amounting in that instance to but a few thousand dollars, and the State officials of that State estimated that about $10,000,000 worth of crops were saved from destruction.

The States most often visited by this pest are Texas, Oklahoma, Kansas, Nebraska, North and South Dakota, Montana, Oregon, Washington, California, Arizona, and New Mexico, although serious outbreaks have been known to occur in the regions where there is more moisture, and even in the New England States.

From these facts—and I give the Department of Agriculture as authority for them—it will be readily seen that with the investment of a little money a large net saving will result to the American people, and perhaps no appropriation carried in this entire bill will return more real benefit to the farmers and producers of this Nation than the item of $25,000 asked for in the amendment offered by the gentleman from North Dakota. I therefore express very earnest and sincere hope that the amendment will be adopted and that this small sum at least will be placed in the hands of the proper officials to aid the farmers, who already are face to face with many discouraging, disheartening, and perplexing problems.

Mr. BLANTON. Mr. Chairman, I am heartily in favor of the amendment offered by the gentleman from North Dakota [Mr. YOUNG]. During the past summer I had occasion to go through Throckmorton County, in Texas, formerly in the district of my colleague Mr. JONES, but now in the district of my colleague Mr. PARRISH. Along the valley of the Clear Fork of the Brazos River I saw fields of corn with stalks higher than the head of a man on horseback, with the remains of what were two and sometimes even three large ears on a stalk, and every single stalk was stripped of every bit of foliage and every vestige of corn was eaten off right down to the cob by grasshoppers, not a thing left of them, just the stalks stripped bare and every little bit on it that could be devoured by a grasshopper was eaten. I saw whole orchards in Throckmorton County that men had spent 10 and 12 years in developing—splendid, fine trees—where the grasshoppers had eaten every leaf and twig, where they had eaten the peaches right down to the seed, which was left hanging on the limb, and they had also eaten the apricots down to the seeds on the limb and had so eaten the bark on those fruit trees until every tree died and until orchard after orchard was absolutely destroyed—destroyed in just two or three weeks' time by these millions of grasshoppers that came from no man knows where.

Well, if that can happen in Throckmorton County, Tex., in the district of my colleague Mr. PARRISH, it can happen all over Texas; it can happen all over North Dakota; it can happen in Minnesota, or it can happen in Missouri, and elsewhere in the United States. And while we are spending money so freely in combating the things that menace agriculture, I think it is as little as we can do to spend this small sum in combating the grasshopper menace. And I am in favor of the amendment.

Mr. ANDERSON. Mr. Chairman, the grasshopper is an emergency proposition. He appears in some years and does not appear in others. There is no way of telling when he is going to appear. There have been worked out new methods by which the outbreaks of grasshoppers, if taken early enough, can be controlled. It is now simply a question of applying the methods that have already been worked out, and that is a matter which I think ought to be done by the States in the counties in which these outbreaks take place. It is merely a question of putting out a poisoned bait, which the grasshoppers eat and which destroys them. There is some advantage in having a leadership in this work, and there have been cases in which the Bureau of Entomology has furnished the experts necessary for this sort of organization. It may be that there will be outbreaks of the grasshopper next year and that some organization and the use of some men from the department may be desirable, but I do not think it is necessary to appropriate $25,000 for this purpose. That sum seems to me out of all proportion to what the Federal Government ought to be required to do. I do not feel justified in consenting, so far as I am concerned, to an appropriation of $25,000 for this purpose.

Mr. FESS. Will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. FESS. Is it not the gentleman's view that if we recognize this now as a function which we ought to undertake next year that we will have an increased demand for the work in the years to come, and that we are starting a movement that will not stop if Congress takes this action?

Mr. ANDERSON. I think it might be desirable to make a small appropriation if there was a way to confine this thing. But I do not think it is necessary, on the basis of a possible outbreak of grasshoppers next year, to appropriate $25,000.

Mr. FESS. This is a method by which these bills are largely increased from year to year.

Mr. ANDERSON. Yes.

Mr. RAMSEYER. Do I understand the gentleman to say the Government has discovered a poison or bait with which to kill off the grasshoppers when they invade a territory like the gentleman from Texas mentioned?

Mr. ANDERSON. There are means of control which have been discovered and which can be used at the beginning of the outbreak, and which will destroy the grasshopper.

Mr. RAMSEYER. The Department of Agriculture has the information available and will give it to any section of the country that may want it on a moment's notice?

Mr. ANDERSON. Yes.

Mr. YOUNG of North Dakota. I presume the information was sent to the chairman, as well as to the gentleman from Texas, showing it to be the policy of the department to confine this to expert direction. None of it will be used to buy the poison.

Mr. ANDERSON. I have not seen a copy of the letter which the gentleman refers to. But in any event I do not feel it is necessary to appropriate $25,000 for this purpose.

Mr. RAMSEYER. Can this poison that will kill the grasshopper be bought at any drug store?

Mr. ANDERSON. As to that I can not say. Of course, it is to some extent a matter of method and a matter of using the bait effectively. It can be used in such a way as to be absolutely useless.

Mr. RAMSEYER. Does it take an expert to apply it to grasshoppers?

Mr. ANDERSON. I think better results would come from the utilization of expert advice and experience. I am trying to be entirely frank with the gentleman and with the House. Of course, it is no more to me than to other gentlemen as to what is done in respect to this item.

Mr. RAMSEYER. I am asking for information. Of course, it is new to me, as to many other Members of the House.

Mr. ANDERSON. I do not think it is necessary to appropriate $25,000.

Mr. RAMSEYER. Does the gentleman think it necessary to appropriate any amount?

Mr. ANDERSON. I do not object to a moderate amount for this purpose.

The CHAIRMAN. The time of the gentleman has expired. The question is on the amendment offered by the gentleman from North Dakota [Mr. YOUNG].

The question was taken, and the Chair announced that the ayes seemed to have it.

Mr. ANDERSON. Mr. Chairman, I ask for a division.

The committee divided; and there were—ayes 32, noes 23.

Mr. KEARNS. Mr. Chairman, I ask for tellers.

Tellers were refused.

So the amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For investigations of insects affecting citrus and other tropical and subtropical plants, and for investigations and control of the Mediterranean and other fruit flies, in cooperation with the Federal Horticultural Board, $51,500.

Mr. WATSON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Pennsylvania offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. WATSON: Page 50, line 12, after the word "plants," insert "strawberry beetle, insects indoors, including the rose midge."

Mr. WATSON. Mr. Chairman, I now offer an amendment, because the chairman of the committee advised that this is the proper section. It seems that every insect and every bug mentioned in the dictionary is placed in this bill, with the exception of the bugs that I have named. They have been in this country a sufficient time to be naturalized.

These particular insects also should be investigated. There is no item and no section in this bill providing for the investigation of indoor insects, and if the rose grower or those who cultivate flowers under glass should ask for an investigation regarding insects indoors there is no provision provided in this bill. The appropriation is not increased by my amendment. It would be an advantage to the rose grower and the greenhouse florist to have this amendment favorably acted upon.

Mr. ANDERSON. Mr. Chairman, it is wholly unnecessary to designate the particular bugs which are designated in the amendment offered by the gentleman from Pennsylvania [Mr. WATSON]. The language as it is now in the law is sufficiently broad to permit investigations of the character which he has in mind, and I can see no good purpose which would be served by including the language which he suggests.

Mr. WATSON. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. WATSON. Is there any provision here for making investigations concerning insects indoors?

Mr. ANDERSON. The very insect that the gentleman is asking to have investigated has been investigated under this item.

Mr. WATSON. I understood the rose midge has never been investigated.

Mr. ANDERSON. Oh, yes.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Pennsylvania [Mr. WATSON].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

Mr. PARRISH. Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Preventing spread of moths, Bureau of Entomology: To enable the Secretary of Agriculture to meet the emergency caused by the continued spread of the gypsy and brown-tail moths by conducting such experiments as may be necessary to determine the best methods of controlling these insects; by introducing and establishing the parasites and natural enemies of these insects and colonizing them within the infested territory; by establishing and maintaining a quarantine against further spread in such manner as is provided by the general nursery-stock law, approved August 20, 1912, as amended, entitled "An act to regulate the importation of nursery stock and other plants and plant products, to enable the Secretary of Agriculture to establish and maintain quarantine districts for plant diseases and insect pests, to permit and regulate the movements of fruits, plants, and vegetables therefrom, and for other purposes," in cooperation with the authorities of the different States concerned and with the several State experiment stations, including rent outside of the District of Columbia, the employment of labor in the city of Washington and elsewhere, and all other necessary expenses, $400,000.

Mr. BLANTON. Mr. Chairman, I reserve a point of order on the paragraph.

Mr. RAKER. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from California moves to strike out the last word.

Mr. RAKER. Mr. Chairman, under the act approved August 20, 1912, and the amendment placed on the last Agricultural appropriation bill in regard to this matter how does the department work that out? Is it working out with good effect?

Mr. ANDERSON. The committee did not go into that proposition at all. I can not answer the gentleman's question.

Mr. RAKER. One other question: Where is the large destruction that is taking place by the gypsy and the brown tail moth?

Mr. ANDERSON. I understood that new infections are in New Jersey and New York.

Mr. RAKER. And this was caused by imported stock?

Mr. ANDERSON. Originally; yes.

Mr. RAKER. I thank the gentleman.

I just want to call the attention of the committee to this item. I think it is a justification for other items which follow. This is all for privately owned land and trees in these particular States to protect their privately owned forests. It was caused by virtue of allowing one or two importers, who had only as the largest amount of their investment from $60,000 to $100,000 involved, but millions of dollars' worth of property has been destroyed, trees that were historic in those States had to be cut down, and the Government is trying to protect those trees of the Eastern States by providing the spray test, and so forth.

Following this, when the first appropriation went on, Congress passed the nursery stock quarantine act, and then a very substantial amendment was passed on the last agricultural appropriation bill. The only mistake in the original bill was that it did not require the fumigation of the imported plants and stock, as it does on interstate shipments and interstate trade. Under the law a man now has to mark on his package to whom he is going to send his nursery stock and what it is, and then it is sent to a station, and there, if they find any insects on it, it is fumigated, and if they can not cure it he is notified and it is destroyed.

This whole industry in the East, the tree industry, was infected by this importation. I just wanted to call the attention of the committee to this item, as there is another item going to follow relating to the industry of 17 Western States, where but a small appropriation has been given heretofore, but where hundreds of millions of dollars' worth of property is involved, and where we ought to give the Government protection, and give this wonderful bureau an extension not only in the East but in the West, and apply the same remedies in one place as we apply in the other.

I am speaking now in defense of the item relating to the destruction of predatory animals and rodents, hoping that the committee, when we come to that item, will place a sufficient amount on the appropriation bill, so that the great live-stock industry and the agricultural industry of the West may be given some care and consideration by the experts who have been doing such splendid work along this line heretofore, to the end, first, that hundreds of thousands of acres of lands planted by the farmers may not be destroyed by being overrun with rodents, and at the same time that the stockman, who has given his time and attention to his herd, may not have it destroyed by the predatory animals, and third, that those animals that have been raised and reared in the forest reserves and have become infected with rabies and thereby destroyed.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. RAKER. Mr. Chairman, I ask unanimous consent to proceed for two minutes additional.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. RAKER. Up until the last year—and to some extent it is breaking out again—there was a disease among the coyotes and other wild animals known as rabies. That has spread all over the country. The amount appropriated was not sufficient. The Health Service of the Federal Government came to the aid of those Western States. The States that always have an emergency fund of this kind used up their emergency fund, as well as various counties, so that the amount of increase requested by the Biological Survey for that kind of work ought to be given, so that the work that has been started and has been in operation for the last six years may be continued in its efficiency, so that results may be had, and we shall not be sliding back instead of going ahead, as we ought to.

The CHAIRMAN. The gentleman from California asks unanimous consent to revise and extend his remarks. Is there objection?

There was no objection.

Mr. DAVEY. I move to strike out the last word. I wish to suggest for the consideration of the House a few thoughts in connection with the whole subject of insects and their spread and the means of controlling them. As I have listened to some of the remarks made here to-day, I have wondered whether some of the Members of the House realize the gigantic importance of this proposition. In the original condition of America we had the forests and all the natural relations of the various forms of life. We had the insect-eating birds, and they had their homes in the forests, so that nature maintained a nice balance between the various conflicting forms of life. The subjugation of America by the processes of civilization has changed the original order of things. To a large extent we have destroyed the natural balance that existed, the thing which nature designed to maintain the proper relation between the various forms of life. To a large extent we have destroyed the habitations of the insect-eating birds, and therefore we have destroyed to that degree the power of nature to control by natural means the spread of insects. Moreover, the importation of large quantities of nursery stock—a desirable thing, but which has been conducted under rather careless conditions in the past—has brought into this country many new insects and plant diseases. I might refer briefly to that common pest known as the San Jose scale. According to the best information, it was brought from China. Under its natural conditions there it was held down and did comparatively little harm; but here in America, where it thrives so rapidly, it has no natural enemies. Therefore we must adopt artificial means to control it. I wish that the Members of the House would recall instances that they have witnessed in the last 15 or 20 years where whole orchards have been wiped out because of this insect, the San Jose scale. And then, I wish to call the attention of the Members to the fact that to-day orchards can be preserved and are preserved against this pest, and all because science has done its job, and a big one. The work of the Bureau of Entomology and kindred institutions has made it possible to save to the Nation its great apple industry by working out the means of effective control of this insect enemy. The reference that has been made to experts here this afternoon struck me as rather harsh, because I have seen the services rendered to my country by scientists. I do not pose as a scientist myself, but I have observed their work and the results of it. This Bureau of Entomology in its various activities is one of the most important and vital in the whole Government service. And let me say this, gentlemen, that if the insects were left uncontrolled, it would be only a short time until they could wipe out all vegetation. Human life itself depends absolutely upon the existence of vegetation. The Bureau of Entomology, dealing with insect enemies of trees and vegetation, also deals indirectly with the continuation of human life.

I have in mind the next paragraph, pertaining to the corn borer. I doubt if very many whose attention has not been called directly to this pest realize its dangerous character. It is an insect of foreign importation. It was first observed in New England, and it has done such terrific damage that every scientific man is alarmed. It is spreading westward, and if the corn borer ever strikes the great corn belt of the West, you may say good-bye to one of the greatest industries of America, the growing of corn. I wish that it might be possible for me to carry home to the Members of this House the utter importance, the vital necessity of granting adequate appropriations to this Bureau of Entomology. [Applause.]

The CHAIRMAN. Does the gentleman from Texas make the point of order?

Mr. BLANTON. I withdrew the point of order, Mr. Chairman.

Mr. ANDERSON. I ask unanimous consent that all debate on this paragraph and all amendments thereto do now close.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that all debate on this paragraph and all amendments thereto be now closed. Is there objection?

There was no objection.

The Clerk read as follows:

Total for Bureau of Entomology, $1,574,940.

Mr. OSBORNE and Mr. WHITE of Kansas addressed the Chair.

The CHAIRMAN. The Chair recognizes the gentleman from California [Mr. OSBORNE].

Mr. OSBORNE. I move to strike out the last word.

Along the line which has been so interestingly and strikingly discussed by the gentleman who preceded me [Mr. DAVEY] in regard to insect pests, I wish to say that I presume many Members of the House are familiar with the ravages of the white cottony cushion scale, which attacks citrus trees. About 40 years ago this scale attacked the orange groves of California. As its name indicates, it is in the form of an animate little white cushion, which attaches itself to the bark of the citrus tree, and inside it there are hundreds of thousands of little eggs. These hatch out and produce further cushions. I can remember very well the first time I looked into the matter over 35 years ago. I went into what was then the largest and oldest orange orchard in southern California—the Woolfskill orchard, in the city of Los Angeles. This cottony cushion scale had covered the trees, so that they looked as though there had been a snowstorm, and they took the life out of the tree. Some men of scientific attainments went to Australia and brought back a parasite, a sort of ladybug, one stage of the cycle of whose life was in the form of a little grub. These grubs would work under the cottony cushion scale and, possessed of a voracious and insatiable appetite, they would eat out the eggs. That ladybug actually eradicated this white cottony cushion scale in a very short time, which otherwise would have destroyed every orange tree in California. It was perfectly apparent that the orchards were doomed until this parasite was introduced. It was one of the most remarkable instances of the preservation of a great industry by the scientific introduction of a parasite adapted to the purpose that has occurred in this country. Nowadays the parasite has disappeared. Once in a while, however, there will be a recrudescence of the cottony cushion scale. Very soon after the parasite appears on the scene and attacks the scale and cleans it all up. It is one of the most wonderful things in nature that ever has come to my attention. I presume, however, that I am saying nothing new in calling it to the attention of Members.

Mr. WHITE of Kansas rose and was recognized by the Chair.

Mr. ANDERSON. I ask unanimous consent that all debate on the pending paragraph and amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that all debate on this paragraph and all amendments thereto close in five minutes. Is there objection?

Mr. DAVEY. Reserving the right to object, will the gentleman make that 10 minutes?

Mr. ANDERSON. No. We are not making any progress on the bill; and while I desire to give gentlemen all the time possible to discuss items of the bill, we must make some progress. We have been over four days on the bill.

Mr. DAVEY. Yes; but the gentleman will perhaps concede that this is of some importance.

Mr. ANDERSON. We have passed the corn-borer item. We have read out the total for the Bureau of Entomology. We have passed the corn-borer paragraph.

Mr. WHITE of Kansas. Is it too late to discuss it?

Mr. ANDERSON. I have no objection to the gentleman asking questions.

Mr. DAVEY. A parliamentary inquiry, Mr. Chairman. Is the corn-borer paragraph, line 4, page 52, subject to amendment?

The CHAIRMAN. We have passed that part of the bill.

Mr. BEGG. Mr. Chairman, I think the Chairman is in error. The gentleman from Kansas rose at the conclusion of the reading of that paragraph, but the reader read on and read the totals for the Bureau of Entomology. No man could humanly get recognition before he read it. I do not think that is fair to cut a man off on that kind of a ruling. I am not interested and do not want to make a speech, but I think the gentleman ought to have the right to offer an amendment.

Mr. WHITE of Kansas. I understand, Mr. Chairman, that I have been recognized by the chairman.

The CHAIRMAN. The gentleman from Kansas is recognized for five minutes.

Mr. WHITE of Kansas. I would like to ask the chairman of the committee how long the corn borer has been ravaging the cornfields of that section of the country where it now exists.

Mr. ANDERSON. As far as we know, it probably came into the country in 1909 or 1910, but it was not discovered that the borer was an imported insect until 1917, when the discovery was made in Massachusetts in the vicinity of Boston.

Mr. WHITE of Kansas. Predicating my remarks on the inquiries of the gentleman from Ohio [Mr. DAVEY], I want to state to the committee my recollection was that this item was stricken out a year ago. A member of the committee informed me that it was reduced.

Mr. ANDERSON. That is not correct.

Mr. WHITE of Kansas. I want to state to this committee that in my section of the State of Kansas, and throughout the State,

the corn borer, a root worm very much like this and which, I believe, is identical with it, has infested the cornfields of Kansas and Nebraska and Iowa periodically for 40 years. It is met successfully and only so through the alternation of crops. It looks exactly like this corn borer. I thought it possible and entirely probable that it was the same insect that has been discovered in the cornfields of the New England States. I may be in error. I have no purpose to move to strike out the paragraph, but I am disposed to think from what I have heard of the ravages committed that the efforts of the department to eradicate it have been futile and will continue to be so until they thoroughly understand the habits of the insect, and that it can be met by the alternation of crops, as it is in many parts of the West.

Mr. ANDERSON. This worm appears mostly at the root or lower part of the stalk and bores into the corn and destroys it. They also come up into the ear. I understand that the investigations have been made in both Kansas and Iowa of the particular bug that the gentleman is talking about. That is a bug that has been in the country for many years. It is not the same bug that has been found in Massachusetts. The one found in Massachusetts is an imported bug or worm that came into the country as we think in 1909 or 1910. The two worms are not the same at all.

Mr. MURPHY. Mr. Chairman, I ask unanimous consent that the gentleman from Ohio [Mr. DAVEY] may have 10 minutes.

The CHAIRMAN. The gentleman from Ohio asks that his colleague [Mr. DAVEY] be allowed to proceed for 10 minutes.

Mr. ANDERSON. Mr. Chairman, the gentleman from Ohio can get time in the regular way, and therefore I feel constrained to object.

The CHAIRMAN. The Chair wishes to say that he has no desire to cut off anyone from offering an amendment, and while the Clerk has read a line beyond the paragraph mentioned, the Chair recognizes that the gentleman from Ohio was on his feet to get recognition, and the Chair will now recognize the gentleman from Ohio [Mr. DAVEY] to offer an amendment.

Mr. DAVEY. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 52, line 3, after the word "expenses," strike out the figures "$275,000" and insert in lieu thereof "$500,000."

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and amendments thereto close in 10 minutes.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that all debate on this paragraph and amendments thereto close in 10 minutes. Is there objection?

There was no objection.

Mr. DAVEY. Mr. Chairman and gentlemen, I hope that it may be possible for us to view all problems of this kind in a national sense. The European corn borer does not at present threaten the district which I represent, but it does threaten the great eastern section of this country, and if it is not controlled it will threaten the entire Nation. I am in full accord with the policy of retrenchment in expenses. It seems to me that nothing could be more necessary and advisable than saving money on the part of the Government at the present time. But there are places where apparent economy may be a most foolish thing and may be of the most expensive character, and this I think is one of them. Your country and mine faces an emergency with reference to the imported and highly dangerous insect—the corn borer. Scientists tell me that it is spreading faster and faster, having started in New England, and is now moving westward through New York State. They find it here and there. It absolutely destroys the corn that it attacks.

It is my earnest hope that I may emphasize the utter importance of doing something to stop it now. Every year that you postpone this thing will make it more dangerous and more expensive. You gentlemen from the great corn belt would better take heed. This insect, if it ever strikes the corn belt of the United States, will practically wipe it out.

I want to give testimony to the great value of the Government work in connection with all insects of economic importance. I remember studying some years ago a Government bulletin with reference to the elm-leaf beetle. The subject was covered in the most simple and understandable language. It told the life history of the elm-leaf beetle, told its habits, and gave a remedy for it. That was the result of Government appropriations to find out by investigation its life history and the time and means by which it could be best controlled. It was there just as clear as day for the benefit of the people of the Nation, and if they wished to control the scourge that was then sweeping over the entire eastern part of the country they could do it by simple measures.

That is one phase of the work, but this matter of the corn borer is another thing; it is an emergency; and I understand that the department has asked for $400,000. I imagine that if they told you what is in their hearts they would ask for a million dollars, knowing as they do the terrific danger that threatens this country from the spread of this insect enemy.

Mr. HUSTED. Mr. Chairman, will the gentleman yield?

Mr. DAVEY. Yes.

Mr. HUSTED. Has the Government ever effectively controlled any insect pest?

Mr. DAVEY. Does the gentleman mean by that, exterminated it?

Mr. HUSTED. I mean brought it under control so that it would cease to be a serious menace?

Mr. DAVEY. I would say yes to that.

Mr. HUSTED. But the gentleman is in some doubt about it?

Mr. DAVEY. On the broad basis, no. It is difficult to absolutely eradicate, but I referred a little while ago to the San Jose scale. The Government has shown the way whereby that scale may be controlled and the orchards of this Nation are saved by virtue of the work done by the Government. The great State of Massachusetts has very largely controlled, although it has not exterminated, the brown-tail and gypsy moth. There are many other insects which the Government has shown the way to control—where they have actually worked out the methods of control and given the facts to the Nation broadcast.

Mr. HUSTED. Is it not a part of experience that those things come and go even without any particular effort as to eradication? They come some years and last for a year or two, and then pass away, and other things come to take their places, various forms of blights and pests.

Mr. DAVEY. Yes. The chestnut blight, for instance, eradicated itself after it had eliminated the chestnut trees. It destroyed the chestnut trees of the eastern part of this country.

Mr. HUSTED. And the Government did nothing to check it?

Mr. DAVEY. The Government started too late, and perhaps it could not have accomplished anything in that case, anyway; but here we have a sudden emergency and I am pleading for enough money to handle it.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. ANDERSON. Mr. Chairman, the gentleman from Ohio [Mr. DAVEY] is unquestionably well informed upon the general question of insect pests, and the means and methods for controlling them; but I think he has perhaps not gone into this particular question. This insect was originally imported, it was thought, into this country in 1909 in shipments of broom corn. These shipments were made quite broadly over the United States, but for the most part in the New England States and in the State of New York. The presence of the pest and its European origin was not discovered until 1917, when it was discovered in Massachusetts. Shortly after that another infestation was found in the vicinity of Albany, N. Y. Appropriations were made by the State of New York and the State of Massachusetts for its eradication, and a very large appropriation was made by the Federal Government. It was thought at that time that the expenditure of considerable sums of money and a very energetic course of action on the part of those in charge of the work might result in wholly eradicating the pest. Eradication work was, however, not very well conducted.

Mr. RUBEY. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. Not now. An attempt was made to eradicate the insect in the middle of the infested area. Of course, if that had been accomplished it would have been of very little use because the section would immediately have been reinfested from the outside.

Mr. DAVEY. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I prefer first to finish my statement. Eradication measures were not successful. Within the last year new infestations have been found in western New York in the vicinity of Buffalo and across the river in Ontario. It is perfectly clear now, I am told by the authorities in the Department of Agriculture, that it is not going to be possible to eradicate this pest in the New England States.

The proposition, therefore, resolves itself down into three classes of work—investigational work for the purpose of determining methods of growing corn notwithstanding the pest, including studies of its life history, the introduction of its natural enemies from the sections of Europe from which it came, and, thirdly, the quarantining of the sections in which it now is, in order that it may not spread into the corn-belt section of the country.

I went into this matter to a considerable extent, because I appreciate the importance of the insect and I appreciate what

it may do if it gets into the corn belt of the country; but my investigation into the matter led me to the conclusion—and I am supported in that conclusion by gentlemen who rank very high in the Department of Agriculture—that the sum of money which we have appropriated is amply sufficient to put into effect the control measures which are necessary in order to keep these insects in the section where they now are. If we were to undertake to exterminate—and I do not believe it is possible to exterminate it in this area—we would have to appropriate not only the $500,000 the gentleman from Ohio [Mr. DAVEY] proposes, or the million dollars that he suggested, but much larger sums. I think we ought to appropriate the sums necessary to do the things that are humanly possible to do in controlling this insect, but I do not think we ought to appropriate another dollar beyond that sum. The work which it is necessary to do in investigating the life history of the pest and the methods of controlling the insect in the sections where it is are provided for under other items of the bill, as is also the proposition for importing its natural insect enemies. The only purpose for which we can spend money properly from now on is in quarantine measures and measures of control directed toward keeping the insect in the localities in which it is now established. I hope the amendment will not be agreed to.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Ohio.

The amendment was rejected.

The Clerk read as follows:

BUREAU OF BIOLOGICAL SURVEY.

Salaries, Bureau of Biological Survey: Biologist, who shall be chief of bureau, $4,000; chief clerk and executive assistant, $1,800; administrative assistant, $2,250; executive assistant, $1,800; executive clerk, $1,980; clerks—3 of class 4, 6 of class 3, 1 $1,500, 14 of class 2, 1 $1,260, 15 of class 1, 2 at $1,100 each, 1 $1,080, 3 at $1,000 each; preparators—1 $1,200, 1 $900; photographer, $1,500; game warden, $1,200; messenger, $720; messenger boys—1 $600, 1 $480; laborer, $720; 2 charwomen at $240 each; in all, $81,070.

Mr. RUBEY. Mr. Chairman, I move to strike out the last word. I do that for the purpose of going back and discussing the corn-borer item. I was opposed to the amendment offered by the gentleman from Ohio [Mr. DAVEY] and I want to express my views on that question.

A year ago when we had the appropriation bill in this House I offered an amendment for an appropriation for the sum of $500,000 to be spent in eradicating this corn borer. That amendment did not pass in the House, but it went on in the Senate. I want to say, Mr. Chairman, that I have studied carefully the reports made by the Department of Agriculture and the work they have been trying to do. In my opinion they have used a method radically wrong in the expenditure of the money which we gave them in the appropriation bill of last year. Instead of going into those infected territories and destroying the borer and getting rid of it, they have gone in there and spent a whole lot of money in studying the bug itself, to find out its habits and find out what it feeds on, and all that sort of thing. I think that they should have gone there and done as they did with the pink boll weevil in the South, destroyed and gotten rid of it. I believe if they had pursued that policy they would have accomplished a whole lot more than in the policy they have pursued with this appropriation. In view of that I am opposed to increasing the appropriation more than is carried in this bill, of $275,000. I believe with that much money and with the cooperation of the States of New York, Massachusetts, and New Hampshire, that are affected, if they will pursue the right sort of method they can eradicate it, but as long as they spend the money in studying the habits of the insect and what it feeds on, and all that sort of thing, they are going to waste a whole lot of money. I want the department to go up there and eradicate the corn borer. I desired to express my sentiments and my position, and let it go into the RECORD, so that, if it is worth anything, the Department of Agriculture may know my attitude. I am not opposed to the work. I want the corn borer eradicated.

Mr. DAVEY. Mr. Chairman, I think I owe it to the House to say a few words in reply to the distinguished gentleman from Missouri [Mr. RUBEY]. Perhaps he may not understand the importance of studying the life history of an insect enemy. The purpose of doing that is to find the most effective time and place for striking it. There are certain insects that almost baffle control, and yet after careful study the scientists are able to develop the facts with reference to those particular insects. I referred a few moments ago to the elm-leaf beetle, and I want to explain that, because I think it illustrates the whole thing. If, for instance, you would go into an infested area that was stricken with the elm-leaf beetle, say in the month of July, and attempt to eradicate it, as my distinguished friend from Missouri says you would have an impossible job, practically. Science, on the other hand, has shown that the time and place to control the elm-leaf beetle is just at the time the eggs are hatched. The adult beetle lays a cluster of eggs on the under side of the elm leaf, and early in June those eggs start to hatch. By the application of the right kind of poison, arsenate of lead in spray form, at that particular time, you destroy the whole new brood, practically. And the same thing will apply to almost any other insect. In order to combat it effectively, it is necessary to study its life history and find out what it feeds upon, to find out the time and place where it can be hit most effectively, so that its control may be more easy and within reach of mankind. Science in this matter does an infinitely bigger and more important job than most people realize.

The CHAIRMAN. Without objection, the pro forma amendment is withdrawn, and the Clerk will read.

The Clerk read as follows:

For investigating the food habits of North American birds and other animals in relation to agriculture, horticulture, and forestry; for investigations, experiments, and demonstrations in connection with rearing fur-bearing animals; for experiments, demonstrations, and cooperation in destroying wolves, coyotes, prairie dogs, gophers, ground squirrels, and other animals injurious to agriculture, horticulture, forestry, animal husbandry, and wild game; and for the protection of stock and other domestic animals through the suppression of rabies in predatory wild animals, $452,240.

Mr. HUDSPETH. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. HUDSPETH: Page 54, line 5, after the word "animals," strike out the figures "$452,240" and insert in lieu thereof the figures "$600,000."

Mr. HUDSPETH. Mr. Chairman and gentlemen of the committee, this is an amendment that ought to appeal to the business sense of this entire committee. I want to state to the gentlemen who are not familiar with this work that since the United States Government has instituted this character of work, according to the report of the Biological Survey, $300,000,000 worth of forage has been saved; $200,000,000 worth in foodstuffs, and between thirty and forty million dollars in live stock. The Government has expended since it instituted this work about $1,500,000. Of this sum $240,000 has been paid back through the sale of the skins of the fur-bearing animals destroyed.

I want to state to my friends from the West—and I am now appealing to the chairman of the Agricultural Committee—that it shows that 15,000,000 acres of Government land has been gone over through the West and the prairie dog poisoned. I do not know whether you gentlemen are familiar with the habits of the prairie dog or not, but I want to state that 30 years ago in western Texas, in my district, and particularly in the district of my colleague Mr. BLANTON, the largest towns were the prairie-dog towns. They destroyed acres upon acres of grass. I do not understand, I want to state to my friend from Minnesota, Mr. ANDERSON, why this appropriation was cut down. I want to state, gentlemen, that in Texas——

Mr. ANDERSON. The appropriation has not been cut down.

Mr. HUDSPETH. It has been cut down $3,800 from the last appropriation.

Mr. ANDERSON. The gentleman ought to know that it is a transfer from the lump sum to the statutory roll.

Mr. HUDSPETH. I am taking the report. That shows that the appropriation has been cut down $3,800 from the appropriation of last year. Now, the Secretary of Agriculture asked for $600,000. The estimate of this bureau, the Biological Survey, was $882,000. I want to state to my friend from Minnesota that this is a revenue-producing proposition. Texas is not clamoring so much for this amendment, except that we are restocked from the forest reserves in New Mexico. Texas, through her own appropriations, made by the State legislature, has practically eradicated the wolf in a large portion of that great State. By doing so, I want to state to my friends from the East, lands that were on the tax rolls 10 years ago in western Texas at $1 and $1.50 an acre, are now assessed at $5 and $6 an acre. Why? Because the wolf has been eradicated, and the sheep are turned loose to graze on the prairies of western Texas without herders.

The same thing, gentlemen, can be said of Arizona and New Mexico if you eradicate the wolf. I say it is a revenue-producing measure. The work of this Biological Survey covers the States of Washington, Oregon, Idaho, Montana, North and South Dakota, Wyoming, Nebraska, Colorado, Kansas, Utah, Nevada, California, Arizona, New Mexico, Oklahoma, Arkansas, and Texas. It covers the entire West. I say to you, gentlemen, that the Biological Survey asked for $882,000. We are asking in this appropriation for an increase of $146,000 to continue

this work. When you destroy the wolf and other rodents, then the work is completed.

Mr. ANDERSON. Where does the gentleman get his figures of $882,000?

Mr. HUDSPETH. I get them in the report of the Biological Survey.

Mr. ANDERSON. That sum has never been appropriated for this purpose.

Mr. HUDSPETH. They are asking for that.

Mr. ANDERSON. No; they have not asked for it.

Mr. HUDSPETH. Yes. They are asking for $882,000.

Mr. ANDERSON. Where does the gentleman get that?

Mr. HUDSPETH. I get it from the Biological Survey report, I will say to my friend.

Mr. ANDERSON. They have never made such a request, to my knowledge.

Mr. HUDSPETH. They state that the Senate cut it down to $600,000, and you cut it—the Committee on Agriculture—cut it to $442,000. You cut it $3,800 below the appropriations of last year.

Mr. ANDERSON. No. We did not cut it at all. We simply transferred some people from the lump-sum appropriation to the statutory roll. You are only taking part of it.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. HUDSPETH. Mr. Chairman, I ask unanimous consent to proceed for two minutes more.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to proceed for two minutes more. Is there objection?

Mr. ANDERSON. Reserving the right to object, Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in 20 minutes, the gentleman from Texas [Mr. BLANTON] to have 5 minutes, the gentleman from Colorado [Mr. TAYLOR] to have 5 minutes, and——

Mr. RAKER. And I would like to have five minutes.

Mr. ANDERSON. The gentleman from California has already had five minutes. I ask unanimous consent that all debate on this paragraph and all amendments thereto close in 20 minutes.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that all debate on this paragraph and all amendments thereto close in 20 minutes. Is there objection?

There was no objection.

Mr. HUDSPETH. Mr. Chairman, I ask for two minutes.

The CHAIRMAN. The gentleman from Texas is recognized for two minutes more.

Mr. HUDSPETH. I will state to my friend that on page 14 of your report it is shown that this appropriation was decreased $3,800 from the appropriation of last year. There is your own report. That is $3,800 below the appropriation of last year. There is a total sum for this work, for studying the methods and habits of animals and birds and for the work of destroying predatory animals. It is a total sum. But I say it is decreased $3,800, when the Secretary of Agriculture asked for an increase of $153,000 and the bureau asked for an appropriation of $882,000.

You gentlemen have increased the appropriation for the destruction of the pink bollworm, and I agree to it. You have just adopted an amendment to the bill appropriating $25,000 to eradicate grasshoppers or to seek some method of eradicating grasshoppers. This is as important as any other amendment that will be offered here. It is on a parity with the destruction of the pink bollworm. When you destroy the wolf you enhance the value of Government land in the West anywhere from $5 to $10 an acre, as has been done in Texas.

Mr. EMERSON. Mr. Chairman, will the gentleman yield?

Mr. HUDSPETH. Yes.

Mr. EMERSON. To what extent has the wolf been eradicated in Texas?

Mr. HUDSPETH. To the extent that we turn our sheep loose in the pastures without harm.

Mr. BLANTON. Mr. Chairman, as to what the States and individuals themselves have done toward this matter, I want to say that practically every big cowman in my own district and in my colleague's district on the Rio Grande, and every cowman of any consequence in the district of my colleagues, Mr. JONES, Mr. PARRISH, and Mr. GARNER, has had for years a bounty of $50 that they pay for the scalp of every lobo wolf that can be found and killed in their pastures. They pay that themselves out of their own pockets, and our State has also paid a bounty year after year, varying in amount, sometimes 50 cents and sometimes $1, for scalps of coyotes; and counties in Texas have also paid bounties.

Mr. HUDSPETH. This report shows that the States cooperated last year with the Federal Government to the extent of $1,100,000. The Biological Survey so reports.

Mr. BLANTON. And so far as prairie dogs are concerned, mentioned by my colleague, the cattlemen went to the expense themselves of exterminating them. Take the district of my colleague, Mr. HUDSPETH, with over 400 miles of Rio Grande border in it, with Mexico just across a little stream, so small that in many places you can walk across it. What is the use of the cattlemen spending all of their time and attention in exterminating these animals on their own ranches unless everybody else around them does likewise?

Mr. RAKER. Mr. Chairman, will my distinguished friend yield to me for a question?

Mr. BLANTON. I yield.

Mr. RAKER. The question is this: If the destruction of the wolf has the effect that the gentleman says it has, and it does, would not the destruction of the California lion and coyote have the same effect on the industries of the State where these animals are prevalent?

Mr. BLANTON. Yes. You take the catamount or the bobtailed cat, as well as the regular wild cat with a long tail. They get large enough and strong enough not only to kill lambs and pigs but in many instances even to kill calves, and unless the Government does assist in this matter, in the destruction of these predatory wild animals, it is a matter that concerns every one of the Western States and every single one of the States that border on the South. It is a matter, I think, that we could well spend this money on, and I am as careful, I think, as any other man in this House in watching the money that goes out of the Public Treasury.

Mr. STEVENSON. Is there any way provided to keep them from coming over from Mexico? You have a great deal of trouble in that way, too, do you not?

Mr. BLANTON. Only to kill them when they come. The quarantine does not amount to anything, and that is one reason why the Government should help. The cattlemen have gone as far as they can go themselves. If you can kill a lobo wolf in my district or in the district of my friend [Mr. HUDSPETH], you will be paid $50 by the cowman on whose land you kill it. They kill them themselves, at their own expense, because they are interested in getting these animals exterminated, but they migrate constantly; and I say that the money that the Government expends is very inconsequential and well spent compared with the money that the individuals themselves spend and that the individual States spend for these purposes.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. TAYLOR of Colorado. Mr. Chairman and gentlemen, it does seem to me that if there is any one item in this bill where a small appropriation is penny-wise and pound-foolish it is in this very item of the destruction of predatory wild animals. You all know that there are something like 175,000,000 acres of forest reserves in the Western States. These forest reserves are being used for grazing purposes and the stockmen who use them have to pay an annual tax for the grazing of their stock upon these forest reserves. In my home State there are over a million sheep in the forest reserves, most of them in my district, and about 375,000 head of cattle and over 8,000 horses. We pay a very large amount of money to the Government every year for grazing that stock on the forest reserves, and all the other States of the West do the same thing.

Those forest reserves belong exclusively to the Government and they are used by the Government for raising revenue. The public, generally speaking, have nothing to do with them, except to pay for grazing stock on them. Now, in all fairness the Government should so supervise and control those preserves that they will not be a menace to the stockmen or the surrounding country. And while the Forest Service officials have done, and are doing, the best they can with their limited appropriation toward the destruction of the hundreds of thousands of mountain lions, wolves, coyotes, and bobcats, and other predatory wild animals that infest those forest reserves, yet the fact remains that the forest reserves cover such vast areas of uninhabited territory, and most of it difficult of access, that the small appropriations are wholly insufficient to do anything like the work that should be done; and while the Bureau of Biological Survey reports that over 25,000 of these animals were killed last year, nevertheless those ferocious animals killed $20,000,000 worth of live stock throughout the Western States last year.

In fact, the Government forest reserves are to-day simply great breeding grounds for these destructive animals, and I doubt very much whether or not at the present rate and with the

small appropriations that Congress is making each year for this work we are destroying them as fast as they are breeding. They breed very rapidly; coyotes increase about eight a year to each den, and the Government has simply got to sooner or later go at it in a systematic way and appropriate whatever amount of money is necessary to effectively exterminate these animals from the forest reserves, and the sooner we do it the cheaper it will be to the Government itself without even considering the $20,000,000 of loss each year while the Government is temporizing with the matter every year by making these small appropriations, which hardly amount to 30 cents apiece for a whole township and pursuing this penny-wise and pound-foolish policy. It is not only unbusinesslike and shortsighted and foolish to put off this work from year to year but it is so utterly unjust and unfair to the stockmen who pay the Government for grazing their stock within these wild-animal breeding grounds. If Congress would make the necessary appropriations, as it should and must and will do some day, to go at it in a wholesale and scientific way by shooting, trapping, and poisoning these animals, as can be done, and completely clean them out once and eradicate and exterminate the species, that will settle the matter for all time and the Government will be relieved from this annual expense and the stockmen will be relieved from the frightful loss and hardship. I can speak very definitely on this subject for the State of Colorado. I live in the little city of Glenwood Springs in western Colorado, and have lived there for nearly 35 years. It is almost surrounded by forest reserves. The reserves come down to about a mile and a half of my home town. We have about 14,000,000 acres of forest reserves in the State of Colorado and I have been intimately acquainted and associated with stockmen of that State during all the time I have lived in Colorado, and have been thoroughly familiar with the use of the forest reserves ever since they were created, nearly 20 years ago. During the past year in our State we killed over 2,000 of these animals; the largest number was coyotes. The most destructive and desperate of these animals are the mountain lions and gray wolves. It is estimated that a mountain lion kills 52 animals each year. They live almost entirely upon other animals. An examination of the stomach contents of a large number of these animals killed during the past year showed that 20 of them had eaten horse flesh, that 19 had eaten beef, that 34 of them had eaten sheep, that 3 had eaten pork, 44 had dined on rabbits, 9 of them on poultry, and 4 of them on other birds. The coyote is the most intelligent in many respects of any of those animals. For genuine criminal cunning he has no equal. But the bobcat is a frightfully destructive animal. He differs widely from other wild animals in that he is not afraid of the ranchmen's habitations like most other animals are. A bobcat will go right into a tent or henhouse or sheep shed or any place that is not locked up and grab anything in sight and take the chance on getting away with it. The big gray wolves run in pairs, or three or four of them, and they have the strength and courage and perseverance to down any animal, and they roam all over a wide stretch of country. They travel hundreds of miles, but their main retreat, their place of safety, is their breeding ground back in the reserves, where they are unmolested. That is where they mostly come from and return to.

The States, at least Colorado, are doing their full share. Colorado has nearly always paid a liberal bounty on these animals, and I notice by a Denver newspaper to-day that State Senator Morrison, of my district, has a bill pending before our State legislature, now in session, providing for a $100 bounty on every mountain lion killed. Besides the State's active work, the counties and stock associations are all doing their full share. Of course, the State and the counties and the stock associations should do a large part of the work necessary to the extermination of these animals on the public domain outside of the forest reserves, and especially on privately owned land, but the United States Government ought to, at its own expense, promptly and effectively and once and for all, clean up these forest reserves and eradicate those animals from the territory that it exclusively controls and charges these stockmen for grazing upon. And as long as Congress pursues this policy of little piecemeal appropriations and of only killing off a few thousand of these animals every year they are going to keep on breeding and increasing and Congress will have to keep on appropriating and the stockmen will have to keep on sustaining this horrible loss. It is an endless chain; and I earnestly appeal to you, gentlemen, on behalf of the stock growers in particular and the development of the West in general to adopt this amendment offered by the gentleman from Texas, which we have all agreed upon as necessary and just, and give us this appropriation, and I assure you that every dollar of the money will be economically, honestly, and wisely expended and will go a long way toward relieving the western stockmen from the horrible and discouraging losses they are at present afflicted with every year.

Mr. RAKER. Mr. Chairman, how much time is there remaining on this amendment?

The CHAIRMAN. Eight minutes.

Mr. RAKER. May I be recognized for four minutes?

The CHAIRMAN. The gentleman from Minnesota [Mr. ANDERSON] will be recognized for three minutes, and the Chair will recognize the gentleman from California for four minutes.

Mr. HUDSPETH. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. RAKER. Mr. Chairman and gentlemen of the committee, in addition to the destruction of live stock by the predatory animals, such as the wolves and coyotes, I want to call attention to the fact that there is in the Western States what is known as the California lion, that is destructive of horses, cattle, and sheep, and the deer that we preserve in our State.

The coyote is extremely destructive. I want to call attention to the rodents in particular. The national forests—we are not complaining of that now—are very extensive. In the State of California we have a law that requires each individual to free his land of these rodents. If he does not, the board of supervisors, through their agents, take charge of that work, destroys them, and the expense becomes a lien on the land. The land can be sold and the man deprived of his home because he does not destroy the rodents upon his land, when, as a matter of fact, there is a perfect stream or trail of these rodents from the Government land onto his land.

Now, all we ask is that the Government meet the citizens of my State fifty-fifty in the destruction of these rodents. That is nothing but right and fair. It is not a burden on the Government to protect its own property any more than it is on the individual who, if he fails, loses his home. This is but an indication of what can be done. The destruction of crops by the rodent is very extensive. They can practically consume a man's field of 100 acres in two days if it is not cared for. Where the Biological Survey has gone into the work in cooperation with the residents in many of the sections they have practically eliminated and destroyed these rodents, and the man who has planted his crop may have some assurance of a return. That is all we are asking here—that the Government, in addition to the predatory animals, take care of these rodents while they are breeding on the public domain, which constitutes much of the territory in these Western States. We ask that the Government assist its citizens to protect the property of the Government as well as the individuals, so that they may be in a better position to meet their obligations and pay their taxes.

Mr. ANDERSON. Mr. Chairman, it is natural for men to feel that those things are the most important which they come most closely in contact with and which they know the most about. I appreciate and sympathize with the feelings of the gentlemen from the West in their desire to increase this item. But, Mr. Chairman, since 1912 this item has increased from $35,000 to more than $450,000. With the amount carried on the statutory roll for clerical service that is incident to it, it amounts to more than $475,000. Considered in its relation to the rest of the appropriations in the bill, I think the item carries a very liberal amount. The service is being very well conducted now, and there is very little reason that we can discover for increasing it under the present circumstances.

I realize the interest of the gentlemen in it, but it is not more important than a great many items in the bill, and it is all, it seems to me, we can reasonably appropriate for that purpose.

Mr. HUDSPETH. The gentleman understands that the Government gets the skins of these animals and that it has paid back about one-third of the amount which the Government has paid out.

Mr. ANDERSON. The Government has expended about $2,000,000 and has got back about $270,000, so that as a business proposition, from the standpoint of getting back the money invested, it does not seem like a very good investment. I think it is a good work, and it is being satisfactorily done, but it seems to me that the amount of the appropriation represents fairly the contribution which the Federal Government ought to make for that sort of work. I ask for a vote on the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas.

The question was taken; and on a division (demanded by Mr. ANDERSON) there were 30 ayes and 21 noes.

Mr. ANDERSON. Mr. Chairman, I ask for tellers, and, pending that, I make a point of order there is no quorum present.

The CHAIRMAN. The gentleman from Minnesota makes the point of order there is no quorum present. The Chair will count. [After counting.] One hundred and three Members are present, a quorum.

Mr. ANDERSON. Mr. Chairman, I ask for tellers.

Tellers were ordered; and the Chair appointed as tellers Mr. ANDERSON and Mr. HUDSPETH.

The committee again divided; and the tellers reported that there were 32 ayes and 39 noes.

So the amendment was rejected.

Mr. TAYLOR of Colorado. Mr. Chairman, I think we ought to add two other animals to this item, because I do not think the language covers it. After the word "destroying" I move to insert the words "mountain lions," and after the word "coyotes" the word "bobcats."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 54, line 1, after the word "destroying," insert the words "mountain lions," and after the word "coyotes," insert the word "bobcats."

Mr. TAYLOR of Colorado. I may say that the bobcat is one of the most cunning and the most fearless of the predatory animals. They have no fear of a human habitation, but will go into a house or a tent.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado.

The question was taken; and on a division there were—ayes 36, noes 32.

So the amendment was agreed to.

The Clerk read as follows:

Salaries, Division of Publication: Chief of division, $3,500; chief editor, $3,000; assistant, $2,500; assistants in charge—1 of exhibits $3,000, 1 of information $3,000, 1 of motion-picture activities $3,000, 1 of illustrations $2,100, 1 of indexing $2,000; superintendent of distribution, $2,500; chief clerk, $2,000; assistant in exhibits, $2,000; assistant in document section, $1,800; assistant editors—3 at $1,800 each, 1 $1,600; assistants—3 at $2,000 each, 2 at $1,400 each; indexer or compiler, $1,800; indexer, $1,400; artist and designer, $2,500; draftsmen or photographers—3 at $1,600 each, 2 at $1,500 each, 2 at $1,400 each, 1 $1,300, 10 at $1,200 each; assistant photographer, $960; lantern-slide colorist, $1,200; laboratory aid, $900; foreman, miscellaneous distribution, $1,500; clerks—4 of class 4, 3 of class 3, 8 of class 2, 19 of class 1, 18 at $1,100 each, 52 at $960 each; 5 machine operators at $1,200 each; folders—chief $1,200, 1 $1,200, 2 at $1,000 each; messengers or laborers—3 at $900 each, 10 at $840 each, 4 at $780 each, 10 at $720 each, 3 at $600 each; 8 skilled laborers at $1,100 each; messenger boys—8 at $720 each, 6 at $600 each, 4 at $480 each; charwomen—3 at $480 each, 4 at $240 each; in all, $252,180.

Mr. BLANTON. Mr. Chairman, I move to strike out the last word. There are in the paragraph just read 48 messengers provided for this one particular bureau. As I suggested previously, I intend to make a motion to recommit this bill cutting out all of these surplus messengers and the free-seed item, and my motion, if adopted, will save the Government about $650,000 every year and will not in any way interfere with the proper functioning of the Government's business. You would never miss anything in the Government's business, and yet we will save $650,000. In order that my colleagues, through the RECORD, may be apprised of what they are expected to vote on, because most of them are now absent, I would like them to know what is in this motion and how it applies to the bill, because when it is made, after we get back into the House and they are called here hurriedly from the office building to vote, they will not know what they are asked to vote upon and will be told to vote to support the committee. Therefore, in order that they may know what is in the motion, how much it involves, and how much it will save the Government, and what their responsibility is when they vote against it, because the people are going to hold us responsible for refusing to save money, and it can be saved, I ask unanimous consent that I be permitted to insert my motion to recommit in the RECORD in connection with my remarks.

Mr. HAUGEN. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. HAUGEN. The gentleman is also aware of the fact that they have added 20 new places—1 at $2,000, 3 at $1,800, 2 at $1,600, 1 at $1,400, 1 at $1,200, and 12 at $960?

Mr. BLANTON. Yes; 22 new places; but nobody knew that better than the distinguished gentleman from Iowa, and yet he sat still and let this pass in this bill, when by getting up and making a point of order against the items he could have had them stricken out.

Mr. HAUGEN. Oh, the gentleman is mistaken, for they are not subject to the point of order.

Mr. BLANTON. Then they are not new positions.

Mr. HAUGEN. They are new, and they have been added to the statutory roll.

Mr. BLANTON. If they are new positions, then why are they not subject to the point of order?

Mr. HAUGEN. Because the organic act creating the Department of Agriculture gives authority to employ clerks, and so forth; so there is authority by law. I am calling the gentleman's attention to the fact that he is objecting to the low salaries.

Mr. BLANTON. No; I am not. That is the reason I want this motion to recommit placed in the RECORD, because the gentleman and other colleagues will then see that I am seeking to strike out 500 of the high-priced messengers and leave 74 of the low-priced messengers in. That is the purpose and intent of my motion to recommit. Therefore, I hope the gentleman, if it goes into the RECORD, will read it and see exactly how it applies and just exactly how much he can save his country by voting for it, because $650,000 a year cut off our expenses, while it may not appear large to some of my colleagues, means something in the long run to the taxpaying people.

Mr. HAUGEN. Evidently the gentleman is for increasing the salaries.

Mr. BLANTON. No; I am not. The gentleman has not yet understood my proposed motion to recommit.

Mr. HAUGEN. He has raised no objection to the high salaries, but objects to the low salaries.

Mr. BLANTON. No; the gentleman is mistaken. My motion is objecting to the high salaries. Remember, it is the messenger service I am now fighting.

The CHAIRMAN. The gentleman from Texas asks unanimous consent that he be allowed to include with his remarks a proposed motion to recommit, for the information of the members of the committee. Is there objection?

Mr. RUBEY. Mr. Chairman, reserving the right to object, and I think I shall, I desire to say that no one knows who is going to make a motion to recommit. One has first to get the recognition of the Speaker; and, while it is not now the practice, yet the practice might grow of Members going around on the floor of the House and getting up and saying that they are going to make a motion to recommit, and asking unanimous consent to put their motion to recommit in the RECORD. I think it is a bad policy, and therefore I object.

The CHAIRMAN. Objection is heard.

Mr. BLANTON. Will the gentleman reserve his objection for a moment? [Cries of "Regular order!"]

The CHAIRMAN. The Clerk will read.

Mr. BLANTON. Mr. Chairman, I ask unanimous consent to proceed for five minutes more. I can read it in that time.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to proceed for five minutes more. Is there objection?

Mr. RUBEY. I object.

Mr. BLANTON. The gentleman does not want his colleagues to understand it.

The CHAIRMAN. Objection is heard, and the Clerk will read.

The Clerk read as follows:

For extra labor and emergency employments in the District of Columbia, $11,380.

Mr. HAUGEN. Mr. Chairman, I move to strike out the last word, and I do it for the purpose of asking the gentleman in charge of the bill if he has a detailed statement as to the expenditures of this item carried in the current law?

Mr. ANDERSON. No; I have not a detailed statement of the item.

Mr. HAUGEN. Can the gentleman inform the House what it is appropriated for? Has any part of it been used for the payment of high salaries?

Mr. ANDERSON. I know that two gentlemen were carried on this roll, but they asked to have them transferred to the statutory roll this year, and those transfers were allowed.

Mr. HAUGEN. Were they paid out of this lump sum?

Mr. ANDERSON. Yes. That was the information they gave us, anyway. They were paid out of this lump sum.

Mr. HAUGEN. Some part of it was expended outside of the District of Columbia, and it was necessary to move them here. It was necessary to make a lump-sum appropriation to take care of this emergency. My understanding is that the funds have been diverted for other purposes, for the payment of high salaries.

Mr. ANDERSON. If the gentleman will tell me where he gets that information, I shall be glad to look it up.

Mr. WINGO. Mr. Chairman, it is impossible for us to hear what is going on between the gentleman from Iowa and the gentleman from Minnesota. I do not know what these gentlemen have their heads together about, but they are evidently conducting some sort of an investigation, and while they are doing that I would like to proceed for five minutes to discuss the future policy of the Democratic Party.

Mr. ANDERSON. I do not think the Democratic Party has any policy.

Mr. BLANTON. Then it is just about in the same fix as the gentleman's party.

The CHAIRMAN. The gentleman from Iowa still has the floor.

Mr. WINGO. The gentlemen getting their heads together reminded me of the Democratic Party.

Mr. ANDERSON. Mr. Chairman, I would be very glad to get any information that the gentleman has about this matter.

Mr. HAUGEN. I asked the question whether the gentleman knows for what purpose the money was appropriated? I know for what purpose it was appropriated, but I do not know for what purpose it has been expended.

Mr. ANDERSON. We do not have a detailed statement of the expenditures.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Miscellaneous expenses, Department of Agriculture: For stationery, blank books, twine, paper, gum, dry goods, soap, brushes, brooms, mats, oils, paints, glass, lumber, hardware, ice, fuel, water and gas pipes, heating apparatus, furniture, carpets, and mattings; for lights, freight, express charges, advertising, telegraphing, telephoning, postage, washing towels, and necessary repairs and improvements to buildings and heating apparatus; for the purchase, subsistence, and care of horses and the purchase and repair of harness and vehicles, for official purposes only; for the payment of duties on imported articles, and the Department of Agriculture's proportionate share of the expense of the dispatch agent in New York; for official traveling expenses; and for other miscellaneous supplies and expenses not otherwise provided for, and necessary for the practical and efficient work of the department, $161,000.

Mr. BLANTON. Mr. Chairman, I make a point of order to this language in the closing part of the paragraph, beginning on line 9, page 59:

And for other miscellaneous supplies and expenses not otherwise provided for.

That is unauthorized by law. It is a general blanket provision under which the Department of Agriculture could spend this $161,000 for anything in the world it saw fit, if it thought it could use it down there. There is no law for it, and it is wholly unauthorized.

Mr. ANDERSON. Mr. Chairman, there is general authority in the law for the purchase of equipment and supplies necessary for the operation of the department. This is simply an appropriation for objects and materials which the department, under general law, is authorized to buy. The language to which the gentleman objects does not extend the paragraph at all. It gives no authority which is not found in general laws authorizing the Department of Agriculture to purchase supplies. The mere fact that it is in general language does not extend the authority of the department in any way. I am satisfied that the Chair will find ample precedent justifying the appropriation under the rule for supplies and equipment for the departments.

Mr. BLANTON. Mr. Chairman, I want to call the Chair's attention to the following, that under this paragraph of miscellaneous supplies the committee provides for stationery, blank books, twine, paper, gum, dry goods, soap, brushes, brooms, mats, oils, paints, glass, lumber, hardware, ice, fuel, water and gas pipes, heating apparatus, furniture, carpets, and mattings; for lights, freight, express charges, advertising, telegraphing, telephoning, postage, washing towels, and necessary repairs and improvements to buildings and heating apparatus, and various other items, and then to wind up, for fear that possibly the department has not authority for buying everything in Washington and everything in New York that it can think of, it asks the committee to give it blanket authority by putting in the language:

And for other miscellaneous supplies and expenses not otherwise provided for.

I think it is a matter that is wholly unauthorized by law. It is bad practice, at any rate, for the committee to indulge in, thus giving blanket authority for spending public money.

The CHAIRMAN. The Chair will rule. The Chair feels that in the organic law creating the Department of Agriculture it is manifest that the intention was to carry forward a work of this kind, and the Chair will base his ruling on a ruling (citation of Jan. 6, 1921) made by Chairman WALSH, a pretty strict interpreter of the rule, in which he says, where a proviso includes the words "and for other needed work and improvement" is in order. The Chair, fortifying his own opinion by the citation referred to, overrules the point of order.

Mr. BLANTON. May I ask the Chair a question? What is the use of reciting any of these articles? Why not just put this one clause in and let it cover all of them?

The CHAIRMAN. The Chair feels that there must be in all of these laws a little leeway to take care of all contingencies. The Clerk will read.

The Clerk read as follows:

Salaries, States Relations Service: Director, $4,500; chief clerk, $2,000; clerk or chief accountant, $2,400; financial clerk, $2,000; executive clerk, $1,740; clerk or proof reader, $1,800; clerks—1 $1,980, 6 of class 4, 11 of class 3, 2 at $1,500 each, 20 of class 2, 2 at $1,320 each, 1 $1,260, 52 of class 1, 24 at $1,100 each, 2 at $1,000 each; clerk or artist-draftsman, $1,200; clerk or machine operator, $1,200; messenger, $1,000; 2 skilled laborers at $1,000 each; messengers or laborers—2 at $840 each, 5 at $720 each, 2 at $600 each, 1 $480; messenger boys—4 at $600 each, 11 at $480 each; charwomen—4 at $480 each, 16 at $240 each; in all, $196,320.

Mr. BLANTON. Mr. Chairman, I move to strike out the last word.

This paragraph provides for 26 messengers. I want to appeal to my friend from Missouri [Mr. RUBEY] in my request to let my proposed motion to recommit this bill go into the RECORD. It is a small matter; it is a matter that will carry some intelligence to our absent colleagues. The gentleman said I might not get to make the motion. I am going to vote against this bill unless some of its provision are changed.

Mr. RUBEY. Is the gentleman opposed to the bill?

Mr. BLANTON. I am going to be opposed to it unless it is changed.

Mr. RUBEY. Are you opposed to it now?

Mr. BLANTON. I am opposed to it right now with the $360,000 free seeds in it.

Mr. RUBEY. The gentleman has five minutes if he wants to make his speech and tell what he is going to do, but I object to such matters as a motion to recommit getting into the RECORD, which motion the gentleman says he is going to offer when he does not know that he is going to offer it at all. I am going to object to that practice. If the gentleman wants to make a speech and read his proposed amendment, or things of that sort, I will not object.

Mr. BLANTON. As I said before, if this motion to recommit is adopted, it will save this Government $650,000 a year.

Mr. RUBEY. Will the gentleman yield right there?

Mr. BLANTON. I yield.

Mr. RUBEY. If the gentleman's motion is adopted and the messengers go out and the department is compelled to pay more money for those that are called clerks to do this work——

Mr. BLANTON. I did not yield for a speech.

Mr. RUBEY (continuing). Under those circumstances he will not save money for the Government.

Mr. BLANTON. The gentleman is not going to puncture my remarks with that kind of talk. [Laughter.] I know that, without hurting the business of this Government one single cent, if this House will adopt my motion to recommit, which will strike out 500 useless messengers and $350,000 free seeds, it will save the people of this country $650,000 every year. And if the gentleman from Missouri is not interested in saving that money he can keep his colleagues from knowing all about the motion, and they will do just like he and the rest of them do. Every time a motion to recommit is made and the bell rings they come over hurriedly from the office building, and some door page will tell them it is a motion to recommit and they must stand by the committee, and so they will vote against the motion no matter what it contains, and no matter who makes it, because they do not know what it contains.

Mr. RUBEY. Will the gentleman yield?

Mr. BLANTON. I regret I can not. I would like to yield to the gentleman. The gentleman is awfully anxious to keep something out of the RECORD that might enlighten his colleagues, yet he wants to put something in here to encumber or hamper the RECORD. He wants to spend the money of the people of this Government foolishly and extravagantly, and keep on expending it, and when a man comes here and tries to save it for the Government he is always trying to throw obstacles in the way. I will offer the motion when the time comes.

The Clerk read as follows:

To enable the Secretary of Agriculture to investigate the relative utility and economy of agricultural products for food, clothing, and other uses in the home, with special suggestions of plans and methods for the more effective utilization of such products for these purposes, with the cooperation of other bureaus of the department, and to disseminate useful information on this subject, including the employment of labor in the city of Washington and elsewhere, supplies, and all other necessary expenses, $50,000.

Mr. FESS. Mr. Chairman, I move to strike out the last word.

Mr. WINGO. Mr. Chairman, I make a point of order on the paragraph.

The CHAIRMAN. The gentleman from Ohio moves to strike out the last word, and the gentleman from Arkansas reserves a point of order on the paragraph.

Mr. FESS. Does the gentleman from Arkansas make the point of order?

Mr. WINGO. No; I reserve it.

Mr. FESS. I want to ask the Chairman what is the practice under this particular language of finding "the relative

utility and economy of agricultural products for food, clothing, and other uses in the home"?

Mr. ANDERSON. That involves dietetic studies, the use of the respiration calorimeter, and various studies in regard to clothes and their relative wearing qualities, and studies of that kind.

Mr. FESS. Is this money expended on any institution?

Mr. ANDERSON. No. This is the basis of all the home demonstration work in the country. I think it might well be larger than it is. We are expending nearly $3,000,000 in home demonstration work all over the country, and practically all of the information which is the basis of that home demonstration work is worked out under the language about which the gentleman is inquiring.

Mr. FESS. Does the $50,000 support the men and women who are sent from place to place?

Mr. ANDERSON. No. It is for work which is done here in the department. It covers investigational work and the preparation of bulletins.

Mr. FESS. All the work is done here as a matter of expert work?

Mr. ANDERSON. Yes. That is, the scientific research work, the gathering up of information and the putting it in available shape for use in the home demonstration work. That is all embraced in this item.

Mr. FESS. I did not know that was in connection with the home demonstration work. Is the gentleman satisfied with the expenditure of this large amount of money for extension work that we passed a moment ago, amounting to something over a million dollars?

Mr. ANDERSON. I had hoped that that sum might be reduced, and I think it might have been reduced but for one thing. As the gentleman knows, we have just had a new census, and that has changed the ratios of agricultural populations in the different States, upon which the relative proportions of the sums which go to the States are determined. In many States of the Middle West and the Northwest, large States like New York and Pennsylvania and Illinois, the amount which is now being used for extension work furnished by the Federal Government would be actually reduced if the amount this year were not increased by the maturing of $500,000 under the Smith-Lever Act, and in order to hold that situation level we had to continue the appropriation as it is in the bill.

Mr. FESS. You are not increasing it from year to year?

Mr. ANDERSON. Not in the bill. However, the last installment of the Smith-Lever fund becomes due this year, so that there is appropriated, in addition to the sum appropriated last year, the sum of $500,000.

Mr. FESS. In the research work are there periodical bulletins sent out, indicating the results of this investigation?

Mr. ANDERSON. Yes. Bulletins are published and sent out illustrating the results of these investigations.

Mr. FESS. Mr. Chairman, I withdraw the pro forma amendment.

Mr. WINGO. Mr. Chairman, I do not care to exercise my reservation.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Salaries, Bureau of Public Roads: Chief of bureau, $6,000; purchasing agent, $2,500; 1 draftsman or clerk, $1,920; clerks or editorial clerks—1 $1,600, 1 $1,200; clerks or photographers—1 $1,440, 1 $1,200, 1 $1,000; clerk or instrument maker, $1,200; clerk or skilled laborer, $1,000; instrument maker, $1,800; model maker, $1,800; clerks—1 $1,900, 4 of class 4, 7 of class 3, 3 at $1,500 each, 6 of class 2, 9 at $1,320 each, 7 of class 1, 4 at $1,100 each, 2 at $1,000 each; 1 mechanician, $1,680; mechanics—1 $2,100, 1 $1,800, 1 $1,500, 1 $1,200; skilled laborer, $1,200; skilled laborer or mechanic, $840; laboratory aid, $960; telephone operator, $720; mimeograph operator, $840; 2 laborers at $900 each; messengers or laborers—2 at $840 each, 2 at $660 each, 4 at $600 each; 4 messengers, laborers, or laboratory helpers at $720 each; fireman, $720; messenger boys—3 at $600 each, 8 at $480 each; 11 charwomen at $240 each; in all, $114,460.

Mr. BLANTON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Texas moves to strike out the last word.

Mr. BLANTON. Mr. Chairman, in this paragraph concerning this one bureau there are 23 messengers, which, added to the other paragraphs, makes 574 messengers for this one department.

As I said awhile ago, I have prepared a motion to recommit this bill, to try to strike out 500 of these useless messengers. As I said before, that and another item that is in my motion to recommit, if adopted, will save the people of the United States $650,000 each year; and in order that my colleagues may know what is in my motion before it comes up, in order that I may place the responsibility where it belongs, I again ask unanimous consent, without taking up more of the time of the House, to attach to my remarks the proposed motion which I intend to make to recommit.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to include in his remarks the proposed motion to recommit. Is there objection?

Mr. RUBEY. I object.

Mr. BLANTON. I am glad, Mr. Chairman, that I have placed the responsibility where it belongs, because the time is going to come, whenever a Member of Congress interferes with any chance for the enlightenment of his colleagues and for the saving of public money, as the gentleman from Missouri has done by his objection to my request when I attempted to inform that Member of Congress, and this House especially, how we can save $650,000 a year by adopting——

Mr. RUBEY. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. RUBEY. If the gentleman continues to attack the Member from Missouri, he will have to make the point of order that the gentleman is not discussing the paragraph.

Mr. BLANTON. I have moved to strike out the last word in the paragraph, which is the sum of $114,460.

Mr. RUBEY. I make the point of order, Mr. Chairman.

The CHAIRMAN. The gentleman from Missouri makes the point of order that the gentleman from Texas is not discussing his amendment, and the Chair will admonish the gentleman from Texas to keep within the rule.

Mr. BLANTON. Mr. Chairman, I have moved to strike out "$114,460." That is money that comes out of the Treasury. Part of this money is for 23 messengers; and to show that there is a chance to save this money out of this bill I call attention to the motion to recommit, that I wanted my friends and colleagues in the House to understand and to know what it contains before they vote on it; and I have the right, when the gentleman from Missouri [Mr. RUBEY] refuses to let his colleagues know what was in my motion, to call his attention to it and call the attention of the people of the country to it, and indicate who was keeping out that information.

Mr. RUBEY. Mr. Chairman, a point of order. The gentleman is not talking to the text of his motion.

The CHAIRMAN. The Chair will admonish the gentleman from Texas that he should conform to the rules and confine himself to a discussion of his motion.

Mr. BLANTON. Mr. Chairman, I put it up to the Chair to determine whether I am not within my rights in discussing the motion to strike out the sum "$114,460."

The CHAIRMAN. The Chair thinks the gentleman was wandering from the amendment.

Mr. BLANTON. Well, I will get back to it. I presume the Chair will not take this out of my time. As I said before, in my attempt to save this $114,460 for the people of the country and to save like items in other paragraphs of this bill I have a motion to recommit. I hope the Members will come around to my office to-morrow morning and let me tell them what is in that motion, because I have tried to put it into the RECORD, so that you could read it. If I could put it in the RECORD, all of you would read it.

Mr. RUBEY. Will the gentleman yield?

Mr. BLANTON. I can not yield. My friend from Missouri has been so courteous to me in objecting that I must refuse to yield.

Mr. RUBEY. Then I make the point of order that the gentleman is not discussing the amendment.

The CHAIRMAN. The time of the gentleman from Texas has expired. [Laughter.]

Mr. STEVENSON. I move to strike out the last two words. I want to ask what particular function a photographer has in the Bureau of Public Roads?

Mr. CARTER. To take photographs of the roads.

Mr. STEVENSON. Here in line 9, on page 65, is a provision:

Clerks or photographers—1 $1,440, 1 $1,200, 1 $1,000.

Mr. ANDERSON. I take it these gentlemen are blue printers.

Mr. STEVENSON. They have draftsmen and engineers, and all that kind of thing. They make blue prints.

Mr. ANDERSON. So do the photographers.

Mr. STEVENSON. Has there been any information given as to what these photographers are doing?

Mr. MONDELL. I imagine these gentlemen occasionally take a picture of a bad road that needs repairing, down in South Carolina and maybe in Wyoming.

Mr. STEVENSON. Everybody knows that they make pictures, but the pictures are entirely inaccurate. They have got civil engineers to make blue prints. That is the way to get at whether a road needs repairing and what repairs are needed. I just want to direct attention to that.

As to this trouble about messengers, if there are too many messengers I would suggest that if my friend will move to strike some of them out, that will give us an opportunity to vote on it. He ought not to waste the time of the House by a motion to recommit. I am ready to vote right now. If it is necessary to strike some of them out, let us do it now.

Mr. BLANTON. As I said to-day, the reason I do not make the motion after each paragraph is that the committee has its adherents here in sufficient number to protect it on almost every proposition you can bring up, and they will vote you down. We have not more than 60 Members on the floor now, out of 435 Congressmen, and most of them would vote to sustain the committee on any proposition that came up.

Mr. STEVENSON. The gentleman has made his speech in my time, but I am entirely with him as to economizing in these matters. But it strikes me that he could make his motion to strike out a lot of these messengers while he is spending the time trying to get his motion to recommit into the RECORD.

Mr. RUBEY. Mr. Chairman, I desire to submit a request for unanimous consent, that the gentleman from Texas [Mr. BLANTON] be allowed five minutes in which to read his motion to recommit.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent that the gentleman from Texas be allowed five minutes.

Mr. BLANTON. I do not want to read it, Mr. Chairman, I am hoarse.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent that the gentleman from Texas be allowed five minutes to read his motion to recommit. Is there objection?

Mr. ANDERSON. I object, Mr. Chairman.

Mr. BLANTON. Mr. Chairman, instead of reading it and taking up the time, as I am hoarse from much talking, I ask unanimous consent that I may put it in the RECORD in connection with my remarks.

Mr. RUBEY. I object, Mr. Chairman.

The CHAIRMAN. Objection is heard.

Mr. WINGO. Mr. Chairman, I rise in opposition to the pro forma amendment of the gentleman from South Carolina [Mr. STEVENSON] for the purpose of getting some information. I have enjoyed all this, but I want to get some facts. With reference to these messengers I would like to have the gentleman from Minnesota [Mr. ANDERSON] advise me if the information given on numerous occasions in years past is correct that the reason why they employ so many messengers in the Department of Agriculture is that if they were to call for clerks from the Civil Service Commission they would have to employ a great many more high-priced employees? That is the information I have received on other occasions when this bill has been under consideration, and I would like to know if that is correct.

Mr. ANDERSON. They could do away with these messengers if they had places for clerks, but if they did not have places for clerks the work would have to go undone. The work done by these messengers, which is necessary, would not be done, and the work of the department would be greatly impeded.

Mr. WINGO. Here is the point I was getting at. A few years ago when this matter was being considered on the floor of the House I was a young inexperienced Member and felt that on my young shoulders alone rested the duty of protecting the Treasury, and I thought I had discovered a place for a little economy. So I got up here and ranted around for two or three days about spending so much money for messengers. The gentleman no doubt recalls my energetic efforts.

Mr. ANDERSON. Yes.

Mr. WINGO. The gentleman then in charge of this bill, Mr. Lever, of South Carolina, very patiently explained to me that they had provided for so many messengers because under the law the pay of messengers is smaller than the pay of clerks and that messengers could do the work, and therefore I found that I was misguided in my efforts, and that instead of economizing I would really increase the public expenditures if I cut out messengers and increased clerks, so I subsided. There has been no change in the law, has there, since then?

Mr. ANDERSON. No change whatever.

Mr. TINCHER. Did you offer a motion to recommit?

Mr. WINGO. Oh, I did everything of that kind and really believed I was forcing economy. I was young and green then. [Laughter.]

Mr. FESS. Mr. Chairman, I rise in opposition to the amendment. I want to ask the chairman if he recalls when this Bureau of Public Roads was created?

Mr. ANDERSON. I can not state exactly; the Office of Public Roads has been established for many, many years.

Mr. FESS. I am not interested in the particular time, but I wondered why the salary of the chief is made higher than any other chiefs of the Agricultural Department?

Mr. ANDERSON. Three or four years ago the chief of the bureau died. We were then coming to the proposition of spending several hundred million dollars for the construction of roads. It was apparent to everybody that we ought to have a man at the head of the Bureau of Public Roads, directing the expenditure of the money and passing on the contracts, of a very high class and of great ability. The department tried to get a man at the statutory salary, but did not succeed. Finally the committee put into the bill the provision carrying $6,000 as the salary of the chief of the bureau. After an explanation on the floor of the House a point of order was withdrawn against it and it was permitted to remain in the bill, and the gentleman who is now occupying the position accepted the position at the salary of $6,000. He is an extraordinarily good man, a civil engineer, and is worth more than $6,000.

Mr. FESS. I raised the question to make this observation: That the Department of Agriculture is really an aggregation of bureaus headed by great experts. I think the man at the head of the Bureau of Chemistry is not only a leading chemist of the country but succeeded one of the leading chemists of the country. Here is an expert in one of these departments that receives $5,000. On the other hand, here is a road builder——

Mr. MADDEN. The gentleman is mistaken, he is not a road builder; he is one of the high-class civil engineers of the country. There were two men that the Secretary of Agriculture was anxious to get; each of them was receiving in private practice $10,000 a year. It was only because of his willingness to sacrifice his private practice and come into the Government service and give his experience that we were able to get him for this amount.

Mr. FESS. I am grateful to the gentleman from Illinois for making the statement, for evidently the man is not paid simply because he is a road builder, but because he is an expert along other lines.

Mr. McLAUGHLIN of Michigan. I will say that no point of order was raised against it for the reason, as the gentleman from Minnesota suggests, that at the particular time we were all very much interested in road building, and in that way our objection to an increase in salary was overcome. I wish we could in some way induce a similar interest in respect to the work done by a number of other bureaus, because they are splendid men, of exceptional ability, who have proved the value of their work to the Government and who deserve more pay than they are getting. In some way we ought to provide for an increase.

Mr. VENABLE. Mr. Chairman, I move to strike out the last four words, in order to ask a question. The gentleman from Texas [Mr. BLANTON] has insisted, with a great degree of vehemence, that the number of messengers carried and provided for in this bill is excessive. I would like to ask if the committee has recently investigated the work that is performed by these employees, with a view to determining whether or not they are as a matter of fact excessive in number?

Mr. ANDERSON. In a general way. It is impossible in a short session for any committee to take up the statutory roll and go into the record of each employee and ascertain whether he is necessary or unnecessary. In general, however, the department itself is recognizing the possibility of reducing the number of messengers in this bill, and they have been largely reduced. It must always be remembered that many are employed as messengers or laborers, and in nine cases out of ten they are not messengers but laborers.

Mr. VENABLE. Was there any proof before the committee that the number is excessive?

Mr. ANDERSON. No.

Mr. VENABLE. Has the committee any information to that effect?

Mr. ANDERSON. I do not think the number is excessive.

Mr. BLANTON. Mr. Chairman, the committee has shown that they thought they were excessive, because since the fight I made on the bill last year, when there were 743 messengers, they have cut it down to 574 messengers in this bill. I think there are still about 500 too many now in the bill. The gentleman from Arkansas [Mr. WINGO] intimated that they were employing them as clerks but calling them messengers to get them at lower salaries. If they are doing clerical duty, I maintain they ought to be paid clerks' salaries instead of messenger salaries, and our Government would then be treating them justly and fairly.

Mr. VENABLE. What the House is interested in is whether or not there are more employees than are needed.

UMI

Mr. BLANTON. They have cut off 169 since I made my fight last year.

Mr. VENABLE. We are dealing with those that are left in the bureau. What proof is there that the present number is excessive?

Mr. BLANTON. If the gentleman will go down to the department to-morrow, he will find them clogging up the department, obstructing the corridors, many doing nothing but laughing and talking and smoking fine cigars.

Mr. VENABLE. How many does the gentleman claim should be reduced?

Mr. BLANTON. Strike 500 out of the bill. That still leaves 74.

Mr. VENABLE. Why does the gentleman place the number at 500?

Mr. BLANTON. I think there would then remain enough for one department. Seventy-four messengers, some drawing as high as $1,000 per year, with a $240 bonus added, ought to be enough for one department.

Mr. VENABLE. What do they do?

Mr. BLANTON. Carry messages, do errands, and nothing mostly.

Mr. VENABLE. Has the gentleman investigated it?

Mr. BLANTON. I spent a part of the month of August, all of September, and a part of October last in investigating this matter.

Mr. VENABLE. Of what did the gentleman's investigations consist?

Mr. BLANTON. I went through each department.

Mr. VENABLE. Walked through?

Mr. BLANTON. Walked through and looked through and asked questions and observed.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. ANDERSON. Mr. Chairman, I move that all debate on this paragraph close in two minutes.

The motion was agreed to.

Mr. ANDERSON. Mr. Chairman, I want just to add this word in addition to what I have already said: These employees who are employed as messengers do all sorts of work besides messenger work. Sometimes they run mimeographing and other machines of one kind and another. They do all sorts of little things in the departments. They are very necessary; they earn their salaries. The gentleman from Texas [Mr. BLANTON] does not do himself credit when he proposes to abolish the places they now hold.

Mr. WINGO. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. WINGO. I have learned, with a good deal of surprise, from the statement made by the gentleman from Texas [Mr. BLANTON] that these $600 messengers are smoking high-priced cigars. I hope the gentleman will use his influence with the bureau chiefs to suppress such terrible thriftlessness at a time like this, when we are all suffering from the high cost of living. [Laughter.]

Mr. STEVENSON. Oh, Senator SMOOT's bill will cut that out.

The Clerk read as follows:

For investigations of the best methods of road making, especially by the use of local materials; for studying the types of mechanical plants and appliances used for road building and maintenance; for studying methods of road repair and maintenance suited to the needs of different localities, and for furnishing expert advice on these subjects, $77,300.

Mr. HAUGEN. Mr. Chairman, I move to strike out the last word. Why is the language stricken from the bill that called for clay, sand, and dirt roads? Are we to abandon all of those roads?

Mr. ANDERSON. No. The language was changed simply to make it conform more accurately to the character of the work that is being done. The studies that are now being made are more in the direction of investigations of methods of better utilization of road materials that exist in the vicinity of the roads. We are not abandoning the policy heretofore enforced with reference to sand and clay roads at all.

Mr. HAUGEN. Why should they not be included? Is it to be construed that the work is to be confined to hard-surfaced roads, and that clay and sand roads are to be abandoned?

Mr. ANDERSON. Oh, no; nothing in this bill would commit us to anything in respect to that.

Mr. HAUGEN. It would commit us to sand and clay roads if we included that language in the bill.

Mr. ANDERSON. Sand and clay roads are included in the general language anyway.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. HAUGEN. Yes.

Mr. MADDEN. The Government of the United States does not build the roads.

Mr. HAUGEN. No; but it gives valuable advice.

Mr. MADDEN. The States build the roads, and I assume that the States will be able to get any advice they may ask for.

Mr. HAUGEN. The States are able to get any advice they desire as to any type of road, but why should we abandon those particular roads?

Mr. McLAUGHLIN of Michigan. Mr. Chairman, let me say in answer to the gentleman from Illinois [Mr. MADDEN] that the Federal Government has built a great many experimental roads.

Mr. MADDEN. I agree to that.

Mr. McLAUGHLIN of Michigan. And it was proposed to discontinue it, but this bill as it is drawn would authorize that.

Mr. ANDERSON. Oh, no.

Mr. McLAUGHLIN of Michigan. I opposed it last year because so much road building was going on all over the country in every part of it that there ought to be opportunity enough for experimenting without having a large amount of money set aside for the express purpose of experimenting.

Mr. MADDEN. I agree with the gentleman that the Federal Government ought not to build any roads which it does not own and control itself.

Mr. HAUGEN. The language is—

For investigations of the best method of road making by the use of local material.

The bill of the current year includes the words "especially as to sand, clay, gravel," and so forth.

Mr. ANDERSON. We say here "by the use of local materials." What does that mean? It means sand, it means gravel, it means dirt, it means whatever local material there is in the place where the road is being built.

Mr. HAUGEN. That is, if you insert the language that was in there last year.

Mr. ANDERSON. No.

Mr. HAUGEN. As it stands now, it will be confined to cement and other materials.

Mr. ANDERSON. It is not a question of using anything. It is a matter of investigation.

Mr. HAUGEN. On the face of it, it will be construed that Congress has abandoned the soft-surface roads.

Mr. ANDERSON. No.

Mr. HAUGEN. And that we are committed to hard-surface roads. There is a vast difference of opinion about that.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, I think the gentleman from Minnesota is wrong. I think this provides for experimenting materials.

Mr. ANDERSON. It says—

For investigations of the best methods of road making, especially by the use of local materials.

That is general language, and it includes all kinds of roads.

Mr. McLAUGHLIN of Michigan. Those are investigations.

Mr. ANDERSON. Especially by the use of local materials, and that makes it certain that these investigations may extend into the use of sand and gravel and other local materials.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. CARTER. Mr. Chairman, I make the point of order that there is no quorum present.

Mr. ANDERSON. Mr. Chairman, I move that the committee do now rise.

Mr. GARRETT. Mr. Chairman, will the gentleman withhold that for a moment?

Mr. ANDERSON. Yes; with the permission of the gentleman from Oklahoma.

Mr. CARTER. Mr. Chairman, I reserve the point of order.

Mr. GARRETT. Mr. Chairman, I think there is no disposition on this side of the House to hasten afternoon adjournments. On this side of the House it is recognized that the appropriation bills are farther behind than they have been during the last 12 years. There is no disposition to try to delay them. We would be very glad to see them pass and become laws before the 4th of March.

Mr. DUPRÉ. Mr. Chairman, will the gentleman yield?

Mr. GARRETT. Yes.

Mr. DUPRÉ. Is not that condition due to the new rule which obtains with respect to appropriations?

Mr. GARRETT. I do not think so. I do not think it is due to the rule. I would inquire, if I may, of the gentleman from Minnesota if he knows whether it is the disposition of the majority side of the House to pass these bills before the 4th of March?

Mr. ANDERSON. It certainly is the intention to pass them before the 4th of March, so far as I know. I have endeavored

to make all the progress I could on this bill, I assure the gentleman.

Mr. GARRETT. The situation is becoming such that it will probably be only a week before we will have to begin to work nights. Of course, the gentleman realizes, and the gentleman from Wyoming realizes quite as fully, that the trouble is going to come here on the conference reports. Now, it seems to me we might possibly arrange a program whereby these bills could get by or begin to work nights now.

Mr. MONDELL. Well, Mr. Chairman, the gentleman is very well informed in regard to the House, but not entirely accurate in his statement in regard to the situation of appropriation bills. The fact is that if we carry out the program which we have in mind we shall pass the appropriation bills through the House this session more promptly than they have been passed in the last 20 years. As a matter of fact the appropriation bills are now at this moment as far advanced as they have been at any session for many years. However, the "gentleman from Wyoming" is exceedingly anxious to pass these bills and has been crowding them just as hard as it is possible to do. I have tried to get the House to meet at 11 o'clock. Gentlemen on both sides have objected to that, and I think with some reason. I have not insisted upon the early meeting, because I felt there was a good deal of reason for the objection that gentlemen offer. But unquestionably we shall very soon be required to meet earlier and possibly to sit a little later. I think we must all of us very soon make up our minds to remain here until about 6 o'clock, and I shall be very happy, indeed, if the House will, for a time at least, until we dispose of the appropriation bills, meet at 11. But I have deferred making the request for an early meeting, after having made it some days ago, until the committees could get a little further along with their hearings.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. MONDELL. Yes.

Mr. CHINDBLOM. Why can we not agree now to work until 6 o'clock? Why should gentlemen object to working until 6 o'clock, instead of raising a point of order here and compelling us to adjourn?

Mr. CARTER. Mr. Chairman, I make the point of no quorum.

The CHAIRMAN. The gentleman from Oklahoma makes the point of no quorum. The Chair will count.

Mr. ANDERSON. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and Mr. TILSON having assumed the chair as Speaker pro tempore, Mr. HICKS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 15812, the Agricultural appropriation bill, and had come to no resolution thereon.

CONSOLIDATION OF CUSTOMS COLLECTION DISTRICTS AND PORTS OF ENTRY (S. DOC. NO. 359).

The SPEAKER pro tempore laid before the House the following message from the President of the United States, which was read and referred to the Committee on Ways and Means:

To the Senate and House of Representatives:

The sundry civil act approved August 1, 1914, contains the following provisions, viz:

> The President is authorized from time to time, as the exigencies of the service may require, to rearrange, by consolidation or otherwise, the several customs collection districts and to continue ports of entry by abolishing the same or establishing others in their stead: *Provided*, That the whole number of customs collection districts, ports of entry, or either of them, shall at no time be made to exceed those now established and authorized except as the same may hereafter be provided by law: *Provided further*, That hereafter the collector of customs of each customs collection district shall be officially designated by the number of the district for which he is appointed and not by the name of the port where the headquarters are situated, and the President is authorized from time to time to change the location of the headquarters in any customs collection district as the needs of the service may require: *And provided further*, That the President shall, at the beginning of each regular session, submit to Congress a statement of all acts, if any, done hereunder and the reasons therefor.

Pursuant to the requirements of the third proviso to the said provision, I have to state that the following changes in the organization of the customs service have been made by Executive order:

By Executive order dated February 2, 1920, customs collection district No. 27 (southern California) was abolished and customs collection districts Nos. 25 (San Diego) and 27 (Los Angeles) were created.

By Executive order dated February 27, 1920, the county of Alexandria, Va., including the port of Alexandria, was transferred from customs collection district No. 13 (Maryland) to customs collection district No. 14 (Virginia).

By Executive order dated March 6, 1920, the port of Cedar Keys, customs collection district No. 18 (Florida), was abolished.

By Executive order dated September 1, 1920, the port of Sulzer, customs collection district No. 31 (Alaska), was abolished and a port of entry was created at Craig in the same collection district.

All of the above changes were dictated by considerations of economy and efficiency in the administration of customs and other statutes with the enforcement of which the customs service is charged, as well as the necessities and convenience of commerce generally.

WOODROW WILSON.

THE WHITE HOUSE,
25 January, 1921.

PURCHASE OF GERMAN PLANES.

Mr. KAHN. Mr. Speaker, by direction of the Committee on Military Affairs, I ask unanimous consent that House resolution 648, which is a privileged resolution, and a letter of the Postmaster General answering the questions asked in the resolution, be inserted in the RECORD.

The SPEAKER pro tempore. The gentleman from California asks unanimous consent that the resolution and letter referred to be printed in the RECORD. Is there objection?

Mr. WINGO. Mr. Speaker, what is the proposition?

Mr. KAHN. The gentleman from Illinois [Mr. MADDEN] introduced a resolution calling for information regarding some aeroplanes used in the Post Office Service——

Mr. WINGO. And this is the Postmaster General's answer to it?

Mr. KAHN. Yes, sir.

Mr. BRIGGS. Mr. Speaker, reserving the right to object, and I will not object, I would like to ask the gentleman from California a question about another measure. What has become of the bill for the distribution of cannon and war supplies?

Mr. KAHN. I will say to the gentleman that I saw the chairman of the Committee on Military Affairs of the Senate two or three days ago, and urged him to call a conference in order that we might be able to agree on that measure with the least possible delay.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

The following is the resolution, with the correspondence in reply to the same:

House resolution 648.

Resolved, That the Postmaster General, the Secretary of War, and the Secretary of the Navy each be requested to report to the House the number of German aeroplanes purchased by his department in 1920, the fund out of which payment for such planes was made, the authority for their purchase, the agency through which such planes were purchased, the price paid per plane, the use to which these planes have been put, the number of such planes destroyed by fire or otherwise, the number of pilots killed as the result of such destruction, the number of planes of American make in the possession of the respective departments, and the number in use.

—

OFFICE OF THE POSTMASTER GENERAL,
Washington, D. C., January 24, 1921.

Hon. JULIUS KAHN,
Chairman Committee on Military Affairs,
House of Representatives, Washington, D. C.

MY DEAR MR. CHAIRMAN: On last Saturday, in response to an inquiry of Representative BLACK, I caused to be prepared a letter answering specifically the various inquiries set forth in House resolution 648, and I found a letter addressed to Mr. BLACK before me this morning for signature. It was signed and transmitted to him before your communication reached me. I attach hereto a copy of the letter addressed to Representative BLACK, which gives in detail the information requested by you.

Very respectfully, yours,

A. S. BURLESON.

—

JANUARY 24, 1921.

Hon. EUGENE BLACK,
House of Representatives.

MY DEAR MR. BLACK: Answering specifically your inquiry for information on the points set forth in the resolution by Representative MADDEN, asking the Postmaster General to report to the House:

1. The number of German planes purchased by his department in 1920.
2. The fund out of which payment for such planes was made.
3. The authority for their purchase.
4. The agency through which such planes were purchased.
5. The price paid per plane.
6. The use to which these planes have been put.
7. The number of planes destroyed by fire or otherwise.
8. The number of pilots killed as a result of such destruction.
9. The number of planes of American make in the possession of the Post Office Department, and the number in use.

I beg to advise as follows:

1. The Post Office Department purchased six Junker monoplanes, with enough spare parts to set up two additional planes, and in addition obtained spare parts to the value of two additional planes in order to keep the planes operating. This makes, delivered to the Post Office Department, eight planes in flying condition and spare parts to keep same in operation.

2. The payment for these planes was made out of the appropriation for aeroplane service between New York and San Francisco for the fiscal year ending June 30, 1921.

3. The authority for such purchase is contained in the appropriation act for the Post Office Department for the fiscal year ending June 30, 1921:

"For the purchase of such aeroplanes as may be necessary to establish, operate, and maintain an aeroplane service between New York, N. Y., and San Francisco, Calif.," etc.

4. The planes were purchased by the Post Office Department direct from the J. L. Aircraft Corporation, 347 Madison Avenue, New York City.

5. The price paid for the eight planes and the necessary spare parts to keep them in operation was $200,000, or $20,000 per plane, plus $40,000 for additional motors, wings, fuselage and plane parts.

6. These planes have been used in transporting mail between New York, Chicago, and Omaha on the New York-San Francisco route.

7. Two of these planes were destroyed by fire and one was destroyed by crashing into a tree after it had landed.

8. Two pilots and their mechanics were killed as the result of such destruction of these planes.

9. There are in the possession of the Post Office Department at this time 215 planes of American make, of which 65 are now in use, including those held as reserves at the various fields. The remainder of the 215 planes which had been allotted by the War and Navy Departments are either in warehouses or are being remodeled, to be drawn upon for carrying of the mails as the need for them develops.

The Junker airplanes purchased by the Post Office Department represent a forward step in airplane development over the development at that time in this country. Their operation over 30,122 miles gives 5.1 miles per gallon of fuel, as against an average of about 2.5 miles per gallon with the planes and motors in the Air Mail Service. The cost of flying operations with these planes is about 30 per cent less, and the cost of maintenance and upkeep about 50 per cent less than is the flying cost and maintenance cost of the Liberty motored De Haviland planes turned over to the Post Office Department by the Army and Navy.

On the other hand, the cruising radius of the Junker plane is at least 50 per cent more and the possible mail load is nearly two and one-half times as great as that of the surplus war planes with which the Air Mail is principally operated. Whether the relatively low cost of maintenance of a Junker plane over a De Haviland will continue as the planes see more service is something that is being determined by the daily operation of these planes by the side of the De Havilands.

When the German planes were put into service by the Post Office Department, after planes of this type had made a number of remarkable long-distance runs for other parties, defects in the fuel installation and in the engine compartment, ventilation, and drainage were discovered through planes catching fire in the air. These defects of construction and engineering were promptly remedied by the Post Office Department, since which time the planes have been operating steadily in the mail service without fire hazard or casualty of any character to the crews operating them. The safeguarding against fire hazard, as the result of the accidents to the Junker planes, has been of great importance to aviation and has resulted in the elimination of fire hazard in other mail ships.

Much has been said about the hazardous character of airplane flying in connection with carrying the mails. The total fatalities in more than two and one-half years of operation of the Air Mail Service, covering considerably more than 1,000,000 miles, have been at the rate of one for each 65,280 miles of flying. I am informed that the fatalities in civil aviation in Europe have been one for each 33,000 miles of flying. As the result of intensive daily operations of the Air Mail Service, flying in commercial work is being steadily made safer.

Sincerely, yours,

FORMER REPRESENTATIVE GEORGE W. FITHIAN.

Mr. BROOKS of Illinois. Mr. Speaker and gentlemen of the House, I sincerely regret to announce the death of a former Member of this House from my own State, the Hon. George W. Fithian, of Newton, Jasper County, Ill., who rendered distinctive and valuable service to his constituency and to the country during the Fifty-first, Fifty-second, and Fifty-third Congresses.

Mr. Fithian was a friend to all classes of people in all walks of life. He was held in the highest esteem and enjoyed the confidence and respect of all who knew him. In his demise Illinois has lost a distinguished son and Jasper County an honored and valued citizen.

SENATE BILL REFERRED.

Under clause 2, Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

An act (S. 3944) to create a Federal live-stock commission, to define its powers and duties, and to stimulate the production, sale, and distribution of live stock and live-stock products, and for other purposes; to the Committee on Agriculture.

LEAVE OF ABSENCE.

Mr. ACKERMAN, by unanimous consent, was granted leave of absence for two days on account of important business.

EXTENSION OF REMARKS.

Mr. DAVEY. Mr. Speaker, I ask unanimous consent to revise and extend my remarks.

The SPEAKER pro tempore. The gentleman from Ohio asks unanimous consent to revise and extend his remarks. Is there objection? [After a pause.] The Chair hears none.

ADJOURNMENT.

Mr. ANDERSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 33 minutes p. m.) the House adjourned until Wednesday, January 26, 1921, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

368. A letter from the Secretary of War, transmitting report of certain cards on file in the office of The Adjutant General of the Army and requesting their disposition; to the Committee on Disposition of Useless Executive Papers.

369. A letter from the Secretary of War, transmitting report of expenditures on account of appropriation "Contingencies of the Army" during the fiscal year ending June 30, 1920; to the Committee on Expenditures in the War Department.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. GREENE of Vermont, from the Committee on Military Affairs, to which was referred the resolution (H. Res. 636) requesting the War Department to furnish information to the Committee on Military Affairs regarding the abandonment of Camp Dodge and providing that pending the furnishment of such information and action thereon that no action toward the wrecking and abandonment of said camp be taken, reported the same with an amendment, accompanied by a report (No. 1227), which said resolution and report were referred to the House Calendar.

Mr. SNYDER, from the Committee on Indian Affairs, to which was referred the bill (H. R. 15876) to reorganize the Indian Service, to expedite the settlement of Indian affairs, and for other purposes, reported the same with amendments, accompanied by a report (No. 1228), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. KAHN, from the Committee on Military Affairs, to which was referred the bill (S. 3516) to authorize the Secretary of War, in his discretion, to furnish quarters at Langley Field, Va., to the civilian employees of the National Advisory Committee for Aeronautics, and for other purposes, reported the same with an amendment, accompanied by a report (No. 1229), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. MONTAGUE, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 14356) granting the consent of Congress for the construction of a bridge across the Savannah River at or near Sanders Ferry, and between the counties of Anderson, S. C., and Elbert, Ga., reported the same without amendment, accompanied by a report (No. 1230), which said bill and report were referred to the House Calendar.

Mr. FIELDS, from the Committee on Military Affairs, to which was referred the bill (H. R. 15664) to authorize the Secretary of War to furnish to the National Museum certain articles of the arms, material, equipment, or clothing heretofore issued or produced for the United States Army, and to dispose of colors, standards, and guidons of demobilized organizations of the United States Army, and for other purposes, reported the same without amendment, accompanied by a report (No. 1231), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. DENISON, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 15750) to authorize the construction of a bridge across the Little Calumet River in Cook County, State of Illinois, at or near the village of Burnham in said county, reported the same without amendment, accompanied by a report (No. 1232), which said bill and report were referred to the House Calendar.

Mr. SUMMERS of Washington, from the Committee on the Public Lands, to which was referred the bill (H. R. 14065) providing for the appraisal and sale of the Vashon Island Military Reservation in the State of Washington, and for other purposes, reported the same with amendments, accompanied by a report (No. 1233), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. PATTERSON: A bill (H. R. 15892) to authorize the refunding of the national debt, and for other purposes; to the Committee on Ways and Means.

By Mr. SCOTT: A bill (H. R. 15893) regulating the manner in which contracts for construction or repair of ships shall be made by the United States Shipping Board and the United States Shipping Board Emergency Fleet Corporation; to the Committee on the Merchant Marine and Fisheries.

By Mr. LANGLEY: A bill (H. R. 15894) to authorize an appropriation to enable the Secretary of the Treasury to provide

medical, surgical, and hospital services and supplies for persons who served in the World War and are patients of the Bureau of War Risk Insurance and of the Federal Board for Vocational Education, Division of Rehabilitation, and for other purposes; to the Committee on Public Buildings and Grounds.

By Mr. DARROW: A bill (H. R. 15895) authorizing the Secretary of the Navy to make such repairs to hospitals and appurtenances as may be necessary; to the Committee on Naval Affairs.

By Mr. BUTLER: A bill (H. R. 15896) authorizing the Secretary of the Navy to continue and to enlarge the construction of the naval hospital at San Diego, Calif.; to the Committee on Naval Affairs.

By Mr. NELSON of Wisconsin: Joint resolution (H. J. Res. 458) restraining all further steps looking to allotment of lands within the Bad River Indian Reservation in the State of Wisconsin until further revision of the tribal roll; to the Committee on Indian Affairs.

By Mr. BROWNE: Joint resolution (H. J. Res. 459) authorizing the President to extend invitations to foreign Governments to participate in a world's dairy congress; to the Committee on Foreign Affairs.

By the SPEAKER: Memorial of the Legislature of the State of Idaho, favoring Federal aid for the building of public roads; to the Committee on Roads.

Also, memorial of the Legislature of the State of Oregon, favoring Federal aid for the construction of roads; to the Committee on Roads.

Also, memorial of the Legislature of the State of North Dakota, urging relief for settlers on Standing Rock Reservation; to the Committee on the Public Lands.

By Mr. HAWLEY: Memorial of the Legislature of the State of Oregon, favoring the passage of the Fordney emergency tariff bill; to the Committee on Ways and Means.

Also, memorial of the Legislature of the State of Oregon, favoring the passage of the Fordney adjusted compensation bill; to the Committee on Ways and Means.

By Mr. KELLER: Memorial of the Legislature of the State of Minnesota, urging an appropriation to aid in the building of public roads; to the Committee on Roads.

By Mr. SMITH of Idaho: Memorial of the Legislature of the State of Idaho, urging additional appropriations for the improvement of public highways; to the Committee on Roads.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. DAVEY: A bill (H. R. 15897) granting a pension to Ida A. Parker; to the Committee on Invalid Pensions.

By Mr. KELLY of Pennsylvania: A bill (H. R. 15898) for the relief of the Post Publishing Co.; to the Committee on Claims.

By Mr. RICKETTS: A bill (H. R. 15899) granting a pension to Phebie Hamilton; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5235. By Mr. DARROW: Petition of Captain Walter M. Gearty Post No. 315 American Legion, of Philadelphia, Pa., favoring fourfold adjusted compensation, the Stevenson bill, and bills and resolutions for adequate hospitalization of disabled veterans; to the Committee on Military Affairs.

5236. By Mr. ESCH: Petition of sundry citizens of La Crosse, Wis., protesting against the Sunday blue laws; to the Committee on Interstate and Foreign Commerce.

5237. By Mr. FULLER: Petition of Illinois State Horticultural Society, protesting against the passage of House bill 12466; to the Committee on the Public Lands.

5238. Also, petition of the Kendall County (Ill.) Farm Bureau Association, favoring the French-Capper truth in fabric bill (H. R. 11641, S. 3689); to the Committee on Interstate and Foreign Commerce.

5239. By Mr. GALLIVAN: Petition of Thomas H. Kearney, Thomas F. Mackey, and Israel H. Farnham, of the National Association of United States Customs Inspectors, favoring House bill 15089 and Senate bill 4693; to the Committee on Ways and Means.

5240. Also, petition of William H. O'Brien, 21 Linden Street, South Boston; Charles McMorrow, 187 Dorchester Street, South Boston; and Francis X. Daly, care of Boston College, Chestnut Hill, all in the State of Massachusetts, in opposition to Smith-Towner bill; to the Committee on Education.

5241. By Mr. MOONEY: Petition of International Association of Machinists, Cleveland Lodge, No. 439, favoring unrestricted resumption of trade and travel privileges with soviet Russia; to the Committee on Foreign Affairs.

5242. By Mr. NEWTON of Minnesota: Resolution of the City Council of Minneapolis, Minn., requesting Congress to assume control of the coal industry; to the Committee on Mines and Mining.

5243. Also, resolution by the City Council of Minneapolis, Minn., recommending to Congress the speedy enactment of Representative KELLEY's bill providing that the deposits in the United States postal savings banks be used to finance home building at a minimum rate of interest, and that Congress enact a law prohibiting speculation in building material; to the Committee on the Post Office and Post Roads.

5244. By Mr. O'CONNELL: Petition of Local No. 390, National Federation of Post Office Clerks, protesting against the demotion of special clerks in the Post Office Department; to the Committee on Reform in the Civil Service.

5245. Also, petition of the Merchants' Association of New York, urging the enactment of House bill 15622; to the Committee on Patents.

5246. Also, petition of Confectioners and Ice Cream Manufacturers' Protective Association of the State of New York, favoring a revision of the war revenue act; to the Committee on Ways and Means.

5247. Also, petition of the American Asiatic Association, New York City, favoring the passage of House bill 7204; to the Committee on Foreign Affairs.

5248. Also, petition of Women's Roosevelt Memorial Association, of New York City, favoring Senate bill 3774; to the Committee on Coinage, Weights, and Measures.

5249. By Mr. RAKER: Petition of the Adlephian Club, of Alameda, Calif., protesting against commercializing our national parks and monuments; to the Committee on the Public Lands.

5250. Also, petition of John B. Miller, president of the Southern California Edison Co., of Los Angeles, Calif., relative to water-power development in the national parks; to the Committee on Water Power.

5251. Also, petition of California Real Estate Association, of Oakland, Calif., relative to the conservation of water resources in the Colorado River basin; to the Committee on Water Power.

5252. Also, petition of California Real Estate Association, of Oakland, Calif., relative to the housing shortage now existing in the United States; to the Committee on Ways and Means.

5253. Also, petition of the Chamber of Commerce of the State of New York, urging the passage of the Johnson bill restricting immigration to the United States; to the Committee on Immigration and Naturalization.

5254. Also, petition of Seth Mann, president of the Pacific Coast Traffic League, protesting against the passage of Senate bill 4524, to amend section 4 of the interstate commerce act; to the Committee on Interstate and Foreign Commerce.

5255. By Mr. RAKER: Petition of Stephen S. Day, of Sacramento, Calif., urging protection of the olive industry of this country; to the Committee on Ways and Means.

5256. Also, petition of J. B. McGinty, of Santa Cruz, Calif., urging a protective tariff for poultry and poultry products; to the Committee on Ways and Means.

5257. Also, petition of Charles E. Clinch, of Grass Valley, Calif., protesting against the 1 per cent tax on sales; to the Committee on Ways and Means.

5258. Also, petition of Los Angeles Ice & Cold Storage Co., protesting against the continuance of the tax now levied against soft drinks; to the Committee on Ways and Means.

5259. Also, petition of California Fruit Growers' Exchange, of Los Angeles, Calif., urging a reduction in county, State, and national taxation; to the Committee on Ways and Means.

5260. Also, petition of Mayer & Weinshenk, wholesale jewelers, and M. Schussler & Co., of San Francisco, Calif., favoring a gross sales tax for all industry; to the Committee on Ways and Means.

5261. By Mr. SCULLY: Petition of certain residents and taxpayers of the borough of Roosevelt, N. J., protesting against the passage of the Kenyon-Anderson bill; to the Committee on Agriculture.

5262. By Mr. TEMPLE: Petition of the Friday Afternoon Club, of California, Pa., in support of the Sheppard-Towner bill (H. R. 10925); to the Committee on Interstate and Foreign Commerce.

5263. By Mr. WEAVER: Petition of sundry citizens of Buncombe and Jackson Counties, N. C., and the Kiwanis Club of

Asheville, N. C., relating to aid for the suffering Chinese and other European peoples; to the Committee on Foreign Affairs.

5264. Also, petition of the Kiwanis Club of Asheville, N. C., favoring the upbuilding of our institutions of learning and also favoring Federal aid in the construction of public highways; to the Committee on Roads.

5265. By Mr. WATSON: Petition of Montgomery County Farm Bureau, Norristown, Pa., opposing any change in the standard time of the country; to the Committee on Interstate and Foreign Commerce.

5266. By Mr. YATES: Petition of B. H. of P. E. O., by Miss Isabella M. Honeur, of Sterling, Ill., writes urging the passage of the Sheppard-Towner bill; to the Committee on Interstate and Foreign Commerce.

5267. Also, petition of C. J. Sell, of Joliet, Ill., favoring the Fess-Capper bill and also urging the appropriation of certain funds for the enforcement of prohibition; to the Committee on Education.

5268. Also, petition of Chicago Building Material Exchange, by Mr. Lemuel F. Owen, business manager, protesting against the restricting or prohibiting of immigration; to the Committee on Immigration and Naturalization.

5269. Also, petitions of the Dry Dock Association of New York and the Atlantic Coast Shipbuilders' Association of New York, both by Henry C. Hunter, secretary, and the National Bottle Manufacturers' Association of the United States and Canada, favoring the passage of House bill 13591; to the Committee on the Judiciary.

5270. Also, petition of Bethany Church of the Brethren, Chicago, favoring the Fess-Capper bill; to the Committee on Education.

5271. Also, petition of Danville Trades and Labor Council, urging the recognition of the Irish republic; to the Committee on Foreign Affairs.

5272. Also, petition of National Malleable Castings Co., of East St. Louis, Ill., the same company, Chicago office; and J. M. Sellers, president Sellers Manufacturing Co., Chicago, favoring House bill 1551 or an adequate substitute directing the Treasury Department to honor Interstate Commerce Commission certificates for partial payments to railroads; to the Committee on Interstate and Foreign Commerce.

5273. Also, petition of A. F. Franks Cigar Co., East St. Louis, Ill., protesting against an increase in tariff on imported tobacco; to the Committee on Ways and Means.

5274. Also, petition of the Review, H. C. Schaub, editor, Decatur, Ill., urging the passage of House bill 15327; to the Committee on Agriculture.

5275. Also, petition of F. H. Noble & Co., Chicago, urging the taxation of bulk sales rather than the luxury tax; to the Committee on Ways and Means.

5276. Also, petition of Illinois Bankers' Association, Chicago, Ill., urging an appropriation for Federal aid work in cooperation with the States; to the Committee on Roads.

5277. Also, petition of Charles T. Flota, adjutant George Hart Post, No. 167, American Legion, Harrisburg, Ill., recommending a certain educational bonus for the ex-soldiers, ex-sailors, and ex-marines of the late war; to the Committee on Ways and Means.

SENATE.

WEDNESDAY, *January 26, 1921.*

Rev. J. J. Muir, D. D., the Chaplain, offered the following prayer:

Praise and thanksgiving become us, Our Father, when we approach Thy throne of grace with due reliance of dependence upon Thee, and beseech Thee to help us constantly, lest we forget our responsibilities. Through Christ our Lord. Amen.

The reading clerk proceeded to read the Journal of yesterday's proceedings when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Gooding	McLean	Smith, Md.
Ball	Hale	McNary	Smoot
Borah	Harrison	Nelson	Sterling
Calder	Heflin	Owen	Sutherland
Capper	Henderson	Page	Swanson
Culberson	Johnson, Calif.	Penrose	Trammell
Curtis	Jones, Wash.	Phipps	Underwood
Dial	Kendrick	Robinson	Wadsworth
Dillingham	Kenyon	Sheppard	Walsh, Mass.
Fernald	Keyes	Sherman	Willis
Fletcher	McKellar	Smith, Ga.	

Mr. MCNARY. I wish to announce that the Senator from Wisconsin [Mr. LA FOLLETTE] and the Senator from Missouri [Mr. REED] are detained on official business.

Mr. HARRISON. I wish to announce the absence of the Senator from Delaware [Mr. WOLCOTT] on account of illness. I ask that this announcement may stand for the day.

The VICE PRESIDENT. Forty-three Senators have answered to the roll call. There is not a quorum present. The Secretary will call the roll of absentees.

The reading clerk called the names of the absent Senators, and Mr. JONES of New Mexico and Mr. POINDEXTER answered to their names when called.

Mr. OVERMAN, Mr. GRONNA, Mr. GLASS, Mr. HARRIS, Mr. ELKINS, Mr. MCCUMBER, Mr. SMITH of South Carolina, Mr. STANLEY, Mr. SPENCER, Mr. KING, Mr. WARREN, Mr. TOWNSEND, Mr. BECKHAM, and Mr. THOMAS entered the Chamber and answered to their names.

The VICE PRESIDENT. Fifty-nine Senators have answered to the roll call. There is a quorum present.

COMMERCE WITH RUSSIA (S. DOC. NO. 365).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting a communication from the Secretary of Commerce submitting an estimate of appropriation in the sum of $50,000 required by the Department of Commerce to further promote and develop commerce with Russia during the fiscal year 1922, which was referred to the Committee on Appropriations and ordered to be printed.

FUEL FOR DEPARTMENT OF AGRICULTURE (S. DOC. NO. 364).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting a communication from the Acting Secretary of Agriculture submitting a supplemental estimate of appropriation in the sum of $19,435.52 required for miscellaneous expenses of the Department of Agriculture to meet the increased cost of fuel, which was referred to the Committee on Appropriations and ordered to be printed.

CLAIMS DUE BY COMMISSIONER OF LIGHTHOUSES.

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Treasury transmitting, pursuant to law, a communication from the Acting Secretary of Commerce reporting claims which have been considered, adjusted, and determined to be due the claimants by the Commissioner of Lighthouses, which was referred to the Committee on Commerce.

COMPENSATION OF UNITED STATES EMPLOYEES.

Mr. JOHNSON of California. Mr. President, I ask unanimous consent for the fixing of a particular day upon which a vote may be had on House bill 5726, known as the minimum wage bill.

Mr. SMITH of Georgia. I object.

Mr. JOHNSON of California. May I inquire if the Senator objects to fixing any specific time?

Mr. SMITH of Georgia. I do.

Mr. JOHNSON of California. I wish to give notice to the Senate that at the conclusion of the morning hour to-day I shall move to set aside temporarily the particular bill which is the unfinished business and proceed to the consideration of House bill 5726.

Mr. SMITH of Georgia. I desire to give notice that I shall insist on proceeding under Rule VIII, so that we can dispose of the measure which was before the Senate yesterday morning, and thereafter take up the other measures on the calendar.

Mr. BORAH. I understood the Senator from California to give notice that his motion would be made after the conclusion of the routine morning business.

Mr. JOHNSON of California. No; after the morning hour to-day.

Mr. SMITH of Georgia. Then I misunderstood the Senator. I thought his notice was that he would make the motion at the conclusion of the morning business.

Mr. JOHNSON of California. I am going to make a similar motion each day, too, I might advise the Senator from Georgia, in relation to this particular bill.

Mr. SMITH of Georgia. I thank the Senator for the information.

The VICE PRESIDENT. Petitions and memorials are in order.

PETITIONS AND MEMORIALS.

Mr. WARREN. I send to the desk a telegram from the members of the Legislature of Wyoming and ask that it be spread upon the RECORD under the rule and referred to the Committee on Agriculture and Forestry.

The telegram was ordered to be printed in the RECORD and referred to the Committee on Agriculture and Forestry, as follows:

CHEYENNE, WYO., *January 26, 1921.*

Hon. FRANCIS E. WARREN,
United States Senate, Washington, D. C.

Senate and house live-stock committees proposing to cooperate with Biological Survey for extermination of predatory animals on near equable basis, taking place of all bounty measures. Governor favorable and live-stock men practically unanimous. In order to properly carry on this work, heartily recommend increase of Federal appropriation over last year. What are prospects?

WM. DALEY.
J. C. UNDERWOOD.
W. M. SPEAR.
P. W. JENKINS.
J. NOBLITT.
CHARLES D. OVIATT.
CHARLES P. STORY.
A. D. KELLY.

Mr. WARREN presented a petition of sundry citizens of Powell, Wyo., praying for the enactment of legislation to secure protection for the beekeeping industry, which was referred to the Committee on Finance.

He also presented a resolution adopted by the George H. Vroman Post, No. 2, American Legion, of Casper, Wyo., favoring legislation restricting the immigration of aliens, which was referred to the Committee on Immigration.

Mr. NELSON presented a petition of the Jacob Ries Bottling Works (Inc.), of Shakopee, Minn., praying for a revision of the internal revenue law as it applies to manufactures of nonalcoholic beverages, which was referred to the Committee on Finance.

Mr. HARRIS presented a resolution of Carpenters Local Union No. 253, of Atlanta, Ga., opposing legislation repealing the Chinese immigration act, which was referred to the Committee on Immigration.

He also presented petitions of the Kirkwood Council, No. 58, Junior Order United American Mechanics, of Kirkwood; Headquarters Newington Council, No. 46, Junior Order United American Mechanics, of Newington; Augusta Council, No. 31, Junior Order United American Mechanics, of Augusta; Enterprise Council, No. 1, Junior Order United American Mechanics, of Atlanta; Tyrone Council, No. 110, Junior Order United American Mechanics, of Tyrone; Mount Vernon Council, No. 14, Junior Order United American Mechanics, of Atlanta; Dalton Council, No. 30, Junior Order United American Mechanics, of Dalton; Lakewood Council, No. 124, of Atlanta; Thomson Council, No. 119, Junior Order United American Mechanics, of Thomson; State Council of Georgia, Junior Order United American Mechanics, of Atlanta; Local Union No. 712, Brotherhood of Painters, Decorators, and Paper Hangers of America, of Atlanta; and Liberty Council, No. 12, Daughters of America, of Augusta, all in the State of Georgia, favoring legislation restricting the immigration of aliens, which were referred to the Committee on Immigration.

He also presented a resolution of the Rotary Club of Savannah, Ga., favoring an appropriation to continue Federal aid to the several States in the construction of roads, which was referred to the Committee on Post Offices and Post Roads.

Mr. LODGE presented a resolution of the Sandwich Quarterly Meeting of Friends, of Bristol, Plymouth, and Barnstable Counties, passed at a meeting held at New Bedford, Mass., favoring the disarmament of this Nation and aiding in the disarmament of all nations, which was referred to the Committee on Foreign Relations.

He also presented a telegram in the nature of a memorial transmitting resolutions passed by the conference of the American Association for the Recognition of the Irish Republic, at Boston, Mass., protesting against deporting the lord mayor of Cork, Ireland, D. J. O'Callaghan, which was referred to the Committee on Foreign Relations.

Mr. OVERMAN presented petitions of the Asheville Kiwanis Club, of Asheville, and the Raleigh Kiwanis Club, of Raleigh, both in the State of North Carolina, praying that an appropriation be made for the relief of the destitute and starving children in China and European countries, which were referred to the Committee on Foreign Relations.

Mr. KELLOGG presented a concurrent resolution of the Legislature of Minnesota, favoring an appropriation to continue Federal aid to the several States in the construction of roads, which was referred to the Committee on Post Offices and Post Roads.

(For resolution see yesterday's proceedings, when presented by Mr. NELSON.)

Mr. CAPPER presented a resolution of the grain marketing committee, American Farm Bureau Federation, of Kansas, favoring legislation to prohibit the short selling of grain and farm products, which was referred to the Committee on Agriculture and Forestry.

He also presented a petition of Farmers' Union No. 1499, of Arkansas City, Kans., praying for the enactment of legislation to prohibit gambling in grain products, which was referred to the Committee on Agriculture and Forestry.

He also presented a resolution of the Kansas State Board of Agriculture, of Topeka, Kans., opposing enactment of legislation imposing a general overturn tax or a flat tax of 1 per cent on lands valued in excess of $10,000, which was referred to the Committee on Finance.

Mr. COLT presented a resolution of the Legislature of Rhode Island, favoring an appropriation for the proper maintenance of the United States Naval Training Station at Newport, R. I., which was referred to the Committee on Naval Affairs and ordered to be printed in the RECORD, as follows:

IN GENERAL ASSEMBLY,
January Session, A. D. 1921.

Senate resolution 26, requesting of Subcommittee on Appropriations of the United States House of Representatives a sufficient sum for the proper and efficient maintenance of the United States Naval Training Station, Newport, R. I.

Resolved, That—

Whereas it appears to be a policy of the Subcommittee on Appropriations of the United States House of Representatives to reduce the appropriations for the United States Naval Training Station at Newport, R. I., to a sum which will not permit the said training station to be operated for the fiscal year beginning July 1, 1921; and

Whereas such reduction of appropriation, resulting as above, will not be for the best interests of the United States Navy in that a station located in the area of largest enlistments and reenlistments would be eliminated and the cost of transportation of recruits to other stations would be excessive and an unwarranted expenditure of public funds, and would otherwise not be for the best interests of the United States Navy; and

Whereas the said training station at Newport is the oldest station in the United States, with a record of fine accomplishments in developing the vigorous type of naval recruit in a climate which tends to develop initiative and keenness to a degree not found in boys trained in localities not so favorably located; and

Whereas the said naval training station at Newport is a distinctive New England institution established as a result of New England's interest in the development of a Navy of the United States second to none in the navies of the world, and it is an institution in which the people of New England are by tradition, historical development, and patriotism intensely interested, and which station by right of location—strategic, historic, climatic, and economic—should be retained: Therefore be it

Resolved, That the Subcommittee on Appropriations of the United States House of Representatives be earnestly urged to appropriate a sum sufficient for the proper maintenance of the said United States Naval Training Station at Newport at least equal to the maximum sum that is appropriated for any other station performing like or similar work for the United States Navy; and be it further

Resolved, That a certified copy of this resolution be sent to each Member of the Congressional delegation of this State in Congress, to the chairman of the Subcommittee on Appropriations of the United States House of Representatives, to the chairman of the House Naval Affairs Committee, and to the chairman of the Senate Naval Affairs Committee.

STATE OF RHODE ISLAND,
OFFICE OF THE SECRETARY OF STATE,
Providence, January 21, 1921.

I hereby certify the foregoing to be a true copy of the original resolution requesting of Subcommittee on Appropriations of the United States House of Representatives a sufficient sum for the proper and efficient maintenance of the United States Naval Training Station, Newport, R. I., passed by the general assembly, and approved by the governor on the 20th day of January, A. D. 1921.

In testimony whereof I have hereunto set my hand and affixed the seal of the State aforesaid this 21st day of January, in the year 1921.

[SEAL.] J. FRED PARKER,
Secretary of State.

Mr. COLT presented a resolution of the Chamber of Commerce of Newport, R. I., favoring an adequate appropriation for the maintenance of the United States Naval Training Station, at Newport, R. I., which was referred to the Committee on Naval Affairs.

CHAPLAINS IN PUBLIC HEALTH SERVICE HOSPITALS.

Mr. McLEAN. Mr. President, I have a petition signed by 300 or more ex-service men who are now in the United States Public Health Hospital near New Haven, in the State of Connecticut. These men appeal to Congress for such authority as may be necessary to enable the Secretary of the Treasury to continue the services of chaplains not only in this hospital but in other hospitals, the Secretary having given notice that all the chaplains will be retired from service on the 1st of February.

Mr. President, I will not put the petition into the RECORD, because it is long; I will not even ask to have it noted; but I wish to say that those who sign it are ex-service men; they are seriously injured; many of them are seriously sick; the death rate among them is very high; and it seems to me that their request is one which Congress can well afford to grant.

I regret that the chairman of the Committee on Appropriations is not present, because I am informed by the Secretary of the Treasury that all that is necessary is to put a proviso into the appropriation for medical attendance to the effect that a certain portion of that appropriation—very small in amount—may be devoted to that purpose. I call attention to the matter

now, hoping that some member of the Appropriations Committee may be present. It does seem to me that these men, who are really dying for their country, ought to be provided with the ministrations of a chaplain.

Mr. GRONNA. Mr. President, as a member of the Appropriations Committee I wish to assure the Senator from Connecticut that all the phases and conditions relating to soldiers and ex-soldiers have been discussed before that committee, and I am sure that everything possible will be done to relieve the situation.

Mr. McLEAN. It may be necessary that the provision which I suggest be made in a deficiency appropriation bill, but I am informed by the Secretary of the Treasury there is money enough in the appropriation for medical attendance, and all that is necessary is that a proviso be inserted that the portion that is necessary for this purpose may be so used.

Mr. GRONNA. Mr. President, in connection with the statement which the Senator from Connecticut has just made, I wish to say that I, like every other Senator, I assume, have received hundreds, yes, thousands of petitions. I have not presented them to the Senate, but as a rule I have forwarded them to the Committee on Finance. However, I wish to ask to have printed in the RECORD without reading one very brief petition from a certain post in South Dakota.

There being no objection, the petition was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

CLEAR LAKE, S. DAK., *January 13, 1921.*

Resolved, That the Charles Curry Post, No. 49, Department of South Dakota, American Legion, goes on record as favoring the following bills now pending in our National Congress and request their passage:

1. The Wason bill, H. R. 13558.
2. The Stevenson bill, H. R. 10835.
3. Hospitalization, France bill, S. 4357, and the Langley bill, H. R. 14315.
4. Rogers bill, H. R. 14961, and the same bill in the Senate, Capper bill, S. 4613.
5. Adjusted compensation bill, H. R. 14157, which has passed the House and is now in the Senate.

The Charles Curry Post also goes on record as favoring the farm-aid features of the adjusted compensation bill, H. R. 14157. The post adjutant is directed to send copies of the said resolution to the Congressmen and Senators of the State of South Dakota in the National Congress and to Senators CUMMINS and KENYON.

The above resolution was passed by the Charles Curry Post, No. 49, Department of South Dakota, American Legion, at its regular meeting, January 7, 1921.

WALTER A. GRONNA,
Post Adjutant Charles Curry Post, No. 49,
Department of South Dakota.

FORT WALLA WALLA, WASH.

Mr. POINDEXTER. Mr. President, in connection with the matter of which the Senator from Connecticut [Mr. McLEAN] and the Senator from North Dakota [Mr. GRONNA] have just spoken, I shall read a memorial, if I may be permitted to do so, from the Legislature of the State of Washington. It is as follows:

OLYMPIA, WASH., *January 24, 1921.*

MILES POINDEXTER,
Washington, D. C.

Senate joint memorial 5.

To the honorable Senators and Representatives in Congress assembled:

Whereas the work of the United States Public Health Service and the Federal Board for Vocational Education throughout district No. 13, comprising Washington, Oregon, and Idaho, has been and now is seriously handicapped by the lack of suitable buildings and grounds for use in the hospitalization and retraining of disabled ex-service men of the World War; and

Whereas representatives of the United States Public Health Service and the Federal Board for Vocational Education, cooperating in the name of humanity and the duty we owe these men, have examined the property of the Federal Government located near Walla Walla, Wash., and known as Fort Walla Walla, now unoccupied and found the same ideally located for their work and containing buildings which will house approximately 400 men and grounds embracing more than 600 acres of extremely fertile land; and

Whereas these buildings can be made ready for use very quickly at a nominal expense, the necessary funds for which being already available in appropriations made by the Federal Government for the hospitalization and retraining of disabled service men; and

Whereas the United States Public Health Service and the Federal Board for Vocational Education have most heartily indorsed the use of the buildings and grounds at Fort Walla Walla for hospitalization and retraining and desire to secure immediate occupancy of same: Therefore be it

Resolved by the Senate of the State of Washington (the House of Representatives concurring), That the Congress of the United States be, and it is hereby, memorialized to take the necessary steps to make the buildings and grounds at Fort Walla Walla available for use by the United States Public Health Service and the Federal Board for Vocational Education for the purpose above mentioned; and be it further

Resolved, That the secretary of state be, and he is hereby, authorized and directed to transmit by telegraph one copy of this resolution to each Senator and Representative in Congress from Washington.

I call the memorial to the attention of the members of the Appropriations Committee, with the hope that in connection with this subject the proper authorization and instruction may be given by law to the War Department to transfer the property referred to for the uses mentioned to the Public Health Service and to the Board for Vocational Education, and that the authority may be granted to the Public Health Service and the Board for Vocational Education to receive the property and use it for the purposes mentioned.

The VICE PRESIDENT. The memorial presented by the Senator from Washington will be referred to the Committee on Appropriations.

PREFERENTIAL EMPLOYMENT OF EX-SERVICE MEN.

Mr. SHERMAN. Mr. President, it is not strictly connected with the subject referred to in the telegram which has been presented by the Senator from Washington [Mr. POINDEXTER], but so nearly so that probably this is a more appropriate place to present the matter I have in mind than may be afforded hereafter. I therefore ask the indulgence of the Senate, by unanimous consent, to refer to a question affecting ex-service men occupying civil places, some in private and some in public positions. Many of them are about to be ousted under State administrations. A very striking example is in my own State.

It has passed into an accepted maxim of public government that republics are ungrateful. The most striking instances of this are found in those who have served their country in its wars. Public attention and often its gratitude is fickle and variant as the weather. The hero of yesterday walks the streets, forgotten, to-morrow. He is shouldered aside by those who know him not by the exigencies of factional and partisan politics and the heartlessness of politicians intent upon building impregnable machines.

Every preference or advantage possible to be given a soldier out of service ought to be written into the laws of the country. Col. J. B. Sanborn, of Chicago, for 30 years gave his untiring service in the Illinois National Guard whenever and wherever it was needed. When the United States entered the World War his regiment was so equipped and disciplined as immediately to be available for overseas work. Upon its arrival in France he was immediately placed with his regiment in the British line and fought with them until the armistice. In civil life since his return he has been on the Illinois State tax commission, where his duties have been discharged with ability and faithfulness to the public. In the bitterness of factional party strife the ascendancy of a new State administration has marked Col. Sanborn for destruction. All his public service, the sacrifice, and the great risks taken when the United States called for men prepared at the moment it seems will avail nothing. Col. Sanborn is a remarkable instance of the necessity of preferring by law wherever possible the former soldier in the public service, whether it be State or Federal.

I take this occasion to pay just tribute to a most patriotic officer and a distinguished citizen of Illinois.

REPORTS OF COMMITTEES.

Mr. PAGE, from the Committee on Naval Affairs, to which was referred the bill (S. 4699) to place Albert Hamilton on the retired list of the United States Navy, reported it favorably without amendment and submitted a report (No. 722) thereon.

Mr. FLETCHER, from the Committee on Military Affairs, to which was referred the bill (S. 2637) to amend an act entitled "An act for making further and more effectual provisions for the national defense, and for other purposes," approved June 3, 1916, reported it with an amendment in the nature of a substitute and submitted a report (No. 723) thereon.

BILLS INTRODUCED.

Mr. JONES of Washington. I desire to introduce a bill which I think might properly go either to the Committee on the Judiciary or to the Committee on Interstate Commerce. I have conferred with the chairman of the Committee on Interstate Commerce, and he is inclined to think that he would like to have the bill referred to that committee. If, after investigating it carefully, he finds that it ought properly to go to the Judiciary Committee he will ask for the discharge of the Committee on Interstate Commerce from the further consideration of the bill and that it may be referred to the Committee on the Judiciary.

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JONES of Washington:

A bill (S. 4919) to provide for causes of action arising out of Federal control and operation of telegraph and telephone systems during the war, and for other purposes; to the Committee on Interstate Commerce.

By Mr. SHERMAN:

A bill (S. 4920) to increase the salaries of Members of Congress and Cabinet officers; to the Committee on Appropriations.

By Mr. HARRIS:

A bill (S. 4921) granting a pension to Paul O. Brownlee; to the Committee on Pensions.

By Mr. CALDER:

A bill (S. 4922) for the relief of J. P. D. Shiebler; to the Committee on Military Affairs.

By Mr. JONES of Washington:

A bill (S. 4923) to authorize deduction of war-risk insurance premiums from the war service bonus payable under the act approved February 24, 1919, and for other purposes; to the Committee on Finance.

ELECTORAL VOTE MESSENGERS.

Mr. SMOOT. Mr. President, I introduce a joint resolution, and it is of such importance that immediate action should be taken upon it, so that it can reach the House for action there. I ask unanimous consent for its present consideration.

The joint resolution (S. J. Res. 248) relieving and discharging from the fine imposed by law and authorizing the payment of messengers appointed by the electors of certain States to deliver the electoral vote of such States for President and Vice President was read the first time by its title and the second time, as follows:

Whereas certain of the messengers appointed by the electors of certain States failed through incorrect legal advice to deliver to the President of the Senate the certified copy of the electoral vote of such States for President and Vice President; and

Whereas certain messengers learning of this erroneous advice delivered such certificates after January 24, and before the passage of this act: Therefore be it

Resolved, etc., That messengers who failed to appear should be relieved and discharged from the $1,000 fine for such neglect imposed, and that the President of the Senate be directed to authorize the payment of such messengers as appeared before January 31, 1921.

The VICE PRESIDENT. Is there objection to the present consideration of the joint resolution?

There being no objection, the joint resolution was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

AMENDMENTS TO EMERGENCY TARIFF BILL.

Mr. JOHNSON of California submitted two amendments intended to be proposed by him to House bill 15275, the emergency tariff bill, which were ordered to lie on the table and be printed.

AMENDMENT TO INDIAN APPROPRIATION BILL.

Mr. FLETCHER submitted an amendment (with an accompanying paper) proposing to increase the appropriation for the relief of distress among the Seminole Indians in Florida, and for purposes of their civilization and education, etc., from $5,000 to $16,000, intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

PRICE OF PRINT PAPER.

Mr. HARRIS. I submit a resolution and ask that it may go over until to-morrow.

The resolution (S. Res. 436) was read and ordered to lie on the table, as follows:

Resolved, That the Federal Trade Commission is hereby directed to inquire into the price of print paper during the last year, and ascertain whether or not the newspapers of the United States are being subjected to unfair practices in the sale of print paper.

MONTAUK INDIANS.

Mr. WADSWORTH. I submit a Senate resolution and ask unanimous consent for its immediate consideration. I call the attention of the Senator from Kansas [Mr. CURTIS] to it.

The resolution (S. Res. 437) was read, as follows:

Resolved, That the Secretary of the Interior be, and he is hereby, requested to report to the Senate where the Montauk Tribe of Indians, once in possession of the land known as Long Island, a part of the present State of New York, now reside; whether tribal relations and a tribal organization are still maintained by them; whether, and if so, to what extent any of them are citizens of the United States; whether the tribe, if still existing as such, owns lands within the limits of the United States to which the Indian title has not been extinguished by cession or otherwise; where such lands, if any, are situate, the extent of the same, by whom they are occupied, and by what tenure held; and whether the tribe, or any of its members, are now under the care or custody, or are subject to the control of, the Interior Department, in any respect, in a manner similar to that of other Indians within the United States.

Mr. CURTIS. Mr. President, I think the Indian Bureau is in possession of all the information called for in the resolution, and I am confident that the desired information could be secured by a letter. I have no objection, however, to the resolution being adopted, although I will state to the Senator from New York that if he will hold up the resolution I will procure the information by letter for him within a week, I think.

Mr. WADSWORTH. Very well.

Mr. CURTIS. Then let the resolution lie on the table.

Mr. WADSWORTH. I am willing to have the resolution lie on the table or to have it referred to the Committee on Indian Affairs.

Mr. CURTIS. Then let the resolution be referred to the Committee on Indian Affairs.

Mr. WADSWORTH. Very well.

The VICE PRESIDENT. The resolution will be referred to the Committee on Indian Affairs.

AMENDMENT OF TRADING WITH THE ENEMY ACT.

Mr. DIAL. Mr. President, I ask unanimous consent for the immediate consideration of Senate bill 4897, to amend the trading with the enemy act. It is unanimously reported from the Committee on the Judiciary.

The VICE PRESIDENT. What is the calendar number of the bill?

Mr. DIAL. It was just reported on yesterday.

Mr. SMOOT. Mr. President, I think we ought to get through with the morning business before we undertake to take bills from the calendar. Therefore I object.

The VICE PRESIDENT. Objection is made.

CHIEF OF MILITIA BUREAU.

Mr. CAPPER. I ask that the resolution which I introduced yesterday asking for certain information from the Secretary of War, be laid before the Senate and have immediate consideration at this time.

The VICE PRESIDENT. The Chair lays before the Senate a resolution coming over from yesterday, which will be stated.

The reading clerk read Senate resolution 432, submitted yesterday by Mr. CAPPER, as follows:

Whereas section 81 of an act entitled "An act to amend an act entitled 'An act for making further and more effectual provision for the national defense, and for other purposes,' approved June 3, 1916, and to establish military justice," approved June 4, 1920, provides that "The Chief of the Militia Bureau shall be appointed by the President, by and with the advice and consent of the Senate, by selection from lists of present and former National Guard officers, recommended by the governors of the several States and Territories as suitable for such appointment"; and

Whereas in compliance with the provisions of this act the governors of 35 States recommended to the War Department the appointment of Charles I. Martin, adjutant general of the State of Kansas, president of the Adjutant Generals' Association of the United States, and a veteran of the War with Spain and the World War, as Chief of the Militia Bureau; and

Whereas it is believed by a large number of National Guard organizations that the appointment of a Chief of the Militia Bureau made on December 29, 1920, ignores the recommendations of the governors of 35 of the 48 States duly filed with the War Department in accordance with the provisions of an act of Congress, and is contrary to the spirit and purpose of Congress in enacting a law providing for such appointment: Therefore be it

Resolved, That the Secretary of War be, and he is hereby, directed to advise the Senate, if not incompatible with the public interest, as to the number, nature, and source of the recommendations filed in behalf of each officer considered in connection with the appointment of a Chief of the Militia Bureau, and present to the Senate all other information in the possession of the department having a bearing on this appointment.

The VICE PRESIDENT. The question is on agreeing to the resolution.

Mr. JONES of Washington. Mr. President, I asked that this resolution come over from yesterday. I really can not see why the Senate should ask the Secretary of War to furnish information of that character. It seems to me it is peculiarly within the province of the Military Affairs Committee to get that information for consideration in connection with this nomination. I take it the nomination has not been confirmed; and it is information that would more properly come to the committee in executive session, with reference to executive business, than to come here publicly to the Senate in response to a Senate resolution.

I will ask the Senator from Kansas why he thinks it necessary to have the Senate pass a resolution of this kind; why the Military Affairs Committee can not secure this information—have the Secretary of War come before the committee and advise the committee fully with reference to the matter?

Mr. CAPPER. We are only interested in getting the facts, and if the information can be obtained in that way it is entirely agreeable to me.

Mr. JONES of Washington. It certainly can be gotten in that way, and I think much better than through a resolution of this character.

Mr. CAPPER. It seems to me there ought not to be any objection to getting it in this way; but if the Senator prefers to have it go through the Military Affairs Committee that is entirely satisfactory to me.

Mr. JONES of Washington. I suggest that the resolution be referred to the Military Affairs Committee.

The VICE PRESIDENT. Is there any objection? The Chair hears none, and the resolution will be referred to the Committee on Military Affairs.

UMI

OSAGE OIL LANDS.

Mr. OWEN. Mr. President, I ask unanimous consent to dispose of the Osage extension bill. It is a local bill, and will take only a few minutes, I think. There is no objection to it, and it involves a very large property in Oklahoma.

Mr. FLETCHER. I suggest to the Senator that there are some other resolutions coming over from yesterday.

Mr. OWEN. Then I will yield, Mr. President.

SUPPLY OF COMMERCIAL FERTILIZER.

Mr. FLETCHER. I should like to call up Senate resolution 435.

The VICE PRESIDENT. The Chair lays before the Senate a resolution coming over from yesterday, which will be stated.

The reading clerk read Senate resolution 435, introduced by Mr. FLETCHER on the 25th instant, as follows:

Resolved, That the Secretary of Agriculture is hereby authorized and directed to ascertain as nearly as possible, and to report to the Senate as soon as practicable, the following: The amount of commercial potash, nitrogen, and phosphoric acid available for fertilizer purposes, and the price of each of these articles as compared with the prices for 1913; and to furnish any suggestions as to relieving the situation in case the amount of any or all of these is insufficient or the price prohibitive, and to report what investigations were made and with what results, mentioned in Senate Document 262, Sixty-fourth Congress, first session.

The VICE PRESIDENT. The question is on agreeing to the resolution.

Mr. JONES of Washington. Mr. President, I think this resolution is entirely too broad. I think it would be possible under the resolution to go to a very great extent to get the information that is called for by it.

The resolution says:

That the Secretary of Agriculture is * * * directed to ascertain as nearly as possible, and to report to the Senate as soon as practicable, * * * the amount of commercial potash, nitrogen, and phosphoric acid available for fertilizer purposes.

Under that language the Secretary could send agents all over the country to ascertain the supply of these various things in different parts of the country; and then he is to advise the Senate of the price of each of these articles as compared with the prices in 1913. Under that they could go into almost all sorts of investigations so far as price is concerned, find the price at one point, the price at another place, and the price somewhere else, and all that sort of thing. Then the Secretary is to furnish suggestions as to relieving the situation in case the amount of any or all of these articles is insufficient or the price prohibitive. The Secretary might deem it necessary to gather considerable information of various kinds in order to submit proper suggestions to Congress.

Mr. FLETCHER. Mr. President, I suggest to the Senator that I think the objections are not well founded, for this reason: This resolution follows precisely, almost word for word, a resolution offered by the Senator from South Carolina [Mr. SMITH], except the concluding part of it, on the 11th of January, 1916. I hold in my hand the report of the Secretary of Agriculture in response to that resolution, which is a very interesting and illuminating document, transmitted to the Senate on the 27th of January; so it took the Secretary just 16 days to give the information requested on the 11th of January, 1916. What I am really after is to have that report brought down to date. The report recites, among other things, on page 6, that "at the same time the bureau has been conducting investigations on laboratory scale for the purpose of improving the present methods," and so forth, and elsewhere shows that a number of investigations were being made at the date of this report by different bureaus of the department looking to solving problems with reference to these materials which enter into commercial fertilizers. I have no doubt, to begin with, that the Secretary has the same information that he had then with reference to the conditions in 1916, and the main purpose is to have him state what has been the result of these experiments since then and to indicate to the Senate the supply of these various materials, which I have no doubt he is already posted on, and the prices and facts of that sort, in order that we may get at, if we can, what is the cause of the high price of commercial fertilizers in this country. The various elements entering into those commercial fertilizers may be scarce, or some of them may not be available, or others may have been developed, and the conditions as they exist to-day ought to be known and every factor affecting the prices of commercial fertilizers generally.

I do not think the Senator will find that there is any need of any extra force or any great amount of extra work to secure this information.

Mr. JONES of Washington. May I ask the Senator if he would be willing to confine in terms the data to be furnished to data now in the Agricultural Department?

Mr. FLETCHER. I am willing to amend the resolution in any way the Senator may desire in that respect. I do not ask for any extended research, but I am quite sure the information is available in the department now.

Mr. ROBINSON. Mr. President, if the Senator will yield, I take it the Senator from Washington would not object to the Department of Agriculture obtaining information from outside sources if that information was readily available and could be obtained without material cost or delay.

Mr. JONES of Washington. Mr. President, there is one thing that I have in mind——

Mr. ROBINSON. If the Senator will pardon a further brief statement, the department might very easily and quickly get in touch with authorities and with organizations that have the information necessary to meet the requirements of the resolution of the Senator from Florida; and there would be no objection to the Secretary communicating with persons who have that information, and obtaining it, if it could be done without material cost.

Mr. SMITH of South Carolina. Mr. President, if the Senator will allow me, part of the duty of the Bureau of Soils of the Agricultural Department is to keep posted on the very matter contained in this resolution.

Mr. ROBINSON. They are in constant communication with persons who have this information.

Mr. SMITH of South Carolina. It is their duty. The Bureau of Soils, under Dr. Whitney, have these matters always under consideration. Just this morning, in my office, one of the officers of the department appeared to give me a report on the experiments in regard to obtaining potash from kelp, and he gave me a very exhaustive résumé of the amount of potash available in this country if facilities were had for obtaining it. They are also posted as to the amount and the average cost of production of phosphoric acid, as well as the sources of nitrogen; and they are as well posted as, or better posted than, they were when I introduced my resolution and they made their reply. It is only a question of their tabulating the facts and reporting them to the Senate, and I think it is of great importance that we should know them, and it will involve no extra expense. It is a mere matter of bookkeeping and a mere matter of collating the information and sending it to the Senate.

I think the fears of the Senator are totally unfounded, because I do not believe there is even in the fertilizer factories themselves a body of men as well posted on the available amounts of these different ingredients and their average cost as is the Bureau of Soils in our department here.

Mr. JONES of Washington. Let me ask the Senator what they want this information for, and why can he not get it by letter from the department?

Mr. SMITH of South Carolina. I think it ought to be in the form in which the Senator from Florida has requested it, because we will send out the information, and it will be of benefit to the farming class of the country.

Mr. JONES of Washington. If the Senator should get the information from the Department of Agriculture in a letter, he could very easily make it public in a way which would make it available.

Mr. SMITH of South Carolina. The Senator from Florida, following the same course that I followed in 1916, wants to get it in an official form, showing not only the interest the Senator has in it but the interest the department has in it, and let it go out as the result of our own efforts.

Mr. JONES of Washington. Let me state briefly what I have in mind. I think the Senate is passing too many resolutions calling upon the departments for information. The information may be very desirable, but much of it can be gotten in other ways. When the Senate sends a resolution down to a department, especially for something of this kind, they must use their clerks for the purpose of gathering the information; they must stop, probably, some certain line of work in which they are engaged in order to meet the request of the Senate. It interferes with the work of the department; it adds to the expense of the department; it adds to the cost of the Government; and, in my judgment, tends to inefficiency in the administration of departmental work.

I would like to see the Senate a little more careful in the matter of passing resolutions. If this information can be secured without very much delay and without very much investigation, largely by the compilation of data which is already in the department, I have no serious objection to the resolution, although I think such a course is really objectionable. I believe the Senator could get the information he calls for by writing a letter to the Secretary of Agriculture. Then, if that information were of such a character that it ought to be given to the public, it could be presented to the Senate.

I ask the Senator from Florida if he has any objection to an amendment, after line 7, inserting:

As shown by data in the office or that can be secured without material expense.

Mr. FLETCHER. I have no objection to that amendment.

Mr. JONES of Washington. I offer that amendment, Mr. President, and want it understood that it relates to all the information sought, the amount that is called for, and the prices.

The VICE PRESIDENT. The Secretary will report the amendment.

The ASSISTANT SECRETARY. On line 7, after the numerals "1913," insert:

As shown by data in the office, or that can be secured without material expense.

Mr. WARREN. Mr. President, I am very glad the Senator from Washington has brought up the subject of the expenses which follow the various calls of the Senate, and for that matter, of the House as well, for official investigations. I have no wish to prevent the adoption at this time, in the proper way, of the pending resolution; but I want to call attention to a matter which I think the Senate ought to take into consideration.

I have in my hand a letter, written to me as chairman of the Committee on Appropriations, by a Cabinet officer who is responsible for responding to a resolution passed by the House of Representatives. This letter gives in detail a list of the expenses which would be incurred in furnishing the information called for. Of course, we can not criticize the House and do not wish to, but the RECORD, which is public, shows that a single individual, I think a Member of the House from the Northwest, offered a resolution providing that the expense of building a certain Army cantonment should be investigated, and called on the department for the information in reference to the matter. Someone suggested that the investigation should cover them all. So the resolution was passed in a very much broadened way, including indictment for prosecution, and so forth.

The Cabinet officer, feeling that he did not have the proper equipment and expert and clerical force, obtained estimates of the cost, after several submissions of the request to experts, as I understand. So the expense is set out in this letter, and it seems that the total expense incurred in answering that one resolution would be $3,744,000, not including traveling expenses, telegrams, stationery, and incidentals, and supervisory and clerical services in Washington. Of course, this is perhaps rather an extraordinary case, but within the last two or three years, and perhaps within the last six months, for that matter, we have sent resolutions to the departments that have resulted in the expenditure of hundreds of thousands of dollars—and it has taken a great many clerks to furnish the information called for, while we are striving, in the appropriations, to cut down the great surplus of clerks, and to cut down the great expenses. But in the face of that comes from time to time a volume of rather careless resolutions, I must say with all respect and without reference to the particular case now before us for action, which result in very great expenses.

Of course, I did not feel that we should appropriate $3,744,000 for the purpose indicated, and so the money has not been appropriated, and I dare say the examination has not been made. I assume, of course, that the House of Representatives received a duplicate letter and statement.

Mr. OWEN. May I ask the Senator if the estimate of $3,700,000 is for merely examining the cantonments?

Mr. WARREN. This was for the help necessary and expenses connected with the proposed investigation of the different cantonments built during the war, here in this country, and a report thereon, the inquiry to be as to whether or not there was graft, and if any, how much, and to determine the cost, and whether the expenses were necessary or not, and to punish the guilty or cause them to be punished. The different items are given here with some particularity as to the class of experts and others whom they must employ. The head expert must get $50 a day, and they must have one at $30 a day, and some at $20, and certain clerks. It shows an earnest desire to comply with the request on the one hand, if they had the help, but on the other hand to serve to show that they must have this appropriation to proceed with it. While I do not believe the letter was sent with any intention of making an example in any way, still we have it before us.

We have not only that, but we have had to appropriate for the contingent fund of the Senate hundreds of thousands where we formerly appropriated ten or fifteen thousand dollars. We have now a bill before us from the House in which they have attempted to cut the Senate contingent fund down to $25,000, which was the outside limit in early times, and I remember years ago we had to fight every year over our expenses. Now we appropriate sixty or eighty or a hundred thousand dollars at a time, in deficiencies and other ways, the very largest proportion of which goes for compliance with these various resolutions. There is no intention on the part of anybody, I presume, to make them cost so very much; hence I want to commend the Senator from Washington for doing exactly what I intended to do, and except for the fact that the matter closed very suddenly I should have brought the matter up when the Senator from Alabama [Mr. UNDERWOOD] was addressing the Senate the other day as to adopting investigation resolutions. We want to be careful about these matters and to confine the area of these investigations to the narrowest possible margin compatible with good government if we care to conduct the Government economically.

Mr. OWEN. Mr. President, I would like to observe that the recommendations from the War Department would justify an investigation of the department which made the recommendation. It is a perfectly outrageous estimate, one that is intolerable.

Mr. WARREN. This estimate is made by the Attorney General of the United States.

Mr. OWEN. It does not make any difference by whom it is made.

Mr. WARREN. It is from the Department of Justice.

Mr. OWEN. It is perfectly preposterous, and it deserves an examination itself. I agree with the Senator, however, with regard to economy in these matters, and I think we ought to pursue a policy of economy; I am in favor of that; but the War Department, I think, has been guilty of all sorts of extravagance.

Mr. SMOOT. Mr. President, in this connection I want to call the Senate's attention to the fact that at times a Senator will rise in the Senate during the morning hour and introduce a resolution to require certain printing. There was one resolution passed without a word against it, no question asked, which cost the Government of the United States $143,000, and most of the printing which came from the resolution was sold as old paper at 40 cents a hundred.

I know of another resolution offered by a Senator which caused an expense in printing of $89,000, and there have not been more than three calls for the documents printed as a result of that resolution that I know of, and they are occupying space now we really need, and we must have a sale of those documents as old print paper.

I think, as the Senator from Alabama said the other day, that all resolutions introduced calling for expenses of any sort ought to be examined into at least and some information given us before they are passed.

Mr. FLETCHER. Mr. President, all of which has nothing to do with the resolution before us. I heartily agree with this idea of saving expense. The Senator from Utah [Mr. SMOOT] mentioned a resolution calling for printing of documents. This resolution does not call for that. The Senator from Wyoming [Mr. WARREN] spoke about an investigation of a cantonment meaning a lot of expense. That has nothing to do with this proposal. There is no extra expense called for by this resolution. The department has this information, or can get it without the expenditure of even a postage stamp.

There is no matter affecting agricultural interests in this country more important than the question of fertilizer. Farmers and fruit growers are deeply concerned about this matter of the high cost of fertilizers, their crops now not yielding enough to pay last year's fertilizer bills in many instances, and they want to know why it is that these articles they need and absolutely require to produce their crops are costing them these excessive prices. The Department of Agriculture can enlighten us upon that subject, and that is all this resolution calls for. All the data could not be set out in a letter. That would not accomplish the purpose at all.

I furthermore say to the Senator from Washington [Mr. JONES] that it is no habit of mine to offer such resolutions. I think this is the first resolution I have introduced in the Senate this session calling on a department for a report on a matter of this kind.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Washington.

The amendment was agreed to.

Mr. JONES of Washington. Of course, I did not intend to reflect upon the Senator from Florida at all for presenting this resolution, and I hope he did not consider it in that way. I did not intend to say anything to reflect upon him. I would not do so under any circumstances.

Mr. FLETCHER. I appreciate that.

UMI

Mr. JONES of Washington. Mr. President, I am not called upon to defend the Department of Justice, but in view of the remark made by the Senator from Oklahoma [Mr. OWEN] I think it but fair to the department that a brief extract should be read from the letter to which the Senator from Wyoming [Mr. WARREN] referred, calling atention to the scope of the resolution which was passed, directing the Attorney General to do certain things. I am inclined to think that the blame rests somewhere outside the Department of Justice office.

I hope the Senator from Oklahoma will notice the language I am about to read from this letter, showing the scope of the resolution which was passed, and calling upon the Attorney General for information and directing him to do certain things.

The letter reads, in part:

> Under date of April 13, 1920, the House of Representatives adopted House resolution 515, which directed the Speaker to refer to me the testimony taken before the Select Committee on Expenditures in the War Department on the subject of camps and cantonments, together with the report of said committee and the minority views on that subject with the request that I institute investigations before grand juries for the purpose of indicting and prosecuting such persons as are guilty of criminal conduct and to institute civil suits for the recovery of any Government funds which have been fraudulently or illegally paid on account of such emergency construction work.

This shows that they called for a tremendous work by the Department of Justice. I have not the exact language of the resolution, but I thought in justice to the department the letter should be placed in the RECORD. I know it is very natural that persons should be disposed to make the very statement that the Senator from Oklahoma made, upon an estimate of that kind coming in, but, in justice to the department, I thought this should be called to his attention, showing that the Department of Justice at any rate is not alone to blame for a matter of that kind, that probably they could not do what the House required them to do short of the expense that they mention.

Mr. OWEN. I want to observe that I do not believe it.

Mr. WARREN. Mr. President, I shall vote for the resolution now before the Senate in whatever form is acceptable to the Senator from Florida [Mr. FLETCHER] and the Senate. Of course, the Senator knows that I was not opposing his particular resolution or the purpose of it, because I am selfish enough, as a farmer myself, to try always to be looking out for the interests of the farmer. But I have thought that some of this flood, if I may so call it, of resolutions that come in at times ought to be checked long enough so that the poor Treasury of the United States may have some friend to speak for it.

The letter is dated the 3d of June, and the envelope containing it is postmarked June 6, which, of course, was in the natural way of business, and consequently it did not reach the Committee on Appropriations until after adjournment of the second session of the present Congress, and hence nothing could be done. But I feel like honoring the Attorney General for calling the subject to the attention of the committees who have charge of the disbursements of the Congress. I assume he took the same action with respect to the House as with the Senate.

I may say that I have trespassed upon this occasion, when I knew as well as any man could know anything beforehand that the resolution of the Senator from Florida would pass, to call attention to the cost of investigations. This one, of course, is the chief of offenders in the matter of size. I wish also to call attention to the fact that our contingent fund has reached scandalous proportions. It seems to me these large expenditures, up into the tens and scores of thousands and even hundreds of thousands of dollars, ought to be provided in some direct legislation, so that Senators may know fully what they are doing, rather than by carelessly allowing resolutions to pass to investigate subjects and matters whose ramifications, before we finish, may reach all over the country and perhaps beyond it.

It is my fortune or misfortune to cite this as a sample. I am perfectly willing, so far as I am concerned, that the whole letter should go in the RECORD, but it is not necessary, because the statement gives the usual class of investigation figures. They are figures that are being paid to-day under resolutions which we have passed. The usual figures for experts are shown. They are hired by the day, and attorneys are hired at the fees stated, and the bills come in here properly certified by the chairman of the committee which is handling the investigation under the resolution, and the money comes out of the contingent fund.

Mr. KING. Mr. President, I should like to ask the Senator from Florida for some information. I observe that the Federal Trade Commission made an investigation and a report some time ago. I was wondering whether they had continued their investigation and have the information which the Senator is seeking.

Mr. FLETCHER. Perhaps that report covers some of the information, in which case the Secretary of Agriculture might refer to it, but the pending resolution also asks for the results of investigations and experiments made by the department itself since 1916, which is a very important feature of the resolution.

The VICE PRESIDENT. The question is on agreeing to the resolution as amended.

The resolution as amended was agreed to.

APPOINTMENT OF POSTMASTERS.

Mr. FLETCHER. There is another resolution at the desk which came over from yesterday.

The VICE PRESIDENT. The resolution will be read.

The Assistant Secretary read Senate resolution 434, submitted yesterday by Mr. FLETCHER, as follows:

> *Resolved*, That the Postmaster General be, and is hereby, directed to send to the Senate the names of all former service men, and the widows of such, recommended by him to the President for appointment as postmasters, and by the President submitted to the Senate for confirmation and not as yet acted upon.

Mr. FLETCHER. In connection with the resolution, I would state that a similar resolution was introduced on a former occasion and referred to the Committee on Post Offices and Post Roads on the motion of the chairman of that committee. Instead of waiting for the action of the committee, I see no reason why the Senate itself should not directly call upon the Postmaster General for a list of the names of former service men, and widows of former service men, who have been appointed postmasters throughout the country. In that event the Senate would have the list of names and locations and could dispose of the matter, if they saw fit, as in open executive session, confirming the nominations or referring the nominations to the Committee on Post Offices and Post Roads.

At any rate the Senate ought, I think, to have the information. Then the Senate could act as it sees fit. If objection is made to the resolution upon the ground that the nominations are before the Senate as in executive session and must be dealt with as in executive session, I have no objection to amending the resolution to read that "as in open executive session," we resolve so and so, in order that action may be taken as in open executive session.

I listened this morning to quite an appeal, under the head of petitions, from the Senator from Illinois [Mr. SHERMAN], presenting the case of former service officers and insisting that they should be properly taken care of. I can see no ground for objection anywhere. These postmasters have been examined, having stood civil-service examination, and have been classified. Under the regulations former service men and widows of former service men, everything else being equal, received the recommendation of the Postmaster General and the appointment of the President under the classified service, and their names are now submitted to the Senate and are on the table, and yet nothing is being done about them.

This morning I received a letter from the town of Celeste, Tex. I do not know where that town is, and I suspect it is not a very large city. Fifty-four persons sign this statement:

> We, the undersigned Republican patrons of the post office at Celeste, Tex., request that you use your influence to secure the Senate confirmation of Robert L. Jones for the postmastership at this place. Mr. Jones volunteered his services in time of need, and we think that is nothing but justice that he should be rewarded for it.
>
> We further believe that the great Republican Party can not afford to fail to recognize those who placed themselves upon the altar of their country.

This is signed by 54 supposedly Republican patrons of that post office. Similar communications have come to me from other portions of the country, from various States. I had a letter yesterday from Pennsylvania, and have had letters from other States.

I scarcely think it is necessary to appeal to the sentiment of our friends on the other side, certainly not to recite the justice and merits of the appointments, to have these designated so that the Senate may act upon them. I believe they will see their way clear to confirm the nominations of former service men and widows of such, as in open executive session, without any reference to the committee and without any further delay. I hope there will be no opposition to the resolution, but if the point is made that it ought to be presented as in open executive session, I am perfectly willing to amend it in that respect.

Mr. TOWNSEND. Mr. President, I recognize the fact that this is legitimate politics. The fact that the Republicans have held up all nominations is politics, and to get some apparent advantage out of the situation is, I say, legitimate.

Mr. THOMAS. Mr. President, I might suggest to the Senator from Michigan that the Republican Party is merely following the good example which this side set for it eight years ago.

Mr. TOWNSEND. Everybody recognizes that fact.

UMI

Mr. FLETCHER. May I interrupt the Senators, to suggest that conditions are not quite what they were eight years ago?

Mr. TOWNSEND. No; we are now in the majority and the Democrats are now in the minority, and therefore conditions are not exactly like they were eight years ago.

Mr. ROBINSON. Mr. President——

Mr. TOWNSEND. I wish the Senator would permit me to proceed, but I will yield to him.

Mr. ROBINSON. The Senator recognizes that the nominations referred to for postmasters sent to the Senate by former President Taft, just prior to the beginning of President Wilson's first administration, were made without regard to the civil service. All nominations in the list now sent to the Senate, and upon which no action has been taken, were made pursuant to the Executive order issued by the President in 1917 and according to civil-service rules and regulations. That is a material change in conditions, and I apprehend that the Senator from Florida [Mr. FLETCHER] had those conditions in mind when he interrupted the Senator from Michigan a few moments ago.

According to the best information which I have been able to obtain there are something over 3,300 postmaster nominations now pending before the Senate, or rather, I should say, that have been sent to the Senate. The Congress of the United States last year inserted in an appropriation bill a provision which required that all appointments for postmaster, where vacancies had arisen, should be made promptly. The appointment of a postmaster does not consist merely of his nomination. Under the Constitution, a postmaster is not appointed until he has been nominated and confirmed. By the law of Congress, passed a year ago, appointments must be made promptly. Is the Senate of the United States willing to violate the law which it passed? I ask the Senator from Michigan whether he thinks that it is consistent for the Senate of the United States to enact a law governing its own business, regulating the disposition of nominations for post offices sent to the Senate, as this law does regulate it, or seeks to do so, at least, and then deliberately disregard that law?

In the list of 3,300 nominations sent to the Senate and now pending here there are, according to the best unofficial information I could obtain, something over 200 nominations of the class referred to in the resolution of the Senator from Florida. My recollection is that the number of soldiers and sailors and their widows who have been selected and who are on the list is 217. Not only is it true that these selections were made under the civil service, but it is also true that the lists embrace a large number of Republicans, some of whom have been appointed to fill vacancies in important post offices. I recall now a case at Portland, Oreg., where a Republican of life-long standing, an ex-soldier, has been appointed to fill a vacancy there, and under the action of the majority his nomination, along with those of many other Republicans, is being held up. Congress having passed the law which regulates the procedure of the Senate or seeks to regulate the procedure of the Senate respecting nominations of this character, I maintain that the Senate ought, out of respect for the statute that it has passed, to make some disposition of these nominations.

As already stated, the appointment of a postmaster consists of two acts: The nomination by the Executive and confirmation by the Senate. The law of Congress requires that such appointments be made promptly and without delay. For several months the Senate has violated that statute; it has disregarded the statute which it deliberately passed. I concede the correctness of the declaration of the Senator from Michigan that its action is tainted or characterized by politics, but I respectfully suggest to the Senator from Michigan, and to other Senators, that even political considerations do not justify the violation of a solemn statute of the United States even by one of the bodies whose concurrence is necessary in the passage of the statute.

We ought to take action regarding these nominations. The resolution of the Senator from Florida [Mr. FLETCHER] ought to prevail as a matter of justice to the men who under the rules and regulations of the department and under the civil-service rules and regulations have received preference in the nominations by reason of the sacrifices and services which they have rendered the United States during the World War. No political consideration, whether it be for the benefit of the majority party or of the minority party, ought to prevail against their rights and the laws which Congress has passed governing their selection.

Mr. TOWNSEND. Mr. President, I think I still have the floor. I started to make a statement in reference to what the Senator from Florida has said, and I now desire to say that I have no objection to this information being obtained from the Post Office Department. I hope the list will be very large, for there is not any question in the mind of anyone that the men who have been privileged under the statute will be recognized for these appointments. It is simply a question of delay for possibly a month or such a matter before action is taken. There is no disposition on the part of anyone to do otherwise than recognize all of these ex-service men and their widows who have been properly appointed to these positions.

The Senator from Arkansas says that they have been appointed under the civil service, and therefore there is a difference between the present situation and the rule that was maintained eight years ago. I think if the Senator is in touch with his colleagues on the other side of the Chamber as well as those on this side he will find that there is very grave doubt as to whether the civil-service rules have been observed in these appointments, and that is one of the matters that we are trying to determine.

It is also true, I will say to the Senator from Arkansas, that, instead of observing the law which he quotes, the administration has held up nominations for months and months before it has sent them to the Senate, leaving many of the applicants in office during all of that time, and then, during the last days of the administration, sending their nominations in for a four-year term. It is a political question to a large extent, but I would not consent that politics should do an injustice in any respect. A delay of these nominations for a month or such a matter would do no injustice to the applicants.

I should like, however, to have the resolution amended. I think the Senate ought to have some information related to that which is sought to be obtained by the resolution but not covered by it. I should like to have the Postmaster General also send to the Senate the names and locations of the post offices to which such nominations have been made; also the names of all former ex-service men and widows of such men who have taken and passed successfully the civil-service examination for postmasters but who have not been recommended for appointment. I think these are matters, if we are looking at it from a political standpoint, that ought to be considered by the Senate. Therefore, Mr. President, I move that the resolution be amended by adding the following:

Also to send to the Senate the names and locations of the post offices to which such nominations have been made; also the names of all former ex-service men and the widows of such who have taken and passed successfully the civil-service examination for postmasters but who were not recommended for appointment.

Has the Senator any objection to such an amendment to the resolution?

Mr. ROBINSON. Will the Senator from Michigan yield for a question?

Mr. TOWNSEND. I yield.

Mr. ROBINSON. Is the Senator from Michigan willing that the resolution shall be made to apply to all nominations that have been sent to the Senate, so as to get a list of all the nominations that have been made? Is that the purpose of the amendment?

Mr. TOWNSEND. No. The amendment is designed to apply entirely to ex-service men and their widows about whom the Senator desired information. I wish, however, not only to include the names of those ex-service men and their widows which have been sent to the Senate, but I wish to know where the offices are located to which they were nominated. I also wish to obtain the names of the ex-service men and their widows who took post-office examinations, passed them successfully, but were not recommended for appointment as postmasters.

Mr. ROBINSON. Will the Senator from Michigan yield further?

Mr. TOWNSEND. I yield.

Mr. ROBINSON. So far as I am concerned, I should be very glad to have that information if the Senator from Michigan desires it; but I desire to ask the Senator the further question, if he will not be willing to broaden his amendment, and I ask also the Senator from Florida if he will not be willing that his resolution shall be broadened, so as to ask for the entire list of nominations which have been sent to the Senate? I think it would be proper for the Senate to take some consideration of the whole subject.

Mr. TOWNSEND. I do not see what possible advantage that would be. Senators have already stated that there are something like 2,500 or 3,000 of these names. I have no knowledge as to their number.

Mr. ROBINSON. If the Senator will pardon me, I have said that there were something more than 3,300 names, if my information is correct, but it seems to me that we should have full information concerning the subject; that we should have a complete list. It could do the Senate no harm certainly, especially in view of the declaration of the Senator from Michigan

that the civil-service rules have not been properly applied in connection with these nominations. I call his attention, with his permission, to the Executive order of March 31, 1917, which, since its issuance, has governed strictly the selection of all postmasters in the United States. If I may, I shall read the order. It is brief.

Mr. TOWNSEND. Very well.

Mr. ROBINSON. The order is as follows:

Hereafter when a vacancy occurs in the position of postmaster of any office of the first, second, or third class, as the result of death, resignation, removal, or on the recommendation of the First Assistant Postmaster General, approved by the Postmaster General, to the effect that the efficiency or needs of the service require that a change shall be made, the Postmaster General shall certify the fact to the Civil Service Commission, which shall forthwith hold an open competitive examination to test the fitness of applicants to fill such vacancy; and when such examination has been held and the papers in connection therewith have been rated, the said commission shall certify the result thereof to the Postmaster General, who shall submit to the President the name of the highest qualified eligible for appointment to fill such vacancy, unless it is established that the character or residence of such applicant disqualifies him for the appointment. No person who has passed his sixty-fifth birthday shall be given the examination herein provided for.

The Senator will observe that the Executive order required an open competitive examination to fill the position and that the name on the list receiving the highest grade must be chosen, except in the case where the residence of the applicant or the character of the applicant is deemed to make him ineligible. That order after its issuance on March 31, 1917, squarely placed the selection of postmaster under the civil service.

But, Mr. President, notwithstanding the declaration of the Senator from Michigan that Senators have complained that the order has been disregarded, I think when he investigates the matter he will find that it has been fairly and honestly complied with. I know that has been so in the State of Arkansas in every instance which has been called to my attention. It is true that, at the request of Senators, in some instances delays have occurred in the sending in of nominations in particular cases; but I point out to the Senator from Michigan that if the department has, at the instance of Senators, disregarded the statute requiring that such appointments be promptly made or be made as promptly as may be practicable, the Senate itself ought not on that ground to justify its refusal to comply with the statute which it passed.

The Post Office appropriation act of last year contains this provision:

Whenever a vacancy occurs from any cause the appointment of a regular postmaster shall be made without unnecessary delay.

That statute seeks to regulate the action of the Senate as well as the action of department, and the Senate has no more right to disregard that statute than has the department.

Mr. FLETCHER. Mr. President, I would have no objection whatever to broadening the resolution to cover what has been suggested by the Senator from Arkansas. I understand that the nominations are all here on the table and are accessible to Senators. The difficulty which I sought to overcome was that they are not segregated as to ex-service men or the widows of ex-service men. It was that particular segregation that I wanted the Post Office Department to make for the benefit of the Senate.

As I have said, the nominations are all here—the whole 3,000 or more—and they are available to the Senate, and, therefore, I have not included a report on all these nominations in the resolution.

I have no objection to the amendment offered by the Senator from Michigan. The purpose of the resolution was to cover the first addition which he seeks to make to the resolution; but as to the second provision, this question arises in my mind: That provision calls for a report of the names of all former service men and widows of all former service men who passed the examination. Would not the Senator agree to such an amendment as this: After the clause "who have taken and passed the civil-service examination for postmasters" add the words "and received as high a grade as any other applicant"?

Mr. TOWNSEND. Oh, Mr. President, that is not the law; the ex-service man under the law is entitled to preference.

Mr. FLETCHER. I understand that.

Mr. TOWNSEND. He is given a certain percentage of advantage which gives him the right to the appointment.

Mr. FLETCHER. Yes; but what I have in mind is this: Suppose the passing mark is, say, 60, and suppose a half dozen of the applicants receive from 75 to 80 or 90. The ex-service man may have received a mark of 60 and therefore may have "passed," but he could not be nominated over and above those who made 90 per cent. I think he is entitled to preference if his mark is equal to that of any other applicant; and therefore I would suggest that it is not sufficient to provide for those who merely passed the examination, but we should provide for those who passed with a grade as high as any other applicant. Then there would be discrimination if they were not appointed; and I should like to have that information.

Mr. TOWNSEND. Mr. President, that would not cover the case. Inasmuch as this is political—of course I do not think the Senator intends it for politics, but the country thinks it is, and the ex-service men think it is for the purpose of trying to embarrass the Republican Senators for not confirming these men—I think if we are going to put anything before them they are entitled to the whole facts, because it is true that we have before our committee, or I have, as chairman of the committee, many complaints that the ex-service men were not recognized in the examinations. We have had several investigations of these things to determine those matters, and those things are now being considered to some extent; and I think if you are going into the subject you had better give us all the facts in reference to the ex-service men in connection with appointments to office.

Mr. FLETCHER. I am perfectly willing to have the resolution cover a situation which would show, if any such conditions ever existed, that the former service men did not receive the consideration to which they were entitled under the law. I am trying to get at that.

Mr. TOWNSEND. May I ask the Senator if he has not had complaints of that kind from his own constituents?

Mr. FLETCHER. I do not recall a single one—not one.

Mr. TOWNSEND. I have had many, and many other Senators have approached me on the same subject.

Mr. FLETCHER. I am willing to meet the conditions that the Senator is endeavoring to have met; but I do not want to put the department in the position of having to say that because a person passed the examination and was not appointed a mistake was made. It seems to me the rule as to preference must be that when all other conditions are equal the service men would be entitled to the preference, and I think the resolution ought to be framed accordingly. I will ask the Senator if he would not be willing to add the words "receiving as high a grade as any other applicant"?

Mr. TOWNSEND. That would not cover the case. The ex-service man does not have to receive as high a grade as any other applicant in order to get the appointment.

Mr. FLETCHER. Then the Senator simply desires to get the information as to whether there have been discriminations and unjust treatment of applicants, so that that would appear? I have no objection to the amendment if that is the purpose of it, and if that is the effect of it.

Mr. TOWNSEND. That is the only object of it.

I want to say, in answer to one other question, that I have not stated here that appointments are being made contrary to the civil-service regulations. I do not know. I know that in some cases investigations were entered upon by the committee, and that fact determined; but I am not making a wholesale charge. I am just stating what Senators on the other side, as well as on this side, are constantly telling me about these nominations.

Mr. SMITH of South Carolina. Mr. President, will the Senator allow me to ask him a question for information? Do I understand that the Senator takes the ground that where the ex-service men barely pass, and there are numerous others, not ex-service men, who have made a higher rating, the rule giving the preference to the soldier—I presume it is a rule; there is no law covering the matter—is to the effect that where an ex-service man stands the examination and passes, regardless of the grade of his passing, just so he passes, he shall be given the preference over all others?

Mr. TOWNSEND. I do not think it goes as far as that. I think the provision is that they adopt some arbitrary percentage which they allow the soldier and give him the advantage of that. I think there is sufficient reason for us to ask for this information if we are going into the question at all.

Mr. SMITH of South Carolina. Mr. President, the reason why I asked that question is this: I can not, then, see any objection to the proposition made by the Senator from Florida, if the chairman of the committee agrees that the rules do not go so far as to state that just so the ex-service man passes, regardless of what other applicants have made, he shall be given the preference. Therefore, in justice to all parties concerned, would it not be the proper thing, in fairness, to indicate in the resolution that wherever an ex-service man was not accepted the reason for it shall be stated in the percentage of his examination?

The Senator from Florida has indicated that the rating shall be given. That was really the purport of his proposed amendment—that the rating of the ex-service man, when rejected, should be given, so that a comparison might be made as to what

was his standing as compared to those who successfully passed the examination. But just to have a list sent in here showing that quite a number of ex-service men were rejected, without the Senate being informed as to what was their rating, is manifestly unfair. If we are going to base our judgment on that, we ought at least to have their rating furnished us, along with the ratings of those that competed with them in their examination.

Mr. TOWNSEND. Mr. President, I do not think any one of these things is of great value to the Senate; but, as I said to begin with, inasmuch as clearly the object of this is political, the soldiers have a right to know, because they are writing me constantly, why they were not appointed. They have passed the examination, and did not receive the recommendation for appointment. Now, those are all matters that we go into. When a complaint is made and substantiated, or they have the proof, we submit it to a committee and try to find out what the situation is as best we can. If we are going into this matter, I should like, for my own information, to get the names and the number of the ex-service men.

Mr. ROBINSON. And the grades.

Mr. TOWNSEND. Just let me finish, please. I should like, for my own information as chairman of the committee, to get a list of all of the ex-service men and the widows of ex-service men who have passed the examination for postmaster. I should like to know it in regard to all the other Government services where the civil-service regulations are applied. It will be helpful to us in trying to determine whether the preference which we all want to show to the ex-service man and the widow of the ex-service man has been shown by the department.

As I said to begin with, there is no disposition on the part of anybody to do injustice to the ex-service men. They will be considered if they have been properly nominated. If they have passed the examination, and we continue the civil-service examination, they will be considered. If not to-day or to-morrow, in six weeks from to-day, or thereabouts, they will be considered.

Mr. FLETCHER. Mr. President, I have no objection to the amendment.

Mr. ROBINSON. Mr. President, I desire to make a suggestion to the Senator from Florida. The resolution ought to be directed to the President of the United States, and he ought to be requested to furnish this information, if not incompatible with the public service. In view of the fact that the President has sent these nominations to the Senate, I think that modification ought to be made, and I think the Senator from Michigan will recognize the necessity for it. The Post Office Department does not know, in theory of law, what official action the President has taken.

Mr. OWEN. Mr. President, I should like to make a parliamentary inquiry? What disposition has been made of the resolution?

The VICE PRESIDENT. The resolution is still pending before the Senate. The Senate is not through discussing it, the Chair presumes. If there is no further discussion——

Mr. ROBINSON. In conformity to the suggestion I have just made, I move, in line 1, to strike out the words "Postmaster General" and to insert in lieu thereof "That the President of the United States, if not incompatible with the public service"; and, in line 2, I move to strike out the word "directed" and to insert the word "requested."

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Arkansas.

Mr. TOWNSEND. Mr. President, that changes the resolution to some extent. The information, of course, is in the Post Office Department. The President knows nothing about it. He has had absolutely nothing to do with it except to report what the Postmaster General has asked him to report. The information which I desire, and which was agreed to by the Senator from Florida, belongs in the Post Office Department, and the Postmaster General alone can furnish it.

If the information as I have proposed it can be attached to the resolution as amended, I shall not object to its passage; but if there is to be an amendment such as the Senator from Arkansas suggests, then I shall object, and if a vote is to be taken on that I am going to suggest the absence of a quorum.

Mr. SMITH of South Carolina. Mr. President, I do not know what the fact is, but I want to suggest to the Senator from Michigan that in determining the qualifications of one of these applicants his educational qualifications are not always the main feature that may determine his fitness or his unfitness for the appointment; and might not the amendment that the Senator has suggested bring out here publicly certain things that would not be very complimentary to certain of our ex-soldiers? Questions of character sometimes enter into the matter; and I presume that if the Post Office Department, after turning down one of these applicants, should be required to explain why it had done these things, it might, in order to vindicate itself, bring into public notice certain things that it has avoided making public by just not giving the applicant the nomination. If the Senator's resolution is carried out, and the Postmaster General is required to give the reasons——

Mr. TOWNSEND. I am not asking for the reasons. That is why I avoided it. I thought it would be beneficial to the committee to know, because it is a matter of concern to us.

Mr. SMITH of South Carolina. Then it would be manifestly unjust to the department for us not to know the reasons. If we are going to say, "Why, here are a whole lot of ex-service men and their widows that were turned down, and other people appointed," when there was ample and good reason for it, in order to make up a full judgment, one that is fair and just, we ought to have all the circumstances attending the matter.

Mr. ROBINSON. Mr. President, in view of the statement made by the Senator from Michigan a moment ago respecting the amendment which I offered, I withdraw the amendment.

The VICE PRESIDENT. The Chair understands that the Senator from Florida accepts the amendment of the Senator from Michigan.

Mr. FLETCHER. That is correct.

The VICE PRESIDENT. The question is on agreeing to the resolution as modified.

The resolution as modified was agreed to.

OSAGE INDIAN LANDS.

Mr. OWEN. I ask unanimous consent to call up for consideration the bill (S. 4039) to amend section 3 of the act of Congress of June 28, 1906, entitled "An act for the division of the lands and funds of the Osage Indians in Oklahoma, and for other purposes." It is a short bill and can be disposed of in a short time.

Mr. SMOOT. What is the calendar number?

Mr. OWEN. Calendar No. 660. It is a bill to extend the time in which the Osages shall enjoy the mineral rights of the Osage territory. It is reported unanimously, the department is in favor of it, the Osages want it, and it is necessary that it shall be passed at this session.

The VICE PRESIDENT. Is there any objection?

Mr. JONES of Washington. The Senator from Kansas [Mr. CURTIS] is not in the Senate——

Mr. OWEN. The Senator from Kansas is for the bill. It meets his approval.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Indian Affairs with amendments.

The first amendment was, in section 2, page 2, line 25, after the word "hereby," to insert the words "renewed on the same terms and"; on page 3, line 1, before the word "conditions," to insert the word "other," so as to make the section read:

SEC. 2. That all valid existing oil and gas leases on the 7th day of April, 1931, are hereby renewed on the same terms and extended, subject to all of the other conditions and provisions thereof, until the 8th day of April, 1956, and as long thereafter as the title to said minerals may be in the Osage Tribe of Indians and oil or gas is found in paying quantities: *Provided*, That the oil, gas, coal, and other minerals upon said allotted lands shall become the property of the individual owner of said land at the expiration of said 50 years, unless otherwise provided for by act of Congress.

The amendment was agreed to.

The next amendment was, on page 4, after line 3, to add a new section as follows:

SEC. 4. That the bona fide owner of the surface of the land shall be compensated by the oil and gas lessees for any damage that may accrue to him arising out of the use of such land for oil and gas mining operations during the period of his ownership; and nothing herein contained shall be construed to deny to the surface owner the right to bring action for such damages in a court of competent jurisdiction.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

TARIFF ON ZINC ORES.

Mr. SPENCER. House bill 6238 provides for a tariff on zinc ores. It is Order of Business No. 468 on the calendar. Those who are interested in the bill have agreed upon a substitute which takes care of the provisions of the bill. The Committee on Finance are willing to consider that substitute, in connection with the bill, and I ask unanimous consent that the bill be rereferred to the Committee on Finance.

The VICE PRESIDENT. Without objection, it is so ordered.

STEAMSHIP FLYNDERBORG.

Mr. DIAL. I ask unanimous consent to call up the bill (S. 4719) conferring jurisdiction upon the United States District Court for the Eastern District of South Carolina to hear and

determine the claims of the owners of the Danish steamship *Flynderborg* against the United States, and for other purposes. The bill has a unanimous report of the Committee on the Judiciary.

Mr. JONES of Washington. I should like to have the bill read.

The VICE PRESIDENT. The Secretary will read the bill.

The reading clerk read the bill, as follows:

Be it enacted, etc., That the Dampskibsselskabet Dannebrog, of Copenhagen, Kingdom of Denmark, the owners of the Danish steamship *Flynderborg*, are hereby authorized to bring suit in personam against the United States, within one year after this act becomes law, to recover damages for any injury to such steamship *Flynderborg* which may have been caused by the U. S. S. *Prometheus*, of the United States Navy, in a collision which took place between the U. S. S. *Prometheus* and the steamship *Flynderborg* on December 4, 1919, in Charleston Harbor, S. C., eastern district of South Carolina; and jurisdiction in admiralty is hereby conferred upon the District Court of the United States for the Eastern District of South Carolina to hear, consider, and determine such suit upon the principles of liability and in accordance with the practice obtaining in like suits in admiralty between private parties and to enter a decree or judgment for or against the United States or such Dampskibsselskabet Dannebrog, including costs.

SEC. 2. That the suit herein authorized shall be brought and prosecuted in accordance with the provisions of the act entitled "An act to provide for the bringing of suits against the Government of the United States," approved March 3, 1887, as amended, in so far as such provisions are applicable thereto, unless otherwise provided herein. The right of appeal and review shall be afforded as now provided by law in like suits in admiralty between private parties.

The VICE PRESIDENT. Is there objection?

Mr. JONES of Washington. Mr. President, reserving the right to object, I want to ask the Senator why this can not be taken care of under the admiralty act we passed last year.

Mr. OVERMAN. The act we passed does not cover this case. This provides for a suit for damages, and is recommended by the Secretary of the Navy. It involves only between $5,000 and $7,000, and no judgment is to be rendered. We have stricken that out. It merely gives jurisdiction to the district court of the United States in admiralty to try the case, involving a matter which is not covered by the admiralty act, to which the Senator is referring. That affected cases in contract; this is a case in tort.

Mr. JONES of Washington. What will be the effect of a decision of the court?

Mr. OVERMAN. It will then be a question whether Congress will pay the judgment.

Mr. JONES of Washington. I thought the Senator said the bill does not authorize a judgment.

Mr. OVERMAN. It authorizes a judgment; but it is for Congress to say whether it will pay it.

Mr. JONES of Washington. It does not provide for the payment of any judgment which may be rendered.

Mr. OVERMAN. No; we struck out that section.

Mr. JONES of Washington. The Judiciary Committee investigated to see that this case is not covered by the admiralty act?

Mr. OVERMAN. Yes.

Mr. KING. I would like to ask the Senator from North Carolina or the Senator from South Carolina whether there is any treaty obligation upon the part of Norway to treat our nationals in the same way we propose by this bill to treat Norwegian nationals. In other words, we are authorizing the national of some nation to sue the United States. What treaty rights do our nationals have with respect to torts which may arise against nationals of Norway? So far as I am concerned, if the Government of the United States has committed a tort—if a Government can commit a tort—against a national of some other country, I am not so sure but what I would be willing that the matter be litigated in our courts, under the rules of admiralty. But it seems to me there ought to be and must be some treaty which cares for circumstances or conditions of this character.

Mr. OVERMAN. I think not; Mr. President, I think in a case of this kind the question has usually been referred to the Court of Claims, where there is a tort. There is nothing in the admiralty act which provides for torts. This being a tort, it concerns the jurisdiction of the circuit court to try this case to ascertain what the amount of damage is. The Secretary of the Navy thinks it is about $5,000. They claim $7,000. It is only a difference of $2,000 as to the amount due.

Mr. KING. If the Senator will pardon me, it is not a question of amount; it is the principle. It seems to me that if we have not established a precedent, this will be a precedent under which, whenever any American vessel—that is, a vessel owned by the Government, a war vessel or a vessel of the merchant marine—has a collision with a ship belonging to the national of some other country, we consent that suit may be brought to recover damages.

Mr. OVERMAN. Mr. President, if any ship from any country is damaged by the wrongful conduct of our officers, there is no reason in the world why we should not let them try it out in the district court and see what damage has been done, if any.

Mr. KING. I stated a moment ago that it does seem to me that on a matter of this kind there ought to be precedents, and there ought to be some treaty provision. Does the Senator know whether there are precedents for this sort of legislation?

Mr. OVERMAN. I do not know of any.

Mr. DIAL. I call the Senator's attention to the letter from the Secretary of the Navy, on page 2 of the report. It reads:

The record clearly shows that the U. S. S. *Prometheus* was wholly responsible for the collision with the steamship *Flynderborg* and the damages sustained by that vessel, and it appears that the claim submitted is reasonable and just.

However, as H. R. 15575 is for the purpose of authorizing the claimant to have its claim passed upon by courts, this department makes no recommendation as to the amount to which the claimant is entitled.

In view of these circumstances, it is respectfully recommended that H. R. 15575 receive favorable consideration and action by Congress.

A similar bill was before the Committee on the Judiciary of the House, and they reported it favorably.

Mr. KING. May I inquire whether the report contains any reference to other cases similar in character, where claims have been preferred against the Government for collisions, where it was alleged that the wrong was upon the part of our Government?

Mr. DIAL. No; I do not know that it does; but the Secretary says it was clearly our fault.

Mr. FLETCHER. I suggest to the Senator from Utah that even if this be regarded as a precedent, is it not a desirable precedent to establish, that a special act of Congress is required in a case of this kind to give our courts jurisdiction to try and determine the case?

Mr. KING. Mr. President, I am not so sure but that that is right, and it may be a greater protection to our Government to have a special act for each particular case. Yet there should be some reciprocity.

Mr. OVERMAN. Mr. President, there are plenty of precedents, so far as that is concerned. I served on the Committee on Claims for eight years, and I know that we frequently had cases like this which we disallowed or allowed. This is to confer jurisdiction on a court, and is better practice, I think, than for it to go to the Committee on Claims.

Mr. KING. I do not think our Government should commit a tort and then take refuge behind its sovereignty and refuse to make reparation. Yet, if it permits aliens or foreign Governments to sue because of alleged torts of the Government, there ought to be reciprocity, and we ought to have like permission to sue the nationals or to sue the Government of some other country where torts have been committed by them upon citizens of the United States.

In view of the report from the Judiciary Committee being unanimous, although I will say that I am a member of that committee and I never knew of the bill, I shall not object to its consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on the Judiciary with an amendment to strike out section 3, in the following words:

SEC. 3. That in case a final judgment is rendered against the United States there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, a sum sufficient to pay such final judgment, which shall be paid such Dampskibsselskabet Dannebrog by the Secretary of the Treasury upon the presentation of a duly authenticated copy of such final judgment.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

EMERGENCY TARIFF.

The VICE PRESIDENT. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 15275) imposing temporary duties upon certain agricultural products to meet present emergencies, to provide revenue, and for other purposes.

Mr. JOHNSON of California. Mr. President, I move that the pending bill be temporarily laid aside and that the Senate proceed to the consideration of House bill 5726.

Mr. HARRISON. A parliamentary inquiry. On yesterday at the close of the morning hour there was pending a bill introduced by the Senator from Idaho [Mr. BORAH], and there was a motion made to proceed to the consideration of that bill. That motion was discussed throughout yesterday, and the Sen-

ate took an adjournment. Is that motion still pending or did the adjournment on yesterday annul that motion?

The VICE PRESIDENT. The Chair is of the opinion that the motion fell with the adjournment of the Senate.

Mr. SMITH of Georgia. Mr. President, I desire to ask a question with reference to parliamentary procedure. Can a motion be made to temporarily lay aside?

The VICE PRESIDENT. The Chair thinks not. The Chair is of the opinion that it is only by unanimous consent that the unfinished business may be laid aside. A motion may be made to take up any other bill.

Mr. JOHNSON of California. Then I move that the Senate take up the particular bill to which I have referred, the minimum wage bill.

Mr. McCUMBER. Mr. President, I understand there is a motion now pending to displace the unfinished business with another bill, which was pending when we adjourned last evening.

The VICE PRESIDENT. The Chair may have ruled incorrectly, but the Chair ruled that that is not the consideration of business within the purview of the clear understanding of what is unfinished business. The unfinished business of yesterday was the bill (H. R. 15275) imposing temporary duties upon certain agricultural products to meet certain emergencies, to provide revenue, and for other purposes. A motion was made to take up another bill. The motion did not prevail, and the Senate adjourned. The ruling of the Chair is, therefore, that House bill 15275 is the unfinished business unless displaced by a motion to take up some other bill, which may be made at any time.

Mr. McCUMBER. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Harris	McKellar	Smith, Ga.
Ball	Harrison	McLean	Smith, S. C.
Beckham	Heflin	McNary	Smoot
Borah	Henderson	Moses	Spencer
Brandegee	Hitchcock	Myers	Stanley
Calder	Johnson, Calif.	Nelson	Sterling
Capper	Jones, N. Mex.	Overman	Sutherland
Colt	Jones, Wash.	Page	Thomas
Culberson	Kellogg	Phipps	Townsend
Curtis	Kendrick	Pittman	Trammell
Dial	Kenyon	Pomerene	Underwood
Elkins	Keyes	Ransdell	Wadsworth
Fletcher	King	Reed	Walsh, Mass.
France	Kirby	Robinson	Willis
Gore	La Follette	Sheppard	
Gronna	Lodge	Shields	
Hale	McCumber	Simmons	

Mr. HARRISON. I have been requested to announce that the Senator from Oregon [Mr. CHAMBERLAIN], the Senator from South Dakota [Mr. JOHNSON], and the Senator from Delaware [Mr. WOLCOTT] are absent on account of illness.

The PRESIDING OFFICER (Mr. ROBINSON in the chair). Sixty-five Senators have answered to their names. A quorum is present. The question is on the motion of the Senator from California [Mr. JOHNSON] to proceed to the consideration of H. R. 5726, the minimum wage bill.

Mr. ASHURST. Mr. President, I seldom explain a vote. The vote should stand for itself.

I am in favor of the minimum wage bill, and I am also in favor of the emergency tariff bill. We of the West are growing weary of producing for the idle consumer, and we are going to insist hereafter that the producer shall be treated fairly. The Democratic Party is going to cling to its ancient moorings, "equal rights to all and special privileges to none," and we are going to demand in behalf of the agriculturists who are producing the grain, the beef, and the mutton upon which the Nation must subsist that no further tariff discrimination be practiced in this country. I am for the emergency tariff bill.

I am just as earnestly for the minimum wage bill. At this particular time I am going to vote to take up the minimum wage bill, but I wish it to be understood because I do so vote that I am not slacking or relaxing in my purpose to have a vote on the emergency tariff bill, if possible.

Some Senators on the other side and some Senators on this side seem very much afraid of voting on the emergency tariff bill. This is no place for men to be afraid. Is there a contingency of which the American Senate is afraid? Why should we not have a vote on the emergency tariff bill? Let those who are afraid dodge or run out into the cloakrooms.

Mr. SMOOT. Mr. President, will the Senator yield?

Mr. ASHURST. I will.

Mr. SMOOT. The only way to get a vote on the emergency tariff bill is for the Senator to vote to keep it now before the Senate.

Mr. ASHURST. At this particular juncture I want it understood that my vote in favor of the motion of the Senator from California is not to indicate a slacking in my desire to pass the emergency bill if I can help in any way.

Mr. JOHNSON of California. Mr. President, I am very grateful for what has been said by the Senator from Arizona, and I quite agree with him in much that has been said. Like the Senator from Arizona, I am for the emergency tariff bill with a couple of amendments that will do justice to the territory which I represent.

Mr. ASHURST. Will the Senator yield to me at this point?

Mr. JOHNSON of California. Certainly.

Mr. ASHURST. The emergency tariff bill pretends a solicitude for the grower of long-staple cotton. Of course, it will be understood that I am going to offer amendments that will remove the discrimination.

Mr. JOHNSON of California. So that the Senator from Arizona and I will find ourselves wholly in accord, I think, upon the emergency tariff bill. We are each of us determined, though we reside far distant from the Capital, that the particular needs and requirements of our territory shall be recognized finally in a tariff bill. So much for that.

If I thought that a hearing upon the minimum wage bill would prevent the passage of the emergency tariff bill I would not ask it, interested as I am in the emergency tariff bill. But we are either going to pass the emergency tariff bill or it will not be permitted to pass, one or the other. If it is to be passed, and that is the design of our distinguished leaders in the Senate, then a hearing upon the particular bill to which I am referring will not interfere in the slightest degree with the passage of the tariff bill. If it is designed to prevent the passage of the emergency tariff bill, then, of course, the hearing upon the minimum wage bill will be of no consequence one way or the other.

Let me recall to Senators, please, with reference to a bill of this sort that may not seem of much consequence to many Members, that we have come almost to a vote upon the bill upon two different occasions. The first occasion when it came practically to a vote in the Senate was the last day of the last session of the Senate. Then, either by design or because it could not be avoided, the bill did not come to a final vote and was not passed. The other day we were very close to a vote upon it. Those who were most opposed to it had spoken in regard to it and presented their views. Then interposed the very important packers' bill and the speeches which were made in behalf of that bill.

I have asked the Senate twice now simply to fix a date when we might vote upon the bill. All that it does is to affect 50,000 poor people; that is all. It gives them a minimum wage of $3 per day. I have not asked to supersede other business in the Senate, nor do I wish to interfere in any degree with the other business in the Senate. I have asked only that the Senate give me to-day, to-morrow, next week, or the week following, a day when we may be allowed to have a vote upon a measure which affects 50,000 people who do not speak for themselves. That has been denied—denied legitimately, I admit—as within the power of a Member of this body, but nevertheless denied, and because it has been denied, and because I can not secure a vote for 50,000 poor people who can not speak for themselves, is the reason why I make the motion—a motion that will not interfere with the emergency tariff bill, that will not in any degree retard any legislation before the Senate, but will enable us finally to have a vote upon a measure upon which we are entitled to a vote. I do hope that the Senate will permit us to proceed to a vote upon this particular legislation.

Mr. KENYON. I should like to ask the Senator from California a question before he takes his seat.

Mr. JOHNSON of California. Certainly.

Mr. KENYON. I appreciate pretty fully and sympathetically his position, because I had charge of the minimum wage bill in his absence at the close of the last Congress, the bill in which he is now interested and the vote upon which was defeated then by a filibuster. Apparently there is a filibuster against the emergency tariff bill. I wish to vote for the tariff bill, because I am earnestly for it. I am earnestly for the bill which the Senator is championing. Suppose his motion is carried, will not the filibuster against the tariff bill simply be carried on as to his bill, and what will really be accomplished?

Mr. JOHNSON of California. I assume that a filibuster will be rather difficult upon the minimum wage bill, but let me answer the Senator in this fashion. If a filibuster is to be carried on, then no harm is done by giving us a chance to have a vote upon the minimum wage bill.

Mr. KENYON. I do not believe there is much chance for the tariff bill on account of the filibuster, and I am inclined to think that the Senator will find that the same thing will refer to his bill.

Mr. McCUMBER and Mr. SMOOT addressed the Chair.

The PRESIDING OFFICER. Does the Sentaor from California yield; and if so, to whom?

Mr. JOHNSON of California. I yield to the Senator from North Dakota, if he wishes to ask me a question.

Mr. McCUMBER. I had supposed that the Senator in the morning hour between 12 to 2 o'clock, upon motion, could probably have brought up his bill. I understood the Senator would do that. That course is open to him, and I have been expecting that the bill would have been so brought up. If the Senator's bill was so near final action, and if there was no filibuster, certainly he could have gotten a vote on the bill during that time. I should have voted with him certainly to take the bill up during the morning hour in preference to going on with the calendar or any other kind of business. I appreciate, as the Senator says, that it raises the wages of 50,000 employees; but the tariff measure deeply affects the interests of 30,000,000 people. I do not know whether there will be a filibuster on the bill; I have had some slight suspicion of that; but I hope when we get into the case that a filibuster will not develop. It seems to me that the Senator might well ask in the morning hour for the consideration of his measure, and let us go on with the unfinished business and test out whether or not there will then be a filibuster.

Mr. JOHNSON of California. Mr. President, if there is no other course which is open to me, certainly I shall pursue that which is suggested, but the difficulties of having a measure considered in the morning hour have been illustrated again and again. This morning they were illustrated quite emphatically.

Now, I wish to impress upon the Senator from North Dakota that he is no more for the emergency tariff bill than I am; I am here to render what assistance I can in behalf of it with, as I suggest, the amendments I have offered here, and which I am sure will meet with the hearty approval of the Finance Committee and of this side of the Chamber. As to the particular motion of mine, if it should be agreed to and if it should subsequently develop that there is a filibuster, that filibuster could be carried on in connection with the other bill just as well. This bill I am certain can be disposed of in a very brief time, though I may be utterly in error as to that.

Mr. McCUMBER. Suppose the Senator has the bill taken up during the next morning hour; we shall then have two hours before the unfinished business is laid before the Senate. In that time we can test the strength of the Senator's measure.

Mr. JOHNSON of California. I shall do so if I shall not succeed in getting the bill up now.

Mr. McCUMBER. The motion to take up the bill in the morning hour is not debatable. I think the Senator will be sure to get a vote upon the motion, and there can be no filibuster in the morning hour on the motion to take up the bill.

Mr. JOHNSON of California. I will say that if I fail in my present effort to have the bill taken up, I shall adopt the course which has been suggested by the Senator from North Dakota.

Mr. HARRISON. Mr. President, I wish to ask a question of the Senator from California.

The PRESIDING OFFICER. Does the Senator from California yield to the Senator from Mississippi?

Mr. JOHNSON of California. Yes, sir.

Mr. HARRISON. If I recall the matter correctly, when the emergency tariff bill was made the unfinished business the question of the importance of the minimum wage bill was brought to the attention of the Senators then in charge of the other measure, which was made the unfinished business by unanimous consent of the Senate. If I recall the circumstances correctly, the Senator from California was in the act of making a motion to take up the minimum wage bill, because, in good faith, he had served notice on the Senate two or three days in advance that at the conclusion of the consideration of the District of Columbia appropriation bill he would call up his motion to make the minimum wage bill the unfinished business. The senior Senator from Utah [Mr. SMOOT] then stated on the floor of the Senate that if the emergency tariff bill were made the unfinished business he would ask to have that bill temporarily laid aside in order to allow the minimum wage bill to be discussed. That is my recollection of the matter.

Mr. JOHNSON of California. I think the statement of the Senator from Mississippi is substantially correct.

Mr. SMOOT. Mr. President, I desire to say that during that debate I said there would be no discussion of the emergency tariff bill at any time during the last week, but that this week it would be taken up and pressed for action. That is what the senior Senator from Utah said.

Now, Mr. President, we might just as well understand the situation as it is. What I think the Senate ought to do is to keep the emergency tariff bill before the Senate as against anything else for two days at least, if not more. During that time we can develop the fact whether or not there is going to be a filibuster against the bill. When that shall have been developed, the question will arise as to what legislation shall then be taken up, and the question will be decided by the Senate.

I desire to say to the Senator from California that I should willingly vote to take up his bill, and I do not wish to vote against it now; but if we are going to dillydally along with the emergency tariff bill we shall never get anywhere. I repeat, I think the emergency tariff bill ought to be kept before the Senate at least during the next two days and discussed as against any other measure and let us see whether there will really be an endeavor made to defeat the bill by a filibuster.

Mr. JOHNSON of California. There is a very easy mode of settlement of this matter, and I should be delighted if it could be arranged. I again appeal to the Senate to give me a day when we may vote upon the minimum wage bill—to-morrow, next week, or week after; any day that will be satisfactory—and I shall be glad to withdraw my motion. If I am not granted that request, I shall be compelled to resort to every means that I can in order to get a vote upon the bill. Now, I ask the Senate again, and I appeal to the Senators, will they grant me a unanimous consent for an hour or a day upon which we may vote upon the minimum wage bill?

Mr. SMITH of Georgia. Mr. President——

The PRESIDING OFFICER. Does the Senator from California yield to the Senator from Georgia?

Mr. JOHNSON of California. I yield.

Mr. SMITH of Georgia. When the Senator from California takes his seat, I desire to be heard.

Mr. JOHNSON of California. May I ask unanimous consent to the effect which I have stated?

Mr. DIAL rose.

Mr. SMITH of Georgia. The Senator from California can not get unanimous consent at present.

Mr. DIAL. Mr. President, I should like to ask the Senator from California a question. Are not the 100,000,000 people who pay the taxes represented here by the same men as represent the 50,000 people who are to be benefited by the bill?

Mr. JOHNSON of California. I assume that the question was not asked to be answered, Mr. President; therefore, it is not necessary to respond.

Mr. PENROSE. Mr. President, in order to test the sentiment of the Senate and the good faith of certain Senators who seem to be unwilling to have the emergency tariff bill considered, I ask unanimous consent that the proposed agreement, which I send to the desk, may be entered into.

The PRESIDING OFFICER. The Senator from Pennsylvania submits a request for unanimous consent, which the Secretary will read.

Mr. HARRISON. Mr. President, I make the point that there is a motion now pending, made by the Senator from California.

Mr. PENROSE. I ask unanimous consent to present the request, as I believe I can ask unanimous consent for anything. If there is anything in the statement that shall cause a nervous shock to the Senator from Mississippi, I will not pursue the matter.

Mr. HARRISON. Nothing in it could cause me a nervous shock; I merely wish to see the business of the Senate transacted in an orderly way.

Mr. PENROSE. I ask that the request submitted by me may be read.

The PRESIDING OFFICER. The Senator from Pennsylvania desires to submit a request for unanimous consent. There is a question pending, being the motion of the Senator from California [Mr. JOHNSON] to proceed to the consideration of the minimum wage bill. Objection is made to the consideration of the request for unanimous consent.

Mr. SMITH of Georgia. Mr. President, I have listened to the Senator from California and his earnest appeal in behalf of 50,000 employees who can not be heard, although half of them, I think, are here in Washington and are constantly being heard. I think that is the trouble about the whole situation; they are heard all the time; that is the reason this bill is here.

I am opposed to the minimum wage bill. I have not made up my mind not to vote for the tariff bill. I am opposed to filibustering against either, and, if there is evidence of a purpose to filibuster against either, I will join in voting to bring on cloture to insure a vote upon either, even upon the minimum wage bill, to which I am opposed.

The Senator from California urges his bill upon the ground that 50,000 Government employees need to be heard, 25,000 of whom are in the District of Columbia. Some time ago I offered an amendment to exclude the 25,000 in the District of Columbia who are heard all the time, so that the bill might apply alone to those who are at home. That amendment, I understand, was

voted down on Saturday during my absence, it having been necessary for me to leave the city on Saturday.

What I want to know from the Senator from California is why he is so solicitous about the 25,000 in the District of Columbia and fergets about the 150,000 in the Army? Why are the dusters around the Patent Office and the assistant messengers sitting around the departments more entitled to consideration and more entitled to $1,080 a year than the soldiers in the Army?

The 50,000, many of them here in the District, sitting around as assistant messengers, have 30 days' leave and 30 days' sick leave. It is not $3 a day they are to receive, but they are to be paid $1,080 a year for 10 months' work, when they can not earn $50 a month on the outside, and many of them are not worth more than that. It is an arbitrary use of the money of the taxpayer to give to those who do not earn it by their work what it is proposed to give them. They are to be advanced alongside of cultivated women who do clerical work; it is proposed to put this very cheap and inferior class alongside of women of cultivation who perform meritorious service.

You strike from the bill all consideration of the soldiers of the Army and the sailors of the Navy; you strike from the bill assistant postmasters at home and all those in the Postal Service. Why does the Senator from California become so solicitous about the 25,000 here in the District, most of whom are now getting more than they deserve, who are to be advanced to $1,080 a year, and have no consideration for the soldiers in the Army or the sailors in the Navy and those in the Postal Service at home. I shall move when this bill comes before the Senate——

Mr. JOHNSON of California. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from California?

Mr. SMITH of Georgia. I yield.

Mr. JOHNSON of California. Does the Senator wish an answer, or is he merely asking his questions for the sake of asking them?

Mr. SMITH of Georgia. I had expected the Senator to speak later on, and I was propounding the questions to be answered then. I will, however, stop now and hear the answer if the Senator prefers to give it at this time.

Mr. JOHNSON of California. I will not interrupt the Senator if he prefers that I answer later on.

Mr. SMITH of Georgia. I did not say that I preferred the Senator to wait; I said that I would yield now if the Senator desired.

We ignore those in the Postal Service in the interest largely of the low-grade employees who are sitting around the departments here in Washington doing practically nothing. The bill provides that the minimum of $1,080 a year shall not apply to the soldiers; it shall not apply to the sailors; it shall not apply to our postal employees, to assistant postmasters, to clerks in the post offices at home. If I am to vote to increase the pay of employees to $1,080 a year, I want to take care of them. I think their claims more meritorious, and they can not be heard except as we speak for them. They are not around the city of Washington, where they speak many times every day. Then here are our employees in Panama and in the Territories. You provide in your bill that the increase shall not apply to them. One-half of those to whom it applies are in the District of Columbia alone.

I can see no merit in this bill. I am utterly opposed to the plan of a flat minimum wage without regard to service rendered. There are some who fall within the provisions of this bill that ought to have more than $1,080 a year; there are some who are not worth that much.

As I have said before, if you pass this minimum-wage bill for the District of Columbia for the benefit of the least useful employees in the District, you justly cause those who render service of value to feel that they ought to be paid more than dusters in the Patent Office and the assistant messengers around the departments; and they ought. They have a right to say: "You have not been just." There are cultivated women doing splendid work at desks who will have $1,080 a year, and the little assistant messenger out at the door, who uses his time in warming a chair as his principal occupation, will get the same amount. They may well feel: "You are not treating us justly. Here I work at my desk with brain and hand, and you propose to pay that little fellow sitting out there on a chair, who does nothing, as much as you pay me."

When you increase pay, regard service. Do not make the pay arbitrary, without regard to service. Let us put up the women to better pay, if we can afford it, and even then the amount these boys and girls are getting is all they are entitled to. By passing this bill you will create dissatisfaction, and just cause for dissatisfaction, in the departments here in Washington. You will create it in the Army, for you will have difficulty in explaining to a soldier who is on duty all the time why he should be paid not half as much as a little messenger sitting in a door here in one of the departments, or a dusting girl in the Patent Office. You will have difficulty in explaining it to a sailor in the Navy, and you will have difficulty in explaining it to your Postal Service people at home, and you can not explain it. You can not show the justice of this discrimination for seven hours and a half of work in Washington City, with 60 days' leave of absence during the year, as compared to these other people who render far more valuable service.

If we are going to increase our expenditures, I can point out a way to spend the money that will be far more helpful. The House Committee on Education has reported favorably the bill creating a department of education and providing for national aid to the States, to be used to advance the cause of education all over our land.

It is true that some, misunderstanding the bill, have claimed that it would create an autocratic control of education here in Washington. That is a mistake. The bill carefully guards the rights of the States to control entirely their educational work. The fund goes to them. They handle it entirely free from any interference by the secretary of education.

That measure would authorize the appropriation of $100,000,000 for educational purposes.

It gives part of it to remove illiteracy.

It gives part of it to teach the English language and to Americanize those in our country who can not read and write in English.

It gives part of it to studying the question of health.

It gives part of it to improve the teachers of the land.

It gives part of it to increase the compensation of teachers in sparsely settled sections of the country. It is a measure which, while introduced by myself into the Senate and by Judge TOWNER in the House, was worked on for months and months by the best, the ablest, the wisest educators of the land. Committee after committee of college professors, committee after committee from the National Educational Association studied the problem; and as a whole it is intended to coordinate the various lines of work provided for to bring about one great result—the improvement of the children of our land, the removal of illiteracy, Americanization by teaching the use of English and teaching to read and write in English all those in our land who now do not even speak it.

Mr. President, when 4,000,000 boys were called to the flag the startling fact came home to us that illiteracy in frightful form existed in the United States, for 700,000 of these 4,000,000 could not read and write. There are those who say that the National Government should contribute nothing to the States toward education; that it should be left exclusively for the States. When we found, upon the call of the boys to the standard, that 700,000 out of 4,000,000 could not read and write, the country awoke to the fact that a national as well as a State responsibility existed.

Many, many boys were rejected on account of their physical condition.

Many, many were unable to understand the oral directions given by their superior officers.

The shortage of teachers all over the land is now well known. The average pay of the teacher in the United States is $600 a year, and yet the Senator from California wishes to pay from the National Treasury a flat $1,080 a year to these little assistant messengers and dusters and elevator girls, while the children of our country are to-day left to a class of teachers who receive only an average of $600 a year, and the ministers only about $700 a year, on the average.

Mr. PENROSE. Mr. President, will the Senator from Georgia yield to me for a moment to present a unanimous-consent request?

Mr. SMITH of Georgia. Without losing the floor; yes.

Mr. PENROSE. Of course. Mr. President, I send to the desk a request for unanimous consent, which I ask to have stated.

The PRESIDING OFFICER. The Secretary will state the unanimous-consent request.

The ASSISTANT SECRETARY. The Senator from Pennsylvania asks unanimous consent that at not later than 4 o'clock p. m. on the calendar day of Tuesday, February 1, 1921, the Senate will proceed to vote without further debate upon any amendment that may be pending, any amendment that may be offered, and upon the bill H. R. 15275, "An act imposing temporary duties upon certain agricultural products to meet present emergencies, to provide revenue, and for other purposes," through the regular parliamentary stages up to and including a vote upon the passage of the bill itself.

Mr. UNDERWOOD. Mr. President, coming at this time, it seems to me that that is a rather remarkable request. It is very clear that the Senators in charge of this emergency tariff bill do not expect to pass it; and they want to put the responsibility for failure to pass the bill upon the idea that it will be filibustered to death, and will not get to a vote.

I really see no reason why, before the end of the session, the bill can not come to a vote. Of course, I do not expect the bill to pass, and neither do you. There is a Democratic President in the White House, and this bill is repugnant to every principle of democracy on a question of taxation at the customhouse.

I have not talked to the President; I can not speak for him; I have not the slightest idea, directly and personally, what he will do; but, knowing that he is a Democratic President, I assume that he would not affix his signature to a bill that is not intended for revenue, that is not a protective tariff, but is a prohibitive measure at the customhouse to cut off the importation of goods for the avowed purpose of increasing their cost, and piling additional costs of living upon the American people.

I can see no objection, from our standpoint, as a party measure, to a vote. As a matter of fact, so far as I am individually concerned, I should like to force the majority in this Chamber to take its individual responsibility on this bill and say to the American people that the Republican membership of the Senate stood not merely for their time-honored doctrine of a protective tariff, but, now that we have become the great creditor Nation of the world, when we can engage in no foreign trade except by reciprocal trade agreements and relations, they are going to close the door on importations and dam back the foreign trade that we may gather from abroad.

Mr. McCUMBER. Mr. President, will the Senator yield to me for a question?

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from North Dakota to ask the Senator from Alabama a question?

Mr. UNDERWOOD. I beg the Senator's pardon. I will yield in just a minute.

Mr. McCUMBER. I merely want to ask one question of the Senator from Alabama. If the Senator from Alabama is so certain that the measure will be vetoed by the present President of the United States, why not consent that we may have a vote on it immediately and determine whether it shall go to the President or not, and then give our attention to other matters?

Mr. UNDERWOOD. If the Senator had listened to me, he would have found that I am trying to express my view on that very subject. If the Senator from Georgia will pardon me for a moment——

Mr. PENROSE. Mr. President——

The PRESIDING OFFICER. Does the Senator yield to the Senator from Pennsylvania?

Mr. UNDERWOOD. I yield.

Mr. PENROSE. If the Senator will permit me, I was very glad indeed to hear him say that he expected that this bill would come to a vote. I would like to ask him whether, in case he does not approve of the date fixed in my request, he will suggest some other date, perhaps more suitable and convenient, on which we can vote on the bill finally?

Mr. UNDERWOOD. If the Senator will allow me, I will come to that later on.

I did not say the President of the United States would veto this bill, and I do not want those words put in my mouth, because I do not know what the President of the United States will do; but I know he is a Democratic President, and if there ever has been a bill introduced in the Congress of the United States that was repugnant to the principles of the Democratic Party on the question of taxation at the customhouse, it is this bill. More than that, it will reap disaster to the very men it is intended to protect and help. So I assume—and it is purely an assumption on my part—that the President would veto it; and, believing in that assumption, there would be no reason, although I am opposed to the bill, not to bring it to a vote.

I am not surprised that the leaders of the majority party in the Chamber, who stand for this bill, this effort to throttle commerce and strangle commerce, want to avoid legitimate debate on it at the proper time. The bill has not been before the Senate for debate. The principal debate on the question has been in the form of suggestions from the other side of the Chamber that there might be a filibuster, and it ought to be laid aside, a clear indication that the majority party in the Chamber has raised the white flag and is preparing a line of retreat from a vote on the bill, not a real effort for its consideration and final vote.

Of course, I am not going to agree to-day to fix a date for a vote on the bill. Within the month a bill merely to create a corporation was debated in the Senate for 10 days; and then to say that a bill which goes to the very business life of the Nation should be disposed of in a perfunctory debate of two or three days is absurd.

If the gentlemen in charge of the bill will keep it before the Senate and allow a reasonable opportunity for debate and real consideration on its merits for the length of time which ordinarily it takes the Senate to pass a bill of this kind, at the end of that time the Senator might ask unanimous consent to have a time fixed for a vote with some opportunity to have it accepted.

Of course, a proposal of this kind, coming at the beginning of a debate, I think it must be apparent to the country, and certainly must be to the Senate and those who know procedure here, is an effort to lay a predicate to retire from the field and go out of the back door of the Senate.

Mr. McCUMBER. Let me suggest to the Senator that if he has any such thing in his mind he might as well disabuse himself of that thought.

Mr. UNDERWOOD. It is not in my mind. It looks to me as if it was in the minds of Senators on the other side.

Mr. McCUMBER. This bill is going to be pressed, and it is going to be pressed to some kind of a vote. It is going to be before the Senate every day until we dispose of it in some manner. If that is the white flag, the Senator can accept it as such.

Mr. SMITH of Georgia. Mr. President——

Mr. PENROSE. Will the Senator permit me one word?

Mr. SMITH of Georgia. I would be glad to if the Senator were interested in this other subject.

Mr. PENROSE. I am greatly interested in the other subject.

Mr. SMITH of Georgia. I hope the Senator will defer his observation and let me bring my remarks to a close. However, I will yield to the Senator, not for a speech but just for a brief statement.

Mr. PENROSE. I ask the Senator from Alabama whether he is prepared to agree on a date certain to vote on this bill. It must be obvious, Mr. President, that the session is drawing rapidly to a close—but a few weeks remain—and the Senator from Alabama, as an experienced legislator, must know that the only way this measure can be defeated in this body is by a filibuster, because there is nearly a two-thirds vote in the Senate in favor of the measure.

Mr. UNDERWOOD. Mr. President, I just said—and I think my language was plain—that I think this emergency tariff bill, which I regard as an iniquity, should be so debated that the country will understand its terms; and until that debate has taken place, which probably will take a week, and it may be 10 days, of legitimate debate, of course, as far as I am concerned, I would not agree to a unanimous-consent agreement to vote. But after that debate has taken place I see no reason why the Senator should not expect a vote. I see no reason why the Senate should not come to a vote on this bill, and I never have.

The PRESIDING OFFICER. Objection is made.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from North Carolina?

Mr. SMITH of Georgia. I yield for a few moments, but not for a speech.

Mr. SIMMONS. I am not going to make a speech, but an observation.

Mr. SMITH of Georgia. I would not be willing to yield more than five minutes.

Mr. SIMMONS. If the Senator consents to yield more than that, I shall not take much longer than five minutes.

Mr. SMITH of Georgia. I would not desire to, because I would like to bring my remarks to a close.

Mr. SIMMONS. I think it is rather important that some discussion take place with reference to the proposition of the Senator from Pennsylvania [Mr. PENROSE].

Mr. SMITH of Georgia. I hope the Senator will do that when I have finished my remarks.

Mr. THOMAS. Will the Senator yield to me for two minutes?

Mr. SMITH of Georgia. Yes.

Mr. SIMMONS. I understood the Senator had yielded to me.

Mr. THOMAS. I thought the Senator from North Carolina said he would not speak if he were to be limited to five minutes.

Mr. SIMMONS. I said I would not speak very long, but that I did not like to be limited to five minutes.

Mr. SMITH of Georgia. Then I would rather not yield.

Mr. THOMAS. I thought the Senator from North Carolina had yielded the floor.

Mr. SMITH of Georgia. I want to finish my remarks.

Mr. SIMMONS. I hope the Senator from Georgia will yield me 10 minutes. I could get through in 10 minutes.

Mr. SMITH of Georgia. I will not.

Mr. SIMMONS. Very well. I will wait until he gets through.

Mr. THOMAS. Mr. President; it is my intention, as soon as I am physically able to do so, to discuss this bill upon its merits. I have no intention of filibustering against it, but I can not discuss it in an hour or two hours or in a single session and do justice to it. I regard it in many respects as the most iniquitous piece of legislation ever presented to the American Congress for consideration, to this Congress or to any other Congress. In consequence, I deem it my duty to spread upon the record my reasons for opposing it.

I fully concur with the suggestions made by the Senator from Alabama [Mr. UNDERWOOD]. I see no reason why we can not reach a vote. I shall not be a party to preventing a vote ultimately upon the bill, but I am certainly opposed to restricting debate at this time in this body by a request for unanimous consent which is to take effect within the next three or four days.

Mr. SMITH of Georgia. Mr. President, the Senator from North Carolina feels that as a matter of courtesy I ought to yield to him, and there is no one in the Senate I would extend a courtesy to quicker than I would to the Senator from North Carolina, whom I esteem so highly, and I yield to him for just as long as he cares to talk, if the Chair will permit me to do so.

Mr. SIMMONS. I shall take but a few minutes. I would not ask the Senator from Georgia to yield to me but for the fact that I feel that a studied effort is being made to put the minority side of this Chamber in a false and misleading attitude.

I have noticed during the past 10 days an effort, not only in this Chamber but in the Republican press of the country, to create the impression that the minority Members of this Chamber were, in advance of the taking up of this bill for consideration, indirectly filibustering against it. Any prolonged discussion that has taken place upon any of the measures which have come before the Senate up to this time during this session, or at least within the past 10 or 15 days, has been reported by certain mouthpieces of the majority side of the Chamber in the newspapers as a scheme for delaying the consideration of this measure.

On yesterday, Mr. President, when this bill was up, the Senator from North Dakota [Mr. MCCUMBER] consumed more than two hours in the discussion of this measure, pertinent discussion, proper discussion. Those two hours of discussion on his part dealt with only one item of the dozen or more items in this bill. The Senator from Mississippi [Mr. HARRISON] replied to that speech.

Mr. McCUMBER. Will the Senator yield to me for just a moment, because I know he wants to be accurate?

Mr. SIMMONS. Yes.

Mr. McCUMBER. I was on my feet just an hour and three-quarters, and in that hour and three-quarters just one-half of the time was taken by others, who, under the guise of asking questions, discussed the matter. So I did not speak over three-quarters of an hour.

Mr. SIMMONS. I was present and heard the discussion. The questions were all pertinent to the line of discussion the Senator from North Dakota was pursuing, and they brought out information in connection with the subject he was discussing, and they were not intended as a filibuster nor to consume the time.

Mr. McCUMBER. I wanted the Senator to understand that all the time taken in discussion was not in my discussion, although the other was very appropriate.

Mr. SIMMONS. The point I was about to make, Mr. President, was that after the Senator had consumed, if not two hours, then an hour and a quarter, in discussing his idea of this bill, the Senator from Mississippi [Mr. HARRISON] undertook to reply to him. I undertake to say that no stronger speech nor one better directed to the very heart of the controversy between the two sides of this Chamber upon this question has been made, on any question before the Senate since it met, and no stronger speech in support of the position which he took can probably be made. Every minute of the time of the Senator from Mississippi yesterday was consumed in legitimate discussion of the issues involved in this bill. Yet, Mr. President, this morning in the newspapers, in glaring headlines, is the intimation that the Senator from Mississippi took up the whole time of the Senate on yesterday, and that the purpose of his remarks was a filibuster against the passage of this bill.

Mr. PENROSE. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from Pennsylvania?

Mr. SIMMONS. In just a moment. So, I say, Mr. President, that there is a studied effort, apparently, to put this side of the Chamber in a false attitude with reference to this measure.

Now I yield to the Senator from Pennsylvania.

Mr. PENROSE. Mr. President, will the Senator from North Carolina [Mr. SIMMONS], who is the minority leader on this particular legislation, and an experienced legislator, and who doubtless knows that if an indirect filibuster is maintained on appropriation bills and other miscellaneous measures which come before the Senate, it is equally taken in destroying the prospects of the tariff bill—would he consent and use his great influence with his party to agree to a date certain, to vote on this measure so that the House of Representatives will have ample opportunity to consider, and I hope concur, in the Senate amendments, and that the bill may go to the President for his consideration?

Mr. SIMMONS. Mr. President, I am afraid that if I were to say I would do so I would disappoint the Senator from Pennsylvania so much that I believe I will not say it just now.

Mr. PENROSE. Mr. President, I have lived through disappointments all my life, and I will take a chance on it if the Senator will promise to cooperate to that end.

Mr. SIMMONS. When the Senator has finished I will endeavor to answer him.

Mr. PENROSE. I should like to ask the Senator whether he will agree to the 15th of February, or some other date that is reasonable, and use his great influence toward getting a vote on that date?

While I am on my feet I wish to state distinctly to the Senator and to the Senate that it is the purpose of the majority of the Finance Committee, and I believe a majority of the Republicans and a considerable number of Democrats, to insist that the bill shall be kept before the Senate from now on and debated and considered with due regard to appropriation measures, so that if it should fail, which I hope will not be the case, the country will know upon whose shoulders the blame must lie.

Mr. UNDERWOOD. Will the Senator allow me to ask him a question? What does the Senator mean when he says "with due regard to appropriation measures"?

Mr. PENROSE. I mean a legitimate consideration of appropriation measures, and not a discussion which on its face is branded as a filibuster, a filibuster that is aimed at this bill under the guise of a lengthy debate upon some appropriation bill.

Mr. SIMMONS. If the Senator from Pennsylvania is through, I shall undertake to answer him. I was discussing the question of a filibuster. Before I come to the question asked me by the Senator from Pennsylvania I wish emphatically to repudiate the idea or suggestion that I, as the ranking Democrat upon the Committee on Finance, have taken any part in or have any sympathy with a filibuster against the measure. I do not believe that any such filibuster has been undertaken or that any such filibuster has been arranged for. I believe that the Senator from Pennsylvania will be gratified if it will gratify him to get a vote upon the bill, and I am not quite sure that it will. I believe that he will get a vote upon the bill because I am not aware of anything, and nothing has transpired here so far as I have observed to indicate any purpose on the part of this side of the Chamber to filibuster the bill to death. However, there is a feeling upon the part of Members of the Senate on this side of the Chamber, especially those who oppose the legislation, that the bill ought to have thorough and full discussion, as every great tariff measure ought to have.

The bill embraces practically all the staple products of agriculture. It proposes to place upon those products, even those that are capable of being affected by a tariff, rates and duties so far in excess of the Payne-Aldrich duties that the duties imposed by that measure seem positively lost in comparison with them. Not only the agriculturists of the country, but the consumers of the country are deeply interested in the proposition contained in the bill. It is a radical tariff measure affecting the most important industry of the country.

When we were discussing the Payne-Aldrich bill Senators on both sides of the Chamber who were here then will remember how prolonged the discussions were.

There was no purpose to defeat the bill by a filibuster. The discussions were purely for the purpose of enlightening the Senate and the country. In the pending bill are contained four or five of the most seriously controverted questions that arose upon the Payne-Aldrich bill. In this bill there is a proposition to place an exorbitant tariff upon sugar. Does not that raise one of the most mooted questions of tariff that we have ever dealt with in this country; and is not the proposition so radical as to invoke discussion?

The bill contains a provision with reference to a duty on hides. Senators will remember that when the Payne-Aldrich bill was before the Senate for consideration the Republican Party then was divided upon the question of whether hides

should be placed upon the free list or upon the dutiable list, and as a result of the discussion over hides the time of the Senate was taken up for probably 8 or 10 days. That question has been again raised in this bill.

Mr. JOHNSON of California. Will the Senator from North Carolina pardon an interruption?

Mr. SIMMONS. Certainly.

Mr. JOHNSON of California. I would not interrupt, but I am called to a committee meeting. Will the Senator permit me to withdraw my motion? I am compelled to go away, and I wish to withdraw the motion which was made.

The PRESIDING OFFICER. The Senator from California withdraws his motion to take up the minimum wage bill.

Mr. SIMMONS. Not only that, but there is involved in the bill a discussion of all the questions that were raised in the discussion of the Payne-Aldrich bill by the proposition to amend Schedule K. This is positively the same proposition that was discussed then, except it is now proposed in this bill, to be disposed of, according to the contention of Senators on the other side, after two or three hours' debate, to restore and increase the duties of the Payne-Aldrich bill upon wool in this country that involved a controversy that raged here for weeks.

I need not go on enumerating, but in this bill, I say, are such questions, and I have named three of the most controverted tariff questions that have ever been raised in the country. Senators will remember how long we discussed wheat when we were considering the reciprocity treaty with Canada. All the discussions that ran on here for months with regard to that treaty practically revolved around the wheat question, and yet here we have these three great questions involved in this bill—the duty on wheat, the duty on sugar, and the duty on wool—and Senators on the other side insist that we shall dispose of the controversies over the propositions affecting these subjects after two or three days' discussion. When Senators on this side say that we want reasonable discussion of those questions and reasonable time to present our views to the Senate and to the country, it is said that we are filibustering.

The farmers have been misled by a shrewd, cunningly devised propaganda as to the effect of the tariff rates upon their industry. I say that it is propaganda that has brought about this change in sentiment among the farmers. Farmers who have always known or claimed to know that the tariff could not affect the prices of their products one way or the other have, as a result of this propaganda, come to believe that it will affect them. Is it not important, especially to those who know that the farmer has been misled, that those who represent farming districts and want their constituency to understand the facts with reference to the proposition upon which they are called upon to vote as affecting their interests, should demand full and ample time for the purpose of discussing the matter and presenting to the country the facts, showing the millions of our constituents that they have been misled by propaganda probably inaugurated and promoted for the purpose of creating a false sentiment among the farmers by throwing them a sop in the form of protection, thus causing them to stop their opposition to the high and exorbitant tariff rates which it is proposed later to impose upon the products which they do not consume but which they buy.

I say now, frankly, that Senators on the other side are not going to intimidate us by talking of a filibuster. This may be a little popgun measure in their estimation. They may be telling the country that it is a little popgun bill that ought to be disposed of quickly, that it is to meet an emergency, but they have slipped into the bill the highest rates ever proposed in the country upon three of the greatest products of the country—wheat and wool and sugar. We on this side are determined that there shall be full and free discussion of the bill. After that has taken place, then I am willing that there shall be a vote.

But what is the proposition of the Senator from Pennsylvania [Mr. PENROSE]?

His very proposition bears upon its face the purpose and the intent to create a situation that will enable the other side to say that the Democratic side is killing the tariff bill by a filibuster. What is his proposition? After the bill dealing with these important subjects in the way it does deal with them shall have been under discussion in the Senate for less than four hours, only two speeches having been made upon it, he rises here and asks for unanimous consent to vote on it early next week, for the purpose, doubtless, of saying to the country as soon as it is refused, "See how the Democrats are trying to filibuster the bill to death."

Why, Mr. President, I take it that the Senator from North Dakota [Mr. MCCUMBER] would not have devoted as much time as he did yesterday to a discussion of the effect of the bill upon the wheat industry if he had not considered the matter of very great importance from his standpoint. But the Senator knows that his standpoint is not acquiesced in by everybody. The Senator knows that his position in respect to the bill is going to be challenged, and vigorously challenged, and the Senator expects to discuss that later in extenso.

We could not, in my judgment, discuss the wheat question alone under several days of debate. I know we can not discuss the sugar question in less than several days of debate, and I know that we can not discuss the wool question properly without several days of debate, because there is no emergency that hurries Senators to present a measure dealing with duties on those products. It is for the purpose of fixing a high rate here and getting it swiftly through the Senate under the guise of an emergency. After we have deliberated upon the bill properly, after we have given it the consideration that a tariff bill of its wide and sweeping character should have, so far as I am concerned I shall consent to fixing a day to vote; but at this time, no, because no one can tell to what extent legitimate discussion of these matters may be necessary in order to develop the conflicting views of Senators upon both sides of the Chamber.

Mr. SMITH of Georgia. Mr. President, I had not intended this afternoon to call attention to the bill creating the department of education, but when the Senator from California [Mr. JOHNSON] sought to supplant the tariff bill pending before the Senate with a bill which, if made logical, must run up into the hundreds of millions of dollars by including the soldiers and sailors, and all Government employees in the Postal Service, and all who are in the Territories, at a minimum compensation of $1,080 a year, and when perfected to be made logical, the bill would have increased our pay roll $250,000,000 a year, without prior purpose I called attention to the bill creating a department of education, and to the fact that, if we could appropriate so large a sum of money we could do it in a much more intelligent and serviceable way by increasing the compensation of the teachers of our country, whose average pay is not over $600 each per annum.

Mr. KING. Mr. President, will the Senator from Georgia yield?

Mr. SMITH of Georgia. I yield.

Mr. KING. While the Senator from Georgia is alluding to the effect of the passage of the minimum wage bill in its present form, perhaps he did not include in the large figures which he gave—and if he would include it, it would increase the total—this further factor, namely, that if we make the minimum wage $1,080 per annum, obviously it becomes a datum line from which all other wages must be increased; so the result would be that if the minimum is put at $1,080 every step above that must be increased above existing law.

Let me say to the Senator that a number of employees of the Government have called upon me and insisted that if $1,080 be paid as a minimum wage, then their wages should be correspondingly increased. The clerks and bookkeepers who are now getting from $1,800 to $2,400 or more per annum necessarily would have to have their wages increased; so that ultimately we should have an annual expenditure above the existing one of many millions of dollars.

Mr. SMITH of Georgia. The statement of the Senator from Utah is undoubtedly correct. If the compensation of other employees based upon the value of their service is to be increased upon the theory that their service is to be paid for according to its equivalent value, the minimum and lowest service being $1,080 a year, I have no doubt that the increase would amount to $250,000,000 more than the mere increase of $250,000,000 annually which would be caused if all employees were raised to a minimum of $1,080 a year.

I have called attention to the compensation of the teachers, and I have called attention to the bill which has been favorably reported in the other House and which I hope will be reported favorably in the Senate.

Mr. MCCUMBER rose.

Mr. SMITH of Georgia. I am only going to take five minutes, if the Senator will let me finish. I should like to do so. I repeat, I hope the educational bill will be favorably reported in a short time from the Committee on Education and Labor of the Senate. A little later on I hope to discuss that bill somewhat in detail before the Senate; I wish to analyze its provisions.

While Mr. TOWNER and I respectively presented the bills in the two Houses, as I have heretofore stated, our help was not great in the preparation of the measure. It received the most careful consideration from the ablest educators of the land. It has been indorsed by more people than has any other measure, I think, that ever has been pending in Congress, certainly since I have been in the Senate.

It has been indorsed by practically all of the educators of the land; it has been indorsed by practically all of the women's

organizations of the land; it has been indorsed by innumerable chambers of commerce and agricultural organizations; it has been indorsed by the federation of trades; and I believe to-day it is receiving support from at least two-thirds of our constitutents who call upon us to make it a law.

Mr. President, I had rather not discuss the subject further at the present time, but I should be glad to add to my remarks an analysis of the bill by the National Educational Association and also a short editorial from the Masonic Standard, if there is no objection.

The PRESIDING OFFICER (Mr. KING in the chair). Without objection, it is so ordered.

The matter referred to is as follows:

[Special Bulletin No. 7, National Education Association, Washington, D. C.]

THE SMITH-TOWNER EDUCATIONAL BILL (H. R. 7 AND S. 1017).

(Introduced by Senator HOKE SMITH, of Georgia, and Congressman HORACE MANN TOWNER, of Iowa).

ANALYSIS.

Section 1. Creates department of education and secretary of education.
Section 2. Assistant secretary and other subordinate positions.
Section 3. Transfer of offices, bureaus, etc., to department of education.
Section 4. Powers and duties of secretary of education.
Section 5. Duties and scope of department.
Section 6. Appropriation of $500,000 for administrative purposes.
Section 7. Appropriation of $100,000,000 to be apportioned as specified.
Section 8. Apportionment of $7,500,000 for removal of illiteracy.
Section 9. Apportionment of $7,500,000 for Americanization.
Section 10. Apportionment of $50,000,000 for equalizing educational opportunities.
Section 11. Apportionment of $20,000,000 for physical education, including health education and sanitation.
Section 12. Apportionment of $15,000,000 for preparation of teachers.
Section 13. Conditions under which States may receive apportionments.
Section 14. Administration of act by State and local authorities.
Section 15. Duties of secretary of education in relation to States.
Section 16. Duties of Secretary of the Treasury in relation to act.
Section 17. Reports of States on administration of the act.
Section 18. Reports of secretary of education to Congress.
Section 19. Date of taking effect and repealing clause.

Schools and the means of education shall forever be encouraged. (Ordinance of 1787.)

"I hope the time may come when our country shall guarantee to all an unfettered start and a fair chance in the race of life." (Abraham Lincoln.)

WHY SHOULD THERE BE A DEPARTMENT OF EDUCATION?

There should be a department of education with a secretary in the President's Cabinet for the same reasons that there is a Department of Agriculture. Education is a subject of first importance to the Nation and should receive the highest recognition. It has been accorded such recognition by every other great nation in the world.

Fifty years ago Agriculture and Education were bureaus in the Department of the Interior. In 1889 Agriculture was elevated to departmental rank in recognition of its importance. Since then the department has developed wonderfully. The studies and investigations which it has carried on and the assistance which it has given to the States and the people have been of inestimable value. But all this time Education has remained in a bureau of the Interior Department with very meager appropriations for its support. Why should the Government give more attention to the promotion of agriculture than to the promotion of education? Why more recognition to live stock than to children?

The war demonstrated the importance of education from a national standpoint, and the lessons taught by the war have been emphasized by more recent experiences. It is conceded by all that education is essential to the life of our Nation. A government of the people must necessarily be determined by the character and intelligence of its citizens. Anarchy and social disorders thrive on ignorance. The welfare and perpetuity of our Nation demand that all possible encouragement be given to the States in the development through education of a citizenship physically and intellectually sound, and imbued with the spirit and ideals of true Americanism. Thus only can our Republic be made safe, efficient, and enduring.

To accomplish a great national purpose there must be a national center from which shall radiate national influence. The great educational campaigns carried on during the war were successful because of the national incentive given them. The Government did not dictate in the Liberty loan and thrift campaigns. It furnished leadership and inspiration, and the people responded. If we are to instill into the hearts and minds of all Americans, native born and foreign born, the spirit and purpose of our Government and the duties of citizenship in a free country, the National Government must assume its share of the responsibility.

WHY GRANT FEDERAL AID TO PROMOTE EDUCATION?

It is frequently stated that education is entirely a State function. The administration of education undoubtedly belongs to the States. The Constitution does not give Congress power to control education, and under the provision of the tenth amendment such control is clearly reserved to the States. But education is a subject of such vital concern to the Nation that the National Government should encourage the States in its promotion. In fact, this has been the policy of our Government from the beginning. Very liberal grants of land were given to promote general education and for the establishment of agricultural colleges. In more recent years appropriations have been made to promote education along certain special lines, particularly vocational education. But the promotion and support of general education, which includes the special, is even more fundamental and necessary. Special education, however valuable in itself, must of necessity fail to accomplish its purpose if general education is permitted to deteriorate from lack of adequate support.

The Right Hon. H. A. L. Fisher, minister of education, declared in support of his educational bill before the English Parliament:

"It is always pertinent to ask whether we can afford to spend the money. But when we are considering a form of productive expenditure, which is not only an investment but an insurance, that question can not stand alone. We must ask a supplementary question. We must ask not only whether we can afford to spend the money, but whether we can afford not to spend the money. And the supplementary question is more important and more searching. The fact that in the middle of this Great War, when the finances of this country are strained to the uttermost, the chancellor of the exchequer is willing to find nearly £4,000,000 of additional money for the development of public education is, I think, a sufficient indication that the Government means business."

The Fisher educational bill carrying these increased appropriations was passed by the English Parliament. If our Government is to meet the urgent demands of this critical period of reconstruction in a broad constructive way, it can not neglect the fundamental question of public education.

WILL THE PASSAGE OF THE SMITH-TOWNER BILL MEAN FEDERAL CONTROL OF EDUCATION?

It is illogical to conclude that if a department of education is created and Federal aid given, the Federal Government will arbitrarily control the administration of education in the States. Some of the executive departments deal with subjects over which the National Government has absolute authority, and others deal with subjects over which it does not have controlling authority. The Department of the Treasury and the Department of War are examples of the former, while the Department of Agriculture and the Department of Labor are examples of the latter.

The National Government can assist the States in the promotion of education as it assists in promoting the interests of agriculture and labor, but under the provisions of the Constitution it can not control. This bill clearly and definitely preserves the prerogatives of the States. It expressly provides: "That all the educational facilities encouraged by the provisions of this act and accepted by a State shall be organized, supervised, and administered exclusively by the legally constituted State and local educational authorities of said State, and the secretary of education shall exercise no authority in relation thereto except as herein provided to insure that all funds apportioned to said State shall be used for the purposes for which they are appropriated, and in accordance with the provisions of this act accepted by said State."

FACTS AND FIGURES.

Some very interesting facts relating to the Smith-Towner educational bill are given on the following pages. These figures have been carefully compiled from Government reports by President John A. H. Keith, of the State Normal, Indiana, Pa.

ILLITERACY AND AMERICANIZATION.

On the opposite page, in Table I, are given the number of illiterates and the number of foreign-born immigrants in each State, and the allotments which each State would receive for removing illiteracy and for Americanization, as provided in sections 8 and 9 of the bill. The millions of illiterates in our country, native and foreign born, present a problem of serious importance to the Nation. For more than 100 years the respective States have been struggling with this problem, but conditions are still deplorable. The subject requires the attention of the Federal Government.

ALLOTMENTS FOR OTHER PURPOSES.

In Table II are given the allotments to the respective States for the other purposes mentioned in sections 10, 11, and 12 of the bill. All allotments are made on the condition that each State shall appropriate an equal amount for each of the purposes named. It is provided in section 13 of the bill that the distribution of each State's allotment shall be made by the State legislature, and in section 14 it is expressly provided that the administration of all educational facilities shall be under the exclusive control of the educational authorities in the respective States.

UNEQUAL DISTRIBUTION OF WEALTH AND CHILDREN.

Table III gives some comparative statistics showing what percentage each State has of the total population of the United States, and also its percentage of the total children between 6 and 21 years of age. The percentage which each State has of the total wealth of the country and its percentage of the total allotment for all purposes is also given. It will be noted that Nevada's percentage of wealth is five times as large as her percentage of children, while Mississippi's percentage of children is more than three times her percentage of wealth. In fact, the figures show that the States which have the largest comparative percentage of children have the lowest comparative percentage of wealth. In other words, their needs are in inverse proportion to their ability to meet those needs.

EDUCATIONAL CONDITIONS IN DIFFERENT STATES.

The comparative statistics given in Table IV are very illuminating. Attention is called to the fact that the wealth of the different States varies all the way from $27,000 per child down to $2,000 per child. The figures in this table, with respect to public-school teachers in the several States, their number and their comparative salaries, show how greatly educational conditions vary. California, which pays the highest average salary to teachers, has wealth averaging more than $14,000 per child between 6 and 21, while Mississippi and North Carolina, in which the average salaries paid teachers are lowest, have wealth averaging only slightly over $2,000 per child between 6 and 21.

TABLE III.—*Comparative statistics, by States.*

	Population, census 1910.*	Per cent of total population.	Per cent of children age 6 to 21.	Per cent of total allotment.	Per cent of total wealth.

[From the Masonic Standard, New York, January 22, 1921.]

SMITH-TOWNER BILL.

"Within the next few months the Smith-Towner bill, one of the most important measures to be acted upon by our Congress in recent years, will be up for vote. In accordance with their policy for the development and encouragement of an unrestricted public-school system in this country, the publishers of the Masonic Standard have given prominent position to the discussion of this measure. In this number appears a detailed explanation by the man most responsible for it, Brother HOKE SMITH, of Georgia.

"The Smith-Towner bill provides that the Cabinet of the President of the United States shall have a secretary of education. Brother SMITH feels—and one would think all intelligent citizens must agree—that the education of young America is at least as important as the development of the Army, Navy, Interior, Agriculture, Postal, or State Departments under Cabinet ministers. In his article this week the Senator points out the nature and sources of the opposition to this measure. To all who are willing to look at the Smith-Towner bill with unbiased mind, it seems highly appropriate to employ an educational expert to promote American education. Certain interests who are back of private or religious, as opposed to public, schools in this country have characterized the Smith-Towner bill as an irreligious, God-defying attempt to injure the church. This measure has nothing whatever to do with the church nor with any religious creed. It merely provides that elementary education in the United States shall be developed in an open manner, and that the best results obtainable shall be sought unhampered by religious prejudice.

"The Masonic press throughout the United States is supporting this measure, and the sentiment in its favor among Masons is overwhelming. All power to Brother SMITH and other proponents of this measure."

Mr. HARRISON. Mr. President, I had not expected to participate in this discussion. I do not desire to utilize needlessly the time of the Senate. There is now on the calendar a great appropriation bill which was reported to the Senate on yesterday, and it was the intention of the chairman of the Committee on Post Offices and Post Roads to bring up that bill to-day. It has not been brought up; but we see the time of the Senate being frittered away by the Senators on the other side of the aisle indulging in unnecessary debate on a motion whether or not the minimum-wage bill or the so-called emergency tariff bill shall be taken up.

I am not unmindful of the fact that the Senators who have intimated something about a filibuster were pointing their arrows in this direction. No suggestion of a filibuster can be substantiated. There is no reason even to suspect a filibuster, and certainly the facts do not warrant the statement that there is a filibuster.

Now, what are the facts about this matter? Senators, you can not fool the American people all the time. I know that the policy being followed here to-day is in keeping with the policy and history of the Republican Party for generations past. What is it? The Republicans are trying to make the people believe that the pending bill should be taken up, and that a vote upon it should be immediately taken; but that there is a filibuster against the bill. They think they are exculpating themselves in the eyes of their farmer constituents—not those who are intelligent and who know the facts when they see them, but those whom they have hoodwinked for years—by trying to make it appear that Senators on this side of the aisle have killed the so-called emergency tariff legislation.

I do not speak for my party or for other Senators here, but I speak for one Senator, myself, when I say that I wish I could kill the bill. I would not smother it; I would crush it; I would leave not a particle of it even as a memory.

Republican hypocrisy to-day is in keeping with the deceit that has been practiced in the past. Senators on the other side talk about a filibuster on this bill, although it was only reported to the Senate last week, and there has not been a Republican Senator who had the audacity to try to defend a single provision of the bill until yesterday. They have waited day after day, although it is always incumbent on those who propose a measure at least to justify in some degree the wisdom of its passage. Not until yesterday, however, did a Senator on the other side of the aisle have the courage to speak out in behalf of the measure and try to defend a single one of its provisions, and then practically the only portion of the bill that was discussed was that relating to the tariff on wheat. The Senator from North Dakota [Mr. MCCUMBER], able as he is, and independent at all times, is merely on the wrong track so far as the wheat proposal is concerned. He differs with so many of his colleagues that he can hardly speak for his party on that proposition, because there are many leaders of the Republican Party in the great northwestern section of the country and in the States along the Canadian border who have always contended to the contrary of the position taken by the Senator from North Dakota that a tariff on wheat will affect the price paid the farmers of the country for their wheat. A majority, I should

say, of the leaders of the Senator's own party on the floor of the Senate and on the floor of the House and on the hustings, have said that the price of wheat is fixed in the market of Liverpool and that the tariff is an immaterial consideration in connection with it.

Because I was fearful that he had forgotten it, I read to the Senator and to the Senate on yesterday the report that he signed with the leader of his party in the Senate, the Senator from Massachusetts [Mr. LODGE] in 1910, bearing out the contention that the tariff did not effect an increase in the price of food products. Yet not until yesterday, as the Senator from North Carolina [Mr. SIMMONS] has pointed out, did a single proponent of this proposed legislation attempt to defend or justify any provision in the bill.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from North Carolina?

Mr. HARRISON. I yield.

Mr. SIMMONS. Let me further call the attention of the Senator from Mississippi to the fact that the report of the committee accompanying the pending bill does not discuss it at all, but simply gives a statement as to the amendments made to the bill by the Finance Committee.

Mr. HARRISON. And the report of the Ways and Means Committee of the House is just as negligible in giving any facts to justify the passage of the bill. Some of us here, more modest and humble Members of the Senate than those who compose the great Finance Committee, are not in so good a position as are they to study so great or important a bill as this. I should not say a great bill; I apologize to the word "great" for using it in such a connection. But we find, as the Senator from North Carolina has pointed out, that a Senator can not look at the report and ascertain even what the exports and imports have been of the various products and commodities upon which a tariff is to be levied. So we are left in the dark to study the question for ourselves, without any lead being given us by the Finance Committee. I have, as best I could, tried to get some facts regarding the subject. I have written to the Tariff Commission; I have tried to confer with members or employees of that commission; I have been to the Agricultural Department and to the Department of Commerce, but it takes some time to get all the facts in connection with a proposal such as this.

And so we have been working, and are going to continue to work; and I can not see the necessity for so much haste at this particular time, when the proponents of the measure have not attempted to justify any provision except that on wheat.

Why, as was suggested by the Senator from North Carolina, we have not heard the provision on wool discussed; and yet there is a joker in the provision on wool bigger than the joker that was in Schedule K of the Payne-Aldrich tariff law, slipped in there, so to speak, and which will, in the course of this debate, be revealed. It will surprise even the Senator from North Dakota [Mr. MCCUMBER], who now sits almost alone on the other side of the aisle speaking for the farmers of the country, because I am sure if the Senator from North Dakota had known of this joker in the provision taxing wool he never would have stood for it. I do not know who is responsible for it. I do not know what Senator ever placed it in there; but it is indefensible, because, as this debate will show, instead of placing a tariff of 15 cents a pound on raw wool, on most of the wool that is brought into this country it will place a tariff of 30 cents a pound; and yet the standard bearer of the Senator's own party, in asking the suffrage of the American people, condemned Schedule K, said it was indefensible, your party said it was indefensible, your textbooks said it was indefensible, and your party literature said it was indefensible. Why? Because it placed so high a tariff on wool, which was 11 cents a pound, and it contained a joker touching certain advanced products of the raw article. Yet, when your party has condemned Schedule K in the Payne-Aldrich tariff law as indefensible, and the American people have condemned it as indefensible, we find that the Senator's party now is trying to pass this bill through the Senate with but 1 hour and 45 minutes of debate—I use the Senator's own language—in support of the measure, when the bill that he proposes to pass in such a brief time carries with it a duty of 30 cents a pound on raw wool. That is the joker, and it will be shown up as we go along.

Some one has pulled the wool over the Senator's eyes and the eyes of the committee. This is the way section 18 reads:

Wool, commonly known as clothing wool, including hair of the camel, angora goat, and alpaca, but not such wools as are commonly known as carpet wools: Unwashed, 15 cents per pound.

The Payne-Aldrich law, that damnable piece of legislation that was condemned by everybody in the country, provided a tariff of only 11 cents a pound.

Washed, 30 cents per pound; scoured, 45 cents per pound.

It is simple up to that point, is it not? We know just what they are driving at. Then it goes further:

Unwashed wools shall be considered such as shall have been shorn from the animal without any cleaning; washed wools shall be considered such as have been washed with water only on the animal's back or on the skin; wools washed in any other manner than on the animal's back or on the skin shall be considered as scoured wool.

Here is your joker, worse than the provision on tops and noils in Schedule K of the Payne-Aldrich tariff law; worse than the provisions there when, if you should buy a pair of shoes with the tiniest part of wool in them, you would have to pay a tariff on the pair of shoes as though they were all wool.

Here is the way the balance of it reads:

On wool and hair provided for in this paragraph, which is sorted or increased in value by the rejection of any part of the original fleece, the duty shall be twice the duty to which it would otherwise be subject, but not more than 45 cents per pound.

Wool which is sorted or increased in value by the rejection of any part of the original fleece shall be 30 cents a pound.

Experts tell us that the method of getting the wool in Australia and New Zealand is different from the method that is employed in this country; that when they shear the sheep they have the wool of the whole body throughout, including that on the forelegs and the neck; that they then cut off the leg part, and the neck part; and under the provisions of this bill, with that manner of shearing, the duty would be 30 cents a pound on wool, because this bill says:

Which is sorted or increased in value by the rejection of any part of the original fleece.

And so, when any part of the original fleece is rejected, as they prepare the wool for shipment and sale in Australia, and it is brought into this country, then the American people must pay in that instance not 15 cents a pound but 30 cents a pound upon raw wool.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER (Mr. HENDERSON in the chair). Does the Senator from Mississippi yield to the Senator from Colorado?

Mr. HARRISON. I yield.

Mr. THOMAS. One of the advocates of the wool section of this bill protested before the committee against that provision of the bill; so it must be quite as bad as the Senator represents it to be.

Mr. HARRISON. I am glad to hear that there are some on the other side of the aisle who at least make some excuse against the infamy of that particular section.

Mr. THOMAS. This was a witness.

Mr. HARRISON. Oh, that was a witness? Then I can not offer even that consolation to anyone on the other side. So I pass from the wool section; but, important as it is, as much as it means to the American people, Senators on the other side of the aisle, without justification and without excuse, charge Senators on this side of the aisle with filibustering, because, forsooth, we would point out to the American people the infamy of their acts! Are there not to be some representatives here who will be allowed to speak in behalf of the consumers once in a while?

But I shall go further. There are more people interested in this legislation than woolgrowers. There are more people interested in this legislation than wheat growers. We must in these abnormal times try to look at conditions in a broad way, and take care of all the people, without giving certain advantages to some that will rob the others; but you have gone further than your tariff on wool and your tariff on wheat, as indefensible as they are, and which we hope to discuss fully before this bill comes to a vote.

I would not mind voting upon this proposition now. I am not trying to conceal my position on this tariff bill. I think the bill is so infamous that I want every constituent in my State to know that I am against it, and when the roll is called upon its passage I shall with great pride cast my vote against the proposition.

Filibuster? Why, what we want is a free discussion of this proposition. We want to show to the American people that which you have been guilty of for generations, and that is that you are oblivious to the welfare of the great consuming masses of America. Why, in this bill we find sugar—sugar! Yesterday I did not read to the Senate the pamphlet that was issued by the Republican national campaign committee in the last campaign, headed, "Why 25-cent sugar?" I only pointed to it. "Why 25-cent sugar?"—with a question mark after it.

Three months ago you asked the voters of the Nation the question, which rang from one end of this Nation to the other in speeches and pamphlets, "Why 25-cent sugar?" You did it because you thought you would get votes by it. Yet in three months after you made the changes ring by that question, and

sugar is dropping, and has gone down to a fairly reasonable price, you now try to impose upon the consumers a tax which will boost the price of sugar again.

Were you sincere in what you told the people in the last campaign? Why did you ask them the question, "Why 25-cent sugar" if you did not want to reduce the price of sugar to the people? If you were sincere, then why do you want to raise it now to the American people?

I shall not read certain passages from that pamphlet now, but I shall as the debate progresses. It brings to my mind the inconsistency of the positions of the party of the Senator from North Dakota [Mr. MCCUMBER]. In the last Congress criticism after criticism was hurled from the other side of the aisle against us, and against those in authority in the present administration, for holding back some products which were bought during the war and not placing them upon the market, saying that they should be thrown upon the market in order to drive down prices and give to the consumers of the country some benefit. You criticized the Secretary of War day by day in the Senate and House and on the hustings for not allowing the people to buy canned beef, for not putting the wool they had upon the market. Yet you do not want them placed now where the people can get them cheaper.

A bill was introduced by the Senator from New York the other day and was referred to a committee of which I am a member, the Committee on Agriculture and Forestry, proposing to pay, in round figures, out of the sugar-equalization fund, about $3,000,000 to a corporation which had made a contract for Argentine sugar when sugar was high. It was encouraged by the Department of Justice and the Department of State. They wanted those gentlemen to buy that crop of sugar in Argentina so that it might be imported into this country and bring down the price of sugar, which was then selling at 25 cents a pound. But they did not get it out of Argentina for about two or three months. At any rate, it was such a length of time that in the meanwhile sugar had gone down, and this particular firm had lost some $3,000,000.

Fourteen million tons of that sugar is now stored somewhere in this country, and the bill of the Senator from New York is to pay this concern and take the sugar and throw it on the market, which will again beat down the price of sugar.

I do not know whether it will be great or small, but we know that when such a quantity of sugar is thrown upon the market, taking the words of the Senators on the other side of the aisle, used just before the last election——

Mr. MCNARY. Is not the Senator from Mississippi incorrect when he says 14,000,000 tons?

Mr. HARRISON. Fourteen thousand tons, I think. That is a pretty good amount of sugar, and when sugar was so high during the last session of Congress, I can see the junior Senator from Oregon, in his accustomed place in this Chamber, rise and try to press through a measure which would give some measurable relief to the consumers of the country in the reduced price of sugar, and certain Senators who now would place a tariff of 2 cents a pound on sugar held it up for some six weeks in this Chamber. It cost the American people thousands and hundreds of thousands of dollars.

But I say it is inconsistent for you who are trying to raise the price of sugar now, after promising a reduction three months ago, when there is another bill on the calendar to throw upon the market 14,000 tons of sugar that is bound to drive the price down again.

But that is the way of this party, which styles itself the great party of efficiency, promising the people to cut appropriations to the bone, promising retrenchment, picturing to the American people waste and extravagance upon the part of the party now in power; yet when Senators on this side of the aisle, anxious to protect the interests of the American people, sit here and watch these various provisions in appropriation bills, to see that you do not lavishly expend public money, they are charged with filibustering and taking up the time of the Senate.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Utah?

Mr. HARRISON. I yield.

Mr. SMOOT. Does not the Senator know that the author of the sugar amendment to the emergency tariff bill is a member of his own party, a Democratic Senator?

Mr. HARRISON. I do not care from what source it comes.

Mr. SMOOT. The Senator said it came from this side of the aisle. I wanted to distinctly show the fact.

Mr. HARRISON. I have a very strong opinion as to why the House did not put this provision in the bill. It was because the Senator from Utah was smart enough and wise enough and adroit enough to know that in view of the promises he and his party had made to the American people in the last campaign to reduce the price of sugar, and knowing that thousands on thousands of pamphlets which raised the question, "Why 25-cent sugar," had been distributed through Utah and elsewhere, he could not defend that position.

Mr. SMOOT. Mr. President, what the Senator says as to my position, of course, he may think, and no doubt he does. But I want to say to the Senator frankly that if I had written this amendment on the sugar schedule it never would have been the amendment that is now in this bill.

Mr. SIMMONS. Mr. President, will the Senator permit me to ask the Senator from Utah a question?

Mr. HARRISON. Certainly.

Mr. SIMMONS. The Senator from Utah is a member of the Finance Committee, and I will ask him if he does not consider this amendment a proper one, and if he had in his mind a more correct amendment to carry out the general intent of this amendment why he did not in the committee amend this bill?

Mr. SMOOT. That is a fair question, and perhaps I ought to answer it frankly. The amendments which went on this bill, which were put there in many cases by the votes of Democratic Senators, in my opinion were intended to defeat the measure more than to perfect it. I will say to the Senator, however, that the record will show that I did not vote for this sugar amendment.

Mr. SIMMONS. Let me say to the Senator from Mississippi, as pertinent to the suggestion of the Senator from Utah, that this particular amendment comes from a Senator on this side of the Chamber. The Senator on this side of the Chamber who was sponsor for that amendment has always upon this question disagreed with his party and agreed with the Republican view of the matter of tariff so far as it affected sugar.

Mr. HARRISON. May I ask the Senator from Utah if he did not vote for this amendment in the committee?

Mr. SMOOT. No; I did not vote for it in the committee. And I will say another thing to the Senator, that as far as the promise by the Republican Party for the reduction of sugar from 25 cents a pound, it has certainly been carried out. The wholesale price of sugar to-day in my own State is 7 cents a pound; that is, that is what it nets the company. That same sugar has cost, as I remember, 9.54 cents per pound.

Mr. HARRISON. That is the condition.

Mr. SMOOT. I know it is the condition.

Mr. HARRISON. That is the condition which caused the Senator and those of his party who took part in the last campaign to place this provision in this bill, to lift the price up again, so that it will cost the American people around $350,000,000, about one-half of which will go into the Treasury of the United States.

Mr. SMOOT. Mr. President, that is a statement made by the Senator without careful computation.

Mr. HARRISON. The Senator's objection to it is made with as little care.

Mr. SMOOT. No; the Senator is wrong. The Senator from Utah is willing to admit just exactly what it would cost.

Mr. HARRISON. How much would it cost, Mr. President, in the opinion of the Senator?

Mr. SMOOT. The bill itself provides that when Cuban sugar reaches 8 cents, then anything above that the tariff does not apply to. I think Cuban sugar was off one-eighth yesterday, which would make it 4⅜ cents, as I remember. So, even under this bill, with the tariff that is on now, which amounts to 1 cent, it would be 5⅜ cents. So it could not possibly be more than 2⅜ cents.

Mr. HARRISON. I am asking the Senator how much it would cost the American people. The Senator yesterday told me that the tax would cost on hides only about 4½ cents on a pair of shoes. I want to get his figures on this proposition.

Mr. SMOOT. By the way, I will say to the Senator that I made no statement yesterday about hides; but that would not make any difference.

Mr. HARRISON. On hides?

Mr. SMOOT. No.

Mr. HARRISON. The Senator was in close communion with the Senator from North Dakota [Mr. MCCUMBER]. The information is in the RECORD somewhere that one Senator said that the tax on hides would amount to only 4½ or 5 cents on a pair of shoes.

Mr. SMOOT. I think he was right.

Mr. HARRISON. I do not know whether the Senator from Utah prompted the Senator from North Dakota or whether it was a voluntary statement that he made.

Mr. SMOOT. I will tell the Senator in just a moment about what it would cost.

Mr. UNDERWOOD. If the Senator will allow me, when they come to write the shoe tax, I am assured from past experience

that they will not stand to the price of 5 cents on a pair of shoes. They will want the tax to be about 50 cents for every 5 cents that goes on hides.

Mr. HARRISON. I want the figures of the Senator from Utah on sugar, to see if he is as far wrong on sugar as he was on shoes.

Mr. SMOOT. Of course, Mr. President, the Senator can make that statement, broadly speaking; but the Senator from Utah does not generally make a statement on the floor of the Senate unless he knows what he is talking about.

This is an emergency bill, to remain in effect until the other bill is put into force. The 80,000,000 pounds of sugar that is consumed by the American public takes in all the sugar that is made into candy and all that goes into the manufacturing of products. If you take it all, say there is 80,000,000 pounds of sugar consumed, and that is the full crop of Cuban sugar, if it all came here at the peak of production it would be $160,000,000.

Mr. HARRISON. One hundred and sixty million dollars it would cost the American people.

Mr. SMOOT. No; I say if that took place, at 2 cents; but I have not any idea, in the first place, that the bill is going to become a law, because I do not think the Senator from Mississippi, as well as others, intends it to.

Mr. HARRISON. I can not prevent it, and the Senator knows that.

Mr. SMOOT. There are others who will prevent it. So far as that is concerned, if it did become a law it would not be in operation a year. The amount that would be collected from the Cuban sugar would, I will say to the Senator, all go into the Treasury of the United States, and Cuba is where the great sugar crop comes from.

Mr. HARRISON. Where would the tax come from? It would come from the consumers of the country.

Mr. SMOOT. Yes; but it would go into the Treasury of the United States.

Mr. STANLEY. Mr. President——

Mr. HARRISON. I yield to the Senator from Kentucky.

Mr. STANLEY. I should like to ask the Senator from Utah if he is calculating now simply on the amount of tax to be collected from the Cuban producer?

Mr. SMOOT. This would be about our consumption. There are 100,000,000 people, and this would be 80,000,000 pounds, and that is 80 pounds per capita.

Mr. STANLEY. The Senator is assuming that the entire consumption of the American people would be the amount produced in Cuba, or 80,000,000 pounds.

Mr. SMOOT. No; I was not assuming that at all. In fact, all of the Cuban crop does not come here, but most of it does. I am saying that is the largest crop, but with 100,000,000 people, 80 pounds per capita is 800,000,000 pounds. Of course, 2 cents a pound will bring us $160,000,000.

Mr. STANLEY. That would be 8 pounds per capita?

Mr. SMOOT. Eighty pounds for every man, woman, and child.

Mr. UNDERWOOD. Will the Senator from Mississippi allow me to ask a question?

Mr. HARRISON. Certainly.

Mr. STANLEY. The reason I asked that question was that we can not figure the Cuban sugar crop alone when we figure imports, because the duty will affect the beet sugar and the Louisiana sugar in the same way.

Mr. SMOOT. We understand that.

Mr. UNDERWOOD. That was the question I intended to ask the Senator. In his statement he had left out of the calculation the fact that if we put the duty on at the customhouse, it would not only raise the value to the American consumer of the imported sugar, but it would practically to the same extent put up the price of American sugar raised in this country.

Mr. SMOOT. There is no doubt about it at all.

Mr. UNDERWOOD. Then the American people would pay the increased price.

Mr. SMOOT. That is what I say. I was figuring the amount per capita.

Mr. HARRISON. That is the purpose of the bill, to make the American people pay the price in order to help the producers of the country.

Mr. SMOOT. The Senator stated that only half of the tax on importations went into the Treasury of the United States.

Mr. HARRISON. I expect to show before the debate is over that part of that, only about half of it, goes into the Treasury of the United States.

Mr. SMOOT. I will admit that whatever sugar is produced in this country there is nothing that goes into the Treasury of the United States on that sugar, but on every pound of sugar that is imported into the country the amount of tax paid, no matter whether 1 cent or 2 cents or 3 cents, or whatever it may be per pound, all goes into the Treasury of the United States.

Mr. HARRISON. But it raises the price of sugar in this country under those circumstances so much to the consumer. That is what I am trying to bring out.

Mr. SMOOT. That is what I say. I have not said that it did not.

Mr. HARRISON. We do not differ.

Mr. SMOOT. Just the same as any article, for instance, like coffee. Coffee comes in free. If there were a duty put upon it and the coffee is not produced in this country, of course the consumer pays it. No one ever questioned that that I know of.

Mr. STANLEY. Mr. President——

Mr. HARRISON. I yield to the Senator from Kentucky.

Mr. STANLEY. The Senator from Utah is a much better statistician than I am, especially on this subject, but I am under the impression that the total production and total consumption of sugar in the United States per annum far exceeds 800,000,000 pounds.

Mr. SMOOT. As I figure it, as I told the Senator, the total consumption of sugar in the United States last year, I think, was 82 pounds per capita.

Mr. STANLEY. Then the total consumption is up in the billions of pounds, while the Senator stated it was 800,000,000 pounds. It should be 8,000,000,000 pounds, and when we get 8,000,000,000 pounds of sugar with a duty of 5 or 6 cents a pound it makes the $160,000,000 which the Senator mentioned look pretty small.

Mr. SMOOT. If I said 800,000,000, it should have been 8,000,000,000 pounds. There is no duty of 5 cents on sugar.

Mr. SIMMONS. Mr. President——

Mr. HARRISON. I yield to the Senator from North Carolina.

Mr. SIMMONS. Could the Senator from Utah give us a statement as to what would be the amount of the burden upon the people upon the basis of 8 cents a pound? The Senator stated that his figures were incorrect.

Mr. SMOOT. Not as to the amount of tax we pay.

Mr. SIMMONS. But incorrect as to the total amount.

Mr. SMOOT. As to the number of pounds, but the amount of tax will be just as I stated it would be, even if it were 8,000,000,000 pounds.

Mr. SIMMONS. What would be the aggregate?

Mr. SMOOT. I can not tell how long the bill will be continued in effect.

Mr. SIMMONS. Assuming it will be in operation a year?

Mr. SMOOT. Nor can I tell what the price of Cuban sugar is going to be. Cuban sugar is so low now that it seems to me it can not stay at the figure at which it is now. Cuban sugar delivered at New York is 4¾ cents a pound.

Mr. SIMMONS. The Senator's calculation, I understood, was based upon the assumption that Cuban sugar would go up 8 cents.

Mr. SMOOT. No; I did not say that. If it went to 8 cents, though, under the bill it would not cost the people anything for tax.

Mr. SIMMONS. I do not see how the Senator figures that.

Mr. SMOOT. If the Senator will read the amendment, he will see that is exactly what the amendment provides.

Mr. SIMMONS. It will be effective only to the extent of raising it to 8 cents.

Mr. SMOOT. Whenever Cuban sugar reaches the price of 8 cents per pound, then there is no additional duty upon it.

Mr. SIMMONS. No additional duty, but the duty operates until it gets to 8 cents a pound and if the duty forces it to 8 cents a pound then it does not apply any longer. Suppose sugar sells to-day for 6 cents a pound and it is forced up by reason of the duty to 8 cents a pound, would not the duty have been the reason and the cause for the increased price?

Mr. SMOOT. That duty would be collected by the Government of the United States. There is no doubt of that at all.

Mr. SIMMONS. It would be collected by the United States and a like increase would be made in the price of all domestic sugar.

Mr. SMOOT. There is no doubt about it, because of the fact that such a small amount of domestic sugar is raised in the United States, comparatively speaking. Whatever the Cuban price is in New York, and the refiners name that price, so is all the sugar manufactured in the United States based upon that same price. That is understood by the Senator and by everybody else.

Mr. SIMMONS. Cuban sugar sells to-day, as I understand, at between 4 and 5 cents a pound.

UMI

Mr. SMOOT. Four and three-eighths cents, I understand.

Mr. SIMMONS. It will happen, if the duty is imposed, that Cuban sugar will reach 8 cents on the market, which is 3 cents additional, and that increase will have to be paid by the consumers of this country, and that will be as the result of this tax. At the same time the tax forces up the price of sugar from Cuba it will force up the price of all the sugar produced in this country, so upon the basis of the present prices of Cuban sugar, when it reaches 8 cents a pound it would be an increase in the price of Cuban sugar reflected in the price of the sugar raised in this country of at least 3 cents.

Mr. SMOOT. The Senator does not look at the situation just as it will occur if Cuban sugar remains as low as it is to-day. The statement made by the Senator from North Carolina was that if the 1 per cent difference would apply it would be 2½ cents, instead of 3 cents. But Cuban sugar is expected by everybody to rise in price. If Cuban sugar rises in price, if it should rise to 8 cents, the amendment would not impose one cent of tax upon the American people, but if the price is 7 cents the tax is 1 cent a pound, and if it is 6 cents the tax is 2 cents a pound. So it all depends upon what the sugar market will be, and nobody on earth can tell what it will be. Therefore it is impossible for me to say what the tax would amount to that the amendment would bring if put into law.

Mr. SMITH of South Carolina. Mr. President——

Mr. HARRISON. I yield to the Senator from South Carolina.

Mr. SMITH of South Carolina. What per cent of the sugar consumed in America is produced by America?

Mr. SMOOT. I think about 25 per cent. I have not figured it lately, but it is about that.

Mr. SMITH of South Carolina. So the importations necessary for domestic consumption would be about 75 per cent?

Mr. SMOOT. Yes; of imported sugar.

Mr. SMITH of South Carolina. To meet the necessities of this country. What per cent of the domestic production is cane sugar?

Mr. SMOOT. I should judge in a normal crop, which there was not last year, nor this, in the neighborhood of 300,000 tons.

Mr. KING. I think the highest has been 360,000 tons.

Mr. SMITH of South Carolina. About what per cent is that of the American crop?

Mr. SMOOT. About 300,000 tons, which is about 7 per cent of the consumption.

Mr. SMITH of South Carolina. What I am driving at and what I want to know is what proportion of the American consumption is cane sugar, as against beet sugar?

Mr. SMOOT. Seven per cent, as against 18 per cent, in round numbers. I do not say that that is exact.

Mr. McNARY. Mr. President——

Mr. HARRISON. I yield to the Senator from Oregon.

Mr. McNARY. I think more accurately stated, in answer to the Senator from North Carolina and the Senator from South Carolina, that the average Louisiana crop is about 200,000 tons per annum and the beet-sugar crop of the West is about 600,000 tons.

Mr. SMOOT. They would immediately say that the Hawaiian crop is an American crop.

Mr. McNARY. I am speaking about the continental domestic crop.

Mr. SMOOT. That is entirely different, but the Hawaiian crop comes into this country free of duty, as the Senator knows, and if we are going to figure upon the question of what it is going to affect, it would affect that, and therefore I included that amount.

Mr. SMITH of South Carolina. That is the object I had in view.

Mr. McNARY. I wish to correct the Senator from Utah. I think he will find, by looking at the most available and accurate figures, that the annual per capita consumption of sugar in this country for the last three years has been 92 pounds.

Mr. KING. The Senator from Oregon mentioned the western sugar crop. Did he by that mean to exclude the beet-sugar crop of Michigan and the Eastern States? He spoke of the western sugar crop being 600,000 tons.

Mr. McNARY. The reason why I mentioned the West is because that is the home of the sugar-beet crop. I mean the American sugar crop from Michigan west.

Mr. KING. The per capita consumption of sugar was materially less in 1918 than prior thereto; it was less in 1919 than in previous years; and it was very much greater in 1920 than in 1919 or 1918.

Mr. SIMMONS. I should like to ask the Senator from Utah [Mr. KING], who has studied the question with relation to sugar much more closely than I have, because I confess that I have not looked very carefully into the sugar schedule in the bill, what effect the additional tax proposed in the bill will have, immediately upon its passage, upon the price of Cuban sugar?

Mr. KING. Mr. President, I belong to that school of economists who believe that a tariff is a tax and that when a tariff is imposed the direct and proximate result of the tariff ordinarily is an immediate increase in the price of the domestic product, whether it be sugar or anything else. So I think the duty will increase the price of the domestic product.

Mr. SIMMONS. But my inquiry was directed to the price of the Cuban sugar. The Senator will see that this bill is so drawn that the price of Cuban sugar becomes an important factor. My own theory is that as soon as the bill is passed its effect upon the price of sugar in Cuba will be immediate and that the price will be increased. I ask the Senator what he thinks about that proposition?

Mr. KING. Mr. President, I am not quite clear as to what will be the immediate effect upon Cuban sugar, but I have no doubt as to what the effect will be upon American sugar; that is, sugar which is produced in continental America or in the Hawaiian Islands.

Mr. SMOOT. I will say to my colleague that if the legislation has any effect at all it will be to depress the price of sugar in Cuba; and there is not any doubt that it will, as I have said and as my colleague has said, increase the price of sugar in this country.

Mr. KING. Mr. President, I feel sure that it will increase the price of the sugar which is produced in the United States.

Mr. SMOOT. There is not any doubt about that.

Mr. KING. I am not quite clear as to the immediate effect upon the sugar produced in Java and in Cuba, but in view of the fact that the demand for sugar throughout the world will be very great during the coming year—of course, the demand will depend largely upon whether Europe shall be rehabilitated—I look for this proposed tariff ultimately, at least—and when I say "ultimately" I mean within a reasonable time after the passage of the bill, if it shall pass—to affect the price of the Cuban crop of sugar and to increase its price.

Mr. SMOOT. Naturally, Mr. President, if the duty be imposed upon Cuban sugar it would to some extent lessen the consumption of Cuban sugar, because the Cuban sugar would have to pay the increased tax before coming into the country; but it could not possibly increase the price of sugar in Cuba; that is out of the question.

Mr. STANLEY. But it will increase the difficulty of the entry of Cuban sugar into this country.

Mr. SMOOT. Certainly.

Mr. STANLEY. I understand that; but, Mr. President, I understood the Senator from Utah to say that the proposed tariff would not be operative when Cuban sugars reached 8 cents a pound. I do not so understand from reading the bill.

Mr. SMOOT. I will read it to the Senator.

Mr. STANLEY. The bill provides that when the price of sugar imported from Cuba reaches 8 cents a pound in this market—when any sugar reaches 8 cents, or 10 cents to the consumer—then the bill shall automatically cease to operate to a certain extent.

Mr. SMOOT. In the case of Cuban sugar the 8 cents includes the expense of insurance and freight and all other charges; so that the 8 cents limit will be reached in that way very much quicker than if a price of 8 cents in Cuba were intended.

Mr. STANLEY. There is this difference, to which I wish to call the attention of the senior Senator from Utah. A provision in the law that when sugar should reach a certain price f. o. b. Habana the law would cease to operate would mean one thing; we might then have a hope that we should have cheap sugar; but when the law is predicated upon the idea that it is going to so operate that the price of Cuban and every other kind of sugar in this country is going to reach from 8 to 10 cents a pound it is a plain admission that the imposition of the proposed duty is going to result in the raising of the price to that extent. That is where it is proposed to stop. Is not that true?

Mr. SMOOT. The provision applies only to duties on Cuban sugars. Suppose the price of Cuban sugar should, because of conditions existing in the markets of the world, rise in New York from 4⅜ cents, which is the price to-day, to 7⅜ cents. Five-eighths of a cent is all that could be imposed as additional duty under this provision. The price of Cuban sugars delivered at New York will govern, and to-day their price is 4⅜ cents a pound.

Mr. STANLEY. Those sugars would pay the same rate of duty?

Mr. SMOOT. If their price should advance to 6 cents, they would not pay the same rate of duty; if it should advance to 5 cents, they would not pay the same rate of duty; if it should

advance to 7 cents, they could not pay more than 1 cent. That is what the bill provides.

Mr. KING. I desire to add merely a word, in response to the inquiry of the Senator from North Carolina [Mr. SIMMONS]. The point I had in mind more particularly as a primary or as a proximate result of the augmentation of the price of the domestic product of sugar in the United States by reason of the imposition of the tariff was this: The price of sugar throughout the world, there being a greater demand than there is a supply, is affected directly or indirectly, remotely or proximately, by any situation in any country that locally affects the price; and the effect upon the world prices by reason of a price in any given country depends upon consumption and the demand in that given country. There being a greater demand in the world for sugar than there is a supply, anything that would increase the price of sugar in the United States, even though it were the domestic product, would, in my opinion, react upon the world price and tend to increase it. It could not be otherwise.

Mr. SIMMONS. That is exactly what I meant.

Mr. KING. So that if by the imposition of a tariff we increase the price of the domestic product, obviously, it seems to me, in view of the greater demand than supply, that will react upon the price throughout the world. To what extent that reaction will go, and to what extent it will increase the price, of course, no one can state; but I believe that the increase in the price of the domestic product will react upon the Cuban product and the product throughout the world and tend to increase the price everywhere.

Mr. SMOOT. I wish to say, however, that the Cuban people do not believe that, and in the past that result has never been brought about. In the first place, if there were a shortage of sugar all over the world, and if Cuba had not secured the preferential rate of 20 per cent on her sugar coming into this country, what my colleague says would, perhaps, be true; but that being the case, there is only one market for her to sell her sugar in without paying, of course, the amount of the 20 per cent differential. I am quite sure that there is plenty of sugar in the world to-day, for if there were not the price would not be what it is.

Mr. SIMMONS. The Senator says there is only one market in which Cuba can get the benefit of the 20 per cent differential. There are markets in which they do not have to pay any duty; for instance, the British market.

Mr. SMOOT. But such markets are the very ones where the price is always less than the 20 per cent. So I say if Cuba is going to get any advantage of the 20 per cent differential we give her, there is only one market that she can send her sugar to, and that is the United States.

Mr. RANSDELL. Mr. President——

The PRESIDING OFFICER (Mr. ROBINSON in the chair). Does the Senator from Mississippi yield to the Senator from Louisiana?

Mr. HARRISON. I yield.

Mr. RANSDELL. I was out of the Chamber a few moments ago, when I understand there was a little controversy about the average production of sugar in the State of Louisiana. I understand that the sugar crop of Louisiana was quite small in 1919.

Mr. SMOOT. That is what I stated.

Mr. RANSDELL. It amounted only to about 125,000 tons, and during the past year to about 180,000 tons. The crop has amounted to as much as 385,000 tons, and my information is that it has averaged, as stated by the Senator from Utah, about 300,000 tons. If my information is accurate, his statement is correct in that particular.

Mr. SMOOT. I have not any doubt of it; and if the Senator had been in the Chamber he would have known that I stated that last year and perhaps this year the sugar crop of Louisiana was very much less than the average.

Mr. RANSDELL. That is true.

Mr. SMOOT. But taking the average for the preceding years, the crop of cane sugar in the South was 300,000 tons.

Mr. RANSDELL. That is my information. Due to peculiar conditions, especialy very hard rains during the season of 1919–20, the crop was very small, amounting, as I have said, only to about 125,000 tons in 1919 and to 180,000 tons in 1920.

Mr. STANLEY. Mr. President, may I ask the Senator from Louisiana a question?

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Kentucky?

Mr. HARRISON. I yield.

Mr. STANLEY. What per cent of the entire consumption of sugar in the United States is represented by the 300,000 tons of cane sugar produced in Louisiana?

Mr. RANSDELL. I have understood that the United States consumed between four million and four and a half million tons of sugar, so if Louisiana produces an average of 300,000 tons that production would not be a very big percentage of the total consumption in the entire United States. The Senator can figure it up, of course.

Mr. SMOOT. It would be about 7 per cent, as I have stated.

Mr. RANSDELL. The Louisiana sugar growers do not produce a very large percentage of the total consumption of sugar of the United States. The Senator is aware that we get sugar from Hawaii and from Porto Rico, and that the amount of beet sugar produced in this country is very much greater in the aggregate than the amount of cane sugar produced in Louisiana. I think the amount of beet sugar produced is two or three times greater than the amount of cane sugar produced; the Senator from Utah can state, perhaps, the exact figures; but the production of beet sugar is very much larger than the production of Louisiana cane sugar.

Mr. SMOOT. It is very much larger.

Mr. STANLEY. I am not questioning the accuracy of the Senator's figures, which are based, as I understand, upon an estimate of the average consumed by each person; but knowing that the Senator from Louisiana has paid strict attention to the subject, I thought he had some statistics as to the average total consumption of sugar in the United States per annum.

Mr. SMOOT. The figures are about those I have given.

Mr. RANSDELL. I have not them accurately before me, but at the time we had Mr. Glasgow of the equalization board before the Agricultural Committee about a year ago, according to the best information that board had, we were consuming in the United States between 4,000,000 and 4,500,000 tons of sugar. That is a great deal of sugar. We were getting, in round numbers, one-half of that from continental United States and her island possessions and nearly all of the remainder was coming from Cuba.

Mr. McCUMBER. Mr. President, may I ask the Senator a question?

Mr. RANSDELL. If I can, I will try to answer it.

Mr. McCUMBER. I should like to ask the Senator from Louisiana whether he sees the great offense against the American consumer of sugar in this bill that is observed by the Senator from Mississippi?

Mr. RANSDELL. On the contrary, I see great ultimate gain to the American consumer from the duty on sugar provided by this bill, because I think we must look a little beyond the ends of our noses when we come to legislate. We must try to look to the future.

Mr. HARRISON. Mr. President, I do not yield any further to the Senator.

Mr. RANSDELL. I have not the floor, of course——

The PRESIDING OFFICER. The Senator from Mississippi has the floor.

Mr. RANSDELL. I should like to ask the Senator from Mississippi a question. Will he yield for a question?

The PRESIDING OFFICER. Does the Senator from Mississippi yield further to the Senator from Louisiana?

Mr. HARRISON. I yield.

Mr. RANSDELL. I should like to ask the Senator if he does not think if the sugar industry of the United States, especially the sugar industry of Louisiana, is destroyed, as it is about to be destroyed by the present low prices, that that is going to prove detrimental not only to the people of Louisiana but to the people of the United States in giving us higher sugar because of lessened competition?

Mr. HARRISON. I will say to the Senator that in that matter I am going to give him my sympathy, but not my vote.

Now, in answer to a question propounded——

Mr. SMOOT. Mr. President——

Mr. HARRISON. Mr. President, I desire to say a few words in my own time. Other Senators have taken me off the floor for the past 25 minutes and have not given me an opportunity to speak.

Mr. SMOOT. I think the Senator has viewed that situation with entire complacency.

The PRESIDING OFFICER. The Senator from Mississippi declines to yield.

Mr. HARRISON. I will yield to the Senator from Utah.

Mr. SMOOT. All I want to say is that I do not wish the Senator from Mississippi to think that I believe the tariff imposed by the pending bill is not going to increase the cost of domestic sugar. It will increase that cost, and that is the object of the bill, because of the fact that the producers in the United States to-day are selling their sugar for more than 2 cents a pound less than it actually costs to produce it.

Mr. HARRISON. I understood that to be the Senator's position.

I admire the Senator from Louisiana. Nobody has ever had any doubt about his position on the tariff, and especially on sugar. Why, his eloquence has been expended here for a long time in behalf of the sugar producers of Louisiana, and because of his immense popularity and his ability he has been able to carry his point time after time against my vote and against my convictions; but I have no quarrel with him. He has not tried to fool anybody about his position.

May I call to the attention of the Senator from North Dakota again the pamphlet that was issued by the Republican campaign committee during the past campaign entitled "Why 25-cent sugar?" I dare say that every constituent of the Senator from North Dakota was presented with one of those pamphlets in the campaign, and the Republican Party promised to reduce the price of sugar. Why, they inveighed against the Senator from Louisiana; they criticized him greatly and persistently, and insisted upon the righteousness of their contention about an agreement that was entered into between the Attorney General and the sugar producers of Louisiana, because they got 17 cents——

Mr. RANSDELL. Mr. President, will not the Senator yield to me?

Mr. HARRISON. One moment, and then I will yield to the Senator gladly. But in this pamphlet that was circulated everywhere, criticizing the Democratic Party, under the title "Why 25-cent sugar?" we find such passages as this. I am not going to read it all, but I am doing this for the edification of the Senator from Louisiana, because I know that he wants to reveal the hypocrisy and deceit and false pretense of the Senators here who are trying to tax the American people now by imposing a tax that will be borne by the consumer, and are trying to lay it on the Senator from Louisiana. I know that the Senator from Louisiana and his colleague have great influence in the Senate, but unless they had received the help of the Senator from North Dakota, and perhaps not the vote but the encouragement of the Senator from Utah, and the vote and the help of the Senator from Pennsylvania, they would not have been able to have had that provision incorporated in the bill, and so I find such passages as this presented to the people only three months ago:

Those who hold in the hollow of their hands—

Says this pamphlet—

the supply of sugar, know that the American people will buy it, no matter at what price it may be sold. All they need to do is to put the price sky-high, and the wealth of the Nation will bulge their pockets.

That is the criticism that they made three months ago against the Democratic Party for the high price of sugar; and as soon as it begins to descend they cry out, and say: "Let us increase the price to the people again," violating every pledge that they made to the American people.

Now, I can go further on this proposition. Let me read just a few words more to recall to the minds of Senators——

Mr. RANSDELL. Mr. President, will not the Senator yield to me? I have been on my feet for some time, waiting for him to give me an opportunity to proceed.

Mr. HARRISON. Yes; I yield.

Mr. RANSDELL. I thank the Senator very much for the compliments he has paid to me and to my colleague. He has given us wonderful credit for influence here which we never possessed. He seems to have overlooked the fact that a duty was placed on sugar in 1789, considerably over 100 years ago, and that there has been a duty on it ever since except during the incumbency of President McKinley, when the duty was taken off, and a bounty was placed on sugar.

I should like to answer, if the Senator will allow me, if he will give me the time—I know he does not want me to consume any of his valuable time—but, if he will permit me, I should like to answer very briefly the question asked me by the Senator from North Dakota.

Mr. HARRISON. I am going to yield.

Mr. RANSDELL. Will the Senator yield very briefly for that purpose?

Mr. HARRISON. Yes.

Mr. RANSDELL. I dislike to deprive the Senator of this opportunity to talk when I know he wants so badly to do it.

The Senator from North Dakota has asked me if I am in sympathy with the opposition to the sugar feature of the bill. That is the substance of it. I should like to say to him that I am in deepest sympathy with this provision laying a duty on sugar, just as I am in sympathy with the provision imposing a duty on cotton and some other things in this bill. It has been the policy of this country for a long time to have a good, big duty on manufactured articles. I come from a section of the country where we do not manufacture, but we do produce a great many raw products; and I should like to see the principle of protection, if we are to have it, or at least the principle of duties on imports, applied to agricultural products, and that is what this emergency tariff bill does. It is carrying out the principle of placing an import duty on agricultural products.

It is perfectly consistent for me to stand for a duty on sugar, and an increased duty on sugar, which to some extent is going to keep the people of my State from suffering terrific loss, because they are at the present time suffering a very, very heavy loss on their sugar; and I will say to the Senator from Mississippi that even if we get this bill passed, and have the increased rate of duty on sugar which it carries, that will simply diminish their losses, but will not save them harmless at all. They will suffer a great deal. Right now, as I said or tried to say, it is the duty of statesmen to look a long way into the future, not to consider merely the present; and we ought so to legislate as to produce in continental United States every pound of sugar which our people consume. We have been trying in a way to do this for a long time, but we have never yet done it.

We make in continental United States not one-half, but only a little over one-fourth of all the sugar that we consume here. We ought to make it all. I understand that there are 200,000,000 acres of land in the United States adapted to the raising of sugar beets. Why do we not make all the sugar that we need from beets? That may not be of any interest to the people of Louisiana, because we do not make sugar from beets.

We make it from sugar cane; and there is only a limited area in the whole Continental United States, which happens to be very largely in my State, that is adapted to the cultivation of sugar cane; but it would be a wise thing, I will say, and as lawmakers, as legislators for the benefit of the whole country, we ought so to legislate, if it be possible, in the enactment of our tariff laws as to cause the American people to produce in this country all the sugar that we need here for our home consumption. We have never done it. We have pursued what has seemed to me to be a very unwise policy in the rates of duty imposed upon sugar. If those rates were a little higher, we would make it all at home; and then when we had all the sugar we needed at home, it seems to me, Senators, that we would be getting cheap sugar, just as we have gotten in the past cheap corn, cheap wheat, cheap cotton. They have all been cheap. Why? Because we had all we needed here for home consumption and some to sell abroad.

The best way to get cheap sugar is to make what you need and more than you need. Then you will sell it cheaply. You will not then require a duty to be kept on it forever. You will not have to hothouse it, as our distinguished leader of the minority says that the Louisiana sugar is hothoused. He told the truth to a great extent when he said that. We have had to hothouse it. We have had to take care of it; and, perhaps, if you will pursue this broad policy the Louisiana sugar growers may have to go out of the business, but if they did they would go out gradually. They would get into something else, and, perhaps, would be just as prosperous as they are now. It has been a slow death. You have strangled them by the policy that you have pursued. You ought either to take care of them or to cut off their heads at once and be done with it.

Mr. SIMMONS. Mr. President——

Mr. RANSDELL. I yield to the Senator from North Carolina, if I may be permitted to do so.

Mr. HARRISON. I yield to the Senator from North Carolina.

Mr. SIMMONS. I beg the Senator's pardon; I understood that he was referring to me. I thought he was referring to me as saying that the sugar industry was hothoused.

Mr. RANSDELL. No; I refer to the Senator from Alabama [Mr. UNDERWOOD], the present leader of the minority.

Mr. SIMMONS. I thought the Senator meant the minority of the committee.

Mr. RANSDELL. I heard that Senator say once that the sugar of Louisiana was a hothouse product, and that is true to a great extent. It did have to have some protection, or it would have died. We had to nurse it as a plant has to be nursed in a hothouse. I do not say that in any derogation at all of the distinguished Senator, who is one of the best friends I have here, and for whom I have the highest esteem.

Mr. UNDERWOOD. I recall the speech to which the Senator refers. It was some eight years ago, in the House of Representatives.

Mr. SIMMONS. I misunderstood the Senator. I thought he said the leader of the minority on the committee.

Mr. RANSDELL. No, sir; I said the leader on this side at the present time.

Now, Senators, I think that this provision in regard to sugar would help us to some extent in Louisiana. It would encourage the beet-sugar people. It would keep a good many of them from going out of business; and I think the other provisions of this bill would help agriculture very materially.

If I get a chance, I intend to vote for the bill. Instead of making the criticism which some of my good Democratic friends make, I am one of those Democrats who have come very seriously to the conclusion that the tariff is not a political question. It never has been a political question; at least, it ought not to have been a political question. It always has been considered one in the history of this country. I believe years ago, when Mr. Hancock was nominated for President by the Democrats, he made the simple statement that the tariff was a local issue, and a great many people laughed at him. They made fun of Hancock for telling the truth, when everybody who knows anything at all knows that it is a local issue with nine-tenths of the men when they come to vote on it.

It is a business question, and it ought to be a business question. I hope, Mr. President and Senators, to live to see the time when it is treated as a great business question and taken out of the realm of politics, where it has been kept for so long.

Mr. McCUMBER. Mr. President——

Mr. RANSDELL. I yield to the Senator from North Dakota.

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from North Dakota?

Mr. HARRISON. I do.

Mr. RANSDELL. If I am permitted, I will yield to the Senator from North Dakota.

Mr. McCUMBER. Will the Senator allow me to suggest to him that his position is supported by the governor of every State of the South, each one of them being a member of an association for tariff protection?

Mr. HARRISON. Mr. President, I do not know on what the Senator bases such a statement as that. The mere fact that a governor may be a member of some association, and an association may indorse some infamous piece of legislation, certainly does not bind every individual member to it. If the Senator makes that statement on the basis of the fact that the governors in every State have expressed themselves individually in behalf of this bill, then that is a different proposition.

Mr. McCUMBER. No; I simply said that they are members of an association for tariff protection.

Mr. HARRISON. Oh, yes. There are many men, I may say to the Senator, who believe in tariff protection who would not stomach the propositions that the Senator and his colleagues are trying to crowd down the throats of some people in this bill.

Mr. McCUMBER. I am simply stating that the Senator from Louisiana is supported by the governor of every State of the South in his protection proclivities for the products that are raised in his State.

Mr. HARRISON. The Senator is not quite fair, I think, and, I am sure, not accurate in that statement, because he would give the impression to the country by the statement that every governor in the South supports the contention of the Senator from Louisiana [Mr. RANSDELL].

Mr. McCUMBER. They might disagree as to what the protection might be, but they are protectionists.

Mr. HARRISON. No. The Senator makes that statement because they may be affiliated by membership with some association. Is that right?

Mr. McCUMBER. Not some association. I can give the Senator the information.

Mr. HARRISON. What is the association?

Mr. McCUMBER. I have here a letter extending an invitation to attend a second southern tariff congress, to be held in Atlanta January 27 to 29. The heading of this letter is:

SOUTHERN TARIFF ASSOCIATION—NONPARTISAN.

Organized to protect and promote the interests of those engaged in productive pursuits.

It is a tariff association, organized to protect.

Mr. HARRISON. Made up of the few Republicans who are in the South.

Mr. McCUMBER. The vice presidents of the association are—

Hon. W. P. Hobby, governor of Texas; Hon. John M. Parker, governor of Louisiana; Hon. Lee M. Russell, governor of Mississippi; Hon. Hugh M. Dorsey, governor of Georgia; Hon. Sidney J. Catts, governor of Florida; Hon. Robert A. Cooper, governor of South Carolina; Hon. Edwin P. Morrow, governor of Kentucky; Hon. Thomas E. Kilby, governor of Alabama; Hon. Thomas E. Campbell, governor of Arizona; Hon. Arthur M. Hyde, governor elect of Missouri; Hon. Albert C. Ritchie, governor of Maryland; Hon. Meritt C. Mechem, governor elect of New Mexico; Hon. Thomas W. Bickett, governor of North Carolina; Hon. J. B. A. Robertson, governor of Oklahoma; Hon. Alf Taylor, governor elect of Tennessee; Hon. Westmoreland Davis, governor of Virginia; Hon. John J. Cornwell, governor of West Virginia; Hon. T. C. McRae, governor of Arkansas; Hon. Thomas W. Hardwick, governor elect of Georgia; Hon. Cary A. Hardee, governor elect of Florida; Hon. Octaviano A. Larrazolo, governor of New Mexico; Hon. A. H. Roberts, governor of Tennessee; and Hon. Charles H. Brough, governor of Arkansas.

All members of the Southern Tariff Association, organized to protect and promote the interests of those engaged in productive pursuits, all pretty good Republicans, it seems to me.

Mr. HARRISON. It seems to me the Senator is not warranted in the statement that he has made, from the heading of that letter and the names he has read. I know nothing about the association. I have seen in the papers that it is going to meet in Atlanta, I think, this coming week. But it is an association. It does not say it is for a protective tariff. It says to protect producers of the country, as I understood.

Mr. McCUMBER. It is a tariff association, "Southern Tariff Association."

Mr. HARRISON. It does not say "Southern Protective Tariff Association."

Mr. McCUMBER. "Southern Tariff Association, to protect." If that does not mean a protective tariff, I do not understand English.

Mr. HARRISON. I do not think the Senator is justified in assuming that all the governors whose names are attached to it are protectionists for that reason.

Mr. RANSDELL. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Louisiana?

Mr. HARRISON. I shall retain the floor for a moment, and then I will yield to the Senator. I do not believe that the Senator from North Dakota is justified in assuming that they are protectionists. I hold no commission to speak for any of those gentlemen. I know some of them. I know the governor of my State, whose name the Senator read. He and I are not political friends. I have no right to defend him here or anywhere else, so far as politics are concerned; but I can not believe that the governor of my State, whose name the Senator read, is in favor of any protective tariff. I know he could not be in favor of such a proposition as is embodied in this bill. I do not believe he would subscribe to or indorse the proposition that the tariff is a local proposition, and, so far as that governor is concerned, I think the statement is all wrong. I think it is inaccurate as regards most of those gentlemen.

The Senator from Louisiana [Mr. RANSDELL] is not changing his views on the tariff. He has always believed it is a local proposition; he has always believed as he believes now. He stood alone at times; sometimes just he and his colleague would vote on propositions differently from his party. He had convictions about the proposition; he had the courage to take his stand, and he took it. So we are not surprised, and no one else is surprised, about the statement of the Senator from North Dakota touching the Senator from Louisiana, that the tariff is a local question.

Now, I yield to the Senator from Louisiana.

Mr. RANSDELL. Mr. President, I had the honor of attending and addressing the first meeting of the tariff association to which the Senator from North Dakota referred. It was held in the city of New Orleans, I think in November of last year. I do not know that one can call it a protective tariff association, but the idea I got from it, and the idea which I indorsed then and indorse now, is this—and I believe it is Democratic doctrine—that we need to impose duties upon imports in order to raise sufficient revenue to carry on this great Government, and in the imposition of duties upon imports that Southern Tariff Association stands for the imposition of fair duties upon the raw products of the South, the agricultural commodities of the South. That Southern Tariff Association says, "If you must have a tariff system, if you must raise between three hundred and five hundred million dollars by the imposition of duties upon commodities, raw or manufactured, brought into this country from foreign countries—and that is what the tariff is—then you must treat the southern portion of this Republic fairly; then you must impose a fair rate of duty, so that southern commodities, like cotton, like cotton seed, like wool, like peanuts, like sugar—articles which will produce a great deal of revenue—will receive reasonable protection, if you please to call it that.

Let me remind my Democratic friends on this floor that when the Simmons-Underwood bill was enacted, something over seven years ago, it was intended that it should produce about $300,000,000 of revenue, and the commodity which produced more revenue than any other was sugar. It brought about $54,000,000 per annum, about one-sixth of the whole return. Surely the Democratic doctrine of tariff for revenue could be applied to sugar if to any commodity in the bill.

It had the merit of hoary age. There had always been a duty upon sugar, except during the McKinley administration, when there was a big bounty. Yet, in spite of the fact that we were then raising revenue to the extent of $300,000,000 by imposing duties on importations into this country, that commodity was singled out for slaughter, which produced more revenue than any other. That commodity was placed upon the free list, in spite of the fact——

Mr. McKELLAR. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Tennessee?

Mr. HARRISON. I yield.

Mr. RANSDELL. I hope the Senator from Mississippi will permit me to conclude my statement before yielding to the Senator from Tennessee.

Mr. HARRISON. I want the Senator from Louisiana to have an opportunity to finish his remarks, if the Senator from Tennessee will allow him to proceed.

Mr. McKELLAR. I want to ask the Senator from Louisiana a question, not the Senator from Mississippi.

Mr. RANSDELL. I yield now. The Senator has broken into my line of thought.

The PRESIDING OFFICER. The Senator from Louisiana has not the floor. The Senator from Mississippi has the floor.

Mr. RANSDELL. I am talking, anyhow.

The PRESIDING OFFICER. The Chair calls the attention of the Senator from Louisiana to the fact that this proceeding is by virtue of unanimous consent. A Senator can not hold the floor indefinitely, of course, and yield to other Senators. When a Senator rises and addresses the Chair, it is the duty of the Chair to ask the Senator holding the floor whether he will yield to the Senator seeking recognition, and the Senator who is occupying the floor temporarily by permission of the Senator who actually has the floor, can not elect whether he will yield or not yield. So the Chair asked the Senator from Mississippi whether he would yield to the Senator from Tennessee.

Mr. PENROSE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Pennsylvania?

Mr. PENROSE. I was going to suggest a solution of the difficulty by moving that the Senate take a recess until 12 o'clock to-morrow.

Mr. HARRISON. I object to that.

The PRESIDING OFFICER. The Senator from Mississippi declines to yield.

Mr. PENROSE. I will not press the motion if the Senator desires to hold the floor.

The PRESIDING OFFICER. The Senator from Mississippi has the floor. If he desires to yield to the Senator from Pennsylvania, he can do so.

Mr. HARRISON. I hope the Senator will not move a recess yet. The Senator from Louisiana has not finished.

Mr. PENROSE. I will withhold the motion.

Mr. HARRISON. I shall object to a recess, so far as I can, and the only way I can do so is to suggest the absence of a quorum, because there are some important matters to come up in the morning hour to-morrow. The Senator from Idaho [Mr. BORAH] had a bill up which is unfinished, and I think he wants to have it taken up in the morning, touching landlords and tenants in the District of Columbia. He is not in the Chamber, and I do not want to see any snap judgment taken on him.

Mr. PENROSE. Then, Mr. President, I suggest the absence of a quorum.

Mr. HARRISON. Mr. President, I have not yielded to the Senator yet.

Mr. PENROSE. I make the suggestion, and it is in order.

The PRESIDING OFFICER. The Senator from Mississippi has the floor, and if he declines to yield the Senator from Pennsylvania can not suggest the absence of a quorum while the Senator from Mississippi is occupying the floor.

Mr. HARRISON. I yield to the Senator from Louisiana for a moment.

Mr. RANSDELL. I would like, if permitted, to yield to the Senator from Tennessee [Mr. McKELLAR], who desired to ask me a question.

Mr. McKELLAR. I was very much interested in what the Senator said about the meeting of the association of governors in a protective-tariff association. Did I understand the Senator to say that he was present at the first meeting?

Mr. PENROSE. Mr. President, this debate is out of order, and I demand the regular order.

The PRESIDING OFFICER. The regular order is that the Senator from Mississippi has the floor. He declines to yield to the Senator from Pennsylvania to suggest the absence of a quorum, which is entirely within the province of the Senator from Mississippi.

Mr. PENROSE. But it is not within the province of the Senator from Mississippi to permit a running debate by other Senators on the floor.

The PRESIDING OFFICER. If the Senator from Pennsylvania makes the point, the Chair will be compelled to sustain him. The Senator from Mississippi has no right to yield the floor indefinitely to other Senators to debate.

Mr. HARRISON. I do not think I can be charged with that. I have tried to be courteous with Senators who wanted to ask me questions. They have occupied a great deal of the time. I dislike to decline to yield to the Senator from Louisiana when he asks me a question. But I will proceed with my speech.

Mr. RANSDELL. I hope I may be permitted to answer the Senator from Tennessee.

The PRESIDING OFFICER. If the Senator from Mississippi yields the floor for a further statement by the Senator from Louisiana, under the rules of the Senate he will be compelled to yield the floor, the Senator from Pennsylvania having made the point of order.

Mr. HARRISON. I will yield to the Senator from Pennsylvania to make his point of no quorum.

Mr. PENROSE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Pennsylvania suggests the absence of a quorum. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Capper	Johnson, Calif.	Robinson	Trammell
Curtis	Kellogg	Sheppard	Underwood
Elkins	McCumber	Simmons	Wadsworth
Fletcher	McKellar	Smith, S. C.	Walsh, Mass.
Gooding	McNary	Smoot	Willis
Hale	Penrose	Spencer	
Harrison	Ransdell	Sutherland	

Mr. McKELLAR. I have been requested to announce that the Senator from Virginia [Mr. SWANSON] and the Senator from North Carolina [Mr. OVERMAN] are absent on official business.

The PRESIDING OFFICER. Twenty-six Senators have answered to their names. A quorum is not present.

Mr. PENROSE. Mr. President, I move that the Senate take a recess until 12 o'clock to-morrow.

Mr. HARRISON. Mr. President, I make the point of order——

Mr. PENROSE. The motion is not debatable.

Mr. HARRISON. I make the point of order that the motion is not in order.

The PRESIDING OFFICER. The Chair calls the attention of the Senator from Pennsylvania to the fact that the call of the Senate so far has shown only 26 Senators present, and the point of order is therefore sustained. The Secretary will call the roll of absentees.

Mr. PENROSE. I desire to say on the point of order that I was under the impression that a motion to adjourn or take a recess is always in order.

The PRESIDING OFFICER. A motion to adjourn is in order, but a motion to take a recess is not in order when there is not a quorum present. The Chair assumed that the Senator from Pennsylvania knew that; there is no question about it. The Secretary will call the names of the absentees.

The reading clerk called the names of the absent Senators, and Mr. GLASS, Mr. HARRIS, Mr. JONES of Washington, Mr. KENDRICK, Mr. KEYES, Mr. PAGE, Mr. POINDEXTER, Mr. POMERENE, Mr. STERLING, and Mr. WARREN answered to their names when called.

Mr. LODGE, Mr. KENYON, and Mr. FERNALD entered the Chamber and answered to their names.

The PRESIDING OFFICER. Thirty-nine Senators have answered to their names. There is not a quorum present.

Mr. PENROSE. I move that the Sergeant at Arms be directed to request the attendance of absent Senators.

The motion was agreed to.

The PRESIDING OFFICER. The Sergeant at Arms will carry out the order of the Senate.

Mr. BALL, Mr. DILLINGHAM, Mr. COLT, Mr. PHIPPS, Mr. BRANDEGEE, Mr. MOSES, Mr. FRANCE, Mr. CALDER, Mr. DIAL, and Mr. LA FOLLETTE entered the Chamber and answered to their names.

The PRESIDING OFFICER. Forty-nine Senators have answered to their names. A quorum of the Senate is present.

Mr. PENROSE. I move that the Senate take a recess until 12 o'clock to-morrow.

Mr. HARRISON. On that I ask for the yeas and nays.

The PRESIDING OFFICER. If the Senator will indulge the Chair for a moment, a quorum having been obtained, does the Senator from Pennsylvania desire that the order directing the Sergeant at Arms to request the attendance of absent Senators

be continued or is it desired to vacate further proceedings under the order?

Mr. PENROSE. I think the more Senators who are here the more will be benefited by the discussion.

The PRESIDING OFFICER. The question is on the motion of the Senator from Pennsylvania that the Senate take a recess until 12 o'clock to-morrow, upon which the Senator from Mississippi demands the yeas and nays.

The yeas and nays were ordered, and the reading clerk called the roll.

Mr. JONES of Washington (after having voted in the affirmative). I note that the senior Senator from Virginia [Mr. SWANSON] has not voted. He is necessarily absent, and I agreed to take care of him for the day. I therefore withdraw my vote, but ask to be counted present to make a quorum.

Mr. MOSES. I inquire if the junior Senator from Louisiana [Mr. GAY] has voted?

The PRESIDING OFFICER. The Senator has not voted.

Mr. MOSES. I have a standing pair with that Senator, and in his absence withhold my vote.

Mr. KIRBY. I have a general pair with the junior Senator from Indiana [Mr. NEW]. In his absence, I withhold my vote.

Mr. SUTHERLAND (after having voted in the affirmative). I inquire if the senior Senator from Kentucky [Mr. BECKHAM] has voted?

The PRESIDING OFFICER. The Senator has not voted.

Mr. SUTHERLAND. I have a general pair with the Senator from Kentucky, and he being absent, I withdraw my vote. I should like to be recorded as present.

Mr. LODGE (after having voted in the affirmative). I find that my pair, the Senator from Georgia [Mr. SMITH], has not voted. I transfer that pair to the junior Senator from Wisconsin [Mr. LENROOT], and allow my vote to stand.

Mr. FERNALD (after having voted in the affirmative). I have a pair with the junior Senator from South Dakota [Mr. JOHNSON]. I find he has not voted. I transfer my pair with him to the senior Senator from Minnesota [Mr. NELSON] and allow my vote to stand.

Mr. KENDRICK (after having voted in the negative). I have a general pair with the senior Senator from New Mexico [Mr. FALL]. In his absence, I withdraw my vote.

Mr. MYERS. I inquire if the Senator from Connecticut [Mr. MCLEAN] has voted?

The PRESIDING OFFICER. He has not voted.

Mr. MYERS. I have a pair with that Senator, which I transfer to the Senator from Rhode Island [Mr. GERRY], and will vote. I vote "yea."

Mr. GLASS (after having voted in the negative). I have a general pair with the senior Senator from Illinois [Mr. SHERMAN]. In his continued absence, I withdraw my vote.

Mr. MOSES. I learn that I can transfer my pair with the junior Senator from Louisiana [Mr. GAY] to the senior Senator from Idaho [Mr. BORAH]. I make that transfer, and will vote. I vote "yea."

Mr. DILLINGHAM (after having voted in the affirmative). I observe that the senior Senator from Maryland [Mr. SMITH] has not voted. I have a general pair with him, which I transfer to the junior Senator from Maryland [Mr. FRANCE], and allow my vote to stand.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Iowa [Mr. CUMMINS] with the Senator from Ohio [Mr. POMERENE];

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH];

The Senator from Illinois [Mr. MCCORMICK] with the Senator from Nevada [Mr. HENDERSON];

The Senator from Indiana [Mr. WATSON] with the Senator from Delaware [Mr. WOLCOTT];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from Pennsylvania [Mr. KNOX] with the Senator from Oregon [Mr. CHAMBERLAIN].

The result was announced—yeas 35, nays 14, as follows:

YEAS—35.

Ball	Gooding	McNary	Smith, S. C.
Brandegee	Gronna	Moses	Smoot
Calder	Hale	Myers	Spencer
Capper	Kellogg	Page	Sterling
Colt	Kenyon	Penrose	Townsend
Curtis	Keyes	Phipps	Wadsworth
Dillingham	La Follette	Poindexter	Warren
Elkins	Lodge	Reed	Willis
Fernald	McCumber	Simmons	

NAYS—14.

Dial	Hitchcock	Ransdell	Underwood
Fletcher	McKellar	Robinson	Walsh, Mass.
Harris	Overman	Sheppard	
Harrison	Pittman	Trammell	

NOT VOTING—47.

Ashurst	Glass	Lenroot	Smith, Ariz.
Beckham	Gore	McCormick	Smith, Ga.
Borah	Heflin	McLean	Smith, Md.
Chamberlain	Henderson	Nelson	Stanley
Culberson	Johnson, Calif.	New	Sutherland
Cummins	Johnson, S. Dak.	Newberry	Swanson
Edge	Jones, N. Mex.	Norris	Thomas
Fall	Jones, Wash.	Owen	Walsh, Mont.
France	Kendrick	Phelan	Watson
Frelinghuysen	King	Pomerene	Williams
Gay	Kirby	Sherman	Wolcott
Gerry	Knox	Shields	

So the motion of Mr. PENROSE was agreed to; and (at 5 o'clock and 27 minutes p. m.) the Senate took a recess until to-morrow, Thursday, January 27, 1921, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *January 26, 1921.*

The House met at 12 o'clock noon.

The House was called to order by the Speaker pro tempore (Mr. TILSON).

Rev. James Shera Montgomery, pastor of Calvary Methodist Church, Washington, D. C., offered the following prayer:

Our Heavenly Father, we trust that we lisp Thy Holy Name in reverence and in gratitude. Make plain before us this day our duty. Quicken in all of us a sense of responsibility to our country and to our fellow citizens. And we beseech Thee to enable us always to practice the Golden Rule, which is perfect in its character and perpetual in its obligations. Through Jesus Christ, our Lord, Amen.

The Journal of the proceedings of yesterday was read and approved.

AGRICULTURAL APPROPRIATION BILL.

Mr. ANDERSON. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15812, the Agricultural appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. HICKS in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15812, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 15812) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1922.

The CHAIRMAN. The Clerk will proceed with the reading of the bill for amendment.

The Clerk read as follows:

For maintenance and repairs of experimental highways, including the purchase of materials and equipment; for the employment of assistants and labor, $25,000.

Mr. GARD. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Ohio moves to strike out the last word.

Mr. GARD. I do so for the purpose of making an inquiry. This item, contained on lines 21, 22, and 23, on page 66, provides $25,000 "for maintenance and repairs of experimental highways, including the purchase of materials and equipment; for the employment of assistants and labor, $25,000." What is the nature of such an item as $25,000? How can it be of benefit with such a limited appropriation?

Mr. ANDERSON. Under the language formerly carried in this item certain experimental roads were constructed in the vicinity of the city of Washington. The committee was of the opinion last year that with so much road construction going on there was no necessity for the construction of additional experimental roads and consequently reduced the appropriation carried under this item to the sum which the bill now carries, and this year we changed the language so as to provide only for the repair and the maintenance of those roads.

Mr. GARD. Does that refer merely to the roads heretofore constructed in the vicinity of Washington?

Mr. ANDERSON. Yes.

Mr. GARD. Not in the different parts of the United States, under different climatic conditions, but merely around the city of Washington?

Mr. ANDERSON. Yes. We find now that the subsoil under the roads makes a great deal of difference in the character of the construction necessary, and small portions of those roads are being torn up for the purpose of determining the effect which the subsoil had upon the road itself; and then, of course,

these roads, when they are turned up in that way, have to be repaired, and this item simply carries the funds for the repairs.

Mr. GARNER. Mr. Chairman, will the gentleman yield for a question?

Mr. GARD. Certainly.

Mr. GARNER. Are you likely to continue to carry $25,000 for the repair of these roads for the next 10 years?

Mr. ANDERSON. No; I do not think so. I think the information that can be gotten with respect to these experimental roads will be obtained within a comparatively short time, and then this item may go out. I do not want to say that definitely, but that is my impression.

Mr. GARD. Of course, the substructure of the road depends entirely upon the climatic conditions where the roads are located?

Mr. ANDERSON. Not entirely.

Mr. GARD. Greatly, at least?

Mr. ANDERSON. The weather conditions will have an effect on the subsoil, and that is one of the questions connected with this item. But we find that different classes of soil require different construction, and while that problem has not been entirely worked out in detail we know that generally to be the case. In any event we have got to maintain these experimental roads that the Government has already constructed.

Mr. GARNER. Does the gentleman mean that we will have to maintain them indefinitely?

Mr. ANDERSON. As long as the contracts under which they were constructed remain in existence.

Mr. GARD. May I ask the gentleman what kind of a contract that is?

Mr. ANDERSON. I will say to the gentleman that the contracts were not made in my time, and I have not gone into that question particularly.

Mr. GARNER. Does the gentleman mean to say that the Government has a contract with the people to keep up these roads indefinitely?

Mr. ANDERSON. I have not gone into this matter in detail, but my understanding is that when these roads were authorized certain contracts were entered into between the Government and the States and municipal authorities in the places where the roads were to be constructed, relative to their operation and maintenance. I think those contracts, however, run only for a limited period.

Mr. GARD. The gentleman throws a new light on the situation, and a very interesting one, because he refers to certain contracts, the exact terms of which he does not know. Now, in the case of contracts for roads immediately adjacent to Washington, of course, if they are in the District of Columbia they would be made by some one immediately representing the Congress of the United States. The only other States interested would be Virginia and Maryland, because those are the only two immediately adjacent States.

Mr. ANDERSON. I would not want the gentleman to get a wrong impression from what I have said. There was nothing in the hearings with reference to these contracts. I am speaking only of an impression that I have gained from year to year with respect to this particular work. I may be in error about the contracts, but it is hardly likely that these roads would be constructed without some agreement with the local authorities.

Mr. GARD. I think we all are interested in knowing whether this is really an item for obtaining knowledge by experiment, or whether, under the guise of some existing contracts, this will run along here from year to year. But it is apparent that if it is experimental and the knowledge desired is to be gained by experiment, at some time or other the experiment should be finished and the knowledge procured. But if it is under a contract, then it goes on indefinitely.

Mr. ANDERSON. Of course, it can not go on indefinitely or for a longer period than the contract provides.

Mr. TILSON. Mr. Chairman, will the gentleman yield?

Mr. GARD. Yes.

Mr. TILSON. Do they conduct these experiments in different parts of the country, so that they can get information as to the kind of roads that shall be constructed in one part of the country and the kind that should be constructed in another part?

Mr. ANDERSON. Not under this item. This covers only the repairs and maintenance of roads in the vicinity of Washington, where the Government is continuing its control for the purpose of winding up its experiments.

Mr. TILSON. A road that would work satisfactorily in the vicinity of Washington might not work well further north, where the frost enters the ground much more deeply than it does here.

Mr. ANDERSON. That is unquestionably true; but these experiments are carried on in cooperation with the State highway services under other items of this bill, and are carried on all over the country. This item provides for the maintenance and repair incident to the Government experimental control over the roads in the vicinity of Washington.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HUSTED. Mr. Chairman, I rise in opposition to the formal motion of the gentleman from Ohio.

I realize that this work being conducted by the Bureau of Public Roads is of the highest economic importance. There is no question about that, and we are appropriating a large amount of money for it, nearly half a million dollars. Now, I have heard a good deal about the experiments which are being carried on. I should like to ask the chairman of the committee as to the results which have been achieved by this bureau, whether anything of practical value has been accomplished in reducing the cost of roads and in making roads more durable and of longer life, whether it has passed the experimental stage, and whether we really have gotten much as a result of the money we have expended.

Mr. ANDERSON. A great deal of experimentation has taken place, and a great deal of knowledge has been attained as to the relative wearing strength of different kinds of roads and different kinds of road materials. A great deal has been learned with reference to the drainage of the subsoil and the mechanical means of providing drainage. A great deal has been learned with respect to the effect of traffic upon roads and the depth of the bed necessary to carry traffic. But it can not be said that this experimentation has reached a point where it is no longer necessary to conduct experiments. As a matter of fact we have only very recently gone to experimentation on the roads on a nation-wide scale which would give us the information necessary from a country-wide standpoint. I think these experiments will have to go on as long as there is any road construction in the country, because road building, like other sciences, is a progressive science, and in order to keep up with the state of the art it will be necessary to conduct experiments as long as road building continues in the country.

Mr. BRIGGS. Will the gentleman yield?

Mr. ANDERSON. I have not the floor.

Mr. HUSTED. I yield to the gentleman.

Mr. BRIGGS. I should like to ask the chairman of the subcommittee what is the present state of the road fund of the Federal Government, the one which usualy cooperates with the States? Does the gentleman know how much there is on hand in that fund?

Mr. ANDERSON. I can not state offhand, but the gentleman from Oregon [Mr. MCARTHUR] put in the RECORD the other day a statement which shows the exact status of that fund. It differs in different States. Some States have enough money to continue road work for another year; some have not. There is in the road fund now something like $219,000,000.

Mr. BRIGGS. I notice in the paper a report this morning that there is a possibility of the Congress appropriating $100,000,000 for the Federal road fund. I was wondering whether the gentleman knew anything about that.

Mr. ANDERSON. Of course, that does not come before either the subcommittee, of which I am chairman, or the Agricultural Committee, and I have no more information about it than any other gentleman has.

Mr. MOORE of Virginia. If the gentleman will allow me, I will state that the Committee on Roads reported a bill authorizing $100,000,000 for the next fiscal year.

Mr. BRIGGS. That was found to be necessary?

Mr. MOORE of Virginia. It was found to be very essential in order to furnish the funds necessary to complete projects that are in view, and also to encourage and stabilize the plan of road construction under the existing legislation.

Mr. MAGEE. Mr. Chairman, I move to strike out the last two words. In response to the inquiry of the gentleman from Ohio and the gentleman from Texas, I will read a paragraph from the hearings in explanation of the matter:

This item carried $60,000 for a number of years. Last year the appropriation was reduced to $25,000, and this year we have not requested a change in the amount, but we have asked for a change in wording to define more clearly the work we can do with this limited fund. We have a number of experimental roads built by the bureau which we have maintained for a number of years. Last year we gave up the maintenance of the least important from the standpoint of the information which we felt we could get from them and turned them back to the counties and States for maintenance. But we are still maintaining a few of the important experimental roads and are asking the continuance of this appropriation for this purpose. One is a road which ought to be maintained continuously. This is the road leading from the Camp Humphreys road to Mount Vernon. It has been under our jurisdiction for a number of years and is the main road into Mount Vernon. Also, we have found it necessary in making studies of roads that have failed to dig up small sections to take soil samples from underneath and to investigate the structure of the subgrade. We need a small fund with which to repair such places.

Mr. MADDEN. I move to strike out the last two words. I think there has been enough said about this, but perhaps I may throw a little light on the reason for the construction of experimental roads.

The purpose of building experimental roads is first to ascertain the original cost of constructing certain types of roads; next the durability of that type of road, next the noiselessness of the road under traffic, next the life of the road, and next the amount of expense required to maintain it in passable condition. They make this experiment with various types of roads in order that they may be able to know just which type will do the best and will cost the least. They endeavor to ascertain the type of road over which the greatest loads can be drawn with the least resistance, and sometimes it turns out that the road which costs the most to construct is the cheapest in the long run, because it requires less repairs.

Experimentation in road building will, of course, never end, because new developments are constantly being made which go to show the type of road which is best to-day may not at all be best to-morrow.

Mr. HUSTED. Will the gentleman yield?

Mr. MADDEN. Certainly.

Mr. HUSTED. Has the bureau come to any conclusion about matters—has it made any recommendation as to what roads are best and most durable?

Mr. MADDEN. I do not know what the bureau has done; I am giving my experience as an engineer. Take it throughout Europe when the automobile became one of the means of locomotion over the highways, the first difficulty they encountered was that the automobile lifted the surface of the road up and carried it off in clouds of dust. The next question was how that could be overcome. Experiments were made from time to time until to-day, where they are willing to spend the money, they have developed a type of road that will last and will not be carried away by the suction of the automobile.

Mr. FESS. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. FESS. I read a statement recently that the Appennine Road, which had lasted 2,000 years, did not stand two years under the modern truck transportation.

Mr. MADDEN. That is true; I drove over it myself at the foot of the Appennine Mountains 60 miles when the automobile was in its infancy, and the road was ideal. I drove over it later and saw where the automobile had torn it up in a way that it was almost impossible to ride over it. I rode over it again after they had put bitulithic matter into the surface of the road, and it is now just like steel, hard and smooth as glass. So it is with the boulevards in the great cities. When we began to build boulevards for automobile travel, that were perfectly good for other travel, we discovered that the automobile would lift big lumps out of the surface of the road. The question was how to overcome that. It has been overcome so that the roads now can be made in such condition as to assure a continued use without destruction by the automobile, but they must be maintained, and the only way in the world that the Agricultural Department can finally reach a conclusion that will have any value will be to continue the experimental work on these roads.

Mr. WINGO. Mr. Chairman, I move to strike out the last word. I presume that everyone understood when we started on the program of Federal aid to different communities through the different States that practical difficulties would be encountered and that it would take time and experience to iron them out. In spite of some friction and some disappointments that have occurred in my own State I still have faith that we shall be able to solve the practical problems that have arisen and be able to operate under terms that will make it possible for us to get the benefit of Federal aid.

I am not one of those so foolish as to believe that you can standardize roads any more than you can standardize the men of a community. The point I wish to suggest is this: I know in some parts of my own district that it would be foolish from a financial point for the taxpayer to undertake the same character of road that other communities in my district would properly undertake. It is very much like a man starting out to build a house—a type of house that would be suitable for a young man newly married would be folly for another to undertake. It would be false economy. My observation has been, in spite of some of the criticism of road engineers of the department, one of the best roads in my State is the cheapest road. I have in mind a half-mile stretch of road built as an experimental test, and to which I contributed, and it is the only road that stood up for years with practically no repairs. It was built out of local gravel, and I think the secret of its endurance was not in the character of the material or the roadbed but the method by which the road was constructed. I think that the very method or element that contributed to its permanency was, at the time of construction, regarded as a probable deterrent of its durability. A rainy season came on as they were rolling in the gravel, and the rain made moist the clay that was combined with the local gravel and made it possible for the small stones to be rolled in and deeply impregnate the clay, so that it hardened and made a smooth, compact, and durable surface.

There has been some friction in my State, but we are hopeful that the engineer and the governor—who served 22 years in this House—will work out a method by which they will have some satisfactory road building in my State.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. WINGO. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. WINGO. I say, Mr. Chairman, I am hopeful that the Federal director of the road and our State authorities will be able to work out the situation so that good-road building in my State will not be killed. I think that there is some ground for criticism, but I do not think the criticisms of the Federal agents are just in every instance. One of the criticisms that has been made in my county is that the Federal engineers require certain things to be done that are absolutely unnecessary. For illustration, we had an extraordinary cloudburst that caused a flood which washed out bridges and destroyed dumps in some instances. That cloudburst produced high water in certain places, which as I now recall reached a higher stage than that known in seventy-odd years. The Government engineers came along following that—and I quite understand why they thought it was necessary, and that they were sincere—and required in one district that they build the dumps 2 feet higher than any rise which had ever taken place except this particular one. It was the opinion of men who discussed it with me that that was not necessary, that there were other things which were being done which would obviate the disaster if another such flood should come in another 70 years, and that the requirement of the addition of 2 feet to a dump was a useless burden to the people who were living in that section of the country, a poor agricultural section—poor not so much in productiveness of soil, but in respect to the state of development in which agriculture and the general industrial situation in the country had reached. With men living on farms which can be purchased for $25 an acre, which they are cultivating not for commercial purposes, but for the purposes of a home, there is a limit to what they can levy upon themselves for the purpose of good roads, and if you make the requirement too high I fear you will destroy the basis of good-road building in my section of the country.

Mr. HUSTED. Mr. Chairman, will the gentleman yield?

Mr. WINGO. Yes.

Mr. HUSTED. Does the gentleman know whether the bureau is making any comparative study of road building in foreign countries?

Mr. WINGO. I do not know.

Mr. HUSTED. The reason I asked that question is because I was greatly impressed by the way the French roads stood up under the stress of war.

Mr. WINGO. I presume they are.

Mr. HUSTED. Of course, I realize that the foundations of those roads are very old, and that that had something to do with it, but it seemed to me that we could learn some valuable lessons in road building, in view of the fact that our State highways last so short a time and cost us so much money. There must be something that we could learn of real value by studying the methods used by the older countries in the building of those roads, which seem to stand up so well under conditions even harder than our own.

Mr. WINGO. I think that is true, and I shall conclude with this suggestion. I do not intend anything that I have said as a vindictive criticism of the department. As I said in the beginning, I realized at the beginning Federal aid would cause friction and criticisms where each side would be sincere and where there would be an element of justice in the complaint. I am not an engineer and I can not settle these disputes, but I have faith that the department will go along in a practical way, and that as practical difficulties confront them they will draw on the experience of the past, upon road building in other countries, and upon their experience in this country, and that ultimately we will work out a sound policy which will give us the greatest amount of roads for the least amount of money. I think we will have to waste some money in experiments, and that we will have to be patient with each other, the States with the Federal Government and the Federal department patient with the

local engineers and the local commissioners, if we really achieve what we have started out to do, and that is to give this Nation a system of national highways so that each community will be connected up and be near to all of the other communities of the Nation.

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent that all debate upon this paragraph do now close.

The CHAIRMAN. Is there objection?

There was no objection.

The Clerk read as follows:

For investigating and reporting upon the utilization of water in farm irrigation, including the best methods to apply in practice; the different kinds of power and appliances, and the development of equipment for farm irrigation; the flow of water in ditches, pipes, and other conduits; the duty, apportionment, and measurement of irrigation water; the customs, regulations, and laws affecting irrigation; for the purchase and installation of equipment for experimental purposes; for the giving of expert advice and assistance; for the preparation and illustration of reports and bulletins on irrigation; for the employment of assistants and labor in the city of Washington and elsewhere; for rent outside of the District of Columbia; and for supplies and all necessary expenses, $62,440.

Mr. HAYDEN. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Amendment by Mr. HAYDEN: Page 67, line 12, strike out "$62,540" and insert in lieu thereof "$102,400."

Mr. HAYDEN. Mr. Chairman, beginning with the year 1912 and including 1918, $100,000 was appropriated annually for the purposes mentioned in this paragraph. I know of no money carried in the Agricultural appropriation bill which has rendered a greater service to the farmers of the irrigated regions of the West than the sums thus appropriated. When we of the West speak of irrigation Members from the East usually think of nothing more than the work done by the United States Reclamation Service. There is a total irrigated area in the West of 18,000,000 acres, of which but 2,000,000 acres are under the care, operation, or control of the United States Reclamation Service. It is true that the Reclamation Service on Government reclamation projects furnished much valuable instruction to the water users, but on the much larger irrigated area of 16,000,000 acres under private ownership and management this is the only appropriation made by the Government for the purpose of providing the expert engineering advice and assistance which is so greatly needed. In a desert country, where water is literally and absolutely the farmer's life, where the development of an additional supply or its conservation results in quick money returns, any governmental activity which will create a greater duty for water or enable new sources to be developed is of immense value. In my judgment, ultimately there will be as much land irrigated by pumps from the underground water supply as will be watered from streams. But when anyone now proposes to construct a pumping plant he must depend upon what some manufacturer's agent tells him as to what particular type of pump is the best to install. Yet it is well recognized that there are different classes of pumps suitable for different uses. It is therefore of great advantage to be able to go to an engineer of the Office of Public Roads and Rural Engineering and obtain disinterested advice. Not only does it enable the purchaser to secure better equipment, but perhaps to save himself a considerable sum of money. In the irrigated valley where I reside the crops on large areas of land were drowned out because of a raise in the water table, which caused the alkali to come to the surface.

It was the desire of those who control the irrigation district not only to get rid of the surplus water in the ground but to use it elsewhere for irrigation. An engineer whose salary is appropriated for out of this fund investigated the matter, and a very efficient type of pump was selected and installed. One man cares for 11 different pumping stations, all electrically operated. I know that in that instance an excellent service was rendered to the water users of the Salt River Valley. This bureau investigates different means of carrying water in canals, laterals, and various types of conduits. It is estimated that the loss of water in the ordinary dirt canal is 1 per cent a mile. If a canal is 100 miles long, no water will reach the end of it, owing to the losses by seepage and evaporation. There is, consequently, great need for further study of the best methods of lining the canals, which is now very expensive. The engineers provided for by this appropriation have made careful studies of the duty of water, but there is much more to be done in that respect. Can anyone deny that it is of the utmost importance to know the proper amount of water to apply to different crops in various sections of the country? Anyone who has ever visited any irrigated area in the valley of the Colorado River will not hesitate to say that the large amount of silt carried in the water from that stream presents a problem which is crying for solution.

There is also much to be learned about measuring devices for water. It used to be thought that nobody could accurately measure irrigating water except a civil engineer, and he would charge $10 or $15 a day for his time. If a cheap but accurate measuring device could be perfected, so that the ordinary farmer could tell how much water he is using, it would be of immense advantage. Scientific investigations and experiments of the various kinds that I have mentioned are of the utmost importance and ought to be carried on continuously by men trained in such work.

For some reason, two years ago this appropriation was reduced, and I am merely trying to restore it to the amount formerly allowed by Congress. As the result of this reduction of $40,000 many experienced engineers have left the service, and others are now on leave, because the appropriation for this year is exhausted. The entire service will soon be disrupted unless this appropriation is restored to the basis that existed prior to the war. There may possibly have been some justification for the cut during the war emergency, but I doubt it. It appears to be the result of the action of somebody who gave no real thought to the merits of this engineering activity but merely imagined that this was a good place to lop off an appropriation.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that all debate on this paragraph and amendments thereto close in five minutes. Is there objection?

Mr. HAYDEN. Reserving the right to object, Mr. Chairman, if the amendment which I have offered does not prevail, I would like to have the privilege of presenting another amendment and of discussing it for five minutes. Will not the gentleman from Minnesota extend the time to 10 minutes?

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent that all debate on this amendment close in five minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. ANDERSON. Mr. Chairman, there is no doubt that the work that has heretofore been conducted under this item is necessary and very satisfactory. But the gentleman from Arizona [Mr. HAYDEN] presents no new emergency, suggests no new problem, which justifies an increase in the amount of money now carried in the item. The amendment which he offers would simply permit additional work to be done, of the same kind and character as is now being very well done under the item in its present sum. This is no time, it seems to me, Mr. Chairman, for expanding the work of the department. It is the time for retrenchment, when we ought, so far as it is possible so to do, to maintain the status quo of the appropriation. The work, I said, is being very satisfactorily done now.

Mr. HAYDEN. Will the gentleman yield?

Mr. ANDERSON. There is no new emergency, no new problem presented, which necessitates the expenditure of an additional sum. Yes; I yield.

Mr. HAYDEN. The gentleman said that the work is now being very satisfactorily done. Is not the gentleman aware that the engineers employed under this appropriation are all now on leave, because there is no money to pay their salaries?

Mr. ANDERSON. They are not all on leave, because if they were the money now being appropriated would not be spent. It is true when the item was cut down two years ago it was necessary to reduce the force somewhat, but we now have reclamation engineers stationed in Washington, stationed in California, stationed, I think, in Arizona—although I am not certain about that—but certainly stationed in Colorado, and the work is being done to-day under the sum we are now appropriating. And there is no situation, so far as I know, which necessitates an increase of this appropriation at this time.

Mr. HAYDEN. If the gentleman will yield to me, last summer, on an enterprise in the Colorado Valley, where an engineer was wanted, I was told that there was no engineer in the vicinity and there was no money available out of this appropriation to pay his traveling expenses to even look into the matter.

Mr. ANDERSON. That would be true, Mr. Chairman, if you doubled the amount of the appropriation. There will always be the requests which the department will not have the money to fill, if we exercise any sort of economy in these expenditures. It can not be expected that we will appropriate a sum large enough so that the department will be able to meet every request, irrespective of from whom the request comes or the char-

acter of it. I think that the sum which the bill carries is ample for the purposes for which it is appropriated for the next fiscal year.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arizona [Mr. HAYDEN].

The question was taken, and the amendment was rejected.

Mr. HAYDEN. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Arizona offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HAYDEN: Page 67, line 12, strike out the figures "62,440," and insert in lieu thereof the following, "82,440."

Mr. HAYDEN. Mr. Chairman, I offer this amendment in order to increase the appropriation for irrigation investigations in the same amount as was allowed by the Committee on Appropriations in the following paragraph for drainage investigations. In my opinion, it is just as important to know how to put water on land as to know how to take water off land. The only difference between the two appropriations is that the gentlemen representing eastern congressional districts are very familiar with drainage, they understand fully the nature of that kind of improvement, so the subcommittee found a way to increase the drainage appropriation in this bill by $20,000 over the amount allowed last year. The amount appropriated last year for drainage in the manner provided in the following paragraph was $53,760. The amount carried in this bill is $73,760. Since the Committee on Appropriations has determined that the drainage investigations conducted by the Office of Public Roads are of sufficient importance to authorize an increased expenditure of $20,000 during the next fiscal year, when economy is so necessary, as has been stated by the gentleman in charge of the bill, it seems to me that Committee of the Whole ought to be able to find a way to allow the same increase for a work of equal importance to the arid sections of the country.

The gentleman from Minnesota states that no new emergency has arisen and that irrigation engineering presents no new problem. Is not the same equally true of drainage? Certainly no absolutely new problem affecting drainage has arisen in the past year, yet the committee felt justified in allowing an increase of $20,000 for that favored activity. In each case the full amount asked for in the estimates of the Department of Agriculture should have been allowed. No taxpayer would have known the difference, but the bureau would have been able to give adequate service where drainage is necessary and a like service where irrigation is practiced. The same argument applies in each case, and justice requires that each activity should be treated in the same way.

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in three minutes.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that all debate on this paragraph and all amendments thereto close in three minutes. Is there objection?

There was no objection.

Mr. ANDERSON. Mr. Chairman, it is impossible to separate in practice the problems of irrigation from the problems of drainage. The problems connected with irrigation are as much problems of the disposal of surplus water as they are problems of putting water on the land.

Now, there was a new problem connected with the next item which, the committee thought, justified an increase in that item. It has been found in many alkaline sections of the country that the alkali combines with certain of the chemical constituents of the tiles, resulting in the deterioration of the tiles and a consequent loss of thousands and even millions of dollars that have been expended in tiling lands in the alkali sections of the country. That is a very important problem, and one which ought to be solved immediately if money is to be saved in future draining operations, and it was that situation which appealed to the committee in granting the increase in the subsequent item. The reasons I have suggested as against the other amendment, it seems to me, apply equally well to this.

Mr. BYRNES of South Carolina. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. BYRNES of South Carolina. The gentleman will remember also that the engineers stated that the greatest damage of that kind appeared to have resulted in the Western States, in those States where the irrigation problem prevails?

Mr. ANDERSON. Yes. I ask for a vote, Mr. Chairman.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Arizona [Mr. HAYDEN].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For investigating and reporting upon farm drainage and upon the drainage of swamp and other wet lands which may be made available for agricultural purposes; for preparing plans for the removal of surplus water by drainage, and for giving expert assistance by advice or otherwise in the drainage of such lands; for conducting field experiments and investigations concerning the construction and maintenance of farm-drainage work; for investigating and developing equipment intended for the construction and maintenance of farm-drainage structures; for the purchase of materials and equipment; and for preparing and illustrating reports and bulletins on drainage; and for the employment of assistants and labor in the city of Washington and elsewhere; for rent outside of the District of Columbia, and for supplies and all necessary expenses, $73,760.

Mr. HAYDEN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Arizona moves to strike out the last word.

Mr. HAYDEN. Mr. Chairman, this is a very good illustration of how easy it is to secure an increase in an appropriation if the subject matter is familiar to the membership of the House or to the membership of the Committee on Appropriations. It so happens that the need for drainage is well understood all over the United States, while irrigation is of interest chiefly in the arid regions of the West. Whenever those of us who come from the deserts rise to speak upon the subject of irrigation there immediately develops an attitude of mind on the part of some of the Members of the House, at least, that we are seeking to gain some undue advantage for a new and experimental mode of agriculture which is not self-sustaining and which, therefore, should not receive support such as would be allowed in other cases.

This appropriation for drainage investigations, as I have pointed out, has been increased by $20,000 because it was urged that there are certain kinds of tile that suffer deterioration on account of alkali in the water. That is no new problem. It was not first discovered in the past year. It has been known for a long time that alkali solutions have a deleterious effect on concrete, whether that material is used for tiling or for any other purpose. It just happens to be a good excuse to raise an appropriation in which the members of the committee are interested. It is quite evident, however, to anyone who will read the hearings that the members of the subcommittee do not know very much about irrigation conditions. If they were as familiar with all that has been accomplished through irrigation as they are with respect to drainage, I have no doubt but that ample appropriations would be allowed for both purposes; that it would be just as easy to secure an increase for the one as for the other.

I sincerely wish that it were possible for all those who are in charge of bills making the appropriations to come out to the West and see with their own eyes what our needs really are. I am sure that if they did their attitude would be different. As it is, it seems almost hopeless to try to affect any change in their views by mere words of description.

Mr. BYRNES of South Carolina. Mr. Chairman, will the gentleman yield?

Mr. HAYDEN. With pleasure.

Mr. BYRNES of South Carolina. I will say to the gentleman from Arizona that after talking with men who are familiar with the details of both problems, they all agree in the idea that there is no irrigation problem that is not accompanied by a drainage problem.

Mr. HAYDEN. The gentleman from South Carolina has stated a fact which is well known to all who are familiar with irrigation. This engineering appropriation is divided into two parts—one for irrigation and one for drainage. The sum set apart for irrigation is to be expended in the West, whereas the appropriation for drainage is principally expended in the East.

Mr. BYRNES of South Carolina. This drainage appropriation is not designed for the sole benefit of the East, because the place where the tiling deterioration is taking place is really in the West, where the alkali exists, and it is desired to ascertain by experiments whether the cement tile can not be discontinued and another species of tile used instead. It is as important for the West as it is for the East.

Mr. HAYDEN. I have carefully read the hearings, and I do not understand that the new drainage problem, which the gentleman mentions, is particularly confined to the West, but that the difficulties that have been encountered have occurred all over the country. But I am convinced of one thing, however, and that is that the Committee on Appropriations knew something about drainage, while they know but little about irrigation, and consequently they recommended this increased appropriation for drainage and did nothing for irrigation.

The CHAIRMAN. The pro forma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

For supervising the preparation, distribution, and use of picric acid, T. N. T., trojan powder, and such other surplus war explosives as may be made available for use in clearing stumps and stones from agricultural land, independently or in cooperation with agricultural colleges and other agencies, $15,000.

Mr. HAUGEN. Mr. Chairman, I make the point of order against lines 11, 12, 13, 14, 15, and 16 on page 68. It is new legislation and unauthorized by law.

Mr. ANDERSON. I hope, Mr. Chairman, that the gentleman will not make the point of order.

Mr. HAUGEN. I will reserve it.

Mr. ANDERSON. Mr. Chairman, the situation is just this: The War Department has something over 10,000,000 pounds of picric acid and other explosives which are of a character that deteriorate, and they will deteriorate if the War Department continues to store them.

The War Department has agreed to turn over those explosives to the Agricultural Department for such uses as blasting out stumps and stones from agricultural land if the department will furnish the machinery necessary to supervise the distribution.

Mr. HAUGEN. Has not the War Department the authority now to turn it over under the resolution passed by the House?

Mr. ANDERSON. Not for these purposes. It has the power to turn it over for road-building purposes, but not for these purposes.

Mr. BLANTON. Mr. Chairman, in order to save time I will state that I intend to make the point of order if the gentleman from Iowa does not, unless the gentleman wants to discuss it, in which case I will reserve the point of order.

Mr. ANDERSON. If the point of order is made, I simply desire that it shall be made in the light of a full understanding of the facts.

Mr. BLANTON. I make the point of order.

The CHAIRMAN. The gentleman from Texas makes the point of order against the paragraph beginning with line 11 and ending with line 16 on page 68.

Mr. HAUGEN. This item was inserted in the bill a number of years ago, and I believe was carried at $5,000, with the understanding that the experiment should be completed. It was increased to $10,000, with the understanding that the work be completed, and then the department came back and said the work had practically been completed and there seemed no further need for the appropriation, and the item was stricken from the bill. Now, to our surprise, $15,000 is asked.

Mr. ANDERSON. There never has been any appropriation or authority for turning over the surplus picric acid in the hands of the War Department as a result of its purchases during the recent war for these purposes.

Mr. HAUGEN. I have reference to the pulling of stumps.

Mr. ANDERSON. Not this item. That was concluded years ago.

The CHAIRMAN. Does the gentleman from Texas make the point of order?

Mr. BLANTON. Yes; I make the point of order.

Mr. KING. Mr. Chairman, what has become of the point of order reserved by the gentleman from Iowa [Mr. HAUGEN]?

The CHAIRMAN. The gentleman from Iowa reserved the point of order. The gentleman from Texas makes it.

Mr. ANDERSON. I concede the point of order.

The CHAIRMAN. The gentleman from Minnesota concedes the point of order, and the Chair sustains it. The Clerk will read.

The Clerk read as follows:

For general administrative expenses connected with the above-mentioned lines of investigations and experiments, $16,000.

Mr. BEGG. Mr. Chairman, I move to strike out the last word. I want to inquire if lines 17 to 19 should not go out if the preceding paragraph should have gone out?

Mr. ANDERSON. No; they have no relation whatever to each other. The item that the gentleman refers to covers the general administrative expenses in the office of the chief of the bureau.

The CHAIRMAN. The pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

To supplement the $75,000 appropriation now available for the construction of a laboratory building on the Arlington farm, property of the Department of Agriculture, as permanent headquarters for the testing and research work of the Bureau of Public Roads, $35,000.

Mr. HAUGEN. I reserve a point of order on the paragraph.

Mr. ANDERSON. If the gentleman intends to make it, he might as well make it now and have it over with.

Mr. HAUGEN. The appropriation is in excess of the limit of cost and not authorized by law.

Mr. ANDERSON. It is not in excess of the limitation of cost, because there was no limitation of the cost in the first place. There was a simple appropriation carried in the 1917 act providing for the construction of this building.

The CHAIRMAN. Will the gentleman permit the Chair to ask him a question?

Mr. ANDERSON. Certainly.

The CHAIRMAN. Has the building been commenced?

Mr. ANDERSON. No; it has not. I should like to say in that connection that the bureau could have commenced the construction of this building and then have come in and asked for a deficiency appropriation, or it could have commenced the construction of the building and then come to Congress and said it did not have enough money to finish it, and we would have been practically compelled to make the appropriation. The chief of the bureau did not follow that course. He did not want to put us in that position. So, finding that the sum was inadequate to construct the kind of building that ought to be constructed for these purposes, he did not cause the construction of the building to be begun, and it is not under construction to-day. Ppresume that under these circumstances the item is subject to a point of order.

Mr. HAUGEN. The language itself says:

To supplement the $75,000 now available.

The amount made available is now $75,000, and this is in addition to the $75,000 made available, and, of course, is in excess of the limit of cost.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

For investigations of the chemical and physical character of road materials, for conducting laboratory and field experiments, and for studies and investigations in road design, independently or in cooperation with the State highway departments and other agencies, $148,200, payable out of the administrative fund provided by the Federal aid road act of July 11, 1916, as amended.

Mr. HAUGEN. I make a point of order against the words—

payable out of the administrative fund provided by the Federal aid road act of July 11, 1916, as amended—

in lines 6 and 7 on page 69.

The CHAIRMAN. On what ground does the gentleman make the point of order?

Mr. HAUGEN. That it is legislation, not authorized by law, and changes existing law.

Mr. ANDERSON. Mr. Chairman, the Federal road act carries a provision making 3 per cent, I think, of the amount appropriated under that act available for purposes of administration. That sum is already appropriated. The purpose of this amendment is to make possible the payment for the necessary experimentation carried on in connection with that road construction, payable out of the general sum for administration.

Now, inasmuch as this proviso makes the amount which has already been appropriated under that act usable for another purpose than is provided in the act, I presume that the language—

Payable out of the administrative fund provided by the Federal aid road act of July 11, 1916, as amended—

is legislation. Therefore the only question that remains for the Chair to determine is whether this legislation comes within the exceptions to the rule prohibiting legislation upon appropriation bills. That rule reads as follows:

Nor shall any provision in any such bill—

Of course, I assume that that contemplates provisions reported by a committee in an appropriation bill—

or amendments changing existing law be in order, except such as being germane to the subject matter of the bill shall retrench expenditures by the reduction of the number and salary of the officers of the United States, by the reduction of the compensation of any person paid out of the Treasury of the United States, or by the reduction of amounts of money covered by the bill.

This question has usually arisen in connection with amendments offered from the floor. So far as I have looked through the precedents, I have not discovered any case in which the question has arisen in exactly the same form as it has here. The bill of last year carried the sum of seventy-seven thousand and some odd dollars for this purpose. The provision itself carries $148,000. The effect of the proviso is, of course, to make this money payable out of funds already appropriated, and, therefore, the proviso does effect a reduction in expenditures.

If it had been offered as an amendment to the original paragraph it would be clearly in order, because it does effect a reduction in the amount of money carried in the bill. The only

question here is whether the committee can put in such a provision because it would retrench expenditures. If it was offered from the floor as an amendment it would clearly be in order. It seems to me that it ought to be in the power of the committee to put in any provision which would be in order as an amendment.

Mr. FESS. Will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. FESS. What effect will it have on the appropriation if the words go out?

Mr. ANDERSON. It would add $148,000 to the bill and to the aggregate expense of the Government.

Mr. FESS. That would indicate that it is a retrenchment.

Mr. ANDERSON. There is no question about that.

Mr. JONES of Texas. Mr. Chairman, I make the point of order against the paragraph because of the language referred to by the gentleman from Iowa.

The CHAIRMAN. The Chair feels that he is obliged to sustain the point of order.

Mr. ANDERSON. Mr. Chairman, I offer an amendment, and I ask unanimous consent to return to page 66 of the bill.

Mr. JONES of Texas. Reserving the right to object, I would like first to hear the amendment read.

The Clerk read as follows:

Page 66, between lines 20 and 21, insert a new paragraph, as follows:

"For investigations of the chemical and physical character of road materials, for conducting laboratory and field experiments, and for studies and investigations in road design, independently or in cooperation with the State highway departments and other agencies, $148,200."

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota to return to page 66 of the bill?

Mr. JONES of Texas. I object.

Mr. ANDERSON. Then I offer the amendment in place of the paragraph that has just gone out.

Mr. JONES of Texas. Mr. Chairman, I make the point of order that the amendment is not germane to the paragraph, not germane to the bill; that it is new legislation on an appropriation bill, and does not retrench expenditures.

Mr. ANDERSON. We have not passed the Bureau of Public Roads. We are still on items for that bureau. The amendment is clearly germane to the appropriation carried under the general head of the Bureau of Public Roads. I do not think there is any question about the germaneness of the amendment.

Mr. JONES of Texas. Will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. JONES of Texas. Then why did the gentleman want to go back to another page of the bill?

Mr. ANDERSON. Because that is the place where it ought to go in, but that is not the only place where it is germane.

Mr. JONES of Texas. Intervening between road construction and road building is the reference to farm irrigation, domestic farm projects, and activities of that character. Besides, this is not a bill for legislation. Simply because there are appropriations for a bureau of public roads does not authorize legislation touching matters of this kind. The paragraph immediately preceding this one, which has gone out, is to supplement the $75,000 appropriation for the construction of a laboratory building on the Arlington farm.

Mr. ANDERSON. The paragraph just read is for general expenses, and this is certainly germane to general expenses for public roads. We have not reached the total for the Bureau of Public Roads and have not completed the appropriation for that bureau.

Mr. JONES of Texas. The gentleman will not contend that because the term "general expenses" is used that he can put in a new project?

Mr. ANDERSON. This is not a new project; it has been in the bill for several years.

Mr. JONES of Texas. It is absolutely new, in so far as the legislative feature of it is concerned.

Mr. ANDERSON. The only part that is new is the language, "payable out of the administration fund provided by the Federal act," and that I have left out of my amendment.

The CHAIRMAN. Will the gentleman from Texas state his point of order?

Mr. JONES of Texas. That the paragraph is not germane to the preceding paragraph; that it is not germane to the subject under consideration; and that it is legislation not authorized by law.

Mr. ANDERSON. I do not want the Chair to be under any misapprehension. The current act carries this identical language of my amendment. It carries it in the place where I asked unanimous consent to offer it, but of course that is a mere matter of sequence and does not affect the germaneness. As to being germane under the Federal road act, the Secretary of Agriculture is required to pass upon the physical and chemical characteristics of the road and determine the question of whether the road complies with the requirements of the statute.

The CHAIRMAN. Will the gentleman give the Chair the citation of the road act.

Mr. JONES of Texas. Is the gentleman contending that it is in the current road act?

Mr. ANDERSON. I referred to the current appropriation bill, because I did not want the Chair to get the impression which was given by the gentleman from Texas—no doubt unintentionally—that the item had not been carried in the previous appropriation bills.

Mr. JONES of Texas. I was making the point that there was no existing law; the fact that it may have been carried in other appropriation bills would not make it existing law.

Mr. BLANTON. Mr. Chairman, will the Chair permit me to make a suggestion?

The CHAIRMAN. In a moment the Chair will be glad to hear the gentleman. The Chair asks the gentleman from Minnesota for a citation.

Mr. ANDERSON. Mr. Chairman, I shall send up to the Chair a copy of the Federal road act; but I desire, before doing so, to call his especial attention to section 6, and this is only one of the provisions that imposes duties upon the Secretary in connection with the Federal aid to roads. That section provides as follows:

SEC. 6. That any State desiring to avail itself of the benefits of this act shall, by its State highway department, submit to the Secretary of Agriculture project statements setting forth proposed construction of any rural post road or roads therein. If the Secretary of Agriculture approves a project, the State highway department shall furnish to him such surveys, plans, specifications, and estimates therefor as he may require: *Provided, however,* That the Secretary of Agriculture shall approve only such projects as may be substantial in character and the expenditure of funds hereby authorized shall be applied only to such improvements. Items included for engineering, inspection, and unforeseen contingencies shall not exceed 10 per cent of the total estimated cost of the work. If the Secretary of Agriculture approve the plans, specifications, and estimates, he shall notify the State highway department and immediately certify the fact to the Secretary of the Treasury. The Secretary of the Treasury shall thereupon set aside the share of the United States payable under this act on account of such project, which shall not exceed 50 per cent of the total estimated cost thereof. No payment of any money apportioned under this act shall be made on any project until such statement of the project, and the plans, specifications, and estimates therefor, shall have been submitted to and approved by the Secretary of Agriculture.

How is the department to determine whether a certain project comes up to the requirements of the statutes unless it can make such experiments and investigations as are necessary for this purpose? Considered in connection with the Federal road act, I contend that this is within the general authority of the Department of Agriculture. Certainly the Congress itself has determined that road making is a matter connected with agriculture. That was one of the reasons for creating the Bureau of Public Roads in the Department of Agriculture, and the Congress, by the Federal road act, has repeatedly indicated its conclusion that good roads were a matter connected with agriculture and has imposed upon the Secretary the duty of determining whether proposed roads are up to the requirements of the Federal act. The organic act of the department provides:

The Commissioner of Agriculture shall procure and preserve all information concerning agriculture which he can obtain by means of books and correspondence, and by practical and scientific experiments.

This amendment provides for practical and scientific experiments in the matter of road construction, which is a matter over which the Department of Agriculture has jurisdiction by virtue of the Federal road act, and I contend that this language is within the authority of the department.

Mr. BLANTON. Mr. Chairman, I am sure that the Chair does not wish to overturn all of the precedents of the House with regard to germaneness of the amendment to the immediate paragraph to which the amendment is offered. All of the precedents hold that the chairman of the committee can not offer an amendment from the floor any more than any other Member can, unless it is germane to the preceding paragraph to which it is offered. That is the only point that has any merit in it which was made by the gentleman from Texas [Mr. JONES]. It is the question of germaneness to the preceding paragraph. While the gentleman from Minnesota could have placed this language in the bill originally when preparing the bill, yet in the Committee of the Whole, while on the floor, he has no right whatever to offer it as an amendment, it not being germane to the preceding paragraph. I submit that the Chair should not overturn that long line of precedents.

Mr. JONES of Texas. Mr. Chairman, the first proposition which the gentleman from Minnesota [Mr. ANDERSON] suggests, that simply because the provision is made in the road act that activities or plans of the various States shall be submitted to the Department of Agriculture, therefore legislation is justified appropriating money to carry on scientific experiments by the United States department, is going a long distance to draw a

conclusion, it seems to me. It is a far cry from simple approval or disapproval of road projects submitted by a State to a scientific investigation of road material and chemical analysis of those things by the Federal department.

The portion of the organic act which the gentleman from Minnesota referred to is in the paragraph that refers to seeds and plants and various things in connection with the Department of Agriculture. I want to read that last paragraph:

The Commissioner of Agriculture shall procure and preserve all information concerning agriculture which he can obtain by means of books and correspondence and by practical and scientific experiments, the record of which experiments shall be kept in his office, by the collection of statistics, and by any other appropriate means within his power. He shall collect new and valuable seeds and plants, and shall test by cultivation the value of such seeds as may require such tests, and shall propagate such as may be worthy of propagation and shall distribute them among agriculturists

How a man can get any connection between flower and vegetable seeds and the chemical analysis of materials that go into the public roads, I do not understand.

The CHAIRMAN. The Chair feels that there is no authorization in law for this work. The Chair may have overlooked some provision of law, but not being able to find any and not having any pointed out to him the Chair feels constrained to sustain the point of order and does sustain the point of order.

The Clerk read as follows:

Total for Bureau of Public Roads, $493,960.

Mr. FESS. Mr. Chairman, I move to strike out the last word. Has authority been given to correct the totals?

Mr. ANDERSON. Yes; but the situation would not change the total here, because the $148,200 are not included in the total.

Mr. FESS. I had particular reference to two totals that had gone out heretofore.

Mr. ANDERSON. Authority has been given to change the totals.

The Clerk read as follows:

Salaries, Bureau of Markets and Crop Estimates: Chief of bureau, $5,000; chief clerk, $2,000; administrative assistants—1 $3,000; 1 $2,500, 1 $1,800; clerk in charge of supplies and accounts, $2,250; executive clerks—5 at $2,000 each, 3 at $1,980 each; clerks—20 of class 4, 37 of class 3, 70 of class 2, 220 of class 1, 65 at $1,100 each, 95 at $1,000 each; photographers—1, $1,400; 1, $1,200; superintendent of telegraph, $2,000; supervising telegrapher, $1,620; telegraph operators—5 at $1,600 each; 47 at $1,400 each; telephone operators—2 at $960 each, 1 $840; draftsmen—1 $1,400; 1 $1,380, 3 at $1,200 each, 1 $1,000, 1 $900; 1 custodian of supplies, $1,200; machine operators—3 at $1,400 each, 4 at $1,200 each, 2 at $1,100 each, 11 at $1,000 each, 3 at $900 each; 3 chauffeurs at $900 each; skilled laborer, $1,200; laborers—5 at $900 each, 3 at $840 each, 10 at $720 each, 4 at $660 each, 5 at $600 each, 2 at $540 each; messengers—4 at $900 each, 2 at $720 each; messenger boys—3 at $660 each, 12 at $600 each, 15 at $540 each, 20 at $480 each; charwomen—2 at $540 each, 6 at $480 each, 2 at $360 each, 6 at $300 each, 9 at $240 each, in all, $838,630.

Mr. BLANTON. Mr. Chairman, I move to strike out the paragraph. In this paragraph there is provision for a photographer at $1,400 and one at $1,200, and at present both of these photographers are drawing the $240 bonus additional.

And also in this bill, on page 65, we provide, "One photographer at $1,440, 1 at $1,200, and 1 at $1,000," all now drawing the $240 bonus each additional.

On page 56 we provide, "One motion picture chief, at $3,000; 1 chief of illustrations, $2,100; 1 artist, at $2,500; 3 photographers, at $1,600 each, 2 at $1,500 each, 1 at $1,300, 10 at $1,200 each; 1 assistant photographer, at $960; and 1 lantern-slide colorist, at $1,200," all of the above now drawing the $240 bonus each additional.

And on page 57 we provide, "For photographic equipment and for photographic materials and artists' tools and supplies, $22,000."

And on page 52 we provide for 1 photographer, $1,300, who is now drawing a $240 bonus also.

On page 27 we provide for "1 artist, $1,200, 1 at $1,600, 1 at $1,400, 1 at $1,200, and 1 at $1,000, and 1 photographer at $1,200"; all of these employees are now drawing the $240 bonus additional.

And on page 16 we provide for "1 artist at $1,620, 1 at $1,400, and 2 at $1,200 each," all now drawing the $240 bonus each additional.

And all of the above photographers are for the Agricultural Department alone.

Yesterday, when the question about photographers for the Agricultural Department in one of these paragraphs came up, the gentleman from South Carolina [Mr. STEVENSON] rose and the following colloquy occurred:

Mr. STEVENSON. I want to ask what particular function a photographer has in the Bureau of Public Roads?
Mr. CARTER. To take photographs of the roads.
Mr. STEVENSON. Here in line 9, on page 65, is a provision: "Clerks or photographers—1 $1,440, 1 $1,200, 1 $1,000."
Mr. ANDERSON. I take it these gentlemen are blue printers.
Mr. STEVENSON. They have draftsmen and engineers, and all that kind of thing. They make blue prints.
Mr. ANDERSON. So do the photographers.
Mr. STEVENSON. Has there been any information given as to what these photographers are doing?

Then the majority leader had to come to the rescue, as follows:

Mr. MONDELL. I imagine these gentlemen occasionally take a picture of a bad road that needs repairing, down in South Carolina and maybe in Wyoming.

You notice it was conjecture only by either one of the gentlemen. No one of them knew what they were doing, but I want to show you what one of them at least is reported to have been doing. I want to read you a communication received by me.

Mr. ANDERSON. Is the gentleman going to read the signature to that letter?

Mr. BLANTON. Yes; I am going to read all of the letter and the writer's address here in Washington. It says:

WASHINGTON, D. C.,
January 25, 1921.

Hon. THOMAS L. BLANTON, M. C.,
Washington, D. C.

DEAR SIR: I happened to be in the gallery this afternoon when you made your fight against the unnecessary messengers, amounting to 574, to be retained in the Agricultural Department for the next fiscal year.

I desire to call your attention to another matter. I am personally acquainted with Mr. Ernest L. Crandall, who is chief of the photographic section in the Agricultural Department.

While I was working in the Navy Department I had occasion to borrow from Mr. Crandall a lens to be used by the Navy Department, and I then saw in Mr. Crandall's office in the Agricultural Department many prints of objects and scenes around Washington in course of washing in the tanks, which pictures afterwards were sold by Mr. Crandall through the art shops and hotels and private persons in Washington. Mr. Crandall offered me 40 per cent commission to handle his pictures over at the Navy Department. He allows art shops 40 per cent commission, and he has been carrying on this work for the past two or three years. Mr. Crandall makes at least $4,000 a year from the sale of pictures taken by him as chief of the photographic section of the Agricultural Department. Much of the expense connected with taking such pictures is borne by the Government. Mr. Crandall has his pictures for sale in many of the art shops of Washington.

I am a photographer myself, and Mr. Crandall is one of my strongest competitors. From my work I am now earning sufficient money to pay my way through George Washington University. My address is New Plaza Hotel, Washington, D. C.

Very truly, yours,

GEO. STEPHENSON.

Mr. HAUGEN. Will the gentleman permit a question?

Mr. BLANTON. I yield.

Mr. HAUGEN. Does the gentleman contend that the gentleman should not be permitted to take photographs outside of the department in his own time?

Mr. BLANTON. No. The gentleman from Iowa did not catch the force of the statement. This young man Stephenson says that when he was working in the Navy Department he was sent over to the Department of Agriculture to borrow a Government lens, and there in Mr. Crandall's office in the Agricultural Department he saw numerous prints in the tank in the course of washing that had been taken by the Agricultural Department and afterwards these prints were found in the stores of Washington, being sold by Mr. Crandall for his personal benefit.

Mr. HAUGEN. Were these photographs taken in the Government's time?

Mr. BLANTON. Mr. Stephenson says so. I do not know. I am giving you his statement. He tells you where he is from; he says he is paying his way through the George Washington University now by taking pictures; he tells you a man on the pay roll of the Agricultural Department, who is the chief photographer, is his strongest competitor in the private photograph business in Washington.

Mr. HAUGEN. I suppose the gentleman has not presented any proof here that Mr. Crandall does this in the Government's time. Mr. Crandall has appeared before the committee, and the general opinion is that he is a first-class man.

Mr. BLANTON. If he is a friend of the gentleman, I will withhold condemnation of him until the gentleman can look into it. I am calling attention to this fact, namely, that the gentleman from Minnesota [Mr. ANDERSON], who has charge of this bill, could not tell the gentleman from South Carolina [Mr. STEVENSON] what these men were doing. Mr. CARTER gave us a conjecture. The gentleman from Wyoming [Mr. MONDELL], the majority leader, had to come in here hurriedly to help them out, and he made another conjecture.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BLANTON. In view of the fact that my time has been taken up largely by others, I ask unanimous consent for three minutes more.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to proceed for three minutes more. Is there objection? [After a pause.] The Chair hears none.

Mr. BLANTON. I was about to say, that to come to the relief of the committee the majority leader left his sanctum sanctorum long enough to come in here and hazard his guess as

to what the photographers did. He offered the conjecture that they were taking pictures of roads down in South Carolina. He thought that that would appease the gentleman from South Carolina, as a similar statement of a committee chairman apparently appeased the gentleman from Arkansas [Mr. WINGO], who yesterday stated that when he was once trying to force economy in this department as to excessive messenger service, at that time such an explanation was made, and he said, "I was young and green then," speaking of himself, and I heard no one deny it. But that does not stop me when I am after a retrenchment of Government funds that are being wastefully expended out of the Public Treasury. It may be all right for the Department of Agriculture to have several photographers, but on page 57 of the bill I showed you where they spend $22,000 for photographic supplies. And Mr. Stephenson, this young man—I am not acquainted with him personally; I do not know whether he has told us the truth or not, but he seems to know what he is talking about—says this Government photographer, the chief of photography in the Agricultural Department, is making on the outside $4,000 a year on the pictures that he takes with Government machines and with Government supplies, and develops in a Government department. And as soon as he gives that evidence the chairman of the old Agricultural Committee immediately comes to the rescue in defense of one of his old pet friends. [Applause.]

Mr. ANDERSON. Mr. Chairman, I do not know anything about the case that the gentleman from Texas [Mr. BLANTON] refers to, but if the situation is as he says I suggest that this is a Democratic administration, and that he take it up with the Democratic officials.

There are about 19,000 employees in the Department of Agriculture. Naturally the chairman of the committee does not know what each one of these employees is doing. We are spending of Federal funds about $8,000,000 in extension work. In addition, the States are spending about $8,000,000. It is necessary that a great deal of work shall be done in Washington and in the field to supply these extension agents and county agents, and employees of the department engaged in demonstrational work, with the facts and materials necessary for that work. It is frequently advantageous, helpful, and valuable to make those demonstrations through the use of photographs and moving pictures. In that way very graphic illustrations can be given of how certain things ought to be done, how they are done wrong and how they are done right, and it is necessary that the department should have a force of photographers in order that the photographs necessary for demonstrational work may be taken and distributed over the country. I do not think there is any abuse in that direction.

Mr. RHODES. Will the gentleman permit a question?

Mr. ANDERSON. Yes.

Mr. RHODES. Is the chief photographer, the person to whom the gentleman from Texas refers, in the civil service?

Mr. ANDERSON. I think so.

Now, just a word in regard to messengers and laborers. There are at present 475 persons on the statutory roll who are actually doing work in the department as laborers.

Of that number 265 are in Washington employed in the grounds, in the experimental work at Arlington, and in various other labor jobs. Two hundred and ten of them are employed in the field at the various experimental stations of the Bureau of Animal Industry and the Bureau of Plant Industry and the other bureaus of the department. There are 61 men on the roll as messengers. These messengers perform miscellaneous messenger duties, such as general office work, mimeograph work, and other duplicating work of that character. In addition there are 377 messenger boys on the statutory roll. Two hundred and fifty-four of those messenger boys are employed in Washington and 123 in the field. The boys here in Washington do messenger service—all sorts of little jobs around the department, such as opening mail and running mimeograph machines and work of that kind. The employees in the field are largely connected with the stations of the Weather Bureau, of which there are something over a hundred, I think. They do messenger service in distributing the reports of the local forecasters. Altogether I think the force of laborers and messengers and messenger boys in the department is not excessive, and I do not think the criticism which the gentleman from Texas [Mr. BLANTON] has leveled against it has any basis either of fact or of fair observation.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Texas to strike out the paragraph.

Mr. BLANTON. Mr. Chairman, the amendment was offered as a pro forma amendment.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to withdraw his amendment. Is there objection?

There was no objection.

Mr. STEVENSON. Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent to revise and extend his remarks. Is there objection?

There was no objection.

MESSAGE FROM THE SENATE.

The committee informally rose; and the Speaker pro tempore having taken the chair, a message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed without amendment bills of the following titles:

H. R. 974. An act for the relief of W. T. Dingler;

H. R. 4184. An act for the relief of C. V. Hinkle; and

H R. 11769. An act to amend an act entitled "An act to provide a civil government for Porto Rico, and for other purposes," approved March 2, 1917.

The message also announced that the Senate had passed with amendment bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 12502. An act providing for a report on the cost of improving and maintaining the Government boulevard on Missionary Ridge, in the Chickamauga and Chattanooga National Military Park.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 4501. An act for the relief of certain estates;

S. 676. An act for the relief of Reuben R. Hunter;

S. 4432. An act to provide for awarding decorations, devices, or insignia to the next of kin of deceased persons who would have been entitled to receive the same, and making it unlawful for anyone other than the person authorized to do so to wear such decoration, device, or insignia;

S. 551. An act for the relief of the Copper River & Northwestern Railway Co.; and

S. 4893. An act to authorize the coinage of a 50-cent piece in commemoration of the one hundredth anniversary of the admission of Missouri into the Union.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees as indicated below:

S. 4893. An act to authorize the coinage of a 50-cent piece in commemoration of the one hundredth anniversary of the admission of Missouri into the Union; to the Committee on Coinage, Weights, and Measures.

S. 4501. An act for the relief of certain estates; to the Committee on Claims.

S. 676. An act for the relief of Reuben R. Hunter; to the Committee on Claims.

S. 551. An act for the relief of the Copper River & Northwestern Railway Co.; to the Committee on Claims.

AGRICULTURAL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

General expenses, Bureau of Markets and Crop Estimates: For salaries and the employment of labor in the city of Washington and elsewhere, furniture, supplies, traveling expenses, rent outside of the District of Columbia, and all other expenses necessary in conducting investigations, experiments, and demonstrations, as follows.

Mr. REAVIS. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Nebraska moves to strike out the last word.

Mr. REAVIS. Mr. Chairman, I have been asked to make an announcement to the House by the Committee on the Judiciary, and to that end I ask unanimous consent to proceed out of order for five minutes.

The CHAIRMAN. The gentleman from Nebraska asks unanimous consent to proceed out of order for five minutes. Is there objection?

There was no objection.

Mr. REAVIS. Mr. Chairman and gentlemen of the committee, the Committee on the Judiciary have been considering for some time a bill introduced by the gentleman from Missouri [Mr. DYER] looking to legislation that would grant authority for the creation of Federal corporations to do business in the Empire of China. The committee has had several very interesting men before it, among whom is Mr. C. L. Seitz, who for many years was president of the Chamber of Commerce at

Shanghai, and is now a very influential and prominent member of that organization. He has spent all of his life, all of his mature life, at least, in the development of American trade in the Empire, and he is one of the best informed men on that subject with whom I have ever been brought in contact. His statement before the committee was so luminous and at times so graphic, and the legislation under consideration presents problems which are so new to the Members of the House, that the committee thought it only fair to give the membership of the House the opportunity of listening to Mr. Seltz.

We have therefore arranged with him to talk informally in the main caucus room of the House Office Building to-night. We are very anxious, indeed, that enough Members shall be there to justify a man of his character giving his time to an address of this kind. The invitation is not limited to Members of the House. You are urgently requested to bring your wives or any friends that may be interested in the subject, and I can assure the membership not only of a very interesting address, but I am confident we shall all be very much better able to pass upon this important piece of legislation if you have the opportunity of listening to this truly remarkable man. The committee very cordially invites the membership to be in the main caucus room to-night at 8 o'clock. [Applause.]

The CHAIRMAN. The time of the gentleman from Nebraska has expired.

Mr. FESS. Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. The gentleman from Ohio moves to strike out the last two words.

Mr. FESS. Mr. Chairman, for the last 18 months and probably for the last 3 years there has been considerable interest on both sides of the Chamber in the possibility of eliminating the duplication which takes place as a result of the rather decentralized or disintegrated method of breaking up the activities of various departments. I think one of the growing necessities—and it has been stressed here recently—is for the Government in some way or another to prevent this lost motion, this increased overhead, this tendency to break up departments and expand various activities; in fact, there has been no suggestion other than simply recommendations to unify, while the tendency is rather to break up and expand. I notice here that the committee has reported a combination of two activities under one division or bureau, the Bureau of Markets and Crop Estimates. Heretofore there were two activities. I find that there is but one now.

This is exactly in line with the best thought of the Congress to-day, and not having the information, I would like to know about how much we shall save in the way of economy, and what we are to expect in the way of increased efficiency by the union of these two bureaus?

Mr. MANN of Illinois. Of course, the appropriations are increased. That is always the case.

Mr. FESS. You do not mean that this single bureau now costs more than when the two bureaus were run separately?

Mr. ANDERSON. Well, the saving on the statutory roll from the combination of the two bureaus amounts to about $15,000, but that resulted largely from the elimination of quite a number of employees. But there has been a necessity, as we thought, for a better class of clerks in the Bureau of Crop Estimates, and we provided a number of places, which had the effect of reducing the saving which otherwise would have been made.

Mr. FESS. I shall not claim the time of the committee or of the chairman for specific figures. I simply wanted to call attention to this step, which is a good one at this particular time, when we are trying to get away from too much duplication. I want to compliment the committee for showing that this is not only a possibility, but that it is something which has actually been undertaken.

Mr. GARD. Mr. Chairman, will the gentleman yield?

Mr. FESS. I yield to my colleague.

Mr. GARD. I was wondering how much the appropriation had been increased as the result of putting these two bureaus together? How much have the separate appropriations for markets and for crop estimates been increased?

Mr. FESS. The chairman of the committee states that there has been a decrease in the sum.

Mr. BYRNES of South Carolina. That is true. What appears to be an increase in the total comes from extending the activities of the Bureau of Markets. I know the gentleman from Ohio will agree with me that not only is the committee entitled to some praise for merging the two, but the Chief of the Bureau of Crop Estimates is entitled to considerable praise for willingly sacrificing the prestige of the chief of a bureau and having his bureau merged into the Bureau of Markets.

Mr. FESS. I think that chief ought to have his photograph taken, because that is a very rare and commendable thing for a man to do.

Mr. HAUGEN. I move to strike out the last two words for the purpose of asking the gentleman from Minnesota a question. The appropriation bill for the current year provided for cooperation between the Bureau of Crop Estimates and States Relations Service in such a way that the 2,300 county agents under the States Relations Service might be utilized in making these reports. That provision seems to be omitted from this bill.

Mr. ANDERSON. The combined Bureau of Markets and Crop Estimates estimated for doing that work under a separate item carrying an appropriation of, I think, $25,000, and the committee thought that if doing the work in that way would cost more money there was no use in carrying that provision.

Mr. HAUGEN. Does the gentleman favor the utilizing the service of the county agents?

Mr. ANDERSON. Yes. The language was not carried in the new estimate for the Bureau of Crop Estimates as combined with the Bureau of Markets. I will say, however, that I have no objection whatever to its being incorporated in that item.

Mr. HAUGEN. With that understanding, I shall make no point of order; but I think it should be distinctly understood that the services of these county agents are to be utilized by the department in this work. It goes without saying that when you utilize the services of 2,300 experts, without additional expense to the Government, there must necessarily be a saving in the expenditures of the department. If the gentleman will offer that amendment, I shall not make a point of order.

Mr. ANDERSON. The committee did not desire to put it in as a separate item, but it was inadvertently omitted from the general expense item of the Bureau of Crop Estimates combined with the Bureau of Markets, and I shall be very glad to offer an amendment restoring it.

The CHAIRMAN. The pro forma amendment is withdrawn. The Clerk will read.

The Clerk read as follows:

For acquiring and diffusing among the people of the United States useful information on subjects connected with the marketing and distributing of farm and nonmanufactured food products and the purchasing of farm supplies, independently and in cooperation with other branches of the department, State agencies, purchasing and consuming organizations, and persons engaged in the transportation, marketing, and distributing of farm and food products, $326,000: *Provided*, That not less than $20,000 shall be used for a study of the methods of prevention of losses by deterioration, decay, and freezing of fruits and vegetables in storage and in transit in refrigerator cars, heater cars, and ocean vessels, including demonstrations of such methods: *Provided further*, That not exceeding $60,000 shall be used for foreign marketing investigations.

Mr. HAUGEN. I desire to reserve a point of order against lines 3 and 4, on page 71.

Mr. DAVIS of Tennessee. In my opinion these provisions of the bill are very important. We hear much of the drift from the country to the city, and it is a very serious problem. The only feasible method of combatting such a movement is by making farming more profitable and farm life more tolerable. One of the chief difficulties confronting the agricultural industry is the question of intelligent and efficient marketing and distribution. It is highly important, not only to the producer but to the consumer, for farm products to find their way into the hands of the consumer as expeditiously and as directly as possible. In other words, it is important to shorten the gap between the producer and the consumer. In most instances the difference between the price paid to the farmer and the price paid by the ultimate consumer is out of all reason. Furthermore, because of a lack of knowledge of a market or an absence of marketing facilities, large quantities of farm products frequently perish, when the consumers in other sections would gladly pay good prices for such products. Cooperative marketing is essential in the case of perishable farm products, where the production is greater than the local consumption.

Doubtless as a result, in large measure, of the information furnished and encouragement given by the Agricultural Department under the provisions now being considered, during the past few years cooperative creamery associations have been established in several of the counties within the district which I have the honor to represent; such associations have been established in Rutherford, Bedford, and Marshall Counties, and have proven to be very successful and prosperous. I take much pride in being able to state that one of these, the Rutherford County Creamery Association, is the largest cooperative creamery association in the South. Having been established some six or seven years ago, its growth has been very rapid.

For instance, in 1914 there were 65 patrons of this association; in 1920 there were 675. During the past two years the number of pounds of butter manufactured and marketed has in-

creased 140 per cent. During the last year this cooperative association manufactured 718,361 pounds of butter, which sold for $407,634, thus bringing more revenue into that county than that received for the cotton crop. This result has been obtained within a comparatively short time and in a county having slightly more than 33,000 inhabitants. It shows the result of cooperative marketing on the part of different farmers, very few of whom are engaged solely in the dairying industry.

Mr. EMERSON. Will the gentleman yield?

Mr. DAVIS of Tennessee. Yes.

Mr. EMERSON. How do they market their products?

Mr. DAVIS of Tennessee. All of the different farmers bring the butter fat into the cooperative creamery and that is converted into butter and sold as a whole through this association. They have built up a trade that they are supplying in different sections.

Mr. EMERSON. Is their market in that vicinity, or do they send the butter some distance away?

Mr. DAVIS of Tennessee. Both. Their product is sold in various cities and towns in the South, and part of it shipped to eastern markets.

It is needless to state that the association is producing a superior quality. It is estimated that the product of this association during the coming year will approximate 1,000,000 pounds. Mr. Tillman Haynes is the very efficient manager of this association, which has its creamery at Murfreesboro, Tenn.

This also shows the result of diversification, which the Agricultural Department so strongly advocates. In my opinion, the farmers in my district are weathering the present depression and price decline in farm products as well as those in any other section of the country, which fact is undoubtedly in large part due to their diversified products, both with respect to crops and live stock.

With regard to criticisms made by different Members relative to certain items of appropriation carried in this bill, I wish to state that in my opinion such appropriations are not only not extravagant, but in many instances are absolutely niggardly.

The sum total of appropriations for the Department of Agriculture carried in this bill is about $33,500,000. Of this amount, I believe only about $20,000,000 relate to agriculture, which is a mere bagatelle of the billions of dollars appropriated annually for various purposes. Although our rural population composes nearly half of our total population, and the agricultural industry is not only the greatest, most important, and most vitally essential of all industries, but greater, more important, and more essential than all other industries combined, yet the governmental expenditures in aid of agriculture are insignificant as compared to the total. This is a short-sighted policy, not only from the standpoint of the farmer but also from the standpoint of the consumer, and, consequently, our entire population.

The CHAIRMAN. The time of the gentleman from Tennessee has expired. Does the gentleman from Iowa make the point of order?

Mr. HAUGEN. I make the point of order against lines 3 and 4, on page 71.

The CHAIRMAN. Does the gentleman from Minnesota [Mr. ANDERSON] desire to be heard on the point of order?

Mr. ANDERSON. Mr. Chairman, I do not care to be heard on the point of order.

The CHAIRMAN. The Chair feels that under the guise of a limitation this is really an authorization to do a certain thing, and therefore the Chair sustains the point of order.

Mr. HAUGEN. I might add that the Bureau of Markets is limited in its authority and can not go outside of the United States.

MESSAGE FROM THE SENATE.

The committee informally rose; and the Speaker having resumed the chair, a message from the Senate, by Mr. Craven, Chief Clerk of the Senate, announced that the Senate had passed the joint resolution (S. J. Res. 248) relieving and discharging from the fine imposed by law and authorizing the payment of messengers appointed by the electors of certain States to deliver the electoral vote of such States for President and Vice President, in which the concurrence of the House of Representatives was requested.

AGRICULTURAL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

For collecting, publishing, and distributing, by telegraph, mail, or otherwise, timely information on the market supply and demand, commercial movement, location, disposition, quality, condition, and market prices of live stock, meats, fish, and animal products, dairy and poultry products, fruits and vegetables, peanuts and their products, grain, hay, feeds, and seeds and other agricultural products, independently and in cooperation with other branches of the Government, State agencies, purchasing and consuming organizations, and persons engaged in the production, transportation, marketing, and distribution of farm and food products, $390,160.

Mr. HAUGEN. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD on the point of order just made.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

Mr. ANDERSON. I have no objection to the gentleman extending his remarks on the item, but I do not think he ought to be permitted to extend remarks on a point of order.

Mr. HAUGEN. Mr. Chairman, I will withdraw the request and make the statement now. I move to strike out the last word. I made the point of order because a number of bills are pending in Congress providing for reorganization. I understand the policy of Congress is to reorganize the departments in order to avoid duplication. The work is of importance, but it should be provided for by legislation and proper authorization by law upon which appropriations made for it could be supported.

Mr. LANHAM. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 71, line 16, strike out the figures $390,160, and insert in lieu thereof $430,160.

Mr. LANHAM. Mr. Chairman, the purpose of this amendment is to provide for the southwestern part of this country the same service with reference to market information which is now furnished to some other sections. This, of course, is an appropriation bill, but in its ramifications it opens up some broad avenues for legislative contemplation. I know of none in this regard more interesting or more important than that of a proper and adequate marketing system for agricultural products. The things raised on the farm must be sold necessarily either in this country or abroad. In order to afford more ample facilities for foreign markets we have authorized the organization of corporations under the Edge Act and have endeavored to afford similar relief through the revival and continuation of the War Finance Corporation. The export feature of our trade relations in regard to agricultural commodities is certainly an important one and has merited the earnest consideration of the Congress. I fear that we have not devoted to the problem of domestic sale and distribution the serious attention which it has deserved and demanded. It seems to be generally understood and conceded in the debate upon this bill that we need in this country a marketing system more in keeping with the complexities of the times. And it is probable that many people are frequently prone to impute to foreign trade relationships some of the inequalities which are directly attributable to the lack of a thorough and comprehensive domestic system. There is a temptation perhaps to believe that many of our agricultural troubles arise from foreign trade arrows aimed at our economic breast which are due, in fact, to the absence of an adequate organization at home. It seems clear to me that one of the chief causes of our agricultural difficulties is evidenced by the failure of the producer to receive a proper percentage of the prices which his commodities ultimately bring.

In this connection I wish to call your attention very briefly to one or two instances which have come somewhat under my own observation. The gentleman from Florida [Mr. DRANE] advised me that he recently shipped 103 boxes of Florida oranges, 176 oranges to the box, and that he received for them $122, or a fraction more than $1.08 per box, which is just about the cost of production. And yet a few days ago, when he wished to satisfy his fondness and craving for a little of his native fruit, he paid in a hotel in Washington 15 cents for a Florida orange. At this rate the cost per box to the consumer was $26.40. Eliminating the cost of service, and estimating it liberally at two-thirds of the hotel charge, a box of oranges at 5 cents each would cost the consumer $8.80, or more than eight times what the producer receives.

He had a similar experience with a shipment of grapefruit, and it may be said in passing, upon his most authentic information, that about 50 per cent of this crop in his section is now rotting on the ground. He advises me that at present grapefruit will not average a dollar to the grower for a box of 64. A box served in a Washington hotel by portions is paid for by the consumer at the rate of $125.60, and an elimination of the service charges will still leave the consumer's cost a very large multiple of the amount received by the grower.

During this Congress, summer before last, my colleague from Texas, Mr. HUDSPETH, and myself went 17 miles from this Capitol Building, at a time when peaches were selling on the Washington market to the consumer at 5 and 10 cents each, and bought a bushel of similar peaches and two baskets of grapes for a total sum of $1.65. Our purchase would have been priced on the Washington market, I assume, somewhere between $15 and $25.

I think these statements should be made, gentlemen, in justice to the fruit trees and grape vines of our country, that it may be generally known that they have not been unduly profiteering or charging exorbitant prices for growing fruit and grapes.

With many of our producers a marketing situation exists somewhat analogous to that of the sheep raiser who sent a herd to market, was advised that the shipment had failed to bring the freight, and was asked to remit the difference in money. The poor old fellow wired back: "There is no money; will send more sheep."

The Bureau of Markets in the Department of Agriculture is evidently designed to assist in affording relief in matters of this character. It was started as an experiment about eight years ago with an appropriation of only $50,000. It has grown rapidly and has functioned efficiently, it seems, but it is still not sufficiently comprehensive in its general organization nor sufficiently coordinated with other agencies which could aid in this work to accomplish all the results which could be desired. In this regard further legislation seems necessary. There is something wrong or inadequate with our system as long as fruits and vegetables rot in the fields where they are grown and men, women, and children suffer for the lack of them in our congested cities by reason of prohibitive prices. It was my pleasure recently to attend a hearing accorded by the Committee on Agriculture of the House to one of my colleagues and to hear the discussion of a bill which he has offered in an effort to complete and perfect our system. It may not be perfect in all its details, but I trust it may serve to stimulate a helpful consideration of our legislative needs in this respect. We may certainly devote more time to a serious study of this problem and its proper solution without stepping beyond the pale of our plain duty.

Now, gentlemen, in the absence of a marketing system adequate and satisfactory in all of its features, it seems that we should certainly make proper appropriation for the Bureau of Markets and that we should correct these agricultural evils as well as we may be able at present by the dissemination of information to the producers with reference to the opportunities for the sale and distribution of their commodities. Until a year or two ago the southwestern section of our country enjoyed this service, but ostensibly in the interest of economy it was eliminated by the Congress. It seems to me, gentlemen, that when governmental appropriations are running well into the billions annually we ought to begin our economy somewhere else and not seek to manifest it specially by a cheese-paring policy in the $20,000,000 a year that we devote to the great fundamental and basic business of agriculture.

Farmers have increased their crops at the behest of their Government and in a patriotic effort to do their duty. To-day they have large surpluses which they can not sell. Under these circumstances can we not better afford to cut down the estimates, for instance, on an Army top-heavy with officers rather than in the fields of production upon which we all depend?

The purpose of this amendment, I repeat, is to restore in the southwestern part of our land the same service with reference to market news and information concerning live stock, meats, dairy and poultry products, fruits and vegetables, peanuts and their products, grain, hay, feeds, and other agricultural commodities, which that section formerly enjoyed and which is to-day given to producers in other parts of the country. I have taken this matter up with those in charge of the work in the Bureau of Markets, and I find that the sum I have put in this amendment is sufficient to provide for that section of the country represented by Texas, Oklahoma, New Mexico, Louisiana, and a part of Arkansas.

In the hearings as printed are the following statements by the representatives of the Bureau of Markets having this service in charge:

> Never before in the history of the department has there been such a demand for accurate, timely, and comprehensive information on the markets for agricultural commodities. The need for authentic market information at the present time has arisen because of the peculiar conditions which exist at present, due to a decline in the prices of most agricultural products, and to other incidental factors in the marketing of farm products. * * * It is generally recognized to-day that this kind of service will enable the farmer, the small dealer, and the large dealer as well to market their products more intelligently than they could without having this information.

The demand for such service is great. Its benefits should not be restricted to any favored sections. If such advantages are to be given anywhere in our land, why should they be denied that large crop-growing and cattle-raising part which the adoption of this amendment would relieve, and why should the producers of that section be forced to make their own estimates of market conditions while the Government is furnishing accurate information for the asking to producers who reside in the more fortunate localities?

Mr. DAVIS of Tennessee, by unanimous consent, was given leave to extend his remarks in the RECORD.

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent that all debate on the paragraph and all amendments thereto close in 10 minutes.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that all debate on the paragraph and amendments thereto close in 10 minutes. Is there objection?

Mr. JONES of Texas. Reserving the right to object, I have an amendment that I desire to offer.

Mr. ANDERSON. I will make it 15 minutes.

Mr. LANHAM. Reserving the right to object, I would like to have a minute of that time on an amendment that I wish to offer in case this one is defeated.

Mr. ANDERSON. I think I have been very liberal in allowing gentlemen to discuss amendments, but we must get through with this bill to-day. I am asking only five minutes for myself, but I am willing that the gentleman from Texas should have one minute.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that all debate upon this paragraph and all amendments thereto close in 15 minutes. Is there objection?

There was no objection.

Mr. OSBORNE. Mr. Chairman, I offer the following amendment which I send to the desk.

The Clerk read as follows:

> Amendment offered by Mr. OSBORNE to the amendment offered by Mr. LANHAM: Strike out "$430,150" and insert "$475,140."

Mr. OSBORNE. Mr. Chairman, the purpose of my amendment is to provide leased wire service west of Kansas City and to reestablish the offices of the Market Bureau at the Pacific coast cities of Los Angeles and San Francisco, Calif., and Spokane, Wash. The gentleman from Texas [Mr. LANHAM] has very well stated the conditions as they prevail in his section. The eastern and more congested parts of the country are supplied with this service, but it ends at Kansas City. There is a wide expanse of country west of Kansas City. It is true, of course, that that is actually outside of the sacred ground which has been described here from time to time—east of the Mississippi and north of the Ohio—but still there is a large territory west of Kansas City. In my own State of California alone the production of vegetables which would be affected by this amendment amounted two years ago to 23,581,000 tons of a value of $278,000,000. A large percentage of the vegetables consumed in the Eastern States comes from that western territory. I presume that four-fifths of it comes from the territory west of Kansas City. I have suggested a sum larger than that mentioned by the gentleman from Texas, because we desire to cover an additional territory. This service, I may say, has been enjoyed by the Pacific Coast States up to a year or two ago, when it was withdrawn. It has been a matter of concern to the great interests involved in that country, and it has an effect upon the conditions here in the East as to the supplies of fruit, vegetables, and the other food products that come from the prolific orchards, fields, and gardens of the Pacific and transmountain States. I sincerely hope that the committee will see fit to restore this service to a portion of the country which does so much to produce the food supply of the Nation.

Mr. JONES of Texas. Mr. Chairman, I offer the following as a substitute for the amendment offered by the gentleman from California [Mr. OSBORNE].

The Clerk read as follows:

> Amendment offered by Mr. JONES of Texas as a substitute for the amendment offered by Mr. OSBORNE to the amendment offered by Mr. LANHAM: Strike out "$475,140" and insert "$590,000."

Mr. JONES of Texas. Mr. Chairman, I am unable to understand the logic by which a committee proceeds to appropriate $325,000 for a farm-management and economics bureau and cuts down an estimate by the department for the marketing system from $750,000 to $390,000. If I have the estimates correct, the department requested $750,000 for this system. I believe that the committee could well afford to cut every other item in this bill half in two in order to give the marketing bureau what it asks and what it needs, because it really gets at the heart of the greatest problem in this country. It does not make so much difference about these theorists who go around and advise the farmer about how to improve community life, and all that sort of thing, but it does amount to something when we have an organization that has for its purpose bringing closer together the producer and the consumer. That is a real problem, and that is something that is crying for solution. In line with what my colleague from Texas [Mr. LANHAM] said, about two years ago I received a letter from a constituent to the effect that his community had produced more potatoes than they had ever known in that section, and that there was no

market for them and had not been for months. I went down on the streets of Washington and found that they were asking 32 cents for a quarter of a peck of potatoes, or at the rate of about $5 a bushel. There is something wrong with such a system of distribution. That system should be changed. All of these other things are an incident. There is no use in these appropriations that are made for giving advice to farmers about how to live. As a matter of fact, if you make their business profitable they will live all right, and they will have all of the necessities and the luxuries they are able to afford. The proposition that this country must solve is to eliminate some of the useless expense that is incurred between the producer and the consumer. This is an organization that has been needed for a long time. It has for its purpose the collecting, publishing, and distributing by telegraph, mail, and otherwise of information on the market supply and demand, the market prices, letting one section of the country know what another section needs, and aiding in the standardization of products, so that the producer will know that he can depend on the article that he is purchasing over in another section of the country. If this body were organized sufficiently to properly carry on the work and said they could use the money, I would like to transfer one-half of every other appropriation in the bill to the marketing system, because they can do something worth while, and they are trying to actually solve the problem.

Mr. SEARS. Mr. Chairman, will the gentleman yield?

Mr. JONES of Texas. Yes.

Mr. SEARS. Does the gentleman think it is fair to have this system carried on in one section of the country and not in another section of the country where the life of the industry practically depends upon the service? Take, for instance, my State, with its millions of boxes of oranges.

Mr. JONES of Texas. I surely do not. I believe that the appropriation ought to be sufficient to let them carry on this work on a nation-wide scale, because they are doing something that really benefits the producer and the consumer. I do not know of anything else that is offered in the bill that has much of a tendency in that direction.

Mr. BANKHEAD. Mr. Chairman, will the gentleman yield?

Mr. JONES of Texas. Yes.

Mr. BANKHEAD. I am in sympathy with the spirit of the gentleman's remarks, but why does he arbitrarily fix the amount of $590,000?

Mr. JONES of Texas. I thought something of introducing the total amount, $750,000, asked for by the department, but I thought I would be more likely to get the amendment adopted if I made it $590,000. I think it ought to be $750,000.

Mr. SEARS. I called up the department and they say that they could practically give this service to the entire country for approximately the amount mentioned by the gentleman from Texas.

Mr. JONES of Texas. I put it at that amount more or less arbitrarily because it was about one-half between what the committee allowed and what the department said they could use. If anyone will read the hearings he will see that the Bureau of Markets is doing something worth while. I helped in the effort to strike out the provision about going out and teaching the farmers how to live, which carries $325,000. This House voted to keep that in the bill. The same committee that voted $325,000 for that purpose ought to grant $200,000 more for the Bureau of Markets.

Mr. LANHAM. Mr. Chairman, in case the pending amendment which I have offered is defeated, it is my purpose to offer an amendment increasing the amount mentioned in this paragraph of the bill to $415,160, that being the amount necessary to reestablish this service in the southwestern section of our country with reference to live stock and meat. It is a matter of general knowledge perhaps that there is no section which produces more of the wealth of the Nation in these respects than the very southwestern section of the country in which the reestablishment of this service is sought.

Mr. ANDERSON. Mr. Chairman, no man who is interested in agriculture can be unmindful of the importance of the problems connected with the marketing of farm products, and I sympathize with the interest of gentlemen on the floor in the solution of those problems. But each one of these gentlemen seems desireous of raising the ante just a little bit, just enough to take care of his particular section of the country. And no one of them seems to have a very clear idea of the work that is being conducted under this paragraph. The largest part of it relates to a telegraphic news service with respect to perishable fruits and vegetables. If my recollection serves me correctly, that has been conducted heretofore on a basis of cost for telegraphing of approximately $58,000. To extend that telegraphic news service as estimated by the department would involve an increase of something like $110,000 for telegraphic tolls alone. Now, when you come to expending for a service a total of $176,000 for telegraphic news service in the interest of specialized industry, it seems to me you are getting a long way from a proper expression of economy.

Mr. SEARS. Will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. SEARS. I notice in the paragraph $390,000, and in this there are included telegrams. Does that cover just a certain section of the country or the entire country?

Mr. ANDERSON. The telegraphic news service as it now stands, I understand, goes as far west as Kansas City, as the gentleman from California [Mr. OSBORNE] says. To make the extension which the gentlemen contemplate would involve an increase of over $100,000.

Mr. SEARS. Will the gentleman yield further?

Mr. ANDERSON. Yes.

Mr. SEARS. This is a paragraph in which the consumer gets some real relief. Does the gentleman believe if for $170,000 additional, as I was informed by the bureau, the entire country can be given this service, we would discriminate against one section of the country?

Mr. ANDERSON. If we allow the $176,000, or the total amount provided by the bureau, there would still be some sections of the country and some products which could not be taken care of under the expenditure. Of course, there would not be so many as there will be if the amount stands as it is in the bill, but there will still be products—perishable fruits and vegetables, as well as other articles—in certain sections of the country which will not be reached by the service, even if the whole $750,000 is appropriated.

Mr. LANHAM. Is it not a fact if the amount be left as stated in the bill, with reference to the reports of live stock, it will be necessary for the Bureau of Markets to drop from this list one or two points now getting that service?

Mr. ANDERSON. I have no statement to that effect from the bureau, but that may be true.

Mr. LANHAM. I have that on telephonic information from the bureau. May I ask the gentleman if it is not a fact that the southwestern and western parts of this country had this service?

Mr. ANDERSON. There was a time during the war, I think, when this service was extended as far west as the Pacific coast and as far southwest as Fort Worth, Tex., and as far south as Florida. Last year, after the war was over, the imperative need for the service seemed diminished, as we thought, and the amount was reduced.

Mr. BLANTON. Will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. BLANTON. If we are spending $400,000 to furnish telegraphic information now to parts of the country for the benefit of the producers, I wanted to ask the distinguished chairman of the subcommittee if he thinks it fair to the balance of the United States not to accord to them a similar and like service? In other words, why not make the service apply to all of the United States and not just particular portions?

Mr. ANDERSON. Yes; I think it is entirely fair.

The CHAIRMAN. The time of the gentleman has expired. The question comes on the amendment of the gentleman from California [Mr. OSBORNE] to the amendment offered by the gentleman from Texas [Mr. LANHAM].

Mr. SUMNERS of Texas. I would like to have the Lanham amendment reported, Mr. Chairman.

The CHAIRMAN. Without objection, the amendment will be again reported.

The amendment was again read.

The CHAIRMAN. The question is on the amendment of the gentleman from California.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The question now comes on the substitute offered by the gentleman from Texas [Mr. JONES].

The question was taken, and the Chair announced that he was in doubt.

The committee divided; and there were—ayes 37, noes 48.

Mr. JONES of Texas. Mr. Chairman, I ask for tellers.

Tellers were ordered; and Mr. ANDERSON and Mr. JONES of Texas took their places as tellers.

The committee again divided; and there were—ayes 44, noes 70.

So the substitute was rejected.

The CHAIRMAN. The question now comes on the amendment offered by the gentleman from Texas [Mr. LANHAM].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. LANHAM. Mr. Chairman, I ask for a division.

The committee divided; and there were—ayes 49, noes 70.

So the amendment was rejected.

Mr. LANHAM. Mr. Chairman, I offer the amendment to which I referred, with reference to live stock and the meat industry.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LANHAM: Page 71, line 16, strike out "391,160" and insert in lieu thereof "415,160."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

For enabling the Secretary of Agriculture to investigate and certify to shippers and other interested parties the quality and condition of fruits, vegetables, poultry, butter, hay, and other perishable farm products, when received in interstate commerce at such important central markets as the Secretary of Agriculture may from time to time designate, under such rules and regulations as he may prescribe, including payment of such fees as will be reasonable and as nearly as may be to cover the cost for the service rendered: *Provided*, That certificates issued by the authorized agents of the department shall be received in all courts of the United States as prima facie evidence of the truth of the statements therein contained, $175,000.

Mr. SUMNERS of Texas. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Texas moves to strike out the last word.

Mr. SUMNERS of Texas. I ask unanimous consent to proceed for 10 minutes.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to proceed for 10 minutes. Is there objection?

Mr. ANDERSON. Reserving the right to object, Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in 15 minutes.

Mr. STEVENSON. I want to offer an amendment that I would like to have five minutes on.

Mr. ANDERSON. Then I will make it 20 minutes.

The CHAIRMAN. Does that include the time of the gentleman from Texas now on the floor?

Mr. ANDERSON. Make it 20 minutes, including the time of the gentleman from Texas now on the floor.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that all debate on this paragraph and all amendments thereto close in 20 minutes. Is there objection?

There was no objection.

The CHAIRMAN. The gentleman from Texas [Mr. SUMNERS] asks unanimous consent that he may be allowed to proceed for 10 minutes. Is there objection?

There was no objection.

Mr. SUMNERS of Texas. Mr. Chairman and gentlemen of the committee, I hope that for 10 minutes I may have your attention, because I am going to address myself to that phase of the work of the Agricultural Department which all the Members who have addressed you have declared to be the most important feature of the work of that great department.

Since the beginning of this department it has made great progress in regard to two things—production and the preservation of the fertility of the soil. It has gone very extensively into the homes of the people, onto the farms of the people, and under this particular item it has acquired and disseminated useful information in regard to the sale and distribution of agricultural commodities.

Gentlemen of this committee, especially the gentlemen of the Committee on Agriculture, may I submit for your serious consideration this fact? Everybody recognizes the fact that there is too great a spread between the cost to the consumer and the price received by the farmer. We all talk about it, but nothing is being done to establish the possibilities of a commercial contact between the people who produce and the people who consume in order that that spread may be reduced. We all recognize that the instability of agriculture, its economic instability, its economic weakness, is a menace to everybody engaged in the business and a menace to the whole country. No business can be stronger or more stable than the market in which it sells. Is not that fundamental? And there is no more instable market than the market in which agriculture sells.

Now, gentlemen, the work that is being done by this bureau—and I do not desire to criticize it—is not being done in exactly the right way. Its telegrams are going in the wrong direction. They gather information in regard to markets and disseminate it all over the country. The people get it generally. But suppose Chicago is a good market at a given time for a given commodity, and suppose that information goes out all over the country; those commodities go into Chicago from everywhere, and as a result the market is flooded and the products are wasted.

We will never be able to systematize the marketing and sale of agricultural products until we create a market place, a clearing house or exchange or whatever you want to call it, where the people who want to buy and the people who want to sell can get into trading contact with each other, and I challenge any gentleman—and I do it with all due respect—to suggest any other possible method by which it may be done. These commodities ought to move under prior sale. Here is where the philosophy and the function of this Bureau of Markets is wrong. These commodities ought to move under prior sale from the point of concentration to the point of need in quantity and quality in accord with the demand for the need. Never in the world will you be able to bring about the economical and systematic distribution of these commodities until that is made practicable.

Mr. BARBOUR. Mr. Chairman, will the gentleman yield?

Mr. SUMNERS of Texas. Yes; but very briefly, if the gentleman please.

Mr. BARBOUR. Does this paragraph say anything about the quantity of these products?

Mr. SUMNERS of Texas. I would be glad to answer that, but it would take me away from the particular subject I have in mind. We need to standardize these commodities so as to condense their description into trade terms. When we shall have done that, let us restore the philosophy and function of the old market places, the "markets overt," a thing that we have forgotten in the progress that we have made in recent decades. The old market, public market, in the days of simple industrial organization in this country, constituted a clearing house, a meeting place for the people who wanted to buy and to sell. It created a route around the privately controlled avenues of distribution. It permitted the people automatically, by the working of economic law, to hold the total of the intervening profit to the basis of the economic value of the service rendered. No toll levying would be allowed under a system like that.

If you take that philosophy and apply it to modern conditions, then you will not only make possible the reduction of physical and economic waste now, but you will give the people of this country a practical route around the privately controlled avenues of distribution. Then you would not have a congested market in one place and an inadequate supply in another place, and such a spread between what the farmer gets and the consumer pays as now.

Mr. FESS. Mr. Chairman, will the gentleman yield?

Mr. SUMNERS of Texas. Yes.

Mr. FESS. Does the gentleman mean that the marketing place should be a matter of legislative law or a matter determined by the law of trade?

Mr. SUMNERS of Texas. I mean that the establishment of the market place and the government and regulation of the market place have been recognized as the duty of government, and the chief function of government with reference to commerce, from time immemorial down until the last few decades. I mean that the Government should do that one thing again.

Mr. FESS. My friend does not think that the Government should select a particular place and make that a market place, does he?

Mr. SUMNERS of Texas. I mean this, that the Government of the United States, through its Department of Agriculture, whose duty it is to deal with big problems under the jurisdiction of that department, should create in this country a produce exchange system, under the organization of the Department of Agriculture, a meeting place, figuratively speaking, where these commodities may be bought and sold by their description.

Let me illustrate. Suppose a little community produces a shipping unit of a given commodity that meets the standard requirement. That little community would be able to send a telegram to this place where everybody knows they can get into trading contact with the markets of the world and there offer that commodity for sale by its descriptive grade. That is not the selling by Government, just the provision and regulation of the possibility of general trade contact. Governments have been ordained among men for no other purpose on this earth than to help the people of a country to do through the government, their common agent, what the people as individuals can not do. Now, looking at it from a practical standpoint I say this is a service that the individual can not do.

There are three ways in which these commodities may be distributed. One is as I suggest. One is as now, with confusion and enormous physical and economic waste, and through these great, big organizations that extend from production to

consumption, that are so big that they have the power to levy a toll on commerce. The third is by the organization of the farmers of this country into a solid, compact mass, held together by class consciousness. Such an organization of farmers can do it, but no man who loves his country will ever compel that thing to come. When that line of class cleavage shall be run through the citizenship of this country it will be a sad day for it. The farmers of this country are the least disposed to be class conscious. They live out in the sunshine, where class prejudice has a less fertile soil than anywhere else, and no man is a good statesman who withholds the hand of the Government from the performance of a just and necessary governmental function, thereby driving these men back upon themselves into class solidarity. That is what we are doing right now, and we will pay the price for it, too.

A moment ago the distinguished gentleman from Tennessee [Mr. DAVIS] read a clipping from one of his papers with regard to creameries. I happen to have a letter in my pocket right now that was written from his own district, in which a good woman whom I know very well says that the people who are producing butter down there are being offered only 10 cents a pound for it. Somebody wants that butter. Somebody needs it. There is some poor family in this country that would pay a fair price for that butter, plus a fair distribution charge, but they do not know where the butter is, and the butter does not know where they are. They have no common market place, no place known to both where supply and demand may meet and trade under such conditions as will give the required confidence as to integrity of transaction. The wise thing to do is for the Government to establish the possibility of trade contact between those people down in the hills of Tennessee and some poor American families in some great city who to-day can not get the butter needed for their families. Now, let us do the wise thing and not go to theorizing about it. Let us not take what some political philosopher or speculator has said about it; but when we get to a job that ought to be done and by analysis of the situation see that individuals can not do it, then that makes it a necessary governmental function.

And if government will not do it, not only will its people suffer, but the Government itself will suffer, and will later on have to do that which it ought not to do, and will not have to do if it will now do that which for all time has been recognized as the duty and function of government.

Mr. JONES of Texas. By the term "place" the gentleman does not mean a single place, but rather a number of centers or places, does he not?

Mr. SUMNERS of Texas. Yes; but of course in 10 minutes I can not go into that.

Mr. STEVENSON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from South Carolina offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. STEVENSON: Page 72, line 2, after the word "department," insert the following: "when countersigned by the Secretary of Agriculture."

Mr. STEVENSON. Mr. Chairman, I would infinitely prefer to strike this proviso out of this paragraph entirely, but I doubt if that can be done.

I want to invite the attention of the members of this committee to what this proviso is.

That certificates issued by the authorized agents of the department shall be received in all courts of the United States as prima facie evidence of the truth of the statements therein contained.

Now, what are the certificates that it is contemplated shall be issued? Certificates issued by agents of the Department of Agriculture at the central markets, who are selected by the Agricultural Department to certify to the condition of perishable farm products sent to those markets. A man out in Minnesota ships butter to Chicago. He ships it to a commission merchant. The agent of the department inspects it and certifies to the commission merchant that the butter is rancid, that it is too old, that it is not in marketable condition. The commission merchant has the butter. The man from Minnesota has to collect his money. When he wants it the fellow in Chicago says, "Your stuff was not up to the standard, was not marketable, I will not pay for it."

The shipper of the butter has to go down to Chicago to sue him. When he gets there he is confronted with the certificate of a mere agent of the Department of Agriculture, without anything else to back it, which shows that the article that the farmer shipped 300 miles was not in marketable condition, was not good stuff, and therefore when he asks for his money he is turned out of court. That is what is going to happen. I do not know whether it has happened up to this time, but it will as surely as we are here. Now, I am asking that we require the countersignature of the Secretary of Agriculture, to at least guarantee that the fellow who signs the certificate is an agent of the Department of Agriculture. When he signs this certificate the man who gets the stuff is relieved from having to put a witness on the stand to be cross-examined by the other side, and we ought at least to have some certain method of establishing that he is an agent of the Department of Agriculture, and that he is responsible and that there is somebody who amounts to something who backs up that certificate.

Now, it seems to me that we have gone a long ways when we permit a mere servant or any agent to dispense with the right of cross-examination where a man has shipped stuff 200 or 300 miles away and in court is confronted with the certificate of some Government official that his stuff was not what he represented it to be. I believe in the old rule of cross-examination. I do not believe in letting down the bars, as has been done heretofore, but I am in favor of making somebody that amounts to something back up the certificate by authentication which will let us know that the man who issues the certificate was really in the employment of the Government and had the confidence of the Secretary of Agriculture. [Applause.]

Mr. McCLINTIC. Mr. Chairman, I suggest the absence of a quorum.

The CHAIRMAN. The gentleman from Oklahoma makes the point of order that no quorum is present. The Chair will count. [After counting.] One hundred and eleven Members present, a quorum.

Mr. BYRNES of South Carolina. Mr. Chairman, as I understand, the time for the discussion of this amendment has been agreed upon. I beg to differ with my colleague and friend from South Carolina [Mr. STEVENSON]. I can not agree with him that we would improve the situation at all by the adoption of his amendment providing that the certificate of the agent of the department as to the condition of the butter when it arrived at the market would have any greater value because of its being countersigned by the Secretary of Agriculture in Washington. In the very nature of things the countersignature could only be testimony as to the general character of the agent, and that is implied when he employs the agent. Of course, the Secretary would know nothing about the condition of the butter.

In practical operation this provision is a great safeguard to the shipper of fruits and vegetables. Heretofore the shipper of fruits and vegetables would be informed that when his shipment arrived it was in bad shape, and he would be sent a check for a few dollars or sent no check and requested to pay the freight. Since the establishment of this service whenever such a situation arises the shipper telegraphs the agent of the department to examine the produce which he has shipped to the central market. The agent examines it and certifies to the condition of the produce, which certificate is prima facie in all courts of the United States. So far as the shipper is concerned no man who represents a district in which truck producers live will find them complaining, because this service has been of great value to them. It does not make much of a charge upon the Treasury because the revenue that is derived from it will amount to $100,000 or more. The agent who inspects the produce charges for the inspection—$4 a car, I believe—and that service is of inestimable benefit to the producer and the shipper of produce in this country.

Mr. ANDERSON. Mr. Chairman, the gentleman from South Carolina [Mr. STEVENSON], who spoke first on the amendment and offered it, is clearly mistaken in his conception of what this provision is. It provides for a certificate, not in the interest of the commission man but in the interest of the shipper. The receiver of the shipment is on the ground. He has all the advantage incident to being on the ground, while the shipper is at a long distance, and ordinarily it is the shipper who asks for the certificate, because he has no means of knowing whether his shipment is received in good order or not. The certificate of the agent of the department is a protection to him when the shipment gets to the central market.

The amendment of the gentleman from South Carolina would have the effect of delaying the issuance of the certificate beyond the time when it would be of the greatest value. In order for the service to be useful the certificate must be issued promptly when the shipment is received. If the shipper asking for the certificate has to have the certificate sent to Washington and countersigned by the Secretary of Agriculture the shipment will have been sold and the compromise or settlement which might otherwise be made immediately is delayed for some days, and perhaps for some weeks.

Mr. STEVENSON. Will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. STEVENSON. The provision which I offer makes it necessary for it to be countersigned by the Secretary of Agriculture before it can be used in court. It does not make it necessary to have it countersigned for the purpose of a settlement.

Mr. ANDERSON. Of course, before the certificate could be introduced in court the foundation for it must be laid, and it would have to be shown that the agent who made it was the agent authorized by the Secretary of Agriculture to make such certificate. So the amendment does not accomplish anything in any event.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

To enable the Secretary of Agriculture to cooperate with the several States in the employment of agents to acquire and diffuse useful information connected with the distribution and marketing of farm products through investigational, demonstrational, or extension methods, $70,000.

Mr. SUMNERS of Texas. Mr. Chairman, I move to strike out the last word. I make this motion for the purpose of making myself clear. A moment ago a question was asked me by the gentleman from Texas, which indicated to me that I had not made myself clear. I say it is the duty of the Government under existing conditions to provide opportunities for commerce. I did not mean to establish a market place or a house where the goods are to be exposed for sale, but I meant to provide as nearly as I can illustrate it what is ordinarily known as a produce exchange, a place where the actual commodities are listed for sale.

The contracts of the produce exchanges require delivery at the point where the exchange is located. Under the plan that I have suggested, and I have introduced a bill to that effect, people living over the country, wherever they live, would get together a shipping unit of a commodity and would leave the commodity where it is, and send its description to market, and the people who want to buy this commodity would not go in person but would meet it there with their demands and trade under public supervision and inspection, which would enable strangers to trade with each other, so that the man in New York could buy the commodity in Florida, which he had never seen, from a man he did not know, whose personal integrity did not cut any figure; and when he bought it, instead of its having to clear through the place where the trade was effected and thereby be pulled out of the line of its natural travel, it would go direct from where it was produced to the place of need.

Mr. YATES. It would not depend upon our Chicago Board of Trade.

Mr. SUMNERS of Texas. It would not depend upon anything. In other words, you would not be holding your commodity in a great concentration point, at very great expense, awaiting sale. Any commodity capable of description in terms of trade would not move from the place of production until sold, and when it was sold it would not go wandering all over the earth and make the poor people who have to buy it pay the expense of unnecessary transportation. Then you would not have to have so many antitrust laws, because there would be no toll-taking power. Distributors would continue to function as long as they charged the economic value of the service rendered, but when they got where they began to try to levy a toll you would then have the possibility of direct trade contact between any producing community and any buying community, which would automatically tend to hold the total of profits to the bases of service value and would give the laws of supply and demand a chance to operate.

Mr. YATES. Does the gentleman think that could be done by statute?

Mr. SUMNERS of Texas. Absolutely. There is no sort of doubt about that in my mind. As I said a moment ago, in the first place it is a governmental function. From every angle it presents itself as a governmental function to do this thing. Besides, it deals with a problem of agriculture, through the Department of Agriculture, which has been created for no other purpose than to aid agriculture in its big difficulties. This is the one great problem of agriculture with regard to which farmers are least able to deal and the one which lies at the very heart of the business. There is no sound reason in theory or in fact why this department should fail at the very point of its greatest need and greatest possibility of service. Besides, this is a better way to regulate commerce and to prevent trusts and combinations than by the purely legalistic method which we have tried.

Mr. WHITE of Kansas. Mr. Chairman, will the gentleman yield?

Mr. SUMNERS of Texas. Yes.

Mr. WHITE of Kansas. Does the gentleman believe it would be practicable to apply his theory or system to the marketing of live stock and cattle?

Mr. SUMNERS of Texas. There is no sort of doubt about that. I do not mean that all live stock may be standardized, neither is all cotton or grain capable of standardization. A good cowman could go into a well-bred herd of a thousand cattle and cut them into five bunches; that would be a great deal more uniform than anybody can cut a thousand bales of cotton into. There are enough cattle capable of standardization now to establish grades and a market by grade. With the standards established, growers would breed to standard. The Department of Agriculture is now establishing standards sufficient to establish a market.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. SEARS. Mr. Chairman, I move to strike out the paragraph. I notice in this paragraph there is an appropriation of $70,000 for the purpose of employing agents to diffuse useful information connected with the distribution and marketing of farm products. A few moments ago the committee struck out an increase of $170,000, approximately, for the purpose of assisting the farmers by giving prompt information relative to market conditions. That was done with the aid of the second line of defense, with which second line of defense the members of the committee are well acquainted. We are now appropriating $70,000 to have some agents go over the country and collect some information relative to the marketing of farm produce. I fear that this is a needless expenditure of money, because much of the farm products will be wasted and rotted long before this information can be given to the farmer. I would really like to see some appropriation passed by this House which would give to the farmers of the country some of the relief to which they are entitled. They come to us and ask for relief, and we wisely pass resolutions of sympathy. Then they come back and ask for bread, and we give them a stone. I fear that some day the farmers of the country—the fruit growers—are going to wake up to the fact that they are working 8 or 10 or 12 hours a day for the purpose of feeding the people and that at the end of the year instead of finding the mortgage paid they have to increase it, and that then the farmers, not collectively but individually, will strike and cease to produce, and then the country will begin to realize the importance of the farmer, but it will be too late. I sincerely trust my colleagues will not bring about this condition; that they will realize that the farmers of the country are not the profiteers; and that the producers are losing large sums of money. In my own State thousands of boxes of fruit are to-day rotting on the ground because same can not be gotten to market at a profit to the producer; and, as stated by the gentleman from Texas, the consumer here is paying an enormous sum for the privilege of eating this delicious fruit. In my section of the State annually thousands of acres of beans, tomatoes, Irish potatoes, and other food truck and farm products go to waste and rot simply because we can not afford to gather the produce and pay the freight to the great cities. Two or three years ago I saw beans selling in the markets of Washington for 15, 20, and 25 cents a quart, when in my section of the State thousands of acres of them—enough to feed the city of New York for several weeks—rotted on the ground because the growers could not get 2 cents a quart for them.

I appreciate the fact that a man should not criticize unless he has some solution, and I regret to state that while I have given the matter many hours of serious thought I have been unable to find a solution. I am making these few remarks hoping that some Member of Congress will work out some plan whereby the producer can at least get 25 per cent of the 400 and 800 per cent that the consumer finally pays.

The CHAIRMAN. The time of the gentleman from Florida has expired.

The Clerk read as follows:

For collecting, compiling, abstracting, analyzing, summarizing, interpreting, and publishing data relating to agriculture, including crop and live-stock estimates, acreage, yield, grades, stocks, and value of farm crops, and numbers, grades, and value of live stock and live-stock products on farms, $250,000.

Mr. ANDERSON. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 73, line 2, after the word "farms," insert "in cooperation with the States Relations Service and other Federal, State, and local agencies."

Mr. ANDERSON. Mr. Chairman, this simply restores the language of last year's bill, which was inadvertently omitted.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Minnesota.

The amendment was agreed to.

The Clerk read as follows:

In all, for general expenses, $1,339,560.

Mr. SISSON. Mr. Chairman, I offer the following amendment as a new paragraph.

The CHAIRMAN. The gentleman from Mississippi offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SISSON: Page 73, after line 7, insert:

"The Secretary of the Treasury is authorized from time to time during the fiscal years ending June 30, 1921 and 1922, respectively, to purchase at par and accrued interest, with any funds in the Treasury not otherwise appropriated, from any Federal land bank, farm-loan bonds issued by such bank.

"Such purchases shall not exceed the sum of $100,000,000 in either of such fiscal years, shall be made only upon the recommendation in writing of the Federal Farm Loan Board, and the bonds so purchased shall bear interest at the rate of 5 per cent per annum.

"Any Federal land bank may at any time repurchase, at par and accrued interest, for the purpose of redemption or resale, any bonds so purchased from it and held in the Treasury.

"The bonds of any Federal land bank purchased by the Secretary of the Treasury and held in the Treasury under the provisions of this act three years from the date of purchase shall, upon 30 days' notice from the Secretary of the Treasury, be redeemed or repurchased by such bank at par and accrued interest."

Mr. ANDERSON. Mr. Chairman, I reserve a point of order on the amendment.

Mr. SISSON. Mr. Chairman, I thank my friend for reserving the point of order, because I believe the amendment I have offered is subject to a point of order, inasmuch as it is legislation on an appropriation bill. But I hope no Member of the House will make the point, because by so doing such a Member will do every distressed farmer in America great injury. I want to offer the amendment at this time, because if no Member makes the point the distressed farmers will be relieved by its provisions. I am offering it also for the purpose of calling the attention of the House and the attention of the entire country to the fact that if this Republican Congress will pass this amendment the distressing condition in which the agricultural people throughout the United States find themselves will be at once relieved. From every section of the United States, especially the farming sections, especially all the sections of the country where the land is divided into small farms, there is universal demand for this legislation. Congress has committed itself to this proposition.

The legislation was passed by a Democratic Congress, and some three or four hundred millions of dollars have been loaned to the farmers. As long as Congress was under Democratic control this legislation was kept alive, but it died as soon as the Republicans got control. The Federal Farm Loan Board is now an institution in Washington, ready to do business. The salary and overhead expenses are being paid out of the Treasury, because it is essential to take care of the loans that the board has already made. All new business has ceased, and the farmers do not quite understand why Congress has thus turned its back upon them.

As all of you know, a suit was instituted contesting the constitutionality of that act. This is the second time that act has been contested. The first time was when we had a Democratic Congress, and as soon as they filed the suit raising the constitutionality of the act, a Democratic Congress and a Democratic Senate placed in the bill $200,000,000 to be used by the Federal Farm Loan Board in financing these bonds until that case could be decided by the Supreme Court. Immediately upon that amendment going in the bill the loan sharks saw that the farmers would be taken care of without them and the suit was withdrawn, and the Federal Farm Loan Board had no trouble in disposing of the bonds, and not a dollar of the appropriation was used. Now, in the last Congress, which was Republican, an effort was made to do the same thing, but the only thing that that Republican Congress would do then was to take care of the negotiated loans of $41,000,000.

So in 30 days after the passage of the $41,000,000 appropriation no more money was available from any source—the loan sharks had their way, as no bonds could be sold, because the purchasers were unwilling to take chances on the constitutionality of the act and no funds were available from the Treasury.

There never was a moment since the passage of this farm loan law when instant relief could not have been granted, not only to the small farmer but to all the small banks throughout the United States, because the little farmer, owing from $150 to three and four thousand and having 40 or 160 acres of land, could immediately obtain from their banks money to make the next crop provided they paid what they already owed on their land, and this could have been gotten from the Federal Farm Loan Board until this Republican Congress got in control. I had an opportunity to investigate my own little banks at home, and I found in one bank $125,000 loaned to local farmers in amounts ranging from $150 to less than $3,000. In every instance these loans were secured by mortgages upon the lands of the farmers. Now the bankers would be glad to advance money during the next year to the farmer to make the crop provided he could pay what he now owed. But the wheels have been clogged up and they can not start.

Now, in the State of Mississippi, strange as it may seem, in view of the prosperity we had there a few years ago, owing to the enormous cost of making this crop there are many of the farmers, some of them not small farmers either, that are actually unable to pay the taxes upon the land, not because they have not the assets, but the banks literally can not afford to furnish them with money. Now, that is a condition that ought not to exist. This whole system of finance which has been instituted by a Democratic Congress was for the purpose of enabling men when they had assets to always get money upon them. Now, if you want to do some real service, inasmuch as the Government will not lose a penny, and not a cent has been lost yet from all the millions loaned to the small farmers, and the Government has no chance to lose one penny of this amount—if Congress wants to do something for the people, if our Republican majority wants to do something that will bring immediate relief, pass this amendment which I offer to this bill.

If it is declared out of order, I will say that I have introduced a bill before the Committee on Banking and Currency which in substance is the same as this amendment, and if you will pass that immediately, in all the great West, in all the great Middle States and border States and the Southern States you will secure immediate relief for the farmer.

Mr. STEVENSON. Has the gentleman any information which he can give us which leads him to hope that the Supreme Court will ever find the key to the situation and decide?

Mr. SISSON. I never like to criticize the Supreme Court.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. SISSON. Mr. Chairman, I ask unanimous consent for five minutes. I have not taken a minute on the gentleman's bill.

Mr. ANDERSON. I know that, but a lot of other gentlemen have, and a lot of other gentlemen want to do so. I think in granting five minutes to the gentleman I have been quite liberal.

Mr. SISSON. I hope the gentleman will let me proceed for five minutes longer. I can get the time, of course, on some other paragraph.

Mr. McCLINTIC. Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Oklahoma makes the point that there is no quorum present.

Mr. ANDERSON. Mr. Chairman, I will insist on my request if the gentleman from Oklahoma insists on the point of order.

Mr. SISSON. I hope the gentleman in charge of the bill will not hold me responsible for what somebody else does, because I did not desire the point of no quorum to be made. I did not know that anybody rose to their feet to make the point of no quorum.

The CHAIRMAN. The Chair will count. [After counting.] One hundred and three Members are present, a quorum.

The gentleman from Mississippi asks unanimous consent that he may be allowed to proceed for five additional minutes. Is there objection?

Mr. ANDERSON. Reserving the right to object, I ask unanimous consent that all debate on this paragraph and amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that all debate on this paragraph and amendments thereto close at the end of five minutes. Is there objection? [After a pause.] The Chair hears none.

Is there objection to the request made by the gentleman from Mississippi [Mr. SISSON]? [After a pause.] The Chair hears none.

Mr. SISSON. Mr. Chairman and gentlemen, when I was interrupted, the gentleman from South Carolina [Mr. STEVENSON] asked me about the decision of the Supreme Court. I am amazed at the length of time that it takes the court to reach a decision on this question, because I understand there is only one single point involved. That question was reargued, I understand, some months ago.

Mr. MOORE of Virginia. Mr. Chairman, will the gentleman yield?

Mr. SISSON. Yes.

Mr. MOORE of Virginia. May I tell the gentleman exactly what the status is as to that?

Mr. SISSON. Yes.

Mr. MOORE of Virginia. The case was first argued in January, 1920, and reargued in October, 1920.

Mr. SISSON. Yes; in October, 1920. I do not see why the country should not be put at rest by the court deciding that issue and why the Congress should not know exactly where we stand.

The purpose of this amendment is to do this: It is to supply the Federal Farm Loan Board with money with which to buy these bonds until the Supreme Court shall decide one way or the other. In the event it decides that the act is constitutional, instantly the Federal Farm Loan Board say they can absorb all the bonds issued under this appropriation.

Gentlemen, if you really want to do something of real value for the farmer, if you want to do something that will give immediate and real relief to every distressed farmer in the United States, putting him where it is impossible for him to be pressed, adopt this amendment I have offered, because this loan is amortized and by the payment of 5½ per cent annually you would amortize the loan at the end of 30 years, and every banker in the country will tell you that in the event the farmer fails to make one payment they would be very glad to take up that amount and take a second mortgage on the land. It is the one thing that you may do that will grant immediate relief to agriculture in this country.

Now, I want to say this in conclusion: You may sit here, if you please, and imagine that you are doing your country a service simply by cutting down appropriations, and I want to help you in that all I can; but there is needed some constructive legislation. There is something that must be done to relieve this situation, and it is in the hands of this Republican majority in Congress, and you ought to be held responsible for it, whether you will be held responsible or not. It is in your hands; it is within the hands of the majority of this House within 10 days to grant immediate relief. I have consulted with the Farm Loan Board in regard to this matter, and they say that this amendment is all they want and all they need. I asked them whether this provision would suit them. They said it would give them exactly what they wanted. You are paying the overhead charge now, and you will not be increasing that at all by this appropriation of $100,000,000. You will give immediate relief. You will relieve the banking centers.

When the farmer can not pay his indebtedness to the small bank, the small bank can not pay its indebtedness to the larger bank. The result will be that if you will grant relief at this point, the relief which is so much needed, immediately the finances will revive, and you gentlemen on the majority side will get the credit for it because you are in power. If you do not do it you ought to be held responsible for it by the American people. [Applause.]

I plead with you my Republican friends to pass this amendment. My people, the best and most patient and long suffering people in the country, are in need of help. This legislation will not cost the Federal Government a cent. Every dollar will be paid back with every cent of interest. In God's name will you not take the tight grip of the loan shark from the throats of my people and from the throats of the American farmers? [Applause.]

The CHAIRMAN. Does the gentleman from Minnesota make the point of order?

Mr. ANDERSON. Yes; I make the point of order, that it is legislation on an appropriation bill.

The CHAIRMAN. The gentleman from Minnesota makes the point of order that it is legislation on an appropriation bill, and contrary to the rule. The Chair sustains the point of order.

Mr. ANDERSON. Mr. Chairman, I have an amendment which I offer as a new paragraph.

The CHAIRMAN. The gentleman from Minnesota offers an amendment as a new paragraph, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. ANDERSON: On page 73, between lines 7 and 8, insert the following paragraph:

"That hereafter the powers conferred and the duties imposed by law on the Bureau of Statistics, the Bureau of Crop Estimates, and the Bureau of Markets of the Department of Agriculture shall be exercised and performed by the Bureau of Markets and Crop Estimates."

Mr. HAUGEN. Mr. Chairman, reserving a point of order on that, I would like to ask the gentleman a question. For what purpose is the amendment?

Mr. ANDERSON. It simply legalizes the combination of the Bureau of Statistics, the Bureau of Crop Estimates, and the Bureau of Markets.

Mr. HAUGEN. Can it not be done without that?

Mr. ANDERSON. It might; but I offer it for the purpose of avoiding any legal complication that might arise, because, as the gentleman knows, the duties and obligations in most cases and the powers are imposed on the Department of Agriculture, although they are carried out by the legal bureau of the department upon which those duties have been imposed. This is to avoid any possible conflict of authority between these bureaus. I thought it was wise to put in this provision.

Mr. HAUGEN. Rather than make it permanent law, it ought to be tried out for a year. It is new legislation, it is not authorized by law, and I make the point of order on it.

Mr. ANDERSON. I concede it is subject to a point of order.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

Enforcement of the United States cotton futures act: To enable the Secretary of Agriculture to carry into effect the provisions of the United States cotton futures act, as amended March 4, 1919, including all expenses necessary for the purchase of equipment and supplies; for travel; for the employment of persons in the city of Washington and elsewhere; and for all other expenses, including rent outside of the District of Columbia, that may be necessary in executing the provisions of this act, $138,831: *Provided*, That any moneys received from or in connection with the sale of cotton purchased for the preparation of practical forms of the official cotton standards and condemned as unsuitable for such use, may be expended by the Secretary of Agriculture during the fiscal year ending June 30, 1922, for the purchase of other cotton for such use.

Mr. HAUGEN. Mr. Chairman, I make a point of order against lines 17, 18, 19, 20, 21, and 22, on page 75, as being new legislation and not authorized by law.

The CHAIRMAN. Does the gentleman make it or reserve it?

Mr. HAUGEN. I make it.

Mr. ANDERSON. I concede the point of order.

The CHAIRMAN. The gentleman from Iowa makes the point of order against that part of the paragraph on page 73 beginning with line 17 and ending with line 22. The Chair sustains the point of order.

Mr. STEVENSON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from South Carolina moves to strike out the last word.

Mr. STEVENSON. Mr. Chairman, on this question of the cotton futures act there is legislation pending before the Committee on Agriculture, on which there have been a great many hearings, but I have not had an opportunity to be heard on it, because there are always people there from elsewhere.

I want to call the attention of the committee to the fact that on yesterday, which was the last day of trading in January, and the day in which fellows who had sold cotton had to deliver the cotton if called, the market quotation in New York for January was 16.35; for March, the next active month, it was 14.55, or nearly $2 per hundred less for March than for January.

Now, why? All through this period under the present cotton futures act, in which the man who sells the cotton has the absolute right to select which of the 10 tenderable grades he will tender, if he is called on to deliver, they have been selling cotton below what it was worth. It would run to about 2 cents a pound below. It runs about 2 cents below. You say, "Why do they do that when they may be called upon to deliver?" They do that because the manufacturer who is buying the cotton may manufacture ordinary cotton, about the lowest grade. They know what he wants, and they know that if he comes up and demands the cotton they can tender him strict middling, the highest grade, a grade that he can not spin, a grade on which he will have to pay a large premium above the market. Therefore he is afraid to buy with a view to demanding the delivery, because the contract is absolutely in the hands of the seller, and the purchaser has got to take what he can get. Therefore he is afraid to buy on that market for above what he can afford to pay and lose a cent or two a pound. The result is that you find future cotton running a couple of cents below spot cotton almost the year round. The proposition which I put up to this House on what was known as the Comer amendment I propose to put up to the Committee on Agriculture, and that is to provide that whenever a contract for future delivery is sold it shall be the law that the purchaser can specify the grade from which 50 per cent of it comes, and the seller can specify the grade from which the other 50 per cent comes, and then you will have the purchaser and the seller on an equal footing, and then the purchaser can afford to bid the value of the cotton, because he knows he can require the delivery of at least half of it of the grade which he wants.

That is very important, for this reason: Here is a farmer who wants to borrow money to carry his cotton. He goes to the bank and the banker proposes to make him a loan. He says, "I want 10 cents a pound." The banker says, "That is too much, because it is only bringing $14.25 for March delivery at the time when you have got to sell your cotton to pay this loan. That is too much." Whereas if it was running as it should run, with the spot market and the future market running together, it would be $16.35, as it was yesterday. Therefore it hampers the man who wants to borrow on his cotton.

Mr. HAUGEN. If any grade other than the basic grade is delivered, they pay the commercial difference?

Mr. STEVENSON. Yes; but that does not make any difference. Here is a man who spins ordinary cotton, and they deliver him strict middling.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STEVENSON. I should like to have another minute to answer the question of the gentleman from Iowa.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that he be allowed to proceed for one minute.

Mr. FESS. I ask that he have two minutes. I want to ask him a question.

The CHAIRMAN. Unanimous consent is asked that the gentleman from South Carolina may proceed for two minutes. Is there objection?

Mr. ANDERSON. Reserving the right to object, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in two minutes.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that debate on the paragraph and amendments thereto close in two minutes. Is there objection?

There was no objection.

Mr. HAUGEN. Just one question: If the spirit of the law is carried out, and if cotton is delivered on the actual market value, whoever receives cotton of any other than the basic grade may sell it on the market for what he paid for it and buy the grade he desires at the price which he would have had to pay for that grade if delivered on his contract?

Mr. STEVENSON. Yes; he may sell it on the market, but he is out a couple of dollars a bale for the expense of certification and selling it, whereas if he wants ordinary cotton—the lowest grade—and they tender him strict middling—the highest grade—he has got to pay the premium on it and then go to the expense of reselling it, because he does not spin that kind, whereas he ought to have the right to say, "You must deliver me half of it in what I spin."

Mr. FESS. When we had the law under consideration I feared that it would not be operative. Is the gentleman satisfied with the legislation on cotton futures?

Mr. STEVENSON. The legislation has been largely beneficial. I will say to the gentleman from Ohio that it has been a success, and the only criticism those of us have to make of it, who have a good deal to do with the cotton question, is that you put in the hands of the seller an absolute dictation of what shall be delivered, when there are 10 grades, any one of which he may deliver. We believe it ought to be fair to the buyer, and that he should have the right to say what 50 per cent of his contract should be delivered in, and let the seller specify the other 50 per cent.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. HAUGEN. I ask unanimous consent that the gentleman's time be extended one minute.

The CHAIRMAN. Unanimous consent is asked that the time of the gentleman be extended one minute. Is there objection?

There was no objection.

Mr. HAUGEN. The remedy is in limiting the grades tenderable on a contract, is it not?

Mr. STEVENSON. The remedy is in limiting the man who may select the grade, in giving to each man the right to do it equally. That is the remedy. That is the only fair way.

Mr. HAUGEN. If you would limit the grades deliverable on contract to the contract grades, that would be a remedy, would it not?

Mr. STEVENSON. No; it would not, because you have 10 grades which are allowed by law to be delivered, specified in the act of 1919. Therefore the seller can take any of these 10 grades and deliver what he wants to. He ought not to have the right to specify more than half of it.

Mr. HAUGEN. But if you limit it to 1 grade instead of 10 you have a complete remedy.

Mr. STEVENSON. You would destroy the market absolutely, because there are 10 grades that are deliverable and only 1 could be dealt in on the exchange.

Mr. HAUGEN. By limiting the grades deliverable would not limit the grades that might be dealt in.

The CHAIRMAN. The pro forma amendment is withdrawn. The Clerk will read.

The Clerk read as follows:

Completion of wool work: To enable the Bureau of Markets and Crop Estimates to complete the work of the domestic wool section of the War Industries Board and to enforce the Government regulations for handling the wool clip of 1918 as established by the wool division of said board, pursuant to the Executive order dated December 31, 1918, transferring such work to the said bureau, $15,000.

Mr. BLANTON. Mr. Chairman, I move to strike out the last word. I want to call the attention of the committee and my colleagues to the fact that most of the money expended under this clause is wasted, that it does not relieve the situation for which it was designed. The wool men, especially in my district and in the district of my colleague, Mr. HUDSPETH, and other portions of the Southwest, had their wool taken away from them during the war at a certain price agreed upon, which they thought they were going to receive, but after having been held up for months and months they received 25 and 30 cents a pound less than they should have received, because of claims of excess shrinkage and excess estimates in regard to shrinkage erroneously made by Government agents.

These wool men have been trying to get the matter properly adjusted for a long time.

Mr. HUDSPETH. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. HUDSPETH. I want to say that there were 20,000 pounds of wool in the gentleman's district where they called the shrinkage 80 per cent, and it was shipped to Boston and scoured and it only showed a shrinkage of 70 per cent.

Mr. BLANTON. Yes. That is true. In my district there were two brothers who owned a big herd of sheep. About shearing time they decided to divide the herd. They did so; divided it up into two equal flocks, and then had them sheared immediately. The same sheep, thus divided into two flocks, had been running on the same range for years and naturally the wool from one flock would shrink no more than that from the other flock, yet when the wool was put in storage, in fact in the same warehouse, but the wool from each flock kept separately, according to the estimate placed on the wool by the Government's representative, one of these brothers had his wool estimated at a shrinkage that was almost double that of his brother. One of them made a little money on his wool and the other lost everything he expected to make for the whole year.

Now, that ought to be adjusted. The money we are still appropriating is spent in overhead by salary-drawing officers and nothing done to settle these matters.

A MEMBER. Were the estimates made by the same Government officials?

Mr. BLANTON. Yes; the same Government officials passing on the two lots of the same wool in different parts of the warehouse, in different sacks, but the Government official had no idea of the above facts, which disclosed his error beyond doubt.

Mr. HAUGEN. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. HAUGEN. The gentleman says that this money is spent in administration.

Mr. BLANTON. Yes; in salaries allowed employees.

Mr. HAUGEN. The gentleman is mistaken, and if he will investigate he will find that the department has collected large sums of money.

Mr. BLANTON. They may have done it up in Iowa, but there is not a sheepman in my district, and I doubt if there is in my colleague's district [Mr. HUDSPETH], whose claim has been adjusted where based on improper shrinkage.

Mr. HUDSPETH. There has not been a shipment where they placed a false value on the wool where they have received one dollar.

Mr. HAUGEN. I am not speaking of the gentleman's district.

Mr. HUDSPETH. It has gone to the licensed buyer who bought the wool from the consumer and sold it to the Government for more than they paid for it.

Mr. BLANTON. This committee should take steps to furnish these loyal stockmen some just relief, to which they are entitled.

The CHAIRMAN. The pro forma amendment is withdrawn, and the Clerk will read.

The Clerk read as follows:

And not to exceed 10 per cent of the foregoing amounts for the miscellaneous expenses of the work of any bureau, division, or office herein provided for shall be available interchangeably for expenditures on the objects included within the general expenses of such bureau, division, or office, but no more than 10 per cent shall be added to any one item of appropriation except in cases of extraordinary emergency, and then only upon the written order of the Secretary of Agriculture.

Mr. BLANTON. Mr. Chairman, I make the point of order against the paragraph as legislation unauthorized on an appropriation bill.

The CHAIRMAN. Does the gentleman from Minnesota desire to be heard on the point of order?

Mr. ANDERSON. I think it is subject to the point of order, but I think it is very unwise to take it out of the bill.

Mr. BLANTON. I do not believe in changing one fund to another except by the will of Congress.

The CHAIRMAN. The gentleman from Texas makes the point of order against the paragraph, and the Chair sustains the point of order.

Mr. LARSEN. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent to speak for five minutes. Is there objection?

There was no objection.

Mr. LARSEN. Mr. Chairman, I desire to inquire of the chairman of the committee the reason which actuated the committee in refusing to grant request of the Department of Agriculture for appropriation specified on page 174 of the estimates. The specific item is in reference to an appropriation of $10,000 for insect investigation. The chief of bureau says the plum curculio during the past two seasons has been very destructive to the peach orchards of Georgia and in 1920 there was a loss of $2,000,000; that the insect has been enormously abundant and that the spraying schedule heretofore applied for preventing it has been practically useless. It says that extensive investigation should be undertaken.

The item to which I specifically refer, Mr. Chairman, is on page 49 of the bill. The entire amount asked by the department was $198,500. The allowance is $178,500, a difference of $20,000, $10,000 of which was to be used in investigation of the peach orchards of Georgia. For some reason the committee did not see fit to grant the additional appropriation requested by the department; now will the chairman state why it was disallowed?

Mr. ANDERSON. For the same reason that applied elsewhere. The general item carries an appropriation for doing all of this work. We thought that the amount was sufficient to do it, and did not grant an increase for that reason. There is no change in the language. The language covers the work. It is simply a question of whether they will work there or somewhere else. If they consider this is sufficiently important to spend part of the appropriation on they will do it. We declined to make an increase as we thought the amount that we gave was sufficient.

Mr. LARSEN. Mr. Chairman, I appreciate the fact that the committee is of the opinion that the appropriation authorized will be sufficient to meet the demands. It is the amount of the appropriation made last year, but I think the committee has probably overlooked the immensity of the damage being done and the very important fact that it is a new disease among the peach orchards of Georgia. The peach industry in Georgia is very important, although it is still in its infancy. At this time Georgia is the second State in the Union in the production of peaches, producing twice as many as any other State except California.

Mr. ANDERSON. Oh, this is not a new disease; it is an old disease.

Mr. LARSEN. An old disease in a new place, perhaps. It is new in the orchards of Georgia, and the experts of the department say that they have been unable to find any method whereby they can exterminate it from the peach crops of that State. It must not be so old as the gentleman imagines. It is a matter that deserves much and further investigation. Inasmuch as the department made a special request for $10,000 for the specific purpose of investigation, I am sorry that it is not allowed.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. LARSEN. Mr. Chairman, I ask unanimous consent to revise and extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

Mr. McCLINTIC. Mr. Chairman, reserving the right to object, I hope the gentleman will confine his request to a revision. Recently I have been notified that the allotted number of bound CONGRESSIONAL RECORDS has been cut down from about 50 to 4, on account of the shortage of paper, and not only that, but the Republican whip, the gentleman from Minnesota [Mr. KNUTSON] has called attention to the evils of the extension of remarks, and for a given period I am going to make a test——

Mr. LARSEN. I am sure that if the gentleman will bear with me for a minute he will not make the objection.

I have taken up only a very few pages of the CONGRESSIONAL RECORD for such purpose during my entire service. This is a very important matter to my State.

Mr. McCLINTIC. I appreciate that fact, and I do not wish to say anything against the gentleman, but I hope that he will be satisfied to confine his request to a revision of his remarks.

Mr. LARSEN. I can not do it, for the reason there are two letters which I have received that discuss the matter very fully and much better than I can, and I certainly want the privilege of incorporating them in my remarks.

Mr. McCLINTIC. In order that this expense may be reduced and in order that we may keep faith with the rest of the House, in order that a test and a compilation may be made, I hope the gentleman will modify his request and ask for a revision.

Mr. LARSEN. Mr. Chairman, I regret that I can not do so in justice to my constituents.

The CHAIRMAN. Does the gentleman from Oklahoma object?

Mr. McCLINTIC. I object.

The Clerk read as follows:

Acquisition of additional forest lands: There is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to be expended under the provisions of the act of March 1, 1911 (36 Stat. L., p. 961), as amended, for the acquisition of additional lands at headwaters of navigable streams, $1,000,000, to be available until expended.

Mr. BLANTON. Mr. Chairman, I make the point of order against the paragraph on the ground that it is legislation unauthorized by law.

Mr. ANDERSON. Mr. Chairman, I think the appropriation is authorized by law. In 1911 Congress passed an act known as the Weeks law, providing for the acquisition of lands at the headwaters of navigable streams in the Appalachian and White Mountain regions. I do not want to read all of the act, but I desire to draw the attention of the Chair to the portion that I think is applicable. I may say that appropriations have heretofore been made under the authority of this act. The act provides, among other things—

That a commission to be known as the National Forest Reservation Commission, consisting of the Secretary of War, the Secretary of the Interior, the Secretary of Agriculture, and two Members of the Senate, to be selected by the President of the Senate, and two Members of the House of Representatives, to be selected by the Speaker, is hereby created and authorized to consider and pass upon such lands as may be recommended for purchase, as provided in section 6 of this act, and to fix the price or prices at which such lands may be purchased; and no purchase shall be made of any lands until such lands have been duly approved for purchase by said commission: *Provided*, That the members of the commission herein created shall serve only during the terms of their incumbency, etc.

SEC. 6. The Secretary of Agriculture is hereby authorized and directed to examine, locate, and recommend for purchase such lands as in his judgment may be necessary to the regulation of the flow of navigable streams, and to report to the National Forest Reservation Commission the results of such examination: *Provided*, That before any lands are purchased by the National Forest Reservation Commission said lands shall be examined by the Geological Survey and a report made to the Secretary of Agriculture showing that the control of said lands will promote or protect the navigation of streams, etc.

SEC. 7. That the Secretary of Agriculture is hereby authorized to purchase in the name of the United States such lands as have been approved for purchase by the National Forest Reservation Commission, at the price or prices fixed by said commission.

Mr. Chairman, that clearly is an authority to purchase lands under this act, and it is unnecessary, I think, to read any further on that subject. The law clearly authorizes the purchase contemplated under this appropriation.

Mr. BLANTON. Mr. Chairman, after the commission authorized by this act in 1911 exercises the authority given it by the act, then something further must be done before Congress could appropriate the money.

Mr. ANDERSON. Oh, this is a permanent law.

Mr. BLANTON. I understand, but I call the gentleman's attention to one thing, and that is that before Congress could appropriate money the Secretary authorized by this act to negotiate sales must conclude those negotiations and contracts of purchase. No such lands have been purchased by this commission. No such lands have been purchased by the Secretary. This is just merely an authorization for an appropriation. In fact, it is an appropriation made without any authorization at all other than the general provision giving certain authority to the Secretary and to the commission. I submit to the Chair that until that authority is acted upon and the Secretary comes to the Appropriations Committee and says, "Here are certain lands that I have purchased and I want the money to pay for them," this appropriating committee has no power whatever to appropriate money.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. MADDEN. I think the Secretary of Agriculture has done all that he is required to do under the law, when the options had been taken, the surveys made, and when he has ascertained what the cost of the land proposed to be taken shall be. They have done that in this case, and unless the appropriation is made along the lines contemplated all the expenditures already made for those purposes will be lost.

Mr. BLANTON. Does the gentleman know that they have done these things?

Mr. MADDEN. Yes; they have done them.

Mr. HAUGEN. Mr. Chairman, the bill seeks to appropriate $1,000,000 for the following fiscal year, to be made available until expended.

And further on it states that it shall expire by limitation on the 30th day of June, 1915. That part of the act expired on that date.

Mr. ANDERSON. Will the gentleman yield?

Mr. HAUGEN. Certainly.

Mr. ANDERSON. I wanted to draw the attention of the gentleman and the Chair to the fact that that proviso, the limitation in the act, is a limitation only upon section 3, which is the section making the appropriation, but is not a limitation on the general authority to purchase, which is in another section of the act.

Mr. HAUGEN. There is no authority for the appropriation of $1,000,000. That provision of law expired on the 30th day of June, 1915.

Mr. ANDERSON. The appropriation expired, but not the authority.

Mr. HAUGEN. The authority for legislation as well.

Mr. BLANTON. Did the Chair catch the point made by the gentleman from Iowa [Mr. HAUGEN]?

The CHAIRMAN. Yes; I will say to the gentleman from Texas.

The Chair will rule. The Chair feels that under the provision of the law as contained in the act of March 1, 1911, there is authority vested in the Secretary of Agriculture to purchase these lands, provided they have been approved by the National Forest Reservation Commission; that therefore this appropriation is carrying out a provision of authorized law. But the Chair feels that he should sustain the point of order on the ground that the use of three or four words in line 15, "to be available until expended," is legislation on an appropriation bill, not permitted under the rule, and therefore sustains, on that account, the point of order.

Mr. ANDERSON. Mr. Chairman, I offer an amendment in lieu of the paragraph stricken out.

The CHAIRMAN. The gentleman from Minnesota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. ANDERSON: Page 78, line 9, after line 8, insert: "Acquisition of additional forest lands: There is hereby appropriated out of any money in the Treasury not otherwise appropriated, to be expended under the provisions of the act of March 1, 1911 (36 Stat. L., 961), as amended, for the acquisition of additional lands at headwaters of navigable streams, $1,000,000."

Mr. BLANTON. Mr. Chairman, I make the point of order against the amendment, for the reason that the act of March 1, 1911, by its own terms expired and became of no force and effect in 1915. Also I make the point of order upon the ground that this is a new subject in this bill, offered by a member of the committee without authority; that it places in the bill a new subject that is not germane. It is not germane to the immediate paragraph preceding it, and it is unauthorized by law, because there are no provisions in this bill anywhere dealing with the subject of acquisition of additional forest lands. The Chair can search the bill from beginning to end, and there is no subject whatever in the bill preceding this that deals with the acquisition of additional forest lands. Therefore, this is a new subject, and the gentleman from Minnesota has no more authority as chairman of the committee to offer this amendment from the floor than has any other Member of the House, under the rulings that have been made in the Committee of the Whole and the precedents that have been established here for years.

Mr. HAUGEN. Mr. Chairman, I desire to reserve a point of order against the amount of $1,000,000.

Mr. ANDERSON. Mr. Chairman, the gentleman from Texas is amusing if not convincing. The immediately preceding paragraph, I will say to the Chair, is for purposes authorized by the very act under which this appropriation is made, and carries an appropriation practically identical in terms with the appropriation carried in the Weeks law. It certainly ought to be germane and it certainly is germane to offer at this point an appropriation for a purpose carried in the same law as the preceding item. Now, with reference to the proposition that this act expired by limitation, I direct the attention of the Chair to the fact that section 3 of the Weeks law provides:

There is hereby appropriated for the fiscal year ending June 30, 1910, the sum of $1,000,000, and for each fiscal year thereafter a sum not exceeding $2,000,000, for use in the examination, survey, and acquirement of land located at headwaters of navigable streams of those which are being or which may be developed for navigable purposes—

And so forth. And then comes the proviso:

Provided, That the provisions of this section shall expire by limitation on the 30th day of June, 1915.

Now, if Mr. Chairman——

The CHAIRMAN. Will the gentleman permit an interruption?

Mr. ANDERSON. Yes.

The CHAIRMAN. That is exactly what was troubling the Chair, namely, to reconcile section 3 with section 7. Will the gentleman explain the difference?

Mr. ANDERSON. If the Congress had intended that the authority to purchase lands under this act should expire and the commission should go out of business, and that the act should be repealed when this money was spent, it was clearly within the power of Congress to say so, but Congress very carefully avoided repealing the act, because we were very careful to say that only the provisions of the appropriating section should expire on the 30th of June, 1915. That proviso clearly does not end the authority of the commission to purchase land. It only ends the appropriation, and that is all.

The CHAIRMAN. Now, will the gentleman permit the Chair to ask him another question? In section 7 it states that the purchase must be approved by the National Forest Reservation Commission. Has that been done in this case?

Mr. ANDERSON. Yes. The lands which it is proposed to purchase under this item are right up to that point. They are up to the point now of approval by the Forest Reservation Commission.

Mr. BLANTON. Have they approved them?

Mr. ANDERSON. I think not.

Mr. BLANTON. Mr. Chairman, that is one of the prerequisites.

Mr. ANDERSON. I do not see that that question is involved at all.

Mr. BLANTON. That was the only authority given in section 7.

Mr. ANDERSON. The authority to purchase is given in this act. Of course, that authority can not be exercised, and the money can not be used until the requirements of the statutes have been complied with, but all the Chair is called upon to determine is whether the Forest Reservation Commission is authorized by this statute to purchase lands. The Chair is not required to determine whether the requirements antecedent to purchase have been complied with.

Mr. HAWLEY. Mr. Chairman, in addition to what the gentleman from Minnesota has said, the statute requires the expenditure of money for certain specified purposes prior to the approval of lands for purchase of the commission. The lands must be selected by the Geological Survey; they must then be examined by the Forest Service of the Department of Agriculture to determine the amount and value of the forest growths and of the soil; must be surveyed to ascertain the acreage; they must be investigated in some instances by the soil survey to ascertain the character of the soil, in order to determine a fair value for the land; there may be investigations by the Department of Justice on questions of title; and there are a number of expenditures preliminary to their submission to the commission for approval.

Mr. MONDELL. Mr. Chairman, the gentlemen have attempted to prove too much. If the Chair shall follow the argument and base his decision, if it were adverse to the point of order, upon the arguments that have been made in support of the item, the Chair will have opened a door so wide that no one can judge as to the amount of public moneys that may flow through it in the future. If the argument is a sound one, that Congress has created a commission that can buy forest lands, or contract for forest lands without limit, and by so doing pledge the Government to the extent that their action compels appropriations by Congress, then it is high time to repeal that law.

Mr. HAWLEY. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. I yield.

Mr. HAWLEY. Does the gentleman allege that any such action has been taken?

Mr. MONDELL. The arguments that have been made, the argument of the gentleman from Minnesota [Mr. ANDERSON] and the argument of the gentleman from Oregon [Mr. HAWLEY], are to the effect that the law authorizes this commission to purchase land in any quantity, and by so doing to pledge the Government to an extent that not only justifies but actually compels an appropriation without limit.

Mr. ANDERSON. Does the gentleman from Wyoming contend that the Chair ought to base his decision on whether this law is wise or unwise? If it is unwise, the gentleman is leader of this side of the House and can take the necessary action to have it repealed. But that certainly is not a matter for the consideration of the Chair in determining the point of order.

Mr. MONDELL. I am glad, Mr. Chairman, that the gentleman made that observation, because it leads me to the point I intended to make, that inasmuch as the proponents of this amendment base it on an interpretation of the law that is not tolerable and, I assume, on the only interpretation of the law on which it could stand, it is very clear that Congress never intended to vest such wide authority in this commission,

Congress granted to the commission certain authority and made certain appropriations, since which, if I am rightly informed, Congress has made some further appropriations, I assume, without the point of order having been raised. But, of course, that fact does not change the situation at all. The question is, Is there a commission created by Congress authorized to go abroad and pledge the public credit practically to an unlimited extent? The very statement of the claim of authority ought to be sufficient proof that the Congress has done nothing of the kind.

Mr. ANDERSON. Mr. Chairman, Congress did nothing of the kind. It provided for the ascertainment of the exterior limits of the lands which could be purchased under the act, so that there is not any roving commission in the hands of this commission to buy lands without limit, because the limits within which they can buy lands were fixed by the act itself.

Mr. MONDELL. Of course, when I said "without limit" I did not intend to embrace the entire world, because the limits of the department's authority are at least confined to forests within continental United States. They embrace only the forest lands in the Union. But within the limit set these gentlemen argue that the commission could pledge the public credit to an extent to justify and compel an appropriation.

The fact is that what the Congress did in passing the Weeks Act was to make provision for making purchases from time to time, provision for preparing for these purchases from time to time, with a limitation as to the amount that could be spent carried in the bill, for these appropriations can only be made after further authorization.

Otherwise we must take the position that there is no limit to the amount to which the Government may be pledged in this matter within the boundaries that have been set, and that the Congress may find itself confronted with a proposition of expenditure to which it will be claimed the Government is committed, embracing not $1,000,000 but $5,000,000 or $10,000,000. It does not seem to me that the Chair can hold that the legislation is as broad as that, and unless it is as broad as the gentlemen have argued, unless it is as broad as the gentleman from Minnesota and the gentleman from Oregon have insisted, then it contains no authority for this appropriation. You must broaden it to the extent that these gentlemen have suggested in order to bring the item under the rule at all. Otherwise there is no authority to further appropriate until the proper legislative committee has brought it in and Congress has passed a bill granting that authority.

The CHAIRMAN. The Chair will hear the gentleman from Oregon [Mr. HAWLEY].

Mr. HAWLEY. Mr. Chairman, I only wish to add just this, lest the impression might remain erroneously in the mind of the Chair: The commission has neither in the exercise of its discretion nor in expenditures nor in any other way exceeded the authority granted it nor in the use of the appropriation made for the purchase of lands. This is no place, however, under a point of order to discuss the merits of the proposition. I understood the Chair in a previous ruling to have sustained the Subcommittee on Agriculture of the Committee on Appropriations on its right to offer this amendment at this time, holding it to be in order.

Mr. HAUGEN. The House is ignorant of that. There may have been some previous agreement as to that.

Mr. HAWLEY. I have the floor. The Chair in a previous ruling indicated that he would have overruled the point of order if it had not been for the last five words in the paragraph.

Mr. HAUGEN. He held those words to be out of order. He did not pass any opinion on the other.

Mr. Chairman, authorizations have been made for the purchase of land. For what purchase of land? For the purchase of lands for which appropriations have been made. There is nothing beyond that. No provision was made for the purchase of any land outside of the purchases that have been made. As has been stated, the act terminated on the 30th day of June, 1915.

The CHAIRMAN. The Chair will rule. It does not seem as though it was within the province of the Chair to pass upon the wisdom or unwisdom of the Members of the Sixty-first Congress, or to speculate as to what their intentions were when they passed the law which has been quoted. As the Chair understands from the gentleman from Minnesota [Mr. ANDERSON] and the gentleman from Oregon [Mr. HAWLEY], before these lands are purchased, the purchases will be recommended and approved by this National Forest Reservation Commission.

Mr. BLANTON. Right there, will the Chair permit me?

The CHAIRMAN. The Chair will hear the gentleman.

Mr. BLANTON. But that has not yet been done, and we are appropriating the money before it has been done.

The CHAIRMAN. The Chair will say to the gentleman that the money will not be used for three or four months, and in that time, according to the statements made by the gentleman from Oregon and the gentleman from Minnesota, the report will be in, and the purchase will be approved.

Mr. BLANTON. They may all die to-night.

The CHAIRMAN. The Chair thinks there would be other gentlemen who would take their places.

Section 7 seems to the Chair to be very clear. The Chair admits that the language is exceedingly broad, so broad that as the gentleman from Wyoming [Mr. MONDELL] very properly stated, you could buy land almost without limit, the only limit being that it shall be on nonnavigable waters, and that it shall have the approval of this forest commission. But nevertheless the law says in section 7:

That the Secretary of Agriculture is hereby authorized to purchase in the name of the United States such lands as have been approved for purchase by the National Forest Reservation Commission at the price or prices fixed by said commission—

And so forth.

Now, it seems to the Chair that whatever we may think of that authorization, it is the authorization of existing law; and as the Chair views it in that way, the Chair overrules the point of order.

Mr. BLANTON. Mr. Chairman, I offer an amendment.

Mr. JOHNSON of Washington. I have an amendment, Mr. Chairman.

The CHAIRMAN. The Chair recognizes the gentleman from Texas to offer an amendment.

Mr. BLANTON. I move to strike out "$1,000,000" and to insert in lieu thereof "$100,000."

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BLANTON to the amendment offered by Mr. ANDERSON: Strike out "$1,000,000" and insert in lieu thereof "$100,000."

Mr. BLANTON. Mr. Chairman, less than 30 minutes ago this committee caused to be appropriated by this bill about $400,000 for furnishing telegraphic market reports which the chairman of the subcommittee admitted do not go beyond Kansas City toward the southwest. All of the section of country south and west of Kansas City does not receive the benefit of these telegraphic market reports. The producers who unfortunately, so far as this bill is concerned, happen to live south and west of Kansas City, can not get these telegraphic market reports. When my distinguished friend from Texas [Mr. LANHAM] offered an amendment to add less than $50,000 more in order that these producers south and west of Kansas City could likewise receive the benefit of these telegraphic market reports the chairman of the subcommittee [Mr. ANDERSON] fought his proposed amendment and got it voted down. Now, after already providing in this bill $6,000,000 a year to be spent in this Forest Service, he is proposing by his amendment, after denying a little $50,000 to furnish telegraphic market reports for the producers of the South and West, to expend another $1,000,000 in increasing the forest reserves by buying more lands. That is the logical kind of legislation that my friends on the other side of the aisle are giving to the country. I call the attention of my friends who live in the West and the South to the fact that it seems to be carrying out the very policy that the chairman of the steering committee, the distinguished gentleman from Illinois [Mr. MADDEN], announced when he reiterated throughout the country that hereafter the money spent here by Congress should benefit only the taxpayers in a certain part of the country east of the Mississippi and north of the Ohio Rivers, and that down South and West they should not get any benefit from it.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. JOHNSON of Washington. Talking right to this item, does not the gentleman think this is a poor year to be authorizing or causing the expenditure of $1,000,000 of our money for the purchase of mountain tops?

Mr. BLANTON. Why, yes. They are nothing but worthless mountain tops. The distinguished gentleman from Wyoming must come back in here from his private office, where he receives and entertains the big political magnates of the country so frequently, and help us to save this $1,000,000 from being wasted. We can not do it by ourselves. He and you have got to vote with us if it is saved. And he ought to stay in here long enough to try to get you to help vote down this $900,000 at least more than there ought to be in this item, as proposed by my amendment. What are you going to do about it, you men in the South and West? You men down in Kansas, who can not get even telegraphic market reports for your farmers—

though $400,000 is spent for others—what are you going to do? What are you going to say to your farmers south and west of Kansas City when they say, "Why can we not get telegraphic market reports as well as the farmers in Mr. MADDEN's district?" Are you going to say to them, "Oh, he is on the Republican steering committee and they spend the tax money up yonder. They handle your commodities, and you really pay the taxes on the prices they make you pay for what you use and wear; though you actually pay the taxes into the Treasury you can not get them to pay it out for you." That is the kind of an answer you have got to give them. I say it would be poor policy indeed on the part of my friends here to spend $1,000,000 for these mountain tops when we are facing a deficit of $3,000,000,000.

Mr. ANDERSON. I ask unanimous consent that all debate on this paragraph and all amendments thereto close in 15 minutes.

Mr. JOHNSON of Washington. Reserving the right to object, I desire to offer an amendment to strike out the paragraph.

The CHAIRMAN. The Chair will say to the gentleman from Washington that the paragraph is already out. The gentleman can accomplish the same purpose by voting against the amendment offered by the gentleman from Minnesota.

Mr. ANDERSON. I move that all debate on this paragraph and all amendments thereto close now.

The motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. BLANTON].

The question was taken; and on a division (demanded by Mr. BLANTON) there were 18 ayes and 35 noes.

So the amendment was rejected.

Mr. McCLINTIC. Mr. Chairman, I suggest the absence of a quorum.

The CHAIRMAN. The gentleman from Oklahoma makes the point of order that no quorum is present. The Chair will count. [After counting.] One hundred and twenty-two Members present, a quorum. The question is on the amendment offered by the gentleman from Minnesota.

The question was taken; and on a division (demanded by Mr. ANDERSON) there were 42 ayes and 41 noes.

Mr. BLANTON and Mr. JOHNSON of Washington demanded tellers.

Tellers were ordered; and the Chair appointed as tellers Mr. ANDERSON and Mr. JOHNSON of Washington.

The committee again divided; and the tellers reported that there were 61 ayes and 46 noes.

So the amendment was agreed to.

The Clerk read as follows:

Northern Pacific land grant reconnaissance: For the examination and appraisal of lands within the primary and indemnity limits of the land grant made July 2, 1862 (13 Stat. L., p. 365), to the Northern Pacific Railroad Co. and of such other lands within the said limits as may be necessary to obtain complete information regarding the equitable basis upon which claim is made by said company of the right to select under the said grant approximately 3,000,000 acres of land now included within national forests of Montana, Idaho, and Washington, and for a report to Congress upon the premises and a recommendation of some practicable plan of adjustment, $30,000, to be available until expended.

Mr. HAUGEN. Mr. Chairman, I make a point of order against the paragraph—that is legislation not authorized by law.

The CHAIRMAN. Does the gentleman from Minnesota desire to be heard on the point of order?

Mr. ANDERSON. I do not care to be heard.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

Experiments and demonstrations in live-stock production in the cane-sugar and cotton districts of the United States: To enable the Secretary of Agriculture, in cooperation with the authorities of the States concerned, or with individuals, to make such investigations and demonstrations as may be necessary in connection with the development of live-stock production in the cane-sugar and cotton districts of the United States, including the erection of barns and other necessary buildings, and the employment of persons and means in the city of Washington and elsewhere, $51,500.

Mr. FESS. Mr. Chairman, I move to strike out the paragraph.

Mr. HAUGEN. I make the point of order against lines 11 and 12 for the erection of a barn and other necessary buildings.

Mr. ANDERSON. I concede the point of order on that language.

The CHAIRMAN. The point of order is sustained.

Mr. ANDERSON. Does the Chair understand that the remaining part of the paragraph stays in?

The CHAIRMAN. That is the understanding of the Chair.

Mr. FESS. I make the point of order on the full paragraph because of the language which the Chair has held subject to the point of order.

The CHAIRMAN. On what ground?

Mr. FESS. On the language read by the gentleman from Iowa, providing for the erection of buildings which are not authorized by law. If it were for the repair of the buildings, I would not object, but since that is subject to the point of order it goes to the whole paragraph if insisted upon.

The CHAIRMAN. The point of order was made by the gentleman from Iowa against certain specific words in the paragraph, and that point of order has been sustained. The Chair feels that the point of order made by the gentleman from Ohio is too late.

Mr. FESS. Mr. Chairman, if the Chair has thus ruled——

The CHAIRMAN. The Chair has so ruled.

Mr. BLANTON. Mr. Chairman, a point of order. It is a precedent of this House that where a part of a paragraph goes out on a point of order it makes the whole paragraph subject to the point of order. I think the Chair should reflect before he overturns the precedents of the House.

Mr. WALSH. Mr. Chairman, under the precedents, if a point of order is made to certain language in a paragraph, and the point of order sustained to that language, if a Member rises and makes the point of order to the entire paragraph, is it not the fact that because of that language the entire paragraph goes out, even though the previous point of order has been sustained?

The CHAIRMAN. It would seem to the Chair that is correct. The Chair feels that where a point of order is made and sustained against specific words, that only those words go out, unless the objection was leveled against the whole paragraph on account of those words. The Chair was under the impression that the gentleman from Ohio [Mr. FESS] had already begun debate upon his motion to strike out the last word before he made the point of order against the paragraph.

Mr. FESS. I made the point of order when the gentleman from Iowa limited the point of order which he made to the specific language. I applied it to the entire paragraph.

The CHAIRMAN. And the gentleman now makes the point of order against the entire paragraph.

Mr. FESS. I do.

The CHAIRMAN. Does the gentleman from Minnesota desire to be heard on the point of order?

Mr. ANDERSON. No; but it does not seem to me that even though the Chair has ruled on the question, that being the only question raised at the time in respect to the language including the erection of buildings, and that language having gone out, that the rest of the paragraph is subject to the point of order, but it does not make any difference. I want to make some progress on the bill.

Mr. HAUGEN. The gentleman has not been so exceedingly anxious about passing the bill except when he reaches a paragraph that is clearly subject to the point of order. As I understand it, after the Chair has ruled on one point of order it is in order for the gentleman to renew the point of order.

Mr. ANDERSON. There is nothing left on which to make the point of order after the language has gone out.

Mr. HAUGEN. If the gentleman from Ohio desires to make it, he has the right under the rules of this House.

The CHAIRMAN. The Chair sustains the point of order made by the gentleman from Ohio, and the Clerk will read.

The Clerk read as follows:

Experiments and demonstrations in live-stock production in the cane-sugar and cotton districts of the United States: To enable the Secretary of Agriculture, in cooperation with the authorities of the States concerned, or with individuals, to make such investigations and demonstrations as may be necessary in connection with the development of live-stock production in the cane-sugar and cotton districts of the United States, including the employment of persons and means in the city of Washington and elsewhere, $51,500.

Mr. WALSH. Mr. Chairman, I reserve the point of order.

Mr. ANDERSON. Let us have the point of order determined.

Mr. WALSH. I make the point of order on the paragraph, on the ground that there is no authorization for the employment of persons and means in the city of Washington and elsewhere.

Mr. ANDERSON. If there is not, Mr. Chairman, then the Government better go out of business.

Mr. WALSH. They better go out of this business, I think.

Mr. BLANTON. I think so, too.

Mr. ANDERSON. I am glad to see the gentleman from Massachusetts [Mr. WALSH] and the gentleman from Texas [Mr. BLANTON] in such fine accord this evening.

Mr. BLANTON. Oh, we can work in double harness fine. [Laughter.]

The CHAIRMAN. Does the gentleman from Minnesota desire to be heard?

Mr. ANDERSON. I suggest that the Secretary of Agriculture, as the Chair has already ruled, has general authority

to employ persons in the District of Columbia and elsewhere, under the organic act. As to the remainder of the paragraph, it is clearly for investigations, experiments, and demonstrations that are within the general authority of the department.

Mr. GREEN of Iowa. Mr. Chairman, if I may be heard for just a moment, I would suggest that the words which are objected to would authorize the Secretary to employ these persons and use these means for any purpose whatever. It is not limited to the purposes described in the preceding part of the paragraph, which are confined to agricultural purposes. The Secretary could employ them for any purpose.

Mr. ANDERSON. I have nothing further to say on the point of order.

The CHAIRMAN. In view of the law which provides that no person shall be employed in Washington or paid out of a lump-sum appropriation unless specifically provided for in an appropriation bill, the Chair must sustain the point of order.

Mr. ANDERSON. Mr. Chairman, I offer the amendment which I send to the desk and ask to have read.

The Clerk read as follows:

Page 79, after line 3, insert: "Experiments and demonstrations in live-stock production in the cane-sugar and cotton districts of the United States: To enable the Secretary of Agriculture, in cooperation with the authorities of the States concerned, or with individuals, to make such investigations and demonstrations as may be necessary in connection with the development of live-stock production in the cane-sugar and cotton districts of the United States, $51,500."

Mr. WALSH. Mr. Chairman, I make the point of order against the paragraph upon the ground that there is no authority of law to conduct experiments and investigations in live-stock production in the cane-sugar or cotton districts of the United States, or to expend money in cooperation with the authorities of the States concerned, or with individuals.

Mr. ANDERSON. Mr. Chairman, of course if the attitude which the gentleman from Massachusetts [Mr. WALSH] is now taking is sustained, it will never be possible for Congress to appropriate for any specific purpose in any particular way. All we will be able to do will be to say for investigations and demonstrations, so much money. We will never be able to say whether they shall be in the cotton-raising district of the South or elsewhere. The language "in cooperation with the authorities of the States concerned" is simply descriptive; it is not legislative. It describes the work that is being done. Certainly we have authority to put into the language of appropriation bills such words as will describe the character of work which we desire to have done.

The CHAIRMAN. Where is the authorization for this provision?

Mr. ANDERSON. I think there is no authorization except such as is contained in the organic act of the department. Of course, these gentlemen who are making these points of order have no information at all as to what is done under this paragraph or what will be affected by striking them out. However, that has nothing to do with the point of order.

Mr. FESS. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. In just a moment. As the Chair well knows, the organic act provides that there shall be at the seat of government a Department of Agriculture, the duties of which shall be to acquire and diffuse among the people of the United States useful information on subjects connected with agriculture in the most general and comprehensive sense of that word, and to procure, propagate, and distribute among the people new and valuable seeds and plants.

In addition, the act provides:

That the Commissioner of Agriculture shall procure and preserve all information concerning agriculture which he can obtain by means of books and correspondence, and by practical and scientific experiments, accurate records of which experiments shall be kept in his office by the collection of statistics and by other appropriate means within his power.

It is clearly contemplated under this language that investigations and demonstrations shall be made for the object and purpose of acquiring and diffusing information on agricultural subjects throughout the United States.

Mr. MADDEN. Will the gentleman from Minnesota yield?

Mr. ANDERSON. I will.

Mr. MADDEN. Does the gentleman from Minnesota recall when the Underwood tariff law was enacted?

Mr. ANDERSON. Yes.

Mr. MADDEN. I suppose he recollects that when that law was passed it put the cane-sugar business of Louisiana out of existence?

Mr. ANDERSON. Yes.

Mr. MADDEN. And Representative Broussard, of Louisiana, later United States Senator, insisted if the sugar business was going out of existence as the result of the Underwood tariff bill, there ought to be some provision made that would enable the people who owned farms in that section of the country to make a livelihood, and this provision was put in the bill because of the provision in the Underwood bill at that time?

Mr. WALSH. Is that the authority for it?

Mr. HAUGEN. Now that we are to have a new tariff bill, it will not be necessary to have an appropriation.

Mr. JOHNSON of Washington. And also because Mr. Palmer put the sugar business back again.

The CHAIRMAN. The Chair feels that under the organic law creating the Department of Agriculture, which is a very broad and comprehensive one, there is authority for these investigations. The Chair therefore overrules the point of order.

The question is on the amendment offered by the gentleman from Minnesota [Mr. ANDERSON].

Mr. ANDERSON. Mr. Chairman, I should like to be heard on the amendment for just a moment.

The CHAIRMAN. The gentleman is recognized.

Mr. ANDERSON. As the gentleman from Illinois [Mr. MADDEN] has indicated, the work that is being done under this paragraph is the outgrowth of the situation created in Louisiana and States immediately contiguous thereto by the Underwood tariff law. As everyone knows, that was a sugar-cane growing country, and it was necessarily the result of the necessity growing out of the sugar-cane situation—which was not, however, as acute as it was thought to be—to attempt to develop in the great coastal-plain regions of the South the live-stock industry, and for that purpose the station has been established at Iberia, La. We have spent on the station in the erection of buildings some $49,000. We have on the farm to-day some 34 dairy cows, 134 beef cows, 30 horses, and some other animals. The whole question here is whether, having this experimental station, which is very, very necessary to the South, we are going to operate and maintain it.

Mr. FESS. I will state to the gentleman that I made the motion to strike out the paragraph originally in order to get at whether we needed to continue this work, and I want to call to the gentleman's attention that the free schedule was not to take effect until 1916, and in 1916 the war was on and the sugar crop, of course, did not suffer. We started this in 1914 with an appropriation of $60,000, and here is an appropriation in 1920 of $51,000. Are we going to continue the experimentation along the same line indefinitely?

Mr. ANDERSON. I think so, I will answer the gentleman frankly. If the gentleman asks me, I think that the future development of the live-stock industry of the United States lies in the great coastal plains of the Southern States, but before that development can occur there must be such experimentation as will develop the suitable grasses and forage for the animals and suitable methods of management, considering the climatic and weather conditions.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAUGEN. Mr. Chairman, I desire to ask the gentleman a question.

The CHAIRMAN. The gentleman must get unanimous consent.

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent to speak for three additional minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. HAUGEN. Will the gentleman from Minnesota yield?

Mr. ANDERSON. Yes.

Mr. HAUGEN. Has the Government acquired title to the land?

Mr. ANDERSON. I understand so. I could not say as to that.

Mr. HAUGEN. Can the gentleman state positively that they have?

Mr. ANDERSON. I think the testimony was to the effect that we had 350 acres of land there. Whether it is owned by the Government or not, I do not know.

Mr. HAUGEN. We ought to know.

Mr. MARTIN. I want to say to the gentleman, in addition to what he said about this experiment in cattle raising, that down there they are using the tops of the cane, a by-product, for the purpose of experiment in the raising of cattle. It has been a great success and has very much encouraged the raising of cattle in that section. I think it would be a great calamity to that portion of the South to do away with the station.

Mr. WALSH. How much cooperation has there been under this appropriation heretofore?

Mr. ANDERSON. I understand there is cooperation with the State college of Louisiana.

Mr. WALSH. They furnish the experts that are employed and paid for out of the Government Treasury?

Mr. ANDERSON. I think they have some regulation of the farm.

The CHAIRMAN. The time of the gentleman from Minnesota has expired. The question is on agreeing to the amendment.

Mr. GREEN of Iowa rose.

The CHAIRMAN. For what purpose does the gentleman from Iowa rise?

Mr. GREEN of Iowa. To oppose the amendment.

The CHAIRMAN. The gentleman from Iowa is recognized.

Mr. GREEN of Iowa. Mr. Chairman, I am unable to understand the purpose and object of this amendment and why it is necessary for the Government to spend money to ascertain whether cattle may be raised in Louisiana. All of us know they can. As to the best way of raising them, the farmers down there can try it; but why the Government should spend money, particularly in that region and in no other, in this manner I am at a loss to understand. The beet-sugar producers feed a portion of their product to their cattle, but I have never heard of the Government making experiments of that kind to see if it would be profitable to feed waste beet pulp to cattle.

Mr. ANDERSON. That sort of experiment has been made.

Mr. GREEN of Iowa. When?

Mr. ANDERSON. Oh, several times in past years.

Mr. GREEN of Iowa. Oh, they fed waste beet pulp to cattle before the Department of Agriculture was ever instituted.

Mr. ANDERSON. That may be so, but they did not know what the effect was on the cattle.

Mr. GREEN of Iowa. They did not?

Mr. ANDERSON. No.

Mr. GREEN of Iowa. They were a very peculiar sort of cattlemen if they did not.

Mr. BLANTON. The gentleman's party has just voted a million dollars into this bill to buy worthless mountain tops.

Mr. GREEN of Iowa. The gentleman is mistaken as to the gentleman's party. A large majority of the votes in support of that amendment came from the other side. I observe that gentlemen on the other side are quite willing that this bill or any other bill should be increased in amount and that the appropriations should be made much larger.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Experiments in dairying and live-stock production in semiarid and irrigated districts of the western United States: To enable the Secretary of Agriculture to conduct investigations and experiments in problems connected with the establishment of dairying and meat-production enterprises on the semiarid and irrigated lands of the western United States, including the purchase of live stock, and the employment of necessary persons and means in the city of Washington and elsewhere, $40,000.

Mr. WALSH. Mr. Chairman, I reserve a point of order on the paragraph.

The CHAIRMAN. The gentleman from Massachusetts reserves a point of order on the paragraph.

Mr. WALSH. How many head of live stock have already been purchased under the item beginning on line 15 of page 79?

Mr. ANDERSON. I am unable to say. I do not know. There are, I will say, five or six of these stations. It is quite impossible to go into what has been done at every one of them, or attempt to say how many cattle they have, and how many horses they have, and how many sheep they have, especially in a short session.

Mr. CHINDBLOM. And some hogs? [Laughter.]

Mr. WALSH. Does the gentleman know that there is a necessity for purchasing some more?

Mr. ANDERSON. They sell these cattle from time to time, and they have to purchase others for the experiments. That is the reason for the language.

Mr. WALSH. Mr. Chairman, I withdraw the reservation.

The CHAIRMAN. The reservation of the point of order is withdrawn. The Clerk will read.

The Clerk read as follows:

Passenger-carrying vehicles: That not to exceed $90,000 of the lump-sum appropriations herein made for the Department of Agriculture shall be available for the purchase, maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles necessary in the conduct of the field work of the Department of Agriculture outside the District of Columbia: *Provided*, That not to exceed $15,000 of this amount shall be expended for the purchase of such vehicles, and that such vehicles shall be used only for official service outside the District of Columbia, but this shall not prevent the continued use for official service of motor trucks in the District of Columbia: *Provided further*, That the Secretary of Agriculture shall, on the first day of each regular session of Congress, make a report to Congress showing the amount expended under the provisions of this paragraph during the preceding fiscal year.

Mr. WALSH. Mr. Chairman, I make a point of order upon the paragraph.

The CHAIRMAN. Upon what ground?

Mr. WALSH. That this is legislation and a change of existing law, and not authorized by any law heretofore enacted.

There is a difference between providing an appropriation made under lump-sum items that shall be available for certain purposes and providing that of appropriations made not more than a certain amount shall be used for a certain purpose. But this, if I understand the language, applies to every lump-sum appropriation that has been made in this bill, and provides that $90,000 of them may be set apart and can be used for the purchase, maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles, and there is no authority for the purchase of motor vehicles, particularly in a number of projects that are appropriated for under the lump-sum system in this bill. We are going to put the Department of Agriculture on wheels, apparently, and the amount so used will decrease appreciably the lump-sum appropriations heretofore made.

Mr. ANDERSON. Mr. Chairman, to save time I will concede the point of order.

The CHAIRMAN. The point of order is sustained.

Mr. ANDERSON. Mr. Chairman, I offer an amendment.

Mr. CARTER. Mr. Chairman, I would like to be heard on the point of order.

The CHAIRMAN. The point of order has been decided, but the Chair will hear the gentleman.

Mr. CARTER. The Chair will note that this is only an allocation in an appropriation. On two occasions, once in 1915 and again last week, the gentleman presiding over the House ruled that a similar provision in the Indian appropriation bill was in order. I think the gentleman from Ohio [Mr. FESS] was in the chair.

The CHAIRMAN. The Chair will quote to the gentleman from Oklahoma a provision enacted in the Sixty-third Congress, as follows:

No appropriation made in this or any other act shall be available for the purchase of any horse-drawn or passenger-carrying vehicle for the service of any executive department or any Government establishment or any branch of the Government service unless specific authority is given therefor.

Mr. CARTER. Yes. That was presented to the Chair on both occasions, both last week and on the occasion in 1915, and the Chair on both occasions held that this was an allocation and not an appropriation, and therefore overruled the point of order.

The CHAIRMAN. Will the gentleman permit the Chair to ask him a question?

Mr. CARTER. Yes, sir.

The CHAIRMAN. In view of the law just cited, does not this proviso in the bill make this legislation on an appropriation bill?

Mr. CARTER. I must confess that I was not in full accord with those two rulings, but I thought it nothing but fair to call the attention of the Chair to the rulings.

The CHAIRMAN. The Chair is glad to know that the gentleman from Oklahoma agrees with the present occupant of the chair.

Mr. CARTER. The House having reversed me, there was nothing left but to accept the decision of the House.

Mr. BLANTON. The Chair does not want to set two bad precedents to the committee.

Mr. CARTER. Two have been set already.

Mr. BLANTON. It is time to get back to the proper rulings.

Mr. LONGWORTH. I suggest to the Chair that this is really an appropriation, not a mere allocation. It is an appropriation for the purpose of the purchase, operation, and repair of these motor-propelled vehicles.

The CHAIRMAN. The Chair is clear in his own mind, but he thought he would extend the courtesy to the gentleman from Oklahoma [Mr. CARTER] to allow him to make a statement, if he saw fit.

Mr. CARTER. I just wanted to call the attention of the Chair to these two decisions; that was all. I did not fully agree with them at the time they were made, but they are in the precedents.

The CHAIRMAN. Then the gentleman will agree with what the Chair is about to do now, because the Chair sustains the point of order.

Mr. HAUGEN. May we have the amendment read?

The CHAIRMAN. Without objection, the Clerk will again report the amendment of the gentleman from Minnesota [Mr. ANDERSON].

The Clerk read as follows:

Amendment offered by Mr. ANDERSON: Page 79, after line 23, insert: "Passenger-carrying vehicles: That not to exceed $90,000 of the lump-sum appropriations herein made for the Department of Agriculture shall be available for the maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles necessary in the con-

duct of the field work of the Department of Agriculture outside the District of Columbia: *Provided*, That the Secretary of Agriculture shall, on the first day of each regular session of Congress, make a report to Congress showing the amount expended under the provisions of this paragraph during the preceding fiscal year."

Mr. ANDERSON. That amendment simply conforms to existing law.

Mr. BLANTON. I make the point of order against the amendment.

The CHAIRMAN. The gentleman from Texas makes the point of order. Does the gentleman from Minnesota desire to be heard?

Mr. ANDERSON. This is purely an allocation of the appropriations heretofore made, for the operation, maintenance, and repair of automobiles and their equipment in the department, and I think it is in order.

Mr. BLANTON. I submit that this is a direct appropriation of $60,000 for this purpose.

Mr. ANDERSON. It makes no appropriation whatever.

The CHAIRMAN. How does the gentleman from Minnesota explain the proviso—

That the Secretary of Agriculture shall, on the first day of each regular session of Congress, make a report to Congress showing the amount expended under the provisions of this paragraph during the preceding fiscal year.

Is not that legislation?

Mr. ANDERSON. I presume it is, Mr. Chairman. If the gentleman from Texas does not wish to have that report made to Congress, I do not mind.

The CHAIRMAN. The Chair sustains the point of order.

Mr. ANDERSON. I offer the amendment with the proviso eliminated.

The CHAIRMAN. The gentleman from Minnesota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. ANDERSON: Page 79, after line 23, insert: Passenger-carrying vehicles: That not to exceed $60,000 of the lump-sum appropriations herein made for the Department of Agriculture shall be available for the maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles necessary in the conduct of the field work of the Department of Agriculture outside the District of Columbia.

Mr. BLANTON. I make the point of order that that is legislation on an appropriation bill. It certainly appropriates $60,000 for this purpose.

Mr. ANDERSON. It does not make any appropriation whatever. It simply makes available, in accordance with the law which the Chair has recited, certain appropriations already made for this purpose. It is done in conformity with the very law that the Chair has cited.

Mr. BLANTON. Suppose that it should provide that $60,000 out of the lump-sum appropriations already made should be expended in providing a skating park here in Washington. Would the gentleman contend that that was an allocation? If there was no law authorizing the establishment of a skating park, certainly the money could not be allocated in that way. It would become an appropriation for that purpose.

The CHAIRMAN. The Chair would like to suggest to the gentleman from Texas that he perhaps has overlooked the fact that the word "purchase" is not in this amendment.

Mr. BLANTON. I noticed that both times.

Mr. MADDEN. Mr. Chairman, the department has authority to operate motor vehicles, and this simply takes out of the appropriations that are provided in another section of this bill $60,000, out of which they are permitted to maintain and operate these vehicles. It is really a limitation on the appropriation which has already been made, and limits the amount which can be expended for this purpose. There can be no question about its being in order.

The CHAIRMAN. The Chair fails to see where this amendment appropriates any money. It provides for the purchase of no vehicles. It only provides for their repair, maintenance, and operation, and the Chair fails to see where this amendment is in violation of the rule. The Chair therefore overrules the point of order. The question is on the amendment offered by the gentleman from Minnesota [Mr. ANDERSON].

Mr. MOORE of Virginia. May I make this inquiry? Is it quite clear from the language of the amendment that the purchase of no vehicle is authorized?

The CHAIRMAN. Without objection, the Clerk will again report the amendment.

Mr. MOORE of Virginia. I make that inquiry for the reason that our attention has been frequently of late called to the fact that the Government of the United States probably owns as many motor-propelled vehicles as any agency in the world. We have not had any independent legislation dealing with that subject and making these vehicles available for use by the various departments; and if this amendment does contemplate the purchase of any vehicles, I propose to try to have added to it a provision that will require the Department of Agriculture to obtain from the War Department any motor-propelled vehicles that are available.

The CHAIRMAN. The Chair thinks if the gentleman will listen to the reading of the amendment he will see that it does not provide for the purchase of any motor-propelled vehicles. The Clerk will again report the amendment.

The amendment was again read.

The question being taken, the amendment was agreed to.

The Clerk read as follows:

That hereafter the Secretary of Agriculture may exchange motor-propelled and horse-drawn vehicles and used parts, accessories, tires, or equipment thereof, in whole or in part payment for new vehicles or parts, accessories, tires, or equipment of such vehicles, and shall, on the first day of each regular session of Congress, make a report to Congress for the fiscal year last closed showing each exchange made hereunder.

Mr. BLANTON. Mr. Chairman, I make the point of order against the paragraph.

Mr. ANDERSON. I concede the point of order.

The CHAIRMAN. The gentleman from Texas makes the point of order against the paragraph, and the Chair sustains the point of order.

The Clerk read as follows:

Eradication of the Pariatoria date scale: To enable the Secretary of Agriculture to meet the emergency caused by the existence of the Pariatoria date scale in California, Arizona, or any other State, and to provide means for the extermination of this insect in California, Arizona, or elsewhere in the United States, in cooperation with the States concerned, $15,000, of which $5,000 shall be immediately available.

Mr. WALSH. Mr. Chairman, I reserve a point of order on the paragraph.

Mr. Chairman, I withdraw my reservation of the point of order.

The Clerk read as follows:

Control and prevention of spread of the Mexican bean beetle: To enable the Secretary of Agriculture to meet the emergency caused by the recent introduction and rapid multiplication of the Mexican bean beetle in the State of Alabama and to provide means for the control and prevention of the spread of this insect in that State and to other States, in cooperation with the State of Alabama and other States concerned and with individuals affected, including the employment of persons and means in the city of Washington and elsewhere, and all other necessary expenses, $100,000, of which sum $25,000 shall be immediately available.

Mr. HUDDLESTON. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 84, line 15, after the words "and to provide means for the," insert the words "study and experimentation in eradication, and for the."

Mr. HUDDLESTON. Mr. Chairman, the paragraph will then read:

To enable the Secretary of Agriculture to meet the emergency caused by the recent introduction and rapid multiplication of the Mexican bean beetle in the State of Alabama and to provide means for the study and experimentation in eradication, and for the control and prevention of the spread of this insect in that State and to other States, in cooperation with the State of Alabama and other States concerned and with individuals affected.

Mr. ANDERSON. Mr. Chairman, I do not object to the gentleman's amendment; it is provided for in the paragraph, anyway.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alabama.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Hereafter, if any employee of the Department of Agriculture assigned to permanent duty in Alaska, Hawaii, Porto Rico, Guam, or the Virgin Islands shall elect to postpone taking any or all of the annual leave to which he may be entitled, he may, in the discretion of the Secretary of Agriculture, subject to the interests of the public service, be allowed to take at one time in any calendar year unused annual leave which may have accumulated within not to exceed four calendar years immediately preceding and be paid at the rates prevailing during the year such leave has accumulated.

Mr. HAUGEN. Mr. Chairman, I make a point of order on the paragraph that it is legislation on an appropriation bill.

Mr. ANDERSON. I concede the point of order.

The CHAIRMAN. The Chair sustains the point of order, and the Clerk will read.

The Clerk read as follows:

Not to exceed $2,500 in all from the lump-sum appropriations provided by this act may be used for the purchase, for official use, of reprints of articles contributed by the various branches of the department to scientific, technical, and trade journals.

Mr. HAUGEN. Mr. Chairman, I make the point of order against the paragraph on the ground that it is legislation on an appropriation bill not authorized by law.

The CHAIRMAN. Does the gentleman from Minnesota desire to be heard?

Mr. ANDERSON. I do not.

UMI

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

The maximum salary of any scientific investigator, or other employee engaged in scientific work and paid from the general appropriations of the Department of Agriculture, shall not exceed at the rate of $5,000 per annum: *Provided*, That not more than 10 such employees shall receive salaries in excess of $4,500.

Mr. HAUGEN. Mr. Chairman, I make the point of order on the paragraph on the ground that it is an increase in the salaries not authorized by law.

Mr. ANDERSON. I concede the point of order.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

Total for the Department of Agriculture, $33,517,459.

Mr. WASON. Mr. Chairman, I move to strike out the last word. Having concluded the consideration of the bill in Committee of the Whole, the members of the committee which has reported it feel that they have been treated courteously and probably justly by the House.

This subcommittee will probably not be before you again with the same personnel, as one of our members, the gentleman from Missouri [Mr. RUBEY], leaves Congress on the 4th of March next. He has served here with you all for a period of 10 years, representing his district ably and well. During his term of service he has been a member of the Committee on Agriculture and during this session a member of the subcommittee of the Committee on Appropriations having in charge the Agricultural appropriation bill. For two years during my term of office here I served on the Committee on Agriculture with the gentleman and during this session I have again been associated with him. The chairman of this subcommittee, the gentleman from Minnesota [Mr. ANDERSON] has served with the gentleman from Missouri during his entire membership in the House on the Committee on Agriculture and knows him and knows his work better than I. We both desire to suggest to the membership of the House that the gentleman from Missouri, soon to leave us and return to his home in Missouri, to the people with whom he has grown up, who have honored him, and whom in his service he has honored, goes with the good wishes of the membership of the committees upon which he has served. Personally I desire to say to him and to his constituents that we shall miss him here, and I believe that they will miss his untiring efforts and his earnest work during his term in behalf of the progress of agriculture nation wide. [Applause.]

Mr. HAUGEN. Mr. Chairman, I wish to say that I heartily concur in the sentiment expressed by the distinguished gentleman from New Hampshire [Mr. WASON] in respect to the gentleman from Missouri, Gov. RUBEY. It has been my pleasure to serve with the gentleman from Missouri for a number of years. I know that he has pursued his duty with fidelity, with rectitude of purpose, and that he has always been dominated by noble and lofty ideals and a firm determination to do justice and right by all. We regret exceedingly that he is not to be with us longer. Our committee and the House will lose a valuable Member, who will be truly missed.

Mr. ANDERSON. Mr. Chairman, I am very glad to concur in what both the gentleman from New Hampshire [Mr. WASON] and the gentleman from Iowa [Mr. HAUGEN] have said respecting the gentleman from Missouri [Mr. RUBEY]. I wish also to take advantage of the opportunity to thank the Members of the House for their very splendid cooperation in getting this bill this far.

I move that the committee do now rise and report the bill to the House with the amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HICKS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 15812, the Agricultural appropriation bill, and had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. ANDERSON. Mr. Speaker, I move the previous question on the bill and amendments to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment?

Mr. JOHNSON of Washington. Mr. Speaker, I demand a separate vote upon the amendment on page 78, by which the matter originally contained in the bill was stricken out on a point of order and was reintroduced carrying an appropriation of $1,000,000 for the purchase of certain lands.

Mr. BLANTON. Mr. Speaker, I demand a separate vote upon the $360,000 free-seed item, known as the Langley amendment.

Mr. McCLINTIC. Mr. Speaker, I demand a separate vote on each amendment, in its order.

The SPEAKER. The gentleman from Oklahoma demands a separate vote on all amendments. The Clerk will report the amendments.

The Clerk read as follows:

Page 3, line 18, at the beginning of the line, insert the word "office."

The amendment was agreed to.

The Clerk read as follows:

Page 3, line 19, after the word "salaries," insert the word "office."

The amendment was agreed to.

The Clerk read as follows:

Page 3, line 20, after the words "chief of," insert the word "office."

The amendment was agreed to.

The Clerk read as follows:

Page 4, line 5, after the word "expenses," insert the word "office."

The amendment was agreed to.

The Clerk read as follows:

Page 4, line 16, after the words "total for," insert the word "office."

The amendment was agreed to.

The Clerk read as follows:

Page 7, line 23, after the figures "$1,300,110," insert a comma and add: "including not to exceed $697,080 for salaries, $129,040 for special observations and reports, and $295,750 for telegraphing and telephoning."

The amendment was agreed to.

The Clerk read as follows:

Page 11, line 20, after the figures "$1,978,800," substitute a comma for the colon and insert: "of which $978,000 shall be set aside for administrative and operating expenses, and $1,000,000 for the payment of indemnities."

The amendment was agreed to.

The Clerk read as follows:

Page 22, line 19, strike out "$30,000" and insert "$32,000."

The amendment was agreed to.

The Clerk read as follows:

Page 25, after line 22, insert a new paragraph as follows:

"Purchase and distribution of valuable seeds: For purchase, propagation, testing, and congressional distribution of valuable seeds, bulbs, trees, shrubs, vines, cuttings, and plants; all necessary office fixtures and supplies, fuel, transportation, paper, twine, gum, postal cards, gas, electric current, rent outside of the District of Columbia, official traveling expenses, and all necessary material and repairs for putting up and distributing the same; for repairs and the employment of local and special agents, clerks, assistants, and other labor required, in the city of Washington and elsewhere, $360,000. And the Secretary of Agriculture is hereby directed to expend the said sum, as nearly as practicable, in the purchase, testing, and distribution of such valuable seeds, bulbs, shrubs, vines, cuttings, and plants, the best he can obtain at public or private sale, and such as shall be suitable for the respective localities to which the same are to be apportioned, and in which same are to be distributed as hereinafter stated; and such seeds so purchased shall include a variety of vegetable and flower seeds suitable for planting and culture in the various sections of the United States: *Provided*, That the Secretary of Agriculture, after due advertisement and on competitive bids, is authorized to award the contract for the supplying of printed packets and envelopes and the packeting, assembling, and mailing of the seeds, bulbs, shrubs, vines, cuttings, and plants, or any part thereof, for a period of not more than five years nor less than one year, if by such action he can best protect the interests of the United States. An equal proportion of five-sixths of all seeds, bulbs, shrubs, vines, cuttings, and plants shall, upon their request, after due notification by the Secretary of Agriculture that the allotment to their respective districts is ready for distribution, be supplied to Senators, Representatives, and Delegates in Congress for distribution among their constituents, or mailed by the department upon the receipt of their addressed franks, in packages of such weight as the Secretary of Agriculture and the Postmaster General may jointly determine: *Provided, however*, That upon each envelope or wrapper containing packages of seeds the contents thereof shall be plainly indicated, and the Secretary shall not distribute to any Senator, Representative, or Delegate seeds entirely unfit for the climate and locality he represents, but shall distribute the same so that each Member may have seeds of equal value, as near as may be, and the best adapted to the locality he represents: *Provided also*, That the seeds allotted to Senators and Representatives for distribution in the districts embraced within the twenty-fifth and thirty-fourth parallels of latitude shall be ready for delivery not later than the 10th day of January: *Provided also*, That any portion of the allotments to Senators, Representatives, and Delegates in Congress remaining unmailed for on the 1st day of April shall be distributed by the Secretary of Agriculture, giving preference to those persons whose names and addresses have been furnished by Senators and Representatives in Congress and who have not before during the same season been supplied by the department: *And provided also*, That the Secretary shall report, as provided in this act, the place, quantity and price of seeds purchased, and the date of purchase; but nothing in this paragraph shall be construed to prevent the Secretary of Agriculture from sending seeds to those who apply for the same. And the amount herein appropriated shall not be diverted or used for any other purpose but for the purchase, testing, propagation, and distribution of valuable seeds, bulbs, mulberry and other rare and valuable trees, shrubs, vines, cuttings, and plants."

The SPEAKER. The question is on agreeing to the amendment.

The question was taken, and the Speaker announced that the noes seemed to have it.

Mr. ANDERSON and Mr. LANGLEY demanded a division.

The House divided; and there were—ayes 60, noes 69.

Mr. McCLINTIC. Mr. Speaker, I demand the yeas and nays.

Mr. LANGLEY. Mr. Speaker, I make the point of order there is no quorum present.

Mr. BLANTON. I make the point of order that the point comes too late, Mr. Speaker, inasmuch as business has intervened.

The SPEAKER. Doubtless no quorum is present. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absent Members. As many as are in favor of agreeing to the amendment will, as their names are called, answer "yea," and those opposed will answer "nay," and the Clerk will call the roll.

The question was taken; and there were—yeas 141, nays 142, answered "present" 2, not voting 144, as follows:

Mr. CLARK of Florida. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. CLARK of Florida. I want to ask who is the leader on the Democratic side at the present time?

The SPEAKER. The gentleman is out of order. That is not a parliamentary inquiry.

The Clerk announced the following pairs:

On the vote:

Mr. PATTERSON (for) with Mr. ACKERMAN (against).

Mr. GRIEST (for) with Mr. BUTLER (against).

Mr. ROBINSON of North Carolina (for) with Mr. DALLINGER (against).

Until further notice:

Mr. GRAHAM of Pennsylvania with Mr. STEELE.

Mr. NELSON of Wisconsin with Mr. KITCHIN.

Mr. FULLER with Mr. DONOVAN.

Mr. KINKAID with Mr. LESHER.

Mr. YATES with Mr. AYRES.

Mr. GOODYKOONTZ with Mr. MAHER.

Mr. MASON with Mr. IGOE.

Mr. COSTELLO with Mr. EVANS of Nevada.

Mr. HAYES with Mr. GOLDFOGLE.

Mr. RHODES with Mr. MAJOR.

Mr. SCHALL with Mr. HOEY.

Mr. JEFFERIS with Mr. HARRISON.

Mr. HERSEY with Mr. GALLAGHER.

Mr. FISH with Mr. McLANE.

Mr. VOLK with Mr. SIMS.

Mr. SMITH of Illinois with Mr. KETTNER.

Mr. McCULLOCH with Mr. BELL.

Mr. GRAHAM of Illinois with Mr. BEE.

Mr. GREENE of Massachusetts with Mr. CAREW.

Mr. KENNEDY of Iowa with Mr. SCULLY.

Mr. REAVIS with Mr. GALLIVAN.

Mr. WOODYARD with Mr. POU.

Mr. CAMPBELL of Kansas with Mr. CULLEN.

Mr. VARE with Mr. CASEY.

Mr. FREEMAN with Mr. SULLIVAN.

Mr. MacGREGOR with Mr. BABKA.

Mr. HAUGEN with Mr. KINCHELOE.

Mr. NEWTON of Minnesota with Mr. O'CONNELL.

Mr. WARD with Mr. MILLIGAN.

Mr. HULINGS with Mr. CANTRILL.

Mr. ANTHONY with Mr. DENT.

Mr. REED of West Virginia with Mr. OLNEY.

Mr. WILSON of Illinois with Mr. WISE.

Mr. SWOPE with Mr. RIORDAN.

Mr. MANN of Illinois with Mr. HENRY T. RAINEY.

Mr. KELLY of Pennsylvania with Mr. MEAD.

Mr. WOOD of Indiana with Mr. LONERGAN.

Mr. ROWE with Mr. UPSHAW.

Mr. TINKHAM with Mr. TAGUE.

Mr. WEBSTER with Mr. JAMES of Virginia.

Mr. LUHRING with Mr. McKINIRY.

Mr. RODENBERG with Mr. DOOLING.

Mr. BAER with Mr. STEPHENS of Mississippi.

Mr. SANDERS of Indiana with Mr. CLEARY.

Mr. HILL with Mr. GANLY.

Mr. PETERS with Mr. WHALEY.

Mr. SMITH of Michigan with Mr. SMITH of New York.

Mr. MUDD with Mr. BLACKMON.

Mr. BRITTEN with Mr. CALDWELL.

Mr. GLYNN with Mr. MANN of South Carolina.

Mr. STINESS with Mr. RUCKER.
Mr. SIEGEL with Mr. SABATH.
Mr. COPLEY with Mr. DOREMUS.
Mr. NOLAN with Mr. MOONEY.
Mr. SANFORD with Mr. ROMJUE.
Mr. HULL of Iowa with Mr. WELTY.
Mr. HAWLEY with Mr. ROWAN.
Mr. CRAGO with Mr. JOHN W. RAINEY.
Mr. LITTLE with Mr. OVERSTREET.
Mr. KAHN with Mr. MOON.
Mr. HUSTED with Mr. MCGLENNON.
Mr. JAMES of Michigan with Mr. DREWRY.
Mr. FORDNEY with Mr. JOHNSON of Kentucky.
Mr. DENISON with Mr. GOODWIN of Arkansas.
Mr. ELSTON with Mr. HAMILL.
Mr. KENNEDY of Rhode Island with Mr. GODWIN of North Carolina.
Mr. PORTER with Mr. BLAND of Missouri.
Mr. SINCLAIR with Mr. EVANS of Montana.

The SPEAKER. On this vote the yeas are 141, the nays 142, present 2. A quorum is present. The Doorkeeper will open the doors.

Mr. LANGLEY. Mr. Speaker, I did not hear the announcement, only the conclusion. I would like to know what the result was.

The SPEAKER. The "nays" have it.

Mr. LANGLEY. Mr. Speaker, in view of the closeness of the vote, I ask that there be a recapitulation in order to verify the vote.

The SPEAKER. The Chair thinks that is a reasonable request.

Mr. LANGLEY. I think it is a reasonable request.

The SPEAKER. The Clerk will recapitulate the vote.

The Clerk recapitulated the vote.

The SPEAKER. There is no change.

Mr. DYER. Mr. Speaker, I am recorded as having voted against seeds?

The SPEAKER. Yes.

Mr. DYER. I came into the Chamber while the roll was being called. I did not get exactly what the motion was about. May I change my vote?

The SPEAKER. The Chair does not think so, after the vote has been announced. The recapitulation, of course, is simply for the purpose of verifying the vote, and the Chair does not think it could be used as an engine for changing the vote.

Mr. LANGLEY. The gentleman has stated to the House that he did not understand the question.

The SPEAKER. That was his responsibility.

Mr. CLARK of Florida. If the gentleman voted under a misapprehension, he certainly has the right to change his vote.

Mr. DYER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. DYER. Is a motion in order to reconsider?

Mr. CLARK of Florida. Certainly.

The SPEAKER. The Chair thinks so.

Mr. DYER. I move to reconsider the vote.

The SPEAKER. The gentleman from Missouri moves to reconsider the vote.

Mr. WALSH. And I move to lay that motion on the table.

The SPEAKER. The gentleman from Massachusetts moves to lay that motion on the table. The question is on agreeing to that motion.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. LANGLEY. Mr. Speaker, I demand the yeas and nays on that.

The SPEAKER. The gentleman from Kentucky demands the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. As many as are in favor of the motion to lay on the table the motion to reconsider will answer "yea" when their names are called; those opposed will answer "nay."

Mr. LANGLEY. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. WALSH. Mr. Speaker, I demand the regular order.

Mr. LANGLEY. Mr. Speaker, my parliamentary inquiry is, Does a vote "yea" mean——

The SPEAKER. That is not a paliamentary inquiry. The Chair stated it clearly. If the gentleman had listened to the Chair he would know.

Mr. LANGLEY. There was so much confusion that I could not hear.

The SPEAKER. The Chair refuses to recognize the gentleman for a parliamentary inquiry. The Chair will again state the question as he stated it before. The question is on agreeing to the motion of the gentleman from Massachusetts to lay on the table the motion to reconsider. Those in favor of the motion of the gentleman from Massachusetts will answer "yea" when their names are called; those opposed will answer "nay." The Clerk will call the roll.

The question was taken; and there were—yeas 131, nays 131, answered "present" 5, not voting 162, as follows:

During the roll call the following colloquy occurred:

Mr. CLARK of Florida. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman can not interrupt the roll call.

Mr. CLARK of Florida. But, Mr. Speaker——

The SPEAKER. The gentleman knows that during a roll call nothing else is in order. Nobody can make a parliamentary inquiry during a roll call.

The Clerk resumed and completed the calling of the roll.

Mr. BLACK. Mr. Speaker, I voted yea. I am paired with the gentleman from Alabama, Mr. BANKHEAD, and so withdraw my vote and answer present.

The SPEAKER. The gentleman changes from yea to present.

Mr. HERSMAN. I voted yea, but am paired with the gentleman from Mississippi, Mr. HUMPHREYS, and I desire to withdraw that vote and to answer present.

The SPEAKER. The gentleman changes his vote from yea to present.

The Clerk announced the following additional pairs:

On the vote:

Mr. ACKERMAN (for) with Mr. PATTERSON (against).

Mr. BUTLER (for) with Mr. GRIEST (against).

Mr. DALLINGER (for) with Mr. ROBINSON of North Carolina (against).

Mr. MCANDREWS (for) with Mr. SANDERS of Louisiana (against).

Mr. HERSMAN (for) with Mr. HUMPHREYS (against).

Mr. HOLLAND (for) with Mr. JAMES of Virginia (against).

Mr. BLACK (for) with Mr. BANKHEAD (against).

Until further notice:

Mr. SNELL with Mr. CLARK of Missouri.

Mr. SNYDER with Mr. HOWARD.

Mr. STEENERSON with Mr. FLOOD.

Mr. MCKINLEY with Mr. GARD.

Mr. WEBSTER with Mr. JOHNSTON of New York.

Mr. JUUL with Mr. RAINEY of Alabama.

Mr. MCPHERSON with Mr. FERRIS.

Mr. KELLEY of Michigan with Mr. DEWALT.

Mr. COOPER with Mr. BENSON.

Mr. GOODALL with Mr. GANDY.

Mr. MCKENZIE with Mr. HULL of Tennessee.

Mr. LANGLEY. Mr. Speaker, in view of the closeness of this vote——

The SPEAKER. How does the gentleman know it is close? It has not been announced.

Mr. LANGLEY. I happen to know.

The SPEAKER. The Clerk will call my name.

The Clerk called the name of Mr. GILLETT, and he voted "yea."

The SPEAKER. On this vote the yeas are 131, and the nays are 131. The motion to lay on the table the motion to reconsider does not prevail. The question is on the motion of the gentleman from Missouri to reconsider.

The question being taken, the Speaker announced that he was in doubt.

Mr. LANGLEY. Mr. Speaker, I ask for the yeas and nays.

ADJOURNMENT.

Mr. CANNON. Mr. Speaker, before that is done, I think it is in order to move to adjourn at this time, is it not?

The SPEAKER. Of course it is in order.

Mr. CANNON. I move that the House do now adjourn.

The question was taken; and on a division (demanded by Mr. MCCLINTIC) there were—ayes 128, noes 51.

So the motion to adjourn was agreed to; accordingly (at 6 o'clock and 33 minutes p. m.) the House adjourned until Thursday, January 27, 1921, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

370. A letter from the Secretary of Commerce, transmitting reports of papers and documents not needed in the transaction of business and asking authority for the disposition of the same; to the Committee on Disposition of Useless Executive Papers.

371. A letter from the Public Printer, transmitting schedules of used papers not needed in the transaction of business and requesting authority for the disposition of the same; to the Committee on Disposition of Useless Executive Papers.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. HERNANDEZ, from the Committee on the Public Lands, to which was referred the bill (H. R. 14669) for the consolidation of forest lands in the Carson National Forest, N. Mex., and for other purposes, reported the same with amendments, accompanied by a report (No. 1236), which said bill and report were referred to the Committee of the Whole House on the State of the Union.

He also, from the Committee on Indian Affairs, to which was referred the bill (S. 3998) authorizing any tribes or bands of Indians of California to submit claims to the Court of Claims, reported the same with amendments, accompanied by a report (No. 1237), which said bill and report were referred to the Committee of the Whole House on the State of the Union.

Mr. KELLY of Pennsylvania, from the Committee on Indian Affairs, to which was referred the bill (S. 804) authorizing the Ponca Tribe of Indians in the States of Oklahoma and Nebraska to submit claims to the Court of Claims, reported the same with an amendment, accompanied by a report (No. 1239), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. WINSLOW, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 15836) to amend the transportation act, 1920, reported the same without amendment, accompanied by a report (No. 1243), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. WILLIAMS, from the Committee on the District of Columbia, to which was referred the bill (S. 4400) to amend an act entitled "An act to incorporate the Masonic Mutual Relief Association of the District of Columbia," approved March 3, 1869, as amended, reported the same without amendment, accompanied by a report (No. 1244), which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. SELLS, from the Committee on Pensions, to which was referred sundry bills of the House, reported in lieu thereof the bill (H. R. 15900) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, accompanied by a report (No. 1234), which said bill and report were referred to the Private Calendar.

Mr. FULLER, from the Committee on Invalid Pensions, to which was referred sundry bills of the House reported in lieu thereof the bill (H. R. 15901) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, accompanied by a report (No. 1235), which said bill and report were referred to the Private Calendar.

Mr. MILLER, from the Committee on Military Affairs, to which was referred the bill (S. 2614) for the relief of Francis M. Atherton, reported the same without amendment, accompanied by a report (No. 1238), which said bill and report were referred to the Private Calendar.

Mr. EDMONDS, from the Committee on Claims, to which was referred the bill (S. 1583) for the relief of Anna M. Tobin, independent executrix of the estate of Frank R. Tobin, deceased, reported the same with an amendment, accompanied by a report (No. 1240), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (S. 2554) for the relief of J. B. Waterman, reported the same with an amendment, accompanied by a report (No. 1241), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 13714) to refund certain duties paid by the Nash Motors Co., reported the same with an amendment, accompanied by a report (No. 1242), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. SELLS: A bill (H. R. 15900) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors; committed to the Committee of the Whole House and ordered to be printed.

By Mr. FULLER: A bill (H. R. 15901) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War, and certain widows and dependent children of soldiers and sailors of said war; committed to the Committee of the Whole House and ordered to be printed.

By Mr. MASON: A bill (H. R. 15902) to authorize the Secretary of the Treasury, the Secretary of War, and the Secretary of the Navy to rectify some of the evils of the courts-martial system, and the repayment of all courts-martial fines of misdemeanor grade, and for other purposes; to the Committee on Military Affairs.

By Mr. REAVIS: A bill (H. R. 15903) to authorize the Secretary of War to transfer certain material, machinery, and equipment to the Department of Agriculture; to the Committee on Military Affairs.

By Mr. STEVENSON: A bill (H. R. 15904) to fix compensation of officers of the National Army who incurred disability while in the service; to the Committee on Interstate and Foreign Commerce.

By Mr. PORTER: A bill (H. R. 15905) for the acquisition of embassy, legation, and consular buildings and grounds; to the Committee on Foreign Affairs.

By Mr. STEENERSON: A bill (H. R. 15906) to further reclassify postmasters and employees of the Postal Service and readjust their salaries and compensation on an equitable basis, and for other purposes; to the Committee on the Post Office and Post Roads.

By Mr. BRITTEN: A bill (H. R. 15907) to provide subsistence for members of the Naval Reserve Force, including officers who perform duty on vessels assigned for the training of Naval Reserves; to the Committee on Naval Affairs.

Also, a bill (H. R. 15908) to promote the efficiency of the Naval Establishment of the United States; to the Committee on Naval Affairs.

By Mr. TAYLOR of Colorado: Joint resolution (H. J. Res. 460) to change the name of the Grand River in Colorado and Utah to the Colorado River; to the Committee on Interstate and Foreign Commerce.

By Mr. CHINDBLOM: Joint resolution (H. J. Res. 461) to amend section 2 of the joint resolution entitled "Joint resolution to authorize the operation of Government-owned radio stations for the use of the general public, and for other purposes," approved June 5, 1920; to the Committee on the Merchant Marine and Fisheries.

By Mr. PARK: Resolution (H. Res. 652) to pay B. E. Moore the sum of $585 for services rendered in the file room of the House of Representatives; to the Committee on Accounts.

By Mr. MURPHY: Resolution (H. Res. 653) authorizing the Committee on Naval Affairs to make certain investigations regarding suspension of naval building program for six months; to the Committee on Rules.

By Mr. FRENCH: Memorial of the Legislature of the State of Idaho, favoring the passage of House bill 15275, the Fordney emergency tariff bill; to the Committee on Ways and Means.

By Mr. JOHNSON of Washington: Memorial of the Legislature of the State of Washington, urging that Fort Walla Walla be used for hospitalization and retraining of disabled World War veterans; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. HADLEY: A bill (H. R. 15909) granting a pension to Isola Foster; to the Committee on Invalid Pensions.

By Mr. MURPHY: A bill (H. R. 15910) granting a pension to Sarah J. Vanfossan; to the Committee on Invalid Pensions.

By Mr. OLDFIELD: A bill (H. R. 15911) granting an increase of pension to Cora E. Brown; to the Committee on Invalid Pensions.

By Mr. SWINDALL: A bill (H. R. 15912) to carry out the provisions of an act approved July 1, 1902, known as the act entitled "An act to accept, ratify, and confirm a proposed agreement submitted by the Kansas or Kaw Indians of Oklahoma, and for other purposes," and to provide for a settlement to Addie May Auld and Archie William Auld, who were enrolled as members of the said tribe after the lands and moneys of the said tribe had been divided; to the Committee on Indian Affairs.

By Mr. WALSH: A bill (H. R. 15913) granting a pension to Charles Henry Mosher; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5278. By Mr. BARBOUR: Petition of members of the Church of the Brethren, Empire, Calif., supporting the Fess-Capper bill (H. R. 12652); to the Committee on Education.

5279. By Mr. CANNON: Petition of sundry citizens of Kankakee, Ill., protesting against the Sunday blue laws; to the Committee on the Judiciary.

5280. By Mr. GALLIVAN: Petition of George W. Mehaffey, Boston, Mass., favoring passage of legislation to conserve forests of the country; to the Committee on Agriculture.

5281. Also, petition of Leas & McVitty Co., protesting against duty on hides; to the Committee on Ways and Means.

5282. Also, petition of William G. S. McIntyre, 45 Bellevue Street, Dorchester, Mass., favoring passage of House bill 15089; to the Committee on Reform in the Civil Service.

5283. By Mr. JOHNSON of Washington: Petition of Brighton Park Grange, No. 163, Olympia, Wash., favoring the truth in fabrics bill; to the Committee on Interstate and Foreign Commerce.

5284. By Mr. LAMPERT: Petition from citizens of Oshkosh, Wis., protesting against Sunday blue laws; to the Committee on the Judiciary.

5285. Also, petition from citizens of Oshkosh, Wis., for beer and light wines; to the Committee on the Judiciary.

5286. By Mr. LINTHICUM: Petition of Carr-Lowrey Glass Co., Maryland Car Wheel Works, and Chapman Coal Mining Co., all of Baltimore, protesting against Calder coal bill; to the Committee on Interstate and Foreign Commerce.

5287. Also, petitions of the College Club and the Johns Hopkins Women's Club, both of Baltimore, indorsing Smith-Towner bill; also petitions of J. A. Kennedy and Joseph E. Pitsinger, both of Baltimore, protesting against Smith-Towner bill; to the Committee on Education.

5288. Also, petition of Merchants and Manufacturers' Association, Baltimore, regarding elimination of special excise tax, and A. Stanley Brager, Baltimore, protesting against increase in duty on imported hairbrushes; to the Committee on Ways and Means.

5289. Also, petition of National Congress of Mothers, Baltimore, favoring Fess-Capper bill; to the Committee on Education.

5290. By Mr. O'CONNELL: Petition of Brotherhood of Locomotive Engineers, of New York State, favoring the Gronna bill, with amendments which will enable the railroad companies to acquire, if necessary, the necessary equipment and accessories for the transportation of meat products; to the Committee on Interstate and Foreign Commerce.

5291. Also, petition of Brooklyn Chamber of Commerce, Brooklyn, N. Y., favoring Senate bill 4204; to the Committee on Interstate and Foreign Commerce.

5292. Also, petition of the Merchants' Association of New York, favoring the enactment of House bill 7204; to the Committee on the Judiciary.

5293. By Mr. PARK: Petition of State Highway Department of Georgia, Atlanta, Ga., and sundry other organizations of the State of Georgia, favoring the McArthur bill; to the Committee on Roads.

5294. By Mr. TAGUE: Petition of New England Shoe Wholesalers' Association and New England Shoe and Leather Association, both of Boston, Mass., protesting against a tariff on hides; to the Committee on Ways and Means.

5295. Also, petition of W. L. Montgomery & Co., protesting against tariff on hides; to the Committee on Ways and Means.

5296. By Mr. YATES: Petition of G. E. Dixon, Chicago, Ill., protesting against the Smith bill; to the Committee on the Public Lands.

5297. Also, petition of Woman's Club of Wilmette, Wilmette, Ill., urging the passage of House bills 12749, 7310, 10925, and 12078; to the Committee on Education.

5298. Also, petition of Silas H. Altorfer, president, Altorfer Bros. Co., Peoria, Ill., and C. Tokar, Chicago, Ill., urging passage of sales-tax legislation; to the Committee on Ways and Means.

5299. Also, petition of Arthur S. Pease, Urbana, Ill., urging passage of House bill 14854; to the Committee on Appropriations.

UMI

5300. Also, petition of W. H. Conway, Springfield, Ill., protesting against the Smith-Towner bill; to the Committee on Education.

5301. Also, petition of Moline Kiwanis Club, of Moline, Ill., suggesting certain rules for the regulation of immigration; to the Committee on Immigration and Naturalization.

5302. Also, petition of Glass Bottle Blowers' Association of Chicago Heights, Ill., urging the defeat or amendment of House bill 10311; to the Committee on Agriculture.

5303. Also, petition of Dr. H. M. Richter, protesting against House bill 12644; to the Committee on Water Power.

5304. Also, petitions of Aurora Chamber of Commerce; C. E. Kremer, Chicago; North Western Tow Boat Owners' Association, Seattle, Wash.; and Quincy Chamber of Commerce, urging passage of House bill 13591; to the Committee on the Judiciary.

5305. Also, petition of Massey Concrete Products Corporation, Chicago, by Mr. H. W. Wilder and W. H. Miner, Chicago, urging support of House bill 1551, Winslow measure; to the Committee on Interstate and Foreign Commerce.

5306. Also, petitions of Gust Wolff, of Decatur; Hugh A. Green, of Mowenqua; and Mr. W. G. Wolff, of Decatur, all in the State of Illinois, urging the passage of the Elkins bill (S. 4596); to the Committee on Pensions.

SENATE.

THURSDAY, *January 27, 1921.*

(Legislative day of Wednesday, January 26, 1921.)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

The PRESIDING OFFICER (Mr. ROBINSON in the chair). The unfinished business, House bill 15275, is before the Senate.

DEPARTMENT OF EDUCATION.

Mr. SMITH of Georgia. Mr. President, I was interrupted on yesterday, and I wish to present this morning two or three matters that I would otherwise have presented at that time.

Mr. PENROSE. If the Senator will permit me to interrupt him, I suggest the absence of a quorum.

The PRESIDING OFFICER. Does the Senator from Georgia yield for that purpose?

Mr. SMITH of Georgia. I would prefer to present these papers before a call for a quorum.

Mr. PENROSE. I should like a full Senate to hear the Senator from Georgia.

The PRESIDING OFFICER. The Chair calls the attention of the Senator from Pennsylvania to the fact that the Senator from Georgia has the floor, and unless the Senator yields for that purpose the Senator from Pennsylvania can not suggest the absence of a quorum.

Mr. PENROSE. I understand that, without the reminder of the Chair.

The PRESIDING OFFICER. Does the Senator from Georgia yield for that purpose?

Mr. SMITH of Georgia. I prefer not to yield.

The PRESIDING OFFICER. The Senator from Georgia declines to yield.

Mr. SMITH of Georgia. It is unfortunate that all the Senators do not hear the resolutions I am about to read, but they will go into the RECORD, and I hope they will be read there.

The bill to create the department of education is commonly known now as the Smith-Towner bill, I having introduced it in the Senate, and Judge TOWNER having introduced it in the House. I mention that fact because the resolutions I am about to read commend the Smith-Towner bill. I wish it understood that they commend, therefore, the bill to create a department of education, the authority to make appropriations for educational purposes contained in that bill.

The first is from St. Petersburg, Fla., where there is a large gathering of winter tourists. I wish to read their letter first:

ST. PETERSBURG, FLA., *January 20, 1921.*

Senator HOKE SMITH,
Washington, D. C.

DEAR SENATOR: The St. Petersburg Republican Club, 800 members, unanimously went on record as indorsing the passage of the Smith-Towner bill, and instructed the secretary to so inform you. Fight for it to the finish.

Respectfully, yours,

H. L. ERMATINGER, *Secretary.*
A. R. WELSH, *President.*

Again, I read:

ST. PETERSBURG SHRINERS' ASSOCIATION,
St. Petersburg, Fla., January 14, 1921.

Senator HOKE SMITH,
Washington, D. C.

DEAR SENATOR: The St. Petersburg Shriners' Association, composed of Shriners representing 88 temples, from 88 cities throughout the United States, unanimously indorse the passage of the Smith-Towner bill. These 88 temples, such as Lu Lu, Philadelphia; Al Koran, Cleveland; Aladdin, Columbus, Ohio, and the 85 others, have a membership of over 1,000,000 of the best men in the United States, and their winter representatives in St. Petersburg have just gone on record as above stated.

Yours, truly,

H. L. ERMATINGER, *President.*

The United States Chamber of Commerce has approved the bill creating a department of education, and I wish to bring the letter of their president to the attention of the Senate, and also in that way to the attention of the country.

"Educational crisis national problem," says Joseph H. Defrees.

President of United States Chamber of Commerce says conditions in public schools contribute to unrest.

Statement of Joseph H. Defrees, president United States Chamber of Commerce:

Educational authorities who have carefully studied conditions estimate that of the 600,000 public-school teachers in the United States:

One hundred thousand are under age 21.

Thirty thousand have no education beyond the eighth grade.

One hundred and fifty thousand have no education beyond the third year in high school.

Four hundred and eighty thousand—four-fifths of the total—have not had two years of special training, the minimum recognized standard in other civilized countries.

Forty thousand temporary teachers who have not even fulfilled our own low educational requirements.

"Washington—Conditions in our public schools undoubtedly contribute much to unrest in this country to-day," said Joseph H. Defrees, president of the United States Chamber of Commerce, in a statement made public to-day to a representative of the National Education Association.

Mr. Defrees said that the situation had become so serious that it could no longer be looked upon as a matter of purely local interest, but should be treated as a national issue to be solved through the full cooperation of State and Nation.

Nothing in our national life is more important than the fullest and best facilities for the education of our children.

One reason why radicalism has not made the same headway in the United States that it has in Europe is the fact that hundreds of men, occupying positions of the greatest importance in this country, began life as poor boys—

Said Mr. Defrees—

But what have we got to say of the inequalities in education?

Eighteen thousand classrooms in this country are said to have stood idle last year through lack of teachers. Taking an average of 25 pupils to each classroom, that means that 450,000 children were either denied education altogether or crowded into other classrooms where they were given such education as they could get from an overworked, underpaid, undertrained teacher.

The balance of the letter I am perfectly willing to print without reading. I ask unanimous consent to print it.

The PRESIDING OFFICER. Without objection, leave will be granted. The Chair hears none.

The remainder of the letter is as follows:

I have given some figures on this country's failure to provide trained teachers for its schoolrooms. In that regard authorities assert that we lag behind every other civilized nation, including some of our South American neighbors. In the country districts, where 60 per cent of the children of this Nation are educated, the teachers, as a group, represent by far the most immature and badly educated of all teachers. Of course, under these circumstances, the public school can not compete with the richly endowed private school, and what becomes of our boast of equal opportunity? Isn't it an obvious step in allaying present and preventing future unrest that we remove this educational handicap?

There is one other phase of this question that I wish to touch upon. Our shortsighted policy in failing to recognize the dignity of the teaching profession, in some instances, has led to a class consciousness in that profession, which has made itself felt in the classroom and left its indelible imprint upon the impressionable minds of the young. Let the facilities for the education of the teacher and compensation of the educated teacher be made ample.

Mr. SMITH of Georgia. I shall not take more time of the Senate just now to bring the subject to the attention of the Senate and the country, but as opportunity is given from day to day I hope briefly to call attention to facts that are important and pertinent, and to demonstrate to the Senate not only the necessity for the legislation but that the overwhelming support of the women and men voters of the country is behind it.

I am aware of the fact that there is a small organized opposition, an unfortunate opposition for those who are making it,

but I believe it does not represent any real majority of those from whom it seems to come. That the bill will pass at this session or in the near future I have no doubt.

ASSOCIATION OF PRODUCERS OF AGRICULTURAL PRODUCTS.

Mr. NELSON. On account of illness in my family, I ask leave to withdraw from the conference committee on the disagreeing votes of the two Houses upon the bill (H. R. 13931) to authorize association of producers of agricultural products, and I ask that the Chair may appoint another Senator in my place.

The PRESIDING OFFICER. Without objection, the Senator from Minnesota [Mr. NELSON] will be excused from further service as a conferee on the part of the Senate, and the Chair appoints the Senator from Montana [Mr. WALSH] in his place. The Chair hears no objection, and it is so ordered.

CALL OF THE ROLL.

Mr. PENROSE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Gronna	McCumber	Smith, Ga.
Ball	Hale	McKellar	Smith, S. C.
Beckham	Harris	McNary	Smoot
Borah	Harrison	Moses	Spencer
Capper	Heflin	Myers	Stanley
Colt	Henderson	Nelson	Sterling
Culberson	Johnson, Calif.	Overman	Sutherland
Curtis	Jones, N. Mex.	Page	Swanson
Dial	Jones, Wash.	Penrose	Townsend
Dillingham	Kellogg	Poindexter	Trammell
Elkins	Kendrick	Pomerene	Underwood
Fernald	Keyes	Ransdell	Wadsworth
Fletcher	King	Robinson	Warren
France	Kirby	Sheppard	Williams
Gerry	Knox	Sherman	Willis
Glass	La Follette	Simmons	
Gooding	Lodge	Smith, Ariz.	

Mr. JONES of Washington. I desire to state that the Senator from New York [Mr. CALDER] is necessarily absent on public business.

Mr. GERRY. I announce that the Senator from Delaware [Mr. WOLCOTT], the Senator from Oregon [Mr. CHAMBERLAIN], and the Senator from South Dakota [Mr. JOHNSON] are absent by reason of illness.

Mr. CURTIS. I have been requested to announce that the Senator from Iowa [Mr. KENYON], the Senator from Connecticut [Mr. MCLEAN], the Senator from Colorado [Mr. PHIPPS], the Senator from Montana [Mr. WALSH], and the Senator from Massachusetts [Mr. WALSH] are absent in attendance upon a meeting of the Committee on Education and Labor.

The PRESIDING OFFICER. Sixty-six Senators have answered to the roll call. There is a quorum present.

PETITIONS AND MEMORIALS.

Mr. McLEAN presented a petition of sundry employees of the Steamboat-Inspection Service, of New Haven, Conn., praying for the passage of Senate bill 4839, to classify and provide salaries for officers and clerks of the Steamboat-Inspection Service, which was referred to the Committee on Commerce.

He also presented a resolution of the Rockville Chamber of Commerce, of Rockville, Conn., favoring the passage of a bill providing for a 1-cent drop-letter rate in cities, towns, and on rural routes, which was referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of sundry Polish political, social, and beneficial organizations of the State of Connecticut, remonstrating against the enactment of the so-called Sunday blue laws, which was referred to the Committee on the Judiciary.

He also presented a resolution of the Stamford Central Labor Union, of Stamford, Conn., favoring the removal of trade restrictions with Russia, and also that an appropriation be made for the completion of the Wilson Dam at Muscle Shoals, which was referred to the Committee on Foreign Relations.

He also presented resolutions of the Hartford Central Labor Union, of Hartford, and Elm Lodge, No. 420, International Association of Machinists, both in the State of Connecticut, favoring immediate resumption of trade with soviet Russia, which were referred to the Committee on Foreign Relations.

He also presented a petition of Local No. 185, Federal Employees Union, of New Haven, Conn., praying for the continuance of the $240 bonus to Federal employees during the next fiscal year, which was referred to the Committee on Appropriations.

He also presented petitions of sundry employees of the United States customs service of New Haven and Bridgeport, Conn., praying for the enactment of legislation increasing the salaries of customs officers, which were referred to the Committee on Appropriations.

He also presented memorials of the Waterbury Women's Club, of Waterbury, Conn., and the Chamber of Commerce of Norwich, Conn., remonstrating against the enactment of legislation commercializing the national parks, which were referred to the Committee on Commerce.

Mr. KENDRICK presented a letter in the nature of a petition signed by John Hendricks and sundry other citizens of Powell, Wyo., praying for the enactment of legislation to secure protection for the beekeeping industry, which was referred to the Committee on Finance.

Mr. PHIPPS presented telegrams in the nature of memorials of the Denver Civic and Commercial Association, of Denver; the William E. Russell Coal Co., of Denver; F. R. Wood, of Trinidad; J. S. Cheyney, vice president Canon Reliance Coal Co., of Denver; F. B. Reigart, secretary Pueblo Retail Coal Dealers' Credit Bureau, of Pueblo; the Govereau Coal & Feed Co., of Rocky Ford; and the Colorado Retail Coal Dealers' Association, of Denver, all in the State of Colorado, remonstrating against the enactment of the so-called Calder bill to regulate the coal industry, etc., which were referred to the Committee on Manufactures.

Mr. BRANDEGEE presented a letter in the nature of a petition from F. Ward Deklyn, foreman of the jury in the case of United States v. Remington Arms, et al., praying for the enactment of legislation to increase the compensation of United States court jurors, which was referred to the Committee on the Judiciary.

The PRESIDING OFFICER (Mr. ROBINSON) presented a letter in the nature of a petition of the Coca-Cola Bottling Co., of Fort Smith, Ark., praying for a revision of the internal revenue law as it applies to manufacturers of nonalcoholic beverages, which was referred to the Committee on Finance.

Mr. JONES of Washington. Mr. President, I have a resolution passed by the legislature of my State. I am not going to ask that the resolution may be printed in the RECORD in full, but I am simply going to state that it is a resolution urging the passage by the Senate of the magnesite bill, one of the special tariff bills that were reported last session and are now on the calendar. I simply ask that this resolution may be noted in the RECORD as a petition or memorial, without asking that it be printed in full.

The PRESIDING OFFICER. The Chair calls the attention of the Senator from Washington to the fact that the rules contemplate that memorials of that character shall be printed in the RECORD.

Mr. JONES of Washington. I understand that the rules do contemplate it, but I do not ask it. I do not think it is necessary.

The PRESIDING OFFICER. Without objection, the matter will take the course suggested by the Senator from Washington. The Chair hears no objection. The resolution will be referred to the Committee on Finance.

REPORTS OF COMMITTEES.

Mr. KENDRICK, from the Committee on Public Lands, to which was referred the bill (S. 4859) for the relief of certain ex-service men whose rights to make entries on the North Platte irrigation project, Nebraska-Wyoming, were defeated by intervening claims, reported it favorably without amendment.

Mr. JONES of Washington, from the Committee on Commerce, to which was referred the bill (S. 4640) to amend section 2 of an act entitled "An act to create a Federal power commission; to provide for the improvement of navigation, the development of water power, the use of the public lands in relation thereto; and to repeal section 18 of the river and harbor appropriation act, approved August 8, 1917, and for other purposes," approved June 10, 1920, reported it with amendments and submitted a report (No. 724) thereon.

Mr. WADSWORTH, from the Committee on Agriculture and Forestry, to which was referred the joint resolution (S. J. Res. 238) authorizing the President to require the United States Sugar Equalization Board to take over and dispose of 13,902 tons of sugar imported from the Argentine Republic, reported it favorably without amendment and submitted a report (No. 725) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SWANSON:

A bill (S. 4924) to retrocede to the State of Virginia exclusive jurisdiction heretofore acquired by the United States of America over the property and persons of the town site or territory known as United States Housing Corporation project 150-A,

located in Norfolk County, State of Virginia, and called Cradock; to the Committee on Public Buildings and Grounds.

By Mr. SMOOT:

A bill (S. 4925) to amend an act approved February 25, 1920, entitled "An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain, and for other purposes"; and

A bill (S. 4926) to amend an act approved February 25, 1920, entitled "An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain, and for other purposes"; to the Committee on Public Lands.

By Mr. SPENCER:

A bill (S. 4927) to amend Title IX, section 900, paragraph (8) of the act entitled "An act to provide revenue, and for other purposes," approved February 24, 1919; to the Committee on Finance.

By Mr. CALDER:

A bill (S. 4928) for the purchase of the statue "The Pilgrim Mother and Child of the Mayflower," and presentation of same to the Government of Great Britain; to the Committee on the Library.

By Mr. McNARY:

A bill (S. 4929) for the relief of estates of Edwin G. Scott, Clyde R. Dindinger, and Ralph R. Fraley; to the Committee on Claims.

A bill (S. 4930) authorizing the Secretary of the Interior to sell timber on certain public lands, and for other purposes; to the Committee on Public Lands.

A bill (S. 4931) authorizing the Secretary of the Interior in certain cases to reconvey real property donated for use in connection with Federal irrigation projects; to the Committee on Irrigation and Reclamation of Arid Lands.

By Mr. POINDEXTER:

A bill (S. 4932) authorizing and directing the Secretary of War to deliver to the Surgeon General of the Public Health Service Fort Walla Walla Military Reservation, including buildings and grounds at Walla Walla, Wash.; to the Committee on Military Affairs.

AMENDMENTS TO EMERGENCY TARIFF BILL.

Mr. SPENCER submitted an amendment intended to be proposed by him to House bill 15275, the emergency tariff bill, which was ordered to lie on the table and be printed.

Mr. JONES of Washington submitted an amendment intended to be proposed by him to House bill 15275, the emergency tariff bill, which was ordered to lie on the table and be printed.

AMENDMENT TO DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

Mr. TOWNSEND submitted an amendment (with an accompanying paper) proposing to appropriate $4,500 to pay Mrs. Anne Gale White, widow of Jay White, late consul at Naples, Italy, being one year's salary of her deceased husband, etc., intended to be proposed by him to the Diplomatic and Consular appropriation bill, which was referred to the Committee on Foreign Relations and ordered to be printed.

SHIPPING CLAIMS AGAINST THE BRITISH GOVERNMENT.

Mr. LODGE. I submit a resolution of inquiry, asking for certain information from the State Department in regard to certain claims.

The resolution (S. Res. 438) was read, as follows:

Resolved, That the President is hereby requested, if not incompatible with the public interest, to inform the Senate whether any, and if any what, measures have been taken relating to claims or complaints of citizens of the United States against the British Government growing out of restraints on American commerce and the alleged unlawful seizure and sale of American ships and cargoes by British authorities during the late war, and to communicate to the Senate a copy of any instructions which may have been given by the Executive to the American ambassador at London on the subject on and after October 21, 1915, and also a copy of any correspondence which may have passed between this Government and that of Great Britain in relation to that subject since that time.

The PRESIDING OFFICER. The resolution will be printed and lie over under the rule.

MARBLE BUSTS OF SUSAN B. ANTHONY AND OTHERS.

Mr. CURTIS submitted the following concurrent resolution (S. Con. Res. 39), which was read and referred to the Committee on the Library:

Resolved by the Senate (the House of Representatives concurring), That the Joint Committee on the Library, acting under the authority conferred by section 1831 of the Revised Statutes, on behalf of Congress, accepts the marble busts of Susan B. Anthony, Lucretia Mott, and Elizabeth Cady Stanton, presented to the Congress by the women of the United States, and assign to said busts a suitable place in the United States Capitol, and that appropriate ceremonies, under the supervision of the Superintendent of the United States Capitol Building and Grounds, are hereby authorized to be held in the Rotunda of the Capitol at such time as said Superintendent of the United States Capitol Building and Grounds may deem suitable.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the House had agreed to the amendment of the Senate to the bill (H. R. 12502) providing for a report on the cost of improving and maintaining the Government boulevard on Missionary Ridge, in the Chickamauga and Chattanooga National Military Park.

The message also announced that the Speaker of the House had signed the following enrolled bills and joint resolution:

H. R. 974. An act for the relief of W. T. Dingler;

H. R. 4184. An act for the relief of C. V. Hinkle;

H. R. 11769. An act to amend an act entitled "An act to provide a civil government for Porto Rico, and for other purposes," approved March 2, 1917; and

H. J. Res. 440. Joint resolution directing the Secretary of War to cease enlisting men in the Regular Army of the United States, except in the case of those men who have already served one or more enlistments therein.

EMERGENCY TARIFF.

The Senate, as in Committee of the Whole, resumed consideration of the bill (H. R. 15275) imposing temporary duties upon certain agricultural products to meet present emergencies, to provide revenue, and for other purposes.

Mr. SIMMONS. Mr. President, I wish briefly to state in the beginning some general propositions with reference to the pending bill, then I will enter upon a discussion of what I regard as the real issues involved in this controversy, especially from an economic standpoint.

The bill under consideration places unprecedentedly high duties upon importations of a large number of staple agricultural products of this country. Scarcely any of these duties are justified under the tariff theories of either of the two great political parties. Most of them, measured by the Republican standard of protection, are either excessive or prohibitive, and will therefore produce but little, if any, revenue for the support of the Government. Indeed, it was boldly declared in the Finance Committee when the bill was under consideration there that it was framed without regard to revenue and solely for purposes of protection.

An examination of the rates imposed by the bill in connection with this declared purpose of the legislation makes it clear that the primary object of the bill is to enhance the price in the domestic market of the several products embraced in the bill. Such a use, or misuse, of the power of taxation is repugnant to the fundamental principles and policies of the Democratic Party, and is inconsistent with and repugnant to all the theories or arguments upon which the Republican Party have heretofore attempted to justify tariff for protection.

If these rates reflect the present attitude of the Republican mind upon the question of protection and foreshadow the character and measure of protection for which that party intends to stand in the future, this bill furnishes a new and startling illustration and interpretation of a radical advance in the development of that doctrine under the present leadership and control of that party.

Mr. President, this is not the only tariff bill which will be presented to the Congress for its consideration and action in the near future. It is known that during the special session to be called, probably in April, the party in power intends to bring in a general bill revising and rewriting the tariff act now in force.

If the duties proposed in the so-called popgun bills presented to the Senate by the majority during the second session of the present Congress reflect the trend of the Republican mind in the direction of higher protection, we may expect that the rates of the promised general revision of the tariff now in process of incubation in another Chamber will be the highest protective duties ever proposed in this or any other country with the exception of China during the dark centuries of her isolation. But while the proposed general revision will undoubtedly be a distinctively protective tariff measure, it will not, we are told, as is the case in the pending bill, be framed in avowed disregard of the revenue requirements of the Government. On the contrary, we are advised that it will be framed with a view to raising between five hundred million and a billion dollars in revenue. Of course, that can not be accomplished if the duties are made prohibitive or nearly prohibitive as are many in the pending bill, unless the free list is abolished and the burdens of the Government laid upon the necessaries of life; and, of course, the leadership of the Republican Party is too shrewd to go too far in that direction.

Mr. President, I mean no offense to those Democrats who intend to vote for this bill—and I know there are some who do intend to vote for it—when I say that if a Democrat votes for

the prohibitive duties in this bill, imposed without reference to revenue and for the avowed purpose of increasing domestic prices, he will find himself in an extremely embarrassing predicament a little later on when called upon to vote upon the general tariff bill to which I have just referred.

The truth is, Mr. President, that no Democrat and, I think, no Republican can justify a vote for this bill except upon the assumption that the tariff has been and is the cause of the present distressing condition of agriculture in this country and that the great slump which has taken place in the price of practically all unmonopolized products, including those of agriculture, in recent months, not only in the United States but throughout the civilized world, has been and is the result of tariffs, and that this situation can be relieved by remedial tariff legislation. Frankly, I can not understand how any intelligent man at all familiar with the situation and the effect of tariffs can arrive at such a conclusion.

The bill, therefore, to my mind, presents three questions for debate:

First, are the importations under existing tariffs the cause of the slump in the price of agricultural products embraced in this bill; and if so, will the duties prescribed by this bill materially and substantially remedy the situation by raising the price of these commodities in the domestic market?

Second, can the taxing powers of the Government be legitimately used for purposes of enhancing the price of domestic products?

And, third, will not the reflex action of the application of this supposed remedy be more harmful in its effects upon our international trade relations and upon the domestic consumer of these commodities than the prospective benefits that may be secured to the domestic producers of these products?

Mr. President, I have made these general observations for the purpose of making clear from my viewpoint the real issues involved in this proposed legislation from both a political and an economic standpoint. It is a common practice, not only in legislation but in the courts of the country, to seek sometimes to becloud the real issue involved in a controversy by a discussion of extraneous and immaterial and collateral matters, or by an exaggeration of conditions out of which the controversy arises with a view to prejudicing the decision of the real question involved in the case. We have heard and we will hear more discussion and declamation in this debate with reference to the condition of the farmer and his need, his urgent need, for some sort of relief. Nobody raises any question about the condition of the farmers of this country.

It is said that the farmer is in a desperate plight. Everybody concedes that. It is said that he has lost money upon his last year's crop. Everybody admits that. It is said that he is forced by present market conditions to dispose of his products of last year, raised at peak war prices, at less than the cost of production. Everybody admits that. It is said that his price has slumped out of proportion to other prices. Everybody concedes that; but that is not the controversy. Those things are all admitted and conceded. The real issue involved in this legislation is whether this deplorable condition, this desperate plight in which the farmers of this country find themselves to-day, has been brought about by the importations of foreign products into this market, to be sold in competition with the American farmers' products; and if so, are the conditions of production in this country such that the imposition of a high protective tariff, even to the point of prohibition or to the point of embargo, will relieve against that condition?

Mr. President, I do not think that the condition of the farmer is due, and I do not think it can be shown to be due, to importations; and I believe that a full discussion of this question as it applies to the various items in this bill will show that this condition has not been in any material way affected by importations or, if it has been, that the production conditions of this country are such that the tariff could not possibly help it.

In considering this question, however, it is very material to inquire whether the farmer is in any worse condition that possibly could be ascribed to the tariff than the balance of the business of the country. I concede, everybody admits, that the slump in agricultural prices has been somewhat out of proportion to the slump in the prices of other products; but there is no product produced in this country, unless it is under control of a monopoly with irresistible power to increase its prices or maintain its prices, that has not been affected with the same trouble with which the farmers are afflicted. If affected in less degree, the reason for the difference is very clear. The farmers, by reason of their great numbers, are not able, and despite many efforts in the past have not been able, by concert of action, by associations, by combinations, by organizations, to protect themselves against a situation of this sort as have the other industries of the country, most of which are in some sort of association, some sort of concert of purpose, some sort of gentlemen's agreement, or some sort of combination that enables them to offer greater resistance to depression and to better protect themselves in the maintenance of their prices.

If the farmer has been first hit and hardest hit—and undoubtedly he has been—it is because he offered the least resistance; and a movement of this sort always moves upon lines of least resistance. If the others have been able to maintain their prices to some extent, to a greater extent than he, it is because they have been in a position that enabled them to offer the greater resistance. Outside of the influence of these considerations upon prices, it may be truthfully said that the other business interests of the country not monopolized—I wish that modification always to be included in my remarks—have suffered from a like depreciation in the prices of their products.

Now, Mr. President, if it be true that we have had in this country during the last five or six months a general slump in prices that has not been confined to agriculture, but has extended to every product of the country, without reference to whether or not that product is protected against importations; if the condition is general, universal, subject only to the exception of monopoly and its influence, how can it be said that the disaster which has come upon the farmer along with the balance of the country is due to the fact that there have been importations into this country to some slight extent of the things which he produces?

Mr. KELLOGG. Mr. President, will the Senator yield?

Mr. SIMMONS. I wish the Senator would not break into my argument. I will yield later on.

Mr. KELLOGG. Very well.

Mr. SIMMONS. Now, Mr. President, let us carry that argument a bit further. Is the condition which we find obtaining in the United States to-day confined to this country? Are these conditions exceptional in this country? There is not a Senator here who does not know that they are not confined to this country. There is not a Senator here who does not know that the same conditions which confront us, which confront agriculture and afflict the farmer to-day, obtain in all the leading countries of South America; that there the farmer's prices have suffered as grievous a slump as they have here; that there is the same stagnation in business in those countries as there is here.

The difference between conditions in this country and in other countries of this hemisphere in this respect is that conditions there are worse than they are here. But do not the same conditions which prevail here, and in South America, and in Canada, right across the border, prevail throughout the world to-day, and is it not a fact that there has been just as great, just as radical, and just as severe a decline in the price of agricultural and other products in Great Britain, in France, in Italy, and in all the countries of Europe, as there has been in the countries of this hemisphere?

Mr. President, the only difference, I think, is a difference in our favor, by reason of the fact that we are in a better condition to protect ourselves in the world situation which exists, because of the fact that the American dollar is at a premium as compared with the currencies of other countries. This fact has enabled us to protect ourselves to an extent that has not been possible with the other countries of the world. There is a difference in the degree of the depreciation of prices here and elsewhere, but that difference is in our favor, and not against us.

This slump in prices is universal throughout the world, without regard to differing tariff conditions which obtain in the different countries.

It applies with equal force to countries upon a low-tariff, a protective-tariff, or a free-trade basis, and that being true, it is impossible to logically or consistently contend that this slump is the result of importations from foreign countries.

I want to go back to this line of discussion a little later, but right now let me say that the next question which arises is, If we should find that prevailing low prices in this country are caused by importations, and that they can be raised by placing a bar in the future against those importations, can we, for the sole and exclusive purpose of raising the price of domestic products—not for the purpose of protecting them against a disastrous influx of foreign goods, not for the purpose of bringing about competitive conditions between foreign goods and American goods, not for the purpose of protecting this market against the disastrous and ruinous inundation of cheap foreign products, but for the purpose and the sole purpose of raising the prices of domestic products—justify ourselves in invoking the powers of taxation, especially in view of the fact that the price of a product can not be raised by taxation without increasing the price the consumer must pay?

If the tax is levied solely and exclusively for the purpose of raising the price of the product in the domestic market, is that not, by legislation, putting money into the pocket of the producer and forcing it out of the pocket of the consumer? Is it not an indirect way of confiscating the property of the one man to increase the profits of another man?

Mr. President, I say that we can not justify such a use of the powers of taxation. I know perfectly well that we can justify anything from a constitutional standpoint in the imposition of taxes under the decisions of the Supreme Court. The question whether a tax is constitutional or unconstitutional does not seem to be a question of law any longer in this country. It is purely a question which addresses itself to the conscience or the judgment of the legislative branch of the Government. But can we afford to so stretch our legislative conscience, stultify our judgment, and suppress our instincts of justice and right between man and man as to pass an act for the deliberate and avowed purpose of taking money out of one man's pocket and putting it into the pocket of somebody else, simply because that somebody else happens to be in a condition of distress?

Mr. President, there is another view to be taken of this matter.

If it shall be decided that imposing a duty upon the importations of like products into this country will lift the prices of those products, and we shall adopt and so extend that idea as to inaugurate a policy of international discrimination, a policy of prohibition, a policy of excluding, practically, as effectively as by embargo, the main products which other countries send here, especially at a time when foreign countries are utterly unable to buy our goods except by the process of exchange, when they have no gold to pay us in that metal, when our dollar is at a premium everywhere in the world, when they have no credit with which to borrow in this country, when their sole hope of buying our products, which they so much need, depends upon our buying their products and taking them in exchange, is there anybody who will deny that such a policy of legislation must inevitably lead to international retaliation?

What will our friends in Canada think of it? Last year we imported from them $46,000,000 worth of vegetable products, and that quantity includes wheat, corn, and products of that sort. We sold them, I think, about a hundred and sixty-odd million dollars' worth of similar products. How will that country take it if we shut out our importations from Canada of these products by prohibitive duties?

The same argument that applies to Canada applies with the same force to other countries in the world. How will they look at it? What will be the effect of such a policy upon the nations of the world, especially in view of the fact that the balance of the world is not in a very good frame of mind toward the United States just at this time; in view of the fact that many of these nations think we are not doing our duty in the present world situation; in view of the fact that they think we have deserted them in their misfortunes and their extremity; in view of the fact that we have piled up here during the war, drawn from other countries, one-half of all the gold supply of the world; in view of the fact that we have developed an export trade amounting during the war to as high as $4,000,000,000 in our favor over our imports; and even under the conditions which now exist, all adverse to our export trade, we still are drawing from the balance of the world $3,000,000,000 every year more than we pay them, even at their present rate of imports.

Mr. GRONNA. Mr. President——

The PRESIDING OFFICER (Mr. ROBINSON in the chair). Does the Senator from North Carolina yield to the Senator from North Dakota?

Mr. SIMMONS. Just let me finish this, and then I will yield.

With the world mind somewhat resentful toward us, somewhat inflamed against us, do you not think, Senators, that if we shall inaugurate the policy which would be inaugurated under this bill, expand it, advance it, enlarge it, and develop it, as you probably will, in the general revision to take place a little bit later, that we are likely to excite in the countries of the world not only a spirit of retaliation but a spirit of hostility, which may do this country, in its trade relations, in its general political relations, its industrial relations, and its economic relations with the world, infinite and incalculable harm?

Mr. GRONNA. Mr. President, may I interrupt the Senator with a question?

Mr. SIMMONS. I would beg that the Senator, if he can, postpone this question until I conclude.

Mr. GRONNA. I do not wish to disturb the Senator.

Mr. SIMMONS. I have a line of argument in mind from which I do not wish to be diverted.

Mr. GRONNA. The Senator called attention to the fact that some $160,000,000 of vegetable products were exported. I wanted to know if the Senator really meant that?

Mr. SIMMONS. I have before me the statement of exports and imports of vegetable products to and from Canada. We exported to Canada of vegetable products $184,000,000 instead of $160,000,000, as I said, and we imported from Canada of vegetable products $46,000,000. The Senator will find that statement in the tables of commerce under vegetable products, which includes wheat, corn, oats, and all those things.

Mr. McCUMBER. And tobacco?

Mr. SIMMONS. It includes exports of about $400,000 of unmanufactured tobacco. It is quite a long list.

Mr. KELLOGG. It is fair to say, if the Senator will permit me, that he probably includes all products which are sent to Canada, and from Canada to foreign countries. We export a great deal through Canada to foreign countries.

Mr. SIMMONS. This is not the first time I have heard that statement made, but I think, as a matter of fact, that in recent years the bulk of Canadian wheat sold in Europe was shipped through the United States. I do not think that any considerable amount of these vegetable exports to Canada were for reexport to foreign countries.

Mr. President, I desire to confine my discussion to a consideration of what I believe to be the factors that enter into the determination of whether the proposed duties can help, and if they can help whether the situation justifies the exercise of the powers of taxation to bestow that benefit in the way proposed.

I have no disposition whatever to delay action upon the bill one minute beyond the time necessary for fair and full discussion. I believe that any Senator here will say, if he will examine the bill and take account of the sundry important propositions contained in it, that it ought not, upon any pretense of emergency, to be rammed down the throats of Senators or to be precipitately driven through this body without giving full opportunity for discussion. Not only the Senators are interested in having the facts in the matter brought out, not only are the two parties in the country interested in having the facts in the matter brought out, but the 105,000,000 people whom we represent, and whose interests will be profoundly affected by the proposed legislation, for better or for worse, are sufficiently interested in the matter to make it our duty not to try to stifle discussion, but to invite such discussion as is calculated to enlighten the minds of Senators and of the people with reference to the merits of the proposition.

Having that object in view, I shall try to confine my discussion hereafter to the provisions of the bill. I have made these general observations because I think it is very well to understand the fundamentals of the proposition before going into the details of the concrete phases of it. I shall hereafter confine my discussion of the matter to the different items in the bill and attempt to analyze as best I can the facts with reference to them and to present them to the Senate and to the country for unbiased judgment in the hope of fair and intelligent action on the part of the Senate with reference to them. The only one of the items that has been under discussion up to this time is that of wheat, and I wish to give some consideration to that and only to that item to-day.

The Senator from North Dakota [Mr. McCUMBER], who is, after the chairman, the ranking Republican upon the Finance Committee, and who is largely sponsor for the legislation and for the item with reference to wheat, has contended that the slump which has taken place in the price of wheat is the result, in a large measure at least, of importations from Canada during the last crop year and especially during the three months immediately preceding the beginning of this year.

What is the wheat situation as compared to the situation of other things in the country? During the last crop year, which began last July, we produced in this country—and the Senator from North Dakota admitted it yesterday, I believe—750,000,000 bushels of wheat. According to the report of the Tariff Commission with respect to wheat, our importations from Canada of last year's wheat crop amounted to only 25,000,000 bushels to December 23, 1920.

Mr. McCUMBER. May I ask where the Senator got that statement of only 25,000,000 bushels being imported?

Mr. SIMMONS. I got that statement from the Tariff Commission's report.

Mr. McCUMBER. I got it from the commission but a short time ago and from the departments here, and up to about the middle of December it had run up to 58,000,000 bushels.

Mr. SIMMONS. I am speaking about exports to this country. I shall have no difficulty, I think, in that matter. Here is what the Tariff Commission says:

Exportable surplus of the United States for the crop of 1920—

Referring to wheat—

has been generally estimated to be from 200,000,000—

That is what the Senator said yesterday—

to 225,000,000 bushels, but during the first half of the crop year—July 1 to December 23, 1920, inclusive—there was exported fully 203,000,000 bushels of wheat and its equivalent in flour. Official figures for July 1 to November 30, inclusive, report exports of 175,000,000 bushels of wheat and wheat in the form of flour. Bradstreet estimates the exports during December 1 to 23, inclusive, at approximately 28,000,000 bushels of wheat and flour; and commercial sources report further heavy export buying toward the close of December for shipment in the following month.

From the table of imports and exports of wheat and from commercial estimates for the early part of December, it appears that American exports have been, roughly, 200,000,000 bushels since July 1, 1920, whereas the imports, chiefly from Canada, have been about 25,000,000 bushels in the same period.

That is the report of the commission. Now, with this enormous crop of 750,000,000 bushels, with exports reaching during the first six months of the crop year 200,000,000 bushels, can anyone believe for a minute that the importation of 25,000,000 bushels from across the border of Canada can have materially affected the price of wheat in this country or in any way accounted for the slump in the price of wheat in this country?

But, Mr. President, let us see about corn.

Mr. GRONNA. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from North Dakota?

Mr. SIMMONS. I yield.

Mr. GRONNA. Before the Senator leaves the discussion of wheat, while I do not like to interrupt him and I shall not interrupt him if it disturbs him——

Mr. SIMMONS. I shall be glad to answer any question after I conclude.

Mr. GRONNA. But this is such an important question——

Mr. SIMMONS. Very well; I yield to the Senator.

Mr. GRONNA. And I know the Senator wishes to have his figures correct.

Mr. SIMMONS. I do.

Mr. GRONNA. How can anyone argue that we have 200,000,000 bushels or more of wheat to export when everybody knows that last year's crop amounted to but 750,000,000 bushels. It is admitted by everybody that it requires 5 bushels of wheat per capita, and as we have 105,000,000 people that means we must have 525,000,000 bushels of wheat for bread; we must also have 90,000,000 bushels of wheat for seed; there is a shrinkage of 10 per cent, 75,000,000 bushels of wheat, so that the deductions amount to 690,000,000 bushels. Now, deduct that from 750,000,000 bushels of wheat and where can one possibly get the 200,000,000 bushels for export to which the Senator from North Carolina refers?

However, let me say to the Senator, if he will pardon me, that the wheat which is shipped from Canada to milling centers and is in transit for the purpose of being manufactured is not regarded as imported wheat, because that wheat is exported to England or to other countries. I say, without the fear of successful contradiction, that if the Tariff Board has made such a report—which, of course, I am sure it has, as the Senator has read from it—the report is entirely misleading.

Mr. SIMMONS. Mr. President, the reports on foreign trade statistics include the exports only to November; but they show, as I recollect, the export of 176,000,000 bushels of wheat up to the 1st of December. The report which has been made by the commission only claims that 175,000,000 bushels of wheat were exported up to that time, and adds that the statistics up to the 23d of December showed 28,000,000 bushels in addition to that, making 203,000,000 bushels.

However, I thank the Senator for the words he has uttered, because what he has said enormously fortifies the argument which I have been making. The Senator asks how can anybody claim, with a crop of wheat of only 750,000,000 bushels, considering the requirements of the domestic market, that we could export the amount of wheat which I have stated we exported. Mr. President, the fact remains that we have exported it; and if the conditions did not justify the exportation, and if, after the exportation, there is a deficiency in the markets of America, does not the Senator know that we must get the wheat to cover that deficiency of supply from somewhere else, and that in getting the wheat to cover that deficiency of supply we do not depress the market for the domestic product?

Mr. GRONNA. Where the Senator from North Carolina makes the mistake is that he includes Canadian wheat which is shipped through this country.

Mr. SIMMONS. Oh, no; the reports of the Department of Commerce do not show that. Whatever exports go through this country from Canada are not included in the tables of our imports from Canada nor in our exports of domestic merchandise. The Senator from North Dakota must know that. I know that, if the Senator from North Dakota does not know it.

Mr. GRONNA. The Senator from North Dakota knows that the United States of America has not exported 200,000,000 bushels of American wheat during the current year.

Mr. SIMMONS. I did not say we had exported that much American wheat, because if we had exported that much American wheat, I say, as the Senator has said, it would have been accomplished by drawing on the domestic supply.

I agree with the Senator from North Dakota. We exported during the first half of the crop year, up to January 1, an amount of wheat equal to the amount of our exportable surplus wheat, because, on the basis of last year's crop, we only had an exportable surplus of 200,000,000 bushels.

Mr. GRONNA. Oh, no.

Mr. SIMMONS. The Senator from North Dakota stated that on yesterday.

Mr. GRONNA. My colleague stated it.

Mr. SIMMONS. That is what I mean; the Senator's colleague [Mr. McCUMBER] stated it.

Mr. GRONNA. That amount will have to include the carry over. Does the Senator from North Carolina mean to say that we are going to export every surplus bushel that we have produced and every bushel that we carried over from last year?

Mr. SIMMONS. The senior Senator from North Dakota said on yesterday that the amount of our exportable surplus wheat was 200,000,000 bushels. I say that we exported that much and a little bit more than that during the first six months of the crop year when ordinarily we have unexported about 60 per cent of the exportable surplus at the time I have indicated. The remainder is ordinarily exported afterwards.

Now, Mr. President, if we have already exported all of our surplus wheat and still have reached only halfway of the crop year, we have got to stop all exportation of wheat during this crop year, unless we increase our imports, or further draw upon the domestic supply and thereby cause a scarcity of wheat in the American market, from which market the needs of the American people are supplied. The Senator contends that if we have exported 200,000,000 bushels we have already passed that point. If we have passed that point, I say to the Senator, instead of standing here seeking to put up bars against the importation of wheat into this country, he ought to be endeavoring to make the way easier for the importation of wheat to supply the demand of consumers in this country of that indispensable product.

Mr. GRONNA. Mr. President, will the Senator yield further for a question?

Mr. SIMMONS. Yes; I yield.

Mr. GRONNA. I have given this subject some thought.

Mr. SIMMONS. I also have given it some thought.

Mr. GRONNA. I know the Senator has; but I can not reconcile the figures which I have gone over and which have been furnished me by the various departments, based upon the crop production, with the figures presented by the Senator. I will say to the Senator that I wish to be fair. I think there was an estimate made by the Agricultural Department during the month of December that the production of wheat in the United States for the year 1920 was nearly 790,000,000 bushels. They found that there was a little more than the first estimate of 750,000,000 bushels; to be accurate, that the crop produced in the United States in 1920 amounted to 789,800,000 bushels, I believe. If we have the same carry over—and it has been stated by the very best of authority that it is exceedingly dangerous for us to have a carry over of less than from 50,000,000 to 75,000,000 bushels; and it is practically impossible, I will say to the Senator, for us to sell any closer than that——

Mr. SIMMONS. Oh, no, Mr. President, it is not impossible for us to sell it all, but then we would deprive ourselves if we did so.

Mr. GRONNA. I am speaking of the ordinary course of business. With a crop of 790,000,000 bushels we could not possibly export to exceed 100,000,000 bushels, because the remainder would be required for bread.

Mr. SIMMONS. The Senator ought to qualify that statement. One hundred million bushels is too low; but we could not export 200,000,000 bushels without any importations into this country without, to some extent, reducing the necessary supply for the people of this country. That is what I say we have been doing; I say the 25,000,000 bushels of wheat which have been brought over here constitute a part of that 200,000,000 bushels which we have sent abroad; and when that 25,000,000 bushels are deducted it is plain that the withdrawals from the domestic crop for the export trade were only 175,000,000 bushels.

Mr. GRONNA. I understand that we have imported wheat not only from Canada, but we have imported wheat from Argentina.

Mr. SIMMONS. Oh, Mr. President, we have imported practically none from Argentina this year.

Mr. GRONNA. I wish to say that I am quite sure that it can be shown that more than 25,000,000 bushels of wheat have been imported into this country from Canada, not for our use, but, as the term is used, "milled in transit" and exported from this country.

Mr. SIMMONS. Yes, Mr. President, and if, instead of 25,000,000 bushels there had been imported 50,000,000 bushels, in view of the conditions, the shortness of our crop and our large exports, that would not have affected the market one particle, because it would not have left more than enough, if enough, to supply the domestic demand.

But how can those comparatively small importations under any circumstances affect the price? If the contention of the senior Senator from North Dakota [Mr. MCCUMBER] is correct—in the argument—that the 25,000,000 import bushels added to our 750,000,000 bushels production is responsible for the slump which has taken place, suppose we had made this year, instead of a short crop, a big crop, we would have had a bigger slump, would we not?

Upon the argument of the Senator from North Dakota, if this year under present conditions the State of Kansas had made a better crop than it did, if it had produced 25,000,000 more bushels of wheat than it did produce, then that would have brought about a slump, because it can not make any difference in the effect upon this situation from a tariff standpoint whether the 25,000,000 bushels added to the domestic supply came from abroad or came as the result of an increased crop produced in any part of our own country. In other words, if the addition of 25,000,000 bushels of wheat to our domestic stock from Canada has caused a slump in the price of wheat in this country, would not an increase in production in North Dakota of 25,000,000 or 50,000,000 bushels more than was actually produced cause a greater slump in the price of wheat in this country? Therefore, if this year we had made as much as we did in the crop year preceding, amounting to something over 900,000,000 bushels, to-day, according to that contention, the price of wheat would have been at bottom instead of selling for the price which it is now bringing.

But, Mr. President, how about corn? We made last year over 3,000,000,000 bushels of corn in this country. Does anybody contend that the importations of corn into this country have affected the corn market? And yet the fact is indisputable that the slump in the price of corn in this country has been very much greater than the slump in the price of wheat. Last year we were buying corn at this season of the year for from about $9 to $11 a barrel, I think. To-day corn is selling even in the retail markets at about $4.50. There have been no importations of corn that amount to anything. A few years ago we began buying a few million bushels from Argentina, but not in competition with the corn of this country, because the Argentine corn imported was not fit for human food, and I think but to a little extent for animal feed. It was used, and imported to be used, in the manufacture of starches; but even that has been much reduced. No country in the world is sending us corn in any considerable amount, yet this bill proposes to put a duty upon imports of corn; and notwithstanding that there are practically no imports of corn, that there is nothing in the condition of our international trade in corn that affects its value, corn has slumped in value, I should say, 33⅓ per cent more than wheat. Under those circumstances, the slump must be due to something besides the tariff.

The same thing is true with regard to tobacco. In my section of the country, and most of the South outside of Florida, we do not import one pound of tobacco that is sold or can be sold in competition with the tobacco products of that great section of the country, or the importation of which into this country could possibly affect the market price of tobacco grown in that section of the country. Not a dollar's worth of such tobacco has been imported or could be imported, though there was no tariff, because it is not produced to any great extent in other parts of the earth; and yet, Mr. President, with no importations into this country of that product, the price of this tobacco has fallen from an average of 54 cents a pound to an average of less than 20 cents a pound.

How are we going to account for that slump? If the slump in wheat is due to this 25,000,000 of importations, what has caused the slump in corn and in tobacco, equally staple agricultural products, the slump in which has been much greater than in wheat? Is it not more reasonable, do not all the circumstances point unmistakably to the fact, that this slump is not due to these importations and has not its genesis in them; that the small imports of these products do not affect the price at all; and therefore that tariff barriers will do no good? What good will a tariff barrier on corn in this country do to the corn producer when practically none is now brought in, none is likely to be brought in, and if brought in could not be imported in sufficient quantities to affect materially the price of a 3,000,000,000-bushel crop?

Why should we wish to put a tariff on corn? What good can it do? However high you make it, you can not make it so high that it will be a more effective embargo than that which now exists. You know it. Every Republican Senator over there has sufficient intelligence to know that; and yet we see here an effort to mislead the distressed, the grievously afflicted corn farmers of this country into the belief that the party in power is diligently at work preparing a measure that will increase the price of corn by putting a duty of 15 cents a bushel on corn imported into this country!

The same argument applies to cotton, but I have no disposition to follow that line of argument to its logical conclusion.

But the Senator says that the bulk of these imports of wheat have come in during the last three months, since the decline in wheat began, and in that way he seeks to bring it into relation with the decline. I have here the Tariff Commission's report upon that. This report is just out. It is brought up to the present time. It says:

> Canadian wheat did not come on the market until about September 1, but the price decline had set in some months previously; from a high point of $3.15 per bushel on June 1, the price declined to $2.65 on August 20.

A decline of 50 cents a bushel in the price of wheat before these extravagant importations began that the Senator speaks about. As a matter of fact, the importations up to that time had been absolutely negligible. The importations during the three months to which the Senator alludes were not very heavy. Compared with the exports during those three months, they were exceedingly light.

The imports during this period—September, October, and November last—were 9,000,000 bushels a month for the last two months, and very much less than that for the preceding month. During that period the exports very greatly exceeded the imports; but, Mr. President, taking the entire imports for these three months and comparing them with those for the same three months of last year, we find that the total increase in imports was only 20,000,000 bushels of wheat, and that the total imports were 21,000,000 bushels of wheat. The increase in exports during that period was 46,000,000 bushels of wheat as against 20,000,000 bushels, and the total exports during that three months were 92,000,000 bushels as against only 21,000,000 bushels of imports.

In view of the fact that during these three months of the year, when four-fifths of the wheat which we expect to get from Canada, came in, the exports exceeded the imports to the extent of 71,000,000 bushels, is it not ridiculous to say that those imports produced a depreciation in the price of wheat in this country?

But that is not the main argument on which the Senator from North Dakota placed his reliance. The basis of the Senator's argument was that these imports from Canada brought upon the markets of this country a lower-priced product than that which we produce here.

Mr. President, there have been but few times when the price of wheat in Canada has not equaled the price of wheat in this country. There has been, on account of similarity in climatic conditions and population and labor in those sections, but little difference in the cost of production of wheat in Canada and in the United States. This is not a case, and can not be made a case, of an influx of cheap products into this country, inundating the American market, and destroying the value of the domestic product. There is no element of that character in this case. During the three-months period, when the Senator from North Dakota said that this wheat was coming here in mighty volume, but which we find upon examination meant only about 9,000,000 bushels a month, as against from twenty to twenty-five million bushels per month exported, I am prepared to show by official figures that during that very period, those very identical months, when he contended that these relatively cheaper products were being brought in here, Canada depressing the price of the domestic product, wheat was selling in the Canadian market at about the same figure that it was selling here.

But the Senator says that does not take into account the difference in exchange, which is very much in favor of the Canadian price. The figures which I propose to present to the Senate do take into account the difference in exchange between the two countries. Eliminating that, during those two or three months wheat in Canada was very considerably higher than wheat in this country; but after you apply that depreciation and convert the Canadian price into American dollars, the price was

practically the same. I have the statistics here, but for the purposes of this demonstration I shall take the figures given by the Tariff Commission for the very purpose of showing that there was no difference. They are found in Table 5.

It is preceded by this statement:

It is often assumed that American purchasers get the full advantage of the exchange rates when the American dollar is at a premium. This by no means follows, however, in every case. From Table 5, appended below, it is seen that the Winnipeg price of wheat converted into American money is almost the same as that for similar wheat in Minneapolis.

Now let us turn to that table, Mr. President, and I wish to ask that this table be inserted as an appendix to my remarks. [See appendix.] I shall not undertake to read these figures, but you may take each one of these months. It begins with September, the month when the Senator said this flood of importations began. It takes in October, the month in which he said this movement gained great impetus. You may take November, the month in which he said it reached its flood, and you may compare, and Senators will see that in the prices of wheat in Winnipeg on the identical days in September, in October, and in November, after those prices were converted into United States currency at the prevailing rate of exchange, there was practically no difference—some days the Canadian product was a little bit higher than the American, and some days the American product was a little bit higher than the Canadian; but the variation was only a cent or two per bushel.

Mr. President, I had intended further to elaborate this argument. I undertake to say that anybody who is familiar with the facts relating to the different commodities in this bill can take this bill and show that, with the exception possibly of sugar and possibly of a certain grade of cotton and perhaps certain meat products, there is no practical relation between the price of these products in this country and the extent or amount of importations of like foreign products; that whatever disaster has come to the producers of these several products by a decline in the prices below the cost of production, must be attributed to conditions with which most intelligent men are very familiar, which apply here as they apply everywhere throughout the world, that this disastrous condition can not be attributed to imports under any particular rate of tariff.

Mr. President, I desire to put in the RECORD some most illuminating facts presented in the report of the Tariff Commission. The Congress in recent years, proceeding upon an expressed desire coming generally from the people of the country, and acquiesced in on both sides of this Chamber and on both sides of the House of Representatives, passed a law creating a Tariff Commission, upon the theory that the tariff, as far as practicable, should be lifted out of politics, and that if tariff duties were to be levied according to any political theory they ought to at least be levied after a full and thorough investigation and ascertainment of the facts and a report from an expert commission.

We created that commission, and it is generally known that during the period of the war, and until recently since the war, the members of this board of experts have been giving their time to a diligent study and investigation of the facts relating to tariffs upon the various principal items which we treat in our tariff measures. Their investigations have been long; they have been intensive and they have been thorough. We have from them already reports on many subjects, and especially, Mr. President, we have their reports on nearly all the different commodities mentioned in this bill.

Those reports have been available for some time, and yet it is a significant fact that in the Committee on Finance when this important measure was under consideration, when that committee was fixing rates affecting these important products—wheat, meat, flour, wool, woolen goods, cotton goods, and sugar—not a single member of that committee representing the Republican majority referred once to any of the reports or findings of that commission.

In these debates, as far as they have progressed, not one word has been said about the commission's report. We have had a speech from the Senator from North Dakota [Mr. MCCUMBER], lasting nearly an hour and three-quarters, upon the wheat item in the bill, and yet not a line, not a syllable, from the report of the commission. It is not to be assumed that he has not read it. If there had been any grain of comfort in it for the theories and contentions he advances here, he undoubtedly would have exploited the commission's report before the Senate and before the country. Not a line from it did he read, and not a line, Mr. President, will any of the proponents of this bill read from it when they come to consider the other items in this bill, because I undertake to say, after a pretty thorough investigation of these reports upon these various items, that the duties which it is sought to impose by this bill find emphatic condemnation therein, and those reports show the utter lack of necessity for these proposed duties, the destructive effect of them, and expose the fraud and pretense which lie behind, which permeate, and which inspire this vicious and pernicious proposition of tariff legislation.

Speaking about wheat, I will not read the statement as to exports of wheat, which I read a little while ago. The statement was that our exportable surplus of wheat for the crop year 1920, the fiscal year 1920–21, was estimated to be two hundred to two hundred and twenty-five million bushels, and that up to December 23 there had already been exported from this country 203,000,000 bushels, or practically all of it. Then follows the statement that—

If during the remaining six months of the crop year, when normally about 40 per cent of the export movement occurs, the shipments continue at a fraction of this rate, it is apparent that the United States must replace the exports by foreign wheat. And this is precisely what appears to have been already in progress. * * * This serves to free for export approximately equivalent quantities of domestic grain and flour, for the most part of different classes or from sections other than those which absorb the imports.

That is a recognition of the fundamental fact, Mr. President, that under conditions of that sort we can absorb imports greater than these, indeed several times as great as the actual importations from Canada, without disturbing domestic prices.

This free movement of wheat between the United States and Canada, making the North American crop a common source of supply, has certain demonstrable advantages.

Mr. President, after discussing the advantages and disadvantages of imports from Canada, followed by exports from this country, and balancing the one against the other, the commission states its conclusions. I am reading these excerpts, Mr. President, because I want to get them into the RECORD. These reports were made for the majority party as well as for the minority party. They represent the findings of facts and the conclusions of a bi-partisan board. Senators on the other side will not read these reports, because the reports are against them and their contentions—I think, make their contentions ridiculous; at least, the reports take out from under them all the props by which they are seeking to support themselves. Therefore, proponents of the bill will not read them, and if we are going to get them into the RECORD, we who oppose the bill will have to read them. They are too voluminous to put in as a whole, and therefore I am reading the pertinent excerpts.

The report proceeds:

The causes of the recent decline in wheat prices have been the subject of an extensive investigation by the Federal Trade Commission and the United States Department of Agriculture, acting under directions of the President.

Again I say it is significant that in all the arguments we have had about wheat and in all the arguments we had in the committee about the rates generally no Republican presented the reports of these investigations. The Senator who has championed the cause of the proposed duty on wheat, although there was a report of two great agencies of the Government, in addition to the report by the Tariff Commission, has not presented a word or a line from any of these reports—the report of the Tariff Commission after a thorough investigation, the report of the Federal Trade Commission after a thorough investigation, or the report of the Department of Agriculture after a thorough investigation. Not a line from any of those reports has been submitted to support the bill. The proponents of the bill will not find anything in these reports to support their contention, because it can not be supported by the facts.

The report proceeds:

In the published summary of the report of the Federal Trade Commission seven causes are given for this decline: (1) Conditions of world supply; (2) concentrated governmental buying by European powers; (3) imports from Canada; (4) record-breaking harvests of corn and oats; (5) a decided falling off in the domestic demand for flour during the latter part of 1920; (6) the general price deflation; (7) credit conditions.

Now, taking cognizance of the suggestion that the imports from Canada were considered in this connection, the Tariff Commission addresses itself to the question of the effect of the imports upon the price of wheat, and here is what they say:

It is impossible precisely to determine how important an influence Canadian imports have exerted on the price of wheat in the American market in recent months; but some points in this connection may be indicated.

Canadian wheat did not come on the market until about September 1, but the price decline had set in some months previously (see Table 5): from a high point of about $3.15 per bushel on June 1, the price declined to $2.65 on August 20.

That was at a time when the Senator from North Dakota says the imports were absolutely negligible and a month before the Senator says that the influx, of which he complains, set in.

The report proceeds:

It is possible that the prospect of an exceptionally large harvest in Canada may have been a contributing factor in this decline, but it should be noted that in the Pacific States, whose wheat enters into a somewhat distinct trade, prices also declined, although Canadian competition is not an important factor in Pacific markets.

UMI

It can not enter them because of the excessive cost of transportation to those markets.

Another point that should be considered is the fact that in each of the fiscal years 1917 and 1918 there were imported around 25,000,000 bushels of wheat, almost entirely from Canada. It is true that these purchases were made by the United States Grain Corporation, with the understanding that equivalent quantities of wheat or flour should be exported. But these imports were made to meet sectional shortages, either of all kinds or of different classes of wheat; and, being made at lower price levels than existed in the United States, might have been due to commercial influences had they been free to operate. During these years, however, the imports were without apparent effect because of conditions of international demand.

Conditions which are just as influential and determining in the present situation as in that.

The imports, therefore, were somewhat of the same character as those which took place in 1920.

In addition to these factors, there are others connected with the effect on prices of Canadian imports which are brought out in the tables submitted below.

Now this is important, Mr. President:

From the tables of imports and exports of wheat and from commercial estimates for the early part of December, it appears that the American exports have been roughly 200,000,000 bushels since July 1, 1920, whereas the imports, chiefly from Canada, have been about 25,000,000 in the same period. In normal times a preponderance of exports over imports as great as that indicated here means that American prices follow the international market for wheat. Indeed, this is almost axiomatic if trade is unobstructed. Liverpool is usually the center of the world market and when a given country is on an exporting basis the price of wheat there is usually lower than that of Liverpool by the amount of transportation and other handling charges between the two markets.

Why, Mr. President, the Senator from North Dakota yesterday contended laboriously and vigorously that the price of wheat in this country was not regulated by the price of wheat in Liverpool, which is the world market, which fixes the world price; and yet if we will think just a moment about the situation, we shall conclude it must inevitably be so regulated. So where a nation is upon a large export basis, as we are with reference to cotton and wheat, if the price in Liverpool were not a little bit better than the price here, if the dealer could not get the same or a better price for his product in Liverpool than he could get in the markets of his own country, there would not be any inducement to export.

Mr. McCUMBER. Mr. President——

Mr. SIMMONS. Just a moment, if the Senator please. I will be through in a moment. That is so fundamentally true that we had here for years, based upon that proposition, a great political party composed of some of the most intelligent people in the country, largely represented by the agricultural interests of the country—and say what you will about the farmers, I have found them to be among the best informed citizens in the country. The agricultural class is, as a rule, better informed upon these matters than the average city dwellers. The farmers have become readers. They have been readers for years. They study political questions, they study tariff questions, and they especially study with great scrutiny and persistence and thoroughness questions connected with the market prices of their products and the fixation of those prices. Yet the great party to which I referred maintained and demonstrated that the prices of our agricultural products, especially those of which we export large quantities, like cotton and wheat, were fixed in the markets of the world, and that it was the Liverpool price that determined it. That is an axiomatic rule that has been accepted in this country and throughout the world.

Mr. McCUMBER. Will the Senator pardon an inquiry in that connection?

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from North Dakota?

Mr. SIMMONS. Certainly.

Mr. McCUMBER. I would like to have the Senator explain how it was that in one year, I think either 1909 or 1910, Minneapolis, Duluth, and Liverpool for months quoted prices that would not range more than 3 to 4 cents in difference between them, and at the same time the transportation would amount to about 16 cents per bushel? If Liverpool always governs the price, why was it that during one of those years the prices were the same in Minneapolis as in Liverpool?

Mr. SIMMONS. Well, Mr. President, I do not know what the prices were in those years, but I am quite sure if there was any marked difference between the Liverpool price and the price in this country and the price throughout the world, that it can be explained by some exceptional condition.

Mr. McCUMBER. I will explain the exceptional conditions when I have the opportunity.

Mr. SIMMONS. I can not stop in the middle of a speech to make an investigation as to what were the conditions surrounding the market for wheat in 1910. I am dealing with the price and the market for wheat in the year 1920.

After saying that Liverpool is the market in which world prices are fixed, the report of the Tariff Commission goes on to state:

At the present time, however, this rule is not subject to statistical proof because the European prices are largely artificially fixed. No open-market quotations for Liverpool are available: only the British prices fixed by the Royal Commission on Supplies are published, and for present purposes these are not significant. A further disturbing factor is illustrated in Table 6, in which it is shown that there are heavy exports directly to continental Europe rather than through the usual clearing markets of Liverpool and London.

In view of these disturbing factors—arbitrary prices abroad and heavy direct shipments to the Continent—care should be exercised in assuming that the American market is now following the European purchase price.

They tell about some of the conditions growing out of the concentrated governmental buying of Great Britain and the fixation of prices by that country on wheat, and then the report proceeds:

Aside from the question of price levels, however, it may be said with some certainty that inasmuch as the United States is on an exporting basis, any wheat that is imported from Canada (aside from the question of special cases to meet special needs) releases an equal amount of American wheat for export. This being true, it is not a matter of great importance whether the Canadian wheat reaches Europe directly or indirectly through the United States either in the form of flour or by releasing similar American wheat. Indeed, if we may assume that the European demand is controlling our market, as it does in normal times when we are on an exporting basis, there is a possibility that if the Canadian wheat had been thrown on the English market before the close of lake navigation, instead of filtering slowly through the United States, the world price level, and therefore our own market, would have been depressed more than it was in the fall of 1920.

There we have the broad statement, Mr. President, that we are upon an exporting basis; that the price is fixed in Liverpool; that in these circumstances it makes no difference whether 25,000,000 bushels of wheat came to the United States and were reexported in the form of wheat or flour or were sent directly to Great Britain, so far as the effect upon us is concerned, except that but for this buffer of its coming through the United States instead of going directly to Europe the price of wheat would have been depressed more than it was in the fall of 1920. Then the report adds:

From this point of view it seems fortunate for American producers—

Listen to that, Mr. President and Senators—

From this point of view it seems fortunate for American producers that there was a buffer between the great Canadian surplus and the Liverpool market.

A further important point is the exchange situation between the United States and Canada. Recently Canadian exchange has been at a discount of 8 to 15 per cent, and this has disturbed the general trade between the two countries.

It is often assumed that American purchasers get the full advantage of the exchange rates when the American dollar is at a premium. This by no means follows, however, in every case. (From Table 5.)

That is the table which I have asked be inserted in the RECORD. I call the attention of the Senator from North Dakota to it, and I hope he will give it a careful reading. It not only confounds but obliterates and annihilates and demolishes the very basic foundation upon which he lays his case. The table reads as follows:

TABLE 5.—*Cash prices per bushel of wheat at Minneapolis and Winnipeg.*

Minneapolis prices are for No. 1 northern spring wheat, compiled from the Northwestern Miller (median of high and low).

Winnipeg prices are for Manitoba No. 1 northern wheat, at Fort William and Port Arthur, compiled from the Northwestern Miller.

Winnipeg prices are converted into United States currency at the rate of exchange prevailing on the date of the quotation.

Date, 1920.	Minneapolis No. 1, northern spring.	Winnipeg.

From Table 5, it is seen that the Winnipeg price of wheat converted into American money is almost the same as that for similar wheat in Minneapolis.

This identity of prices in the two markets is of importance in connection with the exchange situation. It is obvious that the American purchaser of Canadian wheat can not get it any cheaper than he can buy the same grades of the domestic product; in other words, there is no special inducement for buying Canadian wheat offered by the exchange situation. It does not appear that the individual seller has a greater incentive to sell in Minneapolis than in Winnipeg, because as a matter of fact the prices are about the same in the two markets.

If this country were on a net importing basis the prices obviously would be depressed by the imports from Canada, but at a time when heavy exports are going out of the country the relatively small imports probably do not alter the general rule that it is of no great importance whether Canadian wheat reaches the European markets directly or indirectly through the United States.

And yet, Mr. President, in the face of this report of a bipartisan commission, made in response to a law that imposes upon them the duty of impartial and thorough investigation of these questions, and of reporting the facts and their conclusions and inferences to this body and to the other House of Congress—In the face of the statement I have quoted in a report submitted by a commission of that character after that kind of an investigation by these experts, the Senator from North Dakota stands here and says that on account of the lower price of wheat in Canada, the dumping of that wheat upon this market is congesting this market place, and is producing stagnation and a radical decline in prices. That might be a pretty good argument if leveled against a commodity produced in a country where on account of starvation wages or climatic conditions products similar to those of America could be produced for a very much lower price and were habitually offered at a lower price, and were at a particular time being poured in across the border inundating the market and freezing out the domestic producer. Arguments of that kind have been made in the past, but nine times out of ten, Mr. President, they have had but very little foundation in fact. I have had enough connection with tariff witnesses who have come before committees of Congress to know that many of them come armed—not intentionally but unwittingly armed—with a lot of propaganda frequently misstating and falsifying the facts for the purpose of bringing about legislative action to bestow upon certain classes in this country governmental benefactions. However, when the argument comes from the Senator from North Dakota, who lives near the Canadian line, that the producers in this country are being ruined by the influx of cheap Canadian wheat, I say he ought at least to give some attention—and I ask that he do so—to this finding of the Tariff Commission, which, if true, not only destroys his argument in that respect but undermines and removes every prop upon which he bases his contention in behalf of the proposed duty upon wheat.

RECOGNITION OF OBREGON GOVERNMENT.

Mr. ASHURST. Mr. President, I have received a resolution in the nature of a memorial, adopted by the Legislature of the State of Arizona, which I will read, as follows:

STATE OF ARIZONA,
FIFTH STATE LEGISLATURE.

Senate Joint Memorial 1.

To the Senate and House of Representatives of the United States of America, in Congress assembled:

Your memorialists, the Fifth Legislature of the State of Arizona, respectfully represent:

Whereas there has existed for a period of years in the Republic of Mexico a condition of civil strife causing untold misery, destruction of life and property, and an almost complete cessation of civil government; and

Whereas there has arisen in the Republic of Mexico a man, intensely loyal to his country, sympathetic, broad-minded, and humane, a student of conditions in his own country and throughout the world, and with a mission to retrieve the lost powers and fortune of his country—the Hon. Alvaro Obregon; and

Whereas the electorate of the said Republic of Mexico has by an almost unanimous vote selected the said Alvaro Obregon to be its President; and

Whereas the people of the State of Arizona recognize the unquestioned ability, honor, and integrity of the newly elected President of Mexico, Alvaro Obregon, and believe that through him and his able administration of the duties of his office as president of the Republic of Mexico, a new era, one of happiness, prosperity, and freedom, is dawning for our sister republic: Now, therefore, be it

Resolved, by the Senate and the House of Representatives of the State of Arizona, That the United States of America be memorialized through congressional act and by its authorized officials, to extend to the Republic of Mexico and to its duly elected president, Alvaro Obregon, full recognition; be it further

Resolved, That a copy of this memorial and these resolutions be forwarded to the President of the United States, the President of the United States Senate, the Speaker of the House of Representatives, the Secretary of State, and to each of our Representatives in Congress, and that each of the said Representatives in Congress be requested and urged to do all in their power toward the securing of such recognition.

Passed the senate January 14, 1921.

H. B. WILLIAMSON,
President of the Senate.

Attest:

ROY N. DAVIDSON,
Secretary of the Senate.

Passed the house January 18, 1921.

P. C. KEEFE,
Speaker of the House.

Attest:

OSCAR ZAFF,
Chief Clerk of the House.

Approved January 21, 1921.

THOMAS CAMPBELL,
Governor of Arizona.

I also read the following Associated Press dispatch:

[By Associated Press.]

PHOENIX, *January 22.*

Gov. Campbell signed and returned to the senate this morning senate memorial No. 1, a resolution by the Arizona Legislature urging the President to recognize the Mexican Government. In returning it to the legislature the governor sent a note accompanying it, in which he said: "It is not necessary for me to sign this memorial, but I take pleasure in doing so, because it gives me opportunity to express how heartily in favor of this resolution I am."

The PRESIDING OFFICER. The memorial of the Legislature of Arizona presented by the Senator from Arizona will be referred to the Committee on Foreign Relations.

SUSPENSION OF NAVAL BUILDING PROGRAM.

Mr. BORAH. Mr. President, I desire to take a few moments to call attention to the resolution which passed the Senate day before yesterday, which I offered, asking the Committee on Naval Affairs to make a report concerning the condition of the Navy and as to the wisdom of suspending the building program of the Navy for the next six months.

Some time ago I offered a resolution which had for its purpose the bringing together of the three great navy-building nations, with a view of securing, if possible, an understanding by which the building programs might be reduced. There seems to be an opinion in some quarters that that matter ought to be delayed for a time, and I am not about to discuss whether or not it should be delayed. I shall discuss that question later; but if it is to be delayed, then it seems to me extremely important that we know something of the condition of our building program and as to whether or not it is along the lines which will make for efficiency in case we should ever be called upon to make use of the Navy.

It is now contended by some of the great naval experts of the world that what is known as the capital ship, or the battleship, will be practically useless in future naval warfare. Of course, I do not assume to pass an opinion on any such question, but it does seem to me that a layman may feel keenly interested in knowing what the ultimate judgment of the experts is to be upon this subject. We are responsible for the expenditure of these vast sums of money, and we should have the best information possible as to whether they are being wisely expended.

We are now engaged in building some 16 capital ships. The present cost of these ships is about $40,000,000 apiece. If it should transpire that they are inefficient or obsolete for modern warfare, it would be a tremendous blunder to go ahead and complete them; and it was with a view of ascertaining the best thought and the best judgment upon this question that I introduced this resolution. I do not know what information the committee has had before it with reference to this subject. I only know that the information with reference to the subject in this country is very meager. I happen to know that there are men in the Navy who believe that the capital ship will no longer be serviceable in modern naval warfare, but they do not feel exactly free to give that information under present conditions, unless they are called upon to do so.

The English cabinet have taken up this question, and they are dealing with it with their usual foresight and vigilance. Mr. Chamberlain, speaking in the House of Commons a few days ago with reference to cabinet decisions, said that the Government is determined to maintain the Navy at a standard of strength which will adequately secure the safety of the Empire and its maritime communications. They have decided—with the hearty concurrence of the admiralty—that the committee of imperial defense shall "institute at once an exhaustive investigation into the whole question of naval strength as affected by the latest developments of naval warfare."

The Government will therefore present no program to Parliament for capital-ship construction until the results of this inquiry have been considered.

I understand that that is now the settled policy of the English Government—to know thoroughly, and as conclusively as it can be known, what the revealments of the war are with reference to what constitutes an efficient navy. In that country, a country which for 200 years has dominated the sea, it is deemed wise to make haste slowly, not only in the interest of the taxpayers, but in the interest of an efficient navy, and, above all, in the interest of that continued control of the sea so vital to her existence. They have, therefore, deferred all building for six months and set their experts to work and asked for the fullest and freest expressions from all students of the subject. In England they still have freedom of speech in the navy, and many of the best men in their navy contend that the navy as it is now proposed, or has heretofore been proposed, is an obsolete navy.

One of the advocates of a suspension of the building program is Admiral Scott, of the British Navy; and I take the liberty of reading a paragraph or two from a late communication of his to the public published in the London Times. He says:

During the war the submarine dominated everything and very nearly lost us the war. It was only the Germans' want of forethought that saved us; with 50 more submarines—how little it would have cost them!—they would have now been rulers of the world and we should have been a German colony. It makes one shudder to think that the destiny of a great nation can be decided by one little, very little, mistake. We want forethought now, and must not too lightly scrap Jackie Fisher's idea that air fighting dominates future war. Lord Sydenham thinks Lord Fisher's views may have been entirely mistaken, but he admits that Lord Fisher's visions of the future were almost uncanny in their accuracy. Let us look to the future and prepare for a great development in the submarine, the mine, and the aeroplane; and we must not forget that the submarine did drive the battleship from the ocean or to the bottom of it.

Our battleships and the German battleships were locked up for most of the war. The German Admiral von Scheer only saw the smoke of Jellicoe's fleet once; that was enough for him; he ran away as quickly as he could, without doing any appreciable harm to Lord Jellicoe's ships. I am told that the torpedo did not do much during the war. That is rather unfair on the gallant gentlemen who commanded our submarines; they were given dud torpedoes to fire, and the Germans must have had some dud commanders in their submarines or they would have gone into Scapa and sunk our fleet in 1914. We must not only think of what the torpedo did, but of what in more skillful German hands it ought to have done.

We must not forget that tiny little mistake the Germans made in their building program of 1911–12, for this mistake gave freedom to civilization, and if some one comes along with ideas a little off the beaten track Lord Sydenham must not regard them as a fantastic dream, nor think that the some one has not grasped the logical result of his theory, or that the some one is suffering from midsummer madness.

Rear Admiral Hall, in the London Times of December 30, 1920, said:

There has been nothing yet written to shake my confidence in the necessity for now providing for naval defense by thoroughly efficient air, submarine, and mining services. All these are mobile and economical. They are available for protection of home and oversea bases and for the defense of trade. They can protect themselves and the place they work from, and do not run the risk of having to wait in harbors (which must in any case be defended by the three services I have named) for a battle which may never come.

Perhaps the strongest reason of all, which I have kept to the last, is that battleships can not take the offensive; they hand over the initiative to the enemy. They did so in the last war, and all the time we went about feeling as though we were being kicked, with all the will and means, but no power to kick back. We talked of digging out rats, but battleships were of no use for it, and they never will be; it is air mastery alone that can give us the power of a vigorous offensive.

Admiral Grant, retired, in the London Times of December 29, 1920, said:

What would have been the result of the war had the Germans in the years preceding it built submarines rather than battleships? It appears to be admitted that we should in that case have lost the war by starvation (food and supplies generally) had we not met such action by ourselves ceasing capital-ship construction and devoting our attention to counter-measures. In other words, our grand fleet of capital ships would not have saved us, and Germany would have won without them. The whole question is one of very great difficulty, and it seems that embarkation at the present moment on a program of huge and costly capital ships is to be deprecated for the following reasons:

1. That it is at least doubtful if money spent on capital ships at the present time is wisely spent.

And he gives other reasons, which I may, in the interest of time, omit for the present.

I read from an editorial in the New York Tribune of recent date, although I have not the exact date. This editorial says:

Admiral von Scheer, who commanded at Jutland, has recently expressed the following opinions:

1. Surface ships are tremendously expensive, and yet they are very vulnerable.

2. Hitherto only a few nations could afford these big ships, and so they ruled the sea. But the submarine has knocked all this into a cocked hat, and "fear of the British fleet as a fighting weapon has gone."

3. That a great surface fleet can no longer protect a coast or overseas commerce.

4. That submarines can best defend or attack a coast and can best protect or destroy commerce.

5. In short, an adequate submarine navy will enable a comparatively weak nation to pursue an overseas policy, "without worrying about a surface fleet."

The editorial further says:

Lord Rothermere, formerly director of England's air force, makes the following assertions in an article entitled "The folly of the big battleship":

1. Referring to the United States and Japan: "They are obviously building against each other and not against us." "Great Britain can not afford to spend money on naval construction at present."

2. "If the United States and Japan persist in pursuing antiquated forms of warfare, that is no proof that capital ships will survive."

3. "No nation henceforth will enjoy naval supremacy. It is a nasty pill, but we must swallow it."

I quote from another article by Admiral Scott, which was published in the London Times. I quote only a few paragraphs from it. He said:

"What is the use of a battleship?" All I want to know is what rôle our battleship is going to play if we are at war with a near enemy, say, France; a medium-distance enemy, say, in the Mediterrancan; or a far-distant enemy in the East.

These three and many other phases of war must have been discussed and thoroughly thrashed out before our admiralty decided to build a new fleet of battleships costing the country £9,000,000 each. Our

admiralty and foreign admiralties must know "what is the use of a battleship." The public of the United States and Japan must know the use of battleships or they would not have subscribed the money to build them. The British public have not been told why (when we are so hard up) our already taxation to the limit should be increased by spending millions on battleships, which a midshipman tells me are "no damned good."

Then, referring to the committee on imperial defense, he said:

This committee is, I am told, composed chiefly of lawyers. These gentlemen may know all about the effect of the shape of the earth on a gyroscopically controlled compass of a battleship, the blow-down valves of a submarine, and all the scientific and technical sides of the naval officer's profession. If they are well versed in all these subjects, they can with reliability answer the midshipman, and at the same time tell the country "what the use of a battleship is."

Then, speaking to the editor of the London Times, he continues:

Now, sir, you must admit that it is most important that the public, who will be called upon to provide the money for building battleships, should, before they part with their money, know of what service to the country these vessels are going to be.

You must admit that in the war we were nearly forced to submission by starvation.

You must admit that the German battleships played no part in reducing us to a state of starvation.

You must admit that if our battleship superiority had been double what it was they could not have protected us from starvation.

You must admit that the dominant arm of the war was the submarine. You must admit that our belief before the war that the submarine was only a toy resulted in our coming to the brink of losing the war. You must admit that this erroneous idea before the war resulted in our blunder of building the wrong weapons to combat the submarine.

Further on he says:

I do not understand why my friend Admiral Waymouth did not add that she must be able to fly and dive.

This pattern of vessel is at present not on the market. When they are every country will want a lot of them, and I shall be early in admitting that this battleship is the backbone of a navy.

Admiral Waymouth's idea of war is splendid. We must carry the war into the enemy's country, destroy his fleet, his coaling stations, docks, fortifications, and his important coast towns. Our battleships did all these things 100 years ago, but they did not do any of them during the last war. *On the contrary, our battleships, if there were any submarines about, kept well away from the enemy's country, from his coaling stations, his docks, his fortifications, and his important coast towns.*

What is the use of a battleship?

Mr. KING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Utah?

Mr. BORAH. I yield.

Mr. KING. The writer of the article to which the Senator has just referred commented—I do not know whether in a complimentary spirit or otherwise—upon lawyers. May it not be said that most lawyers, whether in Great Britain or the United States, are for peace and for the upholding of law and order, and that those who have been the promoters in the main of large battleships and munitions of war and armaments have been either the manufacturers of munitions or naval and army officers? As a rule you will find the naval officer and the army officer ardent advocates of big armies and big navies.

Mr. BORAH. I think what Admiral Scott had in mind was that in all probability a committee of lawyers would not know very much about what constitutes a fighting navy. I do not think he was reflecting upon the general morale or the patriotism of the profession, but rather upon a possible lack of knowledge in regard to that particular matter.

I would like to say here, too, Mr. President, that if there is any way under our bureaucratic system of government to release the members of the Navy to an expression of their real views on this subject I should like to have it done. I know there are men high in the service of this country who have long been connected with the American Navy who feel that the expenditure of money upon these battleships is a waste of money, and if we could have the same freedom of discussion that is taking place in England upon this subject I think we would be able to arrive, possibly, at a sound conclusion, and I doubt if we shall ever arrive at a sound conclusion in any other way. As a layman I might have my view about it, but we must have the unbiased and uncontrolled view of those who have made a life study of it. They must be permitted to say what they think without being brought to task for doing it.

I read from an article in the New York Tribune, and I happen to know the party who wrote this article. I feel perfectly safe in asking the Senate to give particular attention to it, and if we have an investigation the party will be perfectly willing to state his views in a more extended way. He said:

We are face to face with a knotty problem: What constitutes an up-to-date fighting navy—a navy with the weapons and organization best designed to meet the conditions of the present and the near future in naval warfare?

1. *The submarine. In a lecture at the Army General Staff College more than a year ago Capt. Hart, United States Navy, estimated that 10,000 officers and men constituted the maximum force employed by the Germans in their submarine campaign. And yet this small force came within an ace of starving England and winning the war. Despite the Grand Fleet and allied navies, despite the millions of land forces on all fronts, the submarine dominated the situation at the most critical stage of the war. Can this fact be ignored?*

Again:

Reviewing briefly, we see that the dreadnaught fleet is terribly menaced. It must be protected at all times—at anchoor or at sea—by destroyers, submarines, mine layers, and a strong air force. It can not exist, still less can it attack, without auxiliary flotillas above and below.

There are distinguished authorities who declare that the dreadnaught is useless to-day. In September, 1919, Admiral Lord Fisher wrote: "Air fighting dominates future war, both by land and sea. It is not my business to discuss the land, but by sea the only way to avoid the war is to get under the water. So you are driven to the internal combustion engine and oil. That's why I keep on emphasizing that the whole Navy has to be scrapped." Admiral Sir Percy Scott agrees with Lord Fisher. He declares that the dreadnaught must hide in hermetically sealed harbors to avoid submarines, and that the harbors must be roofed over as a protection from bombing planes.

* * * * * * *

Between these two extremes we must take our stand. For the United States a midposition is wisest for the present. We should not scrap our dreadnaughts nor our surface fleet, but we must realize the weakness and limitations of such craft. *Pending the development of menacing weapons, and in view of the fact that our surface fleet is strong in dreadnaughts to-day, it would seem that we should suspend the building of ships that may be doomed in the near future and supply the Navy with the submarine and air forces which are necessary to the effective protection and offensive use of our surface ships.*

* * * * * * *

The need of immediate and intelligent action is imperative. It has been shown that there is not one up-to-date long-range submarine in our Navy to-day.

Thus, on the upper and lower planes of a modern fighting Navy, the United States is unprepared for war. With these facts staring us in the face, is it not manifest that the money available should be expended to supply submarine and air forces before we build any more capital ships? It is simply a question of placing the money where it will do the most good. If our future enemy advances on the upper and lower planes, our surface fleet, in its present condition, would be seriously menaced. It is a national emergency that now confronts us.

Mr. President, as I understand, we have initiated the building of some 16 battleships, which cost about $40,000,000 apiece now. That means an expenditure of $640,000,000. The idea which I had in mind when I introduced the resolution was that we should know, as definitely as it can be known before we continue this program, that it will bring us an efficient navy. We certainly do not desire to build to the extent of $640,000,000 and then find ourselves in 1925 with an obsolete navy. I am informed that the Agricultural appropriation bill carries altogether $33,000,000. That is $7,000,000 less than one of these possibly obsolete battleships costs. It is bad enough to have to spend this money at all, but it is indefensible to spend it unless we know it gives us the most modern of navies.

I am not one of those who believe in a weak navy or a small navy, unless our security can be arranged through understandings or agreements which make us equally safe. I presume that everyone, however, whether he is for a large navy or small navy, would like to know whether the navy is to comply with those standards, which the best investigation and thought declare to be an efficient navy.

I do not desire at this time to go further than simply to call attention to this condition of affairs in order to justify the introduction of the resolution. If there is not to be a report upon such information as we now have, then, of course, it ought to be followed by a resolution which would provide for a thorough investigation. If the report coming back from the Committee on Naval Affairs should disclose that we are without the information which we ought to have, and that a thorough investigation of the subject should be had, I shall be glad to offer the resolution which will provide it.

There is another proposition connected with the suspension of the building program, and that is the question that possibly in the near future we may arrive at some understanding with Great Britain and Japan with reference to the building program of the future. Whether that will result in anything substantial or not, if the other reason for delaying is a sufficient reason, it is very fortunate that the two propositions come together at this time. I have thought that it was not inappropriate, not having heard from other sources, to introduce the resolution and call for the information. I want, above all things, to see an agreement with Japan and England which will enable us to cut down our burdensome expenses. If that can not be had, then I want to see the most efficient navy possible for the money which we put into it. Both these propositions can be carried along together, and both should have prompt attention and prompt action.

Mr. SMITH of South Carolina. May I ask the Senator a question?

Mr. BORAH. Certainly.

Mr. SMITH of South Carolina. Has the Senator any information which would lead him to know or believe that the Navy officials have made or are making any investigation as to the

efficiency of our present type of ship as compared with the submarine?

Mr. BORAH. I have no information except that I saw in yesterday's paper a statement to the effect that the Secretary of the Navy had initiated an investigation or called upon the board for information in regard to it. If there is any information, or if there has been any investigation, I have not been informed.

Mr. SMITH of South Carolina. I presume the present naval program is the one that was outlined and instituted quite a good many years ago?

Mr. BORAH. Five years ago.

Mr. SMITH of South Carolina. Five years ago, and it is in pursuance of that program that we have provided for the building of ships. All the information which the Senator has given the Senate has grown out of the last five years, and particularly the last three years, when the German submarine manifested its efficiency in time of war. I was wondering if the Senator was informed as to whether our naval officials have taken sufficient cognizance of that fact to ascertain whether it would be advisable for us to carry out the program of five years ago or to supplement it with such recommendations as the submarine has manifested may be necessary?

Mr. BORAH. I am not informed as to what the Navy or the Secretary of the Navy have done in regard to the matter. My remarks should not be construed as a criticism of the Secretary of the Navy for having failed to make investigation, because I do not know what investigation has been made. I only know that the legislative body which must pass upon the appropriations and continue the building program, has no information before it officially, or otherwise really, with reference to the matter. If the Secretary of the Navy has conducted an investigation and has information which justifies the present program, I presume the Committee on Naval Affairs will bring it out in their report. If he has not, I feel sure that it ought to be done before we go any further.

Mr. GERRY. Will the Senator yield?

Mr. BORAH. I yield to the Senator from Rhode Island.

Mr. GERRY. I will state for the information of the Senator from South Carolina, and possibly it may clear his mind on the subject, that the 1916 program was not carried out at that time owing to the war. For example, the building of battleships was laid aside in order to build destroyers, and a great many destroyers were built. A great many of them are now completed, but since that time naturally naval officers have studied the conditions that have arisen out of the war. As soon as the destroyer program was carried out and the emergency for destroyers was over, they laid down these battleships, as I understand it, with the knowledge gained from the experiences of the war.

In other words, it is not simply a carrying out, as I understand it, of a program of five years ago. It is carrying out a modern program, the experience gained from the war being taken advantage of.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. BORAH. Yes; in just a moment.

Mr. GERRY. What I have stated was in answer to the Senator from South Carolina.

Mr. BORAH. I assume—and I think I have information which justifies the assumption—that our Navy has taken advantage of the revelations made by the battle of Jutland, so far as perfecting the battleships is concerned.

Mr. GERRY. And the battle cruiser, I will say to the Senator.

Mr. BORAH. And the battle cruiser; but the larger question, whether we are going to depend in the future upon surface ships at all, I understand has not been gone into. However, as to that I may be mistaken.

Mr. GERRY. I will state to the Senator that naturally naval officers have been discussing that question in this country and in England, and the extracts he has read show the English are debating it thoroughly.

I will also say to the Senator that I have some views that I shall express in the future on this subject that may perhaps be of some use to him, although I do not think I can concur in the statement in the excerpts which the Senator has read that the German policy of building submarines would give command of the sea to the nation which adopted that policy. However, I understand from the statement of the Senator from Idaho that that is not his own opinion. The fact stands out very clearly that there were no German merchant ships on the sea during the war unless they were raiders, and that the English merchantman was able to feed the English, although with difficulty, on account of the submarine campaign until that was stifled. But the English merchantman still kept the sea, and the fact is that the nation which had the capital ships, the dreadnaughts, was the nation that was able to maintain that control and the nation that did not have a preponderance of those ships was bottled up.

Mr. BORAH. Yes; I am familiar with that argument, because, of course, it is the argument which has been made by the men in England who believe it, but I think there is a very reasonable answer to it. However, I am not going into a long discussion to-day.

Mr. McKELLAR. The Senator knows I am in very hearty sympathy with his disarmament suggestion. Could the Senator give us any information as to how many of the capital ships have already been contracted for and begun? As I have understood it, all of them have been contracted for and a number of them have been begun and a great deal of work has been done on many of them. I was wondering what effect it would have if we stopped the work now. What would be the cost to the country?

Mr. BORAH. That is information which I have asked for from the committee, as to the practical result of suspending building operations at this time. I do not know whether it is practical or not. I think it is, but I want full information.

Of course, if we should come to the conclusion that the surface ship is obsolete, there is no need of going ahead, no difference how far the contract is completed. I presume we will likely arrive at some compromise, such as finishing the ships practically completed and suspending with reference to those which may not be very far along. That, however, is merely a suggestion. I do not know what the real program will be. I have not been informed as to what is the attitude of those who direct our affairs here on that question.

I was going to say, however, that there was a statement made by the writer in the New York Tribune that there is not now with the American Navy a single modern, up-to-date submarine. That to me is a very startling proposition. I understand a submarine costs about a million dollars. We can take the cost of two battleships and expend the money for submarines and we would have 40 submarines upon the Atlantic coast and 40 submarines upon the Pacific coast. Just as a layman, not as an expert, but exercising that common sense which is the great reserve power of the American people and without which we would soon pass into mental bankruptcy, it seems to me that I would rather have 40 submarines strung up and down the Pacific coast, so far as any neighbor interfering with our affairs is concerned, than to have 8 or 10 battleships. You could take the money necessary to build four battleships and build a hundred submarines, and, so far as defense of our coasts is concerned, defy the world.

Mr. SMITH of South Carolina. I should like to have an expression from the Senator of his opinion as to the probability of any agreement among the nations of the first order as to disarmament. Of course, it is possible; but I ask the Senator what, in his opinion, is the probability of any such agreement?

Mr. BORAH. I have no doubt at all that an agreement could be reached if the people of the respective countries could have their voices heeded. Whether or not the militaristic forces, the armament forces, the armament trust, and the men who represent them both in this country and elsewhere are sufficiently strong to prevent the people from having their way, I do not yet know. They give some indication of activity. It may be that they will control the situation. There is no doubt that the masses of Japan, the same as the masses of this country, desire an understanding by which the two nations shall not enter into a competitive naval building program. It is equally true, in my judgment, in England.

Mr. SMITH of South Carolina. So the Senator is of the opinion that if there was any practical way of getting an expression of the views of the people who constitute those several countries, there is a practical probability, if I may use that term, of disarmament?

Mr. BORAH. Yes; I think there is a practical possibility of it. I think there is other good to be had from the effort, even if we do not succeed as fully as we desire. I think we owe it to the people of the country, before we put upon them any greater burden for naval armament, to demonstrate that the men in public places have used their utmost effort, and in good faith, to secure an understanding. We ought not to ask them to carry these burdens until it is demonstrated beyond peradventure that no understanding can be had and that therefore we are compelled to build as a matter of security and safety.

Let me say, too, and particularly to those who are very technical with reference to the proceeding, that if we do not demonstrate to the voters of the country that we have endeavored in good faith to secure a partial disarmament or complete disarmament, and that we have failed, and that there

fore there is no alternative left except, as a matter of security, to build, they will send a Congress here which will cut the appropriations regardless of whether we have a contract or not.

That is one thing in which I am particularly interested. I believe in an efficient Navy, but we build a Navy not as a toy, not for display, but for security and protection. If we can have the same security and the same protection in another way, we are under the highest obligation to secure it in that way; certainly we are under every obligation to try it, and to try it as speedily as we may.

Of course, there are two ways to defeat disarmament. One is to oppose disarmament and present the arguments against it. There are those who sincerely believe that we can not afford to disarm, even under an agreement, and with them I have no quarrel, although I differ with them. They have their own reasons and they act upon them. There are others who are unwilling to say that they are opposed to disarmament; they are perfectly willing to pay lip service to disarmament; but they conjure up all conceivable methods for delay, which is another way of killing the program.

Mr. KING. Mr. President, I perhaps have incurred the disapproval of some Senators because of my persistent opposition to appropriation bills, many of which, in my opinion, have been extravagant and carried items wholly unnecessary, and by my constant appeals to Republican Senators since they have been in power in Congress during the past two years to practice promised economies and reduce the Federal appropriations far below the limits indicated by reported measures. I have opposed since the armistice appropriations made for the War Department, as well as for the Navy, believing that the time had come for retrenchment and reform in these two departments, as well as in other executive departments of the Government. I have insisted that unless Congress reduced appropriations and relieved the people from the burdens of war taxation, the people would manifest their disapproval of our course by sending to both branches of the National Legislature men who would reduce the burdens of taxation.

The address of the Senator from Idaho brings strikingly before us the statesmanship of President Wilson and his great labors to secure the peace of the world and bring about world disarmament. From the peace conference at Paris he brought back to the American people an instrument—the covenant of the League of Nations—which provided, in a feasible and practicable way, for world disarmament. The able Senator from Idaho and others who opposed the treaty with Germany are seeking their realization of some of the vital things for which the league was organized.

One of the primary objects of the league was to reduce, if not abolish, standing armies, and relieve the nations from the heavy burdens which are incurred in the construction of battleships which become obsolete almost within a day. Statesmen and those who have sought the peace of the world have for many years endeavored to devise some working plan that would accomplish these ends. Various plans have been proposed and numerous efforts have been made, but all have proven abortive, and this century records the greatest of all wars—the most deadly, the most catastrophic that has ever afflicted humanity. During and immediately following the war, the afflicted peoples in every part of the world cried out for immunity from such horrors and cataclysms in the future. The League of Nations was to them an anchor of hope. It provided a plan for disarmament, and I assert that the more that plan is examined the more feasible it will appear and the stronger will it commend itself to the judgment of fair and impartial men. If those who supported the treaty were seeking vindication or satisfaction by reason of the position of some of those who opposed the league, it could be found in the present situation. There are many who sought the defeat of the treaty of Versailles who appreciate that the world must be relieved from the burdens of military armaments and stupendous naval programs. Efforts are being made to secure world disarmament, and particular efforts are now being directed to bring about a suspension in the construction of great naval battleships. Senators will also remember that one of the purposes of the league was to revive the economic and industrial conditions of Europe, as well as other nations, and to promote the welfare of the world.

It was realized that our prosperity depended upon the prosperity of Europe, and during the discussion of the league, those who advocated the ratification of the treaty insisted that with our entrance into the league the serious condition in Europe would be materially altered, and altered for the better, and that our foreign commerce would increase and the prosperity of the American people be greatly augmented. Only a few days ago we were impressively advised that our foreign trade was languishing and that unless Europe purchased more of our surplus products business and industrial conditions in the United States would become most serious. It was urged that we must find foreign markets for our products and so urgent was the situation that, in order to enable the purchase of our surplus products, we must aid in furnishing credits to foreign populations. Accordingly, the War Finance Corporation was revived with the expectation, as stated by some of the advocates of that course, that it would furnish credits to the extent of several hundred millions, indeed, several billions, of dollars to European peoples, and that with such credits they would be able to purchase American agricultural and manufactured products as well as American raw material, and thus benefit themselves and add to the prosperity of the American people.

One of the objects of the League of Nations, as I have stated, was to produce conditions in Europe that would enable the people there to obtain credits. This would have enabled them to buy American commodities and products. So, we are daily reminded of the advantages which the league would have given us and of the mistake of failing to take our place alongside our Allies for the purpose of consolidating the fruits of victory and of discharging obligations which the war, notwithstanding its victorious ending, imposed upon the allied nations.

Mr. President, I am in accord with the Senator from Idaho in his efforts to secure a reduction of the burdens which naval armament imposes upon the people. I believe that every effort should be made to reduce the costs of maintaining the Army and the Navy to the lowest possible limit consistent with national safety. Of course, there should be no hysteria in the consideration of this question. It is too important to permit prejudices or passions or mere sentimentality to determine our course. We must remember that we are in a dynamic world—a world filled with hates and jealousies, a world where racial antipathies find expression, and where suspicion and distrust and unrest abound. The history of the past must not be disregarded, nor must there be the view that the millenial era has dawned. But there are strong considerations, in my opinion, that call for a modification of the building program.

At any rate, the situation in the world today, notwithstanding the turmoil and strife, is such as to justify a plea world-wide in character for the reduction of the burdens resting upon the nations for military and naval expenditures. I think this is an auspicious moment to appeal for world support in a program calling for a reduction of armaments. Those who believe in the League of Nations can not do otherwise than favor a plan which seeks to unite the world in a common plan to reduce the military and naval burdens which in the past and even now press so heavily upon the people. While I regret that the practical plan proposed by the league is not being followed by our country, nevertheless I shall join in every reasonable and legitimate movement that seeks to realize the beneficent results contemplated by the disarmament program outlined and provided in the covenant of the League of Nations. However, the resolution of the Senator from Idaho merely calls for an investigation by the Naval Affairs Committee. I approve of the resolution, and as a member of the committee shall be glad to join with my colleagues in making such investigation.

It is obvious that the World War has taught us many lessons, and to continue now the program that was laid down four of five years ago seems to me to be absurd.

The Senator from Rhode Island [Mr. GERRY] has stated that the vessels, the construction of which was authorized before the World War, will be built, notwithstanding the lessons of the war, but that the form, as I understood his statement, will undergo some modification. In other words, the same number of capital ships will be built as was determined upon some four or five years ago, but there will be some changes and modifications in design and, of course, in construction. If I am in error, I shall be glad to have the Senator from Rhode Island correct me.

Mr. GERRY. The Senator from Utah is correct. It is contemplated that the same number of capital ships shall be constructed.

Mr. McKELLAR. Mr. President, if I may make a suggestion, as I understand, all of the capital ships referred to have been contracted for, and some of them have been seven-eighths finished, some of them have been three-fourths finished, and perhaps others have been one-half finished, while still others—I think the last one, as my information goes—has only recently been contracted for. What would the Senator from Utah do as to the ships which are under construction? Would he stop their construction?

Mr. KING. The mere fact that we have entered into contracts for the construction of ships would not deter me from halting the execution of those contracts, even if such action

subjected us to damages, if we do not need the ships or if a better plan of naval defense had been devised. It would be folly to build vessels not required, or the types of which were obsolete, or if the war revealed a cheaper and better method of attack and defense. If the experiences of the war have furnished us sufficient evidence of the unwisdom of carrying out the program agreed upon a number of years ago, then we should halt construction until an exhaustive examination can be made and a plan agreed upon that will meet the needs of the country and accord with the plan which technical naval men may recommend.

Mr. McKELLAR. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Tennessee?

Mr. KING. I yield.

Mr. McKELLAR. Mr. President, I am in hearty sympathy with the Senator from Utah and all other Senators who wish to enter upon a plan of disarmament; I agree with the Senator entirely that what armament we have should be the very best; but I am sure the Senator will agree with me that before we get through we shall have to leave the matter to experts in the Navy Department to determine which are the best instruments of naval warfare. They certainly would not authorize the building of ships unless they honestly felt they should be constructed. That is the difficulty, as it seems to me, of our taking action so far as the ships already contracted for are concerned. If there is a way to get around it, I should be very glad, indeed, to find it, for, I repeat, I am in hearty sympathy with the idea of disarming if it is possible to do so, and to the extent that it is possible to do so; of course, having in view, first and above all things, the security of our country.

Mr. KING. Let me ask the Senator, in view of the developments of the war and the information which has been conveyed to us, would he be willing now, upon the mere recommendation of the Navy Department, without investigation upon his part or without full and exhaustive investigation by naval experts and a committee charged with the duty of making such investigation, vote for an appropriation for completing the 15 or 16 battleships that were projected four or five years ago?

Mr. McKELLAR. With my very limited knowledge of such things, I think I should be guided by what the experts in our Navy Department may suggest about the matter. I desire to say that, so far as my own observation goes, the submarine is the most effective vessel in naval warfare. Germany made it so. My understanding has been that all during the war neither the British nor the American submarines were so well built nor quite so well equipped to enable them to do effective work, as were the German submarines. I think that was the general knowledge and experience of everybody. It seems to me that our Navy Department should develop the submarine so that we could have submarines which would be equal to the best and superior to the best, if that were possible.

Mr. KING. Mr. President, I have instituted no comparison as to the relative value of the capital ship and the submarine; both doubtless have their purpose. The point I am trying to make is that the experiences of the war have been of such a character as to call, in my judgment, for a revision of the prewar program, or, if not for a revision, at least for an exhaustive investigation to determine whether it would be wise in the light of the information which has come to us to continue the prewar program.

I have disapproved of the last two naval appropriation bills. I have felt that they called for entirely too great a program.

Mr. GERRY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Rhode Island?

Mr. KING. I yield.

Mr. GERRY. I should like to call the Senator's attention to the fact that in 1918, after the war was over, the Navy Department itself suggested the possibility, if there was to be no action taken on disarmament, of a new program in addition to that of 1916, namely, the program known as that of 1918.

Mr. KING. I recall, Mr. President, the recommendation of the Secretary of the Navy, and I do not think that that recommendation met with the approval of the American people. I am sure that if it were to be renewed to-day it would meet universal condemnation in the United States; nor would such a recommendation deter me from the position which I am now assuming, namely, that there should be an exhaustive inquiry with a view to determining what our naval program should be.

Mr. McKELLAR. Mr. President, will the Senator yield again?

Mr. KING. I yield.

Mr. McKELLAR. I dislike to interrupt the Senator so much, but I should like to ask him this question: Unless we have an agreement between England, Japan, and the United States providing at least for partial disarmament, does not the Senator think that it would be very unwise not to continue for our protection the building up of our Navy according to the present plans? Would the Senator be willing that England and Japan should continue to build, as they are now doing, enormous navies, and that the United States should not go along in equal steps?

Mr. KING. Mr. President, I believe the action of the United States will be followed by those nations; that is to say, if we adopt a policy of gradual disarmament and attempt in good faith to execute it; all other nations of the world will be guided by it. Let me say to my friend that my information is that Great Britain's naval program will be very much restricted from that which some of the naval officers of Great Britain desired should be followed. I have no doubt that if the United States restricts its naval program Japan will do the same.

Of course, if there should be a manifest purpose upon the part of other nations to continue to build capital ships and other war vessels we would be compelled, much as we might deplore the necessity, to make appropriations to build and maintain a Navy adequate and sufficient to meet any danger. But I am now only arguing for a full investigation as to what policy we should pursue. If the investigation proves that we should continue these heavy burdens for war vessels, we want to know the kind of vessels required. There is not that unanimity of opinion as to the types and the program to be adopted that should exist when hundreds of millions are involved and when a broad policy to guide the future is to be adopted.

The Senator from Idaho has called attention to the diversity of views of naval men. I know from my conversation with naval officers and with others that there is a contrariety of views as to the kind of vessels which we should construct. Is it not time that there should be an exhaustive investigation to determine what kind of vessels should be constructed, and whether we should adhere to the prewar program or whether we should adopt a modified one or an entirely different one?

The battle of Jutland has been referred to. The excellent book written by Admiral Jellicoe describing that famous battle furnishes, I think, strong evidence of the importance of developing the submarine. It shows how powerless the battleships are against these serpents of the deep; and there will also be recalled by Senators the terror of the British Admiralty when their fleet was in Scapa Flow and before the entrance to the harbor had been protected, for fear a little submarine might thread the mazes of the channel and enter the harbor, and destroy one or more of the great battleships constituting the Grand Fleet.

Mr. GERRY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Rhode Island?

Mr. KING. I yield.

Mr. GERRY. Does the Senator think that the submarines had any decisive effect on the action at the Battle of Jutland?

Mr. KING. I think so; indirectly if not directly. If the Senator will permit me, the fear of the German submarines, as I recall the facts, deterred Admiral Jellicoe from continuing the battle or remaining in the vicinity until daylight, and it is quite likely that even if he had received the message which Admiral Beatty wired him, which called for a different plan than that which Admiral Jellicoe followed, I do not believe he would have responded to it, partly because of his apprehensions based upon the presence of submarines under the control of the German admiral.

Mr. GERRY. Admiral Jellicoe turned away from the German fleet in the Battle of Jutland in order to avoid torpedo attack from destroyers, not submarines. The result of that maneuver was that he was unable to come in close contact with the German fleet. If Admiral Jellicoe had pressed his advantage—as to which there is a controversy now—a different story might have been written in regard to the future submarine campaign. Of course, his action is a question of naval controversy at this time, and has been ever since the battle; but the deterrent effect upon Admiral Jellicoe, and the decisive force that deterred him in that battle, was not, as I recollect, the submarine, but destroyer attack.

Mr. KING. The controversy between the supporters of Admiral Beatty and the supporters of Admiral Jellicoe will continue as long as men are interested in naval warfare; but I venture the assertion, with all due deference to my distinguished friend, that a careful examination of the record made by Admiral Jellicoe—not only the report which he first made to the British Admiralty, but as he recorded the events in his most interesting book—will confirm the view which I expressed, that the submarines were regarded as a factor in that great battle, perhaps the greatest naval battle that the world has ever seen. It is quite likely their work was negative rather

than positive. I concede that the torpedo flotilla was of vital importance, and the British ships suffered greatly from their attacks.

Mr. GERRY. If the Senator will yield, the statements in regard to the battle and the controversy that is going on—not only the statements made in Admiral Jellicoe's own report but the statements in the reports of other naval officers and of other naval critics—show very clearly that in that battle the submarine played very little part. The Senator must know full well that that battle was fought with ships going at 20 knots or better—the battle cruisers, of course, were going a great deal faster—that a submarine, with the number of destroyers and the number of surface ships operating, would, if it should come close enough to torpedo a battleship, have to submerge; that the fastest that the German submarine or any other submarine that we know of at this time can proceed at under water is 12 knots. The result is that unless the submarine is ahead of the battle fleet, she can not come in contact with the battleship she wishes to attack. She is losing ground constantly. The battleship is going at least two knots to her one. The result of this is that a submarine attack, after she submerges, can be made only when the battleships happen to run across her course. With the Germans proceeding the way they were in the Battle of Jutland, at great speed, it was impossible, when the fleets met, for the submarines to be in great force to assist the German attack, and the result of that is very clearly brought out in the whole account of the battle; and I doubt if one vessel of importance was sunk in that battle by a submarine, although some warships were torpedoed. It was the destroyers that made the attack with the torpedoes, not the submarines.

Mr. KING. Mr. President, the Senator proceeds upon the theory that the battle at every stage was a running battle, at great speed, whereas the facts are that there were slow circling movements and many vessels were so injured that they dropped out of the fighting line. But I am not contending that in the battle itself the submarines were active or greatly important; but the fear of their presence, the knowledge that there were many between the German fleet and its base was in the mind of the British commanders and influenced them in the course which they followed.

There was the fear of the submarine lurking in those waters, and the British admiral did not deem it safe to pursue the German fleet in the direction of the harbor to which it fled.

Mr. GERRY. I will say to the Senator that I do not believe it would have been possible for the Germans to have prevented action and changed their course, returning to their own port, if it had not been for the destroyer attack, as I said before, and Admiral Jellicoe changing his course on account of that attack. Then, when he resumed his course, it was too late for him to come in contact with the German fleet before night.

Mr. KING. Mr. President, it is quite obvious that if two such experts as the Senator from Rhode Island and myself differ respecting that battle, there will be differences between supporters of Admiral Beatty and Admiral Jellicoe and the adherents of Admiral von Scheer.

Mr. GERRY. I will say to the Senator that I am quoting entirely from the reports.

Mr. KING. The Senator places one interpretation upon the reports, and I do not quite agree with my friend upon the interpretation which he places upon them.

I was about to add one word, and then I shall conclude.

Mr. President, the Senator from Indiana [Mr. NEW] has been pressing for some time a very important measure. I am not sure that I agree with it in all details; but the situation now is such as to require, in my opinion, some coordination of the activities of the War Department and the Navy Department with respect to the production of aircraft. I think it is a mistake to have two departments building airplanes. There ought to be coordination in the construction of naval and military planes. I am not so sure but that an interdepartmental bureau, consisting of naval officers and Army officers, and perhaps one or more civilians, should be created for the purpose of devising the naval and military aircraft. Certain it is that the war has demonstrated the importance of aircraft, and we must make suitable provisions for the construction of the best aircraft that can be produced in the world. There must be a coordination of the agencies engaged in devising and producing naval and military planes, to the end that efficiency and economies will result.

EMERGENCY TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 15275) imposing temporary duties upon certain agricultural products to meet present emergencies, to provide revenue, and for other purposes.

Mr. WALSH of Montana. Mr. President, I inquire what is the matter before the Senate?

The PRESIDING OFFICER. The unfinished business, the tariff bill.

Mr. WALSH of Montana. I got an impression from the discussion that perhaps some other subject had been presented for the consideration of the Senate.

I desire to say at this time just a few words not upon the merits of the measure at all; but on Wednesday, at the conclusion of the morning business, I made a motion to proceed with the consideration of the measure that had heretofore been under discussion and consideration by the Senate, namely, S. 4746. Pending that motion the distinguished Senator from North Dakota [Mr. MCCUMBER] entered upon a discussion of the pending measure, and introduced his remarks with some comments on the appropriateness of the motion submitted by myself, presenting the view that the question addressed to the Senate was the relative importance of those two measures.

I do not care to have that condition of affairs go unchallenged. I very freely concede—indeed, I assert—that the pending measure is one of vastly greater importance than the one the consideration of which I sought to have at that time. Let me remark in that connection that the bill which was then under consideration is a bill the purpose of which is to change the law of the District of Columbia in relation to proceedings for forcible entry and unlawful detainer. The existing statute is an exceedingly drastic one, conceded I think even by its friends to be unusually unjustifiable, unnecessarily harsh with respect to tenants. The measure was reported by the Judiciary Committee, which thought an amendment to that law ought to be enacted.

It seemed a very small matter, and one that ought to be disposed of in a very short while. It received the consideration of the Senate something like two weeks ago, after the morning business had been transacted. Various amendments to the bill were proposed, they were discussed at some considerable length, and eventually either adopted or rejected, and the bill arrived at its final stage, and there only remained to be taken a final vote when the Senator from Washington [Mr. POINDEXTER] got the floor and consumed all the intervening time until the hour of 2 o'clock arrived, when the bill was displaced by the unfinished business before the Senate.

On last Tuesday practically the same proceeding was repeated. The bill was up for consideration after the disposition of the morning business, regularly before the Senate, and we went through with exactly the same procedure. After it had arrived at the final stage and the question was as to whether the bill should pass, the Senator from Washington [Mr. POINDEXTER] again took the floor and discussed the bill as though it were one which was then for the first time before the Senate. He discussed the general character of the bill, the general merits of the bill, and the usual statutes relating to forcible entry and unlawful detainer, and so on, until the hour of 2 o'clock arrived, when, according to the rules of the Senate, it was again displaced.

Those of us who are not unfamiliar with such a procedure had no hesitancy in arriving at the conclusion that the Senator from Washington, who is, for some reason or other, opposed to the bill, took that method of killing it, and it occurred to me that inasmuch as the discussion of the subject had been exhausted, as I thought, upon two separate days, if we could only keep the bill before the Senate for 10 minutes, the pressure upon the Senator from Washington from the friends of the present measure would be so powerful that he would desist from further discussion and we would have a vote on that bill.

So I desire to advise the Senator from North Dakota [Mr. MCCUMBER] that it was not upon the theory at all that the bill to amend the procedure in actions of forcible entry and unlawful detainer in the District of Columbia was of importance to the country greater than that of the pending measure, that I pressed the motion at that time. It was simply in the hope, and I may say in the expectation, that if the bill were kept before the Senate for 15 minutes more we should have been able to dispose of it either one way or the other, either to vote it up or vote it down, and then the regular unfinished business would come before the Senate.

I desire particularly to advise the Senator from North Dakota that I have no disposition at all to embarrass the presentation and discussion of the pending measure, and I have no part in any parliamentary purpose to obstruct its speedy determination.

RIGHT OF SUFFRAGE.

Mr. MCKELLAR. Mr. President, it is not often that I have anything to say about matters sectional. Somehow or other sectional matters have never appealed to me very greatly in my service in Congress. I am quite sure, so far as I can recall, that during the nearly 10 years I have served in the two branches of the Congress I have never mentioned a sectional

matter, and I would not do so now except for some statements which have been made, and but for a bill which has been introduced in another body which would very vitally affect the people of my State.

When I say I have not discussed sectional matters, it does not mean that I do not love the part of the country from which I come, for I do with all my heart, just as I love the whole country. As I feel about it, I put Americanism before sectionalism.

But we ought to be fair about such things, and I want to call the Senate's attention at this time very briefly to an article which has recently appeared, which I believe will make us all feel just a little bit more considerate of the various sections, and make us feel how easy and unfair it is to criticize others without knowing all the facts. The fact shown in this article is an exemplification of the good old Scriptural doctrine that we frequently see motes in other people's eyes without discovering the beams that are within our own.

The article is entitled "As Hartford sees us," and is taken from the Nashville Tennessean of January 24, 1921, and reads as follows:

[From the Nashville Tennessean, Monday morning, Jan. 24, 1921.]

AS HARTFORD SEES US.

The press of the United States, and especially that part of it which is hostile to the South, has had considerable to say on disfranchisement and reduction of Southern representation in Congress since Congressman TINKHAM introduced his South-baiting resolution.

There is nothing new in what the New England press has to say of us, but it is rarely that we see so frank a statement as that which appeared in the Hartford (Conn.) Times:

"If Negroes are to exercise their rights under the Constitution, they can drive out of power every officeholder in the extreme Southern States. As they become more dissatisfied over their impotence in political affairs, and if they can see no change in the South, they will come North, thus depriving the South of labor which it needs."

The statements of New Englanders have gone unchallenged so long that a comparison of election restrictions of that group of States with the 11 States of the so-called "solid South" may be of interest.

In the New England group there are six States. Each and every one of those States has hedged the ballot box with restrictions. They are:

Connecticut: Good moral character. Ability to read the Constitution.

Maine: Ability to read the Constitution and write name. Paupers and persons under guardianship are denied the right to vote.

Massachusetts: Ability to read the Constitution and write name. Poll tax.

I stop long enough to say that if we had that law in Tennessee there would be many more deprived of the right to vote than are deprived there now under our law. The law of Tennessee, so far as Negroes voting is concerned, is very much more liberal than the law in Massachusetts, the home of my friend Congressman TINKHAM. The article continues:

New Hampshire: Ability to read Constitution and write name. Paupers and nontaxpayers are denied the right to vote.

Rhode Island: Property qualification. Paupers and persons under guardianship denied right to vote. Registry tax of $1 required.

Vermont: Good behavior. Ex-Confederates are denied right to vote.

Four out of the six States have educational qualifications; three out of the six insist upon the ability to read and write; two bar nontaxpayers; and one disfranchises ex-Confederates, the only other State in the Union to have a similar law being Kansas.

In the Southern group there are 11 States. One of them, Kentucky, has no restrictions. The others are:

Arkansas: Poll tax.

Alabama: Property or ability to read and write, and employment.

Florida: Ability to read Constitution and write name.

Georgia: Ability to read.

Louisiana: Property or ability to read and write.

Mississippi: Ability to read or explain the Constitution. Poll tax. Delinquent taxpayers denied the right to vote.

North Carolina: Ability to read and write. Poll tax.

South Carolina: Ability to read and write for persons not registered prior to January 1, 1898. Poll tax.

Tennessee: Poll tax.

Virginia: Poll tax.

Six of the 10 other States have poll-tax requirements; 7 have educational requirements, but 2 of these relieve voters of the ability to read and write if they are property owners; 2 States have optional property requirements, but none makes it mandatory.

In Arkansas, Kentucky, Tennessee, and Virginia it is easier to vote than it is in any single State of the New England group.

Taken as a group the restrictions of the New England States are much harder than those of the South.

With the exception of Mississippi, there is no Southern State which can compete with the New Hampshire voting requirements, and where Mississippi denies the right of voting to delinquent taxpayers, the greater number of those deprived of suffrage are whites, by reason of the percentage of property ownership in their favor.

If the Hartford Times advises the Negro to drive out the white officeholders in the extreme South, and, failing, to move North, the Hartford Times must not object if the Negro follows that advice when he goes North and drives the whites from political power there.

New England is a long way from the South. The "down-easter" does not understand either the Negro or the South.

The South understands the Negro, and the Negro understands the South. The southerner is eager and willing to help him if he will help himself. The only Negro problem in the South is the problem presented by the busybodies, whose sole interest in the Negro is to use him to attract the spot light of publicity. Social climbers nowadays "go in" for things. The Negro is New England's social toy.

If the Hartford Times will take the trouble to investigate the family trees of some of those who are lamenting the lot of the Negro, it undoubtedly will find that those who are shedding crocodile tears for the disfranchised Negro are enjoying the fortunes which their forbears accumulated in the African slave trade.

Mr. GERRY. The Senator has just called attention in the article he has read to the iniquitous provision which exists in the Rhode Island law in regard to the qualifications of voters; I refer to the property qualification. I will say, for the Senator's information, that the Democratic Party in my State for years has fought for the abolition of that qualification, and that even Republican governors have, in their messages to the legislature, recommended its abolition. But, unfortunately, the Republican legislature, which has been in control in my State for many years, has always turned a deaf ear to this plea of our people.

Mr. WALSH of Montana. Mr. President——

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from Montana?

Mr. McKELLAR. I yield.

Mr. WALSH of Montana. That opens up a very interesting inquiry, and I desire to address a question to the Senator from Rhode Island. My recollection is that at the time the Constitution of the United States was adopted practically every one of the 13 States had a property qualification in its statutes in relation to suffrage. These were one by one modified so as to grant the right of suffrage without reference to the ownership of property.

Mr. McKELLAR. Rhode Island, I think, is the only State which still has such a qualification.

Mr. WALSH of Montana. It was not accomplished, of course, without a struggle. It may be recalled that the State of Maryland was the pioneer in the new Democratic movement to remove the property qualification to the right of suffrage, and that the enactment of the statute so incensed Justice Chase, of the Supreme Court of the United States, that he indulged in a very bitter harangue at the circuit where he was holding court against the Legislature of the State of Maryland for enacting so revolutionary a statute, evidently leading, as he thought, to the disruption of all government.

His charges thus made became the foundation for impeachment proceedings that were subsequently instituted against him.

I was interested to know just exactly what are the considerations which thus have induced the State of Rhode Island during all this long course of years to retain an obsolete system so inconsistent with modern Democratic ideas.

Mr. GERRY. I will say to the Senator from Montana that it is purely for the purpose of political control.

Mr. WALSH of Massachusetts. May I not add also that one of the purposes for these qualifications in various States of the Union has been to prevent the immigrant class from being readily and speedily given an opportunity to exercise the franchise?

Mr. McKELLAR. All of which goes to show that it is a local question in the various States. One State desires to exclude one class and another State another class. I wished to call the attention of the Senate and the country to the fact that, so far as the laws are concerned, the New England laws are very much more severe in denying the right of suffrage than those in the community from which I come. If all the Negroes, without regard to literacy, migrated to the New England States I am sure that under the laws above set out they would be deprived of their voting privileges more than they are now deprived in my section, and especially in my State. The various sections of our country should be fair one to the other.

Mr. FLETCHER and Mr. McCUMBER addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Tennessee yield, and if so, to whom?

Mr. McKELLAR. Will the Senator from Florida pardon me while I yield to the chairman of the committee?

Mr. FLETCHER. Certainly.

Mr. McCUMBER. I wish to suggest to the Senator that inasmuch as we have discussed everything this afternoon from Negroes to battleships, will not the Senator kindly give us his views in some way upon the bill which we have before the Senate?

Mr. McKELLAR. I hope to do that before the debate is closed. I understood from Senators on your side, I believe the chairman of the committee among others, that the fullest latitude was to be given for the debate on the subject. The subject of the tariff is a very complicated one and deserves the most careful and painstaking scrutiny. We should not hurriedly and thoughtlessly put into effect these prohibitive rates. Each should have careful investigation and discussion. Only two subjects, I believe, wheat and sugar, have as yet been discussed at all. Much latitude in debate should be allowed.

Mr. McCUMBER. If that latitude, of course, includes discussion of the Negro problem, the battleship program, and so forth, the discussion of the Senator is well within the limits.

Mr. McKELLAR. It is in accord with the customs of the Senate as I have found them to be since I came here, I will say to the Senator. I have known few, if any, bills of any importance to pass without other matters being discussed during such consideration. It may be a bad practice, but it is one of the favorite practices of the Senate, as we all know. I now yield to the Senator from Florida.

Mr. FLETCHER. The State of Florida was mentioned by the Senator in this connection. I wish to state that the election laws in Florida provide for the qualification of voters that they shall be registered, that they shall pay a poll tax, and that they shall vote the secret ballot under the Australian ballot system. It applies to black and white and everybody else. There is no discrimination whatever.

Mr. McKELLAR. Does it apply to all counties in the State?

Mr. FLETCHER. Yes; to all counties.

I wish to read from an editorial recently published in the Florida Times-Union, as follows:

> The laws of the State of Florida make no discrimination whatever on account of race, color, or previous condition of servitude. There is no prerequisite to the exercise of the right of suffrage that applies to the black man that does not apply to the white man. The law is such as to discriminate against ignorance, but it discriminates against white ignorance just as much as against black ignorance.

That discrimination against ignorance means that each elector is required to go into a booth and mark his own ballot secretly and without any communication with anyone else.

> A discrimination of this kind which is now treated as an offense, was considered both right and desirable when this State and a number of others adopted systems that were intended to keep from voting men who could not read their ballots and mark them properly. It was called an electoral reform then and it would be classed as such now by the Republicans who are attacking the South if States that voted the Republican ticket were in question.

That is a clear statement of the situation in Florida.

EMERGENCY TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 15275) imposing temporary duties upon certain agricultural products to meet present emergencies, to provide revenue, and for other purposes.

Mr. HARRISON. Mr. President, the Senator from North Dakota [Mr. McCUMBER] a moment ago suggested to the Senator from Tennessee [Mr. McKELLAR] that we ought to begin a discussion of the tariff question and lay off of the Negro, as he terms him, and the battleships for awhile. The Democratic side of the aisle has been waiting all day, or, at least, since the distinguished Senator from North Carolina [Mr. SIMMONS] made his very able speech revealing the iniquities of the present so-called emergency tariff bill, for some one on the other side of the aisle who favors the legislation to speak in its behalf. We were in hopes, and we still have hopes, that some one on that side of the aisle will give some reason to the Senate for some of the provisions which are embodied in the so-called emergency tariff bill. The only justification that has been offered for any provision in the bill is with reference to wheat, and that was offered by the distinguished Senator from North Dakota.

Mr. McKELLAR. What other speeches have been made in favor of the tariff bill except the speech of the Senator from North Dakota?

Mr. HARRISON. The so-called emergency tariff legislation includes 18 various articles or more, including sugar, cottonseed oil, cotton, fresh meat, live stock, hides, shoes, and innumerable other propositions that mean so much to the American people and are so important, none of the provisions with reference to which have been justified or attempted to be justified in a speech upon the floor of the Senate by a single Senator on the other side of the aisle, except the Senator from North Dakota on the question of wheat alone.

Mr. SIMMONS. And yet they are ready for a vote right now.

Mr. HARRISON. And yet the Senators on that side are crying for a vote. We all know what that means. I have been trying for three days to get the floor to make a speech here, and I can not do it because Senators intervene and interrupt.

Yesterday the Senate recessed over my protest and over the protest of this side of the aisle. I was in the midst of a speech, I was deeply interested in it, my mind concentrated upon it, trying to reveal the iniquities of the proposition and point out to the American people the infamy of the act of the Republican majority here in trying to impose this greater burden upon the backs of the toiling masses and the consumers of the land, when the Senator from Pennsylvania [Mr. PENROSE], with all the majesty that he possesses and the great power of the chairmanship of the Committee on Finance, interrupted me and got into almost a wordy controversy with the Presiding Officer over his right to suggest the absence of a quorum so that he might ask the Senate to take a recess.

There was a majority on this side of the aisle who did not want to take a recess, who did not want any suggestion of the absence of a quorum to be made in the midst of a Senator's speech about the infamous provisions of the bill, and yet a recess was taken. So I am going to ask now, because at the time I was discussing the sugar provisions when the Senator from Louisiana interrupted me, to have read at the desk a very interesting article that appeared in the Evening World of January 20 on the very important question of sugar. I know that the Senator from North Dakota respects the views of this great American paper and that the Senate will be edified to hear what it says. It is headed "Trick tariff sugar boost recalls threat of frust, 'Our losses must be paid.'" I ask to have it read from the Secretary's desk.

Mr. WALSH of Montana. Pending the reading of the article, I desire to inquire of the Senator from Mississippi about the proceedings here to-day. I was obliged to be absent a good portion of the day in connection with the work of one of the committees of the Senate. My understanding is that the discussion of the naval program, which took up a good portion of the afternoon, was precipitated by some remarks made by a Senator upon the other side of the aisle.

Mr. HARRISON. The Senator from Idaho [Mr. BORAH], I will say to the Senator from Montana, made a very eloquent and very able speech upon that question and started the discussion, after the distinguished Senator from North Carolina [Mr. SIMMONS] had made his very able speech on the emergency tariff bill, which was not attempted to be answered by any Senator on the other side of the aisle. They sat in their seats dumbfounded and made no reply to it, and would not even ask the Senator questions so that he might reveal the various misrepresentations which they are trying to put forth to the American people.

I ask that the article I have sent to the desk may be read.

The PRESIDING OFFICER. Without objection, the Secretary will read.

The Assistant Secretary read as follows:

TRICK TARIFF SUGAR BOOST RECALLS THREAT OF TRUST, "OUR LOSSES MUST BE PAID"—FORDNEY MEASURE'S TAX ON CONSUMERS, $366,000,000, WOULD JUST COVER LOSSES OF SUGAR INTERESTS WHEN GOUGING PLANS COLLAPSED.

WASHINGTON, *January 20.*

The ultimate consumer received due notice of what Congress was going to do to protect the sugar interests, which, through greed and the exercise of bad judgment, had sustained immense losses, as long ago as the end of last September. At that time Edwin F. Atkins, an official of the American Sugar Refining Co., who has since allied himself with another big sugar concern, said in an interview:

"The fall in raw-sugar prices between July 1 and September 15 of this year (1920) has caused a loss of $250,000,000, which some one must stand."

The "some one" who has been selected by the sugar interests and their financial allies and their allies in the Congress of the United States to stand the loss has been identified. He is the purchaser of sugar at retail, and, as the Evening World revealed yesterday, he is expected to pay off the loss at the rate of 4 cents a pound, which is the increase in the price of sugar the Fordney emergency tariff bill would bring about.

Since the time Mr. Atkins gave out his interview the losses of the sugar interests have mounted to approximately $365,000,000. That the Fordney bill would impose a direct tax of about $366,000,000 on the people is illustrative of the fact that the gentlemen who prepared the sugar amendment are in pretty close touch with the sugar interests that want to be reimbursed by the people for their business losses.

The statement of the Evening World that the passage of the Fordney bill would automatically raise the retail price of sugar 4 cents a pound has been attacked by the sponsors of the sugar amendment, as a matter of course. But the Evening World's statement is based not only on information obtained from the best authorities in the country but on the amendment itself.

FIGURES PROVE CONTEMPLATED 4-CENT RAISE.

The amendment provides for a tax on raw sugar material not above 75° test by the polariscope of 2.13 cents a pound—this in addition to the existing tax of 1.004 cents a pound on imports from Cuba and 1.256 cents a pound on imports from other countries. The object of the bill is to drive Cuban sugar from the market in the United States until the present surplus supply is exhausted.

The bill further provides that for every additional degree of test over 75° there shall be imposed an additional tax of .078 of a cent. It happens that practically all the sugar affected by the sugar amendment in the Fordney bill is 96 per cent test. Therefore the bill actually imposes a tax of 2.13 cents a pound plus two times seventy-eight one-thousandths of a cent, making a total tax of 3.77 cents per pound. In other words, the bill, which professes to tax 75 per cent sugar, actually taxes 96 per cent sugar, and the difference between 96 points and 75 points is 21 points, and these 21 points add 1.64 cents to the nominal rate of 2.13 cents.

The sugar experts say that when the beneficiaries of the Fordney legislation tack the extra tax on their price they will make it an even number addition and charge 4 cents instead of 3.77 cents. Of course, this will amount to considerable of an extra profit when the vast amount of sugar involved is taken into consideration. It amounts to almost a quarter of a cent a pound, and a quarter of a cent a pound on an estimated consumption of 8,960,000,000 pounds makes a trifle of $22,400,000 which the sugar barons will pick up on the side—in the event of the passage of the Fordney bill.

PALMER'S MISTAKE IN HELPING LOUISIANA GROWERS.

* * * * * * *

On the 10th of last October it was quite apparent to everybody in the sugar business that the market was glutted with sugar beyond the point of immediate absorption. In other words, the supply was away ahead of the demand. There started from Washington to New York about that date the "flying squadron" of the Department of Justice to expose food profiteers in the metropolis. With the "squadron" was John B. Floyd, who had the title of statistician. Mr. Floyd on reaching New York said:

"The people of the United States will pass through another period of short supply of sugar before the end of the year and in the early months of 1921, I have no doubt."

We are now in the early months of 1921 and the surplus supply of sugar in the country amounts to 1,250,000 tons despite the predictions of a shortage by a statistician on the Government pay roll. Perhaps the accuracy of this prediction explains why all inquiries about the beet-sugar industry which reach the Agricultural Department are turned over to Truman G. Parker, who is very well known in Washington. Mr. Parker is a lobbyist for the beet-sugar interests. The authority for this comes from men in the sugar industry.

G. O. P. LOBBY IN HURRY TO PASS BILL.

Senator PENROSE'S declaration to the Senate yesterday that he intends to hurry the passage of the Fordney emergency tariff bill indicates that the men back of the measure want to rush it through before the people have a chance to learn what it is all about. The Evening World's exposé of the real motive of the measure—the reimbursement of the sugar interests and their allied financial institutions—has already set up some formidable hurdles in the path of the rush program, although the Evening World correspondent is informed that a canvass has been made and that Representative FORDNEY and Senators GAY, SMOOT, and PENROSE believe they have the votes to put the bill over.

Their hopes lie in the fact that they have taken care of every agricultural and stock-raising interest that has suffered business losses. The bill looks out for the wheat grower, the tobacco grower, the cotton grower, the frozen-meat industry, the butter and egg industry, and so on. It touches the interests of every Member of Congress having an agricultural constituency. To these is held out the implied threat that if they oppose the sugar amendment, the amendment in which they are most vitally interested is in danger. The word has been passed that the bill will have to go through in its entirety.

The original Fordney bill has been passed by the House. But after it reached the Senate Committee on Finance amendments were tacked onto it. Seven of these amendments were added last Saturday.

The trickery underlying the bill is shown by a statement given out to the Washington correspondents on Saturday that the increase on sugar would amount to only 2.63 per hundred pounds until the retail price reaches 10 cents a pound. The Evening World has shown that the increase to be passed along to the consumer amounts to 4 cents a pound and that the provision that the retail price shall not exceed 10 cents a pound is of no value, because it is made to apply to a condition that will not exist.

Mr. McCUMBER. Mr. President, the article which has just been read into the RECORD, after reciting the losses that have been incurred by the Sugar Trust, stated, in substance, that those who framed the particular amendment to the bill were very much in touch with the interest which desired to recoup those losses and to have the recouping done at the expense of the ultimate consumer. I do not believe that those who framed the amendment had anything to do or were in any respect in touch with the great sugar interests or the refining companies. It is in evidence which has been presented again and again before the Senate that there is a loss to the beet-sugar interests in Utah of about $4 per ton in manufacturing beets into sugar; there is also a heavy loss in Louisiana among the cane growers. In view of that condition, the Senators from Louisiana presented the matter of protection for sugar to the Committee on Finance. The Committee on Finance was impressed with the logic of their arguments and the necessity for the amendment; and so, although there was a difference of opinion, the committee by a majority vote inserted in the bill the amendment which was sponsored by the two Senators from Louisiana. I am certain that neither of those Senators has ever talked with a representative of the Sugar Trust or has performed his duties actuated by a desire to serve the particular interests of the refining companies.

Mr. KING. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Utah?

Mr. McCUMBER. I yield.

Mr. KING. I have a great deal of confidence in the Senator from North Dakota and in his desire to legislate for the interest of the American people. I have no doubt he has studied the question with much care, and I should like to ask him, in the light of his study of the question, what effect the pending tariff bill, if it shall be enacted into law, will have, directly and indirectly, upon the sugar purchaser—that is, the consuming public in the United States—to what extent will it raise prices?

Mr. McCUMBER. I think temporarily it will raise prices, and naturally so.

Mr. KING. Has the Senator any idea how much the tariff duty will cost the consuming public and how much it will inure to the advantage of the sugar producer?

Mr. McCUMBER. To-day, Mr. President, it is a question of life and death to the cane-sugar producers. I believe in maintaining the sugar industry of the United States; I think in the end it will be beneficial to do so. I think it may cost the American public a little more just now to purchase their sugar should the bill become a law, but I think it is better that we should make the sugar industry in this country self-sustaining.

Mr. KING. Has the Senator from North Dakota any idea how many millions, tens of millions, or hundreds of millions of dollars will be added to the burdens of the purchasers of sugar as a result of the enactment of this measure?

Mr. McCUMBER. I think it will be very few hundreds of millions, if it adds to their burdens at all. There are those on the committee, Mr. President, who are very much better informed as to the sugar industry than I myself am, and I will allow them to answer the question of the Senator from Utah. However, the Senator from Utah comes from a sugar-producing State, and I should be glad to have his opinion on the subject. If he sees reasons why this bill should not be enacted into law and sees in it any injustice to the consumers of the country, being interested in the subject, and sugar being a very important production of his own State, undoubtedly the Senator has more information on the subject, when it comes down to mere estimates of cost, than I myself have.

Mr. KING. Mr. President, if the Senator will pardon me, I was expressing no opinion in regard to the merits or demerits of the bill; neither have I had the advantage which the Senator has had of hearing the testimony which has been offered in support of the bill. He is a distinguished member of the important Committee on Finance; he has given years of study to tariff problems, and I was wondering whether information had been adduced before the committee that would show the additional cost to the buyers of sugar in the United States that would result from the passage of this bill. If no such testimony has been offered, then, of course, I shall not press my friend to answer the question.

Mr. McCUMBER. I think there was testimony offered on that subject, but I have it not before me.

Mr. KING. May I ask one other question of the Senator?

Mr. McCUMBER. Certainly.

Mr. KING. The Senator called attention to the fact that unless this measure was passed the sugar industry in the South might suffer materially. May I ask the Senator whether it was the purpose of the Finance Committee to take care of all business enterprises in the United States in all lines of industry that were suffering during the present period of readjustment? I may say to the Senator before he answers that question, if that be true, then we should take care of the laboring men who are thrown out of employment; we should take care of the retailers who without fault have sustained great losses; we should take care of the cotton growers who have been compelled to sell their cotton, if they could find a market at all, at less than the cost price; we should be compelled to pay the woolgrowers compensation, perhaps by an appropriation for the losses which they have sustained. In other words, does not the Senator think that if we predicate our legislation upon the theory of making reparation for injuries which have been the result of the application of economic laws, we are not only prostituting the powers of the Federal Government, but we are going far beyond what we can possibly accomplish?

Mr. McCUMBER. I can answer the Senator, and answer him very briefly, indeed. The question has been answered several times.

The purpose of the committee was to afford relief to the agricultural industries of the United States, both in the matter of grain raising and sheep raising and stock raising, because we believed that they were suffering more from importations than any other industry in the United States, because we believed that the depression in the prices was due not alone to the present importations but to the immense importations which were about to come into the country; and we felt certain that as the American grain producer, for instance, can produce all of the grain that is necessary to be consumed in the United States, and as grain is coming in that is being produced very much cheaper than it can be produced in the United States, we ought to give to the American farmer as much as we could the American market until he could be placed upon his feet again.

These conditions will not last forever, of course, and we hope that the present deplorable conditions will be very short-lived; but we are certain that they are affected very materially by the vast imports and threatened imports that are coming into the country. I have left the matter of the discussion of the sugar schedule and all that affects the sugar interests to those members of the committee who, like the Senator himself, have greater expert knowledge upon that subject than I have.

Mr. KING. Mr. President, will the Senator permit just one question, and then I shall subside?

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Utah?

Mr. McCUMBER. I yield.

Mr. KING. The Senator has alluded to the importations of grain, and I suppose he alludes to the importations from Canada. I ask for information. Does not the record show that, taking it during the past year, our exportations to Canada of cereals and the various forms of cereals were substantially the same as the importations of cereals?

Mr. McCUMBER. I think not. I do not care about entering upon the discussion of that matter at this time, but according to the testimony of the Senator from North Carolina our exports to Canada would be very much lower. What I want to get at, however, is what the Senator bases his figures upon, and whether he includes tobacco, which, of course, is imported almost exclusively from the United States.

Mr. KING. The Senator will keep in mind the fact that I limited my interrogatory to cereals and the various forms of cereals. The reason why I make the inquiry is because the information which I have is that our exports of cereals in all forms to Canada are substantially the same as the importations from Canada. There is, perhaps, a difference of $20,000,000 during the year.

Mr. McCUMBER. Let me answer just that one matter. We do not export one bushel of wheat into Canada to be consumed in Canada.

Mr. KING. No; but we export flour and various forms of cereals.

Mr. McCUMBER. Yes; our American mills have been able, as long as the prices were quite similar between the two countries, by reason of possibly cheaper manufacture in the United States, to compete in the eastern market of Canada with American flour, and there has been considerable flour exported into Canada, and that has been the case right along for years—not merely this year, not merely last year, but for 50 years.

Mr. KING. I think the Senator will find upon full investigation—and, of course, I assume he has made it—that the exports of grain from the United States in flour and all cereal forms will total approximately in value what we have imported from Canada; and moreover, as the Senator from North Carolina has stated, Canada is one of our large purchasers, being the third on the list. I have no doubt, of course, that the distinguished Senator from North Dakota has had in mind, in the consideration of this bill, the effect of our attempting to interdict trade with Canada, and the possibility of reprisals upon our commerce, the result of which might be disastrous to the manufacturing interests as well as other interests in the United States.

Mr. McCUMBER. The Senator has not only had it in mind, but he discussed it fully two days ago, and does not wish to repeat what he said at that time.

Mr. HARRISON. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Mississippi?

Mr. McCUMBER. I have yielded the floor.

Mr. RANSDELL. Mr. President, I hope the Senator from North Dakota will let me ask him a question before he sits down.

Mr. HARRISON. Mr. President, am I recognized for a moment? I have been trying to ask a question of the Senator from North Dakota. I will take but a moment, if the Senator will pardon me.

The Senator from North Dakota was answering this article in the paper, and referred to the Senators from Louisiana [Mr. RANSDELL and Mr. GAY] as being the men who placed the sugar amendment in this bill. Did I understand the Senator to say that?

Mr. McCUMBER. Both Senators were necessarily before the committee and urged this sugar tariff.

Mr. HARRISON. Of course, neither of the Senators from Louisiana is on the Finance Committee. Neither of them had a vote in that committee. That is my understanding.

Mr. McCUMBER. They satisfied the majority of the committee of the righteousness of their contention.

Mr. HARRISON. Yes; but neither of those Senators was on the Finance Committee. That is my recollection.

Mr. McCUMBER. Why, certainly not.

Mr. HARRISON. The Senator from North Dakota voted for this provision in the committee, did he not? The Senator is in favor of this provision in the bill, is he not?

Mr. McCUMBER. I am in favor of every provision in the bill.

Mr. HARRISON. The Senator is in favor of this provision in the bill?

Mr. McCUMBER. And this provision.

Mr. HARRISON. And voted for it in the commiteee?

Mr. McCUMBER. And voted for it in the committee.

Mr. HARRISON. Yes. That was my question.

Mr. SIMMONS. Mr. President, I should like to ask the Senator from North Dakota a question.

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from North Carolina?

Mr. McCUMBER. Mr. President, I have not the floor. I have answered questions when Senators asked me questions, but I have not the floor.

Mr. SIMMONS. I wanted to ask the Senator from North Dakota a question.

The PRESIDING OFFICER. But the Senator from North Dakota has surrendered the floor, and declines to resume it again for that purpose.

Mr. McCUMBER. I shall be pleased to answer questions.

The PRESIDING OFFICER. The Senator from North Carolina can take the floor in his own right if he desires to do so.

Mr. SIMMONS. Mr. President, the Senator from North Dakota has just stated that he will be pleased to answer questions, and I will ask him a question. I will ask him, because I really want to know what the Senator's statement was. I am afraid I misunderstood him, and I wanted to ask him with a view of finding out whether or not I have misunderstood his statement.

I understood the Senator to say, and I wanted to ask him if he meant that, that the sugar men had lost large sums of money and were in a very distressful condition, and that he thought it was better that the general public should bear those losses than that the sugar interests should bear them. Am I correct in that understanding of the Senator's statement?

Mr. McCUMBER. No, Mr. President; I have not made any such statement.

Mr. SIMMONS. Then, I misunderstood the Senator. I thought that was the purport of his statement, and if that was the purport of his statement I thought it was a very remarkable statement.

Mr. RANSDELL. Mr. President, the Louisiana Senators seem to have been brought into this controversy, and I wish to thank the Senator from North Dakota for coming so generously and nobly to their relief. My colleague [Mr. GAY] introduced the amendment which has been the subject of so much criticism this afternoon. The reference in the New York World of January 20 is to this effect:

> That the Fordney bill will impose a direct tax of about $366,000,000 on the people is illustrative of the fact that the gentlemen who prepared the sugar amendment are in pretty close touch with the sugar interests that want to be reimbursed by the people for their business losses.

I do not know what that means, Mr. President, but if it intends to convey the idea that the Senators from Louisiana have any connection whatsoever with the so-called big sugar interests of the United States, I wish to deny it most emphatically. The amendment in question was prepared by my colleague [Mr. GAY], who lives in the sugar section of our State. It was prepared solely for the purpose of trying to lessen the awful losses which the sugar growers of Louisiana are suffering at the present time and with the purpose of including sugar in the emergency tariff bill, if we are to have such legislation to safeguard the suffering agricultural interests of this land; and that is the purpose of the pending emergency tariff bill.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from North Carolina?

Mr. RANSDELL. I will yield in a moment. If we are to have emergency tariff legislation—and that seemed to be the general opinion of the House of Representatives, which passed the pending bill by a good majority—the Louisiana Senators thought that sugar, which is in just as critical a condition as any other agricultural interest, should be included in it. The amendment was introduced by Senator GAY and pressed before the Finance Committee with all the force which my colleague and myself possessed, assisted by a delegation of our prominent cane growers. If there were any representatives of the so-called big sugar interests pressing this amendment before that committee, I never heard of it. I know there were none present when we were there. That is all I can say. I am not a member of the committee, and I do not know what may have been done by the big sugar interests; but I do know that the Louisiana Senators have no connection with them, and it is outrageous that we should be charged, even by innuendo, with doing anything improper when we try to look after the interests of our constituents and see that they are properly and fairly treated in a measure pending before Congress.

I now yield to the Senator from North Carolina.

Mr. SIMMONS. Mr. President, of course I know that the Senators from Louisiana had no improper motive with reference to this matter; but the Senator made the statement a while ago

that the purpose of that amendment was, in substance, to recoup the producers of sugar for the tremendous losses that they had sustained.

Mr. RANSDELL. To prevent them from suffering terrible losses. Some of them, I will say to the Senator, have their sugar yet on hand. Now, if they are going to lose 8 or 10 cents a pound, as they undoubtedly will if it is sold at present prices, and if this amendment will result in their getting 2 cents a pound—not 4, as indicated in this article of the New York World—a fraction over 2 cents a pound more—would that not mean a loss of 2 cents a pound less, which is a very considerable item?

Mr. SIMMONS. But the Senator said, as I understood him, that this amendment was for the purpose of protecting them against the tremendous losses that they have sustained; and I want to ask the Senator if he believes it is a proper function of tariff legislation or a proper exercise of the power of taxation to protect people against losses and enable them to recoup the losses that they have already sustained?

Mr. RANSDELL. I would like to ask the Senator, in reply to that question, what is the purpose of this tariff legislation? It is an emergency tariff bill to assist the agricultural interests. The agricultural interests of this country are in the slough of despond, about to be destroyed, and the country depends upon agriculture. If we can pass emergency legislation which will diminish the awful losses, which some of the best experts say amount within the past six months to $8,000,000,000; if we can do something by law to lessen this appalling decline in value of farm products, I will ask the Senator if he does not think it our duty as legislators to pass such legislation? I certainly think so.

Mr. SIMMONS. The Senator asks me what is the purpose of this legislation. I will tell him that one of the purposes of it is to deceive and mislead the people of the country, the farming element of the country, with reference to the benefits of tariff protection. Another one of the objects of it, with respect to sugar, is to pass the losses of the sugar industry from the people who have sustained those losses onto the consumers who are hereafter to purchase their products.

Mr. RANSDELL. Mr. President, I do not know whether or not this bill was gotten up to deceive the American people, but I certainly do not think so, and I am supporting it in good faith. Perhaps the Senator has satisfied himself that his charge is correct. I assume he thinks it is correct or he never would have made it. I do not think Congress often gets up legislation to deceive people.

But, be that as it may, it seems to me that this legislation may be very beneficial. I hope and believe it will prove so. It is known to all that the world is going through the greatest business and financial crisis of modern times. We are going through it not alone in the Old World, but also in America. Never have there been such hard times in many parts of the world as now. I hope they are going to get better; and this bill is an attempt—in my opinion, an honest attempt—to relieve agriculture in America.

Mr. President, I would dislike to believe that the many good men of both parties who voted for this bill in the House of Representatives—and many of the best Democrats there voted for it—were guilty of enacting a piece of deceptive legislation. Such a proposition is monstrous. They may have erred in judgment. All of us are liable to make mistakes. Possibly the proposed legislation is unwise. If so, it will not be the first piece of unwise legislation enacted by the American Congress. On its face it purports to relieve agriculture—a calling in which nearly one-half of our people are engaged—now in desperate straits.

If agriculture be destroyed, if it becomes so unprofitable that the people abandon the farms in very much greater numbers than they have in the past, if they flock into the cities in such large numbers that the productive capacity of the farms is very seriously reduced during the next 12 months, then I ask Senators what will happen. We will produce less food than we are obliged to have for the consumption of the people; we will bring about a most unfortunate state of affairs. There must be a balance between the country and the city, between the country producer and the city consumer, and if we are going to permit by our failure to legislate, a state of affairs in our great Republic so unfortunate to the producer that he can not earn a decent living or get a fair return for his labor, then, sirs, he is going to abandon the farm. That is what I believe this bill is calculated to prevent. It takes in practically every kind of agriculture. In the form in which the Senate has amended it it reaches nearly every farm industry. It is not local, it is not sectional, it is broad, it is comprehensive, it is far-reaching. It is calculated, sir, to satisfy the American farmer. It is calculated, sir, to give him hope.

It will soon be time to put the seed in the ground in my section of the country. A letter from home to-day tells me that the weather is good, and that everybody is plowing, getting ready to plant the coming crop. If we can not do something to give hope to the millions of farmers who have lost so heavily, I repeat that many of them will abandon the pursuit of agriculture. There can be no higher purpose or object of legislation than to promote the interests of such vast numbers of people, especially that great class known as agriculturists.

Mr. SMOOT. Mr. President, will the Senator yield for a question?

Mr. RANSDELL. Certainly.

Mr. SMOOT. Can the Senator tell why the junior Senator from Mississippi [Mr. HARRISON], in sending to the desk the article from the New York World, had stricken out all that part of the article referring to "Palmer's mistake in helping Louisiana growers"?

Mr. RANSDELL. The Senator from Mississippi is in the Chamber——

Mr. HARRISON. I did not want to embarrass the Senator from Louisiana.

Mr. RANSDELL. I was not in the Chamber when the article was presented.

Mr. HARRISON. Is that a candid answer?

Mr. SMOOT. Very candid; and it was exactly what I expected it was done for. But when I put an article in the RECORD I want to put it all in; I do not want to put half of it in.

Mr. HARRISON. If the Senator wants the other half read, I have no objection. I wanted to be courteous to the Senator from Louisiana.

Mr. RANSDELL. I will say to the Senator that I thank him very much; but Mr. Palmer has very broad shoulders. He is usually able to take care of himself. It would not embarrass me in the slightest degree, nor do I think it would embarrass Mr. Palmer, our very able and efficient Attorney General, for this criticism to go in the RECORD. He has been criticized so much that criticism slips off his shoulders like water off a duck's back.

Mr. HARRISON. I would be glad if that part of the article may be read.

Mr. SMOOT. Let me say——

Mr. HARRISON. If the Senator from Utah would have no objection.

Mr. SMOOT. I have none whatever.

Mr. HARRISON. Let us get it in the RECORD, and then we can discuss Mr. Palmer. May I suggest that the lines touching Mr. Palmer and the Louisiana grower be read?

The PRESIDING OFFICER. If there is no objection, the Secretary will read.

The ASSISTANT SECRETARY. The first line stricken through is:

Special from a staff correspondent of the Evening World.

The next is under the heading, "Palmer's mistake in helping Louisiana growers," and reads as follows:

The attitude of the administration has been singularly stupid on sugar. For instance, when Attorney General Palmer ruled that consumers in the southern territory served by the Louisiana planters should pay twice as much for their sugar as consumers on the Atlantic seaboard; the retail price of sugar in Atlanta, Ga., soared to 42 cents a pound, and it was undoubtedly higher in smaller communities. New Yorkers were getting sugar then at 23 cents a pound retail.

Mr. SMOOT. Mr. President, I want to say to the Senator from Mississippi if there is not any more truth in the charge made against Mr. Palmer than in some of the figures quoted in that article, it will never do Mr. Palmer any harm.

Mr. HARRISON. I think that is true; and that is why I have condemned the literature issued by the Republican campaign committee, which charged practically what is there charged, and which now the Senator from Utah condemns.

Mr. SMOOT. I did not say there was not any truth in it, but it is exaggerated; the rates in that article are exaggerated.

Mr. HARRISON. Exactly as they were exaggerated in the campaign literature of the Senator's party.

Mr. SMOOT. That is the construction the Senator may put on it; but I do not think there was an exaggeration in that literature.

The PRESIDING OFFICER. The bill is before the Senate as in Committee of the Whole.

Mr. HARRISON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Brandegee	Harrison	McNary	Smith, Ga.
Calder	Heflin	Overman	Smith, S. C.
Capper	Johnson, Calif.	Penrose	Smoot
Curtis	Jones, N. Mex.	Poindexter	Stanley
Dial	Jones, Wash.	Pomerene	Trammell
Dillingham	Keyes	Ransdell	Underwood
Elkins	King	Robinson	Wadsworth
Gerry	Knox	Sheppard	Warren
Gooding	McCumber	Shields	Willis
Hale	McKellar	Simmons	

Mr. CURTIS. I have been requested to announce the absence of the Senator from Wisconsin [Mr. LA FOLLETTE], the Senator from Iowa [Mr. KENYON], and the Senator from Missouri [Mr. REED] on official business.

The PRESIDING OFFICER. Thirty-nine Senators have answered to their names. There is not a quorum present. The Secretary will call the roll of absentees.

The reading clerk called the names of the absent Senators, and Mr. GRONNA, Mr. HARRIS, Mr. PHIPPS, Mr. SPENCER, Mr. STERLING, and Mr. SUTHERLAND answered to their names when called.

Mr. FERNALD entered the Chamber and answered to his name.

The PRESIDING OFFICER. Forty-six Senators have answered to their names. There is not a quorum present.

Mr. PENROSE. I move that the Sergeant at Arms be directed to request the attendance of absent Senators.

The motion was agreed to.

The PRESIDING OFFICER. The Sergeant at Arms is directed to request the attendance of absent Senators.

Mr. LODGE, Mr. COLT, and Mr. TOWNSEND entered the Chamber and answered to their names.

The PRESIDING OFFICER. Forty-nine Senators have answered to their names. There is a quorum present.

Mr. PENROSE. Mr. President, I move that the Senate take a recess until 12 o'clock to-morrow.

Mr. JONES of Washington. Will the Senator from Pennsylvania withhold his motion to enable me to submit a report from the Committee on Commerce?

Mr. PENROSE. I yield for that purpose.

COPPER HARBOR RANGE LIGHTHOUSE RESERVATION, MICH.

Mr. JONES of Washington. From the Committee on Commerce I report back favorably without amendment the bill (H. R. 14122) to authorize the sale of a portion of the Copper Harbor Range Lighthouse Reservation, Mich., to Houghton and Keweenaw Counties, Mich. I call the attention of the Senator from Michigan [Mr. TOWNSEND] to the bill.

Mr. TOWNSEND. This is a bill to which there is no objection. It provides for the sale of a portion of the reservation to the counties named. The Government approves the sale. I ask unanimous consent for its present consideration.

Mr. PENROSE. I ask that the unfinished business may be temporarily laid aside for the purpose of considering the bill.

The PRESIDING OFFICER. Without objection it will be temporarily laid aside.

Mr. KING. Let the bill be read.

Mr. HARRISON. Can not the Senator call up the bill in the morning?

Mr. TOWNSEND. If there is any objection I shall not insist on its consideration now.

The PRESIDING OFFICER. Is there objection?

Mr. UNDERWOOD. I did not understand the Senator from Michigan. Is it his desire to have the bill passed?

Mr. TOWNSEND. I do desire to have the bill passed. It is a bill which passed the House some time ago and it is now favorably reported. There is no objection to it anywhere. It simply provides for the sale of a portion of the lighthouse reservation in the upper region of Michigan.

Mr. UNDERWOOD. It has been favorably reported by the Senate committee?

Mr. TOWNSEND. It was unanimously reported from the Committee on Commerce.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

RECESS.

Mr. PENROSE. I renew my motion that the Senate take a recess until 12 o'clock to-morrow.

The motion was agreed to, and the Senate (at 5 o'clock and 10 minutes p. m.) took a recess until to-morrow, Friday, January 28, 1921, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

THURSDAY, *January 27, 1921.*

The House met at 12 o'clock noon.

The SPEAKER. Dr. Couden has requested that until his resignation takes effect Dr. Montgomery may substitute for him.

Rev. James Shera Montgomery, D. D., of the Calvary Methodist Church, Washington, D. C., offered the following prayer:

Almighty God, our heavenly Father, we beseech Thee to hear us. On the breath of our prayer is the confession of our sins. Deepen our sympathies toward all men who fail. Broaden our understanding of all the needs and problems of our country and heighten our aspirations beyond all those virtues that make men chivalrous, brave, and true. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read.

Mr. LANGLEY. Mr. Speaker, I make the point that no quorum is present.

The SPEAKER. Will the gentleman withhold that until the Journal is approved?

Mr. LANGLEY. I will.

The Journal was approved.

The SPEAKER. The unfinished business is the Agricultural appropriation bill. When the House adjourned last night the question pending was, Will the House reconsider the vote by which the seed amendment was rejected? The vote will come on that question first.

The question was being taken, when Mr. LANGLEY made the point that no quorum was present.

The SPEAKER. Obviously no quorum is present. The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and as many as are in favor of the motion to reconsider will, as their names are called, vote "aye" and those opposed will vote "no," and the Clerk will call the roll.

The question was taken; and there were—yeas 166, nays 153, answered "present" 2, not voting 108, as follows:

YEAS—166.

Almon	Fisher	McDuffie	Sisson

Focht	Kincheloe	Rainey, John W.	Whaley
Gallagher	Kitchin	Reed, W. Va.	Wise
Gallivan	Lesher	Riordan	Wood, Ind.

So the House voted to reconsider.

The following pairs were announced:

Until further notice:

Mr. GRIEST (for) with Mr. BUTLER (against).

Mr. ROBINSON of North Carolina (for) with Mr. DALLINGER (against).

Mr. RUCKER (for) with Mr. MCLEOD (against).

Mr. JAMES of Virginia (for) with Mr. HOLLAND (against).

Mr. KINCHELOE (for) with Mr. SHERWOOD (against).

General pairs:

Mr. TINKHAM with Mr. TAGUE.

Mr. NELSON of Wisconsin with Mr. KITCHIN.

Mr. SCHALL with Mr. HOEY.

Mr. SMITH of Illinois with Mr. KETTNER.

Mr. WARD with Mr. MILLIGAN.

Mr. SWOPE with Mr. RIORDAN.

Mr. SIEGEL with Mr. SABATH.

Mr. SANFORD with Mr. ROMJUE.

Mr. JAMES of Michigan with Mr. DREWRY.

Mr. SMITH of Michigan with Mr. SMITH of New York.

Mr. HULINGS with Mr. MAHER.

Mr. VOLK with Mr. CANTRILL.

Mr. BAER with Mr. HULL of Tennessee.

Mr. WOOD of Indiana with Mr. ROWAN.

Mr. SNELL with Mr. MOORE of Virginia.

Mr. HAUGEN with Mr. FERRIS.

Mr. MUDD with Mr. STEPHENS of Mississippi.

Mr. VARE with Mr. HARRISON.

Mr. HARRELD with Mr. UPSHAW.

Mr. REED of West Virginia with Mr. CAREW.

Mr. BRITTEN with Mr. O'CONNELL.

Mr. FOCHT with Mr. GALLIVAN.

Mr. NOLAN with Mr. MCKINIRY.

Mr. GRAHAM of Pennsylvania with Mr. IGOE.

Mr. SANDERS of Indiana with Mr. CULLEN.

Mr. KENNEDY of Iowa with Mr. WISE.

Mr. ROWE with Mr. JOHNSTON of New York.

Mr. COPLEY with Mr. MCGLENNON.

Mr. LITTLE with Mr. WHALEY.

Mr. MACGREGOR with Mr. MEAD.

Mr. HULL of Iowa with Mr. MAJOR.

Mr. EMERSON with Mr. SULLIVAN.

Mr. BURKE with Mr. MCLANE.

Mr. HILL with Mr. JOHN W. RAINEY.

Mr. COSTELLO with Mr. MOON.

Mr. MOTT with Mr. MANN of South Carolina.

Mr. BEGG with Mr. JOHNSON of Kentucky.

Mr. KENNEDY of Rhode Island with Mr. OVERSTREET.

Mr. MCCULLOCH with Mr. HENRY T. RAINEY.

Mr. SHERWOOD. Mr. Speaker, I voted "no," but I am paired with the gentleman from Kentucky, Mr. KINCHELOE, and I desire to withdraw my vote and answer "present."

The result of the vote was then announced as above recorded.

The SPEAKER. The question now is on the amendment.

Mr. LANGLEY. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 169, nays 150, answered "present" 5, not voting 105, as follows:

YEAS—169.

Almon	Echols	Lehlbach	Sisson
Aswell	Evans, Mont.	Longworth	Slemp
Ayres	Fields	McDuffie	Small
Bacharach	Fisher	McKeown	Smith, Idaho

Goldfogle	Lonergan	Robinson, N. C.	
Goodwin, Ark.	McCulloch	Romjue	
Graham, Pa.	McGlennon	Rowan	

So the amendment was agreed to.

The Clerk announced the following pairs:

On the vote:

Mr. LITTLE (for) with Mr. STRONG of Kansas (against).

Mr. GRIEST (for) with Mr. BUTLER (against).

Mr. KINCHELOE (for) with Mr. SHERWOOD (against).

Mr. ROBINSON of North Carolina (for) with Mr. DALLINGER (against).

Mr. JAMES of Virginia (for) with Mr. HOLLAND (against).

Mr. RAINEY of Alabama (for) with Mr. MCCLINTIC (against).

Until further notice:

Mr. HAUGEN with Mr. UPSHAW.

Mr. JUUL with Mr. RUCKER.

Mr. KIESS with Mr. GALLIVAN.

Mr. KNUTSON with Mr. GOODWIN of Arkansas.

Mr. MORIN with Mr. CALDWELL.

Mr. WARD with Mr. BLAND of Missouri.

Mr. SANFORD with Mr. DONOVAN.

Mr. HULINGS with Mr. STEEL.

Mr. WOOD of Indiana with Mr. GALLAGHER.

Mr. MUDD with Mr. BABKA.

Mr. NOLAN with Mr. CLEARY.

Mr. GRAHAM of Pennsylvania with Mr. GANDY.

Mr. ROWE with Mr. GOLDFOGLE.

Mr. COPLEY with Mr. LESHER.

Mr. HULL of Iowa with Mr. DOOLING.

Mr. MCCULLOCH with Mr. EVANS of Nevada.

Mr. STRONG of Kansas. Mr. Speaker, on this call I voted "no." I have a pair with the gentleman from Kansas, Mr. LITTLE, who is absent on a funeral party. I desire to withdraw my vote of "no" and answer "present."

The name of Mr. STRONG of Kansas was called, and he answered "Present."

Mr. MCCLINTIC. Mr. Speaker, I am paired with the gentleman from Alabama, Mr. RAINEY. I voted "no." I wish to withdraw that vote and answer "present."

The name of Mr. MCCLINTIC was called, and he answered "Present."

The result of the vote was announced as above recorded.

The SPEAKER. Does the gentleman from Oklahoma desire a separate vote on all of the amendments?

Mr. MCCLINTIC. Yes; I renew the request.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Page 47, after line 5, insert:

"For the care and maintenance of the Government kelp plant at Summerland, Calif., $5,000: *Provided*, That at any time during the fiscal year 1922 or thereafter, when the Secretary of Agriculture shall determine that the interests of the Government will be subserved thereby, he is hereby authorized to appraise the buildings, machinery, marine equipment, kelp harvesters, boats, leasehold or contract rights, and all other property of whatever nature or kind appertaining to the experimental kelp potash plant of the Department of Agriculture situated at Summerland, Calif., and to sell the same at public or private sale, at such price or prices, on such terms, and in such manner as he may deem for the best interests of the Government, and in consummation thereof to execute such instruments of conveyance as may be requisite, the proceeds from such sale to be deposited in the Treasury to the credit of miscellaneous receipts."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Page 49, line 21, after the word "fly," insert the word "grasshopper," and in line 22, strike out the figures "$150,660" and insert in lieu thereof "$175,660."

The question was taken, and the amendment was agreed to.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Page 54, line 1, after the word "destroying," insert the words "mountain lions," and on page 54, line 1, after the word "coyotes," insert the word "bobcats."

The question was taken, and the amendment was agreed to.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Page 73, line 2, after the word "farms," insert "in cooperation with the States Relations Service or Federal, State, and local agencies."

The question was taken, and the amendment was agreed to.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Page 78, after line 8, insert:

"Acquisition of additional forest lands: There is hereby appropriated out of any money in the Treasury not otherwise appropriated, to be expended under the provisions of the act of March 1, 1911 (36 Stat. L., 961), as amended, for the acquisition of additional lands at headwaters of navigable streams, $1,000,000."

Mr. BLANTON. Mr. Speaker, a parliamentary inquiry?

The SPEAKER. The gentleman will state it.

Mr. BLANTON. Is this amendment to appropriate a million dollars to buy land on mountain tops?

The SPEAKER. The gentleman heard the amendment if he was listening, and he can interpret it. [Applause.]

The question was taken, and the Speaker announced the ayes seemed to have it.

On a division (demanded by Mr. BLANTON) there were—ayes 89, noes 89.

Mr. CANNON. How many were there in the affirmative?

The SPEAKER. On this vote the ayes are 89 and the noes 89.

Mr. MCCLINTIC. Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 154, nays 146, answered "present" 2, not voting 127, as follows:

YEAS—154.

Ferris	Lesher	Riordan	Woodyard
Flood	Little	Robinson, N. C.	

So the amendment was agreed to.

The Clerk announced the following additional pairs:

Until further notice:

Mr. BENHAM with Mr. FLOOD.

Mr. MONDELL with Mr. MOORE of Virginia.

Mr. GLYNN with Mr. JAMES of Virginia.

Mr. NEWTON of Missouri with Mr. RAYBURN.

Mr. VARE with Mr. BEE.

Mr. GOOD with Mr. CLARK of Florida.

Mr. SMITH of Idaho with Mr. KINCHELOE.

Mr. KELLEY of Michigan with Mr. RUCKER.

Mr. WOODYARD with Mr. UPSHAW.

Mr. MCPHERSON with Mr. HUMPHREYS.

Mr. BROOKS of Pennsylvania with Mr. FERRIS.

Mr. DEMPSEY with Mr. CONNALLY.

Mr. LITTLE with Mr. BLACKMON.

Mr. WILSON of Illinois with Mr. GALLIVAN.

Mr. KELLY of Pennsylvania with Mr. ROBINSON of North Carolina.

Mr. BUTLER with Mr. DEWALT.

Mr. GRIEST with Mr. AYRES.

Mr. ECHOLS with Mr. DOREMUS.

The result of the vote was announced as above recorded.

The SPEAKER. The Clerk will report the next amendment.

Mr. BLANTON. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. BLANTON. The vote having been so close and also the majority leader just having come in, is it in order to move to reconsider?

The SPEAKER. It is not.

Mr. BLANTON. He did not get to vote, and I want to give him an opportunity to do so.

The SPEAKER. The gentleman can not debate the question.

Mr. CRISP. Mr. Speaker, it is only in order for one who voted against the amendment to make the motion.

Mr. BLANTON. I did not vote against it, but I did not know but that some one who voted against it wanted to change.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Page 79, after line 3, insert: "Experiments and demonstrations in live-stock production in the cane-sugar and cotton districts of the United States: To enable the Secretary of Agriculture, in cooperation with the authorities of the States concerned, or with individuals, to make such investigations and demonstrations as may be necessary in connection with the development of live-stock production in the cane-sugar and cotton districts of the United States, $51,500."

The SPEAKER. The question is on agreeing to the amendment.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. WALSH. Division, Mr. Speaker.

The House divided; and there were—ayes 110, noes 23.

Mr. McCLINTIC. Mr. Speaker, I suggest the absence of a quorum.

The SPEAKER. The gentleman from Oklahoma makes the point that no quorum is present. The Chair will count. [After counting.] Two hundred and thirty-eight gentlemen are present, a quorum. The ayes have it, and the amendment is agreed to. The Clerk will report the next amendment.

The Clerk read as follows:

Page 79, after line 23, insert:

"Passenger-carrying vehicles: That not to exceed $60,000 of the lump-sum appropriations herein made for the Department of Agriculture shall be available for the maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles necessary in the conduct of the field work of the Department of Agriculture outside the District of Columbia."

The amendment was agreed to.

The Clerk read as follows:

Page 84, line 15, after the words "and to provide means for the," insert the words "study and experimentation in eradication, and for the."

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read the third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

Mr. JONES of Texas and Mr. BLANTON rose.

Mr. BLANTON. Mr. Speaker, I am against the bill. I do not know whether my colleague is against it or not.

The SPEAKER. Is the gentleman from Texas [Mr. JONES] against the bill?

Mr. JONES of Texas. I am.

The SPEAKER. The Chair presumes that both the gentlemen are desirous to make a motion to recommit. Does any other gentleman desire to make such a motion? If not, the Chair will recognize the gentleman from Texas [Mr. JONES].

Mr. JONES of Texas. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. The gentleman from Texas offers a motion to recommit, which the Clerk will report.

The Clerk read as follows:

Mr. JONES of Texas moves to recommit the bill to the Committee on Appropriations with instructions to report the same back forthwith with the following amendments: On page 4, line 12, strike out the figures "$325,000" and insert in lieu thereof "$150,000"; on page 71, line 16, under the appropriation for the Bureau of Markets, strike out the figures "$390,160" and insert in lieu thereof "$565,160."

Mr. ANDERSON. Mr. Speaker, I move the previous question on the motion to recommit.

The SPEAKER. The question is on agreeing to ordering the previous question.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. BLANTON. Division, Mr. Speaker.

The House divided; and there were—ayes 250, noes 10.

So the previous question was ordered.

The SPEAKER. The question is on the motion of the gentleman from Texas [Mr. JONES] to recommit.

The question was taken, and the Speaker announced that the noes seemed to have it.

Mr. JONES of Texas. Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were refused.

So the motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

Mr. McCLINTIC. Mr. Speaker, I demand a reading of the engrossed copy.

The SPEAKER. The engrossed copy has already been read.

The bill was passed.

On motion of Mr. ANDERSON, a motion to reconsider the vote by which the bill was passed was laid on the table.

RESIGNATION FROM COMMITTEES.

The SPEAKER laid before the House the following communication:

CONGRESS OF THE UNITED STATES,
JOINT COMMITTEE ON PRINTING,
Washington, January 25, 1921.

Hon. FREDERICK H. GILLETT,
Speaker House of Representatives,
Washington, D. C.

MY DEAR MR. SPEAKER: I wish to respectfully tender my resignation as a member of the following committees: Printing, Joint Committee on Printing, Elections No. 1. I am,

Sincerely, yours,
JAS. V. MCCLINTIC.

The SPEAKER. Without objection, the request is granted.

There was no objection.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. MOORE of Virginia (at the request of Mr. BLAND of Virginia), for to-day, on account of absence from city on public business.

To Mr. WEBSTER (at the request of Mr. MILLER), for the day, on account of sickness.

EXTENSION OF REMARKS.

Mr. GREENE of Vermont. Mr. Speaker, I ask unanimous consent to extend my remarks on the Agricultural appropriation bill just passed.

The SPEAKER. The gentleman from Vermont asks unanimous consent to extend his remarks on the Agricultural appropriation bill just passed. Is there objection?

Mr. McCLINTIC. Mr. Speaker, reserving the right to object, I made the statement yesterday that on account of the excessive cost and shortage of paper we are able to furnish each Member with only six bound copies of the RECORD. For that reason, until I can make a further investigation of this subject, I will be forced to object.

Mr. PELL. Mr. Speaker, I ask unanimous consent to revise and extend a speech which I made on the sundry civil bill.

The SPEAKER. The gentleman from New York asks unanimous consent to revise and extend his remarks. Is there objection?

Mr. McCLINTIC. I object.

The SPEAKER. Objection is heard.

Mr. McCLINTIC. If the gentleman will modify his request and simply ask unanimous consent to revise, I will have no objection to his revising.

Mr. PELL. I will so modify my request, Mr. Speaker.

The SPEAKER. Is there objection to the gentleman's revising his remarks?

Mr. WALSH. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. WALSH. Does a Member have to get the consent of the House before he can revise the remarks he has made?

The SPEAKER. It depends on the extent of the revision. The custom is that ordinary corrections which will improve the grammar and the rhetoric of the speech and not change its substance are permissible. Further than that, they are not.

Mr. WALSH. What is permissible under the gentleman's request to revise his remarks? What is permissible?

The SPEAKER. The gentleman has the right to revise without the consent of the House.

Mr. MANN of Illinois. Reserving the right to object, Mr. Speaker, the request for revision of remarks is new. It has only occurred in the last few Congresses. Gentlemen have got into the habit of making such requests, asking unanimous consent to revise and extend their remarks.

It never used to be done, and ought not to be allowed in any case. An ordinary revision of grammar or rhetoric is made by most Members of the House, and I suppose properly made. I have no objection to it. But to give a man the right to change his remarks and the entire substance of them by revision ought never to be allowed. When such requests started a few years ago I objected, but I have quit objecting, because everybody seems to think that he has to ask unanimous consent to revise his remarks if he dotted an "i" or crossed a "t."

Mr. WINGO. In fact, the revision which the gentleman requests is not a revision, but an extension. The revision is simply to correct the form, but not the substance. Anything that goes further than that is not a revision, but an extension. A good many gentlemen have fallen into the habit of making extensions under requests for making a revision.

Mr. MANN of Illinois. At times such matters have been brought to my attention because my name was used in connection with them, and I found that gentlemen had fallen into the habit of rewriting their remarks because when they delivered them they could not use good grammar and good English. [Laughter.] It is desirable that there should be good grammar and good English used in the CONGRESSIONAL RECORD. I wish it could be done oftener than it is.

The SPEAKER. Is there objection?

There was no objection.

PURCHASE OF GERMAN AEROPLANES.

Mr. KAHN. Mr. Speaker, by direction of the Committee on Military Affairs, I desire to report House resolution 648, which is a privileged resolution, and move its adoption.

The SPEAKER. Is this reported from the committee?

Mr. KAHN. Yes, sir.

The SPEAKER. It is a privileged report. The Clerk will report it.

The Clerk read as follows:

House resolution 648.

Resolved, That the Postmaster General, the Secretary of War, and the Secretary of the Navy each be requested to report to the House the number of German aeroplanes purchased by his department in 1920, the fund out of which payment for such planes was made, the authority for their purchase, the agency through which such planes were purchased, the price paid per plane, the use to which these planes have been put, the number of such planes destroyed by fire or otherwise, the number of pilots killed as the result of such destruction, the number of planes of American make in the possession of the respective departments, and the number in use.

Mr. GARRETT. Mr. Speaker, I make the point of order that the resolution is not privileged.

Mr. KAHN. It calls for information, Mr. Speaker, for the use of the House.

The SPEAKER. The gentleman from Tennessee will state his point of order.

Mr. GARRETT. As I caught it, Mr. Speaker, one point in there refers to the authority upon which the purchase was made. I take it that that calls for a legal opinion of some sort.

Mr. KAHN. It calls for information to be given to the House, and I think such resolutions are privileged.

Mr. GARRETT. If they call for facts, they are.

Mr. KAHN. Yes.

The SPEAKER. The Chair is disposed to think that the authority would be a fact. The Secretary would refer to the statute, whatever the law was. The Chair would think that would be the natural interpretation of it.

Mr. DENT. Mr. Speaker, will the gentleman from California yield?

Mr. KAHN. Yes; I yield to the gentleman.

Mr. DENT. I understand this resolution was reported out by the committee this morning. I was present in the committee. I was inclined to agree, and still agree, that the question of authority is simply to point to the language of the law. It is a privileged matter, and as I understood the statement of facts before the committee the time has expired.

Mr. KAHN. It expires to-day.

Mr. DENT. It expires to-day, and the gentleman who offered the resolution would have had the privilege of calling it up if it is privileged.

Mr. KAHN. Yes.

Mr. DENT. Has not the Postmaster General fully answered for his department? I think it is just a question of delay.

Mr. KAHN. That is quite true; the report of the Postmaster General is in the RECORD of the day before yesterday.

Mr. BLACK. Mr. Speaker, will the gentleman yield?

Mr. GARRETT. The making of the point of order did not indicate opposition on my part to the resolution. I do not know that there is any objection to the resolution, but it is to the interest of the House always that a resolution which in any way calls for an opinion from the head of an executive department, in my judgment, should not be passed. There is a good reason for the rule which confines these resolutions to calling for facts, and that reason is in no sense a partisan reason. The majority of the House would not be desirous, I should say, of calling for information which would call for arguments from the head of an executive department, whether of their party or any other party. My point of order on the resolution was made because I doubted its privileged character. I do not think it should be passed as a privileged resolution unless it clearly appears that it is privileged. I wonder if we could have it reported again?

The SPEAKER. The clause to which the gentleman refers is the authority for their purchase. The Clerk will again report the resolution.

The resolution was again read.

Mr. GARRETT. Mr. Speaker, I make the point of order that the expression touching the matter of authority calls for an opinion, and that the resolution is not privileged.

The SPEAKER. The Chair thinks that the authority upon which the Secretary acted is a matter of fact, and therefore the Chair overrules the point of order.

Mr. KAHN. Mr. Speaker, I move the previous question——

Mr. STEENERSON. Will the gentleman yield?

Mr. KAHN. I yield.

Mr. BLACK. The Postmaster General having already responded to all of the inquiries, and his answer having been incorporated in the RECORD, would it not be proper to amend the resolution so as to strike out the words "the Postmaster General"? What is the object of adopting a resolution of this kind, as to him, the House being already in possession of the information, and he having answered all the inquiries so far as they relate to his department?

Mr. KAHN. So far as the Postmaster General is concerned, he has sent to the chairman of the Committee on Military Af-

fairs a full statement regarding this matter. I have no objection to the suggested amendment.

Mr. BLACK. If the gentleman will yield, I will offer the amendment, or he can offer it.

Mr. KAHN. I ask unanimous consent that, in line 1, page 1, of the resolution, the words "the Postmaster General" be stricken out.

Mr. STEENERSON. Reserving the right to object, I should like to ask the gentleman if it has not been the practice heretofore strictly adhered to, that these resolutions of inquiry addressed to the heads of departments "direct" them to furnish the information? I think the gentleman from Texas [Mr. GARNER] made that point at the last session, and we do not want to place ourselves in the position of leaving it discretionary. We are entitled to receive information from these executive departments, and it seems to me the gentleman ought to change that by direction.

Mr. KAHN. I believe that if this resolution passes these gentlemen will furnish the House with the answers to the questions embraced in the resolution.

Mr. STEENERSON. But it places us in the position of requesting, when we are absolutely entitled to the information. The resolution offered in the last Congress was objected to on that ground, and we changed it.

Mr. KAHN. I will ask unanimous consent to insert the word, so that it will read that "each be requested and directed."

The SPEAKER. The gentleman from California asks unanimous consent to offer an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. KAHN: Page 1, line 1, after the word "that," strike out the words "the Postmaster General."

The SPEAKER. Is there objection?

There was no objection, and the amendment was agreed to.

Mr. GARNER. Mr. Speaker, will the gentleman from California yield?

Mr. KAHN. I yield to the gentleman.

Mr. GARNER. I did not make the point of order—but I believe it would have been good—that this resolution directs more than one head of a department to give information. If you pass this resolution, what head of a department will receive the official copy, and how are you going to get the request to the heads of the other departments from whom you desire information? The rules of the departments require that in seeking information we direct the request to the head of a department, and you can not combine it for two or more heads of departments, for the simple reason that you have no official copy to send to the head of more than one department.

Mr. MANN of Illinois. Why not make as many official copies as you want? This is not engrossed.

Mr. GARNER. This is a resolution passed by the House of Representatives, and there is supposed to be one official copy.

Mr. MANN of Illinois. It is not engrossed or enrolled. The Clerk could make 40 certified copies.

Mr. GARNER. How many official copies are there; as many as you desire to make?

Mr. MANN of Illinois. It is not signed by the presiding officer.

Mr. GARNER. I know; but how many official copies are there; just as many as you desire to make?

Mr. MANN of Illinois. He can make as many official copies as are necessary.

Mr. GARNER. Who can?

Mr. MANN of Illinois. The Clerk of the House; and he can certify to them as official copies.

Mr. GARNER. I do not think the gentleman from Illinois is correct about that. If that is so, a dozen official copies of a resolution passed by the House of Representatives might be floating around anywhere.

Mr. MANN of Illinois. Sure, there may be, certified to as having passed the House. There is no engrossed or enrolled copy. What is misleading the gentleman is the idea that there is an engrossed or enrolled copy.

Mr. KAHN. I ask unanimous consent that the resolution be further amended by inserting in line 2, page 1, after the word "be," the words "directed and."

Mr. DENT. Reserving the right to object, I hope the gentleman from California will not insist on that. The usual form of resolution that we have reported out of the Committee on Military Affairs has been to request the head of the department. If the request is not complied with, then it will be time enough to direct.

Mr. STEENERSON. The uniform practice has been to direct. The House is entitled to this information as a matter of right, not as a matter of discretion with the heads of departments.

Mr. KAHN. I am rather inclined to agree with the gentleman from Minnesota that we can and do generally direct the heads of departments.

Mr. DENT. We can, but the usual courtesy is to request. Then we can see whether the request is complied with. I hope the gentleman from California will not insist on that amendment, because I hate to object to it.

Mr. STEENERSON. Does the gentleman object?

Mr. DENT. I will object if the request is insisted upon.

Mr. MASON. Let us wait and see if our request is complied with.

Mr. KAHN. I withdraw the request for the adoption of the amendment to insert the words "directed and," and move the previous question on the resolution.

The SPEAKER. The gentleman moves the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

On motion of Mr. KAHN, a motion to reconsider the vote by which the resolution was agreed to was laid on the table.

BOULEVARD, CHICKAMAUGA AND CHATTANOOGA MILITARY PARK.

Mr. KAHN. Mr. Speaker, I ask to take from the Speaker's table the bill H. R. 12502, which has passed the Senate, and I move to concur in the Senate amendments.

The SPEAKER. The Clerk will report the title of the bill.

The Clerk read as follows:

H. R. 12502. An act to provide for the report of the cost of improving and maintaining the Government boulevard on Missionary Ridge, Chickamauga and Chattanooga Military Park.

The Senate amendments were read.

Mr. KAHN. Mr. Speaker, I yield to the gentleman from Tennessee [Mr. FISHER].

Mr. FISHER. Mr. Speaker, my colleague, Judge MOON, is very much interested in this resolution. He is sick and unable to be here, but his secretary has communicated to me that it is Judge MOON's wish and desire that the House agree to the Senate amendments.

The SPEAKER. The question is on agreeing to the Senate amendments.

The question was taken, and the Senate amendments were agreed to.

On motion of Mr. KAHN, a motion to reconsider the vote whereby the Senate amendments were agreed to was laid on the table.

QUAPAW INDIANS.

The SPEAKER. The Chair wishes to call attention to the fact that the bill H. R. 15780 was inadvertently referred to the Private Calendar on January 24. It is a class of bills that usually has been referred to the Union Calendar.

Mr. MANN of Illinois. What is the bill?

The SPEAKER. It refers to extending restrictions against alienation of land allotted and inherited by certain Quapaw Indians.

Mr. MANN of Illinois. I do not think I shall object, but it belongs on the Private Calendar.

The SPEAKER. The Chair has been informed that it refers to a tribe of Indians.

Mr. MANN of Illinois. It refers to individual Indians. It refers to documents, and then by amendment, and the names are in the original document. I have no objection by unanimous consent to its being referred to the Union Calendar.

Mr. CARTER. Will the gentleman permit?

Mr. MANN of Illinois. I have read the bill.

Mr. CARTER. These individuals constitute what remains of this Indian tribe.

Mr. MANN of Illinois. That makes no difference.

Mr. GARNER. Mr. Speaker, I ask unanimous consent that it be referred to the Union Calendar.

The SPEAKER. The gentleman from Texas asks unanimous consent that it be referred to the Union Calendar. Is there objection?

There was no objection.

TELEGRAPH MESSAGES BY MEMBERS OF THE HOUSE.

Mr. IRELAND. Mr. Speaker, I ask unanimous consent to address the House for 10 minutes.

The SPEAKER. The gentleman from Illinois asks unanimous consent to address the House for 10 minutes. Is there objection?

Mr. McCLINTIC. On what subject?

Mr. IRELAND. I want to make an explanation to the Members of the House concerning the new program for telegraphic operations under the frank of Members.

The SPEAKER. Is there objection?

There was no objection.

Mr. IRELAND. Mr. Speaker, all Members of the House have been advised by circular some time ago of the proposed change of operation or plan under which the Members have been permitted to send telegraphic communications on Government business under their congressional frank. It was proposed that because of the tremendous amount of bookkeeping and auditing and additional trouble the Western Union was put to that they request a change which might inconvenience Members in some degree. The plan has been perfected through the opportunity we have had for conferences, both with the representatives of the Senate and the House and officials of the Western Union Co. It has been our effort and we have striven to adjust the matter so that the Members of the House and the Senate would not in any way be greatly inconvenienced by the new arrangement that has been arrived at.

There will be practically no material change in the method employed so far as the membership of both Houses is concerned. The telegraphic communications sent from Washington by Members of the House and Senate will be sent as they have been in the past. A charge account will be arranged for every Member at his domicile, his home town, or place of residence, and a card will be issued to him, in addition, which he may produce and use for sending Government messages while traveling away from home. This charge account arranged at his home for Government business will be submitted to the respective disbursing offices of the two Houses, and not to him. Such messages as he may send while away from home when traveling will be forwarded to the Washington office and there transferred to the respective disbursing offices of the two Houses.

I have taken this time because so many inquiries have been made by Members, provoked by the proposed change. As I say, the membership will not be disturbed in any material manner from the former practice.

If my time permits I would like to congratulate the membership of the House in the cooperation in our efforts for economy and against the former abuses of this program. The fiscal year of 1920 shows nearly 50 per cent reduction in messages over the fiscal year 1919. If the present year bears out the apparent indications, we will reach a further reduction of 25 to 30 per cent.

Mr. TILSON. Will the gentleman yield?

Mr. IRELAND. Yes.

Mr. TILSON. Out of fairness to the membership, does not the gentleman think he ought to state that 1919 was probably one of the worst years Congress ever experienced in the use of the telegraph? For instance, in regard to the returning of soldiers from abroad, 1919 was the worst year I ever experienced since I have been in Congress.

Mr. IRELAND. I agree with the gentleman, and I think I have stated previously on the floor that same thing, and forcibly, and I regret that the attitude of my remarks were of such insignificance that the gentleman does not remember them.

Mr. DYER. Mr. Speaker, will the gentleman yield?

Mr. IRELAND. Certainly.

Mr. DYER. Under the new arrangement will the Members indicate on the messages whether they are Government business, or will the committee decide that?

Mr. IRELAND. They certainly must, in their own opinion.

Mr. DYER. The Members must continue to do that?

Mr. IRELAND. Yes. The court of last resort will still be the committee. I might state in that connection that in the last batch of telegrams submitted to the Committee on Accounts there were but three violations of the rule committed in the House, and I am sure that those were unintentional.

Mr. LARSEN. Mr. Speaker, will the gentleman yield?

Mr. IRELAND. Yes.

Mr. LARSEN. Suppose a Member receives a message from a constituent, marked "Collect," and it is a Government message, what is he going to do with that?

Mr. IRELAND. The practice has been in the past to allow that. That should not be encouraged; it should be avoided as much as possible. I think that will continue. There is nothing in the new rule to make that impossible.

Mr. ALMON. Mr. Speaker, will the gentleman yield?

Mr. IRELAND. Yes.

Mr. ALMON. Whom did I understand the chairman of the committee to say will be the judge of whether we should use the wire or mail in particular cases? Does the gentleman think that the Member should be the judge of that?

Mr. IRELAND. That has been the habit with Members in the past; he should be the judge himself. Of course, if there is a flagrant abuse perhaps the committee with whom authority is lodged might take cognizance of it. I hope, however, that that will be unnecessary.

Mr. McARTHUR. What about these telegrams that are sent collect to Members of Congress from applicants for political appointments? Are they official or private business?

Mr. IRELAND. I submit, Mr. Speaker, that the gentleman's inquiry is entirely out of order. I have not heard of any such communications. [Laughter and applause.]

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed bills and joint resolution of the following titles, in which the concurrence of the House of Representatives was requested:

S. 4039. An act to amend section 3 of the act of Congress of June 28, 1906, entitled "An act for the division of the lands and funds of the Osage Indians in Oklahoma, and for other purposes";

S. 4719. An act conferring jurisdiction upon the United States District Court for the Eastern District of South Carolina to hear and determine the claims of the owners of the Danish steamship *Flyndcrborg* against the United States, and for other purposes; and

S. J. Res. 248. Joint resolution relieving and discharging from the fine imposed by law and authorizing the payment of messengers appointed by the electors of certain States to deliver the electoral vote of such States for President and Vice President.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED.

Mr. RAMSEY, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills and joint resolution of the following titles, when the Speaker signed the same:

H. J. Res. 440. Joint resolution directing the Secretary of War to cease enlisting men in the Regular Army of the United States, except in the case of those men who have already served one or more enlistments therein;

H. R. 4184. An act for the relief of C. V. Hinkle;

H. R. 974. An act for the relief of W. T. Dingler; and

H. R. 11769. An act to amend an act entitled "An act to provide a civil government for Porto Rico, and for other purposes," approved March 2, 1917.

SENATE JOINT RESOLUTION REFERRED.

Under clause 2, Rule XXIV, Senate joint resolution of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

S. J. Res. 248. Joint resolution relieving and discharging from the fine imposed by law and authorizing the payment of messengers appointed by the electors of certain States to deliver the electoral votes of such States for President and Vice President; to the Committee on Election of President, Vice President, and Representatives in Congress.

MESSAGE FROM THE SENATE.

A message from the Senate by Mr. Crockett, one of its clerks, announced that the Vice President had appointed Mr. WALSH of Montana and Mr. FRANCE members of the joint select committee on the part of the Senate, as provided for in the act of February 16, 1889, as amended by the act of March 2, 1895, entitled "An act to authorize and provide for the disposition of useless papers in the executive departments," for the disposition of useless papers in the War Department.

The message also announced that Mr. NELSON was excused on his own request from further service as a conferee on the bill (H. R. 13931) entitled "An act to authorize association of producers of agricultural products," and Mr. WALSH of Montana was appointed in his place.

LEAVE TO ADDRESS THE HOUSE.

Mr. GARNER. Mr. Speaker, I ask unanimous consent to proceed for 15 minutes.

The SPEAKER. The gentleman from Texas asks unanimous consent to proceed for 15 minutes. Is there objection?

Mr. ROGERS. Mr. Speaker, reserving the right to object, I understand the gentleman desires to discuss a somewhat personal matter?

Mr. GARNER. Somewhat, yes.

Mr. ROGERS. I shall not object in this instance, but I feel obliged to serve notice that I shall object to any further requests for permission to address the House this afternoon.

Mr. McCLINTIC. Mr. Speaker, I object.

The SPEAKER. The gentleman from Oklahoma objects.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

Mr. ROGERS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 15872, the

Diplomatic and Consular appropriation bill, and, pending that, I ask unanimous consent that general debate be limited to two hours, one-half to be controlled by myself and one-half to be controlled by the gentleman from North Carolina [Mr. SMALL].

The SPEAKER. The gentleman from Massachusetts moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the Diplomatic and Consular appropriation bill. Pending that, he asks unanimous consent that general debate be limited to two hours, one half to be controlled by himself and the other half by the gentleman from North Carolina [Mr. SMALL]. Is there objection?

Mr. BYRNS of Tennessee. Mr. Speaker, reserving the right to object, the gentleman from North Carolina is in the Committee on Appropriations at present. Has the gentleman from Massachusetts talked with him respecting this?

Mr. ROGERS. The gentleman from North Carolina is agreeable to an hour on a side. I assume that he will be on the floor in a moment.

Mr. BYRNS of Tennessee. Yes. I have no objection.

Mr. GARNER. Mr. Speaker, may I ask the gentleman from Massachusetts if it is possible for him to spare me 10 minutes of his time, or has all of the time been allotted?

Mr. ROGERS. The time is pretty well allotted, but if the gentleman could pick up five minutes from his side, I should be very glad to give him five minutes from this side, and, so far as I am personally concerned, I should be very glad to give him the first period, as I understand he desires to leave the floor to attend a meeting of his committee.

Mr. GARNER. Yes; our committee meets at 2.30 o'clock.

The SPEAKER. Is there objection?

Mr. McCLINTIC. Mr. Speaker, reserving the right to object, and I make this reservation for the purpose of asking a question, is it intended that remarks made on this bill shall be confined to the bill?

Mr. ROGERS. There has been no arrangement of that kind. I understand a number of gentlemen desire to discuss subjects that are foreign to the bill itself.

Mr. McCLINTIC. Mr. Speaker, I regret very much, but I shall have to object.

The SPEAKER. The question is on the motion of the gentleman from Massachusetts that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the Diplomatic appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the Diplomatic appropriation bill, with Mr. TOWNER in the chair.

Mr. ROGERS. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. Is there objection?

There was no objection.

The Clerk reported the title of the bill.

Mr. ROGERS. I also ask unanimous consent that in the event that I be recognized by the Chair, and in the event that the gentleman from North Carolina [Mr. SMALL] be recognized by the Chair subsequently, we may have the privilege of alloting our time as we see fit.

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent that the time used by him may be allotted, and also that the time used by the gentleman from South Carolina may be allotted, should he be recognized. Is there objection?

Mr. McCLINTIC. Mr. Chairman, I reserve the right to object.

Mr. BYRNS of Tennessee. Mr. Chairman, reserving the right to object, have not the gentlemen, if they are recognized by the Chair, that right under the rule?

The CHAIRMAN. The gentleman from Massachusetts would as soon as the Chair recognizes him.

Mr. BYRNS of Tennessee. And I assume that if the Chair should subsequently recognize the gentleman from North Carolina, he would have the same privilege.

The CHAIRMAN. That would be the case.

Mr. ROGERS. Then, I withdraw the request and I yield 10 minutes to the gentleman from Texas [Mr. GARNER], provided I am recognized.

The CHAIRMAN. The gentleman from Massachusetts is recognized for one hour. The gentleman from Texas is recognized for 10 minutes.

Mr. GARNER. Mr. Chairman and gentlemen of the House, I desire to extend my thanks to the gentleman from Massachusetts [Mr. ROGERS] for giving me this time. As gentlemen probably know, the Ways and Means Committee is now having hearings, and it is seldom that a member of that committee can be here for the purpose of discussing matters that they might want to bring to the attention of the committee.

Mr. Chairman, I have asked your indulgence this morning for the purpose of making clear my position touching the policy of levying duties through the customhouse. I would not thus have imposed myself upon the House at this time had it not been that my position has been criticized and I believe misunderstood since the passage of the emergency tariff bill.

It might not be out of place to compare the necessities of the Government in the matter of funds necessary to conduct its business under present conditions with those prior to the war. The best informed men advise us that it will be necessary to collect around $4,000,000,000 each year for the next four or five years in order to meet the necessary expenses of the Government, whereas prior to the war around $1,000,000,000 was the sum collected. When we only needed a billion dollars a year with which to conduct the Government's business a greater proportion of it was collected through the customhouse than from any other source, and more than 80 per cent of the total was derived from custom duties and excise on liquor and tobacco. During the war we resorted to all kinds of taxes, so I believe we should approach the subject now with a view of establishing a permanent policy of taxation upon a peace basis, and since the necessities are more than four times what they were prior to the war, we necessarily approach the question from a new and different angle to that existing prior to the war. Now, how should we collect the money to run the Government in view of these additional necessities and new world conditions? For my part, I believe that the major portion should be collected from those best able to pay, the lesser percentage should be levied upon the masses of the people. I do not believe that it would be a healthy Government that would undertake to collect the entire revenue necessary for the conduct of its business from the classes and nothing from the masses. Therefore I shall advocate a taxing policy whereby the smaller proportion of the revenue necessary to run the Government may be collected from the whole people. The next question comes, How shall the smaller percentage of the taxes referred to be collected? For more than a hundred years this country has been levying a tariff through the customhouse on goods imported from abroad. It is such a well-established policy that I doubt if any intelligent man who has given the matter a moment's thought would advocate its discontinuance; so admitting that we are to go to the customhouse to get this tax which is to be levied upon the goods consumed by the people, the next question arises, What policy shall we adopt in collecting that tax? I am a Democrat, and I believe in applying democratic methods at the customhouse—all should be treated alike, with special favors to none.

There are two schools of thought, or rather there are three schools of thought or belief in this country touching the customhouses. One is the free trader who believes that the customhouses should be eliminated. Another equally as unreasonable in my judgment, is the man like our distinguished chairman, [Mr. FORDNEY] from Michigan, who would place the tariff wall so high that no foreigner would dare undertake to share the American market with the American producer. Either of these policies in my judgment at this time would be commercial suicide and I venture the assertion that there is not 20 per cent of the American people who would advocate either of these policies; and yet we find men in Congress who are supposed to have investigated the subject that advocate each of these policies. This brings me to the point of stating what my individual views are touching the subject of levying taxes through the customhouse. As I stated before, I would treat all imports as nearly alike in the levying of duties as possible. I mean by that that I would seek from the best information to be had a competitive rate and place that rate in the law. Of course, that rate would vary according to the facts in each case. That rate of duty, if I am correctly informed—and I would like for some gentleman to correct me if I am not—is the rate of duty that will get the largest amount of money in the Treasury. Now, if that is not good democracy—if that position is undemocratic—I want some gentleman to rise in his place and tell me why. A Democrat can never go above a competitive rate, while a Republican, if he is true to his protective theories, must give a higher rate or else he fails to give that degree of protection that he so vehemently promised to give in the last campaign.

In levying a duty upon noncompetitive articles, one must be governed by his judgment of general conditions as to how much revenue is to be derived from that particular article. I know it is advocated by some Democrats and most of the Republicans that a tariff should be levied upon the manufactured article and that the products of the farm and ranch and raw materials

should come in free. I can not subscribe to this doctrine. If I am going to the customhouses for the purpose of getting revenue to run the Government, I can see no reason why I should not collect money from the importation of farm and ranch as well as raw material along with the collection for the manufactured article. Any rate of duty levied at the customhouse gives the American producer that much advantage over the foreigner who sells his goods in this market. So it seems to me unfair, unjust, and indefensible to say to the manufacturer that "we propose to give you an advantage over the foreigner by levying a tax on his goods when he comes to the customhouse" and at the same time tell the farmer and the stockman "your competitor can come with his farm and ranch products free; we want no revenue to run the Government from that source." It was once said that no duty was needed on farm products either for protection or revenue, but that statement can not be made now, since the records in the Treasury Department show that great volumes have been coming in both for years 1919 and 1920. I am going to be venturesome enough to ask why we should not have received some revenue from that immense importation of farm products? Why should there not be a revenue duty on these things as well as a revenue duty upon the manufactured products? I can not find a satisfactory answer to these questions. I wonder if there is a logical answer?

Now, that brings me to the emergency tariff bill that passed the House of Representatives some weeks ago and for which I voted.

The report shows that that bill was reported by the committee as an emergency measure, and in no way expressed the views either of Republicans or Democrats as to what should be the permanent rates of duty to be levied upon these articles. The report shows that the bill was not offered as a permanent taxing policy, and that the rates had not been scientifically ascertained either from a protective standpoint or revenue standpoint; but they were merely thrown together, and the passage of the bill asked in the hope that market conditions might be stabilized with a view of preventing wreck and ruin, bankruptcy, and chaos in the agricultural sections of the country. That those conditions existed there, there is not any doubt, and I was willing to pass this emergency measure believing, as I did, that it would tend to give the agricultural people an opportunity to adjust their financial situation and once more take heart and continue in their various pursuits of agriculture. In criticising a Democrat for casting a vote for that bill, it must be upon the assumption that the rates were protective—that is to say, they were beyond a competitive maximum revenue producing rate; for surely a Democrat would have as much right to vote for a revenue duty on the articles named in the emergency tariff bill as some other Democrat would to vote for a revenue rate on a like number of manufactured articles, and you know we have all been guilty of that.

I do not know and do not believe anyone else knows whether the various rates were protective or revenue rates. A mere declaration that one knows a rate is a protective or a revenue rate is not sufficient. He must, or, at least, should know wherein it is one or the other.

If 3 cents per pound on peanuts—the highest percentage of increase of any rate in the bill—is a protective rate, it must exceed the cost of producing peanuts in China and in this country. If 3 cents per pound did not exceed the difference in the cost of production here and abroad, then it must have been in the neighborhood of a revenue rate; and while you may criticize my judgment in levying a tax upon that particular article, you can not, or, at least, you should not attack my democracy. Hearings have been had upon this subject since that bill passed. The proof shows—and it has not been challenged—that the average cost of producing peanuts in the United States for the year 1920 was about 7 cents per pound, and the proof is equally conclusive that peanuts were shipped into this country in the last few months and sold from 3½ to 4 cents per pound. So far as present conditions are concerned, these peanut politicians guessed about right.

Now, Mr. Chairman, I want to warn my Republican friends against the danger of putting up the tariff wall beyond competition. While they have pursued this policy in the past and have gained the confidence, at times, of the American people, if they adopt it in the year 1921 it will, in my judgment, result in materially destroying the export trade of this country and thereby lessen production, put labor out of employment, and do just the reverse of what they have claimed heretofore—that their protective wall was the panacea for all prosperity and all labor employment. You can not sell to foreign countries and not buy in return. They have nothing with which to pay for your goods except an exchange of their goods or products.

Every impediment you place in the way of their equal opportunity in this market goes that far in the direction of prohibiting them from buying our produce and, of course, to that extent decreases our export trade. The ideal tariff, it seems to me, at this time would be a competitive tariff—and levy that rate in the customhouses which would result in giving the foreigner an equal opportunity with the American producer—and while our Republican friends are not willing to take that, but insist upon giving the American an unnecessary advantage, I have sufficient confidence in American industry to believe that he can not only compete successfully with the foreigner but can survive where others would fail if you will give him an equal and fair opportunity. You Republicans are going to consider a tariff bill. The Ways and Means Committee has been having hearings for weeks with a view of framing a bill to be submitted to the special session. I assert to you that it is utterly impossible at this time to ascertain the difference in the cost of production here and in foreign countries. Without that cost it is impossible for you to scientifically frame a tariff that will be based either upon the "protective" theory or "revenue-only" theory. Both Democrats and Republicans have, at least in the past 50 years, drawn all tariff bills having as their base the difference in the cost of production here and abroad. The hearings before the Dingley committee, the Wilson committee, the McKinley committee, the Payne committee, the Underwood committee, and the Fordney committee have each had for their purpose, as shown by the questions of the committee and the statements and briefs filed by their witnesses, that each and every one had for its base the ascertaining of the cost of production in this country and abroad. Therefore I repeat that without that fact being ascertained it is impossible to draw a scientific bill. The result is that you are going to pass a bill based upon prewar conditions or a mere guess as to what the rates should be at this time. Either one of them can not be definite, because they would both be guesses, for the reason that prewar conditions do not apply now and may not apply six months from now or a year or two years. You have only to compare the cost of raw material, the cost of transportation, the cost in labor now as compared with prewar conditions to convince any intelligent man—unless it be some Republican who has promised to revise the tariff—that you can not pass a scientific tariff at this time based upon prewar conditions; and we all know that the cost of production in this country even at this time has no stability, and that within six months or a year it will likely be materially reduced. So I say without fear of successful controversy that there is not a man living to-day who can draw a scientific tariff bill, because, after all we may say and do about tariff legislation, the rates that you put in the bill are the heart of it, and without these rates being based upon correct information it is impossible to write them.

Now, my Democratic colleagues, I was impelled to make this statement because some of my associates saw proper to criticize my position and go so far as to say that I was not a good Democrat. I may not be a good Democrat, but I hope you will find me to be an honest one and that I will always give you my honest views not only touching the tariff but any other subject. I am not a protectionist; neither am I a free trader. However, I realize that whenever you go to the customhouse to collect duties to run the Government, that just as you levy that duty through the customhouse so do you give the American producer the advantage over the foreigner. How much advantage is the only question involved, and that brings you to the rate that you will levy. I have told you that I would never go above a competitive rate; that rate which will bring the largest amount of money into the Treasury, and each schedule—yes, each paragraph and item—must be considered according to conditions as you find them when you undertake to write a bill. I have told you that I wanted to treat each article coming to the customhouse in a similar manner. That means that I would levy the tariff on the farm and ranch products as well as the manufactured article. I will never consent to a doctrine that requires part of the people to buy in a taxed market and sell in a free market.

It has been the contention of all Democrats that you could get more money from a revenue tariff than from a protective tariff. There is not the slightest doubt in my mind about the correctness of that position. Let me say in this connection that, in my judgment, the question of giving more liberal opportunities to the foreigner or more nearly approaching free trade will be one that will have very serious consideration by the best minds of this Nation within a decade. We are the greatest producing Nation on earth. You can not sell these products abroad unless you give the foreigner an opportunity to come to our market; and you can not do that and put the tariff wall to the point where he can not get in.

But, gentlemen, why should we become so much concerned about the method to be adopted in raising one-sixth or one-eighth of our revenue and so little to the other five-sixths or seven-

UMI

eighths? When we collected through the customhouse most of the money to run the Government, it was necessarily a paramount issue; but when you begin to collect direct from the people some three billions of dollars each year, you will quickly find where the principal division among the people will come in. Even at the present time nine men out of ten are talking internal-revenue taxes rather than tariff taxes. This tendency of the people to devote more consideration to internal-revenue taxation will increase, for the reason that when you take 80 cents direct from a man's pocket and 20 cents indirectly he is naturally going to give more attention to the 80 than he does to the 20, especially since the 20 is extracted without his knowledge and with a firm belief by many that you are doing him a favor. The acute division among the people and therefore between political parties on the question of methods to secure money to run the Government is going to be in the internal-revenue office rather than the customhouse.

We have already been warned by the high and mighty member of the steering committee from Illinois [Mr. MADDEN] that in the Sixty-seventh Congress the Members elect from that territory east of the Mississippi and north of the Ohio will undertake to legislate in the matter of taxation; meaning, of course, that they will arrange this system so as to be certain that their territory does not pay more than its share. We know that the present chairman of the Ways and Means Committee, as well as the members of this mysterious but all-powerful steering committee, whose habitats are in the territory referred to, favor what is known as the sales or turnover tax. Now, what does this mean? It means that you are going to shift the taxes from those best able to pay to the masses of the people, for, if you once adopt the sales or turnover tax, it will only be a matter of time until more than 80 per cent of the taxes necessary to run the Government will be collected in that manner. We only have to refer to the current press to see the drift of the minds of leading Republicans in this direction. When the wise men of the East have visited the high priest at Marion, Ohio, and talked taxes, they have invariably reported progress in the direction of removing the burdens of taxation, and especially those pertaining to surtaxes, excess profits, and even inheritance taxes. I am just wondering if they remove these burdens of taxes from those who are now bearing them where they are going to place them; and I am reminded by these same gentlemen that a turnover or sales tax would get the necessary funds to take their places. The Republicans always did believe that the people as a whole ought to pay the taxes, and while the Democrats have put upon the statute books during the last eight years a different policy these Republicans will go back to their old policy the first time they think it is safe to do so. As a party man I look forward with pleasure to that issue. [Applause.]

[During the delivery of Mr. GARNER's remarks his time expired and Mr. SMALL yielded him 12 minutes additional.]

Mr. ROGERS. Mr. Chairman——

Mr. SMALL. Will the gentleman yield for just a moment? I believe no agreement has been entered into for time in general debate. I was unfortunately in another committee at the time the bill was called up. I have demand for an hour and 25 minutes. Could we have an agreement——

Mr. MADDEN. Mr. Chairman, I raise the question that such an agreement can not be entered into in the committee. Under the rules of the House you will have to go back to the House to get an agreement on time.

Mr. ROGERS. Is the gentleman willing to let the two hours already arranged for run a little longer and then if it is possible we can rise and fix the time in the House?

Mr. SMALL. That is entirely agreeable. I had forgotten we were in Committee of the Whole House.

The CHAIRMAN. The gentleman from North Carolina has been already recognized for one hour.

Mr. SMALL. I think the chairman of the committee is first entitled to recognition, and I reserve the remainder of my time.

The CHAIRMAN. The Chair was just informing the gentleman.

Mr. SMALL. I reserve the remainder of my time.

Mr. ROGERS. Mr. Chairman and gentlemen of the committee, I want to be entirely candid with the House. A very large part of this bill is subject to points of order. Item after item is very clearly out of order or is at best doubtful if the question is raised.

Mr. BRITTEN. Will the gentleman yield?

Mr. ROGERS. I will.

Mr. BRITTEN. Is not that just another evidence that the existing method of making appropriations now employed is entirely an error, and that sooner or later we have got to find some way of remedying the rule which was adopted a couple of months ago?

Mr. ROGERS. I am not here as a defender or assailant of the new method of making appropriations, and if the gentleman will postpone his inquiry just a moment he will get a full understanding of my thought in this connection.

Mr. BLANTON. Will the gentleman yield?

Mr. ROGERS. In just a moment. Although these items are out of order, they have been carried year after year in the Diplomatic and Consular act in precisely the form in which they are now proposed. While technically there is no foundation of law for them, nevertheless it has been the practice of the Committee on Foreign Affairs, the practice of the House and of the Congress to carry these items just as they are here recommended.

Mr. BRITTEN. Will the gentleman yield for just another question?

Mr. ROGERS. Certainly.

Mr. BRITTEN. Did the gentleman find it necessary to duplicate a lot of work in hearings and evidence before his subcommittee of the Committee on Appropriations that had already been heard by the Committee on Foreign Affairs, which, of course, has to produce certain legislation in the event some one makes the point of order against matters in the bill before us which are subject to a point of order?

Mr. ROGERS. I think there has been a certain amount of duplication in the hearings. This being the first year under the new method of appropriation it was considered desirable to lay a very full foundation for the bill in the form of hearings before the Committee on Appropriations. I should say that the hearings, which this year number some 350 pages, are distinctly more voluminous than would have been necessary if the Committee on Foreign Affairs had continued the preparation of the bill this year.

Mr. BRITTEN. Will the gentleman yield for one further question?

Mr. ROGERS. Certainly.

Mr. BRITTEN. Does the bill now before the committee make permanent legislation of a lot of legislation which was carried currently each year, as was suggested a few moments ago?

Mr. ROGERS. So far as I recall there is absolutely no attempt to convert into permanent authority any of the items which have been carried year after year. In other words, as far as these items are concerned, there is no attempt on the part of the Appropriations Committee to assume the prerogatives of the Committee on Foreign Affairs.

Mr. BRITTEN. That is, the bill does not intend to make permanent legislation of what heretofore has been current legislation?

Mr. ROGERS. So far as I recall, there has been no instance in which that has been done.

Mr. MASON. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. Yes; I yield to my colleague from Illinois.

Mr. MASON. On the question of passports there is an amendment suggested on which I gave notice in the Committee on Foreign Affairs I would make a point of order, because it contains new legislation.

Mr. FLOOD. That was stricken out.

Mr. ROGERS. The passport item in the bill before the committee at this moment is simply a five-line item of appropriation which is in order under existing law.

Mr. MASON. Do I understand, then, that the Committee on Appropriations has stricken out that provision which we were discussing in the Committee on Foreign Affairs?

Mr. ROGERS. The Committee on Appropriations can not be said to have stricken it out, because it was never reported by the Committee on Appropriations. It is true that in a preliminary print of the bill the question was considered of somewhat amplifying existing legislation; but so far as the Committee on Appropriations is concerned it has never acted along the line of legislation respecting passport control.

Mr. MASON. Then, as I understand the gentleman, that provision which was in the preliminary print for the convenience of Members is not included in the bill reported by the Committee on Appropriations?

Mr. ROGERS. That is entirely correct.

Mr. FLOOD. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Virginia.

Mr. FLOOD. I would like to ask the gentleman if he does not think, referring to the items which have just been discussed, that there was more excuse for the Committee on Foreign Affairs for exercising the power of legislating and embracing those items in the appropriation bill than there was for the Committee on Appropriations, which has no legislative power to put such items in an appropriation bill?

Mr. ROGERS. That is a matter of opinion. I should say that the propriety was about the same in each case, because the very fact that the Committee on Foreign Affairs had legislative

functions was, it seems to me, a natural reason why it should have reported out legislative matter in separate and permanent form.

Mr. FLOOD. My opinion and the gentleman's opinion do not agree on the question which I propounded. I am asking this: There is an item in the bill making an embassy of our mission to China. That has not been carried in any legislation.

Mr. ROGERS. That is true, and that is of a different category from the general classification I spoke of a few moments ago.

As I said to the House at the outset, there is no disposition whatever, so far as I am concerned, to try to put anything over on the House. In other words, I want to have entirely available all facts upon which the Committee on Appropriations has acted. On pages 4 and 5 of the report will be found the four or five instances where matter of a strictly legislative character is carried; and when I say "matter of a strictly legislative character" I distinguish it from the sort of items that have been carried year after year in the appropriation act and which are simply retained and continued in this measure which is before you to-day.

Mr. LINTHICUM. Mr. Chairman, will the gentleman yield for a question?

Mr. ROGERS. If the gentleman will allow me to proceed for just one moment, I shall be glad to yield.

The items of a legislative character are these: First, the proposed raising of China from a legation to an embassy. I hope to discuss, at least briefly, the merits of that recommendation.

Second, the reduction of Austria from an embassy to two legations, one at Vienna and the other at Budapest. That may or may not be subject to a point of order. If the question is raised, I have some authorities which I think may lead the Chair to hold the recommendation to be in order. But it is nevertheless of a legislative character.

The third matter of this general description is the suggested reduction of Turkey from an embassy to a legation. That, I suppose, would be held clearly in order under the Holman rule, and so I presume it is proper matter for the Committee on Appropriations to present to the House. I have referred to it here only because I desire to have readily available for the committee the material of a new and strictly legislative character, whether in order or not, which is carried in the bill.

The fourth item of this character is the so-called International Research Council. For a good many years we have been carrying in the Diplomatic and Consular act yearly various appropriations for bodies of a scientific character. More and more in recent years those particular bodies had fallen under the control of the scientists of Germany. It is rather obvious, with conditions as they now are, that the majority of the countries of the world should view those older societies with a certain degree of suspicion. Within the last year or two the Entente Powers, including the United States, and some of the neutral powers have withdrawn altogether from the old societies and have formed the International Research Council. That, while not of a strictly governmental character, is at least semi-official, as evidenced by the fact that Dr. Charles D. Walcott, the head of the Smithsonian Institution, is the acting chairman on behalf of the United States of the International Research Council. The amount carried in the appropriation is something like $2,500, and is about the sum, although in a different form, that was carried in segregated items in previous laws. But notwithstanding all this, it is perfectly clear, I suppose, that the item is subject to a point of order, because it is not authorized by existing law.

Now I yield to the gentleman from Maryland.

Mr. LINTHICUM. The gentleman said a while ago that the appropriations under this bill had been reduced about 25 per cent.

Mr. ROGERS. Yes.

Mr. LINTHICUM. I would like to ask the gentleman if he is informed of what additional fees have come into the State Department by reason of the increased passport and visé fees to $10, showing that it does not involve as much money as the bill shows?

Mr. ROGERS. Yes. I am glad the gentleman has made that suggestion.

Mr. PORTER. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. Yes.

Mr. PORTER. Is it not a fact that the increased passport and visé fees will provide enough revenue to make our foreign service practically self-sustaining?

Mr. ROGERS. That is correct. The appropriations carried in this bill are eight and one-half million dollars. The estimated revenue for the foreign service of the United States is $9,807,000. The expense of maintaining the State Department in Washington, which, of course, is not appropriated for in this bill, is about another million dollars. That is to say, during the current fiscal year, and as a result very largely of the increase in the passport and visé fees, the State Department, the Diplomatic Service, and the Consular Service, taken altogether, cost less than the amount of revenues which come into the State Department in the form of fees.

That, I think, is a matter that the House should consider in determining the proper scale of expenditures for this department, because, gentlemen, you will realize that if you reduce some of these items it involves a reduction in the resultant fees. Thus, in addition to the many other important functions and activities of the Department of State, it may be called a collecting agency for the United States; and if you cripple the collecting agency you of course cripple the ability to collect the very considerable revenue to which the gentleman from Maryland and the gentleman from Pennsylvania have referred.

Mr. DOWELL. Will the gentleman yield?

Mr. ROGERS. I yield to the gentleman.

Mr. DOWELL. What is the actual reduction in this bill from the appropriation of last year?

Mr. ROGERS. About $826,000.

Mr. DOWELL. Then, how does the gentleman get his comparison of reduction in this appropriation?

Mr. ROGERS. Because during the war the usual Diplomatic and Consular appropriation act carried about $11,500,000 or $12,000,000. That was the comparison that I was making.

Mr. DOWELL. But the real comparison with last year is only $800,000?

Mr. ROGERS. In comparison with last year the reduction is $826,000. It would be slightly over $1,000,000 if it were not for the fact that we had to make one very considerable increase in connection with passport control.

Mr. DOWELL. Does the gentleman include the expenses referred to in the foreign embassies in Washington in the appropriation of last year?

Mr. ROGERS. I do not know what the gentleman means when he says "the foreign embassies in Washington."

Mr. DOWELL. The gentleman stated a moment ago that there were many expenditures in Washington not included in the appropriation.

Mr. ROGERS. The expense of maintaining the Department of State is what I referred to.

Mr. DOWELL. That is not included in the last appropriation.

Mr. ROGERS. That is always carried in the legislative, executive, and judicial appropriation bill and has no relation to the comparison.

Mr. DOWELL. Then the actual amount of reduction is $800,000.

Mr. ROGERS. It is $826,000.

There is one more item of a legislative character that I want to refer to in conclusion on this particular point, and that is the so-called International Hydrographic Bureau, a new item in the bill this year. The creation of the bureau results from a request of the Secretary of the Navy and the Secretary of Commerce. An international conference was held in London recently at which delegates representing the United States Navy and the Department of Commerce were present. Hydrography is a science which, in order to be efficient, should be international in its character. In other words, the men who sail the seas, whether they are Americans or Frenchmen or Italians or Norwegians, need all of the information available about the hazards of the sea. There has never been up to this time an efficient international hydrographic service. The Department of State, as well as the other departments involved, have committed themselves as far as they have the right to commit themselves to the maintenance of this bureau. They ask for an appropriation of $2,500, which seems to be a very moderate sum considering the utility and importance of the object to be attained.

And while, as I say, this is not authorized by law, it is an item of the type that has been carried in the Diplomatic and Consular bill for some years. The committee presents it for the consideration of the Committee of the Whole, with the full admission and realization that it can go out on a point of order if any Member feels that it ought not to remain in the bill.

Mr. Chairman, how much time have I consumed?

The CHAIRMAN. Twenty minutes.

Mr. ROGERS. I have prepared in some detail a discussion of this bill, which I shall not take the time to inflict upon the House this afternoon, but I ask unanimous consent to extend my remarks in the RECORD upon this bill.

Mr. McCLINTIC. Mr. Chairman, I regret very much to object, but I have objected to the extension of other remarks, and I hope the gentleman will not make the request.

Mr. ROGERS. If the gentleman will reserve his objection for a moment, I will say that the objections to which the gentleman from Oklahoma refers have been made upon matters foreign to the bill. This is strictly a discussion of the bill before the House, and it seems to me that it is not open to the same objection.

Mr. McCLINTIC. I hope the gentleman will not make that request at this time.

Mr. ROGERS. If the gentleman is going to object, it is of no use for me to make the request.

Mr. McCLINTIC. I hope the gentleman will withdraw it.

The CHAIRMAN. Does the gentleman from Massachusetts desire the Chair to submit the request?

Mr. ROGERS. I withdraw the request.

There is one item to which I should like to refer in this connection, and that is the item of appropriations for secretaries in the diplomatic service.

Mr. GARRETT. Will it interfere if I ask the gentleman a question?

Mr. ROGERS. I am very glad to yield to the gentleman.

Mr. GARRETT. The gentleman has referred to the change of law in the bill, providing for a minister to Austria and a minister to Hungary. Does the gentleman intend to discuss that any more on the floor?

Mr. ROGERS. I shall be very glad to answer any question.

Mr. GARRETT. What I had in mind was this: Of course, that is a recognition of a condition brought about by the war and provided for in the treaty of Versailles. Now, there were other nations set up by that treaty, and, as I understand, no ministers or other representatives of the United States are provided for in this bill to be sent to them.

Mr. ROGERS. Has the gentleman in mind such cases as Finland?

Mr. GARRETT. And Poland.

Mr. ROGERS. And Czechoslovakia and Jugoslavia?

Mr. GARRETT. I have.

Mr. ROGERS. Those nations exist as a result of the war and are all provided for in this bill.

Mr. GARRETT. I had overlooked that fact. Perhaps I had not read the bill as carefully as I should have read it before I interrogated the gentleman.

Mr. ROGERS. In other words, we are seeking in this bill to recognize current history as far as the President of the United States and the Secretary of State think that Congress ought to go in keeping up with current history.

Let me now refer briefly to the matter of foreign-service secretaries and consuls, who are appropriated for in this bill. These men are not well paid and their functions are of an exceedingly delicate character. They have to be men of broad viewpoint and high education if they shall be enabled to do their work as it should be done. I think it is exceedingly important that the country should encourage the policy of promoting efficient secretaries and consuls in the Diplomatic Service to the rank of minister whenever an opportunity arises. I do not mean to say that every ambassador and minister of the United States should be appointed from the ranks of the secretaries or the ranks of the consuls. I do not mean to say that all secretaries and all consuls are fit to be ministers or ambassadors, but I do urge that for the ultimate welfare and efficiency of the service it is important that we should encourage as far as we may the policy of promoting these secretaries and consuls to the rank of minister.

I am aware that that is an executive function, and not one upon which Congress can directly legislate. But I think it would be wise, as far as practicable, to make these promotions from the Diplomatic and Consular Service.

Mr. Bryan, when he came into office in 1913, found many men promoted from secretary and consul filling the places of ministers and filling them well. He tipped out practically every one of them. For example, there were 11 men in Latin America alone who had risen by merit from the grade of secretary or consul to be ministers. Mr. Bryan dismissed every one of them and the service suffered greatly thereby.

I desire to pay tribute to the change of policy that was encouraged by Mr. Lansing from the moment when he became Secretary of State, and which we can infer has been continued by the present Secretary of State.

In the last two years there have been 8 or 10 vacancies in the rank of ministers. Every one of these, so far as I can recall, has been filled by men who had had some service background. Not every one had been a secretary or a consul, but six or eight were secretaries or consuls and had been promoted to ministers, and two or three men who had had valuable experience in the Department of State have been promoted in the same way. The latter, however, should not be regarded as service promotions.

Mr. FLOOD. Will the gentleman yield?

Mr. ROGERS. Yes.

Mr. FLOOD. Does the gentleman expect that policy to be pursued in the next administration?

Mr. ROGERS. I think it would be a calamity if these men who have been promoted on merit were not to be allowed to continue as ministers and ambassadors in the next administration. For that reason I want to go on record in advance.

Mr. LINTHICUM. Will the gentleman yield?

Mr. ROGERS. I will.

Mr. LINTHICUM. Is there any provision made in this bill for deputy consuls?

Mr. ROGERS. Deputy consuls were abolished by law some years ago. During the last year or two, as the gentleman, who is a valued member of the Committee on Foreign Affairs, knows, we have appointed young men as vice consuls of career. All of them are American citizens.

Mr. LINTHICUM. I realize that; but I wanted to know whether or not any provision has been made for additional salary, because I have received letters from young men saying that it is almost impossible to get along on the salary that they now receive.

Mr. ROGERS. It is the policy of the committee not to recommend any increase beyond the estimates. We have not reduced any salary appropriated for in this bill. There was no request or estimate for a single salary increase in the Consular Service, and therefore, whatever the Committee on Appropriations might otherwise have done, it did not feel at liberty to increase any consular salary.

Mr. KNUTSON. Will the gentleman yield?

Mr. ROGERS. Yes.

Mr. KNUTSON. I was out of the Hall when the gentleman began his remarks. Has he touched upon the purchase of suitable buildings for embassies abroad?

Mr. ROGERS. I have not touched on that; I have dealt with it quite fully, however, in the course of some remarks, which I have prepared in explanation of the bill, but which the gentleman from Oklahoma [Mr. McCLINTIC] feels constrained to exclude from the RECORD. I hope the gentleman may be willing to yield in the course of the afternoon, because I think my discussion on the point may be of value to Members of the House.

Mr. KNUTSON. If the remarks the gentleman refers to will throw any light on the matter of securing embassies abroad, I trust that my friend from Oklahoma will withdraw his objection.

Mr. ROGERS. There is an estimate before the Sixty-sixth Congress from the Secretary of State, dated October 31, 1919, House Document 290, which strongly recommends the purchase of an American embassy at Brussels. It has been my hope—and I regard it as a matter of great interest and importance—that we might at this time embark on a general policy of acquiring embassies and legations abroad. The matter of exchange makes it very desirable. In a single capital we can buy for $75,000 a property that in a few years presumably will be worth a million dollars. There never has been anything like it in the history of the world and probably never will be again. In addition to the rare opportunity presented by the exchange situation, there is the further fact that most European countries owe us large sums of money.

In my judgment those countries will be perfectly willing to exchange a portion of their obligations to us in return for a suitable embassy or legation which they can turn over to us. I wish I could discuss the matter more fully, but I refer gentlemen who may be interested to my detailed remarks.

Mr. LINTHICUM. Why could not the gentleman read that part of his address?

Mr. ROGERS. Because I have promised to yield the remainder of my time.

Mr. McCLINTIC. Mr. Chairman, I prefer that the gentleman should ask unanimous consent for more time. Let him do that, and it will be granted him.

Mr. ROGERS. I do not care to do that. I do not care to take up the further time of the committee.

I. THE DUTIES OF OUR FOREIGN SERVICE.

The Diplomatic and Consular appropriation bill as presented by the Committee on Appropriations to the House carries about eight and one-half million dollars. This sum is $826,000 less than the appropriations for the current year and nearly three and one-half million dollars less than the amount requested in the estimates of the Secretary of State.

The problem of the committee has been to reduce appropriations as drastically as the present demands for economy make imperative without crippling the very important functions and

activities of our foreign service. I hope that the House will feel that this bill recommends a fair compromise between two entirely inconsistent extremes. If the bill errs, I believe it errs on the side of undue economy. I frankly think that an additional $2,000,000 or more could, from the standpoint of the general national welfare, advantageously be added to the amount here recommended. That is, I believe that in this period of world readjustment any reasonable amount expended upon our foreign service is well expended.

But your committee necessarily took into account the history of the appropriations for the foreign service. As late as 1916 the Diplomatic and Consular act carried about four and one-half million dollars. Even in the years 1918, 1919, and 1920, when the international relationships of the world were so seriously disturbed by war conditions, the yearly appropriations ranged between ten and eleven million dollars. They have never reached the latter figure. When the new fiscal year begins next July the World War will have been over nearly three years. It seems reasonable and indeed inevitable that our foreign-service appropriations should be materially reduced below the amounts available during the years of especial stress.

The accompanying bill has been made up on this theory and shows a reduction of something like 25 per cent as compared with the war years. Even so, it is nearly twice as large as the usual prewar allotment. It must be recognized frankly that the Congress and the country can not expect at once, perhaps can not expect ever, a return to the figures of half a dozen years ago. The cost of maintaining our foreign service even on precisely the same scale which then prevailed has greatly increased in the last five years. This condition differs in no respect from the situation which prevails in Government and private disbursements within the United States. Furthermore, the aftermath of the war involves a vast increase in the amount and kind of work which the Nation requires of the foreign service. Along diplomatic lines the international relationships of the United States are more numerous, delicate, and complex than ever before. Along consular lines the duties imposed are very greatly enhanced as a result of the increased volume of our world trade and shipping.

Six years ago our total volume of exports and imports was less than $4,500,000,000. For the calendar year 1920 this amount had risen to more than $13,500,000,000—over three times the corresponding figure for 1915. This increase—and especially the increase in imports from $2,000,000,000 to $5,000,000,000—has thrown a great amount of additional work, both routine and investigative, upon the Consular Service and to some extent upon the Diplomatic Service. This is work which must be performed and which is essential to the orderly progress of American trade and prosperity.

In a somewhat similar field the obligations imposed upon the foreign service are multiplied many times. In 1910 the total tonnage of the American merchant marine engaged in foreign trade amounted to 1,173,776 tons. The fiscal year ended June 30, last, shows a corresponding figure of 15,692,631 tons. Our foreign trade has multiplied nearly 15 times in 10 years. Whenever an American vessel arrives at or leaves a foreign port the Consular Service at that port is called upon for important service which can not be evaded or delayed. The increase in personnel and facilities for the doing of this work has been inevitable and can not now advantageously be eliminated.

Another important and onerous duty which has recently for the first time been imposed upon the foreign service arises from the law requiring every person departing from a foreign country for the United States to bear a passport viséed by an American consular officer. I shall have more to say later concerning the value of this service and the desirability of continuing it. I wish at this time merely to call attention to the size of the undertaking involved in the scrutinizing of the passport of every immigrant, and the decision whether or not to grant the requisite visé. At this moment immigrants are coming to the United States at the rate of about 1,000,000 a year. The tremendous task of examining and deciding upon more than 1,000,000 cases yearly devolves upon the Consular Service and obviously necessitates a substantial increase in personnel and equipment of all kinds.

One fact should be borne in mind in considering this appropriation bill—the foreign service more than pays its own way. Aside from its important and indeed essential duties, it is an actual financial asset to the Government. The amount recommended in this bill, as I have stated, is about eight and one-half million dollars. During the current year the receipts from the foreign service will be something like $10,000,000, one and one-half million dollars more than the appropriation. Many of the items contained in the bill really involve the payment for the services of a collection agency. To cut down these items would simply result in decreased revenue to the Government. I desire to emphasize the fact that the Government not merely pays the entire expense of the State Department at home and abroad out of current revenues, but reaps a substantial profit besides. That is, the United States conducts its foreign intercourse and maintains its 50 or more diplomatic offices and 270 consular offices all over the world at an actual net gain to the taxpayer, and without a penny of expense for the innumerable and important services for the benefit of the Nation which result from the maintenance of our foreign establishment.

II. Passport Control.

I have referred to the passport control question. The problem is before Congress at this moment whether the system which has grown up requiring all aliens coming to the United States to receive the visé and sanction of an American consular officer before departure from their homes shall or shall not be continued. The cost of a visé is $10 per person. With an immigration of any considerable size, the resulting revenue to be gained from the system is not to be despised. But probably the viewpoint of most Members of the House will depend upon whether, in their judgment, the system is otherwise defensible from the standpoint of the general welfare of the United States.

The law under which we are now operating was enacted on May 15, 1918. That law ceases to be in effect when formal peace comes. Another law (Public, No. 79, 66th Cong.), passed in the fall of 1919, purported to continue in effect portions of the act of May 15, 1918, until March 4 next. But as this law is not to become operative until the prior law ends by reason of the ending of the war, it has never come into effect and, as is morally certain, will never come into effect. Its only importance, therefore, is as indicating the apparent intention of Congress that passport control over immigration shall not be deemed a desirable thing in war time only; for, when Public Act No. 79 was passed, in the autumn of 1919, it was thought that peace would certainly have been achieved within a few weeks. Congress thus deemed passport control desirable in the reconstruction period following the war. That period is still present; probably the need of passport control, as evidenced by the millions of Europeans who seek to come to the United States, is greater than ever before. By its passage of the Johnson bill last December the House of Representatives took notice of the critical conditions of to-day and passed a temporary suspension measure. That bill, in section 3, perpetuated the passport control and visé system.

The Committee on Appropriations, in view of the emergency and of the legislative situation, and in spite of the fact that formal peace may bring to an end the act of May 15, 1918, even before the new fiscal year begins, deemed it a duty to appropriate for passport control for the coming year. The department for the current year has $400,000 for passport control purposes. It asked for $1,000,000. This bill recommends $600,000. I believe that it would be a good investment for the United States to increase this sum. I believe that thereby would become possible a more searching inquiry into the character and fitness of prospective immigrants, which would certainly redound to the advantage of the United States.

But if the system is to be of real usefulness it must be given the sanction of legislative permanence which it is not in the power of the Committee on Appropriations to recommend. Changes in the law are equally imperative. The most urgent is one which shall give our consuls the right to refuse a visé in case the immigrant is obviously liable to exclusion under the immigration laws. At the moment the consul can refuse the visé only if the applicant would be dangerous to the institutions and Government of the United States. This is absurdly narrow and cuts down to a minimum the usefulness of the visé system. It is ridiculous that the consul should be compelled to grant a visé to a blind man, a complete illiterate, or to a person suffering from a loathsome disease. Yet that is the law to-day. I am informed that the Committee on Foreign Affairs has upon the calendar a bill to remedy this condition, and I believe its early passage highly desirable.

The annual report of the Commissioner General of Immigration for 1919 (pp. 386–387, reports of the Department of Labor, H. Doc. No. 422, 66th Cong., 2d sess.) says of the passport control system:

> In the way above described there was established a system for the control of the travel of aliens more complete and more effective than any which had ever been put in operation by the United States Government. It made possible an at least fairly complete inquiry with regard to the character and antecedents of every alien who was seeking to come to this country, as well as the discovery, usually in most minute detail, of his purposes in coming. It was a most excellent arrangement for the purpose for which it was devised.
>
> Incidentally, but nevertheless in very valuable and rather extensive ways, this visé-of-passports system placed upon immigration to the

United States a safeguard which, simply from the point of view of the adequate protection of the country against undesirable or undue immigration at a time when economic and other conditions were disturbed, was of most distinct value. Observing this, and having in mind also the experience of the bureau in the enforcement of the Chinese-exclusion laws, in connection with which officers specially trained in the enforcement of those laws were a number of years ago placed in the principal consulates in the Orient, the bureau has become satisfied that to a considerable extent the immigration laws would be valuably supplemented in times of peace if a system modeled on the one above described, with or without the use of passports, could be permanently adopted. The bureau does not mean by this that the enforcement of the immigration laws could by any means be transferred from the ports of this country to the places in foreign countries whence aliens come, or even to the seaports of foreign countries at which they embark when emigrating to the United States. There are certain difficulties, which seem to the bureau insuperable, in the way of so complete a change of practice. But if trained immigration officers were attached to American consulates, to act as advisers with respect to questions raised by prospective immigrants, and as advisers to the consular officials who visé passports, also to perform such other functions as may be required in any plan of immigration control that is evolved, it is believed that the results would be most beneficial. Aliens in every respect eligible and desirable would in this way be fully informed of the laws and regulations; but those inadmissible for any reason and even those likely to be rejected on arrival at United States ports would either be discouraged from coming or would at least be put upon notice and could then have no one to blame but themselves for the hardship that might result from their being rejected on arrival at this side.

The bureau is not advocating the permanent retention of the visé system as maintained during the war, but does strongly favor the continuance, as an immigration measure, of the principle involved, with or without the use of passports. It can be used not only as a means to aid in the regulation of immigration, but in gathering and giving information which will be beneficial in administering the immigration laws. Much of the misunderstanding arising in the enforcement of our laws results from lack of information of their requirements. The bureau is satisfied that there is in the system now in operation the germ of a new extension of the Immigration Service, whose officers, acting either under the State Department's officials abroad or in a separate capacity as representatives of this department, but always cooperating fully with the former, will furnish an element that will help to complete its machinery of administration.

Immigration is a world question, but for each nation it has a domestic application. In order that such application may be intelligently made, world wide information, not at intervals but constantly, has long been a necessity, and is now more so than ever before.

The Report of the Commissioner General for 1920, page 61, reiterates the statements of the previous year as quoted above, but urges that the visé system be modified so as to give a broader measure of authority to the officers of the United States abroad. This is recommended not only to meet the necessity to safeguard our country from the entrance of dangerous elements, but to save from the hardships of an ocean voyage inadmissible applicants who would find on arrival at our seaports that they must return to their former homes.

Expert testimony is not lacking that such an enlargement is essential for the well-being of the United States. Testifying before the Senate Immigration Committee on January 4 last, Commissioner Wallis of the Ellis Island Immigration Station declared that Europe was "literally moving to the United States" and that a flood of aliens was imminent.

The committee obviously was impressed with Commissioner Wallis's statements as to the need for inspection of aliens before leaving Europe and for more rigid examination after their arrival at American ports. The commissioner recommended particularly that facilities be established overseas for such inspections and declared that 90 per cent of the immigrants arriving under the existing system would be denied permission to sail if they were examined at the ports of embarkation by American officials. A proper system of examination in Europe and upon arrival, Mr. Wallis said, would prevent an imminent flood of those diseased in body and mind.

"Fortunately," he asserted, "the steamships of the world can bring only 1,300,000 a year to the United States. It is in the limited transportation facilities and increased examinations that we will get the best protection."

The Commissioner General of Immigration returned to the United States on January 15 after studying immigration problems in Europe.

"Secretary Wilson," he said, "has laid stress upon the necessity to adopt additional measures which will have a tendency to avoid long and expensive voyages on the part of intending emigrants who for some legal reason are refused admission on arrival at an American port.

"It is his idea that an effort should be made to discover at the outset of the journey if there are legal impediments, and if so the applicant should be so advised. This proposal would prevent the coming of persons disqualified from entry and materially aid in the enforcement of our immigration laws and regulations.

"I have been impressed with the apparently authentic reports concerning the great number of people in Europe who are awaiting or desire transportation to the United States and have been wondering what some localities there will do without them and what our country will do with them, in view of the reports of increasing unemployment here.

Testifying day before yesterday before the Senate Committee on Immigration the Commissioner General of Immigration stated that European Governments are strongly approving the policy of considering at the source the admissibility of an immigrant so as to avoid the tragedy of aliens who break up their homes in Europe and come to America only to be excluded. He referred to the very extensive preparations being made by steamship lines, foreign Governments, and public and private organizations to handle the expected flood of immigrants bound for the United States. There is an abundance of testimony that the only effective way to stop undesirable immigration is to "get the jump on it" by going to the source. This, of course, is precisely what the passport control system accomplishes.

If the system is to be modified as here advocated, a larger sum than $600,000 will be requisite. But as this matter is not yet determined, it appears to be the duty of the Committee on Appropriations to provide a sum based upon the present method of carrying on the work. It should not be presumed from the foregoing that I regard even the present inadequate passport control system as by any means worthless. I think it has been a great protection to the United States during the past two and one-half years. Two per cent of all applications for visé are now being refused. I believe that this percentage should be much larger. But even if this is maintained, it means that 14,000 thoroughly dangerous and inadmissible immigrants will be kept at home out of an expected immigration this year of nearly a million. Further, it is doubtless true that many undesirables are prevented even from applying because they know that they will be refused if they do apply. The indirect and psychological effect of the control system is probably quite as important as the direct one in keeping from our shores the dangerous element of eastern Europe.

But I do reiterate that the present law should be enlarged, as advocated by the Commissioner of Immigration, and that ample funds should be put at the disposal of the State Department which will enable it to investigate thoroughly every would-be immigrant so that he may be excluded if not a suitable element in our population. We should subject our immigrants to a double test. We should pass them through two sieves. We should "get the jump" on the intended immigrant by making sure before he even starts for the United States that he is likely to be worthy of admission. This is safer for the country and it is fairer for the immigrant.

We should also make available funds which would permit the State Department to run down passport and visé frauds which have recently become rampant in Europe. In spite of the efforts of the department, our visé stamps, fee stamps, official signatures, and official seals are being copied and counterfeited by organized gangs, who are working actively all over Europe to-day. Frauds are now being perpetrated on what appears to be a wholesale scale.

A recent examination of 35 persons with alleged American visés on their passports showed that 5 were fraudulent and counterfeit. One office in Europe reports from 5 to 20 fraudulent documents daily. The only way to cope with this condition is to appoint a corps of investigators to be attached to the several consulates of Europe for the detection of passport and visé frauds. The present staff engaged in passport-control work is inadequate for the proper examination into the frauds which are now prevalent. Everything possible is, however, being done and I think great credit should be paid to our consular officers for the initiative and success which they have shown in spite of the inadequate facilities at their disposal for the work.

III. MERIT PROMOTIONS FOR OUR FOREIGN-SERVICE OFFICERS.

The backbone of our Diplomatic Service is the secretary. A bad secretary may bring on a world war. An efficient secretary may enormously promote the welfare and prestige of the United States. Considering the importance and possibilities of the position, I believe that our secretaries are the most poorly paid men in the Government service. They enter the service at $2,500 or less—after a preliminary training that usually involves six or eight years—and at the end of a lifetime of successful work in the foreign service they may hope to receive a salary of $4,000 as first secretary. The burdens of maintaining adequately an important and dignified position in a foreign capital are financially very heavy. As a practical matter no man—certainly no married man—can expect to be able to make both ends meet on the Government salary. The result is that the men appointed almost invariably have, as they certainly need to have, private means. I believe that this result improperly limits to rich men applicants for positions as foreign secretary and is thoroughly undemocratic and indefensible. I believe that the United States can afford to pay a living wage for the service performed and one which is commensurate with the importance of the functions involved. I believe that this course is dictated both by common decency and self-interest.

To my mind it is extraordinary that the Diplomatic Service is as good as it is, considering the inadequacy of salary which pervades it. Doubtless it could be, and ought to be, much better; but to me it is extraordinary that it is not worse.

Congress has shown it is reluctant to increase diplomatic salaries. The only other incentive for the right kind of ambi-

tious young men to enter as fourth secretary, at the salary of $2,500, is the prospect of promotion upon merit.

Mr. Roosevelt and Mr. Taft very generously recognized the corps of secretaries by promoting its efficient members to the rank of minister as fast as vacancies arose. When Mr. Bryan became Secretary of State in 1913 there were 11 men in Latin America alone who had worked up to the rank of minister from subordinate places, either as consuls or as secretaries. They had won their places by sheer merit, recognized by Mr. Root and other great Secretaries of State. The secretarial service was gaining in effectiveness, and applications from excellent men were increasingly numerous. But it was not long before Mr. Bryan changed all this. Mr. Bryan looked upon the extremely delicate and important positions in Latin America as simply resting places for the lame, the halt, and the blind among deserving Democrats. Within the year after his assumption of the portfolio of the Department of State he had displaced all 11 of the Latin American ministers whom I have mentioned and who, as we have seen, had worked up to their places upon merit.

I do not wish to characterize too harshly the gentlemen who went forth in replacement of these experienced men. Some of them were pretty good; most of them were very, very bad. Not one of them had had the slightest diplomatic experience. It is safe to say that such a motley horde of alleged diplomats had never been sent forth at any time in the history of this or any other country. It is one of the saddest pages in American diplomatic history and has done incalculable harm, not only by throttling the ambitions of the service men who saw their chances of promotion stifled but by lowering the prestige of the Nation among its sister Republics of the Western Hemisphere.

Since Mr. Bryan went back to the political bourne from which no traveler returns I am glad to say that there has been a somewhat different atmosphere in the Department of State in the matter of diplomatic appointments on merit. Mr. Lansing or his successor promoted from the rank of secretary to the rank of minister Mr. Philip, now minister to Colombia; Mr. Grew, now minister to Denmark; Mr. Russell, now minister to the Dominican Republic; Mr. Phillips, now minister to the Netherlands; Mr. Gibson, now minister to Poland; Mr. Jay, minister to Salvador and later to Rumania; Mr. Dodge, minister to the Serbs, Croats, and Slovenes. I do not know what the politics of these men may be. I dare say that half of them are Republicans. All of them have been in the Diplomatic Service at least 13 years and some of them 25 or more years. I think it very greatly to the credit of Mr. Lansing that he had the courage to undo, so far as he could, the incalculable harm that Mr. Bryan had wrought. In addition to the service men whom I have enumerated I should mention Mr. Morgan, ambassador to Brazil since 1912, whom for some occult reason Mr. Bryan did not send to the guillotine and who is still at his post in Brazil, and also Mr. Bailly-Blanchard, who was sent as minister to Haiti by Mr. Bryan, after Mr. Bryan's first choice for that post had proved more than commonly inept.

I have noted with very great pleasure the announcement from Marion that Mr. Harding does not contemplate a return to the Bryanesque methods of 1913 and 1914; but that, on the contrary, he hopes not merely to retain the merit ministers now in the service but to appoint competent secretaries to the rank of ministers as vacancies arise. I believe that no more permanently encouraging news could have been given to our foreign service and that the caliber of persons seeking appointments will be greatly improved as soon as it is found that the Diplomatic Service is not a "blind-alley" job.

I do not profess to say that all ambassadors and all ministers should be appointed from the ranks of secretaries or consuls. Nor do I suggest that all secretaries or consuls are fit to be made ambassadors or ministers. But I do assert that for every reason it is important that, in so far as practicable, competent secretaries and consuls should have the prospect before them of a promotion to the rank of minister as a reward for efficiency. The service itself, and the country with it, will be better off in consequence.

IV. PURCHASE OF EMBASSIES, LEGATIONS, AND CONSULATES.

At a time like the present, when obviously the Government should seek to reduce rather than increase expenses and to curtail governmental activities rather than to embark upon new ones, it may seem inexpedient to propose the expenditure of money for the purchase of embassy, legation, and consular buildings. Consideration of the subject in the light of existing conditions abroad and the present low rate of the European currencies, however, has convinced me that this Government would be shortsighted, indeed, were it to permit to pass an opportunity for obtaining at exceedingly low prices properties which under normal conditions would be worth several times the amount paid for them. The fact that this Government is now expending for rent in the Diplomatic Service alone about $150,000 annually, which represents 4 per cent upon a capital investment of $3,750,000, tends to emphasize the practical importance of careful consideration of the question at the present time. To undertake at this time a program for the acquisition of suitable buildings for our foreign service is desirable both because of the importance of having our foreign representatives appropriately housed and because of what appears to me to be the wisdom of investing a modest amount of public money and credits in a uniquely profitable manner in the furtherance of our good relations and commerce with other nations.

The desirability of owning embassy, legation, and consular buildings abroad has been advocated for many years by statesmen, patriotic citizens, great commercial organizations, and business men. Congress itself has on a number of occasions made appropriations for the acquisition of buildings at certain capitals and commercial cities abroad, and in what is known as the Lowden Act, approved February 17, 1911, expressed its approval of the general principle of authorizing the Secretary of State to acquire buildings for the use of missions and consulates. Therefore it appears that there is general agreement upon the wisdom of acquiring buildings abroad, provided this can be accomplished without placing an undue burden upon the Public Treasury.

In many capitals this can be done with but a relatively small outlay in the present abnormal conditions, and will result in the acquisition for the Government of properties which a few years hence will be worth several times their present purchase price.

There is in one of the European capitals, for example, a building in good repair, eminently suited for a residence and office for the American ambassador, which is at present available. The building is well arranged, is admirably situated near the House of Parliament and within a few minutes' walk of the Japanese Embassy and the Swiss, Danish, and Norwegian Legations. This building was purchased by its present owners in 1882 for a price equaling $750,000. Additions and repairs were afterwards made which brought the total cost up to, roughly, $1,500,000. Owing to circumstances which require that the property be sold, there is now an unparalleled opportunity for the United States to purchase it. While the selling price in the foreign currency is only a little more than 16 per cent less than the total cost, the fact that the foreign currency is at present depreciated by approximately 94 per cent would enable the United States to purchase the property, valued in normal times at $1,500,000, for the sum of about $75,000. The amount now paid for the offices of the American commission in the city in which the property described is situated is $4,000, which would be saved through the action suggested, thus insuring at once a 5 per cent return upon the amount expended for the purchase of the property. Delay in purchasing this property will unquestionably be followed by its sale to private individuals who are now negotiating for it.

The property described is in Berlin; but similar opportunities for the advantageous acquisition of embassy, legation, or consular buildings exist in many places. Not only are properties to be had at most favorable prices in the currencies of the foreign countries, but the depreciation of those currencies in the money of the United States, as shown by the following table of the current rate of exchange, is such that for a relatively small outlay in American money sufficient foreign currency can be made available with which to purchase properties at extraordinarily advantageous rates.

Country.	Exchange at par.	Exchange rate Jan. 13, 1920.	Per cent of depreciation.
France	19.3	6.12½	68.3
Italy	19.3	3.48	82.0
Belgium	19.3	6.45	66.6
Germany	23.8	1.46	93.9
Austria	20.3	.21	98.98
Czechoslovakia	20.3	1.19	94.2
Greece	19.3	7.53	61.0
Rumania	19.3	1.35	93.1
Serbia	19.3	2.74	85.6

There is still another favorable factor in the present situation which would doubtless prove advantageous alike to the United States and the interested foreign countries if a number of embassy and legation buildings could be purchased at this time. The United States holds obligations of other Governments based upon loans and other arrangements made during

the war amounting to about $10,000,000,000. It is quite probable, were the Congress to authorize the application of a small amount of these credits in payment in whole or in part of the purchase price of properties which could be acquired through the debtor Governments, that several desirable properties could be purchased with advantage to the United States and satisfaction to the foreign Governments concerned. Moreover, it is in the interest of the commercial relations of the United States with the nations whose currency has suffered so great a depreciation in United States money to utilize every convenient opportunity to improve exchange conditions through purchases made in those countries, and therefore the procedure which I am suggesting would be beneficial to commerce in improving exchange, as well as to the Government through the acquisition of properties greatly to be desired.

In relation to this subject it is interesting to note that some of the most valuable embassy and legation buildings now possessed by Great Britain in European capitals were acquired by taking advantage of the conditions prevailing at the conclusion of the Napoleonic wars. Some of those properties are worth to-day many times the price paid for them, notably that in Paris, valued in 1914 at more than $1,500,000, but which cost only a small part of that sum. As of further interest it should be said that the legislative body of Brazil in October, 1920, authorized that Government to expend 1,000 contos—$650,000 United States gold—each fiscal year in acquiring embassy and legation buildings, and I am informed that the proposed purchases are to be made in countries with which exchange is favorable to Brazil.

The European countries to which we have made cash advances since 1917 include Belgium, Czechoslovakia, France, Great Britain, Greece, Italy, Rumania, and Serbia. The smallest sum owed us by any of these countries is $25,000,000. I believe that all would be willing to exchange a portion of their debt to the United States for a building suitable for our embassy or legation. The countries concerned would rightly feel that this course was a fair one from the standpoint of their relationship to the United States; they would also welcome the opportunity to have the American representatives in their respective capitals permanently and suitably housed. On the other hand and from the viewpoint of the United States, the arrangement would permit us promptly to acquire properties which we unquestionably can utilize to great advantage, the cost thereof to be paid for from assets which for a time, at least, are to be regarded as of uncertain value.

I shall not enter upon any argument in favor of the general policy of acquisition of foreign-service buildings in the principal countries of the world. I shall pause only to say that in my judgment no step could be taken which would more directly improve the quality of our foreign representation. We should have suitable and dignified quarters for our ambassadors and ministers, but never extravagant or palatial ones. If this program were strictly adhered to, a rich man would be pulled down to the proper and unostentatious average, while the poor man would find himself relieved from the present intolerable burden—often equal to his entire salary or more—of renting even reasonably suitable quarters in which he may reside. Just as I favor higher salaries for the Diplomatic Service because of the inherent democracy of so doing, so here I favor a policy of providing appropriate residences for our representatives. The program means a chance for the able diplomat who has not the money to take a post because of the exactions which he must at present meet. It is not conducive to national pride to notice that the United States has lagged far behind the other principal countries of the world in acquiring residences for its ministers abroad.

There is one matter in connection with this subject which requires special treatment. On May 24, 1919, Mr. J. P. Morgan offered as an unconditional gift to the American Government his residence in London, a freehold. The house faces Hyde Park and is within a few hundred yards of the present embassy offices of the United States. It is described by Ambassador Davis and others as entirely suitable for an embassy. On April 17, 1920, Mr. Morgan wrote a further letter to the Secretary of State asking for an answer to his offer at the earliest convenient moment. On December 31 last he advised the State Department that it would be necessary for him to know by March 4 next whether his offer is accepted or declined, and that he shall feel compelled to withdraw the offer on the latter date if we do not previously accept it.

Acting Secretary Davis, in transmitting Mr. Morgan's latest letter, suggested the great advantage which would accrue to the United States from owning its own embassy building in London. Mr. Davis states that the house is well located and will afford a very satisfactory residence for the American ambassador for many years, and expresses the earnest hope that Congress may be disposed to accept Mr. Morgan's generous gift of this suitable residence for its representative in London.

Manifestly congressional action is a prerequisite to acceptance of the gift. Less than six weeks remain before the offer will be withdrawn. To my mind it would be exceedingly short-sighted for the Congress to allow this opportunity to lapse.

The only objection which can be advanced to the acceptance of such a gift arises from the possible feeling that the United States should not accept gifts from private individuals. But the United States has not hesitated to accept gifts of embassies and consulates from foreign nations, and if it can properly do this it would certainly seem free from objection for us to accept a gift from one of our own citizens.

The legation property in Bangkok was presented to us in 1884 by the King of Siam, and its exchange for other property owned by the Siamese Government was only recently authorized by Congress.

The consular property in Tahiti was a gift from the reigning queen.

The new legation in Salvador is erected upon land presented by that Government and accepted by the President under the authority of the act of Congress approved April 15, 1918.

Instances where Congress has authorized the acceptance of gifts from individual citizens are very numerous. Some of them are here enumerated.

Sites for manufacture of armor. (Act Aug. 29, 1916; 39 Stat., 563.)

Aviation sites. (Act Aug. 29, 1916, 39 Stat., 622; June 15, 1917, 40 Stat., 182; July 27, 1917, 40 Stat., 247.)

Mobilization sites. (Act Aug. 29, 1916, 39 Stat., 623.)

Nitrate-plant sites. (Act June 3, 1916; 39 Stat., 215.)

Gifts to Navy. (Act May 20, 1908, 35 Stat., 171.)

Horses for breeding purposes. (41 Stat., 962.)

Expenses of land for fish hatchery to be given by individual named in the act. (39 Stat., 431.)

Buildings in the District of Columbia for housing purposes. (40 Stat., 550.)

Gifts for rifle ranges. (36 Stat., 1457.)

Land to be given by Memorial Association of Georgia. (39 Stat., 901.)

One hundred and twenty-five acres, premises at Guilford Court House. (39 Stat., 997.)

Authorization to receive gifts of land. (36 Stat., 964.)

Gift from Lincoln Farm Association of birthplace of Lincoln and $60,000 for its maintenance. (39 Stat., 385.)

Land for cemeterial purposes. (36 Stat., 1077.)

Constitution Island. (35 Stat., 1166.)

Land near Fort Missoula. (33 Stat., 142.)

Of course, as we all know, this very Capitol Building is filled with decorations and articles which have been presented to the United States by individual citizens. How can even the most strained viewpoint find a tinge of impropriety in the practice?

Many other precedents could be cited, but these will suffice to show that it has been the frequent policy of the Congress to authorize in principle such a gift as that now pending.

V. Reorganization of the Foreign Service.

The State Department is and must inevitably be the medium of communication, both political and commercial, between the United States and the other countries of the world. At one time political questions and commercial questions were largely in separate, water-tight compartments; or, at all events, they did not closely or vitally interrelate. But to-day there is scarcely a political question arising in our foreign intercourse which is not also commercial, and there is scarcely a commercial question which is not also political. It therefore becomes far more important than in the past that one agency of the Government shall exercise direct supervision and control of the whole problem of foreign intercourse. As I say, it seems to me inevitable that this agency shall be the Department of State. But the Department of State is apparently not very popular with the commercial concerns and organizations of the United States. This feeling has been responsible for the highly unscientific and duplicative entry of the Department of Commerce into the foreign field. There is no place for two departments in the one realm. Congress should require one or the other to withdraw. I repeat, that in my opinion the one that should be left is the Department of State. A large portion of the unpopularity of the State Department arises from causes within itself which I believe capable of removal. In other words, the department must deliberately go to work, with the assistance of Congress, to acquire the confidence of the American business world.

A wholesale reorganization at the seat of government is essential and was projected by Mr. Lansing at the moment when his mind began to fail to go along with the President's.

A far more important and difficult reorganization of the State Department's personnel and functions must be undertaken in connection with the field forces. At present the diplomatic side of the foreign service is almost completely divorced from the consular side, with such contact as there is achieved only by way of Washington. In former days this condition was not so manifestly unsound. The diplomatic side could then deal fairly effectively with affairs political in character while the consular side was dealing with affairs commercial in character. But, as I have hitherto observed, almost every question to-day partakes both of a political and a commercial character. The divorce of the two sides of the service abroad is fatal. It is fatal to the skillful adjustment of the question at issue, and it is fatal to the proper elasticity of the personnel in the field. Many a man who is a failure as a diplomat might make a good consul, and vice versa. The Department of State should have the right to assign a consul to diplomatic duties and a diplomat to consular duties. For one thing, this would remove the intolerable social barrier which some ill-advised persons seek to erect between the two sides of the single service. Furthermore, it would make a given individual more expert and experienced in the problems daily arising if he had had experience both in diplomatic and in consular offices.

If there ever was a reason for the separation, it is gone to-day. The solution is to create a single foreign service and a single corps of foreign-service officers, suitably graded so that the State Department can at any moment assign any member of the corps to the position and to the work for which he is best adapted. The change may not seem very considerable, but in my judgment it goes to the essence. It follows in the pathway recently traveled by our principal political and commercial rivals. Many other changes in detail might well be indicated, but I prefer to mention what I believe to be the single essential modification. The United States is in earnest and forever a great world power. Perhaps it is not too much to say that to-day she is the great world power. Our foreign service has not received the frequent and the detailed examination of the Congress or the United States. To my mind it is remarkable that it is as effective an organization as I believe it to be. But if the United States is to play skillfully its part in the work of the world, the State Department and its ramifications must be upheld and encouraged to grow along right lines. No greater service to the country can be performed by Congress than to build scientifically upon the foundations which now exist. The next world war will be an economic war. The struggle has already begun and will be the keenest known to history. The foreign service of the United States must be the first line both of offense and defense. Congress owes the United States a paramount duty to provide the necessary weapons and equipment.

Mr. LINTHICUM. The purchase of embassies is a very important matter. The one which the gentleman says could be purchased for $75,000 I know cost the people who want to sell it $1,200,000. I saw it myself.

Mr. ROGERS. The Committee of the Whole has no authority to extend the time, and therefore I can not ask for an extension of time.

Mr. McCLINTIC. Let it go over. Mr. Chairman, this is a very important subject, and if there are but 40 or 45 Members on the floor, I suggest the absence of a quorum.

The CHAIRMAN. The gentleman from Oklahoma makes the point of order that there is no quorum present. Evidently there is no quorum present, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Anthony	Currie, Mich.	Gandy	Johnson, Wash.
Babka	Curry, Calif.	Glynn	Johnston, N. Y.
Baer	Dale	Goldfogle	Kelley, Mich.
Barkley	Davis, Minn.	Good	Kennedy, Iowa
Bee	Davis, Tenn.	Goodall	Kennedy, R. I.
Begg	Dent	Goodwin, Ark.	Kettner
Bell	Dewalt	Gould	Kincheloe
Benson	Donovan	Graham, Pa.	Kinkaid
Blackmon	Dooling	Greene, Mass.	Kitchin
Bland, Mo.	Doremus	Griest	Kleczka
Brooks, Pa.	Drewry	Hamill	Kreider
Brumbaugh	Dupré	Harrison	Langley
Burroughs	Eagle	Haugen	Lesher
Butler	Echols	Hill	Little
Caldwell	Edmonds	Hoey	Lonergan
Cantrill	Emerson	Holland	McAndrews
Carew	Evans, Nev.	Hulings	McCulloch
Casey	Ferris	Hull, Iowa	McDuffie
Cleary	Focht	James, Mich.	McFadden
Copley	Frear	James, Va.	McGlennon
Costello	Gallagher	Jefferis	McKenzie
Cullen	Gallivan	Johnson, Ky.	McKeown
McKinley	Nolan	Sanford	Tague
McKinley	O'Connell	Schall	Taylor, Ark.
McLane	Olney	Scott	Taylor, Colo.
MacGregor	Overstreet	Scully	Tillman
Maher	Perlman	Sells	Tinkham
Major	Pou	Siegel	Upshaw
Mann, S. C.	Rainey, Ala.	Sims	Vare
Mead	Rainey, Henry T.	Smith, Ill.	Volgt
Milligan	Rainey, John W.	Smith, Mich.	Volk
Montague	Reed, W. Va.	Smith, N. Y.	Ward
Moon	Riordan	Smithwick	Watson
Mooney	Robinson, N. C.	Snell	Weaver
Moore, Va.	Romjue	Snyder	Welty
Morin	Rowan	Steenerson	Winslow
Mudd	Rowe	Stephens, Miss.	Wise
Neely	Rubey	Stiness	Wood, Ind.
Nelson, Wis.	Rucker	Sullivan	Wright
Newton, Mo.	Sabath	Summers, Wash.	Young, Tex.
Nicholls	Sanders, Ind.	Swope	

The committee rose; and the Speaker having resumed the chair, Mr. TOWNER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having under consideration the bill H. R. 15872, found itself without a quorum, that he directed the roll to be called and that 266 Members answered to their names, a quorum, and he handed in a list of the absentees.

The committee resumed its session.

Mr. SMALL. Mr. Chairman, I yield 45 minutes to the gentleman from Mississippi [Mr. VENABLE].

Mr. VENABLE. Mr. Chairman, on the 4th of March next I retire from public service.

It was my fortune to enter this House prior to our entry into the World War, and for five years it has been my privilege to serve during a period, revolutionary in character, not only in our own country but also in the entire world.

It happened that my first speech here was in advocacy of adequate preparation for the war that seemed to me to be impending in all possibility. I should like for my last to be a tribute, feeble though it be, to an apostle of peace.

The administration of Woodrow Wilson and his party is drawing rapidly to a close. The personality of the man is so closely interwoven in the warp and woof of its accomplishments that it is impossible to separate them, as much so as to separate the administration of Lincoln from Lincoln himself.

He has been praised, blamed, abused, extolled, criticized. In short, he has suffered the fate of almost all men called upon to lead in time of a national crisis. It is the irony of fate that such should be the case, but he who strives for great objectives must needs conflict with some whose plans are different, or who are called upon to sacrifice a private advantage for the public good and are without the vision to see the need or the requisite patriotism to bear it patiently.

This he must bear. History will write her judgment and time will render her verdict. When men are far enough removed to gain a proper perspective, to see his work in its true proportions, impartial history will do him justice.

I remember how these halls have resounded with his praises, how men have rejoiced to call him leader, and men of both parties have asked to be returned to the Congress on the ground that they were upholding his hands in the work he was trying to do. I remember also, at a later day, the attacks upon his motives, his purpose, his wisdom. How the natural reaction from a prolonged period of stress and the discontent with the hardships incident to an expensive war were turned into well-nigh personal attacks upon him, and that, too, at a time when, shattered in health in the service of the country, one would expect from everyone a touch of human sympathy.

Oh, well, Mr. Chairman, such is the fate of leadership in national crises, shared with him by Washington and Lincoln, both of whom are now canonized in the affections of the Republic, while critic and criticism are alike forgot. They pass, like Arthur of the legend, "The King is dead, God save the King," cries the thoughtless crowd, thinking less of the funeral than of the coming coronation, measuring history with the coins of the interests, passions, and prejudices of the moment.

Though unfitted for the task, I am not content that this Congress should close without a tribute being paid, though a feeble one, to the services of Woodrow Wilson.

Mr. Chairman, I can not think of creation without a Creator, and when I think of the matchless order of the universe, seeing how the forces of nature with noiseless might work her miracles, and watch the twinkling stars, each a mighty sun, around which wheel in marshaled order an attendant train of worlds, I must needs believe that the Mind which first conceived and then produced them must needs be a mind of order. I can not conceive a mind of order without a mind of plan. Surely the God who made the stars did not toss them from His hand in idle play! He did not create the world and man and then forget them. Surely there is a Divine plan in history!

The God of history has written a page in the drama of the race. We read but can not fully comprehend. In the years to come, with other pages added, men will read and perceive how this bloody and war-torn time fitted into the even then incomplete whole; how these tragic happenings were the causes from which flowed gigantic effects. Yea, even from its follies of death and slaughter and appeals to force, draw lessons for the guidance of men.

Wilson is placed in the great mosaic. Does he contribute to or mar the pattern? I know of no test other than to measure his work by the spirit of those ethical standards that men believe have their origin in the breast of Deity himself.

Rarely, if ever, has there been in the history of government a leader who so emphasized the importance of solving governmental problems, domestic or foreign, by the standard of ethical soundness. No man so manifested a fundamental belief that a question must be solved according to sound ethical principles in order to have settlement at all. He who heard, or now reads, his messages and addresses must be conscious of the inevitable ethical appeal.

Yea, more than this. There is manifest a religious conviction that through men there is being worked out a great Divine plan; that ethical principles are the charts of action to forward it; and that men and nations are working in accord with divinity to the extent that they are observed. In his address to the Confederate veterans in their reunion in Washington on June 5, 1917, he said:

> Many men, I know, particularly of your own generation, have wondered at some of the dealings of Providence, but the wise heart never questions the dealings of Providence, because the great, long plan, as it unfolds, has a majesty about it and a definiteness of purpose, an elevation of ideal, which we are incapable of conceiving as we tried to work things out with our own short sight and weak strength. And now we see ourselves part of a Nation united, powerful, great in spirit and in purpose; we know the great ends that God, in His mysterious providence, wrought through our instrumentality, because at the heart of the men of the North and of the South there was the same love of self-government and of liberty, and now we are to be an instrument in the hands of God to see that liberty is made secure for mankind. * * *

Mr. Chairman, ethics is inconceivable apart from mankind. Being the rules for the conduct of human beings toward one another, its inevitable logic is to throw the emphasis upon the sanctity of individualism, and so Wilson emerges the great democrat in spirit. Government, as such, has no rights. The individual only has rights, and government exists only as the instrumentality by which the exercise of the rights may be effective. Its forms, limitations, and processes are but means. The result is the thing, and the test is whether given action promotes human happiness and the opportunity of the individual to expand the present limitations of existing conditions.

At a citizenship convention in Washington on July 13, 1916, he said:

> When you ask a man to be loyal to a government, if he comes from some foreign countries, his idea is that he is expected to be loyal to a certain set of persons like a ruler or a body set in authority over him, but that is not the American idea. Our idea is that he is to be loyal to certain objects in life, and that the only reason he has a President, and a Congress, and a governor, and a State legislature, and courts is that the community shall have instrumentalities by which to promote those objects.

The same ethical viewpoint is manifested in his addresses when occasion offered the question of labor. He insisted that labor legislation and the solution of labor problems must be looked at from the viewpoint that labor was a part of a man's life and not a mere marketable commodity, and hence, was imposed the duty on the part of those dealing with it to see to it that this principle should be observed in legislation, but also that the price of labor as determined by the mere law of supply and demand should not be taken as the criterion. The duty to mankind and social justice should also be taken into consideration.

In his speech of acceptance of September 2, 1916, he says that we must hearten labor by doing justice to the laborer; not only by paying a living-wage, but by making the conditions which surround labor all that they ought to be; that we must do more than justice. We must safeguard life and promote health and safety in every occupation. He said that this was more than justice, and better, because it was humanity.

With his conception of the spirit of democracy it was not enough that government should be of the people. It must also be by the people and for the people; its object always the betterment of the lives of individuals. He, therefore, sought to be the interpreter of national will. He wanted to know what people were wanting. As President, he conceived himself, by virtue of his constitutional duty to recommend to the Congress, the appointed agent to express in concrete proposals the desire of the individuals who make up the Nation, and not simply the personal recommendations of himself as a trustee for their welfare. The people were to be a constant governing force, he a constant interpreter of their will as it formed from time to time, even though under our constitutional form his Executive powers were conferred for a stated time and could not be withdrawn at will by the people from whom he received his commission.

I do not mean by this the current, hastily formed opinion of the moment, but what he deemed to be the settled, well formed, intelligent will of the Nation.

Thinking of government in terms of men, desiring the progress and happiness of individuals and not the glory of organization or government, he said that he had a passion for freedom.

Viewing problems of government from the viewpoint of ethics, which is as broad as mankind, he could not conceive of a national destiny for America other than that of bringing the blessings of happiness and liberty and rightfulness to peoples of other lands in all legitimate ways. America was to be the exemplar in government of the promotion of happiness, liberty, and human rights to all the world.

Mr. Chairman, through the years there had grown up in the Central Empires in the ruling military caste a rationalistic philosophy of life and government whose logic was war and whose destiny was either world domination or its own destruction. In a few words, it was argued that the law of life was a law of the survival of the fittest; that the stronger creature maintained itself by the destruction of the weaker; that man was a creature, and that, therefore, man was subject to this law. That nations were simply aggregations of men, and hence the law applied to governments, and therefore it was argued that it was but according to a natural law that one nation should grow strong by the destruction of another and a weaker one; and that this was nature's way of eliminating the weaker elements, leaving the stronger to become the progenitors of a yet stronger race. That since government was the organization through which this racial betterment and the uplift of man was and must be effectuated, the government was of more importance than the individual, and he was important only as a unit in the whole. It was argued that this was nature's way of uplifting mankind, and it is apparent that according to the logic of this philosophy the duty to nature would not be completely performed until all weaker peoples had been conquered by the strongest. They taught that war was a biological necessity, and that it was not only the right but the duty to crush weaker folk, and according to the philosophy the fact that they could be crushed was conclusive that they should be.

Von Bernhardi says:

> The law of the strong holds good everywhere. Might is the supreme right and the dispute as to what is right is decided by the arbitrament of war. War gives a biologically just decision.

Reimer in his work states that:

> Let it not be said that every people has a right to its existence. * * * By making play with this principle one may put on a cheap appearance of civilization, but only so long as the people in question * * * does not stand in the way of a more powerful people.

Prof. von Seyden, in the Frankfurter Zeitung, declared:

> The Germans are the elect people of the earth. They will accomplish their destiny, which is to govern the world and direct other nations for the welfare of humanity.

I might multiply quotations to show that my statement of the case is correct, but I must hasten.

As a result of this philosophy, or as a result of motives for which the philosophy was invented and taught as a justification and excuse, the world was plunged into war.

At first it appeared to us and other nations that it was but the contest of nations similar to wars of the past, in which we could have no concern. The philosophy behind the acts of aggression had not been apprehended or comprehended. It was thought a war for national trade, territory, and advantage; yes. But its deeper significance had not appeared.

Statesmen and diplomats were talking of territory to be gained, national advantage or disadvantage; were thinking of future combinations of balanced forces and moving the pawns about in the game of pelf.

The history of the time is known to us. How to the threat of her philosophy were added the overt acts of intolerable aggression, the cold adoption and declaration of a purpose to practically blockade our ports through circumscribing a certain area of the ocean, and the killing of our citizens in the exercise of their undoubted rights.

The logic of the philosophy was the subjugation of the world; it was a standing threat against all free peoples and hampered all such in the enjoyment of freedom from fear of attack and relaxation from military systems essential to defense, so essential to the full and free enjoyment of democratic government.

To Mr. Wilson more than any other man is due the credit of directing attention to the primary meaning of the struggle, of lifting it out of the ruck of pride and pelf and giving to the war the character of a crusade to rescue the Holy Grail of the right of men, freed from the menace of attack, to enjoy the blessings of democratic development. So we fought to make the world safe for democracy and the freedom of mankind. His pen preached the sermons of freedom and the rights of the individual, in contradistinction to the government worship of the Central Empires—not only to our own people and those of our Allies but also to the individual German citizen himself. His pen was mighty.

No man can estimate the effect his words had toward making the German citizen question the wisdom of his rulers, contributing toward that final withdrawal of support and loss of morale, or rather gain of morals, which resulted in the collapse of the German war machine through the withdrawal of support at home. Measuring the value of his pen, Mr. Chairman, in terms of cannon and of men, I believe that the future historian will compute it in large amount.

In his messages addressed during the war, both to his fellow citizens and the world, we find the same ethical appeal of which I have spoken, the same love of human welfare, the same sanctity of individualism, the same appeal to right for right's sake. He filled the world with the Crusader's spirit; he quickened the pulse of democracy the world over; he cast upon the gray wall of the clouds that hovered over the world the glowing picture of the ideal toward which men struggled through the mud and blood and stench of battle, or, inspired by which, they bore at home without complaining the necessary sacrifices of the war.

He dreamed dreams and saw visions. Yes, Mr. Chairman, it is true; but he was not simply a dreamer of dreams. He sought to make his dreams realities.

His first administration was great in its achievements in the field of domestic reform and legislation. For years the country had asked for reform of its financial system. The evils were apparent, and had been for many years, but the party in power lacked either the power or the will to do the work. The Wilson administration did it, and there came into being the Federal Reserve System, which has so well fulfilled its mission, when under the old banking system it is universally admitted that the financing of the war and the safeguarding of the country from panic and disaster would have been impossible. Surely a kindly Providence ruled our destinies.

The farm loan act for the first time furnished the farming business of the country adequate financial machinery and governmental justice. Mr. Chairman, I have not the time to dwell upon the many laws of a constructive character that have been enacted since Mr. Wilson has been President. Be it said that it is a most remarkable record, and even the political enemies of the party that passed them pay the compliment of not proposing to change them in any vital particular.

The energy with which he and his administration attacked the practical problems of the war is a story known to you as fully as to me. I mention these matters, Mr. Chairman, with the purpose of showing that a dreamer of dreams may be a doer of deeds, and in the mention of Mr. Wilson I do not wish to seem to discount the work and talent of those devoted men in the Congress and executive departments of the Government whose joint product with him the legislation was. But when this is said, it still remains true that to a large extent his spirit was the inspiration, his courage was the staying force, his will to work for the betterment of the people was the dynamics from which flowed the possibility of accomplishment.

Mr. Chairman, it was inevitable that the suffering and struggle of the World War, the agony of flesh and spirit to which humanity was subjected, the world-wide ruin that was wrought, and the contemplation of the financial burdens under which humanity must struggle for many generations forced the race to ask the question why such things should be.

Such was the condition of circumstances that the entire world, practically considered, laid aside for the arbitrament of its disputes all appeals to reason, right, justice, or the dictates of humanity and frankly appealed to physical force. The world went to war, with the results of war attendant. Millions died, millions were maimed, millions starved, millions rotted with diseases. Millions of square miles of fair country, city, hamlet, and countryside were laid in waste, and the world emerged from the awful struggle with the right victorious but bleeding at every pore. The agony of it forced the question why such things should be, and during the agony of the struggle the soldier in the trench, surrounded with the rotting fragments of a shell-blasted comrade, or crawling over shell-torn earth to come to bayonet grips with his enemy, or cowering in his dugout while earth and air were torn with the giant blasting of exploding bombs, vowed that when the war was over that some expedient should be adopted to render a recurrence impossible. "Never again" was the cry of his heart, and he fondly hoped that he was fighting that wars might be no more. There was then the universal determination that after the awakening from the nightmare humanity in its sanity would constitute a society of nations whose concert and concord would be of such a character that like conflicts would be impossible.

There was driven home to the consciousness of mankind a realization of the fact that such a thing as national isolation had become an impossibility, and that such was the complexity of modern international life that a war between any two of the great nations of the world would almost inevitably draw all nations into its vortex.

Old diplomacy had failed, old alliances with balances of power had been demonstrated to be rather the fruitful causes than the preventives of war. Old standards had failed, old methods had been shown useless. Old causes were still in existence and would, if permitted to operate in the future, produce like results of world danger and death. There must be a new viewpoint, a new accord. There must be new methods. For war as an ultimate arbiter of international disputes there must be substituted a method of peace. For force—in its final analysis, an appeal to the law of the jungle, the standard of the brute—there must be substituted a method having embodied in it those qualities of mind, conscience, justice, and right, the possession of which distinguishes man from the brute creation. The laws of settlement must be the rules of ethics, and not the law of force.

Oh, Mr. Chairman, what a wonderful dream was this! What a task for statesmen, what a challenge to the brain and heart of the world! The creation of a world peace, the substitution of right for force, of love for hate, of trust for suspicion.

The elements of the problem were clear. War as a method for the settlement of international disputes had been recognized as legitimate by international law and the custom of nations. Such being the case, the setting of this method aside could only be accomplished by mutual agreement. If such agreement was made, some method of settlement had to be substituted for it. This had to be, from the object to be attained, a method of peace where the rules of decision would be such standards as were considered right and just, and from its nature some sort of tribunal in which all nations had some common interest and representation, and lest some nation sometime recalcitrant might attempt in a moment of temptation to return to the old standards there had to be sufficient force somewhere to supply the compulsion to peace which would then be necessary.

Mr. Chairman, I do not intend to discuss the covenant of the League of Nations, however much I believe in it. I have another purpose. Mr. Chairman, Mr. Wilson felt the same impulse as the rest of mankind; he dreamed the same dreams; he interpreted the then almost universal desire. He dedicated his life in this service to humanity. With all the force of his character he set about the work of making the dream come true. To him more than any other man is due the credit of the coming into being of the League of Nations, in which nearly all the nations are now members. His faith, his courage, his implacable purpose, his constant appeals to the heart and moral sense of mankind helped to overcome fears, the fears of the untried to which all men are more or less subject, and in the presence of which timid spirits shrink and cower.

The League of Nations was born and now lives. Needing development in some particulars, it may be; destined to modify with the years, perhaps, but containing those elements which I have outlined which any plan must have if wars are to be eliminated as a method for the settlement of international disputes.

Oh, Mr. Chairman, I have heard men say that Mr. Wilson failed because America has up to this time failed to enter this concert of nations. Has he failed; or, rather, have not we failed? Does our failure to follow condemn the leader?

I know not whether the League of Nations can survive if we definitely and permanently refuse to enter. This, only time can tell. I know not what the course of this country will be. But this I do know: Under the guidance and inspiration of the ideal of human right and happiness, the overwhelming sentiment of the peoples of Europe demanded of the most chauvinistic of their statesmen, who wished to rely on the guaranties furnished by force, that they follow American leadership. It never occurred to them that America would desert them in their hour of need. They were willing to try the great experiment. They saw the need of some machinery of international character not only as a guaranty of peace, but also as furnishing the means

for international concord of practical character for the starting again of the wheels of civilization and peaceful pursuits in war-torn Europe. The league was to furnish the guaranties which otherwise must be relied upon from force and military might and occupation.

Their faith was shattered. America refused participation in the task. Sense of security was gone. Fears returned. The chauvinist has his day, and through these very fears Europe is suffering a reaction and in desperation turning to old methods, or is inclined to. Are we to have again, through our failure, the old system of military alliances, strategic frontiers, balances of power, and press of fear that produce wars and have given "men of blood and iron a chance to show their teeth"?

Ah, Mr. Chairman, the reactionary militaristic movement in Europe which began after America showed her intention to abandon any participation in the league already shows itself. Belgium and France have signed a treaty by which Belgium is to maintain an army of 500,000 men as compared to 100,000 before the war. In September there was made what is practically an alliance between France and Italy by which Fiume and all the Dalmatian coast will pass quietly to Italy, thus cutting off the Jugo-Slavs from all access to the sea and so sowing the dragon's teeth of another war. In return, Italy is not to protest again at a French invasion of Frankfort.

There has arisen in France a certain sentiment which demands that France must have as guaranty against future invasion by Germany the land up to the Rhine. Another Alsace-Lorraine, another cause for revenge, another terra irridentia.

Europe is prostrate, racked by fear, bankrupt, and broken; unable to start the wheels of industry; unable to buy raw materials. Hopeless without America, she turns as she thinks, perforce, to her only remedy and protection, to the old order of alliance and militarism. Unable to buy from us owing to inability, unassisted, to start the wheels of industry, we ourselves suffer. Prices tumble, markets fail, and our own land is filled with discontent.

Heart of pity! Have we by our refusal to enter the league contributed to this chaos, turned the eyes of humanity for guidance from the teachings of the Prince of Peace to the slavering jaws of the wolf pack? Are we setting the stage for another horrible war, with its millions dead, its load of debt, its agony of heart and spirit? If we have, God pity us. Our guilt is the guilt of blood. [Applause.]

It has been said that during his administration we have had a one-man Government, and I have heard this charge of self-stultification brought by Members of this and our companion body. I hasten to defend this House, and in fact the entire National Legislature. It were sad, indeed, if national legislators deliberately converted themselves into rubber stamps and renounced the exercise of that judgment which as coordinate members of the Government they were under the duty to exercise in the representation of their constituencies. This is a grave charge that has been brought. Its implication is that the legislative department has been paralyzed by some sinister or hurtful power exercised by Mr. Wilson, and that he has taken to himself somewhat of the functions of a dictator in the policies that have been pursued during the past few years. I deny this. That he has exercised a predominant influence upon the affairs of the country I admit, and that the Congress has been responsive to his suggestions also is true. But it has been true not because of sinister power, because Congress is not under the jurisdiction of the Executive but is coordinate with it and has within its realm the sovereign power to act as it sees fit. Mr. Wilson has been followed by gentlemen of both parties, because they felt that he had correctly interpreted the will of the people whom they represented in the recommendations which he made from time to time to the National Legislature. This House has not acted through fear of Wilson. It has not followed his suggestions because they were coerced against their will. They have followed because they were convinced that when he spoke he spoke the will of the citizenship of the country, or because they were convinced that the recommendation was dictated by wisdom. When they did not so believe they have not hesitated to vote contrary to the recommendation made, as is amply proven by the records of the Congress.

Aside from the inherent force of great intellect, clear vision, and definite purpose, his power lay in perceiving the will of the people and expressing it with force and vigor.

I defend Mr. Wilson and House and Senate in saying that if there was fear in House or Senate, it was not the fear of Mr. Wilson but the fear of failing to express the will of the people, which they believed was contained in his recommendations.

War is in its very nature executive in character and to wage it successfully there must be concentration of power and responsibility in the executive head of the Government. The Congress wisely recognized this fact and conferred the powers on Mr. Wilson. His was the task, his was the responsibility, his the praise or his the blame. Is it just, then, after success, to condemn him for the exercise of those powers we ourselves conferred and which made success possible?

The charge has been made that he was stubborn and had not enough of the spirit of compromise.

Mr. Chairman, the same charge is always made against men of strength who strive for great objectives and battle toward their accomplishment. I think, Mr. Chairman, that history will say that it was fortunate that Mr. Wilson was a man of implacable purpose. Such are needed in time of war, especially of the character of the latter.

How would the country have fared had we had a weakling in the White House? What would have been our condition if in the great crises of necessarily rapid decision there had been vacillation?

On several occasions, Mr. Chairman, in this very House, when a great war decision had to be made and the Nation had to walk dim paths and was forced to choose Members have differed and differences have waxed warm. Decision was necessary, delay was costly, concert of action was essential to national safety. Mr. Wilson, by firm recommendation of a given course, by shouldering responsibility for decision, by an expression of confidence in a given way has closed divided ranks and brought concert where otherwise there would have been division and delay.

But they say, Mr. Chairman, that he was stubborn in his effort to have the covenant of the League of Nations ratified in the Senate. Does the record sustain this charge? The first objection urged by its opponents had to do with the Monroe doctrine and the jurisdiction of domestic questions. While believing that the objections were unsound, Mr. Wilson had the covenant amended to meet them. Other reservations were urged, and, with the consent of Mr. Wilson, Senator HITCHCOCK introduced reservations covering the objections, and they were voted down by the men urging their absence as a defect.

Can it be called stubbornness on the part of Mr. Wilson because he objected to reservations which he believed would destroy the efficacy of the covenant for the purpose it was designed to effect? If he was stubborn, what of the two-thirds of the Senate who were for the league with reservations but could not agree among themselves as to the reservations they wanted and hence failed to ratify the covenant in any form?

Ah, Mr. Chairman, it has even been said that the covenant failed of ratification because Mr. Wilson autocratically failed to take Members of the Senate with him to France. What an indictment of Senators this is! In effect, it is charged that Senators turned their back upon this instrument designed for the relief of the world through personal pique, when otherwise they would have approved it!

Mr. Chairman, waste, extravagance, stealing are just as much evils of war as is death and suffering. When nations go to war, especially in the haste that was required of us, and when the entire national resources had to be marshaled, there is no time to devise the safeguards of peace. There is no time to carefully pick and choose the men through whom the work must be done. It is inevitable that when thousands and maybe millions of men must be hastily summoned, some will not be wise in judgment, some will be inefficient, some will be dishonest. In war the fool and the thief have their day. It always has been so, it always will be so as long as the world is afflicted with wars. No honest man can defend waste or thievery. In this war, as in all others, there were mistakes of judgment, there was waste and there was stealing, and responsible persons should be brought to justice, if possible. But, Mr. Chairman, when I think of the gigantic task to which America put herself, the necessity of moving rapidly, of raising, feeding, clothing, and equipping huge armies in a short time, of transporting them across the sea, and this, too, in a few short months; when I think of the mad race to save our allies, ourselves, and the world, as we believe, when I think of the huge success of the effort, the magnificent way in which America responded, the huge sums properly spent, compared to which the waste and stealing was small, I am inclined to thank God that we did so well.

The military miracle of the ages, the wonder of the years is the response of the people to the call of the country. Under the leadership of Mr. Wilson, inspired by his ideals, welded into a united whole by patriotic impulse, the American people worked the supposed impossible and crowned their efforts with success.

It is possibly a salutary rule to hold the administration in power responsible for results, however they may arise, but it is the height of injustice to hold Mr. Wilson responsible for the thefts and waste, when he could have had no supervision of

the work. As much so as to hold the Congress for the theft because, appropriating the money, it made it possible for the thief to steal.

I have heard gentlemen talk as though America had failed. They look only to the inevitable imperfections of human nature and fail to see or declare the wonderful achievements.

These gentlemen are teaching the people, whether they know it or not, that the necessary burdens of the war were not properly or rightfully incurred, and are sowing the seeds of discontent, from whose fruition they will themselves suffer. Let us place the blame where blame belongs; let us punish the guilty, weed out the incompetent, correct mistakes; but let us not lose sight of the worth of the achievement of the people of America; let us not teach the doctrine that their effort was not worth while, that the burdens we bear were not rightfully shouldered upon us and were not worth the results accomplished. To do so is to preach a doctrine that is false. It is neither true, wise, nor patriotic. [Applause.]

I would not have this House believe, Mr. Speaker, that I am representing myself as having been in accord with him on each and every one of the positions taken by him. Such would not be true. The record of my votes since I have been a Member of the House discloses that on a number of occasions I have disagreed with the positions taken by him, and when I have done so I have not hesitated to vote as I thought my duty as a Member of this body made necessary. But I am endeavoring, Mr. Speaker, to indicate somewhat of the worth and value of Mr. Wilson, both in the life of this Nation and of the world.

It has been said that he was cold and aloof and did not have that quality of personal warmth and social disposition that aroused personal attachment and personal loyalty. This charge doubtless comes as somewhat of a surprise to those who have been thrown intimately with him. But what will history care for this? What will history care whether or not the White House was crowded with Members of the Congress or the public in an endeavor by the President to exercise social graces and win a personal affection from you or me? History will not care a bawbee whether you or I dined with the President. It will measure him by his actual accomplishments, his spirit, his ideals, the thoughts he expressed, the concrete accomplishments of the man, his service to his country and to the world. This will be the test of his caliber. This will be the measure of his worth.

As I have stated, he has been charged with stubbornness, of trying to have his way regardless of consequences. And yet he is charged with vacillation and not knowing what he wanted. It is said that he changed his views from time to time and changed his positions accordingly. What man could do other than change his views from time to time during the troublous era through which we have passed? The times were changeable and conditions did not remain the same for long. As the drama of world conflict was played, as the plot unfolded, as we grasped more fully the meaning of the play, old theories had to be laid aside and new ones formed. The thinking of all men was progressive in character; each day old assumptions were laid aside as they were seen to conflict with new developments.

Can it be weakness to change under such circumstances? Is it, rather, not a manifestation of strength to change, disregarding the possible charge of inconsistency and vacillation, from which weak men sometimes quail, or else with the partisanship of opinion hold to error once adopted simply because they have declared it truth?

It is not my mission, Mr. Chairman, to depict Mr. Wilson as perfect. No man is. It is not my purpose to state that his administration was without error or mistake. No administration is or will be. But, Mr. Chairman, for some months I have heard him attacked upon the platform, I have heard him and his administration assailed with a bitterness and a personal touch that would have surprised me had I not recalled the experience of other leaders in time of national stress. And more, Mr. Chairman, when by his labors in behalf of his country and humanity his body and health were broken and his voice was hushed and his pen, per force, laid aside, when unable to defend himself and his party, it seemed that the virulence of the attacks were redoubled at a time when by every rule of chivalry it would seem that he would be accorded at least a humanly sympathy.

The coyote barks at the dead lion and challenges him to battle!

[Applause.]

For these reasons, Mr. Chairman, and because I feel that as his administration draws to a close it is well to express the belief of some of us as to the greatness of his place in history, I have addressed myself to this subject. He has been the leader of the Democratic Party, the head of its administration. Under his leadership we have accomplished great things. What will be the verdict of time?

As it views the record of his work in the field of helpful constructive legislation, as it beholds the martial hosts of America assembling at the bugle call of war, to save America and the world, as it listens to his noble appeals for justice, for right, for the well-being of mankind, as it views the ideals pictured by his pen, his enunciation of the purpose and function of government, his declaration of the rights of men as such, what will it say?

As it beholds the laws working good, preventing injustice, making possible the salvation of the world, as it sees America successful in war, the world rescued from imminent menace, what will it say? Will it pronounce his administration and the administration of his party a success or a failure?

Mr. Chairman, impartial history will write Woodrow Wilson among the great men of this country. [Applause.] As long as America exists his figure will stand forth among the world's great. She will call him great in intellect, great in practical achievement, great in love of humanity, great in purpose, lofty in aspiration. His ideals so happily expressed are the leaven in the lump. They will be alive after he is dead. His lesson of the application of ethical principles to the solution of governmental problems will continue to have world-wide and revolutionary effect.

She will call him great leader, great democrat. Ere long America will build him monuments. And when, Mr. Chairman, the entire world comes to the point where right will be substituted for force, as it must some day, either presently or in the future I know not, history will point backward to the figure of Wilson, preaching peace on earth, good will toward men, his faith in the ability of man so to order his existence a potent force in its accomplishment. Truly will she say of Wilson, the President—

Master of minds,
Eternal foe of kings,
Humble yet proud,
The host of smaller men.
His work was made within the mind of God,
Eternal peace his watchword and his aim.

[Applause.]

Mr. ROGERS. Mr. Chairman, I yield 10 minutes to the gentleman from Minnesota [Mr. STEENERSON].

Mr. STEENERSON. Mr. Chairman, during the consideration of the Post Office appropriation bill a few days ago, I took occasion to comment upon the parcel-post statistics given in the annual report of the Postmaster General. My purpose was to show that these statistics were unreliable and, in fact, absurd. We know that the Postal Service is now running behind at the rate of about thirty-five or forty million dollars a year, and it is important to find out the leak. The Postmaster General's annual report stated that the total number of parcels was 2,250,000,000 with an average weight of 4.9 pounds each. I called attention to the fact that this would make a total volume in weight of that class of mail of 11,000,000,000 pounds, which, if it were true, would constitute more than 80 per cent of the total volume of the mail. Any person who has taken occasion to observe, or who knows anything about the postal business, knows that this quantity was entirely too high. I called attention to it to prove that the departmental reports gave us no reliable information. The report further stated that the income was $150,000,000 and the cost $140,000,000. After the publication of the report I sent a letter to the department calling attention to this absurdity in the quantity of parcels carried and I received a letter from Mr. Koons, which I shall insert in the RECORD at this point, stating that there had been a mistake, that the number of parcels was 1,250,000,000 and that the average weight was 3.54 pounds instead of 4.9 pounds. I assume, therefore, for the purpose of argument, that the revised figures are correct:

In answer to your letter of the 9th instant calling attention to the inconsistency in the total number of pieces of parcel-post mail handled during the fiscal year ended June 30, 1920, 2,250,000,000; the average weight per parcel, 4.9 pounds; and the percentage of increase in weight, 55 per cent, as shown in the annual report of the Postmaster General for the fiscal year ended June 30, 1920, I find upon looking into the matter that, through a clerical error, the total number of parcels was computed on the basis of parcel-post business done at the 50 largest post offices, instead of the business done at all post offices; which, of course, greatly increased the estimate of the total number of pieces handled, inasmuch as approximately 55 per cent of the entire postal business is transacted at the 50 largest offices. According to the count kept from October 1 to October 15, 1919, the total number of parcels handled was approximately 1,250,000,000, and the average weight per parcel was approximately 3.54 pounds.

It is exceedingly regretted that this error occurred.

Very truly, yours,

J. C. KOONS,
First Assistant Postmaster General.

Mr. Koons also appeared before the Appropriation Committee and explained the matter as follows:

It says that the average weight of all parcels was 4 pounds 9 ounces; that should be 3¼ pounds; also that the 2,250,000,000 parcels should be 1,250,000,000. The statistician in making up the figures made an error by taking the figures for 50 largest offices instead of for the entire country. When the parcel post was established the revenue from fourth-class matter was $12,000,000. We have had an account made which shows that the revenue from parcel post has grown to more than $140,000,000 per year.

But this explanation does not explain. I have examined "Parcel Post Statistics," giving the result of the 15 days' count in October, 1919, and the same gives the number of parcels mailed in the 50 largest post offices as 28,952,431 and the average weight as 3 pounds 3 ounces. How the statistician could get an average of 4.9 pounds from 3 pounds 3 ounces is difficult to understand. The other groups of offices give the average weight as follows:

Other first-class offices, 4 pounds 1 ounce.
Total first-class offices, 3 pounds 5 ounces.
Second-class city-delivery offices, 4 pounds 5 ounces.
Total city-delivery offices, 3 pounds 6 ounces.
Second-class noncity delivery, 3 pounds 10 ounces.
Total second-class offices, 4 pounds 3 ounces.
Total first and second class offices, 3 pounds 6 ounces.
Third-class offices, 4 pounds 5 ounces.
Fourth-class offices, 5 pounds 3 ounces.
All post offices, 3 pounds 8 ounces.

It will be noted that in no group is the average weight as high as given in the Postmaster General's report. The "statistician," whoever he may be, will have another guess coming if he is to clear this matter.

Mr. Koons now places the total number of parcels at 1,250,000,000 and the average weight per parcel at 3.54 pounds, and for the sake of argument we will now take these as the basis of a new calculation and see what the result will be.

Multiplying the number of pieces by the weight we have 4,425,000,000 pounds. The cost of transportation is 2.08 cents and of handling 1.45 cents, a total per pound of 3.53 cents. Multiplying the total pounds by the cost per pound we have a total cost of last year's parcel-post business of $156,202,500. The department's parcel-post statistics for 1920, page 56, based on actual count for 15 days in October, 1919, at all post offices, show receipts of $4,763,497.37, which multiplied by 24 gives the annual receipts of $114,323,936.88, which deducted from the above total cost shows a loss of $41,878,564 per annum.

In arriving at the cost of handling and transporting parcels the department calculates that 66 per cent of the parcels were "delivered without additional cost." That is to say, they allowed nothing for the work of delivering more than two-thirds of the parcels, presumably on the theory that the clerks and carriers were employed anyway, and if they had not handled and delivered parcels they would not have done anything. Manifestly this is erroneous and reduces the cost figures by many millions. Parcel post, according to the above estimates, consists of 61 per cent of the total volume of the mail, and should bear a large part of the cost of carriers and clerks, as well as rural-delivery and star-route service.

The total revenue of the department last year was $436,000,000, and according to the above calculation, based on parcel-post statistics, the revenue of that class of mail was $114,000,000, or 26 per cent of the total. Why 61 per cent of the total volume of mail should pay only 26 per cent of the total revenue should be explained. It is obvious from the above that the department's explanation of the original figures in the annual report does not help to clear up the matter. Even basing our calculations on the amended figures, it indicates an enormous loss. Instead of furnishing the information which the law requires, we are left in darkness, both on the cost of this service and the revenue derived therefrom. There seems to have been a well-planned design to disregard the parcel-post law which provides that if the Postmaster General shall find on experience that the rates of postage "are such as to prevent the shipment of articles desirable, or to permanently render the cost of service greater than the receipts of the revenue therefrom," he is authorized from time to time to reform such rates "in order to promote the service to the public or to insure the receipt of revenue from such service adequate to pay the cost thereof." (Sec. 445, P. L. and P. R.)

When, on initiative of the Postmaster General, Congress was induced to delegate to the Interstate Commerce Commission the power to prescribe the compensation to the railroads for carrying the mails, it brought on a deficit for the last four years of more than $85,000,000, and the delegation to the Postmaster General of the power to prescribe postage rates on parcels has brought still heavier losses, which accounts for the enormous postal deficit with which we are now confronted. We must again place the service upon a sound financial basis. The postal deficit should be speedily wiped out, and the taxpayers relieved from that burden, and to do this we must have accurate knowledge. This we hope to get through the investigation now in progress under the direction of the Joint Commission on Postal Service.

When we have obtained the requisite information, it will be for us to consider whether it is not safer and wiser for Congress to itself prescribe all postage rates, rather than to delegate that power to a Cabinet officer who may be tempted to abuse it to gain popular favor for his party. This power to prescribe postage rates is really a part of the power to tax, which our fundamental law has placed in the hands of the representatives of the people, and to delegate it as we have done to an official not directly responsible to the people is contrary to the spirit of our institutions.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STEENERSON. I ask unanimous consent to revise and extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to revise and extend his remarks. Is there objection?

Mr. McCLINTIC. Mr. Chairman, reserving the right to object, having objected to these other gentlemen, I am very sorry I can not withhold the objection now.

Mr. STEENERSON. Does the gentleman object to the extension of remarks?

Mr. McCLINTIC. I hope the gentleman can modify his request and make it to revise his remarks.

Mr. STEENERSON. I shall certainly modify the request in any way the gentleman wishes.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to extend his remarks in the RECORD. Is there objection?

Mr. McCLINTIC. I am sorry, but I have to object.

Mr. STEENERSON. I ask consent to revise them.

Mr. McCLINTIC. All right; I have no objection to the gentleman revising his remarks.

Mr. STEENERSON. Has the gentleman any objection to my printing this manuscript here? It is only——

Mr. McCLINTIC. Mr. Chairman, I called attention to the immense amount of money that has been wasted, and also the gentleman from Minnesota [Mr. KNUTSON], the Republican whip, called attention to that fact, and I am sorry——

The CHAIRMAN. The gentleman has the right to object if he so desires, and the Chair understands the gentleman to object.

Mr. BLANTON. The gentleman asked to revise his remarks. The Chairman did not hear the request.

Mr. McCLINTIC. I have no objection to the revision of the remarks.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to revise his remarks. Is there objection? [After a pause.] The Chair hears none.

Mr. ROGERS. Mr. Chairman, I now yield seven and a half minutes to the gentleman from Missouri [Mr. DYER], if he is in the Chamber——

Mr. McCLINTIC. Mr. Chairman, just a minute. We have visitors in the gallery who might get a bad impression if they saw only four Members on this side, and I am going to suggest the absence of a quorum.

Mr. HICKS. Mr. Chairman, has the gentleman made the point of order, or is he merely suggesting it?

Mr. McCLINTIC. I make the point of order.

The CHAIRMAN. The Chair understood the gentleman to make the point.

Mr. ROGERS. Mr. Chairman, I move that the committee do now rise, and on that I demand tellers.

Tellers were ordered.

The committee divided; and the tellers (Mr. ROGERS and Mr. McCLINTIC) reported that there were ayes 3, noes 60.

So the motion to rise was rejected.

Mr. McCLINTIC. Now, Mr. Chairman, I renew my point of order that there is no quorum present.

The CHAIRMAN. A quorum is not present.

The Clerk called the roll, and the following Members failed to answer to their names:

Anderson	Bland, Ind.	Cantrill	Cullen
Anthony	Bland, Mo.	Carew	Currie, Mich.
Ayres	Britten	Casey	Davey
Babka	Brooks, Pa.	Clark, Fla.	Dent
Baer	Brumbaugh	Clark, Mo.	Dewalt
Bee	Burroughs	Cleary	Donovan
Begg	Butler	Copley	Dooling
Benson	Byrnes, S. C.	Costello	Doremus
Blackmon	Caldwell	Crago	Drewry

Dunn	Husted	Mead	Scott
Dupré	Igoe	Milligan	Scully
Eagle	James, Mich.	Montague	Sells
Echols	James, Va.	Moon	Sherwood
Edmonds	Jefferis	Mooney	Siegel
Elston	Johnson, Ky.	Moore, Va.	Sims
Emerson	Johnson, S. Dak.	Morin	Slemp
Evans, Nev.	Johnson, Wash.	Mudd	Smith, Idaho
Frear	Johnston, N. Y.	Nelson, Wis.	Smith, Ill.

Hulings	Major	Sanders, Ind.	Wood, Ind.
Hull, Iowa	Mann, S. C.	Sanders, N. Y.	Wright
Hull, Tenn.	Mansfield	Sanford	Yates

Thereupon the committee rose; and the Speaker having resumed the chair, Mr. TOWNER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill H. R. 15872, the Diplomatic and Consular appropriation bill, finding itself without a quorum, he had ordered the roll to be called, when 220 persons, a quorum, responded to their names, and that he presented the names of the absentees for insertion in the Journal and RECORD.

The committee resumed its session.

Mr. ROGERS. Mr. Chairman, I yield 7½ minutes to the gentleman from Missouri [Mr. DYER] if he is in the Chamber. If not, I yield the same amount of time to the gentleman from North Carolina [Mr. SMALL].

Mr. SMALL. May I inquire if the gentleman from Texas [Mr. BLANTON] is here?

Mr. BLANTON. I wish to state that I am always here.

Mr. SMALL. I yield 7½ minutes to the gentleman from Texas.

Mr. BLANTON. Mr. Chairman, I yesterday gave notice that on to-day I would seek to offer the following motion to recommit the Agricultural bill, with instructions to the committee to report the same back to the House forthwith with the following amendments, to-wit:

On page 2, line 22, strike out "messengers or laborers—16 at $840 each, 8 at $720 each."

On page 2, line 24, after the "—," strike out "30 at $840 each."

On page 3, line 2, strike out "8 messengers or laborers at $600 each"; and in line 3 strike out "1 $720, 7 at $600 each."

On page 5, line 9, strike out "messengers or laborers—28 at $720 each, 6 at $660 each, 22 at $600 each"; and in line 11, after the "—," strike out "11 at $600 each"; and immediately following such language strike out "100" and insert in lieu thereof "10."

On page 8, line 21, strike out "2 messengers and custodians, at $1,200 each," and in line 24 strike out "messengers or laborers—11 at $840 each, 29 at $720 each."

On page 9, line 1, strike out "2 at $660 each, 3 at $600 each, 5 at $540 each," and in line 2 strike out "15" and insert in lieu thereof "5."

On page 17, line 10, strike out "22" and insert in lieu thereof "2," and in line 11, after the "—," strike out "5 at $660 each, 14 at $600 each," and in line 12 strike out "10" and insert in lieu thereof "3."

On page 42, line 5, strike out "2 messengers at $840 each," and in line 6 strike out "1 $720, 8 at $600 each, 3 at $540 each," and strike out "6" and insert in lieu thereof "3."

On page 46, line 1, strike out "messenger, $840," and in line 2 strike out "messenger or laborer, $660."

On page 49, line 2, strike out: "messengers or laborers—2 at $900 each; 1 $840; 1 $720"; and, in line 3, strike out "6" and insert in lieu thereof "3."

On page 52, line 15, strike out "messenger, $720" and after the "—" in said line 15 strike out "1 $600."

On page 55, line 22, strike out "messenger, $720," and in said line 22 strike out "$600" and insert in lieu thereof "$480."

On page 56, line 17, strike out: "Messengers or laborers—3 at $900 each, 10 at $840 each, 4 at $780 each, 10 at $720 each, 3 at $600 each"; and, in line 20, strike out: "8 at $720 each, 6 at $600 each."

On page 58, line 9, strike out: "2 messengers or laborers at $720 each," and in line 10 strike out "$660" and insert in lieu thereof "$480"; and also in said line 10 strike out "3 at $600 each."

On page 60, line 4, strike out "messenger, $1,000," and, in line 5, strike out "messengers or laborers—2 at $840 each, 5 at $720 each, 2 at $600 each, 1 $480"; and, in line 7, strike out "4 at $600 each" and strike out "11" and insert in lieu thereof "3."

On page 65, line 19, strike out: "Messengers or laborers—2 at $840 each, 2 at $660 each, 4 at $600 each, 4 messengers," and that part of the balance of said line 21 ending with "$720 each"; and in line 22 strike out "3 at $600 each" and strike out "8" and insert in lieu thereof "2."

On page 70, line 3, strike out: "Messengers—4 at $900 each, 2 at $720 each"; and, in line 4, strike out "3 at $660 each, 12 at $600 each, 15 at $540 each"; and in line 5 strike out "20" and insert in lieu thereof "3."

And on page 76, line 7, strike out: "1 $600, 1 $480."

Mr. Speaker, the distinguished gentleman in charge of the bill could have permitted this motion to have been passed upon by this House, which would have saved $300,000 every year by striking out this surplus unnecessary messenger service, but he purposely moved the previous question, which kept me from offering my motion, which otherwise I could have done. And if he had not premeditatedly demanded the previous question, and kept me from getting my motion before the House, which he did to keep his colleagues from being forced into going on record for or against this motion for retrenchment, the people of the United States could possibly have saved $300,000 by a vote on that proposition. I want to say in that connection, also, that the gentleman from Wyoming [Mr. MONDELL], the majority leader, failed and refused to vote on the proposition that put back into this bill $1,000,000 appropriated to buy a lot of mountain tops that we could have done without, that the country does not need, and he refused in a close vote to come here and vote and go on record on that proposition. And at the same time, in this very bill, he permitted, because he is floor leader and he had a right to attempt to whip his colleagues into line on a proposition to save money—he permitted them, because of his inaction, to vote $360,000 for free seed into this bill, at a time when his country is facing a $3,000,000,000 deficit. That is the kind of legislation that my friends on the majority side of the aisle permit to go into appropriation bills at this time, following a World War, when they promised retrenchment; when on the hustings they promised the people of this country they would reduce the taxes. If you keep on putting items of this kind into bills, you can not reduce taxes; you can not carry out your promise. If we could have secured only two more votes on this seed proposition last night, we could have saved all this money for the people of the United States. I am taking this time to put the blame where it belongs, on my Republican friends on the majority side, who have 46 majority in this House. [Applause on the Democratic side.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. ROGERS. Mr. Chairman, I ask that the Clerk read.

The Clerk read as follows:

Be it enacted, etc., That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, in full compensation for the Diplomatic and Consular Service for the fiscal year ending June 30, 1922, for the objects hereinafter expressed, namely:

Mr. BLANTON. Mr. Chairman, I make the point of no quorum.

The CHAIRMAN. The gentleman from Texas makes the point of no quorum. The Chair will count.

Mr. BLANTON. I withdraw the point, Mr. Chairman.

The Clerk read as follows:

Ambassadors extraordinary and plenipotentiary to Argentina, Belgium, Brazil, Chile, China, France, Germany, Great Britain, Italy, Japan, Mexico, Peru, and Spain, at $17,500 each, $227,500.

Mr. FLOOD. Mr. Chairman, I make the point of order against the item of "China." Our mission to China is that of minister, and it takes an act of Congress to elevate it to that of ambassador. There has been no legislation of Congress to that effect, and it is attempted by the Appropriations Committee in this bill. That committee has no legislative power. We have stripped all the other committees of the power of appropriation, but I do not think we ought to strip them of legislative power.

The CHAIRMAN. Let the Chair understand, if possible, the point of order made by the gentleman from Virginia. He made the point of order that the item of "China," in the first paragraph, is new legislation?

Mr. FLOOD. New legislation on an appropriation bill.

The CHAIRMAN. The gentleman makes a point of order on that item?

Mr. FLOOD. I do.

Mr. BLANTON. Mr. Chairman, I make a further point of order against the ambassador extraordinary and plenipotentiary to Belgium, because there is no law authorizing it.

Mr. ROGERS. I suggest we have one point of order disposed of at a time.

Mr. BLANTON. I did not want to lose my right. I wanted it understood at the same time that that is legislation on an appropriation bill.

The CHAIRMAN. What does the gentleman from Massachusetts [Mr. ROGERS] say to the point of order made by the gentleman from Virginia?

Mr. ROGERS. I concede the point of order.

The CHAIRMAN. The point of order is sustained.

Mr. BLANTON. Mr. Chairman, I make the point of order against that of Belgium, because it is a new item in this bill and is legislation on an appropriation bill.

The CHAIRMAN. What does the gentleman from Massachusetts say about that?

Mr. ROGERS. Mr. Chairman, there is a statute authorizing the sending of an ambassador to Belgium. It is the act of September 29, 1919, and reads as follows:

That the President be, and he is hereby, authorized to appoint as the representative of the United States an ambassador to the Kingdom of Belgium, who shall receive as compensation the sum of $17,500 per annum.

The CHAIRMAN. The point of order is overruled.

Mr. ROGERS. Now, Mr. Chairman, I ask unanimous consent to change the amount carried by the paragraph from $227,500 to $210,000.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. ROGERS: Page 2, line 5, strike out "$227,500" and insert "$210,000."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. MASON. Mr. Chairman, I desire to ask my colleague on the committee whether there is not a law which now provides for an ambassador to Russia?

Mr. ROGERS. There is a law which authorizes the Congress to appropriate for an ambassador to Russia if Congress so desires. The Committee on Appropriations did not deem the necessity for an ambassador so apparent at this moment as to authorize the inclusion of the item in the bill.

Mr. MASON. May I continue my question? In case we resume our relations with Russia within the next few months, as we are likely to. Great Britain has, and we always do what Great Britain does——

Mr. CAMPBELL of Kansas. Not always.

Mr. MASON. We have had no skip for eight years. Would it not be well that I offer an amendment, after the words "Great Britain," to insert in line 4 the word "Russia"? Of course, if we do not appoint an ambassador——

Mr. ROGERS. Let the amendment be reported first before the gentleman debates it.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. Mr. Chairman, let the amendment be reported before it is debated.

The CHAIRMAN. Does the gentleman from Illinois desire to offer an amendment?

Mr. MASON. Yes. After the word "Spain," in line 4, insert the word "Russia."

The CHAIRMAN. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. MASON: Page 2, line 4, after the word "Spain," insert the word "Russia."

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. MASON. I am confined to five minutes, I suppose, on that amendment?

The CHAIRMAN. The gentleman is recognized for five minutes.

Mr. BLANTON. Mr. Chairman, will the gentleman yield for a question?

Mr. MASON. I will if it is not too long.

Mr. BLANTON. Does the gentleman think it wise to send a representative of the United States Government to any country that repudiates its own national debts?

Mr. MASON. The gentleman asks a question that takes a long time to answer. Russia is not repudiating its own national debts. I disagree with you on the statement, and therefore I do not care to be interrupted in my five minutes.

Russia has a government that has been running now for a long time. Whether it is a wise and satisfactory government to the United States or not is not a question for us to pass upon at this time. Later on we are to pass upon the question as to whether we will send this ambassador to Russia. The appropriation for it now can do no harm, but it will be there in case the next President of the United States decides to make a treaty, as Great Britain has been doing. The truth of the matter is that the propaganda that has been used in the United States against the people's government in Russia has simply been carried on to keep us from getting the trade and the business of that government. You and I may not agree with them as to their socialistic ideas as to the division of property, but they have been here and they have offered to trade with us. They are running a peaceful government. Those that I read from say they have the best government they ever had in Russia. On the other side, we hear that they have not the best government.

But there is a propaganda in this country now; certain newspapers are carrying it on. This man, Mr. Boris Bakhmeteff, who has been recognized by the President of the United States, who represents nobody, came here originally representing the Kerensky government, and afterwards stayed on. They reported, in answer to my question before the committee of investigation, that $138,000,000 had been paid to him, and gave an itemized statement signed by the Secretary of the Treasury, and now it seems that from the report—and I have written the honorable Secretary of State about it, but can get no answer—it seems now that they did not pay out that money. I say to you, gentlemen and my colleagues, that, in my opinion, one of the nest of grafters that has robbed the American people has been this artificial man here, Boris Bakhmeteff, who has held on as a representative. There was three hundred and odd million dollars in his hands at the close of the war. The Secretary of State testified before the committee, in response to my resolution, that they had used him to pay out this money to settle with American contractors, under supervision of the Secretary of State and Secretary of the Treasury, and then refuse to give details, because they say the information is privileged, and also testified that many millions had been used to pay for Russian ships. Now the statement is made that that money was not paid, but that the United States is holding it until they can get a receipt for it.

Now, as a matter of fact, my offer of this amendment is simply to have that appropriation ready, so that in case we decide to follow the illustrious example of Great Britain and open trade relations with Russia, that appropriation will be available. They want our goods and our friendship, and they want to buy of and sell to us. It is a part of the conspiracy between our good friends that we have been fighting with to keep us from settling with Russia in order that Great Britain—particularly Great Britain—can enjoy that trade, and on every dollar of the trade that we are doing to-day with Russia—and we are doing some—we have to pay tribute to the English and French merchants before it is done.

I think it would be fair to put that amendment in. The next President, who takes his seat in a few weeks, can decide upon taking the initiative with Russia. Of course, I know the statements that are made against the bolsheviki. But from my conversation with the people who have been there, and the reports that I gather from people who are unprejudiced, I am informed that the present government of Russia has done more for the education and improvement of the people there than has ever been done before in the history of that nation.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. ROGERS. Mr. Chairman, I do not believe the Congress of the United States favors the policy of appropriating for a lot of ambassadors and ministers who are not going to be utilized or needed during the fiscal year contemplated in this bill.

Mr. RAMSEYER. Will the gentleman yield right there?

Mr. ROGERS. In a moment. We have had no ambassador in Russia for several years. There is no ambassador appropriated for in the current law; and the Committee on Appropriations, in omitting the item from the bill now before the Committee of the Whole, has simply followed the policy of the Committee on Foreign Affairs as reflected in the bill of a year ago. It may be—no one can say at this moment—that before June 30, 1922, it will be desirable to have some kind of representative from the United States in Russia; but whether that representative should be an ambassador, a minister, a commissioner, a chargé d'affaires, a secretary, or a consul general, no one can now predict. If the question arises it can perfectly well be dealt with very promptly by Congress after we know what the condition of Russia is and what the need of this country in the matter of representation to Russia shall prove to be at that time. And even without congressional action the President can send there a diplomatic representative.

Mr. FLOOD and Mr. RAMSEYER rose.

Mr. ROGERS. I yield first to my colleague from Virginia [Mr. FLOOD].

Mr. FLOOD. Mr. Chairman, I approve of some of the statements made by the gentleman from Massachusetts, but I do not think his reasoning is consistent with some other provisions of

this bill. There is an appropriation made for an ambassador to Germany, and an appropriation for a minister to Austria and for a minister to Hungary. We are at war with those countries to-day, and there is no more certainty that we will have diplomatic relations with them after the 1st of next July than with Russia. We have no ambassador to Mexico, yet we have an appropriation for one.

Mr. ROGERS. Let the gentleman take the floor in his own right if he wishes. Let me answer the suggestion he has made. In the first place, we have to-day diplomatic representation in Berlin, in Vienna, and in Budapest, which entirely differentiates the situation to start with from the situation in Russia, where we have no diplomatic representation. It is probable that at this moment, and if not at this moment then within a very few months, it will be desirable to have an ambassador or minister to Germany, to Austria, and to Hungary. I repeat, no one can say what the situation is going to be with regard to Russia. Again I say, that in the matter of Germany, the Committee on Appropriations is simply following out the policy recommended last year by the Committee on Foreign Affairs, of which the gentleman from Virginia [Mr. FLOOD] is the ranking Democratic member. There is an appropriation for Germany carried in the current Diplomatic and Consular law and, although it has not been utilized up to this moment, it seems exceedingly likely that it will be utilized within a short time.

Mr. FLOOD. It is not only carried in the current law but was carried in preceding years during the time we were at war with Germany.

Mr. ROGERS. That makes the argument still stronger for carrying the item for Germany. Russia has no appropriation in the current law.

Mr. FLOOD. There was one before the current law.

Mr. ROGERS. Oh, well, we are carrying out the policy of the Committee on Foreign Affairs, as expressed in the current Diplomatic and Consular act. Now I yield to the gentleman from Iowa [Mr. RAMSEYER].

Mr. RAMSEYER. The question I intended to ask was along the line of the question asked by the gentleman from Virginia [Mr. FLOOD]. It does seem to me that there is no more reason for excluding Russia than there would be for excluding Germany, and that there was no more reason for excluding Russia in the first place than there was for excluding Germany, and Germany never was excluded from the bill.

Mr. ROGERS. I am not prepared to say whether the judgment of the Congress as expressed in the last Diplomatic and Consular act was sound or not; but as far as these belligerent countries are concerned, and certainly as far as Germany and Russia are concerned, we have followed the policy of a year ago.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BANKHEAD. I move to strike out the last word. I am very much interested in the statement of the chairman of the subcommittee, that at the present time our Government has diplomatic representatives in Berlin, Vienna, and Budapest. I wish to ask what is their authority for so acting while we are technically in a state of war with Germany and Austria?

Mr. ROGERS. They are sent there under the authority of the President and the Secretary of State, and they are intended to protect the interests, especially the commercial interests, of the United States in these three countries.

Mr. BANKHEAD. Has there been any official recognition of these diplomatic representatives of the Government of the United States by the Government of Germany?

Mr. ROGERS. I am unable to answer that question. I should say that they were there in a semiofficial capacity. The several men are known as commissioners.

Mr. BANKHEAD. The gentleman made the broad statement that they were there as diplomatic representatives of the Government of the United States.

Mr. ROGERS. They are diplomatic representatives.

Mr. SUMNERS of Texas. Mr. Chairman, I move to strike out the last two words. I make the motion for the purpose of trying to get a little clearer notion in my own mind as to what ought to be done with the amendment of the gentleman from Illinois. I have observed in the papers recently that England is removing trade restrictions with Russia. Certainly those people are soon going to begin to trade with somebody. Their international and trade attitude, I believe, is now being formed. Now, it would seem to me that if we need somebody in Germany and Austria now to represent us, and are warranted in having them there, that the same reason would obtain with reference to Russia. I do not make the statement on any assurance that I know anything about it. I do not suggest. I inquire.

Mr. ROGERS. The difference, as it seems to me, is here: In Germany and Austria and Hungary the status of the three countries as members of the family of nations is fairly well crystallized, and the best proof of that is that the President of the United States and the Department of State, whether rightly or wrongly I would not like to assert, have diplomatic representatives at those places. No one can say what the status of Russia in the family of nations is going to be. We can not at this time predict what representative we should have there.

Mr. SUMNERS of Texas. I have in mind that there is great possibility of a change in the affairs in Europe and that we are being jockeyed out of a good deal of trade with Russia, which we are entitled to and which somebody else is going to get.

Mr. WINGO. Will the gentleman yield?

Mr. SUMNERS of Texas. Yes.

Mr. WINGO. Without discussing the merits, does not the gentleman overlook the fact that this Government recognizes the present existing Governments of Germany, Austria, and Hungary, but it does not recognize the existing government in Russia, and a provision in a bill of this kind for the appointment of an ambassador to Russia would be a legal recognition?

Mr. FLOOD. If the gentleman will pardon me, this Government refused to recognize the Government of Mexico, and through all the years the bill contained an appropriation for a representative to Mexico. The status was the same with reference to Mexico as it is in reference to Russia to-day.

Mr. BLANTON. I want to say that the ambassador during that time drew the salary when he had nothing to do but stay here in Washington most of the time.

Mr. FLOOD. Oh, yes; he was doing some work at the State Department.

Mr. SUMNERS of Texas. Mr. Chairman, I refuse to yield to the whole House at once. I want to address myself to the chairman of the committee. The point I make, as it occurs, is that it is about time, in what capacity I do not know, we have somebody over in Russia, if we can get him there, to see what is happening there. There are some big things happening in Europe, and Russia, Russian trade, and Russia's place in the world's future, now being fixed, are not among the least important. That is what I think, as a matter of horse sense, without professing any definite knowledge of the facts or any diplomatic ability.

Mr. ROGERS. We can send a diplomat under the Constitution now.

Mr. SUMNERS of Texas. Then, why not provide for him in the bill and send him?

Mr. ROGERS. We do not want to send an ambassador there now as far as we can predict.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. MASON].

The question was taken, and the amendment was rejected.

The Clerk read as follows:

Envoys extraordinary and ministers plenipotentiary to Cuba, Czechoslovakia, the Netherlands and Luxemburg, and Poland, at $12,000 each, $48,000.

Mr. BLANTON. Mr. Chairman, I reserve a point of order. I want to ask the chairman what authority in law there is for envoys extraordinary and ministers plenipotentiary to Czechoslovakia and Poland?

Mr. ROGERS. Under the Constitution of the United States the President has the right to recognize foreign countries and to appoint ambassadors and ministers. The President has recognized both Czechoslovakia and Poland. The President has appointed a minister, and the Senate has confirmed the appointment, in each case. The Congress of the United States, pursuant to that Executive act and in accordance with the authority flowing from the act, has provided for the salary of the representative.

Mr. BLANTON. Under the same authority, the President could send an envoy extraordinary to any country in the world?

Mr. ROGERS. Provided the Senate confirmed the appointment and provided Congress appropriated for his salary.

Mr. BLANTON. Mr. Chairman, I make the point of order against the word "Czechoslovakia" and also "Poland," because there is no substantive law providing for those positions at a salary of $12,000 each.

The CHAIRMAN. Does the gentleman from Massachusetts desire to be heard?

Mr. ROGERS. Mr. Chairman, there is a general provision of law, which will be found in section 1675 of the Revised Statutes, that the salaries of ministers to all countries not expressly mentioned elsewhere shall be $10,000. So far as the point of order relates to Czechoslovakia and Poland, the statutory maximum amount would be $10,000 each; therefore the point of order is good in so far as the inclusion of these two offices in this $12,000 paragraph is concerned. The point of order, if sustained, would, of course, not prevent the inclusion of these two offices in the next paragraph.

Mr. BLANTON. I do not admit that.

The CHAIRMAN. The Chair sustains the point of order.

Mr. ROGERS. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment by Mr. ROGERS: Page 2, line 6, after the word "to," at the end of the line, insert "China," and change the amount at the end of the line from "$48,000" to "$60,000."

Mr. ROGERS. Mr. Chairman, I ask unanimous consent that all totals be adjusted by the Clerk in accordance with the action of the House, and that that portion of the amendment referring to the total be stricken out of the amendment.

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent that the Clerk may have the right to correct the totals throughout the bill after the committee has made its report, and to modify his amendment in the manner indicated. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will report the amendment as modified.

The Clerk read as follows:

Amendment by Mr. ROGERS: Page 2, at the end of line 6, after the word "to," insert the word "China."

Mr. HUDDLESTON. Mr. Chairman, I reserve the point of order on that. I desire to make a parliamentary inquiry as to what is left in the paragraph to which the point of order was made, which was sustained by the Chair a moment ago.

The CHAIRMAN. As the Chair understood it, the point of order ran to Czechoslovakia and Poland.

Mr. HUDDLESTON. And the Netherlands and Luxemburg and Cuba were left in the paragraph?

The CHAIRMAN. The Chair would think so.

Mr. HUDDLESTON. What about the figures "$12,000"?

The CHAIRMAN. That would apply only to those left in the paragraph.

Mr. WINGO. I thought the point of order went to the paragraph?

Mr. BLANTON. No; I did not make it to the paragraph.

The CHAIRMAN. The point of order went to Czechoslovakia and Poland. The question is on the amendment offered by the gentleman from Massachusetts.

The amendment was agreed to.

The Clerk read as follows:

Envoys extraordinary and ministers plenipotentiary to Austria, Bolivia, Bulgaria, Colombia, Costa Rica, Denmark, Dominican Republic, Ecuador, Finland, Greece, Guatemala, Haiti, Honduras, Hungary, Nicaragua, Norway, Panama, Paraguay, Uruguay, Persia, Portugal, Rumania, Salvador, Siam, Sweden, Switzerland, Turkey, and Venezuela, at $10,000 each, and to the Serbs, Croats, and Slovenes, $10,000; in all, $290,000.

Mr. BLANTON. Mr. Chairman, I make the point of order that there is no such office as envoy extraordinary and minister plenipotentiary to Turkey, as provided for by the present law, with a salary of $10,000, and that there is no such office also proivded for by law for Finland, for the Serbs, the Croats, or the Slovenes.

The CHAIRMAN. What does the gentleman from Massachusetts say to the point of order?

Mr. ROGERS. Mr. Chairman, the gentleman makes the point of order as to Turkey, Finland, the Serbs, the Croats, and Slovenes.

As far as Turkey is concerned—and I should like, if I may be permitted, a separate ruling upon each of these points of order—the law for many years has authorized the sending of an ambassador to that country. Until the current appropriation act there has been for many years an ambassador to Turkey, dating back, as I recall it, to 1906 or thereabout. Last year the item was omitted for the first time from the appropriation act. But that omission does not in any way change the fundamental authority for a subsequent appropriation another year. Therefore Congress would have the right to appoint an ambassador at $17,500. If we did so, the item would have been carried in the first paragraph which we have just passed. We, however, now propose a minister to Turkey for the ensuing year. That minister will receive, if he is appointed, the salary of $10,000 a year, instead of an ambassador's salary of $17,500. The contention of the committee, therefore, is that the recommendation is in order under the Holman rule, because it retrenches expenditures.

Mr. BLANTON. Mr. Chairman, will the gentleman yield on that point?

Mr. ROGERS. Yes.

Mr. BLANTON. Suppose we appointed a minister who was not provided for by law at a salary of $10,000, and that as soon as Congress meets on April 4 in special session a deficiency appropriation subcommittee, which would not be presided over by the gentleman from Massachusetts, should then bring in a deficiency appropriation providing for an ambassador at $17,500 to Turkey, which is provided for by law. Then we will have two officers, one at $17,500 a year and another at $10,000 a year, and the $10,000 is not authorized by law, what effect does that have upon the Holman rule?

Mr. ROGERS. Does not the gentleman think that if a minister is appropriated for under this paragraph it would automatically wipe out, as far as the next fiscal year is concerned, the authority to appropriate for an ambassador?

Mr. BLANTON. No; what we do with this little appropriation bill has nothing whatever to do with the legislation of the country, the substantive law of the country. All of these are statutory positions. The gentleman knows that as well as I do.

Mr. ROGERS. Of course, there can not be a minister and an ambassador to the same capital at the same time. Therefore, if you appropriate for a minister here, as a matter of common sense we can not and shall not appropriate for or appoint an ambassador.

Mr. BLANTON. The trouble is that the law authorizes an ambassador at $17,500 and does not authorize a minister at $10,000.

Mr. ROGERS. It authorizes a diplomatic representative. I do not regard the name as being as important as the office. I submit that the provision clearly involves a retrenchment.

The CHAIRMAN. Will the gentleman from Massachusetts allow the Chair to ask him a question?

Mr. ROGERS. Certainly.

The CHAIRMAN. We are unable to find at the Chair's desk any authorization of an ambassador to Turkey. Is that of a subsequent act?

Mr. ROGERS. Mr. Chairman, the situation with respect to the creation of ambassadors is somewhat complex. The act of Congress of March 1, 1893, provided that—

Whenever the President shall be advised that any foreign Government is represented in the United States by an ambassador or envoy extraordinary, minister plenipotentiary, minister resident, special envoy, or chargé d'affaires, he is authorized, in his discretion, to direct that the representative of the United States to such Government shall bear the same designation, and this provision shall in no wise affect the duties, powers, or salaries of such representative.

That is the situation down from 1893 to 1909. In the act approved March 2, 1909, Thirty-fifth Statutes at Large, page 672, the foregoing provision of 1893 was repealed and the following language was substituted:

And hereafter no ambassadorship shall be created unless the same shall be provided by act of Congress.

The effect of those two laws taken together is that the ambassadors appointed by the President from 1893 to 1909 were validly appointed and were entitled under the Diplomatic and Consular act to the salary for an ambassador. The ambassador to Turkey was created in 1906, before the repealer of 1909. Therefore I think there can be no question as to the validity of the appointment of an ambassador to Turkey in 1909.

The CHAIRMAN. Well, that does not seem to be a direct authorization of an ambassador under the law. Is not that the difficulty in this case?

Mr. ROGERS. Mr. Chairman, is the meaning of the act of 1893 entirely clear to the Chair?

The CHAIRMAN. It appears to the Chair that unless the President appoints an ambassador there is not authority in law for the pay of an ambassador.

Mr. ROGERS. But the President appointed an ambassador to Turkey by reason of the authority of the act of 1893 on or about the 1st of July, 1906. Therefore, in my view, the transaction was then complete and valid. He had complete authority given by the act of 1893; an ambassador was duly created and the office has been filled ever since until diplomatic relations were severed shortly before our entrance into the World War.

Mr. GARRETT. Mr. Chairman, may I respectfully suggest that even though there be authority of law that the Holman rule would not be applicable under the peculiar situation which exists here, and I think it would be unfortunate to apply the Holman rule to this situation lest we create a precedent that might be extremely embarrassing.

The CHAIRMAN. The Chair will state to the gentleman from Tennessee that he is going to interrogate the gentleman from Massachusetts as to his view whether or not it could be held as being a subordinate office inclusive in the larger or higher grade. The Chair himself has very serious doubts as to whether or not it could be.

Mr. GARRETT. If the Chair will indulge me, I have only a very brief suggestion to make. The Holman rule is a technical rule; it is a rule that has been strictly construed and that

ought to be strictly construed, and being technical, it should be technically applied.

Now, if it were applicable, it should have been invoked by the provision of an express amendment in the paragraph that was read just before this, which provided for ambassadors, and there should have been, then, a repealer put in. Now, you have passed the ambassadors' paragraph and have come to the ministers' paragraph. We read these appropriation bills by paragraphs and deal with them by paragraphs. You have passed the period, therefore, where the law might have been repealed, even if the Holman rule would have applied so as to bring in a repealer. That was on the other paragraph. You are now dealing with this paragraph standing alone, and it puts in a new office, confessedly.

Those things I am suggesting, and I am suggesting this purely on the point of order, because, if I may be indulged for a moment, I am in sympathy with the purpose the committee has in mind. While I am in favor of a strict application of the old rule of the House with the new situation which has arisen by reason of the so-called budget rule, at the same time I am a little bit afraid that, in dealing with these foreign matters, it is somewhat unfortunate that the point of order has been made as to this Czechoslovak minister and the ministers to these other countries, because it may be understood, if the bill passes this House and fails to carry them, we are treading on very dangerous ground, and I am afraid if the Chair has to sustain the point of order—and he may have to sustain it—it should be followed by legislation coming from the legislative committee.

The CHAIRMAN. Does the gentleman from Massachusetts [Mr. ROGERS] concede the point of order as to Finland and the Serbs, Croats, and Slovenes?

Mr. ROGERS. No, Mr. Chairman. The appropriation for the minister to Finland is clearly in order under the constitutional provision I have already referred to. Finland was recognized by the United States on the 7th day of May, 1919, and a minister sent in accordance with the recognition and in accordance with the constitutional power of the President. In other words, this office finds its source and authority directly in the Constitution, the President having recognized the Republic of Finland.

So far as the minister to the Serbs, Croats, and Slovenes is concerned, I think the gentleman from Texas will withdraw the point of order. But in any event the point of order is not well taken. In substance this case is like that of Finland. The situation is simply this: We have for many years carried a minister to Serbia at $10,000 a year. As a result of the wholesale readjustment of territories and races of southeastern Europe, there was an entirely transformed Serbia. Certain people formerly of Croatia, part of the Austro-Hungarian Empire, were included in that new country, and certain other Slavic people who call themselves "Slovenes" were also included within the new Serbia. In order to take account of the ethnic situation which resulted, the country called itself the country of the Serbs, Croats, and Slovenes. It is the old Serbia with a new form and a new name. The new country sends a minister to this country whom they call the "minister of the Serbs, Croats, and Slovenes," and we send a minister to that country who is designated in his commission as the "minister to the Serbs, Croats, and Slovenes." This item in no way differs fundamentally from the case of Finland, because, as in the case of Finland, the President of the United States has commissioned a minister to the country of the Serbs, Croats, and Slovenes. Hence the United States Congress, in making this appropriation, is simply recognizing the lawful Executive act of the President.

Mr. FLOOD. Why should not the same rule apply to this country as applies to Finland?

Mr. ROGERS. I think it does apply. But if on any theory the Chair should sustain the point of order, I hope the gentleman from Texas would see that this is simply a substituted name, and in no way modifies the condition that has prevailed for years.

Mr. FLOOD. The recognition of a nation rests with the President?

Mr. ROGERS. Precisely.

Mr. FLOOD. And the President has recognized this nation?

Mr. ROGERS. He has; and he has sent a minister to the Serbs, Croats, and Slovenes.

Mr. FLOOD. He has that authority without act of Congress.

Mr. ROGERS. I agree with the gentleman, and I have tried to state that.

Mr. BLANTON. Mr. Chairman, I am asking for recognition on the point of order.

The CHAIRMAN. The gentleman from Massachusetts [Mr. ROGERS] still has the floor.

Mr. ROGERS. I have completed my discussion of the point of order.

The CHAIRMAN. The Chair wishes to ask the gentleman a question. The gentleman seems to think it is quite clear the constitutional authority of the President to appoint ambassadors and ministers, and so forth, authorizes him to do so without other authority of law. Let me call the gentleman's attention to this proposition, that the same authority in the provision of the Constitution that says the President may, by the advice and consent of the Senate, appoint ambassadors and ministers and consuls also says—and which follows immediately—that he may appoint judges of the Supreme Court and other officials of the United States. Certainly the President would never appoint any of these other officers of the United States until Congress has provided for such offices. He would not appoint a judge of a court until Congress had provided for the court. Can it be said that he might under the law appoint an ambassador or what not until Congress has authorized him to do so? I am simply asking that question so that you may discuss it.

Mr. BLANTON. I think the question is unanswerable.

Mr. ROGERS. Mr. Chairman, the Constitution of the United States expressly provides for the creation of the inferior courts by act of Congress. The authority is given to constitute tribunals inferior to the Supreme Court. It certainly is not my impression that the President, before appointing members of the Supreme Court, would have been obliged to wait upon the action of Congress.

Whatever the fact may originally have been in that regard, it is perfectly clear that for generations the recognition of foreign countries has been regarded as solely an Executive function. The precedents are almost innumerable to that effect. I should like in this same connection——

The CHAIRMAN. The gentleman need not cite authorities on that. Of course, the Chair understands that the recognition of a country and the appointment of an ambassador are not necessarily related.

Mr. FLOOD. Mr. Chairman, may I make a suggestion to the Chair?

The CHAIRMAN. The gentleman from Massachusetts [Mr. ROGERS] has the floor.

Mr. OSBORNE rose.

Mr. ROGERS. Mr. Chairman, I yield to the gentleman from California.

Mr. OSBORNE. I have a suggestion to make. The suggestion is, that evidently under what the President considers to be his constitutional authority, he has appointed representatives to those new countries who are now serving. In Czechoslovakia Richard Crane is envoy extraordinary and minister plenipotentiary, and in Poland Mr. Hugh S. Gibson is envoy extraordinary and minister plenipotentiary, and in the Kingdom of the Serbs, Croats, and Slovenes Mr. H. Percival Dodge has been appointed by the President and is now serving as envoy extraordinary and minister plenipotentiary. I just call attention to those facts. The President evidently believes that that is in order.

Mr. ROGERS. I should like, Mr. Chairman, to call the attention of the Chair in this same connection, although I am not sure that it greatly amplifies or indeed modifies the constitutional authority itself, to the organic act of the Department of State.

Mr. OSBORNE. May I add that those names that I have mentioned have been confirmed by the Senate? The Senate evidently thought the President had the authority to make those appointments.

Mr. FLOOD. Mr. Chairman, the power to recognize a new State has from the foundation of this Government rested with the Executive, as it does with the executive of all other Governments. That recognition is made manifest by receiving a minister from the new State or appointing a minister on our part to go to the new State to represent us. That has been done since the foundation of the Government without any act of Congress. Until 20 years ago our diplomatic representatives were all ministers plenipotentiary, and we had no ambassadors. Then some ambassadors were created by an act of the Executive, and Congress saw fit to restrict the executive branch in the creation of this higher branch of diplomatic officers, and the only difference we have now is that the President can not appoint an ambassador unless that position has been created by act of Congress. But he has always had the right to appoint ministers to new States without an act of Congress, and the only thing Congress did was to make an appropriation carrying out the appointment made by the President. I think that is perfectly clear.

Mr. ROGERS. Mr. Chairman, this is a point of considerable importance and perhaps of some difficulty. I am going to move in a moment that the committee rise, so that there may be an opportunity for consideration before to-morrow's session. Be-

fore I do so, however, I desire to submit for the consideration of the Chair what is perhaps as nearly the organic act of the United States as affecting the State Department as is to be found in the statutes of the Government. It is contained in Revised Statutes, section 202, and in Barnes Federal Code, section 221. I ask unanimous consent that that be printed in the RECORD without reading.

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent that the section referred to be printed in the RECORD without reading. Is there objection?

There was no objection.

Following is the section referred to:

SEC. 221. Management of foreign affairs.—The Secretary of State shall perform such duties as shall from time to time be enjoined on or intrusted to him by the President relative to correspondence, commissions, or instructions to or with public ministers or consuls from the United States, or to negotiations with public ministers from foreign states or princes, or to memorials or other applications from foreign public ministers or other foreigners, or to such other matters respecting foreign affairs as the President of the United States shall assign to the department, and he shall conduct the business of the department in such manner as the President shall direct. (R. S., sec. 202; acts July 27, 1789, ch. 4, sec. 1, 1 Stat. 28; Sept. 15, 1789, ch. 14, sec. 1, 1 Stat. 68.)

Mr. BLANTON. Mr. Chairman, does the gentleman now yield for a question?

Mr. ROGERS. Does the gentleman from Texas object to deferring the question?

Mr. BLANTON. Oh, no.

Mr. ROGERS. I move, Mr. Chairman, that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. TOWNER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 15872) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1922, and had come to no resolution thereon.

SENATE BILLS REFERRED.

Under clause 2, Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 4719. An act conferring jurisdiction upon the United States District Court for the Eastern District of South Carolina to hear and determine the claim of the owners of the Danish steamship *Flynderborg* against the United States, and for other purposes; to the Committee on Claims.

S. 4039. An act to amend section 3 of the act of Congress of June 28, 1906, entitled "An act for the division of the lands and funds of the Osage Indians in Oklahoma, and for other purposes"; to the Committee on Indian Affairs.

TELLERS FOR COUNTING THE ELECTORAL VOTE.

The SPEAKER. The Chair will appoint as tellers on the part of the House for the counting of the electoral vote Mr. LAMPERT and Mr. RUCKER.

EXTENSION OF REMARKS.

Mr. ROGERS. Mr. Speaker, I ask unanimous consent to extend my remarks on the bill just considered.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to extend his remarks on the bill just considered. Is there objection?

There was no objection.

Mr. HUDDLESTON. Mr. Speaker, I ask unanimous consent to extend my remarks on the Agricultural appropriation bill.

The SPEAKER. The gentleman from Alabama asks unanimous consent to extend his remarks on the Agricultural appropriation bill. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. ROGERS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 55 minutes p. m.) the House adjourned until to-morrow, Friday, January 28, 1921, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

372. A letter from the Sergeant at Arms of the House of Representatives, transmitting statement of receipts and disbursements of money through his hands December 1, 1919, to December 1, 1920, and a statement of property in his charge December 1, 1920; to the Committee on Accounts.

373. A letter from the president of the Washington & Old Dominion Railway, transmitting annual report of that corporation to Congress; to the Committee on the District of Columbia.

374. A letter from the Secretary of War, transmitting draft of proposed legislation to amend the provision "That hereafter funds appropriated for support of the Army may be used for the procurement of supplies to be held in store for issue to the Army during subsequent years"; to the Committee on Military Affairs.

375. A letter from the Secretary of War, transmitting draft of proposed legislation to permit payment of Army pay claims until June 30, 1922, under the provisions of the Army appropriation bill for 1919; to the Committee on Military Affairs.

376. A letter from East Washington Heights Traction Railroad Co., transmitting annual report of that organization for the year ending December 31, 1920; to the Committee on the District of Columbia.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. WHEELER, from the Committee on Railways and Canals, to which was referred the bill (H. R. 10919) to require the Secretary of War to cause to be made a survey for a canal from Cumberland Sound to the mouth of the Mississippi River, and to make full and complete report to Congress of the most feasible route and cost of construction, reported the same with amendments, accompanied by a report (No. 1246), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. SINNOTT, from the Committee on the Public Lands, to which was referred the bill (H. R. 15445) to provide for the disposition of boron deposits, reported the same without amendment, accompanied by a report (No. 1247), which said bill and report were referred to the House Calendar.

Mr. LANGLEY, from the Committee on Public Buildings and Grounds, to which was referred the bill (H. R. 15714) to amend an act entitled "An act for the relief of contractors and subcontractors for the post offices and other buildings and work under the supervision of the Treasury Department, and for other purposes," reported the same without amendment, accompanied by a report (No. 1249), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. ANDREWS of Nebraska, from the Committee on Public Buildings and Grounds, to which was referred the bill (H. R. 15894) to authorize an appropriation to enable the Secretary of the Treasury to provide medical, surgical, and hospital services and supplies for persons who served in the World War and are patients of the Bureau of War Risk Insurance and of the Federal Board for Vocational Education, Division of Rehabilitation, and for other purposes, reported the same with amendments, accompanied by a report (No. 1250), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. SWINDALL, from the Committee on the Public Lands, to which was referred the bill (H. R. 15219) to authorize the Commissioner of the General Land Office to dispose of certain trust funds in his possession, reported the same without amendment, accompanied by a report (No. 1251), which said bill and report were referred to the House Calendar.

Mr. STEENERSON, from the Committee on the Post Office and Post Roads, to which was referred the bill (H. R. 15906) to further reclassify postmasters and employees of the Postal Service and readjust their salaries and compensation on an equitable basis, and for other purposes, reported the same with an amendment, accompanied by a report (No. 1252), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. CRAGO, from the Committee on Military Affairs, to which was referred the bill (S. 4324) for the relief of William C. Brown, reported the same without amendment, accompanied by a report (No. 1245), which said bill and report were referred to the Private Calendar.

Mr. HERNANDEZ, from the Committee on Indian Affairs, to which was referred the bill (S. 3138) authorizing the Secretary of the Interior to sell and convey to the Great Northern Railway Co. certain lands for stockyards, and for other purposes, at Browning Station, in the State of Montana, reported the same without amendment, accompanied by a report (No. 1248), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. GOULD: A bill (H. R. 15914) to amend the provisions of an act relating to certain railway corporations owning or operating street railways in the District of Columbia, approved June 5, 1905; to the Committee on the District of Columbia.

By Mr. HERNANDEZ: A bill (H. R. 15915) providing for a commission to ascertain and determine the rights of persons occupying Pueblo Indian lands, in the State of New Mexico; to the Committee on Indian Affairs.

By Mr. McKEOWN: A bill (H. R. 15916) to amend section 101 of the Judicial Code; to the Committee on the Judiciary.

By Mr. HAWLEY (by request): A bill (H. R. 15917) to authorize the addition of certain lands to the Crater National Forest; to the Committee on the Public Lands.

By Mr. SUMNERS of Texas: A bill (H. R. 15918) providing for the meeting of electors of President and Vice President, for the issuance and transmission of the certificates of their selection and of the result of their determination, and for other purposes; to the Committee on Election of President, Vice President, and Representatives in Congress.

By Mr. HAWLEY (by request): A bill (H. R. 15919) to add to the Crater National Forest, in Oregon, certain lands that were revested in the United States pursuant to the decision of the Supreme Court of the United States in the case of the Oregon & California Railroad Co. against the United States, and for other purposes; to the Committee on the Public Lands.

By Mr. MOORES of Indiana: A bill (H. R. 15920) to provide for the relief of certain employees of the Government who have become eligible for retirement under the provisions of the retirement act of May 22, 1920, and have thereafter been continued in the service or reemployed therein; also to give to retired employees a limited status for reinstatement in certain cases, and for other purposes; to the Committee on Reform in the Civil Service.

By Mr. CLARK of Missouri: Resolution (H. Res. 654) authorizing the Committee on Election of President, Vice President, and Representatives in Congress to investigate and report what funds, if any, have been contributed toward contesting the election of any person holding a certificate of election to the House of Representatives of the Sixty-seventh Congress; to the Committee on Rules.

By Mr. SNYDER: Resolution (H. Res. 655) for the immediate consideration of H. R. 15876; to the Committee on Rules.

By the SPEAKER: Memorial of the Legislature of the State of Arizona, urging the recognition of President Alvaro Obregon and the Republic of Mexico; to the Committee on Foreign Affairs.

By the SPEAKER: Memorial of the Legislature of the State of Utah, urging the passage of the Fordney tariff bill; to the Committee on Ways and Means.

By Mr. FRENCH: Memorial of the Legislature of the State of Idaho, urging the passage of H. R. 14905, for the continuation of Federal aid in the construction of roads; to the Committee on Roads.

By Mr. GRIFFIN: Memorial of the Legislature of the State of New York, urging that the resolution introduced by Hon. J. W. WADSWORTH, Jr., be adopted and that Federal authorities discontinue the operation of barges, boats, and other transportation facilities on the canal system at the earliest possible moment; to the Committee on Interstate and Foreign Commerce.

By Mr. HERSEY: Memorial of the Legislature of the State of Maine, favoring legislation which will simplify and expedite the procedure whereby wounded and disabled service men may obtain the benefits to which they are entitled; to the Committee on Interstate and Foreign Commerce.

By Mr. O'CONNELL: Memorial of the Legislature of the State of New York, urging that the resolution introduced by Hon. J. W. WADSWORTH, Jr., be adopted and that Federal authorities discontinue the operation of barges, boats, and other transportation facilities on the canal system at the earliest possible moment; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CRAMTON: A bill (H. R. 15921) granting a pension to William F. Leach; to the Committee on Pensions.

By Mr. GREEN of Iowa: A bill (H. R. 15922) granting an increase of pension to Archie S. Blackmer; to the Committee on Invalid Pensions.

By Mr. HAWLEY: A bill (H. R. 15923) granting an increase of pension to Frederick H. Thompson; to the Committee on Pensions.

Also, a bill (H. R. 15924) for the relief of the dependents of certain members of the Oregon National Guard, who were killed (while serving in the line of duty and not as the result of their own misconduct) by the explosion of a 155-millimeter cannon at Camp Lewis, Wash., on July 16, 1920; to the Committee on Claims.

By Mr. HERNANDEZ: A bill (H. R. 15925) granting an increase of pension to Marina A. de Lucero; to the Committee on Pensions.

By Mr. HOCH: A bill (H. R. 15926) granting a pension to Adeline Fender; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15927) granting a pension to Lucia Biddison; to the Committee on Invalid Pensions.

By Mr. IRELAND: A bill (H. R. 15928) granting an increase of pension to Martha A. Anderson; to the Committee on Invalid Pensions.

By Mr. LANGLEY: A bill (H. R. 15929) granting a pension to Owen Combs; to the Committee on Pensions.

Also, a bill (H. R. 15930) granting a pension to Usley Akers; to the Committee on Invalid Pensions.

By Mr. ROUSE: A bill (H. R. 15931) for the relief of William McCormack; to the Committee on Military Affairs.

By Mr. TINCHER: A bill (H. R. 15932) granting a pension to Susie M. Anderson; to the Committee on Invalid Pensions.

By Mr. WOOD of Indiana: A bill (H. R. 15933) granting an increase of pension to Hattie Gorse; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5307. By Mr. BRIGGS: Petition of the Galveston Commercial Association, indorsing H. R. 15748, providing for reclassification of salaries of clerks and inspectors in the Steamboat-Inspection Service; to the Committee on Reform in the Civil Service.

5308. By Mr. CRAMTON: Resolution of the delegates representing 18,000 woolgrowers of the State of Michigan in favor of the French-Capper true-fabric bill; to the Committee on Interstate and Foreign Commerce.

5309. Also, resolution passed by the executive committee of the St. Clair County Farm Bureau, Port Huron, Mich., asking for the passage of the French-Capper fabric bill (H. R. 11641); to the Committee on Interstate and Foreign Commerce.

5310. By Mr. CURRY of California: Petition of employees of the United States Steamboat-Inspection Service, favoring House bill 15746, to increase their salaries; to the Committee on the Merchant Marine and Fisheries.

5311. By Mr. GALLIVAN: Petition of the Misses Helena, Catherine, Gertrude, and Ellen Evans, 50 G Street South, Boston, Mass., protesting against Smith-Towner bill; to the Committee on Education.

5312. Also, petition of Mrs. Charles F. Gettemy, corresponding secretary of the Dorchester Woman's Club, favoring passage of Sheppard-Towner bill; to the Committee on Interstate and Foreign Commerce.

5313. By Mr. GANLY: Petition of sundry citizens of the Bronx, N. Y., protesting against the occupation of Germany by French colonial troops; to the Committee on Foreign Affairs.

5314. By Mr. KENNEDY of Iowa: Petition of the Farmers' National Farm Loan Association, of Letts, Iowa, asking that the present injunction against further business by the Federal land bank be dissolved; to the Committee on the Judiciary.

5315. By Mr. KIESS: Evidence in support of House bill 15645, granting an increase in pension to Abbie J. Lewis; to the Committee on Invalid Pensions.

5316. By Mr. KING: Petition of Council No. 583 of the Knights of Columbus, Quincy, Ill., favoring recognition of the Irish republic; to the Committee on Foreign Affairs.

5317. Also, petition of the Galesburg (Ill.) branch of the Railway Mail Clerks, asking for an increase in salaries; to the Committee on the Post Office and Post Roads.

5318. By Mr. KINKAID: Petition of J. M. Stoetzel and 17 other residents of Scotia, Nebr., and vicinity, against profiteering in oil and gasoline by oil companies; to the Committee on Interstate and Foreign Commerce.

5319. Also, petition of the Nebraska State Irrigation Association, indorsing the passage of the emergency tariff bill (H. R. 15275); to the Committee on Ways and Means.

5320. Also, petition or memorial of the Nebraska State Irrigation Association, indorsing passage of Senate bill 4561, by Senator CAPPER; to the Committee on Agriculture.

5321. By Mr. LONERGAN: Petition of the Connecticut Teachers' League, favoring the truth-in-fabric bill; to the Committee on Interstate and Foreign Commerce.

5322. Also, petition of Connecticut Teachers' League, regarding preservation of national parks; to the Committee on Water Power.

5323. By Mr. McDUFFIE: Papers to accompany House bill 15624, for the relief of J. E. Hendrix; to the Committee on Claims.

5324. By Mr. TAGUE: Petition of the New England Purchasing Agents' Association, Boston, Mass., regarding commercial bribery; to the Committee on the Judiciary.

5325. By Mr. TAYLOR of Colorado: Petition of the Church of Brethren and Friends, of Grand Junction, Colo., urging the passage of House bill 12652, providing for physical training and education; to the Committee on Education.

5326. By Mr. TINKHAM: Petition of Henry J. Ryan, American Legion headquarters, Indianapolis, Ind., concerning compulsory education in English, American history, and civics in the public and private schools; to the Committee on Education.

5327. Also, petition of the Public Education Association of Worcester, Mass., indorsing the Fess-Capper bill; to the Committee on Education.

5328. Also, petition of the New England Purchasing Agents' Association, favoring the decentralized plan of railroads, and legislation for the punishment of commercial bribery; to the Committee on the Judiciary.

SENATE.

FRIDAY, *January 28, 1921.*

(Legislative day of Wednesday, January 26, 1921.)

The Senate met at 12 o'clock m., on the expiration of the recess.

Mr. HARRISON. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Gronna	Lodge	Smith, Ariz.
Ball	Hale	McCumber	Smith, Ga.
Beckham	Harris	McKellar	Smith, Md.
Borah	Harrison	McLean	Smith, S. C.
Brandegee	Heflin	McNary	Smoot
Calder	Henderson	Moses	Spencer
Capper	Hitchcock	Myers	Stanley
Colt	Johnson, Calif.	Nelson	Sutherland
Culberson	Jones, N. Mex.	Overman	Thomas
Curtis	Jones, Wash.	Page	Townsend
Dial	Kellogg	Penrose	Trammell
Dillingham	Kendrick	Phipps	Underwood
Elkins	Kenyon	Pomerene	Wadsworth
Fletcher	Keyes	Ransdell	Walsh, Mass.
France	King	Robinson	Williams
Gerry	Kirby	Sheppard	Willis
Gooding	Lenroot	Simmons	

Mr. BALL. I desire to announce that the Senator from Washington [Mr. POINDEXTER] and the Senator from Montana [Mr. WALSH] are absent on official business of the Senate.

Mr. CURTIS. I have been requested to announce that the Senator from Wisconsin [Mr. LA FOLLETTE], the Senator from Missouri [Mr. REED], and the Senator from Maine [Mr. FERNALD] are engaged in a hearing before the Committee on Manufactures.

Mr. HARRISON. I was requested to announce that the Senator from Oregon [Mr. CHAMBERLAIN], the Senator from South Dakota [Mr. JOHNSON], and the Senator from Delaware [Mr. WOLCOTT] are detained from the Senate by reason of illness.

Mr. McKELLAR. I wish to state that the junior Senator from Virginia [Mr. GLASS] is detained from the Senate on important business.

The VICE PRESIDENT. Sixty-seven Senators have answered to the roll call. There is a quorum present.

READING OF WASHINGTON'S FAREWELL ADDRESS.

The VICE PRESIDENT. In compliance with the standing order of the Senate of the United States that at the conclusion of the reading of the Journal upon the 22d day of February Washington's Farewell Address shall be read and that the Presiding Officer shall designate a Senator for that purpose, the Chair designates to read the address upon the 22d of February next the Senator from New York [Mr. WADSWORTH].

ENROLLED BILLS AND JOINT RESOLUTION SIGNED.

The signature of the Vice President was announced to the following enrolled bills and joint resolution, which had previously been signed by the Speaker of the House of Representatives:

H. R. 974. An act for the relief of W. T. Dingler;

H. R. 4184. An act for the relief of C. V. Hinkle;

H. R. 11769. An act to amend an act entitled "An act to provide a civil government for Porto Rico, and for other purposes," approved March 2, 1917; and

H. J. Res. 440. Joint resolution directing the Secretary of War to cease enlisting men in the Regular Army of the United States, except in the case of those men who have already served one or more enlistments therein.

CREDENTIALS.

Mr. ROBINSON. I present the credentials of Hon. T. H. CARAWAY, elected to a seat in this body from the State of Arkansas for the term beginning March 4, 1921, and I ask that the same may be read and placed on file.

The credentials were read and ordered to be filed, as follows:

STATE OF ARKANSAS,
Governor's Office, Little Rock.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 2d day of November, 1920, T. H. CARAWAY was duly chosen by the qualified electors of the State of Arkansas a Senator from said State to represent said State in the Senate of the United States for the term of six years, beginning on the 4th day of March, 1921.

Witness: His excellency, our governor, Thomas C. McRae, and our seal hereto affixed, at Little Rock, this 15th day of January, in the year of our Lord 1921.

[SEAL.]

By the governor:

THOMAS C. MCRAE, *Governor.*

IRA C. HOPPER, *Secretary of State.*

CARE OF DISABLED EX-SERVICE MEN.

Mr. ROBINSON. Mr. President, the Legislature of the State of Arkansas adopted a concurrent resolution, the substance of which has been transmitted to me by a telegram from the secretary of state. Some days ago I introduced a bill authorizing the transfer of Fort Logan H. Roots from the War Department to the Public Health Service for use as a hospital for certain disabled soldiers and others. The concurrent resolution indorses the provisions of that bill and urges its enactment.

At the present time there are 19 sick and disabled soldiers confined in the hospital for nervous diseases, which is an institution for the care of the insane in the State of Arkansas. Under the statutes of that State inmates of the hospital may pay not to exceed 50 cents per day for attention and services there. So for the inmates of that hospital who are sick and disabled soldiers the Government can pay only 50 cents a day, while the Federal statute authorizes the payment of $3 a day. I called the attention of the War Risk Insurance Bureau to the fact that these soldiers are confined in the hospital for the insane at Little Rock, Ark., and I am assured by the Chief of the Bureau of War Risk Insurance that upon receipt of information as to the names and claim numbers of the War Risk inmates they will be transferred to a hospital elsewhere.

The commander of the American Legion for Arkansas, Leigh Kelley, sends me a telegram, which I send to the desk and ask to have read.

The VICE PRESIDENT. Without objection, the Secretary will read as requested.

The reading clerk read as follows:

LITTLE ROCK, ARK., *January 27, 1921.*

JOE T. ROBINSON,
United States Senate, Washington, D. C.

Replying to your telegram, I appreciate that as a result of your splendid efforts disabled ex-service men at the State hospital for nervous diseases are to be transferred elsewhere. However, this only takes care of 19, whereas we have thousands of disabled ex-service men in Arkansas for whom adequate hospitalization must be provided. Hope you will make determined effort to obtain Fort Logan H. Roots, as there is no apparent reasons for its retention by the military authorities. If permanent transfer can not be effected, it should be transferred temporarily for a period of years to United States Public Health Service. Deplorable lack of hospital facilities for disabled men must ever be a blot on our Government unless immediate steps are taken to provide adequate hospitalization for our Nation's heroes.

LEIGH KELLEY,
Department Commander American Legion of Arkansas.

Mr. ROBINSON. The Surgeon General of the Public Health Service has twice requested the use of Fort Logan H. Roots for hospital purposes in connection with sick and disabled soldiers, but the War Department has declined the request on the

ground that in the future the use of the property at Fort Logan H. Roots may be resumed as a fort.

The bill which I have introduced, and which is the subject of the telegrams to which I have referred, has been sent down to the War Department by the chairman of the Committee on Military Affairs, with the request that the committee be informed as to what use is now being made of Fort Logan H. Roots, what use is contemplated in the early future, and whether it is deemed practicable by the War Department that the transfer called for in the bill shall be made. The information which I have is to the effect that while there are a large number of buildings at Fort Logan H. Roots which could, with some expenditure of public funds, be made available for hospital purposes, the greater number of those buildings are now unused and have been for a year or more. It is believed that no reason exists why the property should not be temporarily at least availed of for hospital purposes.

There are hundreds, perhaps thousands, of former service men in the State of Arkansas who are greatly in need of hospital facilities. The story is a pathetic one. I shall not undertake to go into it in detail at this time, but if some provision is not made for them in the near future I shall undertake to make a full statement of the case and furnish the Senate information regarding the matter.

Before abandoning the floor I ask to have printed in the RECORD the telegram to which I referred in the beginning of my remarks, communicating the concurrent resolution adopted by the General Assembly of the State of Arkansas. It will be observed that the telegram relates to another concurrent resolution also adopted by the Legislature of Arkansas, with relation to an improvement of the Ouachita River. I ask that the telegram may be inserted in the RECORD.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

LITTLE ROCK, ARK., *January 27, 1921.*

Hon. JOE T. ROBINSON,
United States Senator from Arkansas, Washington, D. C.:

House concurrent resolution No. 9 has just been approved by the governor. Resolution urges Congressmen and Senators from Arkansas to use best efforts in passage of legislation transferring Fort Logan H. Roots to the Public Health Service. Passage urgently necessary to proper care of disabled ex-service men. House concurrent resolution No. 10 also signed by the governor to-day, urging passage of appropriation for construction of locks and dams on the Ouachita River. Both resolutions are very meritorious. Certified copies being forwarded in to-day's mail.

IRA C. HOPPER, *Secretary of State.*

NAVAL BUILDING PROGRAM.

Mr. GERRY. Mr. President, I desire to announce that on Monday next at the close of the routine morning business, or as soon thereafter as I can obtain the floor, I shall discuss the naval building program.

SHIPPING CLAIMS AGAINST THE BRITISH GOVERNMENT.

Mr. LODGE. Mr. President, on yesterday I introduced a resolution of inquiry asking the President for certain information, if not incompatible with the public interest. I thought there was no objection to the resolution, and that it had been adopted. I now see that the resolution was printed and went over. There was no objection to it, and I should like now to ask that there may be unanimous consent that it be considered and passed.

The VICE PRESIDENT. Is there objection to the request of the Senator from Massachusetts?

Mr. UNDERWOOD. Let the resolution be read, Mr. President.

Mr. LODGE. It simply asks for certain information, I will say to the Senator from Alabama.

The VICE PRESIDENT. The Secretary will read the resolution.

Mr. McCUMBER. That is with the understanding, of course, that it shall not displace the present unfinished business. In order that there may be no misunderstanding about the matter, I ask unanimous consent that the unfinished business may be temporarily laid aside.

The VICE PRESIDENT. It will be so ordered, in the absence of objection.

Mr. LODGE. I do not think the consideration and passage of the resolution will take a moment. It simply asks for information as to certain prize-court cases.

The VICE PRESIDENT. The Secretary will read the resolution.

The resolution (S. Res. 438), which was submitted yesterday by Mr. LODGE, was read, as follows:

Resolved, That the President is hereby requested, if not incompatible with the public interest to inform the Senate whether any, and if any, what measures have been taken relating to claims or complaints of citizens of the United States against the British Government growing out of restraints on American commerce and the alleged unlawful seizure and sale of American ships and cargoes by British authorities during the late war, and to communicate to the Senate a copy of any instructions which may have been given by the Executive to the American ambassador at London on the subject on and after October 21, 1915, and also a copy of any correspondence which may have passed between this Government and that of Great Britain in relation to that subject since that time.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

The resolution was considered by unanimous consent and agreed to.

PETITIONS AND MEMORIALS.

Mr. LODGE presented telegrams in the nature of memorials of the George Washington Council, American Association for the Recognition of the Irish Republic, of Roslindale, signed by Patrick P. Kelly, president; Katherine Riordan, vice president; and Thomas M. Devlin, publicity director, and the Monsignor Millerick Council of the American Association for the Recognition of the Irish Republic, of Boston, both of the State of Massachusetts, protesting against deporting the lord mayor of Cork, Ireland, D. J. O'Callaghan, which were referred to the Committee on Foreign Relations.

Mr. TOWNSEND presented a memorial of sundry citizens of Suttons Bay, Mich., remonstrating against present conditions in the occupied zone of the Rhine in respect to the presence and action of French colonial troops, which was referred to the Committee on Foreign Relations.

He also presented a resolution of Lodge No. 322, International Association of Machinists, of Saginaw, Mich., favoring a resumption of trade with Russia and European countries, which was referred to the Committee on Foreign Relations.

He also presented a resolution of Ann Arbor Grange, of Ann Arbor, Mich., favoring a speedy and continual reduction of armaments, which was referred to the Committee on Military Affairs.

He also presented a resolution of the Maintenance of Way Employees and Railway Shop Laborers, of Grand Rapids, Mich., favoring the restriction of immigration, which was referred to the Committee on Immigration.

Mr. ELKINS presented a petition of sundry citizens of Huntington, W. Va., praying for the establishment of a bureau of veteran reestablishment in the Department of the Interior, which was referred to the Committee on Finance.

Mr. CAPPER presented a resolution of the Farmers' Equity Union, adopted at its recent annual convention in St. Louis, Mo., favoring the so-called truth in fabric bill, which was referred to the Committee on Interstate Commerce.

He also presented a petition of the Nekoma Local Wheat Growers' Association of the United States, of La Crosse, Kans., praying for the enactment of legislation to stop speculation in grain products, which was referred to the Committee on Agriculture and Forestry.

He also presented a petition of sundry citizens of Towanda, Kans., praying for the enactment of legislation to strengthen the Federal farm loan act, which was referred to the Committee on Banking and Currency.

THE MERCHANT MARINE.

Mr. RANSDELL. I ask unanimous consent to have referred to the Committee on Commerce and printed in the RECORD resolutions adopted at the annual meeting of the National Merchant Marine Association, held in this city on the 20th and 21st of the present month. They are very brief.

There being no objection, the resolutions were referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

Resolutions adopted at the annual meeting of the National Merchant Marine Association, Washington, D. C., January 20–21, 1921.

Resolved by the National Merchant Marine Association, That in order to establish the full practical value of the measure in the development of the new merchant shipping of the United States we strongly urge the immediate and faithful enforcement of the merchant marine act of 1920.

Resolved, That the personnel of the United States Shipping Board be put upon a basis of permanency, in order that a constructive administrative policy may be carried out in the application of the law.

Resolved, That private American enterprise must be encouraged to engage in shipping through the means of national aid wherever found necessary by the Shipping Board, to the end that American ships under the American flag may operate in competition with foreign ships in the same trades.

Resolved, That in order that the farmers, manufacturers, and other producers of this country shall be enabled to compete successfully in foreign markets, and in order that ultimately our merchant marine shall be privately owned by citizens of all sections, we urge that it should be decided what new mail, passenger, and cargo routes are to be established and operated by the Shipping Board from our various ports, and that arrangements should be made accordingly for their present and future development with a view to the purchase of routes and ships as soon as practicable by companies and individuals selected, wherever possible, from their respective sections or ports.

Resolved, That wherever reasonably adequate services are already being performed by private-owned ships or by Government-owned ships

in the hands of private operators the Shipping Board be urged to cease to allocate further tonnage to these particular routes, so that the concerns already in these trades may have a fair chance of development.

Resolved, That it is evident that the high prices at which Shipping Board vessels have been sold to purchasers are proving an excessive burden on American operating companies in competition with the ships of foreign nations, and that we therefore urge that an equitable plan of relief be devised and applied in these cases by the Shipping Board.

Resolved, That we heartily approve the present policy of enrolling in the Naval Reserve competent American officers and men of the merchant marine, and that we recommend that this policy be broadened and made permanent by the Navy Department and by Congress.

Resolved, That in the interest of the Navy and the merchant marine alike, in which so many young men of the Middle West are serving, we urge that the important naval training station on the Great Lakes be not abandoned by the Government.

Resolved, That we deplore pessimism and destructive criticism, and we respectfully urge upon Congress and upon the people of the United States a spirit of constructive cooperation, a spirit of optimism, and a firm determination to achieve, in spite of all difficulties, our national purpose of developing and maintaining an American merchant marine for the national defense and for the proper growth of our foreign and domestic commerce.

A true copy.

WILLIAM ALLEN, *Secretary*.

AMENDMENT OF INTERSTATE COMMERCE ACT.

Mr. TOWNSEND, from the Committee on Interstate Commerce, to which the subject was referred, reported a bill (S. 4933) to amend the interstate commerce act by adding thereto a new section numbered 20b, and to amend an act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, by adding a new paragraph to section 10 thereof, which was read twice by its title.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. TOWNSEND:

A bill (S. 4934) providing one German cannon or fieldpiece for the city of Albion, Mich.; to the Committee on Military Affairs.

By Mr. KENYON:

A bill (S. 4935) to create rural credit societies, and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. NELSON:

A bill (S. 4936) for the relief of Jacob Ries Bottling Works (Inc.), Shakopee, Minn.; to the Committee on Claims.

By Mr. SMITH of Georgia:

A bill (S. 4937) granting an increase of pension to Elizabeth Colquitt Marshall; to the Committee on Pensions.

By Mr. SHEPPARD:

A bill (S. 4938) creating three grades of warrant officers in the Army, and for other purposes; to the Committee on Military Affairs.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. WARREN submitted an amendment proposing to increase the appropriation for the investigation of the food habits of North American birds and animals, for the extermination of predatory animals, etc., from $452,240 to $600,000, intended to be proposed by him to the Agricultural appropriation bill, which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. HARRIS submitted an amendment providing an appropriation of $5,000 for the erection of a test station in Georgia for the investigation and improvement of tobacco and the methods of tobacco production and handling, intended to be proposed by him to the Agricultural appropriation bill, which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

He also submitted an amendment proposing to appropriate $10,000 for the investigation of insects affecting peaches in Georgia, intended to be proposed by him to the Agricultural appropriation bill, which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. MOSES submitted an amendment proposing to appropriate $9,900 for salaries (one chief indexer, $4,000; one cataloguer, $2,500; one $1,800; and one $1,600) and expenses of preparing the semimonthly and session indexes of the CONGRESSIONAL RECORD, under the direction of the Joint Committee on Printing, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

SPEEDY CONSTRUCTION OF PUBLIC WORKS.

Mr. KENYON submitted the following resolution (S. Res. 439), which was read and ordered to lie over, under the rule:

Whereas a temporary decrease in industrial activity has deprived many persons of employment;

Whereas it is regarded as sound governmental policy to prosecute public works during periods when labor and material are not fully absorbed by private industry and are therefore in plentiful supply;

Whereas Congress has made appropriation now available for the execution of certain public works; and

Whereas the immediate prosecution of such public works will give employment to large numbers of persons now seeking employment, not only directly on the public works but indirectly upon the manufacture of the materials required: Therefore be it

Resolved, That the President of the United States be requested, if not incompatible with the public interests, to take measures that the public works of the United States for which appropriations are now available may be expedited and actively prosecuted during the present period of diminished industrial activity.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the House had passed the bill (H. R. 15812) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1922, in which the concurrence of the Senate was requested.

WOUNDED AND DISABLED SOLDIERS.

Mr. HALE. Mr. President, I present a joint resolution which has been passed by the House of Representatives and Senate of the State of Maine relating to wounded and disabled soldiers. I ask that it may be read and referred to the Committee on Military Affairs.

Mr. PENROSE. Mr. President, I shall not make any objection in this instance, but hereafter I must insist that the unfinished business be proceeded with.

The VICE PRESIDENT. Does the Senator from Maine desire that the joint resolution presented by him shall be read?

Mr. HALE. Yes.

The VICE PRESIDENT. The Secretary will read as requested.

The joint resolution was read and referred to the Committee on Military Affairs, as follows:

STATE OF MAINE, 1921.

Joint resolution by the Senate and House of Representatives of the Eightieth Legislature of the State of Maine for relief of wounded service men.

Whereas there is existing a grave situation of delay and confusion in the matter of remedial relief for wounded service men from the Great War; and

Whereas the American people have provided with generous heart for these valorous men: Be it

Resolved, That the Legislature of the State of Maine does now urge upon Congress the immediate passage of such legislation as will simplify and expedite the procedure whereby wounded and disabled service men may obtain the benefits to which they are entitled, and the secretary of state be instructed to transmit a copy of this resolution to our Representatives in Congress.

In senate chamber January 18, 1921.

Read and adopted in concurrence.

L. ERNEST THORNTON, *Secretary*.

In the house January 13, 1921.

Read and adopted; sent up for concurrence.

CLYDE R. CHAPMAN, *Clerk*.

UNITED STATES OF AMERICA,
STATE OF MAINE,
Office of Secretary of State.

I, Frank W. Ball, secretary of state of the State of Maine and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of joint resolution of the Senate and House of Representatives of the State of Maine in legislature assembled with the original thereof, and that it is a full, true, and complete transcript therefrom and of the whole thereof.

In testimony whereof I have caused the seal of the State to be hereunto affixed. Given under my hand at Augusta, this 21st day of January, in the year of our Lord 1921, and in the one hundred and forty-fifth year of the independence of the United States of America.

[SEAL.] FRANK W. BALL,
Secretary of State.

Mr. HARRISON. I desire to ask the Senator from Maine a question. As I heard the reading of the resolution, it asks that immediate action be taken touching the disabled soldiers and sailors.

Mr. HALE. Yes.

Mr. HARRISON. What legislation has the legislature in mind, may I ask the Senator from Maine?

Mr. HALE. The joint resolution refers to no particular legislation.

Mr. HARRISON. I thought that the legislature had in mind the bill which is known as the France bill, providing hospital facilities to take care of disabled soldiers.

Mr. HALE. I think not. I think the resolution does not refer to any particular legislation, but simply to the general question.

Mr. HARRISON. There is a bill on the calendar which has been reported out of the committee providing hospital facilities to care for disabled soldiers and sailors, I may say to the Senator from Maine.

Mr. HALE. I am aware of that fact.

Mr. HARRISON. The Senator will recall that some days ago the Senator from Maryland [Mr. FRANCE], the author of the bill, who has been very insistent that the proposed legislation be passed immediately, cited to the Senate the fact that the need for it was very urgent. No doubt the resolution presented by the Senator from Maine expresses the sentiment of the legislature of the Senator's State, and that sentiment is shared,

I should say, by the legislatures of all the States. The Senator from Maryland said that he would call up his bill immediately after the passage of the District of Columbia appropriation bill and try to have it made the unfinished business of the Senate in order that it might be passed. I do not know whether similar legislation has passed the other House, but there has been nothing done about the matter in the Senate. I understood the Senator from Utah [Mr. SMOOT] to say a few days ago, when the subject was brought up, that the Appropriations Committee, in the sundry civil bill, I believe, was going to make appropriations covering the situation. I had understood that the consideration of the sundry civil appropriation bill had been concluded by the committee two or three days ago.

Mr. SMOOT. I will say to the Senator from Mississippi——

Mr. HARRISON. One moment and I will yield. I do not know whether the sundry civil bill has been reported to the Senate. I am in hearty sympathy with the sentiment expressed in the resolution presented by the Senator from Maine, and I hope that the Appropriations Committee, which has the matter in charge, will bring in some such provision as the Senator from Utah said would be incorporated in the sundry civil bill to carry out the purposes of the legislation which has been urged by the Senator from Maryland. I trust the Committee on Appropriations will soon report that bill and that it may be considered by the Senate in order that proper care may be taken of the disabled soldiers and sailors in whom the Senator is interested.

Mr. SMOOT. I will say to the Senator from Mississippi that that matter will be provided for in the sundry civil appropriation bill.

Mr. HARRISON. But, it being an urgent matter and the relief being needed immediately, may I ask the Senator from Utah when the sundry civil bill is expected to be reported to the Senate?

Mr. SMOOT. It will be reported to the Senate within the next two or three days.

Mr. HARRISON. Has the Committee on Appropriations finished the consideration of the bill, may I ask the Senator from Utah?

Mr. SMOOT. The committee has finished the consideration of the bill.

Mr. HARRISON. May I ask when the consideration of the bill was concluded?

Mr. SMOOT. It was concluded on the day before yesterday.

Mr. HARRISON. But the bill has not yet been reported to the Senate, I understand?

Mr. SMITH of Georgia. Will the Senator from Mississippi yield to me, Mr. President?

Mr. HARRISON. Yes.

Mr. SMITH of Georgia. I think the Senator from Mississippi will find that Senate bill 4643, being Order of Business 632, which was introduced and has been reported by the Senator from Iowa [Mr. KENYON], is a bill which will greatly improve the condition of the wounded soldiers, and we have just about reached it on the calendar. I know the Senator from Iowa is deeply interested in the bill and is waiting the opportunity to press its passage on another call of the calendar.

Mr. HARRISON. If I may ask the Senator from Utah a question, would he object to unanimous consent temporarily to lay aside the unfinished business in order that we might consider and pass measures intended to aid the disabled soldiers and sailors, there being several such bills now on the calendar which have been pressed for consideration?

Mr. SMOOT. Mr. President, everybody recognizes what that question is asked for.

Mr. HARRISON. That does not answer my question.

Mr. SMOOT. I will answer it; and therefore I will say that I object for the day.

Mr. HARRISON. For to-day!

Mr. ROBINSON. Mr. President, I suggest to the Senator from Mississippi that the answer of the Senator from Utah implies that he would not object to entering into a unanimous-consent agreement to consider and dispose of the bill which the Senator from Mississippi had in mind on some other day than to-day; and I suggest to him that he repeat his request to-morrow.

Mr. HARRISON. Yes; I understood that the Senator had only applied his objection to to-day, so that to-morrow, if I can cooperate with the Senator from Iowa [Mr. KENYON] and the Senator from Maine [Mr. HALE], I shall repeat the request.

Mr. ROBINSON. The Senator might also include the Senator from North Dakota [Mr. MCCUMBER].

Mr. HARRISON. Yes.

Mr. SMOOT. I ask for the regular order.

HOUSE BILL REFERRED.

The bill (H. R. 15812) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1922, was read twice by its title and referred to the Committee on Agriculture and Forestry.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. Sharkey, one of his secretaries, announced that the President had, on the 26th instant, approved and signed bills of the following titles:

S. 2379. An act to provide for the disposition of certain public lands withdrawn and improved under the provisions of the act of Congress approved June 25, 1910 (36 Stat. L., p. 847), as amended by the act of August 24, 1912 (37 Stat. L., p. 497), and which are no longer needed; and

S. 4519. An act to authorize the Louisville & Nashville Railroad, its successors and assigns, to construct and maintain a bridge across the Alabama River at or near a point approximately 4 miles from the city of Montgomery, Ala.

AMENDMENT OF ALIEN PROPERTY CUSTODIAN ACT.

Mr. KNOX. I ask unanimous consent for the present consideration of a measure which will not, I think, provoke debate. If it shall, I will withdraw my request. The bill is merely designed to correct a mistake in the Alien Property Custodian act. It is Calendar No. 669, Senate bill 4897. I call the attention of the Senator from Minnesota [Mr. NELSON] to the bill, as he reported it.

Mr. MCCUMBER. Mr. President, we have convened following a recess, so that there is no morning hour and no opportunity for morning business.

Mr. KNOX. I have observed a considerable amount of morning business.

Mr. MCCUMBER. I know; but the Senator has observed nothing except the introduction of bills and the presentation of petitions.

Mr. KNOX. If there is objection, I will withdraw the request.

Mr. MCCUMBER. I shall certainly have to object, Mr. President.

The VICE PRESIDENT. Objection is made.

EMERGENCY TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 15275) imposing temporary duties upon certain agricultural products to meet present emergencies, to provide revenue, and for other purposes.

Mr. THOMAS. Mr. President, it is not my purpose this morning to discuss the pending bill. If I am physically able to do so, I shall essay that task to-morrow. I ask the indulgence of the Senate, however, for a brief moment regarding the statement which was made during the period of the introduction by the Senator from Pennsylvania [Mr. PENROSE] of a proposed unanimous-consent agreement. The charge was then made with some directness—at least, it was very clearly insinuated—that some Members of the Senate on this side doubtless intended to filibuster the bill to death.

Mr. PENROSE. Mr. President, will the Senator permit an interruption on that point before he goes any further?

Mr. THOMAS. Certainly.

Mr. PENROSE. I certainly did not, Mr. President; and I am not informed and do not recall that any Member on this or on the other side of the Chamber made any insinuation whatever regarding any purpose to filibuster. A guilty conscience, Mr. President, caused loud protests from several Senators who doubtless had such a purpose in their breasts.

Mr. THOMAS. Mr. President, it is, of course, very easy to insinuate the existence of a guilty conscience, especially by a man who sometimes is accused of having no conscience whatever. I do not purpose making on record any protest, nor shall I resort to any such tactics to defeat this bill, much as it deserves defeat. I do recall, however, when something was said about a filibuster, whereupon the Senator from Pennsylvania at once rose and announced in substance that he would test that proposition by the introduction of a unanimous-consent agreement.

Mr. President, since I have been a Member of this body I have been a consistent advocate of cloture. I have never allowed an opportunity to present itself without committing myself upon the proposition. As late as the 19th of May, 1919, in submitting some observations to the Senate, I expressed the hope, although it was without any foundation, that some such feature would be added to the rules of the Senate before my term of service expired. Not being in favor, therefore, of un-

limited debate, I am not in favor of filibustering, and never resorted to it, so far as I can recall, except in one instance, and at that time I made no concealment of my purpose. I have known filibusters to be carried on day after day in this body, notwithstanding protestations that the procedure was nothing of the sort.

I have been a Member of three Congresses. With every one of them the Senate adjourned with a filibuster on. In 1915 there was a Republican filibuster over the shipping bill of that session, participated in, or at least sympathized with, by some Members on this side of the Chamber. In 1917 a filibuster participated in by Democrats as well as Republicans against the armed ship defense bill defeated that measure, and public sentiment was so aroused over it that the modified cloture rule of the Senate was adopted with practical unanimity. In 1919 a filibuster participated in exclusively by Republican Members of this body resulted in the defeat of certain appropriation bills. It has been pretended since then—and it is nothing but a pretense—that that filibuster saved large sums of money to the people of the United States.

Mr. President, some Senators who are very much interested in the enactment of this bill participated in one or more of the filibusters to which I have referred; and a number of Senators who are very anxious that this bill shall become a law have been consistent and constant opponents, and others have been intermitting opponents, of every proposition to place a limitation upon debate in the Senate. The Senator from Massachusetts [Mr. LODGE], the distinguished leader of the majority, occupies a dual position upon the subject, he having been for a number of years an advocate of cloture, since which he has been one of the most ardent defenders of unlimited debate. Now, if it be true that consistency is a jewel, I can claim the record as between myself and the Senator from Massachusetts. If, on the other hand, it be true that consistency is an infirmity of little minds, then of course the advantage is all with him.

I think this bill is a vastly important one. Perhaps I magnify its importance, but it is sufficiently so to my mind not only to justify but to require its somewhat extended consideration; and that I propose to give it to-morrow. When I shall have finished I shall be ready for a vote, so far as I am concerned. The majority is responsible for our legislation. It should therefore be permitted to act as it determines, and the people must pass judgment upon the wisdom or expediency of its legislation.

Mr. KING. Mr. President, I inquire of the junior Senator from Iowa [Mr. KENYON] whether he desires to have the floor for a few moments this morning?

Mr. KENYON. Mr. President, I have some legal authorities collated for use on the packer bill; and having spent considerable time in collating them, I thought it might be helpful to put them in the RECORD. I could not do it, of course, under the five-minute rule.

Mr. KING. I am sure those authorities will be very instructive, and I yield to the Senator for that purpose.

Mr. KENYON. I know the Senator is very anxious to hear from me on that point——

Mr. KING. I am.

Mr. KENYON. Especially to-day; but I will say to the Senator that I am not ready to present these authorities just now. I will do so later in the afternoon, however. I do not want to retard this effort to expedite the pending legislation.

Mr. KING. Mr. President, I am sure that the Senate would welcome the authorities which the Senator from Iowa has collated upon a very important subject which occupied the attention of the Senate for a very considerable time. There were some important legal propositions involved in the packer bill, and it has been affirmed by some that it is a radical departure from the accepted economic policies of the Government and that the constitutionality of some phases of the bill may justly be challenged. As to that I express no opinion, but await with interest the views of the distinguished Senator from Iowa, because I am sure he can furnish us information in support of his position that the packer bill, with all of its unique and extraordinary features, squares with the Constitution of the United States.

Mr. KING addressed the Senate upon the bill. After having spoken, with interruptions, for four hours and a quarter he said:

May I ask the Senator from North Dakota [Mr. MCCUMBER] at what time he desires to have the Senate adjourn or take a recess?

Mr. MCCUMBER. That is a question to be directed to the Senator from Pennsylvania [Mr. PENROSE], but I suppose we shall take a recess very soon.

Mr. PENROSE. I was about to make a motion for a recess, if the Senator from Utah will permit me.

Mr. KING. May I say to the Senator that I would have concluded my remarks except for interruptions. I was very anxious to conclude to-day. I shall, if the Senator desires, pretermit the rest of my remarks until a later day, or I shall resume them in the morning, suiting the pleasure of my distinguished friend from Pennsylvania.

Mr. PENROSE. I am sure the Senate will be glad to hear the remainder of the Senator's remarks in the morning.

Mr. OWEN. Mr. President, I should like to ask the Senate to dispose this evening of Senate bill 4879, with regard to some incompetent Quapaw Indians. It is important that the bill shall pass, because their right to alienate their land will accrue between now and next winter and the Government is desirous of protecting those people. It will take only a few moments to dispose of the bill.

Mr. PENROSE. Let the bill be read, Mr. President.

The PRESIDING OFFICER (Mr. HEFLIN in the chair). The Secretary will read the bill.

The reading clerk read the bill (S. 4879) to amend section 1 of the act of Congress approved March 2, 1895 (28 Stat. L., 907), and to extend restrictions against alienation of lands allotted to and inherited by certain Quapaw Indians, and for other purposes.

Mr. OWEN. I desire in considering the bill that the pending measure be temporarily laid aside, so as not to lose its place.

The PRESIDING OFFICER. Without objection, it is so ordered. Is there objection to the present consideration of the bill?

Mr. PENROSE. Mr. President, I seriously doubt the propriety of my yielding for the passage of bills. I would like to oblige Senators, but probably every Senator has some bill on the calendar that he would like to have passed in this way. Therefore I feel that I owe it to the Senate to renew the motion that the Senate take a recess until 12 o'clock to-morrow. If during the day to-morrow there are Senators who have bills they want passed immediately, I shall not object; but to-day, it seems to me, I have no authority to do anything but move to take a recess.

The PRESIDING OFFICER. Objection is made to the consideration of the bill at this time.

RECESS.

Mr. PENROSE. I move that the Senate take a recess until to-morrow at 12 o'clock.

The motion was agreed to; and (at 5 o'clock p. m.) the Senate took a recess until to-morrow, Saturday, January 29, 1921, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

FRIDAY, *January 28, 1921.*

The House met at 12 o'clock noon.

Rev. James Shera Montgomery, D. D., pastor of Calvary Methodist Church, Washington, D. C., offered the following prayer:

Almighty God, our Heavenly Father, we come unto Thee with no complaints. Thou hast been our fullest security. Therefore may there be the sweet note of a psalm of gratitude in all our hearts.

May Thy guidance and direction this day be for all that is the wisest and the tenderest, and at its close may it bear witness to our fidelity to our country, to our best selves, and, above all, to Thee. Through Jesus Christ, our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

RIVER AND HARBOR APPROPRIATIONS.

Mr. DEMPSEY, from the Committee on Appropriations, reported the bill (H. R. 15935) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, which was read a first and second time, referred to the Committee of the Whole House on the state of the Union, and, with the accompanying report, ordered to be printed.

Mr. BYRNS of Tennessee. Mr. Speaker, I reserve all points of order on the bill.

The SPEAKER. The gentleman from Tennessee reserves all points of order on the bill.

Mr. MCCLINTIC. Mr. Speaker, I suggest the absence of a quorum.

The SPEAKER. The gentleman from Oklahoma makes the point of order there is no quorum present. It is clear that no quorum is present.

Mr. ROGERS. I move a call of the House.

A call of the House was ordered.

The SPEAKER. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll.

The Clerk called the roll, when the following Members failed to answer to their names:

Babka	Gallivan	Linthicum	Robinson, N. C.
Baer	Gandy	Little	Romjue
Begg	Godwin, N. C.	Lonergan	Rowan
Bell	Goldfogle	McCulloch	Rucker
Blackmon	Goodwin, Ark.	McGlennon	Sabath
Bland, Mo.	Gould	McKinley	Sanders, Ind.
Bowers	Graham, Pa.	McLane	Sanders, N. Y.
Britten	Griest	McLaughlin, Mich.	Sanford
Brooks, Pa.	Hamill	McLeod	Scully
Brumbaugh	Hardy, Colo.	Maher	Siegel
Butler	Harreld	Major	Smith, Mich.
Byrnes, S. C.	Harrison	Mann, S. C.	Smith, N. Y.
Caldwell	Hill	Mead	Snell
Carew	Holland	Milligan	Steele
Cleary	Hulings	Moon	Steenerson
Copley	Hull, Iowa	Mooney	Stiness
Costello	James, Mich.	Morin	Swope
Crowther	James, Va.	Mott	Tague
Cullen	Jefferis	Mudd	Timberlake
Currie, Mich.	Johnson, Ky.	Neely	Tinkham
Davey	Johnson, S. Dak.	Nelson, Wis.	Upshaw
Denison	Johnston, N. Y.	Nicholls	Vaile
Dewalt	Kahn	Nolan	Vare
Donovan	Kelley, Mich.	O'Connell	Ward
Dooling	Kennedy, Iowa	Olney	Watkins
Drewry	Kennedy, R. I.	Padgett	Wilson, Ill.
Dupré	Kettner	Perlman	Winslow
Eagle	Kiess	Rainey, Ala.	Wise
Emerson	Kincheloe	Rainey, Henry T.	Wood, Ind.
Ferris	Kitchin	Reed, W. Va.	
Fish	Kreider	Riddick	
Gallagher	Langley	Riordan	

The SPEAKER. On this call 285 Members have answered to their names. A quorum is present.

Mr. ROGERS. I move to dispense with further proceedings under the call.

The motion was agreed to.

The SPEAKER. The Doorkeeper will open the doors.

GERMAN AEROPLANES PURCHASED BY THE WAR DEPARTMENT.

Mr. KAHN. Mr. Speaker, I ask unanimous consent to insert in the RECORD a letter from the Secretary of War showing how many German aeroplanes the War Department purchased.

The SPEAKER. The gentleman from California asks unanimous consent to print in the RECORD the response of the Secretary of War to the resolution adopted yesterday. Is there objection?

Mr. BLANTON. Reserving the right to object, I want to ask the distinguished gentleman from California what has become of the privileged resolution reported by the Committee on Rules last June making in order as special business of this House his resolution No. 574, to investigate the escape of Grover Cleveland Bergdoll, a millionaire slacker? That resolution has been in the pigeonhole for six months.

Mr. KAHN. Mr. Speaker, on the last day of the last session the gentleman from California tried to call up that resolution and the gentleman from Texas [Mr. BLANTON] objected. [Applause.]

Mr. BLANTON. That was because of the politics in it. I objected to the politics in it.

Mr. KAHN. There was no politics in it.

Mr. BLANTON. But the gentleman has had all this session to call it up.

Mr. KAHN. I decline to yield, Mr. Speaker.

Mr. BLANTON. I am reserving the right to object.

Mr. KAHN. I decline to yield.

Mr. BLANTON. The gentleman has no time to yield.

The SPEAKER. The gentleman from Texas is out of order.

Mr. McCLINTIC. I hope the gentleman from California will ask unanimous consent for time in which to read the letter, because I will have to object to his request to print it in the RECORD.

Mr. KAHN. It is a short letter. It will take up less than one-third of a column.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. McCLINTIC. Unless the gentleman withdraws that request I shall have to object to it.

The SPEAKER. The gentleman from Oklahoma objects.

ORDER OF BUSINESS ON MONDAY NEXT.

Mr. MONDELL. I ask unanimous consent to address the House for two minutes.

The SPEAKER. The gentleman from Wyoming asks unanimous consent to address the House for two minutes. Is there objection?

There was no objection.

Mr. MONDELL. Mr. Speaker, I desire to make a brief explanation and to prefer a request for unanimous consent. I have been laboring under the impression that next Monday was unanimous-consent and suspension of the rules Monday. I apologize to the House for my error. I should have known better if I had consulted the calendar. I have recently been reminded that Monday is a maverick, a fifth Monday in the month. In the meantime I have said to a number of gentlemen on both sides who are anxious to have matters on the Unanimous Consent Calendar taken up that I wished they would defer their request until Monday, because on Monday those matters could be reached in regular order.

I am a good deal embarrassed by some of the suggestions I have made along that line. My request is that on Monday next the business that would be in order on the following Monday, business on the Unanimous Consent Calendar and suspension of the rules, shall be in order; that is, that that business shall be in order on Monday, the 31st, in lieu of the following Monday.

The SPEAKER. The gentleman from Wyoming asks unanimous consent that business in order a week from Monday may be in order next Monday. Is there objection?

Mr. GARD. Reserving the right to object, what is the program for the succeeding Monday?

Mr. MONDELL. If my request is granted, the following Monday would be occupied with whatever business might be before the House at that time.

Mr. GARD. Would we have two unanimous-consent days, next Monday and the following Monday?

Mr. MONDELL. No; my request is that next Monday be substituted for the following Monday.

Mr. BLANTON. Mr. Speaker, reserving the right to object, the gentleman from Wyoming knows that we have seven supply measures yet to pass, to get to the Senate in time for the Senate to pass them before the 4th of March. He knows that his request applies to over fifty-odd measures, many being little private bills of insignificant importance as compared with the big supply measures that must be passed before March 4, and I object.

Mr. MONDELL. The gentleman's statement is not entirely accurate. Will he withhold his objection?

Mr. BLANTON. I will. And if the gentleman has not a calendar I will send him one.

Mr. MONDELL. The gentleman from Wyoming has apologized to the House for his error as to the calendar, and the apology was sufficient to everyone except the gentleman from Texas. [Applause.]

Mr. BLANTON. The gentleman being the majority leader gets the applause.

Mr. MONDELL. There is no one Member of the House more anxious to get the supply bills through than the gentleman from Wyoming. We are making very good progress with them and we will dispose of them in good time. If we have as good luck with the bills as I hope we will, I believe we can dispose of practically all of them, with the possible exception of the fortification bill, next week, even though we use Monday as unanimous-consent day.

Now, Mr. Speaker, matters on the Unanimous Consent Calendar are by no means all small, insignificant matters. It is true that they are not matters of great national importance. I have nothing on that calendar that I am interested in, but a great many Members have, and if we are to consider those matters and dispose of them, the sooner we do it and get them out of the way the better it will be.

Mr. BLANTON. Will the gentleman yield? The gentleman knows that in the close of the Sixty-fifth Congress the Senate left unpassed most of the supply measures. Every day now means much in getting these bills over to the Senate in order that they may have a chance of being passed, and I object.

Mr. CLARK of Florida. Will the gentleman withhold his objection?

Mr. BLANTON. I will.

Mr. GREENE of Vermont. I ask for the regular order.

The SPEAKER. The regular order is demanded.

Mr. CLARK of Florida. Mr. Speaker, I ask unanimous consent to proceed for one minute.

The SPEAKER. The gentleman from Florida asks unanimous consent to proceed for one minute. Is there objection?

There was no objection.

Mr. CLARK of Florida. Mr. Speaker, I want to say that if the gentleman from Texas knew the real object of the gentleman from Wyoming he would not object. My understanding is that

the real object of the gentleman from Wyoming is to get up for consideration and pass the bill providing for hospital accommodations for soldiers. I hope the gentleman from Texas will not insist on his objection.

Mr. BLANTON. Oh, we are going to get that hospital bill up as in the program; it will come up under special rule.

Mr. MONDELL. That is one of the bills that we hope to bring up on Monday.

Mr. MOORE of Virginia. May I have one minute?

The SPEAKER. The gentleman from Virginia asks to speak for one minute. Is there objection?

There was no objection.

Mr. MOORE of Virginia. I want to ask the gentleman from Wyoming a question along that line. Is it not possible, if the request of the gentleman from Wyoming should be adopted, that next Monday we might reach for consideration the highways bill?

Mr. MONDELL. I think that is one of the measures under consideration. In regard to the hospital bill, I hope it will come up. I am not in a position to say in regard to the highways bill.

The SPEAKER. Is there objection to the request of the gentleman from Wyoming?

Mr. BLANTON. I object.

PENSIONS.

Mr. FULLER. Mr. Speaker, I ask unanimous consent that private pension bills reported to-day may be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Illinois asks unanimous consent that private pension bills in order to-day may be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

Mr. FULLER. Mr. Speaker, I call up the bill (H. R. 15661) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

The Clerk proceeded to read the bill, and read as follows:

The name of Sallie A. Stauter, widow of Franklin Stauter, late of Company A, Seventy-ninth Regiment Pennsylvania Volunteer Infantry, and pay her a pension at the rate of $50 per month in lieu of that she is now receiving: *Provided*, That in the event of the death of Olga Stauter, helpless and dependent daughter of said Sallie A. and Franklin Stauter, the additional pension herein granted shall cease and determine: *Provided further*, That in the event of the death of Sallie A. Stauter, the name of said Olga Stauter shall be placed on the pension roll, subject to the provisions and limitations of the pension laws, at the rate of $20 per month from and after the date of death of said Sallie A. Stauter.

Mr. WALSH. Mr. Speaker, I move to strike out the last word. I notice that bills reported by the committee presided over by the distinguished gentleman from Illinois gives the names of a great many widows of Civil War veterans. My recollection is that we passed a general statute in the last Congress extending the date to 1905, which permitted the widows to receive a pension under the general law. What necessity is there for so many private pension bills in this measure for these various widows?

Mr. FULLER. Under the act of September 8, 1916, the time was extended to June 27, 1905. That has been the date fixed by law until now. The general bill passed by the House last session proposed to extend the date to June 27, 1915. The Senate struck out that amendment and left the date as it was, June 27, 1905. It will be remembered that when the bill was finally passed it was thought best not to risk going to conference, but it was understood between the House committee and the Senate committee that in meritorious cases of women who were old and dependent special bills would be recommended to take care of those cases. It was not the desire of the Senate to extend the date beyond the time then fixed by law, but it was recognized that there were many special cases of old women who had married soldiers after June 27, 1905, and in those cases, where they were considered meritorious, where the woman was over 60 years of age and dependent, the Committee on Invalid Pensions has favorably reported such bills.

Mr. WALSH. Are there any widows whose marriage date is subsequent to 1915 in the pending bill?

Mr. FULLER. No; there are none subsequent to that date, and I think not a half dozen beyond 1910. Most of them provided for in this bill were married not later than June 27, 1907.

Mr. WALSH. Are there any of these widows who are under 60 years of age?

Mr. FULLER. There may possibly be one or two, but I think not more than that.

Mr. WALSH. Mr. Speaker, I withdraw the pro forma amendment.

Mr. GREEN of Iowa. Mr. Speaker, will the gentleman from Illinois yield?

Mr. FULLER. Yes; if I have the floor.

Mr. GREEN of Iowa. Many of those carried in the bill have been married to soldiers for 20 or 30 years.

Mr. FULLER. Many of them have been married all the way along from 1905, which would be 15 or 16 years.

Mr. HASTINGS. Mr. Speaker, will the gentleman yield?

Mr. FULLER. Yes.

Mr. HASTINGS. Have all those provided for in this bill married since 1905, or have some of them married prior to that date?

Mr. FULLER. Yes. Some of them may have been married before that time; and their cases are recommended for the reason, for instance, that they could not prove divorce or death of a former wife, perhaps, 40 or 50 years ago.

Mr. HASTINGS. Are all of the cases in this bill for widows?

Mr. FULLER. No; there are a number of cases for helpless and dependent children.

Mr. HASTINGS. What is the rule of the committee with reference to dependent children?

Mr. FULLER. Where they are shown to be helpless and dependent, or very nearly so, from before the age of 16 years, the committee has generally reported the bills.

Mr. HASTINGS. These are soldiers and sailors of the Civil War?

Mr. FULLER. Only.

Mr. HASTINGS. And of no other war.

Mr. FULLER. No other war. The committee on Invalid Pensions has jurisdiction only of Civil War cases.

Mr. HASTINGS. How many cases are carried in this bill?

Mr. FULLER. About 100.

Mr. HASTINGS. How many cases have been reported in bills by the committee during this session?

Mr. FULLER. About 350.

Mr. HASTINGS. Are these cases all examined upon ex parte affidavits that have been sent to the committee?

Mr. FULLER. No; in every case the files are drawn from the Pension Bureau and the whole history of the case is gone into, and in most cases also, or in very many cases, the military record is obtained from the War Department, so that the entire history of the case is before the committee.

Mr. HASTINGS. Is any independent investigation made by the bureau or any of its officers in the field to verify the statements made in the affidavits?

Mr. FULLER. They make no examinations for the committee. We have the examinations made while the matter was pending in the Pension Bureau. We have all of those files before us.

Mr. HASTINGS. What is the highest amount allowed in this bill?

Mr. FULLER. The highest amount allowed to a widow is $35.

The Clerk read as follows:

The name of Sarah A. Thornburg, widow of William Thornburg, late of Company B, Nineteenth Regiment Indiana Volunteer Infantry, and pay her a pension at the rate of $30 per month.

Mr. McCLINTIC. Mr. Speaker, I move to strike out the last word. Yesterday the membership on the Democratic side of the House was called upon to hear the remarks of a Member who had been criticized for supporting an emergency tariff bill, and he endeavored to put himself right in order that the Members on the Democratic side of the House might feel warranted in following him from this time on. On the 21st day of December last the Democratic Members of the House of Representatives were called upon to witness one of the strangest proceedings that has ever happened in the history of Democratic politics——

Mr. BLANTON. Mr. Speaker, I regret to do it, but I make the point of order that the distinguished gentleman from Oklahoma is out of order. He is not speaking to his amendment.

Mr. McCLINTIC. Mr. Speaker, when the unanimous-consent request was made for the consideration of this bill in the House as in Committee of the Whole, was it not a part of the request that the remarks made thereon should be confined to the subject matter of the bill?

The SPEAKER. If anyone makes the point of order, the rules require that the remarks shall be confined to the subject.

Mr. McCLINTIC. I regret very much that the gentleman sees fit to make the point of order. If he thinks he can make any more than I can, then let him fire away.

The SPEAKER. The Chair will have to sustain the point of order.

The Clerk read as follows:

The name of Amelia Hoelscher, widow of George Henry Hoelscher, late of Company B, One hundred and sixth Regiment Ohio Volunteer Infantry, and pay her a pension at the rate of $30 per month.

Mr. McCLINTIC. Mr. Speaker, I move to strike out the last word. Repeating what I started out to say on the 21st day of December last, the Democratic Members of the House were called upon to witness one of the strangest proceedings that has ever happened in the history of Democratic politics. Under the guise of an emergency certain Republican members of the Ways and Means Committee, aided by certain Democrats, brought into this House an emergency tariff bill as a panacea for all of the evils connected with the low prices which were being paid the producers throughout the country.

At that time our great President was incapacitated to a certain extent from performing many of his duties. It was practically impossible for anyone to have a conference with him, and while he did not make any positive statement relative to this legislation, it must have been known by all of the Democrats who have followed his recommendations in the past that he would never favor a bill which would raise duties to a price unheard of in the history of this Nation.

The ranking minority member of the Ways and Means Committee was likewise physically incapacitated to a certain extent from performing certain duties in connection with the committee. His record in the past had always been consistent on tariff matters, and every Democrat who is a member of this committee knows that had he been physically able to stand on this floor and combat that measure it would have been done with every ounce of energy in his body.

The Democratic floor leader, a grand old man, recently defeated for reelection, did what he could to steer the Democrats away from the pitfalls and snares that had been carefully prepared by those who wished to legislate this iniquitous measure into a law.

The next ranking member of the Ways and Means Committee, reelected to serve in the next Congress, a Member from Texas, Mr. GARNER, took the floor, and in a speech called upon the Democrats of the House to forsake the policies which had made the Democratic Party sponsors of the poor and to join the Republicans in passing that act——

Mr. BLANTON. Mr. Speaker, I make the point of order that the distinguished gentleman from Oklahoma is not speaking in order. He is not speaking to his amendment.

The SPEAKER. The point of order is sustained.

Mr. McCLINTIC. If I can not speak, then I yield the floor.

The Clerk read as follows:

The name of Sarah A. Warren, widow of Horatio N. Warren, late of Company C, Sixty-third Regiment Ohio Volunteer Infantry, and pay her a pension at the rate of $30 per month.

Mr. McCLINTIC. Mr. Speaker, I suggest the absence of a quorum. I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Oklahoma makes the point of order that there is no quorum present. It is clear that there is no quorum present.

Mr. ROGERS. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The SPEAKER. The Doorkeeper will close the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Anderson	Doremus	Kennedy, Iowa	Nelson, Wis.
Babka	Drewry	Kennedy, R. I.	Newton, Mo.
Bacharach	Dupré	Kettner	Nicholls
Baer	Eagle	Kiess	Nolan
Begg	Emerson	Kincheloe	O'Connell
Bell	Ferris	Kitchin	Olney
Blackmon	Gallagher	Kleczka	Overstreet
Bland, Mo.	Gallivan	Kreider	Perlman
Bowers	Gandy	Langley	Rainey, Ala.
Britten	Goldfogle	Lankford	Rainey, Henry T.
Brooks, Pa.	Good	Little	Ransley
Brumbaugh	Goodwin, Ark.	Lonergan	Rayburn
Butler	Gould	Luhring	Reber
Byrnes, S. C.	Graham, Pa.	McAndrews	Reed, W. Va.
Caldwell	Green, Iowa	McCulloch	Riddick
Carew	Hamill	McGlennon	Riordan
Clark, Fla.	Hardy, Tex.	McKinley	Robinson, N. C.
Cleary	Harreld	McLane	Robsion, Ky.
Copley	Harrison	MacGregor	Rodenberg
Costello	Hawley	Maher	Romjue
Crowther	Hill	Major	Rowan
Cullen	Holland	Mann, S. C.	Rucker
Currie, Mich.	Hulings	Mead	Sabath
Davis, Minn.	Hull, Iowa	Milligan	Sanders, Ind.
Dempsey	James, Mich.	Moon	Sanders, La.
Denison	James, Va.	Mooney	Sanford
Dent	Johnson, Ky.	Morin	Scully
Dewalt	Johnson, S. Dak.	Mudd	Shreve
Donovan	Johnston, N. Y.	Murphy	Siegel
Dooling	Kelley, Mich.	Neely	Small
Smith, Mich.	Sullivan	Tinkham	Whaley
Smith, N. Y.	Swope	Upshaw	Wise
Snell	Tague	Vare	Wood, Ind.
Steele	Taylor, Colo.	Voigt	Yates
Stephens, Miss.	Tillman	Volk	Young, Tex.
Stiness	Timberlake	Watkins	

The SPEAKER. Two hundred and seventy-seven Members have answered to their names. A quorum is present.

Mr. FULLER. Mr. Speaker, I move that further proceedings under the call be dispensed with.

The motion was agreed to.

The SPEAKER. The Doorkeeper will open the doors and the Clerk will read.

The Clerk read as follows:

The name of Cora A. Trueblood, widow of Freeland Trueblood, late of Company C, One hundred and thirty-seventh Regiment Indiana Volunteer Infantry, and pay her a pension at the rate of $30 per month.

Mr. FULLER. Mr. Speaker, I move to amend page 17 by striking out lines 10, 11, 12, and 13.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. FULLER: Page 17, strike out lines 10, 11, 12, and 13.

The question was taken, and the amendment was agreed to.

The Clerk resumed and concluded the reading of the bill.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. FULLER, a motion to reconsider the vote by which the bill was passed was laid on the table.

This bill is a substitute for the following House bills referred to the Committee on Invalid Pensions:

H. R. 1290. Sarah Johnson.
H. R. 3517. Mary Fisk.
H. R. 6600. Frances Tucker Hartley.
H. R. 7216. Margaret Stewart.
H. R. 7505. Mary A. Parker.
H. R. 10858. Catharine T. Cuff.
H. R. 10870. Daniel W. Orr.
H. R. 13619. Minnie Chapman
H. R. 13818. Annie S. Miller.
H. R. 14096. Mary J. Finney.
H. R. 14281. Sallie A. Stauter.
H. R. 14341. Mervin A. Coshun.
H. R. 14406. Elizabeth Borden.
H. R. 14434. Fred Nilan.
H. R. 14515. Mary Nease.
H. R. 14516. Walter Scott Ingalls.
H. R. 14522. Margaret McNulty.
H. R. 14526. Sarah A. Thornburg.
H. R. 14527. Catharine Kinder.
H. R. 14531. Mary M. Tullock.
H. R. 14538. Adeline F. Terry.
H. R. 14539. Prudence Francisco.
H. R. 14562. Eunice R. Tripp.
H. R. 14565. Rebecca Zellers.
H. R. 14572. Elenore Adams.
H. R. 14581. John E. Austin.
H. R. 14592. Rebecca Backman.
H. R. 14594. Susan A. McBride.
H. R. 14595. Mary Hurley.
H. R. 14600. Sallie A. Moore.
H. R. 14606. Louisa Bailey.
H. R. 14622. Alice F. Parrigin.
H. R. 14638. Parthena S. Tennant.
H. R. 14649. Hosea G. Messersmith.
H. R. 14685. Maria M. Reed.
H. R. 14689. Mary M. Rutherford.
H. R. 14697. Sarah A. Blatchley.
H. R. 14699. Mary A. Spatch.
H. R. 14701. Hattie Miller.
H. R. 14704. Amelia Hoelscher.
H. R. 14721. Ottello Lendeborn.
H. R. 14723. Sarah E. Holmes.
H. R. 14725. Jennie M. Pitman.
H. R. 14727. Leando M. Muck.
H. R. 14728. Ursula Bayard.
H. R. 14731. Sarah A. Vale.
H. R. 14735. Gilly Leming.
H. R. 14766. Sarah A. Fringer.
H. R. 14785. Carlton DeWitt.
H. R. 14790. William M. Nourse.
H. R. 14792. Lizzie J. Currier.
H. R. 14793. Elroy L. Kemp.
H. R. 14804. Millie A. McKeown.
H. R. 14821. Florence Ada Stoddard.
H. R. 14824. Clara Elliott.
H. R. 14832. Nellie M. Reilly.
H. R. 14834. Carrie B. McCrady.
H. R. 14836. Margaret J. Calhoun.
H. R. 14840. Bertha J. Bitler.
H. R. 14845. Ira S. Merrill.
H. R. 14872. Esther L. Carl.
H. R. 14921. Minnie M. Raysor.
H. R. 14934. Angeline Coolman.
H. R. 14935. Amanda L. Townsend.
H. R. 14952. Ida L. Baker.
H. R. 14992. Phebe J. Clements.
H. R. 14993. Sarah A. Rhoads.
H. R. 14994. Mahala Printis.
H. R. 15027. Emma M. Chandler.
H. R. 15034. Martha J. Jenkins.
H. R. 15035. Jennie Turner.
H. R. 15043. Julia Horton.
H. R. 15049. Eliza Ann Henry.
H. R. 15067. George Bellamy
H. R. 15075. Pauline G. Fritz.
H. R. 15092. Frances T. Gaddis.
H. R. 15094. Julia Kiess.
H. R. 15095. Jacob J. Spencer.
H. R. 15096. William A. Fox.
H. R. 15146. Emma Durocher.
H. R. 15147. Sarah A. Warren.
H. R. 15148. Elizabeth M. A. Bumgarner.
H. R. 15165. Leah A. Brubaker.
H. R. 15205. Cora A. Trueblood.
H. R. 15207. Louise H. Thornton.
H. R. 15209. Mary F. McGill.
H. R. 15212. Pauline McEuen.
H. R. 15214. Hallie Turner.
H. R. 15239. Louisa Helton.
H. R. 15242. Mary R. Butler.
H. R. 15247. Emma C. Rogers.
H. R. 15282. Katherine Wood.
H. R. 15283. Josephine Carey.
H. R. 15285. Georgie A. Ettinger.
H. R. 15307. Malissa Leonard.
H. R. 15311. Theresa B. Streibig.
H. R. 15312. Rebecca E. Boblett.
H. R. 15319. Mary M. Taylor.
H. R. 15339. Emily Swank.
H. R. 15365. Emily T. Minkler.
H. R. 15473. Daniel Michael.
H. R. 15486. Margaret Flory.
H. R. 15500. Mary Florence Pugh.
H. R. 15506. Ruth B. Adamson.
H. R. 15585. Louise P. May.

Mr. FULLER. Mr. Speaker, I call up the bill H. R. 15901.

The SPEAKER. The gentleman from Illinois calls up the bill which the Clerk will report.

The Clerk read the title of the bill, as follows:

A bill (H. R. 15901) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

The Clerk read as follows:

The name of Minta Green, widow of Thomas Green, late of Company E, Third Regiment Tennessee Volunteer Infantry, and pay her a pension at the rate of $30 per month and pay to her the amount of pension accrued to the soldier at the time of his death.

Mr. WALSH. Mr. Speaker, I move to strike out the last word. What is the necessity for the provision on page 3, Minta

Green, that the accrued pension due the soldier at the time of his death be paid to the widow?

Mr. FULLER. If she is the legal widow of the soldier, she is entitled under the existing law to the accrued pension, but she evidently had not made that claim of the Pension Bureau. She might have done so, but probably in this case the claim was not made. She is entitled to it as his widow.

Mr. WALSH. Do I understand the gentleman to say that her widowhood is of such a character that under existing law she would not be entitled to accrued pension?

Mr. FULLER. If she is the legal widow, she is entitled to the accrued pension, no matter when she was married or any other circumstances.

Mr. WALSH. That is the understanding I had, and I wondered why it was carried in this bill.

Mr. FULLER. Very likely because she failed to make application. She was not entitled to pension on her own account, and therefore probably did not make application of the Pension Bureau. That is the presumption.

Mr. WALSH. Well, should not she make her application under existing law, rather than begin to incorporate these provisions in these private bills?

Mr. FULLER. There might be such a thing that the Bureau of Pensions failed to recognize that she was the legal widow, and the Pension Committee might think that she was. But I can not say as to this particular case, because I have no recollection concerning it. Where we find that a woman is the legal widow and she has not been paid accrued pension, we include that in the allowance. It is simply so much pension due the soldier the day he died which he could not draw.

Mr. WALSH. Are there very many other cases?

Mr. FULLER. Very few; that would only happen once in a hundred times, perhaps.

Mr. WALSH. Do I understand, then, there are some items where the Pension Bureau has ascertained and determined that the woman was not the legal widow and the committee determines that she is?

Mr. FULLER. There are cases where she is unable to make technical proof of the death or divorce of a former spouse, 40 or 50 years ago. In that case the bureau refuses to recognize that she is the legal widow of the soldier.

Mr. BLAND of Indiana. In the report, page 11, it cites that the claimant has never applied for accrued pension, and by reason of her marriage date to the soldier after June 27, 1905, she has no title under existing laws. That is the reason why this special bill.

Mr. WALSH. Simply because she has not applied?

Mr. BLAND of Indiana. Because she married after 1905.

Mr. FULLER. It might not be worth while to apply for such a small amount due and make the necessary proof and get only the accrued pension.

Mr. WALSH. If she has not title to it, why give it?

Mr. FULLER. She has full title if she is the legal widow.

Mr. WALSH. But the report says she has not title under existing law.

Mr. FULLER. To a pension.

Mr. WALSH. To accrued pension.

Mr. BLAND of Indiana. Under the rule, but she is entitled to pension and accrued pension.

The Clerk read as follows:

The name of Harriet M. Powers, former widow of William A. Rousey, late of Company A, Tenth Regiment Illinois Vounteer Infantry, and pay her a pension at the rate of $30 per month.

Mr. KEARNS. Mr. Speaker, I offer an amendment.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 3, after line 13, insert a new paragraph, as follows:

"The name of James B. Mulford, late of Company B, Seventy-ninth Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $50 per month.

Mr. KEARNS. Mr. Speaker, I want to call the attention of the chairman of the Invalid Pensions Committee to this item. While the bill and testimony were presented to the committee, I think in its hurry it did not have time to give it proper consideration. Now, I will say for the benefit not only of the chairman but for the other members of the Committee that this soldier enlisted at Camp Denison on the 8th day of August, 1862, and that he was in the service at Frankford, Ky. He was in the service for 74 days——

Mr. BLAND of Indiana. Which case does the gentleman refer to?

Mr. KEARNS. I am speaking to an amendment which I have offered—when it was discovered that the captain had failed to sign the muster-in roll; consequently none of this company was mustered in, although they had served 74 days in all; and, of course, they were ordered to pass another physical examination. When this physical examination was ordered this man was in the hospital, having contracted a heavy cold and suffering with a high fever. Of course, he was rejected and sent home.

Now, he was never in the service, except that Congress on June 28, 1906, passed a bill that reads as follows:

That James B. Mulford be held and considered to have been mustered into the service as a private of Company B, Seventy-ninth Regiment, Ohio Volunteer Infantry, as of date of August 18, 1862.

August 18, 1862, is the day when he was really taken into the service, although the captain failed to sign the muster-in roll. And the Congress further enacted and held him to be honorably discharged as of date of October 21, 1862. That was the time he was in the hospital and was up for a second physical examination, and because of his sickness, contracted in the service, he was held to be not fit for further military duty, and was sent home. He received by act of Congress a muster in and a muster out, with an honorable discharge. This man has never been well since that time. He is an invalid, and has been one for practically all his life since this service. One of his physicians filed an affidavit many years ago to the effect that he knew this man well before he went into the service and that he was strong and healthy, and that he has never been well since that time.

Now, had the captain signed the muster-in roll and this man had been discharged from the service after 74 days of actual service he would have been entitled to a pension from the Pension Bureau. This Congress has passed many a special act that has given a pension where they have served less than 90 days and were discharged from the service because of a sickness or disability of some character incurred in the service. This man did serve 74 days and was sent home because of this illness that he had contracted in the service. Therefore I can see no reason why he ought not to have a pension of $50 a month.

Mr. BLAND of Indiana. Mr. Chairman, I dislike very much to make any objection.

Mr. KEARNS. I hope the gentleman will not.

Mr. BLAND of Indiana. I will have to do so. This case has been considered by the committee, and I think it is generally conceded that the policy of the Invalid Pensions Committee with reference to granting special legislation to soldiers and their widows is amply liberal. A great many cases pass before that committee which the committee necessarily has to turn down, because to allow them would set a precedent that would bring forth thousands and thousands of similar claims. Now, here is a case, as I understand it from the gentleman's statement, that has run a half century, and he has not been placed on the pension roll, although I have no doubt there have been many applications to the Pension Bureau.

Mr. KEARNS. I did not yield for a speech.

Mr. BLAND of Indiana. I thought I had the floor. I thought the gentleman had finished.

Mr. KEARNS. I thought you wanted to ask me a question.

Mr. BLAND of Indiana. I will desist for the present.

Mr. SMITH of Idaho. Do the records show that this man did any service for 74 days?

Mr. KEARNS. He did.

Mr. SMITH of Idaho. And the War Department recognizes that?

Mr. KEARNS. There is no dispute about that.

Mr. SMITH of Idaho. And he was in the hospital when he was ordered for a second examination?

Mr. KEARNS. Yes. And he would have gotten a pension years ago if the captain had not forgotten to sign the muster-in roll. There were three of these men of this company in the hospital, and the other two have been drawing pensions for years. The reason that this man has not drawn a pension is because he could not get the ear of a Member of Congress. The other two have been getting a pension for 20 years.

Mr. MONDELL. How long did the man actually serve?

Mr. KEARNS. Seventy-four days.

The SPEAKER. The time of the gentleman from Ohio [Mr. KEARNS] has expired.

Mr. BLAND of Indiana. Mr. Speaker, I ask unanimous consent that the gentleman may have five minutes more.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. MONDELL. Was he regularly mustered in and honorably discharged?

Mr. KEARNS. He went into the service——

Mr. MONDELL. Will the gentleman answer my question? Was the man regularly mustered and enrolled and honorably discharged?

Mr. KEARNS. He was by act of Congress. The gentleman does not understand this, and I want him to understand it,

namely, that he signed a muster-in roll and went into the service and performed service in the field for about 70 days, and he thought he was in the service. He had participated, I think, in two skirmishes with his company, and at the end of 70 days it was discovered that the captain had forgotten to sign the muster-in roll. Consequently he had never been in the service, although he had been performing military duty and thought he was. When this was discovered, they asked them all, the entire company, to sign the muster-in roll again, and three of the company were in the hospital, and this man was one of the three. He had contracted a heavy cold because of having slept out in the open for two or three nights. The three men were sent home. Of course, they could not be discharged, because, technically, they never had been in the service. But Congress and the Pension Bureau pension all soldiers who have served 5 days or 10 days, or any number of days, who were discharged by reason of disability contracted in line of duty. Consequently this man is punished because a captain inadvertently failed to sign the muster-in roll. It is not fair, the other two comrades who were with him having gotten pensions because a former Congress recognized the equity of the case and put them on the pension roll, where this man ought to have been years ago.

Mr. FULLER. Mr. Speaker, I dislike to oppose the granting of a pension to this man, or any old soldier, or a man who thinks he was a soldier and did service for his country. We have very many cases before the Committee on Invalid Pensions of imperative need, and if we granted pensions purely from the point of the need of the person, we would grant a great many more than we do. I think the committee has been as liberal as it can possibly be, or ought to be. The committee was unable to find anything in this case upon which the man should be entitled to a pension. We have an expert examiner detailed from the Pension Bureau to go over all the papers in the cases, and all these files are before the committee, and the committee did not think that the bill could be favorably considered in this case. While I dislike to oppose the granting of a pension, I think it would be a bad precedent to admit an amendment of this kind to a bill where the case has been rejected by the committee. Let the case go before the committee again, if the gentleman wishes, and the committee will give it a further examination. But I do not think an amendment should be made to this bill by putting in a new case that the Members know nothing about and have no means of knowing the merits of the case.

Mr. SMITH of Idaho. Mr. Speaker, will the gentleman yield to me for a question?

Mr. FULLER. Yes.

Mr. SMITH of Idaho. When the matter was before the committee did they examine the record furnished by The Adjutant General of the Army in regard to the service of this man to see whether or not he participated in two skirmishes and was in the hospital when examined before being mustered in?

Mr. FULLER. We examined the papers that we had before us.

Mr. SMITH of Idaho. It seems to me this is simply to correct an error made by the captain of the company.

Mr. FULLER. If we start out to admit amendments of this kind, we shall be in constant trouble.

Mr. KEARNS. Does the gentleman know or did he ever hear of a case parallel with this one? I venture to say the gentleman never heard of such a case as this one.

Mr. BLAND of Indiana. May I ask the gentleman from Ohio if he appeared before the committee concerning this bill?

Mr. KEARNS. Yes.

Mr. BLAND of Indiana. Did the gentleman present all the facts to the committee?

Mr. KEARNS. I tried to present the facts clearly. It was the first time the case had been brought to my personal attention.

Mr. BLAND of Indiana. How many times has this case been before the committee?

Mr. KEARNS. I do not know that it has been before the committee before.

Mr. BLAND of Indiana. I presume it has been before the committee many times.

Mr. KEARNS. I went before the committee the other day, and they handed me this case out of the files. I want to say that it is the strongest case I have.

Mr. BLAND of Indiana. Mr. Chairman, the rule of the committee is that unless there would be a very peculiar and unusual condition prevailing the soldier would have to have 90 days' service in order to be entitled to a pension.

Mr. KEARNS. This is for disability.

Mr. BLAND of Indiana. Unless cause of the pension was for disability received in the service.

Mr. KEARNS. This is for disability.

Mr. BLAND of Indiana. This soldier can get his pension under existing law for disability received in the service, even though his service was less than 90 days. The trouble with this situation is that the records do not show that he was ever mustered in or out. He submitted proof, of course, but he is asking that he be granted a pension upon 74 days of service and upon a record that does not show whether he was in or out of the Army. There have been cases where one's length of service was sufficient to meet the requirements under the rule, where proof was taken of his discharge. The Committee on Military Affairs have pending before them now a great number of bills correcting the military records of soldiers. I do not think it is the province of the Committee on Invalid Pensions to correct the military records of soldiers.

Mr. KEARNS. This man's record has been corrected.

Mr. BLAND of Indiana. Then the gentleman says he can not get the ear of Congress, although he has had the ear of the Committee on Military Affairs. This case has evidently been before the Committee on Invalid Pensions a number of times. Even before I came here it was before the committee, as I understand. I insist that the rules of the committee are sufficiently liberal, and we are being criticized for the liberality we have now shown. With the spirit of liberality that we have practiced under the rules we turned this down, and certainly it would be a bad precedent for us to establish here to admit amendments without mature consideration. I hope the House will not adopt the amendment.

The SPEAKER. The question is on agreeing to the amendment offered by the gentleman from Ohio.

The question was taken, and the Speaker announced that the noes seemed to have it.

Mr. KEARNS. Mr. Speaker, I demand a division.

The SPEAKER. A division is demanded.

The House divided; and there were—ayes 15, noes 33.

Mr. McCLINTIC. Mr. Speaker, I make the point that there is no quorum present.

The SPEAKER. The gentleman from Oklahoma makes the point that there is no quorum present. Evidently there is no quorum present. The Doorkeeper will close the doors; the Sergeant at Arms will notify the absentees; the question is on agreeing to the amendment; and the Clerk will call the roll.

The question was taken; and there were—yeas 53, nays 205, answered "present" 4, not voting 167, as follows:

Mr. GREENE of Vermont with Mr. GALLAGHER.
Mr. PAIGE with Mr. DREWRY.
Mr. MURPHY with Mr. DOREMUS.
Mr. SANDERS of New York with Mr. BLACKMON.
Mr. STEENERSON with Mr. HOLLAND.
Mr. JEFFERIS with Mr. BRUMBAUGH.
Mr. MOTT with Mr. DICKINSON of Missouri.
Mr. WATSON with Mr. MCGLENNON.
Mr. TAYLOR of Tennessee with Mr. STEPHENS of Mississippi.
Mr. NEWTON of Missouri with Mr. JOHNSTON of New York.
Mr. PERLMAN with Mr. WISE.
Mr. HADLEY with Mr. SCULLY.
Mr. KENNEDY of Iowa with Mr. SANDERS of Louisiana.
Mr. MACGREGOR with Mr. TAGUE.
Mr. GOULD with Mr. WINGO.
Mr. RIDDICK with Mr. GODWIN of North Carolina.
Mr. WOOD of Indiana with Mr. JOHNSON of Kentucky.
Mr. YATES with Mr. KETTNER.
Mr. MORIN with Mr. LONERGAN.
Mr. WASON with Mr. MANN of South Carolina.
Mr. VARE with Mr. MOONEY.
Mr. NELSON of Wisconsin with Mr. MILLIGAN.
Mr. KREIDER with Mr. MAHER.
Mr. KIESS with Mr. WELTY.
Mr. LITTLE with Mr. MCKEOWN.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore (Mr. MADDEN). A quorum is present. The Sergeant at Arms will open the doors. The Clerk will read.

The Clerk read as follows:

The name of Charles N. Ashford, alias William Kenney, late of Company D, One hundred and fifth Regiment, and Company K, Ninety-seventh Regiment, New York Volunteer Infantry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving: *Provided*, That no part of the pension herein granted shall be withheld by the Bureau of Pensions for recoupment of former alleged erroneous payments of pension.

Mr. WALSH. Mr. Speaker, what is the necessity for this proviso: That no part of the pension herein granted shall be withheld by the Bureau of Pensions for recoupment of former alleged erroneous payments of pensions?

Mr. FULLER. That is undoubtedly a case where the Pension Bureau held that the man was wrongfully granted a pension, and at some time his name was stricken from the roll. The committee decided to put his name back without recoupment. Otherwise the Pension Bureau, if they thought they had made any erroneous payments, would deduct them before they would pay him any money under the pension now granted him, and in this case the committee thought there should be no recoupment.

Mr. WALSH. The committee thought that the Pension Bureau was in error in dropping him from the roll?

Mr. FULLER. Evidently.

Mr. WALSH. Does the gentleman know how much is involved.

Mr. FULLER. I have no recollection of the case now.

The Clerk resumed and completed the reading of the bill.

The bill was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

This bill is a substitute for the following House bills referred to the Committee on Invalid Pensions:

H. R. 4323. Alice Jones.
H. R. 5982. Allen Landis.
H. R. 9192. Harriet J. Bailey.

Mr. SELLS. Mr. Speaker, I call up the bill (H. R. 15900) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, and ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. That consent was granted as to all pension bills to be considered to-day. The Clerk will report the bill.

The Clerk proceeded to read the bill, and read as follows:

The name of Ida M. Zimmerman, widow of Charles A. Zimmerman, late of the United States Navy, Regular Establishment, and pay her a pension at the rate of $25 per month in lieu of that she is now receiving.

Mr. WALSH. Mr. Speaker, I move to strike out the last word. What is there with reference to this case that caused the committee to recommend the payment of a pension of $25 per month to Ida M. Zimmerman? She is the widow of an officer of the Regular Establishment. Did she marry him since 1905?

Mr. SELLS. No. It has not been the practice of our committee to grant pensions to remarried widows of officers of the regular service at all, but this woman probably has been unable to show that the death of her husband was due to his Army service, and in that case the committee has granted her a pension at the usual rate of $25.

Mr. WALSH. She was not able to show that her husband died as the result of service?

Mr. SELLS. The gentleman will find all the facts in the case stated in the report. Each of these cases is explained in full in the committee report, and of course it is manifestly impossible for the chairman to carry the details of each case in his mind.

Mr. WALSH. There was nothing in connection with this claim to show any service in any war on the part of her husband, I understand.

Mr. SELLS. Ida M. Zimmerman was the widow of Charles A. Zimmerman, who served in the Regular Establishment of the United States Navy as leader of the Naval Academy band from April 21, 1910, to July 16, 1916, and he had previously been connected with the band in a civilian capacity since 1882, showing service extending over a period of practically 34 years. On that record the committee thought his widow should have a pension.

Mr. WALSH. I withdraw the pro forma amendment.

The Clerk completed the reading of the bill.

Mr. SELLS. Mr. Speaker, I ask unanimous consent to offer an amendment.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to offer an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SELLS: Page 12, line 7, strike out "$10" and insert "$20."

The SPEAKER. Without objection, the amendment will be agreed to.

There was no objection.

Mr. WALSH. I think the RECORD ought to show that the gentleman obtained consent to return to that line and page.

The SPEAKER. The Chair put it in the form of request for unanimous consent.

Mr. SELLS. I ask unanimous consent to offer the following amendment.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to offer an amendment, which the Clerk will report.

The Clerk read as follows:

Page 12, line 7, strike out "$10" and insert "$20."

The SPEAKER. Without objection, the amendment will be agreed to.

There was no objection.

The amendment was agreed to.

Mr. SELLS. I ask unanimous consent to offer the following amendment.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to offer an amendment, which the Clerk will report.

The Clerk read as follows:

Page 28, line 13, strike out the word "India" and insert the word "Indian."

The SPEAKER. Without objection, the amendment will be agreed to.

There was no objection.

The amendment was agreed to.

Mr. SELLS. I ask unanimous consent to offer the following amendment.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to offer an amendment, which the Clerk will report.

The Clerk read as follows:

Page 29, after the word "month," in line 19, add "in lieu of that she is now receiving."

The SPEAKER. Without objection, the amendment will be agreed to.

There was no objection.

The amendment was agreed to.

Mr. SELLS. I ask unanimous consent to offer the following amendment.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to offer an amendment, which the Clerk will report.

The Clerk read as follows:

Page 30, line 14, strike out "$12" and insert "$20."

The SPEAKER. Without objection, the amendment will be agreed to.

Mr. WALSH. I think we ought to have some explanation of these increases in these pensions above what the committee has reported.

Mr. SELLS. They are mere corrections of typographical errors made by the Printing Office.

Mr. WALSH. The committee originally reported the figures stated in the amendments?

Mr. SELLS. Yes.

The SPEAKER. Is there objection?

There was no objection.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

On motion of Mr. SELLS, a motion to reconsider the vote by which the bill was passed was laid on the table.

This bill is a substitute for the following House bills referred to the Committee on Invalid Pensions:

H. R. 680. Mercedes Slocum, Patricia Slocum, and James Slocum.
H. R. 1883. Frances E. Herlehy.

Mr. FULLER. Mr. Speaker, I call up the bill H. R. 15546, to repeal certain portions of an act entitled "An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war," approved June 5, 1920.

Mr. BLANTON. Mr. Speaker, I raise the question that this bill is not privileged. This is a bill to repeal pension laws, and under what rule is such a bill privileged?

Mr. FULLER. The bill relates to an omnibus bill passed at the last session in which it was discovered that certain information was concealed from the committee in two cases which were got through by constructive fraud at least. This bill is to repeal those two cases.

Mr. BLANTON. It does not in any way repeal or change the general pension laws?

Mr. FULLER. No; it is simply to repeal the two cases that I speak of.

The Clerk read as follows:

Be it enacted, etc., That so much of an act entitled "An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war" (Private act No. 70, 66th Cong.), approved June 5, 1920, as reads as follows:

"The name of Catherine Osborn, helpless and dependent daughter of Andrew J. Osborn, late of Company G, Second Regiment Provisional Enrolled Missouri Militia, and pay her a pension at the rate of $20 per month"; and

"The name of Malinda Kiniston, widow of Josiah W. Kiniston, late unassigned, One hundred and twelfth Regiment New York Volunteer Infantry, and pay her a pension at the rate of $30 per month,"

be, and the same is hereby, repealed, and the names of the said Catherine Osborn and the said Malinda Kiniston are hereby ordered to be stricken from the pension roll.

Mr. FULLER. Mr. Speaker, in support of this bill I have simply to say that certain information was not given to either the House committee or the Senate committee. Under the bill that was passed it included these two cases, and it was found that both of these women were married women when the bill was passed. The committee does not knowingly report bills to pension married women.

Mr. BLANTON. Will the gentleman yield?

Mr. FULLER. Yes.

Mr. BLANTON. What about the amounts of money that has been paid to them?

Mr. FULLER. The pensions have been held up by the bureau; they have not been paid.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. FULLER, a motion to reconsider the vote whereby the bill was passed was laid on the table.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

Mr. ROGERS. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the Diplomatic and Consular appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. TOWNER in the chair.

The CHAIRMAN. Last evening when the committee rose there was a point of order pending made by the gentleman from Texas, the arguments upon which were not concluded.

Mr. ROGERS. Mr. Chairman, I desire further recognition to discuss the point of order which was pending when the committee rose last evening. The point of order made by the gentleman from Texas related to three items in the third paragraph of the bill—one appropriating a salary for the minister to Finland, another appropriating a salary for the minister to the Serbs, Croats, and Slovenes, and the third appropriating a salary for the minister to Turkey.

The Chair, as I gathered from comments which he interjected, agrees with my contention that it is the function of the Executive to recognize foreign countries, but the Chair was apparently in some doubt whether the right to recognize carried with it the right to appoint a minister or ambassador without the express and direct sanction of Congress in each case. I desire at this point to read into the RECORD the paragraph of the Constitution on which I rely in my assertion that the three missions in question are authorized by law, for the authority of law in this instance is the supreme law of the land—the Constitution.

Article II, section 2, of the Constitution provides, in part:

He shall have power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senators present concur; and he shall nominate, and by and with the advice and consent of the Senate, shall appoint ambassadors, other public ministers and consuls, judges of the Supreme Court, and all other officers of the United States, whose appointments are not herein otherwise provided for, and which shall be established by law. * * *

The question presents itself at the outset as to whether the final clause which I have read, "and which shall be established by law," must be construed as relating so far back into the previous language of the paragraph as to limit the authority of the President to appoint ambassadors, other public ministers and consuls. So far as I know that exact question has never been decided by the Supreme Court of the United States. But in a case decided by Mr. Justice Marshall, while sitting in the Circuit Court of the United States for the District of Virginia and North Carolina, during the year 1823, there is a discussion by Judge Marshall of the general questions which are presented by this phase of the present controversy. This case is United States against Maurice and others, Brockenbrough's Reports, volume 2, page 96, especially at pages 100 to 103. Justice Marshall found it necessary to consider the antecedent of "which" in the clause which I have quoted. In the course of his discussion he says:

I feel no diminution of reverence for the framers of this sacred instrument when I say that some ambiguity of expression has found its way into this clause. If the relative "which" refers to the word "appointments," that word is referred to in a sense rather different from that in which it had been used. It is used to signify the act of placing a man in office, and referred to as signifying the office itself. Considering this relative as referring to the word "offices," which word, if not expressed, must be understood, it is not perfectly clear whether the words "which" offices "shall be established by law" are to be construed as ordaining that all offices of the United States shall be established by law or merely as limiting the previous general words to such offices as shall be established by law. Understood in the first sense, this clause makes a general provision that the President shall nominate and, by and with the consent of the Senate, appoint to all offices of the United States, with such exceptions only as are made in the Constitution; and that all offices (with the same exceptions) shall be established by law. Understood in the last sense, this general provision comprehends those offices only which might be established by law, leaving it in the power of the Executive, or of those who might be intrusted with the execution of the laws, to create in all laws of legislative omission such offices as might be deemed necessary for their execution, and afterwards to fill those offices. * * *

In this ignorance of the course which may have been pursued by the Government, I shall adopt the first interpretation, because I think it accords best with the general spirit of the Constitution, which seems to have arranged the creation of office among legislative powers, and because, too, this construction is, I think, sustained by the subsequent words of the same clause, and by the third clause of the same section.

In other words, Justice Marshall regarded the "which" as relating back to the word "offices" and not as relating back to the word "appointments."

But his so holding carries with it the corollary that he did not deem it a possible construction that the "and which" clause which I have quoted could possibly relate to the portion of the language which refers to ambassadors, other public ministers, and consuls. Therefore, while the authority is not a square one, it seems to indicate that in the opinion of John Marshall the President's power to appoint ambassadors and public ministers did not depend upon any statutory enactment by Congress, but found its source directly in the Constitution itself.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. Yes.

Mr. WALSH. Does the gentleman contend that Congress could not pass a law stating that there should be no diplomatic representatives of the United States to a certain country?

Mr. ROGERS. I think that that contention follows necessarily from the argument which I am making. There is one qualification to that, however; that, of course, the President must have the confirmation of the Senate before the office can be validly created and the ambassador or public minister can be validly appointed.

Mr. MANN of Illinois. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. Yes.

Mr. MANN of Illinois. What has been the practice with reference to the appointment of ambassadors as contradistinguished from ministers to foreign countries? Has that followed action by Congress, appropriation or otherwise, or has the action of Congress followed action by the President?

Mr. ROGERS. In the matter of ambassadors, the situation is this, as I indicated rather fully yesterday afternoon. The act of 1893 was the first reference in the statute law to ambassadors as far as any attempted regulation of the appointment is concerned. A statute of 1856 (11 Stat., 52) had prescribed the salaries of ambassadors, but no ambassadors were ever appointed by the President until after the act of 1893.

Mr. MANN of Illinois. Does the gentleman think that under the constitutional provision the President can appoint an ambassador to any country that he chooses, regardless of action by Congress?

Mr. ROGERS. I think that the answer which I made to the gentleman from Massachusetts [Mr. WALSH] applies, and that the answer is yes, provided that there shall be a confirmation by the Senate.

Mr. MANN of Illinois. Has that been the practice?

Mr. ROGERS. That has been the practice, as far as ministers are concerned.

Mr. MANN of Illinois. I understand.

Mr. ROGERS. And the constitutional question is precisely the same as between ministers and ambassadors.

Mr. MANN of Illinois. Is there a minister to those countries named and confirmed by the Senate?

Mr. ROGERS. Yes.

Mr. MANN of Illinois. There is an actual minister?

Mr. ROGERS. Yes. In the case of Poland, of Finland, of Czechoslovakia, and of the Serbs, the Croats, and Slovenes. There is not at this moment a minister or ambassador to Turkey.

Mr. MANN of Illinois. Is there any provision of law specifically naming ministers for different countries?

Mr. ROGERS. There is not.

Mr. MANN of Illinois. Except in the appropriation act.

Mr. ROGERS. Only in the appropriation act.

Mr. MANN of Illinois. The President does not appoint the minister by authority of the appropriation act, because the President does not appoint a new minister every year in each country.

Mr. ROGERS. That is true. The only qualification to the answer which I have just made is that a statute of many years standing fixes the salaries of the ambassadors or ministers to certain places.

Mr. MANN of Illinois. But that has nothing to do with the constitutional question.

Mr. ROGERS. No; that is not in point here.

Mr. BEGG. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. Yes.

Mr BEGG. Is it not a fact, right on that point, that last year or the last session of Congress we did pass a resolution raising the post at Belgium to that of ambassadorship before there was any action taken?

Mr. ROGERS. That is true, and if the gentleman will permit me, I shall discuss that phase of the question in a few moments after I have cited two or three authorities that I think are fundamentally important on the general question.

Mr. Chairman, this general problem was apparently first considered by the executive officers of the United States Government in 1790. I quote from volume 4 of Moore's International Law Digest, section 632:

Thomas Jefferson was asked for an opinion upon the situation in relation to the appointment of our foreign representatives, and he gave this opinion:

"The Constitution having declared that the President shall nominate and, by and with the advice and consent of the Senate, shall appoint ambassadors, other public ministers, and consuls, the President desired my opinion whether the Senate has a right to negative the grade he may think it expedient to use in a foreign mission as well as the person to be appointed. I think the Senate has no right to negative the grade."

Again, James Monroe, when President of the United States in 1822, consulted ex-President James Madison upon a somewhat similar question, and Mr. Madison answered thus:

The practice of the Government has from the beginning been regulated by the idea that the places or offices of public ministers and consuls existed under the law and usages of nations, and were always open to receive appointments as they might be made by competent authority.

In the second volume of Hinds' Precedents, section 1546, there is a very extended discussion of a matter which came before this House of Representatives in 1825.

On December 6, 1825, in his annual message to Congress, President John Quincy Adams referred to the independence of the South American Republics, and said:

Among the measures which have been suggested to them by the new relations with one another, resulting from the recent changes in their condition, is that of assembling at the Isthmus of Panama a congress, at which each of them shall be represented, to deliberate upon objects

important to the welfare of all. The Republics of Colombia, of Mexico, and of Central America have already deputed plenipotentiaries to such a meeting, and they have invited the United States to be also represented there by their ministers. The invitation has been accepted, and ministers on the part of the United States will be commissioned to attend at these deliberations and to take part in them, so far as may be compatible with that neutrality from which it is neither our intention nor the desire of other American States that we should depart.

The question came before the House on March 25, 1826, as to whether an appropriation should be made for the expenses of the mission which President Adams had announced he was proposing to send. The Committee on Ways and Means reported a bill making an appropriation for the commission. The bill was very hotly argued in the House of Representatives, many able Representatives being heard in favor of the appropriation and others being equally urgent in opposition to the appropriation. This is the line of argument, as quoted in Hinds' Precedents, advanced by Daniel Webster, who 16 years after that time became Secretary of State. Webster strongly urged the passage of the appropriation:

Those who argued that the appropriation should be made called attention to the fact that public ministers were created not by statute but by the law of nations and were recognized by the Constitution as existing. They were appointed by the President and the Senate. Acts of Congress limited their salaries, but did no more. By voting the salaries the House simply empowered another branch of the Government to discharge its own duties. In so voting the House had no responsibility for the conduct of the negotiations. To refuse the appropriation would be to prevent the action of the Government according to constitutional plan. Of course, the House could break up a mission by withholding salaries, as it could break up a court, but the House should not, and could not, share Executive duty.

Then James Buchanan, later Secretary of State under Polk and still later President of the United States, joined in the discussion on the same side with Daniel Webster. He said in substance this:

The House is morally bound to vote the salaries of ministers duly created by the President and the Senate. The obligation is as strong as it is to carry into effect a treaty. The power to create the minister was contained in the same clause that provided for treaties. The House might not prejudge the determination of the President and Senate in regard to those officers. Their salaries might not be withheld any more than the House could withhold the salaries of the President and the Supreme Court. If the salaries were withheld the ministers would be legally appointed and their acts would be valid. Of course, however, the House has the physical power to withhold an appropriation.

In 1856 Congress passed a general act regulating in detail the foreign service of the United States. I shall not read it in full because it is rather an extended statute. But it begins as follows (11 Stat., 52):

Ambassadors, envoys extraordinary, and ministers plenipotentiary, ministers resident, commissioners, chargés d'affaires, and secretaries of legation appointed to the countries hereinafter named in Schedule A shall be entitled to compensation for their services respectively at the rates per annum hereinafter specified. That is to say, ambassadors, envoys extraordinary, and ministers plenipotentiary, the full amount specified therefor in Schedule A—

And so forth.

The question of the powers of the President to make diplomatic and consular appointments was referred to Attorney General Cushing shortly before the enactment of this statute. Cushing rendered this opinion (reported in 4 Moore's Digest, sec. 632):

The President under the Constitution has power to appoint diplomatic agents of any rank at any place and at any time, subject to the constitutional limitations in respect to the Senate. The authority to make such appointments is not derived from and can not be limited by any act of Congress except in so far as appropriations of money are required to provide for the expenses of this branch of the public service. During the early administrations of the Government the appropriations made for the expenses of foreign intercourse were to be expended in the discretion of the President and from this general fund ministers whom the President saw fit to name were paid. Congress in any view can not require that the President shall make removals or reappointments or new appointments of public ministers at a particular time, nor that he shall appoint or maintain ministers of a prescribed rank at particular courts. It was therefore held that where the act of March 1, 1855 (10 Stat., 619), declared that from and after the end of the present fiscal year the President shall appoint envoys, etc., this was not to be construed to mean that the President was required to make any such appointments, but only to determine what should be the salaries of the officers in case they have been or shall be appointed.

In Volume 11 of the Federal Statutes Annotated, page 49, there is this comment upon the question now before the committee:

The President has power by the Constitution to appoint diplomatic agents for the United States at any rank at any place and at any time in his discretion, subject always to the constitutional conditions of relation to the Senate. The power to appoint diplomatic agents and to select for employment any one out of the varieties of the class according to his judgment of the public service is a constitutional function of the President not derived from nor limited by Congress but requiring only the ultimate concurrence of the Senate.

A citation in that statement refers to the opinion of the Attorney General from which I have already read. There is also cited the opinion of the Attorney General in 1855 to the effect that—

Consuls are officers created by the Constitution and the laws of nations, not by acts of Congress, and it belongs exclusively to the President, by and with the advice and consent of the Senate, to appoint consular officers to such places as he and they deem to be meet.

So much for the principal authorities I find upon the constitutional and parliamentary question before the committee.

It appears that so far as the appointment of ministers is concerned the power of the President has always been recognized by Congress over those questions, and appropriations have always followed for the payment of the salaries of the men whom the President has sent forth as ministers.

I gathered from the comment of the Chair yesterday that possibly he was somewhat troubled by the fact that Congress had legislated upon this general question first in 1893 and again in 1909. The substance of the statute of 1893 was that whenever the President should find that a foreign country was sending a diplomatic representative to the United States the President might send to the foreign country from the United States a diplomatic representative of the same rank. My contention is, Mr. Chairman, that the statute had no effect whatever to limit the power of the President to send an ambassador or minister as he chose to any country, irrespective of the provisions of the act of Congress. The real effect of the act of Congress was twofold.

In the first place, it indicated the terms upon which the Senate and House of Representatives would be prepared to make a salary appropriation in case the appointment was made by the President. And, second, so far as the Senate was concerned, it indicated a willingness on the part of the Senate to confirm a proper appointee to a particular country which the President might choose to recognize by making the appointment. So far as the statute of 1909 was concerned, the effect was very similar. The statute of 1909 forbade, as far as Congress could forbid, the sending forth of an ambassador unless the specific authority of Congress had been given in each case. There again the President, in my opinion, could have sent forth a new ambassador the next day to a country, even though we had never before sent an ambassador to that country, and even though that country was not represented in Washington by an ambassador.

But the Congress by the statute of 1909 was suggesting that it was unlikely to appropriate a salary in such a case, and the Senate was suggesting that it was unlikely that such an appointment would be confirmed. In other words, the power of the President can not be curtailed, because that power flows directly from the Constitution. But Congress also has safeguards upon the exercise of the power. In effect, it can usually make the exercise of the power practically null and void, either by withholding the confirmation or by withholding the salary. And, I repeat, when Congress passed those two acts it was indicating its policy so far as the policy was one upon which legislation could take hold.

In my opinion, therefore, in so far as the point of order relates to the minister to the Serbs, Croats, and Slovenes, and in so far as it relates to the minister to Finland, it is clearly not valid. It should not, I think——

Mr. HUDDLESTON. Will the gentleman yield?

Mr. ROGERS. In just one minute. I want to finish this thought, and then I shall be glad to yield.

It should not be lost sight of that one way of recognizing a foreign power is by the act of sending a minister or ambassador. As a matter of practice and custom in our international relationship, that has been our usual way of recognizing a country for the first time, namely, by the act of sending forth a minister. So, it seems to me, that when the Chair is inclined to feel, as I suspect he is inclined to feel, that recognition is solely an Executive function with which Congress has no direct contact at all, the corollary follows that the usual manner of according recognition, namely, by sending forth an ambassador or minister, must also be within the constitutional power of the President, and therefore not subject to a point of order on an appropriation bill.

Now I yield to the gentleman from Alabama.

Mr. HUDDLESTON. The gentleman holds, as I understand it, that the President has constitutional authority to send a minister to any country?

Mr. ROGERS. Yes.

Mr. HUDDLESTON. Now, there is nothing in the Constitution which forbids the President sending more than one minister to the same country. Therefore, the President might send any number of ministers to the same country at the same time, and it seems to follow that Congress has authority to appro-

priate, we will say, for a dozen ministers to Finland at one time. Is not that a fact?

Mr. ROGERS. The gentleman from Pennsylvania [Mr. TEMPLE] reminds me that at one period during the war stress, beginning in 1914, we had several officials with the rank of ambassador or minister actually present in the city of Paris.

Mr. HUDDLESTON. May I call the gentleman's attention to the fact that there is no such office as ambassador or minister known to our law; that the offices that are known to our law, we will say for illustration, are ambassador to Great Britain or minister to Siam, or some other office of that kind.

The President has authority under the Constitution merely to fill the office when once it is created. If there is no office there can be no officer, and the official is merely the President's personal representative and has no official status so far as the laws of the United States are concerned. Let me suggest to the gentleman that this provision of the Constitution upon which he relies merely provides for a way of filling an office once the office is created. As applied to the Supreme Court of the United States, the President has authority to appoint judges. How many judges? Can the President appoint an unlimited number of judges and can Congress then assume that there is authority of law for those appointments and make appropriation to pay their salaries? Must not the number of judges, notwithstanding this clause of the Constitution, be fixed by the statutes of the United States so that they become judges of the United States, authorized by an act of Congress—a public office, a specific office, to which a man may be appointed?

Now, I call the gentleman's attention to the fact that there is no such office known as "minister to Finland," and that is the title of the officer that the President will appoint and for which we are seeking to make an appropriation.

Mr. ROGERS. I do not agree with the gentleman that the title of the officer is "minister to Finland." He is a minister and he is accredited to Finland. But the Constitution of the United States itself is the organic act that creates the office of ambassadors in general terms and creates the office of public ministers in general terms. The act of 1856, to which I have referred, also deals with ambassadors in general terms and envoys extraordinary and ministers plenipotentiary in general terms. There is no geographical description.

Then, the statute of 1856 establishes the salary schedule of the ambassadors and ministers who shall be appointed. In the first group are Great Britain and France, each $17,500; Russia, Spain, Austria, Prussia, Brazil, Mexico, and China, each $12,000; all other countries, each $10,000. In other words, the act which I am now reciting is simply a salary act. It could not and did not purport in any way to limit the authority of the President.

Mr. HUDDLESTON. Let me ask the gentleman a question.

Mr. ROGERS. Yes.

Mr. HUDDDLESTON. How many ambassadors does the Constitution authorize the President to appoint?

Mr. ROGERS. It does not fix the number.

Mr. HUDDLESTON. Any number he chooses?

Mr. ROGERS. Any number he chooses, provided in each case the appointee is confirmed by the Senate and appropriated for by Congress.

Mr. HUDDLESTON. The appropriation by Congress is not an act necessary to vest the official in his office. He might be an ambassador without an appropriation by Congress, might he not, and therefore the President could appoint to every country in the world, if the Constitution is his warrant, as many ambassadors as he chose?

Mr. MANN of Illinois. As a matter of fact, the President appointed a number of ambassadors, or whatever they may have been called, to agree upon a peace treaty, did he not?

Mr. ROGERS. He did.

Mr. MANN of Illinois. There was no limit to the number he might appoint?

Mr. HUDDLESTON. May I call the gentleman's attention to the fact that those persons were not ambassadors. They were personal representatives of the President.

Mr. MANN of Illinois. Oh, no. They were personal representatives of the President officially; not personally, but officially.

Mr. HUDDLESTON. Certainly they were representatives of the President and not of the Government of the United States. They were commissioners. The President might go himself, or he might send such agents as he chose. They are merely agents of the President in performing his constitutional functions in the negotiation of treaties. They are not ambassadors within the meaning of the section of the Constitution.

Mr. MANN of Illinois. It is within this section of the Constitution that the whole thing comes.

Mr. HUDDLESTON. That is under another clause, the making of treaties and the appointment of ambassadors. The gentleman will not say that the President's activities in Paris recently have been in the direction of appointing ambassadors.

Mr. MANN of Illinois. Under precisely the same power of the Constitution he does both.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The gentleman from Massachusetts [Mr. ROGERS] has the floor.

Mr. ROGERS. If the gentleman will permit me to complete this one thought, then I will yield the floor.

Mr. Chairman, I desire in conclusion to present the practical considerations which bear upon this subject. For a century and a quarter, ever since the United States was born as a Nation, we have followed in practice the policy which has been reflected in this paragraph of the appropriation bill. The President has recognized, and the Senate has confirmed, and the ambassador or minister has gone forth, and the Congress has appropriated without any prior authority being granted. The only exceptions to this general practice for over a century have been under the act of 1909, which in no way limited the authority or the power of the President, but simply indicated the viewpoint of the Congress as to the sort of case when it would think it proper to appropriate for an ambassadorial salary.

If the point of order should be sustained in this case, it would upset the precedents and policies of the United States in matters of foreign representation ever since the foundation of the Government. I think myself there is no question whatever of the fundamental soundness of the position which I am urging, aside from the precedents; but assuming that the Chair prefers to deal only with actual constitutional interpretation, practice, and authority, I want at this time to emphasize the fact that the doctrine of stare decisis, or something akin to it, would seem to have made this so universal and time-honored a practice that a departure from it, simply because a point of order was raised on an appropriation bill, would be highly dangerous and would seriously upset the entire international fabric of the United States.

Now I yield to the gentleman from Texas [Mr. BLANTON], who was on his feet.

Mr. SMALL. Mr. Chairman, I would like to submit an inquiry to the gentleman.

Mr. ROGERS. I will yield to the gentleman from North Carolina.

Mr. SMALL. Mr. Chairman, I think the gentleman's argument is conclusive, but I wish to make this inquiry: The gentleman's reference as to the countries concerned in the items to which the point of order was made was with respect to Finland and Serbia. Were there not items respecting other countries to which the point of order was made besides Finland and Serbia?

Mr. ROGERS. And Turkey.

Mr. SMALL. And there are now ministers serving under appointment of the President and confirmed by the Senate in those countries?

Mr. ROGERS. We have no minister or ambassador in Turkey. I was about to suggest to the Chair that I preferred, if the Chair would permit, to have a ruling made, first, by the Chair, on the general question presented by the points of order, because the point of order as to Turkey is unquestionably in a somewhat different position and requires, in my judgment, somewhat different treatment.

Mr. SMALL. It is differentiated simply in this respect, that no minister has yet been appointed to Turkey.

Mr. ROGERS. It is differentiated also by the fact that our last representative to Turkey was an ambassador, and that the Committee on Appropriations, in presenting this bill to the House, feeling that an ambassador was unnecessary and desiring to retrench expenses wherever possible, is recommending the appointment of a minister to Turkey. That is the principal respect in which the situation differs from that presented by the other two points of order.

Mr. SMALL. Even that difference does not affect the executive power of the President, as the gentleman has argued?

Mr. ROGERS. Not at all.

Mr. BEGG. Mr. Chairman, I would like to ask the gentleman from Massachusetts a question.

The CHAIRMAN. Does the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Ohio.

Mr. BEGG. I should like to ask the gentleman again if he was not of the opposite opinion from that at the last session when we legislated to raise the legation at Brussels to an embassy?

Mr. ROGERS. I will say to the gentleman that I had never examined in detail into the constitutional question until it came up in connection with the preliminary work on this bill. I am

not conscious that I have changed my mind. I have simply acquired an opinion.

Mr. BEGG. I see. But after all is said and done—and I do not find any serious fault with the reasoning of the gentleman, even though the President can appoint—does it not follow also that the House can veto the appointment by a refusal to make an appropriation?

Mr. ROGERS. Precisely. But this question is on a point of order and not on the merits of the paragraph.

Mr. BEGG. I am coming to that. If the gentleman accepts that statement, then does it not follow that the appropriation is legislation with regard to the establishment of that particular office?

Mr. ROGERS. Oh, not at all.

Mr. BEGG. The mere naming of the amount of dollars is not legislation, but it is establishing the office of an ambassador or a minister, and it seems to me it would bring your proposition clearly into the field of legislation.

Mr. ROGERS. There is always a square distinction between the creation of an office and the amount of an appropriation that may be made by Congress to pay the salary of that office.

Mr. BEGG. Will the gentleman permit a further question on that?

Mr. ROGERS. Yes.

Mr. BEGG. If the Chair holds that the gentleman is correct in his contention, and that without legislation you can change an ambassador to a minister or any kind of a representative the Government sees fit to send, where is your stability in your foreign policy? Supposing that this House becomes different in complexion from the administrative department of the Government and desires to upset everything, how does the executive office have any assurance or guaranty at all that a foreign policy can be carried out in any kind of decency if this thing is to be just subject to the whims of the House?

Mr. ROGERS. We can not raise a minister to be an ambassador against the point of order made. That very fact was determined yesterday when the committee recommended the promotion of the minister to China to be an ambassador and the Chair ruled it out on a point of order, which I conceded to be sound. But in this case, that of Turkey, we are proposing in this bill to reduce the embassy to Turkey to a legation to Turkey. My contention is, whether the Chair will sustain it or not, that that is a retrenchment and therefore within the Holman rule.

Mr. MONTAGUE. Will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Virginia.

Mr. MONTAGUE. I wish to ask the gentleman from Massachusetts a question. I have listened to his argument with very great interest, and I desire to know whether I have correctly followed him. I understand him to take the position that the authorization which he invokes is not technically legislative but is the constitutional authorization, and therefore the highest order of authorization?

Mr. ROGERS. Precisely; exactly as this House has held time and again that a treaty obligation furnishes the authority for an appropriation on an appropriation bill, even against a point of order raised against it.

Mr. MONTAGUE. The authorization here is the constitutional authorization for the President to make these appointments.

Mr. ROGERS. The supreme law of the land is the legislative authority in this case, as I contend.

Mr. BLANTON. Mr. Chairman, I desire to discuss the point of order.

Mr. CONNALLY rose.

The CHAIRMAN. Does the gentleman from Texas desire to interrogate the gentleman from Massachusetts?

Mr. CONNALLY. I desire to address myself to the point of order.

The CHAIRMAN. The Chair will first recognize the gentleman from Texas [Mr. BLANTON].

Mr. McCLINTIC. Mr. Chairman, I suggest the absence of a quorum.

The CHAIRMAN. The gentleman from Oklahoma makes the point of order that there is no quorum present. Evidently there is no quorum present.

Mr. ROGERS. I ask the Chair to count.

The CHAIRMAN. The Chair has already ruled on that proposition.

Mr. ROGERS. I move that the committee do now rise, and on that motion I demand tellers.

The CHAIRMAN. The gentleman from Massachusetts asks for tellers on his motion that the committee do now rise.

Tellers were ordered; and the Chairman appointed Mr. ROGERS and Mr. McCLINTIC.

The committee divided; and the tellers reported—ayes 1, noes 104.

The CHAIRMAN. On this motion the ayes are 1, the noes 104. A quorum is present. The motion that the committee rise is not agreed to. The gentleman from Texas [Mr. BLANTON] is recognized.

Mr. BLANTON. Mr. Chairman, the gentleman from Massachusetts in charge of the bill [Mr. ROGERS] admits that there is no statute authorizing any of the positions against which the point of order has been lodged. He contends, however, that the Constitution authorizes the President to create these positions, and that upon constitutional authority an appropriating committee has the power to report appropriations for salaries. I want to call the attention of the Chair to the only paragraph in the Constitution with respect to this subject. It says—

He shall nominate, and by and with the advice and consent of the Senate shall appoint, ambassadors, other public ministers and consuls, judges of the Supreme Court, and all other officers of the United States whose appointments are not herein otherwise provided for—

And here is the clause which the gentleman has overlooked, and which he has not mentioned or considered in his argument, and which is the controlling clause in the constitutional provision—

and which shall be established by law.

Mr. ROGERS. Will the gentleman yield?

Mr. BLANTON. I yield.

Mr. ROGERS. I laid especial emphasis on that clause, and cited no less an authority than John Marshall to show what the antecedent of that clause is.

Mr. BLANTON. Yes.

Mr. ROGERS. I did not overlook it. I saw it and dealt with it.

Mr. BLANTON. Oh, yes; the gentleman saw it, but did not pay any attention to it. The gentleman started out his argument, and when he ended up he had completed the circle and was arguing in a circle, and because he did not consider that clause as binding upon the House I considered that he had paid no attention to it. I am paying attention to it, because I believe it is conclusive and because the Congress of the United States has acted upon it. The act of March 2, 1909, provides:

Hereafter no new ambassadorship shall be created unless the same shall be provided for by act of Congress.

I ask the gentleman the question now, Does he contend that since the act of March 2, 1909, the President of the United States has the right to raise a minister to an ambassador? Does he contend that?

Mr. ROGERS. That is precisely what I contend, although it is not involved in this point of order.

Mr. BLANTON. Then, if he contended that, why did he concede the point of order raised by the gentleman from Virginia [Mr. FLOOD] as to the ambassador to China?

Mr. ROGERS. Because the President has not raised the legation to China to be an embassy. If he had, the point of order would have been bad.

Mr. BLANTON. Here was the situation, Mr. Chairman: There had grown up a system of going beyond the statute law of the country, and the Congress passed this act, and I want to call the attention of the Chair to this fact, that since the passage of that act of March 2, 1909, there has not been a minister appointed to any country except by authority of an act of Congress.

Mr. ROGERS. The gentleman is speaking entirely regardless of the facts when he makes that statement; there have been dozens of ministers appointed.

Mr. BLANTON. What ministers?

Mr. ROGERS. I do not know that I can name them all, but there is the minister to Finland, the minister to Czechoslovakia, the minister to Poland, the minister to Jugoslavia, and the minister to the Serbs, Croats, and Slovenes.

Mr. BLANTON. I am not talking about unauthorized appointments. I am talking about the authorized appointments. What minister has a President raised to an ambassadorship except by act of Congress? The appropriating committees frequently carry legislative items in an appropriation bill for years and years, and no Member raises a point of order to them and they remain in the bill so long that some members of the Appropriations Committee imagine that it is law, just as there are numerous items in this bill to which I expect to raise a point of order, and I expect to convince the gentleman from Massachusetts, not by his own investigation of law books but by the decision of the Chair that is to follow, that there are various items in the bill that are legislation on an appropriation bill and have no proper place in this bill.

Mr. ROGERS. I admit it.

Mr. BLANTON. That admission is worth something. Now, Mr. Chairman, I want to call the Chair's attention to the fact

that if the President of the United States now has authority under the Constitution to appoint a minister to any foreign country this Congress did not recognize that right in 1913. If it did, it wasted its time by introducing a bill and having it considered by the committee and passing it through the House and the Senate and sending it to the President to be signed, whereby he was authorized to send an envoy extraordinary and minister plenipotentiary to Paraguay and Uruguay.

Why was it necessary, I ask the distinguished gentleman from Massachusetts, for Congress to waste its time in 1913 in giving the President authority if he already has it under the Constitution? That act nowhere describes any salary, because the statutory salary is fixed by law. It was a mere act of creating these offices. I want to call attention to the fact that on May 22, 1872, and on March 3, 1875, Congress passed other acts creating various other offices, for ministers to be sent to other countries, to wit, Guatemala, Costa Rica, Honduras, Salvador, and Nicaragua. There are other acts providing for Haiti and Liberia.

The CHAIRMAN. Will the gentleman allow the Chair to ask him a question? Has there ever been any act expressly authorizing the appointment of a minister by the President?

Mr. BLANTON. Yes. Mr. Chairman, I have just cited several. For instance, the act of December 6, 1913, providing for the appointment of a minister to Paraguay and Uruguay, at a salary of $10,000. That was four years after the passage of the act that I have previously spoken of.

Mr. TEMPLE. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. TEMPLE. That was an act, was it not, authorizing the appointment at a certain salary?

Mr. BLANTON. Since then, in 1915, there was an act providing for salaries to all minor offices, even the office of secretaries and assistant secretaries and for every minor office with respect to foreign offices.

Mr. BEE. Will the gentleman yield?

Mr. BLANTON. I will.

Mr. BEE. I am asking the gentleman for information. The President of the United States is empowered to appoint ministers and ambassadors, and the President gives recognition to new countries. What is the procedure by which that matter is taken care of during the time that Congress is not in session?

Mr. BLANTON. I will answer my friend, and at the same time answer the point made by the gentleman from Massachusetts. The practice was for the President to recognize a certain country. They would send their representatives here to this country, and we would see to having an officer over there. Sometimes we would have a minister over there, and they would send us one that they called an ambassador. Under the old custom the President would immediately change the status of our minister over there to that of an ambassador. He would change an officer with a salary from $10,000 or $12,000 and make him an officer called an ambassador, drawing $17,500. That practice was kept up until it was stopped by Congress by the act of 1909.

Mr. TEMPLE. I would be very much interested if the gentleman would name some instances when this occurred.

Mr. BLANTON. I will say that the chairman of the committee can give the gentleman such instances, because he is on the Foreign Relations Committee, and, if I am not mistaken, he mentioned some such cases yesterday.

Mr. ROGERS. I did not understand the precise inquiry.

Mr. BLANTON. I say that where we had a minister in a country drawing $10,000 or $12,000 a year and that country sent to us an officer that they call an ambassador the President under such circumstances would sometimes change our minister to an ambassador, and Congress put a stop to it.

Mr. ROGERS. That was done as the result——

Mr. TEMPLE. The gentleman does not understand my question. The assertion was made that Congress put a stop to a practice that Presidents had already been following.

Mr. ROGERS. Oh, no; we never had an ambassador to any country at any time prior to 1893. In other words, this was to enlarge the authority of the President, not to restrict it. The statute of 1893 enlarged the Executive function and did not limit it or restrict it in any way.

Mr. BEE. Mr. Chairman, I do not think I made myself clear. What I had in mind was this: Suppose the new Congress is not called in extra session and does not meet until December, and in the meantime the new Executive, under the authority of the Constitution, recognizes a new country. What becomes of the question of the minister to that new country pending this interval?

Mr. BLANTON. The gentleman from Massachusetts mentioned the act of 1893, when I referred to the act of 1909. The minister is not an authorized minister under the law until the Congress authorizes his position by creating the office, in my judgment, answering my colleague from Texas.

Mr. BEE. In other words, Congress has to create the office, although we have recognized the country.

Mr. BLANTON. Certainly. The President can recognize their representative over here, but we do not have a representative over there until we create the office.

Mr. BEE. Then in order to avoid points of order made against these diplomatic bills must there be a specific act of Congress governing every detail of diplomatic intercourse between the United States and foreign countries?

Mr. BLANTON. All during the war, as stated yesterday, we had over here our ambassadors and ministers from countries with which we were engaged at war. They were drawing their salaries most of the time and performing no function except what labor they could perform around the Secretary of State's office.

Mr. BEE. They were not subject to criticism because of that fact.

Mr. BLANTON. Oh, no; but if Congress once creates an office——

Mr. BEE. In other words, the gentleman would not contend that if you have an ambassador to a foreign country and we become engaged in war with that country that we must, therefore, suspend the ambassador and turn him out to graze until we get on a peace basis.

Mr. FLOOD. Oh, the gentleman is mistaken, for that is just what did occur. The ambassadors did not stay here and draw their salaries. The ambassador to Germany went back to private life.

Mr. MADDEN. What about Mexico?

Mr. FLOOD. We were not at war with Mexico.

Mr. BLANTON. But during this time we did not recognize Mexico, but we had an ambassador here, and he was drawing $17,500 salary during that interval.

Mr. FLOOD. The statement which I undertook to correct was that made by the gentleman from Texas that the ambassadors to these countries with which we are engaged at war came here when the war broke out and simply did work around the State Department and drew their salaries.

Mr. BLANTON. Did not some of them do that?

Mr. FLOOD. No.

Mr. BLANTON. How long was it before they were put out of office?

Mr. FLOOD. Very shortly.

Mr. BLANTON. Can the gentleman tell me when the ambassador to Germany was put out of office?

The CHAIRMAN. If gentlemen will permit, the Chair would suggest that he does not think this discussion will enlighten the Chair on the point of order.

Mr. BLANTON. Mr. Chairman, I am glad that once in a while I find myself in hearty accord with the gentleman from Alabama [Mr. HUDDLESTON]. I think his position has been soundly and clearly put before the Chair when he laid down the fundamental proposition that you can not have an office of this character until Congress creates it, simply because the Constitution provides that the President shall make appointments to such offices as Congress shall prescribe. That does not do away with the function of Congress; it does not give the President the absolute power and authority to create offices himself. It is the Congress, after all, with which the power is lodged, and it must be exercised by affirmative acts.

Mr. BEE. Mr. Chairman, will the gentleman yield again?

Mr. BLANTON. Yes.

Mr. BEE. The gentleman from Illinois [Mr. MADDEN] injected into this discussion the question of Mexico. The gentleman does not consider that there is any parallel between the situation as between Mexico and the United States and as between Germany and the United States, because in the case of Mexico we were not at war; it was the mere question of the failure of recognition.

Mr. BLANTON. Oh, yes; but the Chair has intimated that that will not throw any light on this subject.

Mr. BEE. I did not want the record to remain silent, in view of the suggestion of the gentleman from Illinois that Mexico was a parallel case to Germany.

Mr. BLANTON. I am sure that notwithstanding his denial, our good friend from Virginia, Mr. FLOOD, will admit that long after we entered the war with Germany, Austria, and Hungary, and since recognition was withdrawn from Mexico, our ambassadors continued to draw their salary of $17,500 each, and did for quite a while. Could the gentleman tell us the date when they stopped?

Mr. FLOOD. No; I could not, but I think it was the day that his passports were handed in.

Mr. BEGG. Mr. Chairman, I desire to ask one or two questions of the gentleman from Massachusetts [Mr. ROGERS], the chairman of the committee. The first question I desire to ask is, Can a minister bind the United States officially and financially by his acts?

Mr. ROGERS. I should say clearly not.

Mr. BEGG. In other words, he can not officially bind the United States to anything.

Mr. ROGERS. Of course, a minister may be designated by the Executive to negotiate a treaty, and if the treaty is presented by the President to the Senate and confirmed and proclaimed, there may be there an ultimate recognition of obligation, but that is not the point in mind.

Mr. BEGG. That is not the point in mind. Is a minister to any country the official spokesman for his country in that other country, and are his acts binding on the country that he represents?

Mr. ROGERS. I should say that those are two questions. The answer to the first one is yes, and the answer to the second one is no. Leaving out of account such expenditures as rents and office supplies, and so on, which he is allotted by the Department of State—the gentleman does not mean that, I suppose?

Mr. BEGG. I am willing to bring it down for the purpose of the question, even to the allotment of rent, if the gentleman admits that.

Mr. ROGERS. I should say that if the Department of State allots to our ambassador to Rome, we will say, some $2,000 for rent, the ambassador has a right to negotiate a lease which will bind the United States to pay that amount of rent.

Mr. BEGG. Very well. Then the next question I want to ask is this: Suppose that John Smith is appointed ambassador to Rome and is confirmed by the Senate, and that the House refuses to appropriate any money at all for his salary, can he then go over there and obligate the United States for rents?

Mr. ROGERS. Well, within the limitation that the amount must be allocated by the Department of State.

Mr. BEGG. I am granting there is allocated $2,000.

Mr. MANN of Illinois. That is an appropriation already made.

Mr. ROGERS. That is an appropriation already made.

Mr. BEGG. The point I would like to have the gentleman's opinion on is, can such a man, simply because there was a refusal of appropriation for salary, go and spend that as an ambassador?

Mr. ROGERS. Well, on the terms I have suggested I think he can.

Mr. MANN of Illinois. He can spend his own money.

Mr. BEGG. I am talking about spending the Nation's money, not any individual's money.

Mr. ROGERS. As far as practical now the Department of State does not allow our representatives abroad to negotiate leases or other contracts in the name of the United States.

Mr. BEGG. Well, that is very true, but officially and actually they are the official representatives of the United States Government. I simply set up, Mr. Chairman, this proposition: If an ambassador fails to have an appropriation for his salary, that is sufficient notice that the House refuses to recognize him as an ambassador or minister.

Mr. SUMNERS of Texas. Will the gentleman yield?

Mr. BEGG. In just a moment I will be glad to yield—and by such refusal they abrogate his appointment——

Mr. WINGO. Will the gentleman yield?

Mr. BEGG. Just as forcibly and just as surely as if the Senate should refuse to confirm the appointment.

Mr. WINGO. Will the gentleman yield for a question?

Mr. BEGG. Just one more sentence and then I will yield. In other words, I am not one who is willing to concede that the President of the United States can appoint an ambassador and minister where he will and when he wants to. [Applause.] He might just as well appoint an automobile inspector at $10,000 a year, or a sheep inspector for any State in the Union, or an ambassador to any country that is not now entitled to one. There is certainly in the framing of the Constitution the intent if not the exact language that this body was to serve as a check on the other body's running wild, and there is not anybody who denies that, and yet that is the whole claim against the point of order. I am in entire sympathy with the desire of the legislation, but I am not in sympathy with the argument that is made—that the Constitution gives the President absolute right to do what he will. The mere enumeration of names does not give him authority to put an ambassador in Peru or in Mexico or China. I now yield to the gentleman from Texas.

Mr. SUMNERS of Texas. Suppose the people when they came to adopt the Constitution should have decided that the diplomatic affairs of their Nation was in the first instance to be vested in their President, that the selection of diplomatic representatives was to be vested in the President subject to the approval of the Senate. Why, then, does not the gentleman think as a general proposition the people acted fairly wisely, or, if they acted foolishly, the House can not now question the wisdom of their action?

Mr. BEGG. In reply to the gentleman, I am certainly of the opinion that the House has a perfect right to-day to put its construction upon any proposition in the Constitution, just the same right that they had immediately after it was adopted. There is not any more surrender of this privilege or right now than in 1790.

Mr. SUMNERS of Texas. Will the gentleman yield right there?

Mr. BEGG. I will be glad to yield.

Mr. SUMNERS of Texas. Does the gentleman mean by that statement that this body has the power to construe such power as it desires to the written Constitution, or that it must construe it as it is written?

Mr. BEGG. That is hardly on the point of order, but I will say in answer to the chairman that I have discovered in this bill that 75 per cent of it is the result of habit. It is not constitutional law and it is not constitutional, it is merely habit; and the argument is that the foreign relations must have elasticity about it, and that is exactly the excuse that has been offered for the filling up of this kind of a bill.

Mr. MONTAGUE. Mr. Chairman, a parliamentary inquiry.

Mr. BEGG. I do not care to yield. I want to make one more statement, and then I will yield the floor.

Mr. MONTAGUE. Mr. Chairman, I respectfully suggest that the gentlemen are not discussing at all the point of order.

Mr. BEGG. I acknowledge the correction without any question.

Mr. MONDELL. Mr. Chairman, the Chair has been very kind and considerate. The Chair has had this matter under consideration for some time, and I wondered whether or no the Chair was prepared to rule?

The CHAIRMAN. The Chair will rule when he thinks it is his duty to rule. [Applause.]

Mr. MASON. Mr. Chairman, I did not hear the remark of the Chair. I am a member of the committee and have been waiting for two days to be heard on this point of order. I desire to be heard for not over five minutes.

The CHAIRMAN. Has the gentleman from Ohio finished?

Mr. BEGG. I want simply to call the attention again to this proposition: If this body refused to appropriate a salary for any official, that official's appointment by the President has no weight or standing at law, and because of that fact the argument of the gentleman from Massachusetts [Mr. ROGERS], chairman of the committee, seems to me would not be sound in reference to the point of order.

The CHAIRMAN. As has been suggested, this debate has run for a long time, and the Chair wants to give it intelligent and careful consideration, but the Chair will ask gentlemen to be just as brief in the presentation of this case as they possibly can. The Chair recognizes the fact that there are some members of the committee who are entitled to consideration and recognition upon a very important point of order. The Chair merely requests the gentlemen to be just as brief as possible in their argument, because we have already consumed a very large amount of time.

Mr. CONNALLY. Mr. Chairman, I recognize the pertinency of the remarks of the Chair, and shall try to be brief in what I have to say upon the point of order. The point of order is that there is no authorization under the law permitting Congress to make an appropriation as set forth in this paragraph of the bill.

The Constitution has already been quoted to the Chair, and I shall not repeat it. But I do desire to call the attention of the Chair to the fact that the following language in the Constitution, "whose appointments are not herein otherwise provided for and which shall be established by law," refers to public officers not denominated specifically in the Constitution in that particular clause. That language refers to offices or positions other than those named in that section. In that section ambassadors and public ministers are named. So that the Constitution itself creates the offices of ambassador and public minister. It must be borne in mind that at the time the Constitution was adopted the functions of public ministers and ambassadors were well understood throughout the world, and it must be presumed that Congress when it adopted the language "ambassadors and public ministers" had in mind officials whose functions and duties were then understood among the laws of nations. Now, the point of order is that there is no statute law authorizing this expenditure. The Constitution is just as much

the law as a statute. A treaty is just as much the law of the land as a statute. If we had before us an item appropriating $250,000, we will say, to pay the Republic of Panama an installment on the purchase of the Panama Canal site there would be no question in the Chair's mind that the treaty is an obligation of this Government and is a law of the land and that no statute would be necessary to authorize that expenditure. Under the Constitution the President has the absolute power to appoint ambassadors and ministers, or whatever you may desire to call them, to represent the Executive in negotiating with foreign Governments and transacting the business of this Government with foreign nations.

When a bill comes before the House carrying an appropriation a point of order is made that it is not authorized. Let us take, for instance, an appropriation to buy or to pay for a piece of property. The point of order is that nobody under the law outside of that carried in the appropriation bill would have power either to take charge of that material on behalf of the Government or to purchase it, and, of course, unless some statutory or constitutional authority warranting the purchase of such property exists the item goes out on a point of order. The point of order is made to an appropriation providing a salary for an office in one of the departments, and if it is shown that there is no statutory authority for that office it goes out, because there is no law authorizing anybody to employ or appoint such an officer.

But here we have the constitutional authority for the President to incur the services of a minister or other representative by sending that minister or representative to a foreign country. If he has any legal right to be there, if an ambassador or a minister has any legal right to be in a foreign capital and to represent the United States Government, then this Congress is authorized to appropriate money for those services. There is no question but that this matter has been treated by the Senate itself, which is always jealous of the executive power, as coming peculiarly within the function of the Executive. Some years ago in the Senate there was a discussion of this question, and Senator Spooner made the following observation. It is very brief, Mr. Chairman, and I want to read it. It may be persuasive, at least:

Mr. SPOONER. Could the framers of the Constitution any more clearly have made the President the sole organ of communication between this Government and foreign Governments than they did? Of course, the power to receive an ambassador or a foreign minister implies necessarily the power to determine whether the Government or country from which he comes is independent and entitled to send an ambassador or a minister. So the President is authorized to determine—

And this is the crux of the whole matter—

So the President is authorized to determine, and he must determine, when he sends an ambassador or a minister to some other country, whether that country is an independent country, a member of the family of nations, entitled to be represented by an ambassador or minister here and entitled to receive an accredited ambassador or minister from this country. When the ambassador or the minister has any communication to make in relation to foreign affairs, he does not make it to the Senate—

And so forth.

The view, Mr. Chairman, has been reflected in debate and discussion in the Senate during a long period of years, that it is the peculiar function of the President under the Constitution to determine when a country shall be recognized, when he shall send a minister or an ambassador, and when that question is determined he then, under the Constitution, has a constitutional right to appoint an ambassador or a minister to that country.

Mr. BLANTON. Will my colleague yield?

Mr. CONNALLY. In just a moment.

And deriving that authority from the Constitution itself, the highest authority, there only then remains the question whether Congress shall or shall not appropriate the money to provide a salary. Of course, Congress may withhold the appropriation for the salary, but the fact still remains that the diplomatic officer is a representative of this Government, holding his title under the Constitution; that he is authorized to act in diplomatic matters for this Government; and that the Congress possesses the most solemn authorization to appropriate the money to pay his salary as such an officer.

Mr. BLANTON. Now, will my colleague yield?

Mr. CONNALLY. I yield to the gentleman.

Mr. BLANTON. The eighteenth amendment to the Constitution prohibits the manufacture and sale of liquor within the borders of the United States. Does my colleague take the position that an appropriation committee could appropriate $100,000,000 to enforce prohibition until the Volstead statute had been passed providing the machinery for carrying out the constitutional provision? It was the Volstead statute which gave authority to the appropriating committee to appropriate money to carry that constitutional provision into effect.

Mr. CONNALLY. The constitutional amendment, I will say to the gentleman, prohibited the importation and sale of liquor, but it carried no penalties and set up no machinery for enforcement. It was, therefore, not self-enacting.

Mr. HUSTED. The Constitution provides that Congress must legislate.

Mr. CONNALLY. Of course Congress had to legislate in order to make it effective. I am sure the gentleman from Texas would never have been content to have rested on the Constitution without the Volstead Act as a statute.

Mr. WINGO. And the eighteenth amendment does not authorize the President to appoint an enforcing officer.

Mr. CONNALLY. Of course that is correct, I will say to the gentleman from Arkansas.

Mr. MASON. The Constitution, as I think the gentleman has shown, provides the machinery. It does not need special legislation.

Mr. CONNALLY. The gentleman is quite correct. The Constitution recognizes and creates these offices and authorizes the President to fill these offices by making the appointments, and there is nothing else for Congress to do except either to appropriate or to withhold appropriations as it sees fit; but as to its authority to make them, there can be no question.

Mr. TEMPLE. Mr. Chairman, I think I can say all I wish to say in about three minutes.

The question pending, of course, is a point of order against a provision in an appropriation bill calling for appropriations to pay salaries of ministers to certain countries which recently came into existence as the result of the World War. The point is made that there is no statutory authority, no lawful authority for the appropriation. I think the gentleman from Texas [Mr. CONNALLY] and the chairman of the committee [Mr. ROGERS] have shown that the authority of the President in appointing diplomatic officers to represent the United States in these countries arises from the Constitution and is not dependent upon a specific statute. I do not wish to spend time upon that which has already been clearly established, but to call attention to another consideration which should not be lost sight of in deciding this point of order.

In the appointment of diplomatic representatives, as in the making of a treaty, the action of the President when confirmed by two-thirds of the Senate is final. If the treaty promises payment of money by the United States, the House may indeed have the right to refuse to appropriate money for that purpose, but no point of order would lie against the proposal to make the appropriation; the treaty is itself full authorization in law. In the cases we are now considering the President has exercised his constitutional authority by appointing diplomatic representatives to Poland, Czechoslovakia, and the Kingdom of the Serbs, Croats, and Slovenes, and their appointment has been confirmed by two-thirds of the Senate. This state of affairs is not new; a year ago this House made appropriation to pay the salaries for these officials. They are performing their duties and their salaries are being paid.

Their appointment by the President and confirmation by two-thirds of the Senate affords as full authority for the appropriation committee to provide for their salaries as would have been the case if the exchange of such diplomatic representatives had been provided by treaty between the United States and these countries. As a matter of fact, representation by diplomatic officers is reciprocal; we receive a representative from Poland and we send a diplomat of like rank to represent the United States in Poland. It is the usual thing that an understanding exists between the two Governments that such an exchange of representatives shall be made. Such an understanding or Executive agreement for an interchange of diplomatic representatives, when it has been confirmed by two-thirds of the Senate by consenting to the actual appointment, is certainly lawful authority for appropriating money to pay the salary of the officers so appointed.

Mr. MASON. Mr. Chairman, the Constitution, as suggested by my colleague on the Committee on Foreign Affairs [Mr. CONNALLY], absolutely provides the law and the machinery by which a minister or ambassador or other representative may be appointed. I just simply wish to suggest in support of the argument made by the chairman now in control of this bill, that when the President of the United States exercises his constitutional right to name a minister and the Senate approves the man, then the House is authorized to pass an appropriation, whether it has passed any specific legislation creating that office or not. That office was created by the Constitution itself.

Now, just one moment, and I shall conclude by calling attention to what seems to be an error on the part of gentlemen on both sides as to the right, the sole right, of the President to

initiate matters of recognition. I address myself to the Chair, who seemed to agree yesterday with the statement made by my friend from Massachusetts [Mr. ROGERS], who has this bill in charge, that the President has the sole right to initiate business relations or recognition of a foreign State. That was the contention of President Wilson in his lectures, and it has grown to be a habit, but it is not the law. Rawle, who is considered, I think, one of the sound writers on the Constitution, says that the right of recognition is greater in the legislative body than in the Executive, because the Executive has not the power to declare war and the legislative body has, and therefore the right of recognition of a new State, which may be a casus belli, is larger within the legislative body than in the Executive.

Daniel Webster, speaking on a resolution asking for appropriations to send representatives to Greece in 1823, nearly a hundred years ago, made an argument which, it seems to me, is conclusive—that the House must agree before there is a complete recognition. This is true. Mr. Clay offered, not a resolution but a direct appropriation for the appointment of a minister—that was in about 1819—to Buenos Aires; and, if his contention is correct—and I think it is—then the recognition of a State is a governmental function, and not solely an Executive function. It was claimed to be solely an Executive function by President Jackson on the recognition of Texas; but after the passage of resolutions by Congress President Jackson changed his mind, and recognized the Republic of Texas about 10 days before he went out of office.

What I want to get into the mind of the Chair in ruling is this, if I have made myself clear: That we do not need any legislation except the act of passing an appropriation; that the highest law of the land is the Constitution itself, which allows the President to name officers and create those officers by name, and the President and the Senate having agreed upon the officer, and the passage, then, of the resolution having been effected, it is not compelling; but, as my associate on the committee says and as Mr. Clay and Mr. Webster said, it is persuasive; it is a moral obligation upon this House, the same as if a treaty agreement had been negotiated by the President and ratified by the Senate. There would be a moral obligation, although not a conclusive obligation.

In this case, if the Chair please, I wish to enter my protest against what seems to be the conclusive agreement that the President alone had the power. At the time Mr. Webster and Mr. Clay offered their resolutions for appropriations, the argument was clear that the House on its own initiative can pass an appropriation for countries that never had been recognized; not that it is conclusive with the President, but that the power is with the legislative branch to initiate the proceeding.

The CHAIRMAN. The Chair is ready to rule.

The point of order made by the gentleman from Texas [Mr. BLANTON] is that there is no legislation authorizing an appropriation for the payment of the salary of an envoy extraordinary and minister plenipotentiary to Finland, to Turkey, and to the Kingdom of the Serbs, Croats, and Slovenes.

It is admitted, I think, by all that there is no statutory authority which authorizes these appropriations. It is contended, however, that there is constitutional authority, because the Constitution provides that the President may appoint envoys extraordinary and ministers plenipotentiary, and that having exercised that power of appointment, the superior law of the Constitution authorizes the House, without statutory authority, to make the appropriation.

The authority of the President with regard to diplomatic matters is exclusively committed to him and is not shared in any particular, except by the provision of the Constitution which says that with regard to treaties two-thirds of the Senate must concur and that with regard to diplomatic appointments they must be confirmed by the Senate.

Regarding the power of the President in relation to diplomatic matters the Chair desires to cite McClain's Constitutional Law in the United States, page 218, which states somewhat strongly, but perhaps with entire justification, the international law as well as the constitutional law of the country with regard to this exercise of power by the President:

Toward foreign powers—

He says—

the United States collectively constitute one single power, represented by the Federal Government, and the relations between that Government and foreign Governments are through the executive department and in the name of the President as Chief Executive.

Congress can not deal with foreign powers, and the courts can only take cognizance of their existence and rights by recognizing, interpreting, and applying the action of the executive department, evidenced by treaties or otherwise. The action of the executive department in determining in a controversy with a foreign Government whether certain territory is territory of the United States can not be interfered with by the courts. (See Jones *v.* United States.) So also it is for the executive department to determine whether this Government will recognize as an independent sovereign power a foreign State claiming such recognition. In short, the entire diplomatic relations between this and other countries are under the control of the Executive; and the action of the Executive in such matters is binding upon Congress, the courts, and all Federal and State officers.

The gentleman from Illinois [Mr. MASON] says that Congress has passed resolutions which in effect recognized foreign Governments. The Supreme Court of the United States has said that the President has the sole power of recognition. However, there is no real difference between them, because, after all, if the President shall appoint an ambassador or a minister, and Congress shall refuse to appropriate for him, there can be no exercise of the power of the President. He has done his duty. Congress perhaps have done theirs, but they negative each other in practical effect. And so it is with regard to recognition by Congress. Congress may pass an act recognizing any country struggling for independence; and I will say that Congress might even go further and authorize the appointment of an ambassador or a minister and make an appropriation for that purpose. All these things might be done, but if the President did not appoint the ambassador or the minister, diplomatic relations between those countries could not exist.

Of course, in these cases it is possible for the President, under the constitutional authority, to appoint an ambassador, or a minister, if he chooses to do so. He should know, however, that Congress will sanction his action in the appointment by appropriating for its support before it can be effective.

Congress in 1809 passed an act to the effect that the President should not appoint ambassadors except upon the authority of Congress. That had no effect upon the constitutional power of the President. He could make such appointments nevertheless, but it did have the practical effect of serving notice upon the President that thereafter he must not make ambassadorial appointments except upon the authority of the Congress of the United States. So that the practical effect of that legislation was what I have stated, although it might be considered that that act was absolutely unconstitutional, because it encroached upon the prerogatives of the President of the United States. Now, in this case, coming down to the practical application of these principles, let us see how it leaves us with regard to Turkey. There is statutory authority for the appointment of an ambassador to Turkey. There is, however, no statutory authority for the appointment of a minister to Turkey. In the past there have been appointments of ambassadors to Turkey who have served, but at this time there is not only no ambassador appointed, there has been no minister appointed, and no diplomatic relations whatever exist between the two countries. It can not be said that the appointment of a minister would rest upon the statutory authority to appoint an ambassador. Neither can it be said that it rests upon the President's act in appointing a minister, because he has not appointed a minister; so that it seems to the Chair that with regard to this particular item the point of order made by the gentleman from Texas is good, and the Chair sustains it.

With regard to the other propositions, however, the Chair is of the opinion that there is ample constitutional authority for the power which has been exercised by the President both in the case of Finland and in the case of the appointment to the Kingdom of the Serbs, Croats, and Slovenes. In these cases the President has made the appointments, and both of these appointments have been confirmed by the Senate. So it would seem to the Chair that there is ample authority in law for the Congress, if it desires to do so, to appropriate for the payment of their salaries.

Therefore the point of order raised by the gentleman from Texas with regard to these two items in the bill as to those two countries is overruled. [Applause.]

Mr. ROGERS. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. ROGERS: Page 2, line 10, after the word Bulgaria," insert "Czechoslovakia."

Mr. ROGERS. Mr. Chairman, I will simply say that this puts where it is authorized, under the decision of the Chair, the salary of a minister to Czechoslovakia, which was stricken out because it appeared in the $12,000 paragraph yesterday afternoon.

Mr. WINGO. Mr. Chairman, as the present occupant of the Chair knows, I have great respect for his ability and knowledge of parliamentary law, but I feel constrained to say that the decision that the jurisdiction and authority of the Congress to appropriate the public revenues depends in any case upon an act of an executive officer, and not upon the law, is not sound in my judgment, and against such a decision I respectfully, yet earnestly, enter a protest. I think the jurisdiction of Congress to appropriate rests on law, either statutory or constitutional, and

no President can by an act of either omission or commission rob this House of that jurisdiction.

Mr. TEMPLE. Will the gentleman yield? The gentleman would also include a treaty?

Mr. WINGO. Oh, yes.

Mr. TEMPLE. Is not the agreement executed between the United States and Czechoslovakia concerning the exchange of ministers, which has been confirmed by two-thirds of the Senate, an agreement in the nature of a treaty?

Mr. WINGO. Yes; and treaties are the supreme law of the land; and following from that is the constitutional power of Congress to make appropriations incidental to them.

Mr. TEMPLE. And the facts in this case are as described?

Mr. WINGO. Yes; I say that with great respect to the judgment of the Chair, and only because the decision undertakes to fix the appropriating jurisdiction of Congress by an act of the Executive, and not by constitutional or prior statutory authorization.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts.

The amendment was agreed to.

Mr. ROGERS. Mr. Chairman, I offer a further amendment.

The Clerk read as follows:

On page 2, line 13, after the word "Paraguay" insert the word "Poland."

Mr. ROGERS. This is exactly the same as the prior amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts.

The question was taken, and the amendment was agreed to.

Mr. ROGERS. Mr. Chairman, I offer a further amendment.

The Clerk read as follows:

On page 12, line 16, at the end of the line insert a new paragraph as follows:

"For ambassador extraordinary and plenipotentiary to Turkey, $10,000."

Mr. BLANTON. Mr. Chairman, I make the point of order that the amendment offered by the gentleman from Massachusetts is not germane to the immediate preceding paragraph. That is the rule that has been upheld until the other day—in one instance it was overruled—almost without any contest for 40 years, since it was first decided by Speaker Carlisle. It has been upheld by the Committee of the Whole House uniformly. In only one instance, and that was the other day, has it ever been questioned.

The chairman of the Appropriations Committee has no more authority than any other Member of the House to offer an amendment from the floor that is not germane to the immediate preceding paragraph. Now, if the gentleman from Massachusetts had offered this amendment to the first paragraph on page 2, it would have been germane, but the first paragraph on page 2 has been passed, and the second has been read and passed, and the third paragraph, which has nothing to do with an ambassador, and neither has the second, immediately preceding, anything to do with an ambassador. I make the point that it is not germane to the present paragraph or to the immediate preceding paragraph.

Mr. ROGERS. Mr. Chairman, I shall take but little time in this connection. I want to call the attention of the Chairman to the analogy of the situation with reference to China yesterday. China was recommended for an ambassador, at $17,500. The point of order was made and sustained. The chairman of the committee in charge of the bill was immediately enabled to offer an amendment, which was held in order and carried, taking care of China, in the second paragraph.

It seems scarcely logical or sensible that this case, which presents the reverse order, merely should prevent caring for Turkey in the manner in which I speak of it, as she ought to be cared for, simply because of the order of the items on the appropriation bill.

This entire page is entitled "Salaries of ambassadors and ministers," and in line 23 it carries a single total of all items printed on the page. It seems to me that the salaries should be treated as a separate category, entitled to separate treatment and separate paragraph, because it is the only place in the bill where an ambassador is given a salary of less than $17,500.

Mr. BRITTEN. Will the gentleman yield?

Mr. ROGERS. Yes.

Mr. BRITTEN. Is not his amendment in the nature of a sequence to the entire paragraph?

Mr. BLANTON. Mr. Chairman, I make this suggestion: That the point of order is made to the amendment that the amendment is not germane to the paragraph. The Chairman has no more authority than anybody else; that it has been upheld by such distinguished Chairmen as the gentleman from Tennessee [Mr. GARRETT] and the gentleman from Massachusetts [Mr. WALSH] and the gentleman from Connecticut [Mr. TILSON], and I submit that there are three no better parliamentarians in this House. I submit to the Chair that the Chair ought not to carelessly decide a question of this kind on expediency.

Mr. MANN of Illinois. Mr. Chairman, if this amendment had been offered on page 29 it probably would not have been in order, because it would not have been germane to that portion of the bill. The only question here is whether it is germane to this part of the bill.

It could not have been offered as an amendment to the first paragraph on this page by merely an insertion of the word "Turkey," because it is not at the salary carried in the first paragraph of the bill. It might have been offered between the first two paragraphs of the bill. Then the question would come whether you would grade the paragraphs in the bill by the name or by the salary. It is not essential to follow the form of the bill and arrange these names alphabetically. That is the common practice, probably desirable, but not at all essential. This paragraph comes in at the place following the $10,000 salaries, and it is certainly germane to that particular place in the bill. It is certainly germane to any place under the item providing for salaries of ambassadors and ministers.

The CHAIRMAN. The point of order made by the gentleman from Texas [Mr. BLANTON], as he states it himself, regards the amendment as an amendment to the paragraph. The gentleman from Massachusetts [Mr. ROGERS] offers his amendment in a separate paragraph.

Mr. BLANTON. But, Mr. Chairman——

The CHAIRMAN. The Chair does not desire any further enlightenment, and he is not passing upon the question carelessly. The Chair is giving full consideration to the argument of the gentleman from Texas. The only question, as suggested by the gentleman from Illinois [Mr. MANN], is as to whether or not it is properly within this branch of the bill. Is it within this title of "Salaries of ambassadors and ministers"? Of course it is. The ambassador paragraph already passed was not necessarily exclusive. It was perfectly proper that an amendment should have been offered to that, or it is proper to offer it as a separate paragraph, because of the fact that in the prior paragraph the salary is fixed at $17,500 for all of the countries therein enumerated. In this case provision is made for an ambassador, but the salary is limited to $10,000. Therefore, the point of order made by the gentleman from Texas is not sustained.

Mr. BLANTON. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BLANTON. Do I understand the Chair is to rule that an amendment following a certain paragraph which is offered from the floor as a separate paragraph is not a part of the paragraph immediately preceding it, is not an amendment to the paragraph immediately preceding it?

The CHAIRMAN. A separate paragraph is certainly not a part of the paragraph that precedes it.

Mr. BLANTON. I just wanted to call the attention of the Chair to the numerous unbroken decisions of the committee to the opposite effect, that any amendment, even though offered as a separate paragraph, is yet an amendment to the preceding paragraph.

Mr. MANN of Illinois. Mr. Chairman, I have been in the House a long time, and this is the first time that I ever heard that doctrine announced.

Mr. BLANTON. Oh, I can show the gentleman numerous decisions.

The CHAIRMAN. The Chair does not desire to hear any further argument. The question is on the amendment offered by the gentleman from Massachusetts.

The amendment was agreed to.

The Clerk read as follows:

Minister resident and consul general to Liberia, $5,000.

Mr. MASON rose.

Mr. BLANTON. Mr. Chairman, I make the point of order to the paragraph.

The CHAIRMAN. The gentleman will state the point of order.

Mr. MASON. Just one moment. I have an amendment which I desire to offer.

Mr. BLANTON. The point of order would precede the amendment.

Mr. MASON. But I have an amendment which had not yet been announced by the Clerk, and I make the point that the Clerk is now reading beyond the sixteenth line. I gave notice that I wanted to offer an amendment in the fourteenth line. I move to insert, after the word "Switzerland"——

The CHAIRMAN. The Chair would state that the committee has already passed that.

Mr. MASON. I addressed the Chair. I am a member of the committee, and was waiting for the chairman of the committee to finish his amendments.

The CHAIRMAN. Was the gentleman asking for recognition after we had passed line 16?

Mr. MASON. Yes; I rose and asked the attention of the Chair.

The CHAIRMAN. Before the seventeenth line was read?

Mr. MASON. Before the seventeenth line was started. I was addressing the Chair at that time.

The CHAIRMAN. If that is the case, the Chair, of course, would be glad to recognize the gentleman.

Mr. MASON. I offer to amend, in line 14, page 2, after the word "Switzerland," by inserting the words "the Republic of Ireland."

The CHAIRMAN. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 2, line 14, after the word "Switzerland," insert the words "the Republic of Ireland."

Mr. BLANTON. Mr. Chairman, I make the point of order on that.

Mr. ROGERS. I make the point of order on the amendment.

Mr. MASON. Mr. Chairman, just give me one minute.

Mr. CONNALLY. Mr. Chairman, I ask unanimous consent that the gentleman may be allowed to speak for five minutes.

Mr. WINGO. What is the point of order?

Mr. ROGERS. I am willing to reserve the point of order for five minutes.

The CHAIRMAN. The gentleman will please state his point of order.

Mr. ROGERS. The point of order is that there is no authority of law for the item and no Executive recognition.

Mr. MASON. Mr. Chairman, I shall not take over two or three minutes. I realize that if the ruling is still to be held that the Congress of the United States has no power to make an appropriation preceding Executive action, that point of order must be sustained; but I desire to call the attention of the Chair, without reading at length, to the argument of Henry Clay, who offered to make the appropriation upon the ground that the initiation of the recognition as a new State might be by the legislative branch or by the executive branch

He offered a direct appropriation—such as I have offered here—for Buenos Aires. It was the same argument made by Mr. Webster in his effort to pass an appropriation in advance; and without reading their arguments, which I have here, it was, in substance, this: It is true that the President has the power to initiate by appointment. As he relies upon the House and upon the Congress to pass an appropriation, it is equally just and true that the House may initiate this proceeding by making an appropriation. That was the plan followed before the recognition of the Republic of Texas. The Congress was in favor of recognizing Texas. Andrew Jackson was opposed to it, and there never was an appointment made by the President until after Congress had acted. President Jackson received the first minister from Texas, a man named Alcase Le Blanc, 10 days before he went out of office after Congress had passed an appropriation for the recognition.

Mr. CONNALLY. Will the gentleman yield?

Mr. MASON. I will.

Mr. CONNALLY. This appropriation will not become effective until the 1st of next July. Has the gentleman the assurance of the incoming President that Ireland will be recognized in case we adopt this? [Applause.]

Mr. MASON. I have no assurance except that which God Almighty gave me, and it has gotten me into much trouble from time to time. [Laughter.] But never the gentleman from Texas. I have hopes, but I do not know this, that the present Executive is not inclined to assist in the recognition of the Republic of Ireland. I believe they have a de facto government. They are assuming and performing governmental functions. The Government of Great Britain has lost sovereignty over the people of Ireland. It is conceded they have lost sovereignty. The Government of Great Britain has adopted there the policy of retaliation and reprisal, just as the Spaniards did in Cuba, which is conclusive evidence that they have lost sovereignty. When they can not punish or find men they charge with being guilty, they burn homes and slaughter innocent people in reprisal for the conduct of men they can not find. It is just the same as the British Government did when they burned this Capitol here; because some Irish Yankee or Yankee Irishman shot a musket and killed an Englishman's horse, they burned this Capitol upon the theory of reprisal.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MASON. Now, I think, Mr. Chairman, that this Congress is the body to make this appropriation. There is a question, of course, of policy, if the Congress is opposed to it, but I do not think it ought to go out on a point of order.

The CHAIRMAN. Does the gentleman from Massachusetts desire to make the point of order?

Mr. ROGERS. I make the point of order, Mr. Chairman.

The CHAIRMAN. The point of order is sustained. Let the Chair say to the gentleman from Illinois that it would be, in the judgment of the Chair, proper for the Congress to consider a resolution recognizing the independence of Ireland or any other country. We are proceeding now, however, in the consideration of an appropriation bill which precludes the adoption of any amendment which is not authorized by existing law, and as there is no existing law that will allow this appropriation and as the President of the United States has not so far seen fit to recognize the Republic of Ireland, there would be no authority either by statute or under the Constitution for this appropriation. The Clerk will read.

The Clerk read as follows:

Agent and consul general at Cairo, $7,500.

Mr. BLANTON. Mr. Chairman, I made a point of order to line 18, agent and consul general at Tangier, $7,500. Before the gentleman made his amendment to the preceding paragraph I made the point of order to it, and the Clerk has not again read it.

The CHAIRMAN. What is the point of order?

Mr. BLANTON. I make the point of order that there is no authorization of law for a consul general at Tangier with a salary of $7,500, that the President has made no such appointment, and therefore no such appointment has been confirmed by the Senate of the United States.

Mr. ROGERS. Mr. Chairman, section 1674 of the Revised Statutes enumerates the various officers in the foreign service who shall have the title of "agent" and provides that the title of "agent" shall be deemed a diplomatic office. Therefore, in view of the enumeration of section 1674, we have the right to send such a diplomatic officer to Tangier. As such agent, he exercises diplomatic functions. This particular officer also performs consular functions. While he is a diplomatic officer, in order to make clear the duplex nature of his duties he is called agent and consul general. The bill carries a salary of $7,500, and that salary is given to him on the theory that for salary purposes he is a consular officer.

Taking the Revised Statutes, 1674, in conjunction with the act of February 5, 1915, I submit that this item is in order.

Mr. CONNALLY. Will the gentleman from Massachusetts yield?

Mr. ROGERS. Yes.

Mr. CONNALLY. Why is this proposition not in order on the ground that the President can appoint consuls? The Chair has already ruled that there was constitutional authority for the President to appoint ambassadors, ministers, and consuls, and this officer is a consul general, and certainly comes within the term of "consul." But, independent of the statute, the President has authority to appoint him, and if the President has that authority the Congress has authority to appropriate money.

Mr. ROGERS. I think that is true.

The CHAIRMAN. As a matter of fact, does the appointment remain?

Mr. BLANTON. That is the trouble, Mr. Chairman.

Mr. ROGERS. Mr. Chairman, the consul general at Tangier, who was appointed in 1915, is Maxwell Blake.

Mr. BLANTON. And he is the gentleman that would draw a salary of $3,600.

Mr. ROGERS. So far as I know, there is no provision for the agent to draw a salary of $3,600. He is carried in the United States Consular Handbook as consul general.

Mr. BLANTON. That is a recent thing, without authority of law.

Mr. ROGERS. The handbook is dated September 1, 1920. The gentleman does not criticize it, does he, because it is so recent?

Mr. WINGO. Mr. Chairman, I think the point of order is not well taken, for the reason that the Constitution authorizes the appointment by the President of ambassadors, ministers, and consuls, and that provision of the Constitution constitutes the authority of law under which Congress appropriates or makes available the money to pay the salaries of the men appointed. That is the only authority the Congress has, with the exception, of course, that the appointment has to be confirmed by the Senate. Congress exercises this sole power of making available specific sums to pay the salary in a specific instance, not by authority of a prior legislative act nor by reason of action of

the President, nor failure of action by him, but solely and alone by the implied authority found in the constitutional provision referred to. Even if Congress has by law provided for an agent, that law did not contravene the power of the President to appoint a consul at Tangier, nor did such an act take away the permanent implied constitutional powers of Congress to make available a specific sum to cover the salary of a consul already or hereafter appointed. No limitation or provision is in the Constitution fixing the salary. Congress, by implication, of course, can not only make the funds available but fix the amount to be used in payment of the salary of the men appointed to each office.

The CHAIRMAN. The point of order is not sustained.

Mr. BLANTON. Mr. Chairman, I submit the Senate has not received any notification whatever of this office.

The Clerk read as follows:

SALARIES OF SECRETARIES IN THE DIPLOMATIC SERVICE.

For salaries of secretaries in the Diplomatic Service, as provided in the act of February 5, 1915, entitled "An act for the improvement of the foreign service," as amended by the act making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1917, approved July 1, 1916, and the act making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1921, approved June 4, 1920, $354,000.

Mr. BLANTON. Mr. Chairman, I make a point of order against the paragraph for the following reason: The only statute authorizing these salaries is the act of February 5, 1915. These other acts cited in the paragraph are merely appropriation bills, passed from time to time by the House. And in the act of February 5, 1915, the salaries authorized to be carried by that act total only $186,000. Now, as against that the committee has authorized the appropriation of $354,000, and I submit, Mr. Chairman, there is no authority of law for it.

Mr. ROGERS. Mr. Chairman——

The CHAIRMAN. The point of order is not sustained. The Chair would suggest to the gentleman that he might reduce the amount by amendment.

Mr. BLANTON. I submit that these are statutory positions, Mr. Chairman, and that the committee has no authority for inserting this increase from $186,000 to $354,000.

Mr. HICKS. Mr. Chairman, I ask for the regular order.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Japanese secretary of embassy to Japan, $5,500.

Mr. BLANTON. Mr. Chairman, I make the point of order that there is no such position authorized by law, and the reason I make it is that the only provision ever carried was $3,600. Since the committee has raised it to $5,500, I make the point of order against it. It is not authorized by law.

The CHAIRMAN. The point of order is not sustained.

Mr. BEGG. Mr. Chairman, I offer an amendment. On page 3, line 10, I move to strike out "$5,500" and substitute "$3,600."

The CHAIRMAN. The gentleman from Ohio offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BEGG: Page 3, line 10, strike out "$5,500" and insert in lieu thereof "$3,600."

Mr. ROGERS. Mr. Chairman, just one word on that amendment, because I regard this particular office as the most important, bar none, in the entire bill.

The office of Japanese secretary and the subsequent office of Chinese secretary are two positions upon which the course of history may depend. We absolutely need the best men in those countries, American citizens who shall protect our interests, that can be found anywhere. It takes about 10 or 12 years for men to begin to undertake the duty of Chinese secretary or of Japanese secretary. The ambassadors and ministers in China and Japan, in my judgment, do not begin to exercise as important functions as do these two men. We can not get men at $3,600 in these days that will do the job right, and with the greatest reluctance, and only because of the tremendous weight of the testimony, did the committee recommend the increase of these two salaries to $5,500 each.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Ohio [Mr. BEGG].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Turkish secretary of legation to Turkey, $3,600.

Mr. BLANTON. Mr. Chairman, I make a point of order against the paragraph because of the fact that it is directly contrary to the provision of law.

I am sure that the Chair is conscientious in his rulings, and I want to call his attention to the law. We have a statute fixing all of these salaries, the act of 1915, and I want the Chair to look over these secretaries' offices where the salaries are fixed. I submit it to the Chair. I am not making these points of order frivolously. I am making them in the conscientious belief that the committee has overridden its power and authority as an appropriating committee; that it had no right to change the legislation of this House. I hope that the Chair will give careful consideration to the point that I make. The law provides that this salary shall not be over $3,000. The act of 1915 makes a limit of $3,000 on this salary. It is a statute passed by this House. It is a statutory salary, and I submit that the committee had no authority to raise it $600.

The CHAIRMAN. What does the gentleman from Massachusetts say?

Mr. ROGERS. Mr. Chairman, so far as I know, there is no statutory provision for these salaries.

The CHAIRMAN. That is all that is necessary. The point of order is not sustained. The Clerk will read.

The Clerk read as follows:

Chinese secretary of embassy to China, $5,500.

Mr. BLANTON. Mr. Chairman, I make the point of order against the paragraph that the paragraph provides for a salary of $5,500, when the substantive law of the land provides for a salary of only $3,000. Heretofore this salary was carried at $3,600 and has been raised from $3,000 to $5,500.

The CHAIRMAN. What does the gentleman from Massachusetts say?

Mr. ROGERS. It is in precisely the same situation as the other.

The CHAIRMAN. The gentleman from Texas [Mr. BLANTON] realizes, I presume, that a provision of the current law—that is, the amount of the appropriation made in the preceding year—is not a statutory provision limiting the amount of the appropriation.

Mr. BEGG. Mr. Chairman, will the Chair permit a word?

The CHAIRMAN. Yes.

Mr. BEGG. There is no embassy at China. How can you have a secretary to an embassy there when there is no embassy?

Mr. ROGERS. Mr. Chairman, I was about to ask unanimous consent that in various places on this page, and also on pages 4, 5, and 6, the Clerk be authorized to change the word "embassy" back to the word "legation" wherever it appears in connection with China, and to change the word "legation" back to the word "embassy" wherever it occurs in connection with Turkey. There are perhaps 18 or 20 such places, and it is simply necessary to save time in changing each one, because of the ruling in connection with the items on the first page of the bill.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Chinese assistant secretary of embassy to China, to be appointed from the corps of student interpreters, $4,000.

Mr. BLANTON. Mr. Chairman, I make the point of order that there is no law authorizing a Chinese assistant secretary of embassy to China, to be appointed from the corps of student interpreters, at a salary of $4,000, because there is no law authorizing a corps of student interpreters.

The CHAIRMAN. What has the gentleman from Massachusetts to say?

Mr. FLOOD. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. I shall be glad to yield to the gentleman from Virginia.

Mr. FLOOD. There is no law authorizing such an appointment as that. The law that the gentleman from Texas [Mr. BLANTON] referred to is a law that classified the secretaries at embassies and legations. This is a peculiar kind of secretary. It does not come under the secretaries of class 1, 2, 3, or 4. We have four classes, I believe.

This is a secretary who speaks the Chinese language, a secretary not authorized by law, who never has been authorized by law, and has only been carried in appropriation bills.

The CHAIRMAN. If that is the case, the point of order made by the gentleman from Texas [Mr. BLANTON] is good.

Mr. FLOOD. That is the case. That is the fact.

Mr. ROGERS. Mr. Chairman, I should like to discuss the point of order. I am entirely convinced that the prior ruling of the Chair was right. Under the general constitutional obligations of the President, and under the organic act of the State Department which I read into the RECORD yesterday, it is the function of the President and of the Department of State to carry on intercourse and establish relationships with the nations

of the world. In pursuance of that duty the President of the United States has for many years sent a minister to China, a minister or ambassador to Japan, and a minister or ambassador to Turkey. That duty, and the sending forth of the officials in pursuance of that duty, necessarily carry with them the obligation to perform adequately and efficiently such functions as are usually performed by our foreign representatives. It is a matter of common knowledge, almost a matter of good sense, I should say——

The CHAIRMAN. Will the gentleman permit the Chair to ask him this question: While it might be true and probably would be true that the argument of the gentleman that this is based upon the constitutional right and might authorize the appointment of an assistant secretary, does the gentleman from Massachusetts contend that the constitutional right would also go to the extent of declaring that such assistant secretary should be appointed from the corps of student interpreters? It seems to the Chair that this is very like legislation.

Mr. ROGERS. So far as the clause relating to the appointment from the corps of student interpreters is concerned it is a limitation, and simply restricts the class of persons from whom the appointment can be made. The corps of student interpreters, of course, may also be questioned in the same way as to their validity under existing law. I should answer that question just as I am attempting to answer the present parliamentary objection, that in order to perform adequately our functions in such countries as China, Japan, and Turkey it is necessary to have expert linguists who can speak those languages. I think the Chair would admit that without express sanction of law our ambassador could utilize the cables in order to communicate with his Government. It is one of the implied functions that is involved in the performance of the duties of our representatives overseas. I had assumed that the appointment of linguistic experts, the appointment of student interpreters, would be conceived by the Chair to be of precisely the same general character.

Mr. BLANTON. Will the gentleman yield?

Mr. ROGERS. Yes.

Mr. BLANTON. Does not the gentleman remember that all of these items were held out of order, and that the points of order were sustained last year, and the Senate put these items back into the bill after it got to the Senate?

Mr. ROGERS. The gentleman is mistaken about the second half of his statement.

Mr. BLANTON. About the student interpreters?

Mr. ROGERS. Let me answer the gentleman's question, please. The gentleman is mistaken about the second half of his statement, because, while these items were ruled out of order, they were put back again under a rule brought in by the Committee on Rules the next morning.

Mr. BLANTON. But they were held out of order.

Mr. ROGERS. Yes; but there was no argument on the point of order. The point of order, as I remember, was conceded.

Mr. BLANTON. And I cite the decision in the last House.

Mr. ROGERS. I assert that under the doctrine of implied authority, it is merely a matter of good sense that in those remote countries we must have people who can talk the language for us.

Mr. BEGG. I merely want to ask the gentleman if, under the doctrine of implied authority, he is perfectly willing to grant to the ambassador or to the Secretary of State permission to go as far as he likes with no check on his action?

Mr. ROGERS. The Department of State is always limited by the amount of money that Congress appropriates in this very bill. Congress does not lose control. The question here at issue simply involves a point of order on an appropriation bill. It has nothing to do with the powers of Congress or the rights of the Executive.

The CHAIRMAN. The Chair is ready to rule. The point of order is sustained.

Mr. McCLINTIC. Mr. Chairman, I suggest the absence of a quorum.

The CHAIRMAN. The gentleman from Oklahoma makes the point of no quorum.

Mr. WALSH. The gentleman from Oklahoma has not made the point of no quorum.

Mr. McCLINTIC. I have.

Mr. WALSH. If I heard the gentleman's language correctly, he did not.

Mr. McCLINTIC. I will leave it to the Chair.

The CHAIRMAN. The Chair does not know——

Mr. McCLINTIC. Well, Mr. Chairman, I make the point of no quorum.

The CHAIRMAN. The gentleman from Oklahoma makes the point that no quorum is present. The Chair will count. [After counting.] Seventy-two Members present; not a quorum.

Mr. ROGERS. Mr. Chairman, I move that the committee do now rise, and upon that I demand tellers.

Tellers were ordered; and the Chair appointed as tellers Mr. ROGERS and Mr. McCLINTIC.

The committee divided; and the tellers reported that there were 8 in the affirmative and 74 in the negative.

The CHAIRMAN. The tellers report that there are 8 ayes and 74 noes. Not a quorum. The doors will be closed, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Andrews, Md.	Ferris	Kincheloe	Rodenberg
Anthony	Fish	Kinkaid	Romjue
Aswell	Frear	Kitchin	Rowan
Ayres	Freeman	Kreider	Rubey
Babka	Gallagher	Langley	Rucker

Elston	Kennedy, R. I.	Reed, W. Va.	Yates
Emerson	Kettner	Riordan	
Evans, Nev.	Kiess	Robinson, N. C.	

The committee rose; and the Speaker having resumed the chair, Mr. TOWNER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill H. R. 15872, the Diplomatic and Consular appropriation bill, finding itself without a quorum, caused the roll to be called, when 232 Members answered to their names, and he presented a list of the absentees.

The committee resumed its session.

Mr. ROGERS. Mr. Chairman, in view of the ruling of the Chair, I ask unanimous consent that the words "to be appointed from the corps of student interpreters" appearing three times in lines 13 to 18 be omitted and that the language otherwise be allowed to stand.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

Mr. BLANTON. There was so much confusion on the floor, Mr. Chairman, that I could not hear the gentleman's request.

Mr. ROGERS. My understanding is that the Chair has sustained the point of order to the words "to be appointed from the corps of student interpreters," in lines 13 and 14, and I ask unanimous consent that the same words may be stricken out where they appear in lines 15 and 16 and lines 17 and 18, and that all three items be allowed to stand as thus modified.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

Mr. BLANTON. Mr. Chairman, reserving the right to object, would the gentleman be willing to place the salary of the assistant secretary in the embassy at Japan back to where it was, at $2,000, so that it will not be raised to $4,000, just double what it was in 1917?

Mr. ROGERS. Mr. Chairman, it is utterly impossible to get a trained, ambitious, able, competent young American citizen to go out to Japan for $2,000 a year. You might just as well wipe them off altogether as to attempt to do that. Therefore I can not accede to the suggestion of the gentleman.

Mr. BLANTON. Mr. Chairman, I object.

Mr. ROGERS. Mr. Chairman, I offer the following amendment, to be inserted after line 12, which I send to the Clerk's desk.

The Clerk read as follows:

Mr. ROGERS offers the following amendment: Page 3, after line 12, insert: "Chinese assistant secretary of embassy to China, $4,000; Japanese assistant secretary of embassy to Japan, $4,000; Turkish assistant secretary of embassy to Turkey, $2,000."

Mr. BLANTON. Mr. Chairman, I make the point of order that they are unauthorized by law.

Mr. ROGERS. Mr. Chairman, I understand that the latter two of the three items which I have suggested have not yet been reached, and I defer offering them until we have read that portion of the bill, but I now offer the first of the three as a substitute.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 3, after line 12, insert: "Chinese assistant secretary of embassy to China, $4,000."

Mr. BLANTON. Is the gentleman going to send up a blanket amendment and read part of it at one stage of the game and part at another?

The CHAIRMAN. As the Chair understood the situation, the gentleman from Massachusetts withdrew the amendment which he first offered and offers this as a substitute.

Mr. BLANTON. I make the point of order against the amendmetn that there is no such position as Chinese assistant secretary of embassy to China authorized by law.

The CHAIRMAN. Does the gentleman from Massachusetts desire to be heard?

Mr. BLANTON. And I challenge the gentleman to show authority in law for any such position.

Mr. ROGERS. As far as the verbiage is concerned, the amendment should read "legation" instead of "embassy," but the committee has given general consent for the changing of those items wherever necessary. As far as the general authority goes, which I assume is what the gentleman from Texas has in mind, it arises, as I conceive it, under the general provision of the law dating from 1855, and many times since repeated, authorizing the sending out of secretaries. Whether our official is called a secretary or an assistant secretary, it seems to me, is not very material under the law.

Mr. BEGG. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. Yes.

Mr. BEGG. Does not the gentleman think it would probably cause dissatisfaction to pay an assistant secretary to a legation the same salary that is paid to an assistant secretary to an embassy, one to China and the other to Japan?

Mr. ROGERS. I think not. A man who is out there as a regular secretary in the Consular Service or in the Diplomatic Service receives a salary based on his grade of service rather than upon the kind of place to which he is attached.

The CHAIRMAN. The point of order is overruled. The question is on the amendment offered by the gentleman from Massachusetts.

The amendment was agreed to.

The Clerk read as follows:

Japanese assistant secretary of embassy to Japan, to be appointed from the corps of student interpreters, $4,000.

Mr. BLANTON. Mr. Chairman, I make the point of order that the matter is legislation unauthorized by law on an appropriation bill.

The CHAIRMAN. The point of order is sustained.

Mr. ROGERS. Mr. Chairman, I offer the following amendment which I send to the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. ROGERS: Page 3, after line 14, insert "Japanese assistant secretary of embassy to Japan, $4,000."

Mr. BLANTON. Mr. Chairman, I make the point of order that the Congress has never passed any law authorizing such a position.

The CHAIRMAN. The point of order is overruled.

Mr. BLANTON. Mr. Chairman, I ask recognition on the amendment, opposing it.

The CHAIRMAN. The Chair recognizes the gentleman from Texas.

Mr. BLANTON. Mr. Chairman, in the preceding paragraph this appropriation committee for the salaries of secretaries in all the Diplomatic Service has increased the statutory amount which is allowed by law, which the Congress has heretofore provided, from $186,000 to $354,000. For the Japanese assistant secretary of embassy to Japan they have increased it from $3,600 to $5,500, and for the Turkish assistant secretary of legation to Turkey they have increased it from $3,000 to $3,600. For the Chinese assistant secretary of the embassy to China, to be appointed from the corps of student interpreters, they have increased his salary from $2,000 to $4,000, just double. For the Japanese assistant secretary of the embassy to Japan, they have increased it from $2,000 to $4,000, and these increases are all the way through the bill. I want to call the attention of my good Republican friends who have charge of the legislation at this time, and of the country, to the fact that last year when this bill was before the House the distinguished gentleman from North Carolina [Mr. KITCHIN], who was on the floor looking after the interests of the people of this country, read into the record the reasons of the Department of State for asking for increases for all of these salaries. The only reason on God's earth that the department gave was that these secretaries in the foreign courts and foreign capitals, where kings preside, in order to attend social functions there, in order to be prepared to go out in society, they had to have more money, and you are keeping this whole army of secretaries and assistant secretaries over in the courts of kings with salaries increased, when you have got several hundred thousand people in the United States without jobs hunting for positions to get bread and meat to keep their wives and little children from starving to death. You are thus carrying on high society. You are doing just what you did here a couple of weeks ago after all these tremendous piles of lumber were brought up here, without any authorization of law, and piled in front of the Capitol—you appropriated $50,000 and fixed to appropriate $60,000 more for policing, and $37,000 more to bring the cadets here, and another $100,000 more for incidentals, then after that bills that would come on Congress to have a great rich and fashionable society here for an inauguration at the behest of the Washington hotels, which were charging $250 for five days' reservation, until your President called you down and said you had to stop. [Applause.] Until he got you up here and spanked every one of you and told you you had no right to thus spend the people's money in any such way. Now, you have got to spend the money of the people for moving all this lumber down here from in front of the Capitol. [Applause.]

The CHAIRMAN. The time of the gentleman has expired. The question is on the amendment offered by the gentleman from Massachusetts.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Turkish assistant secretary of legation to Turkey, to be appointed from the corps of student interpreters, $2,000.

Mr. BLANTON. Mr. Chairman, I make the point of order that this is legislation on an appropriation bill and unauthorized by law.

The CHAIRMAN. The point of order is sustained.

Mr. ROGERS. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 3, after the amendment just adopted insert "Turkish assistant secretary of embassy to Turkey, $2,000.

Mr. BLANTON. I make the point of order, Mr. Chairman, that the item is unauthorized by law.

The CHAIRMAN. The Chair does not think it is subject to the point of order.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

To pay the salaries of ambassadors, ministers, consuls, vice consuls, and other officers of the United States for the periods actually and necessarily occupied in receiving instructions and in making transits to and from their posts, and while awaiting recognition and authority to act in pursuance with the provisions of section 1740 of the Revised Statutes, $65,000, or so much thereof as may be necessary.

Mr. WALSH. Mr. Chairman, I offer an amendment to strike out, page 3, line 23, the words "officers of the United States."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Mr. WALSH offers the following amendment: Page 3, line 23, after the word "other," strike out the words "officers of the United States."

Mr. WALSH. Mr. Chairman, during the past two days the course of legislation has been accompanied by a somewhat unusual spectacle. One of the officers of the United States, from whom heretofore we had not been led to expect any unusual activities on the part of the consideration of appropriation bills, has burst forth across the horizon like a new constellation. There has been——

Mr. MCCLINTIC. Mr. Chairman, I make a point of order that the gentleman is not speaking to the amendment.

Mr. WALSH. The words I seek to strike out are "officers of the United States," Mr. Chairman.

The CHAIRMAN. The Chair can not at this time interpret what the gentleman is going to say.

Mr. McCLINTIC. Mr. Chairman, I raise the point of order that there is no quorum present. I have the right to raise that at any time.

Mr. WALSH. I have not yielded to the gentleman from Oklahoma, Mr. Chairman.

The CHAIRMAN. The Chair presumes according to precedent the point of order can be raised at any time that no quorum is present.

Mr. WALSH. I will be glad to have 100 gentlemen here to listen to what I have to say.

The CHAIRMAN. The Chair will count. [After counting.] One hundred and eight Members are present.

Mr. WALSH. Mr. Chairman, there are rumors which have the foundation of statements in the public press that there is some internal dissension upon the minority side which prompts the sudden activity of our heretofore good-natured and genial friend from Oklahoma into such strenuosity that he desires to announce to the country at large that he is willing to block the wheels of legislation because, perhaps, some of his colleagues have not followed the course which he had reason to believe had previously been indicated.

He attempted this morning to read a lecture to the distinguished statesman from Texas, and was prevented by a point of order having been made. I am sure it will be of interest to the people of the great State of Oklahoma to know that one of their delegation in the lower House of Congress has suddenly risen to that eminence where he knows he can prolong necessary legislation and can count less than 100 Members upon the floor. But I doubt if the gentleman will succeed in getting what he believes to be his just dues from the minority side by such tactics as that, if there be, as is rumored throughout the cloakrooms and in the columns of the daily press, a lack of justice done to him. Because we know that the gentleman from Texas [Mr. GARNER], whom he sought to admonish this morning, is very seldom caught napping, either in the deliberations of the House or in directing the affairs of his own party, which now happens to be in the minority. And I regret that our heretofore genial friend has sought to follow this course and to block important legislation in the closing hours of this Congress, and has permitted to let what appears, from the accounts that are printed in the daily press, to be purely a personal matter, to so guide and formulate his actions here upon the floor that men in charge of great measures, and the party upon whom has fallen the responsibility of providing the funds for carrying on the several executive departments of this Government, should be impeded and interfered with in carrying on the work here upon the floor. I know that the gentleman from Oklahoma [Mr. MCCLINTIC] feels that he is really within his rights in demanding that there be at all times a quorum present. Fortunately there is usually a quorum present, but I have been led to expect that possibly this sudden burst of activity on the gentleman's part was inspired by a desire to indicate to his constituents in that great State that he was acting along constructive lines, and that he was not seeking to qualify as an expert in thrusting the monkey wrench into the machinery.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. McCLINTIC and Mr. KNUTSON rose.

The CHAIRMAN. The gentleman from Oklahoma [Mr. MCCLINTIC] is recognized.

Mr. McCLINTIC. Mr. Chairman, I move to strike out the last word.

Mr. Chairman and gentlemen of the House, I have enjoyed the lecture delivered by the handsome gentleman from Massachusetts [Mr. WALSH], and I can say to you that if he has any serious objection because I have made the point of no quorum, he ought to resign his seat and go back home and let some one come from his district who is willing to sit here and help carry on the business affairs of this Nation.

On yesterday when I raised the point of no quorum there were only 4 on one side and less than 12 on the other. I had the right to demand that there be a quorum here in order to take care of the business affairs of this country and to properly look after the legislation that was being considered at the time. I have not made any statement here which would substantiate the truth of the remarks made by the gentleman from Massachusetts. I have not impeded the progress of any bill in any way, except what I had a right to do according to the rules and regulations that govern this body. It is true that I have objected to the extension of extemporaneous remarks in the RECORD, and if the gentleman from Massachusetts will refer to yesterday's RECORD he will have brought home to him some of the evils that are connected with that practice, because he will see there an extension of remarks that covers over 90 pages, costing the people of this Nation many, many thousands of dollars.

He belongs to the party that is in control of the affairs of this Nation; he belongs to the party that has gone out and promised economy, and yet when a Member of Congress stands up in his right and tries to put into effect a program of economy, he stands up here and points the finger of scorn and criticism at him and tries to leave the impression that he is not performing his duty in the proper manner.

I can take the criticism that has been leveled against me by the handsome gentleman from Massachusetts in the proper spirit. It does not make me sore in any way. I have my rights here. I intend to exercise them, and as long as there is no quorum present to carry on the affairs of this House, then I will continue to make the point of order if the occasion demands it. If there are any who object, the people back home ought to know it, so that they can send some one here who is willing to occupy a seat and assist in carrying on the business of the House.

Mr. MONDELL. Will the gentleman yield?

Mr. McCLINTIC. Not now.

Mr. MONDELL. When did the gentleman find out that——

Mr. McCLINTIC. I will not yield.

It is true, Mr. Chairman, that I did intend to put a statement in the RECORD this morning, but that statement was not what the gentleman from Massachusetts said it was. It was simply my opinion relative to the emergency tariff bill, which was passed by this body some time ago.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired. The pro forma amendment is withdrawn. The Clerk will read.

The Clerk read as follows:

Interpreter to legation and consulate general to Persia, $2,000.

Mr. BLANTON. Mr. Chairman, I make the point of order against the salary that it is a statutory salary and that it has been raised by the committee just double to that authorized by law.

The CHAIRMAN. What has the gentleman from Massachusetts to say?

Mr. ROGERS. Is that the salary in line 12?

Mr. BLANTON. Lines 11 and 12.

Mr. ROGERS. I confess if the gentleman has discovered a statute authority for this item at all he has the advantage of the gentleman in charge. [Laughter.]

Mr. BLANTON. I am glad to get that admission. There is no law for it, but the Committee on Appropriations in past years, up until the war was in progress at least, allowed this position only $1,000.

Mr. ROGERS. Mr. Chairman, if the gentleman will permit, I may say that ever since I have been on the committee, for eight years past, the salary has been $2,000.

Mr. BLANTON. How about 1917?

Mr. ROGERS. It was $2,000 then.

Mr. BLANTON. I have the act here, which shows it was $1,000. If the gentleman will look at the act of 1917 he will see that only $1,000 was appropriated for this salary. That is, the act for the fiscal year ending June 30, 1917.

Mr. ROGERS. The gentleman is correct and my previous statement was incorrect. But, of course, that has no bearing on this question.

Mr. BLANTON. I make the point of order against the whole paragraph that it is not authorized by law, under the admission of the gentleman from Massachusetts.

Mr. ROGERS. I ask unanimous consent, Mr. Chairman, to make a general statement for two minutes.

The CHAIRMAN. The gentleman from Massachusetts has the right to make a statement, because the Chair recognized him to argue his point of order.

Mr. ROGERS. Mr. Chairman, I stated in my remarks yesterday during the general discussion of the bill that I had no desire to cover up points of order or to seek to "put anything over" the House or the committee.

There are in this bill, beginning on line 10 of page 4 and running down to line 19 of page 6, perhaps 12 different items which relate to the interpreter service at the oriental embassies, legations, and missions of the United States. Those items, in my judgment, are all essential to the proper conduct of the business of the United States in the four or five countries affected. I think we might just as well withdraw if we can not employ competent interpreters in China, Japan, Turkey, Siam, and Persia. We simply could not function in any of those countries without interpreters. For many years, on that theory, precisely these identical items have been carried in the Diplomatic and Consular acts year by year. The gentleman

from Texas [Mr. BLANTON] caught a small change, dating back to 1917, which I had forgotten, but in general the statement I make is true. There is only one considerable exception. On page 5, where there is a provision for student interpreters in Turkey, we have cut down to 4 in this bill the 10 student interpreters who have been carried for years in prior appropriation acts.

Mr. BLANTON. Will the distinguished gentleman yield?

Mr. ROGERS. Certainly.

Mr. BLANTON. The gentleman had notice, and his committee had for at least a year, because all of these items were cut out on points of order which I made last year. Does not the gentleman think it is time for the legislative committee to begin to function and to bring in bills providing legislation for it?

Mr. ROGERS. That may be so, but the fact is that we have not authority of law. I rose at this point to tell the gentleman from Texas, and any other gentleman who may be disposed to follow him, that every one of these items, from page 4, line 10, to page 6, line 18, is subject to a point of order if the gentleman cares to make the points of order as the items are reached. But I say again that, in my judgment, it would absolutely cripple and even wreck the work of the United States in China and Japan and in the other countries of the Orient, where, if we are going to be adequately represented in the realms of politics and in the marts of trade, we must have an adequate and efficient foreign office to look out for the welfare of the United States. If the gentleman eliminates these interpreters, he brings to a standstill the possibility of our functioning in those countries.

Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. TOWNER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 15872) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1922, had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. LANKFORD (at the request of Mr. LARSEN), for to-day and to-morrow, on account of sickness in his family;

To Mr. RODENBERG (at the request of Mr. KNUTSON), for three days, on account of death in the family;

To Mr. CROWTHER, for four days, on account of important business; and

To Mr. OLNEY, for one week, on account of illness.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. RAMSEY, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bills:

H. R. 4184. An act for the relief of C. V. Hinkle;

H. R. 974. An act for the relief of W. T. Dingler;

H. R. 11769. An act to amend an act entitled "An act to provide a civil government for Porto Rico, and for other purposes," approved March 2, 1917; and

H. J. Res. 440. Joint resolution directing the Secretary of War to cease enlisting men in the Regular Army of the United States, except in the case of those men who have already served one or more enlistments therein.

ENROLLED BILL SIGNED.

Mr. RAMSEY, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 12502. An act providing for a report on the cost of improving and maintaining the Government boulevard on Missionary Ridge, in the Chickamauga and Chattanooga National Military Park.

LEAVE TO EXTEND REMARKS.

By unanimous consent, Mr. MCARTHUR was given leave to extend remarks in the RECORD on the bill reported from the Committee on Roads.

ORDER OF BUSINESS ON MONDAY NEXT.

Mr. MONDELL. Mr. Speaker, I desire to renew the request for unanimous consent that I made this morning, that the business which would be in order a week from Monday may be made in order on Monday next. The gentleman from Texas [Mr. BLANTON] has, I think, consented to withdraw his objection.

The SPEAKER. The gentleman asks unanimous consent that the business in order one week from Monday next be made in order on Monday next. Is there objection?

Mr. BLANTON. Reserving the right to object, I objected this morning, but I have been assured that the hospital bill will be called up and given consideration on Monday, and therefore I withdraw the objection.

The SPEAKER. Assured by whom? Not by the Chair.

Mr. BLANTON. Assured by the Members of the House.

The SPEAKER. The Chair wishes it understood that the Chair is free.

Mr. BLANTON. Then I object, Mr. Speaker.

MINORITY VIEWS ON RIVER AND HARBOR APPROPRIATION BILL.

Mr. SMALL. I ask leave to file minority views on the river and harbor bill, to be printed.

The SPEAKER. The gentleman from North Carolina asks unanimous consent to file the views of the minority on the river and harbor bill. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. ROGERS. I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 57 minutes p. m.) the House adjourned until Saturday, January 29, 1921, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. COOPER, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (S. 3259) for the public protection of maternity and infancy and providing a method of cooperation between the Government of the United States and the several States, reported the same with amendments, accompanied by a report (No. 1255), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. DEMPSEY, from the Committee on Appropriations, to which was referred the bill (H. R. 15935) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, reported the same without amendment, accompanied by a report (No. 1256), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. ZIHLMAN, from the Committee on the District of Columbia, to which was referred the bill (H. R. 13847) to provide for the closing of Cedar Road between Quincy Street and Shepherd Street NW., in the District of Columbia, reported the same without amendment, accompanied by a report (No. 1257), which said bill and report were referred to the House Calendar.

Mr. LANGLEY, from the Committee on Public Buildings and Grounds, to which was referred the joint resolution (H. J. Res. 445) authorizing the Public Buildings Commission created by the act of Congress approved March 1, 1919, to inquire into the feasibility of providing a site and erecting thereon a suitable official apartment house and hotel for the accommodation of the Vice President and Members of the Senate and House of Representatives and their immediate families, and to submit a report thereon to Congress with recommendations at the earliest practicable date, reported the same without amendment, accompanied by a report (No. 1258), which said bill and report were referred to the House Calendar.

Mr. SUMMERS of Washington, from the Committee on the Public Lands, to which was referred the bill (H. R. 15372) authorizing the lease of lands containing deposits of minerals, oil, oil shale, or gas by the State of Washington for longer periods than five years, reported the same with amendment, accompanied by a report (No. 1259), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. LAMPERT, from the Committee on Election of President, Vice President, and Representatives in Congress, to which was referred the joint resolution (S. J. Res. 248) relieving and discharging from the fine imposed by law and authorizing the payment of messengers appointed by the electors of certain States to deliver the electoral vote of such States for President and Vice President, reported the same without amendment, accompanied by a report (No. 1260), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. GOULD, from the Committee on the District of Columbia, to which was referred the bill (H. R. 15914) to amend the provisions of an act relating to certain railway corporations owning or operating street railways in the District of Columbia, approved June 5, 1900, reported the same with an amendment,

accompanied by a report (No. 1261), which said bill and report were referred to the House Calendar.

Mr. PORTER, from the Committee on Foreign Affairs, to which was referred the bill (H. R. 15482) to amend section 5 of the act entitled "An act to incorporate the American National Red Cross," approved January 5, 1905, reported the same without amendment, accompanied by a report (No. 1262), which said bill and report were referred to the House Calendar.

Mr. MAYS, from the Committee on the Public Lands, to which was referred the bill (H. R. 14851) for the relief of occupants of lands included in the Bellevue grant, in St. Landry Parish, La., reported the same with amendments, accompanied by a report (No. 1263), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. TILLMAN, from the Committee on the Public Lands, to which was referred the bill (H. R. 15824) to authorize the Secretary of Commerce to convey to Augustus S. Peabody certain land in Galveston County, Tex., reported the same with an amendment, accompanied by a report (No. 1254), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. MOORES of Indiana: A bill (H. R. 15934) to provide for the relief of certain employees of the Government who have become eligible for retirement under the provisions of the retirement act of May 22, 1920, and have thereafter been continued in the service or reemployed therein; to the Committee on Reform in the Civil Service.

By Mr. DEMPSEY: A bill (H. R. 15935) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes; committed to the Committee of the Whole House on the state of the Union.

By Mr. MAYS: A bill (H. R. 15936) to provide for the disposition of gilsonite deposits; to the Committee on the Public Lands.

Also, a bill (H. R. 15937) to authorize the President of the United States to locate, construct, and operate a railroad from the Kaibab National Forest, Ariz., to the nearest practicable railway connecting point to the north thereof; to the Committee on Railways and Canals.

By the SPEAKER (by request): Memorial of the Legislature of the State of South Dakota, in connection with the lowering of water in Lake Andes, in that State; to the Committee on Irrigation of Arid Lands.

Also, memorial of the Legislature of the State of New York, favoring the enactment of the Wadsworth resolution to restrain the Federal authorities from the use of the boats, barges, and equipment on the Erie Canal system; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BURDICK: A bill (H. R. 15938) granting a pension to Ella McKenzie; to the Committee on Invalid Pensions.

By Mr. CROWTHER: A bill (H. R. 15939) granting a pension to Ellen E. Rose; to the Committee on Invalid Pensions.

By Mr. FESS: A bill (H. R. 15940) granting a pension to Jane Hughes; to the Committee on Invalid Pensions.

By Mr. FIELDS: A bill (H. R. 15941) for the relief of Joseph E. Lindsey; to the Committee on War Claims.

By Mr. WHITE of Kansas: A bill (H. R. 15942) granting a pension to Orel J. Lovewell; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5329. By the SPEAKER (by request): Petition of the Woman's Roosevelt Memorial Association of New York City, favoring the coinage of a 2-cent piece bearing the head of Theodore Roosevelt; to the Committee on Coinage, Weights, and Measures.

5330. Also, petition of Henry P. Shupe Post No. 22, of the American Legion, indorsing the Rogers bill and the Capper bill; to the Committee on Interstate and Foreign Commerce.

5331. By Mr. CANNON: Petition of sundry citizens of Kankakee County, Ill., asking for the immediate recognition of the Irish republic by the Government of the United States; to the Committee on Foreign Affairs.

5332. By Mr. CROWTHER: Petition of the Central Labor Union of Amsterdam, N. Y., favoring enactment of a daylight-saving law; to the Committee on Interstate and Foreign Commerce.

5333. Also, petition of Montgomery County Pomona Grange, opposing daylight-saving legislation; to the Committee on Interstate and Foreign Commerce.

5334. Also, petition of the legislation board of the Brotherhood of Locomotive Engineers, urging enactment of the so-called Gronna bill; to the Committee on Interstate and Foreign Commerce.

5335. Also, petition of sundry citizens of Schenectady, N. Y., protesting against the occupation of Germany by French colonial troops; to the Committee on Foreign Affairs.

5336. By Mr. HERNANDEZ: Petition of the Chamber of Commerce of Roswell, N. Mex., favoring the Rogers-Capper bill; to the Committee on Interstate and Foreign Commerce.

5337. By Mr. HERSHEY: Petition of Aroostook and Penobscot Union, Pomona Grange, protesting against daylight-saving legislation; to the Committee on Interstate and Foreign Commerce.

5338. By Mr. JOHNSTON of New York: Petition of the Merchants' Association of the City of New York urging the passage of House bill 15662; to the Committee on Patents.

5339. By Mr. KETTNER: Petition of the Contemporary Club, of Redlands, Calif., on behalf of the preservation of our national parks; to the Committee on Water Power.

5340. By Mr. O'CONNELL: Petition of the American Forestry Association, Washington, D. C., urging the passage of Senate bill 3822 and House bill 12188; to the Committee on Agriculture.

5341. Also, petition of the Katonah Board of Trade, Katonah, N. Y., favoring 1 cent drop-letter postage; to the Committee on the Post Office and Post Roads.

5342. Also, petition of V. Henning & Sons, of Brooklyn, N. Y., favoring the daylight saving law; to the Committee on Interstate and Foreign Commerce.

5343. Also, petition of the Commercial Checkers' Union, No. 874, I. L. A., favoring Senate bill 4606, providing compensation for longshoremen; to the Committee on the Merchant Marine and Fisheries.

5344. By Mr. MORIN: Petition of 50 citizens of Pittsburgh, Pa., urging an amendment to the Volstead Act, permitting the manufacture and sale of beer and light wines under reasonable restrictions; to the Committee on the Judiciary.

5345. Also, petition of sundry citizens of the District of Columbia, in favor of light wines and beer; to the Committee on the Judiciary.

5346. By Mr. WATSON: Petition of the Makefield monthly meeting of the Religious Society of Friends, protesting against the expenditures of funds for war activities, etc.; to the Committee on Appropriations.

5347. By Mr. ZIHLMAN: Petition of the American Friends Service Committee, favoring the Sheppard-Towner bill; to the Committee on Interstate and Foreign Commerce.

UMI
